BREEDER & SPORTSMAN

VOL. 1.—No. 1.
No. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, JULY 1, 1882.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

NOTABLE HORSES OF CALIFORNIA.

DUCHESS OF NORFOLK.

We promised Mr. Winters that if Duchess of Norfolk did not win, her portrait should be withheld. While we intend to keep promises religiously, in this instance there are good reasons for breaking it, and circumstances which will warrant the violation. As the intelligence of her defeat did not reach here until after midnight Thursday, there was not time to confer with Mr. Winters before the form would have to go to press. We had another cut to take the place of the one selected for the opening of the series in case it was required, but from the meager telegraphic account we feel well assured that the filly is still entitled to rank as one of the "Notable horses of California," and that it would be rank injustice to defer her claims.

Her running at the May meeting here demonstrated that she was the possessor of rare powers, and until she has another trial, under circumstances which show that she is

"at herself," we cannot believe that she is otherwise than the Nonpareil we have rated her to be, being well acquainted with the peculiarities of the climate of Chicago at all seasons, and more particularly the drawbacks attending the peculiarities that are so prevalent during the latter part of June and the first of July. At these times there are violent rain storms, in some cases followed by a lowering of temperature very many degrees; at others, there is increased heat, murkiness, climatic revulsions, which induce languor, if not actual debility.

The track is rendered dangerous, as the rich, unctuous, dark prairie soil, when wet, affords no foothold, and the careful trainer is fearful that if he attempts strong work he will take chances of crippling, and, it may be, beyond recovery. The report that Duchess was leading at the three-quarter pole, means that she was in advance of the others

when a mile and a quarter had been made. In the same condition she was in when she won the Pacific Cup, after running a mile and a quarter at any pace, the least judicious rider would make, Jim Renwick could not beat her through the stretch.

In she goes, the first of the series of the grand horses of California, and if her owner takes us to task for the breaking of troth, all right. We will call him to account for going contrary to his own convictions, and changing a line of policy, which, if followed according to his original intentions, might have changed the result. Again, we have faith that before this number of the paper reaches the "City on the Lake," the Illinois Derby will be placed to her credit.

Shotover won the Derby, lost the Oaks. It may be that after losing the Oaks, the Cheers will come in for the Derby. Quien sabe?

NEW YORK CORRESPONDENCE.

NEW YORK, June 19, 1882.

MR. JOSEPH CAIRN SIMPSON—DEAR SIR: Your esteemed favor of 30th ultimo is received, and you have my best wishes personally and for the new enterprise with which you are identified. "Hark Comstock" thanks you for remembering him in your invitation to write for your new journal, but he has somewhat cooled down in that enthusiasm for the horse and his breeding which formerly impelled him to write frequently for the press, not from any lack of interest in the subject, but because the views which it used to seem important to him to have disseminated and considered have gradually become familiar to most of the leading minds who, by example, sway the action and plans of others. Younger enthusiasts are taking up the work, and putting more energy and surplus vitality into it than springs readily from those who have reached mid-life, and as one who is constitutionally inclined to take things easy, he finds himself tempted to look on and become a listener rather than a writer. Young blood tells, and in that fact lies one of the best assurances of the success of your journal.

Now, Mr. Editor, it hardly seems in place for me to tell so experienced a writer and journalist as yourself anything about conducting a newspaper, but an observer may occasionally notice things that an experienced worker overlooks or fails to estimate as correctly. Whatever force and training of the mind an individual may have, the world at large will surpass him in elaborating any subject that may be raised. Only in the sense of starting the ball in motion can he be considered the originator or leader in the thought, principle or theory. I said, a good many years ago, that all writers upon the subject of the horse (I was quite active in that direction myself at that time) were confirmed egotists. I think so still, and probably the rule applies in equal force to writers upon many other subjects. Most people, who voluntarily take pen in hand to place their views before the public, assume that upon the subject discussed they are more valuable than the average. This implies a certain degree of conceit, which may or may not be well founded. I have noticed that, while almost every theory put forward draws some adherents, there is scarcely one that does not excite opposition. Until a sufficiently broad statistical basis can be reached from which to generalize any theory of breeding, training, feeding, or in any manner manipulating the horse, no solution of the theory can be obtained that will be accepted as a practical principle by the mass of horsemen. I think, therefore, that the most useful and successful editors are those who sufficiently bury their personality as not to permit their journals to become partizan for or against any theory that is widely disputed or combatted, no matter how clearly the editor may think he is able to demonstrate the correctness of one side or the other. If he must be a partizan, let him not make his journal one. This may be scouted as conservatism by some, but what is the use of radicalism in such a position, if its effect is to bar out discussion from one side or the other. Let the correspondents hammer away, so long as they do so in a good tempered and gentlemanly way, and lucky is the editor who, by impartiality, keeps the good will of both sides, and thus brings up before his readers a full and free discussion. Let him keep in mind that it is not the editorial dictum that is to decide which practice shall be followed. It is the conclusion arrived at in each individual case by his mass of readers. For this reason, if an interesting topic fails to be sufficiently discussed by direct correspondence, let him quote both sides of the argument from other papers, striving to give forth clear-cut thought and argument impartially stated for both sides, and let him not be too anxious to add the official weight of his editorial pen to one side or the other of the argument, for in this case he will draw the opposition of one-half his readers against his journal that would otherwise have rested only against his correspondent, while, on the other hand, he will scarcely have more fully convinced those who were inclined to side with him. In this way he may hold the attention of a far greater number of readers, educate them just as thoroughly, convince them just as surely upon all theories that are well grounded, and accomplish far greater results, than by a partizan course. Most correspondents are sensitive at being snubbed or opposed in the editorial columns, and fail to continue their contributions. It is only the old stagers like myself and you, Mr. Editor, who are not particularly strenuous on that subject. Being just as conceited as the editors themselves, we are wont to keep right on without the slightest idea that we are worsted in the fray, and, if anything, rather glad that we have succeeded in getting the best of the editor before his own readers. But that is not the feeling with most writers, and many readers who side with the theories of their favorite writers are apt to take his grievances to themselves, and to look upon the editorial interference as dogmatism, and to drop the journal for a more congenial one. Hence, there is no journal or magazine in this country, in which the horse is a special feature, that is radical and combative in its editorial management, that has much circulation or carries much influence. While the combative course generally claims for itself the quality of courage, it is cowardly, in the fact that it seldom dares to let all opposing facts come unabridged before its readers, without attempting to thwart their force by editorial detraction. Such editors seem to think that they control the minds of their readers, and that eternal vigilance is the price of the possession. They are unwilling, because afraid of the result of permitting free thought to weigh the merits of the question, lest what they consider heresy undermine their pet theories. And in this they show a lack of confidence either in the stability of their theories or in the intelligence and discernment of their readers, and either interpretation lowers their journal in public esteem. When arguments are based upon a misstatement of statistics, it is the editorial duty to point out the errors, and leave the rest to the intelligence of the reader. If the editor rates his readers as incompetent, and treats them as such, he will soon have only that kind to deal with. I venture the prediction that twenty years hence that class of the newspaper business pertaining to the interests of breeders and sportsmen which has survived will be conducted in a much less personal way, both as to the nature of the matter published, and the individuality reflected from the editorial pen. The world is fast losing its awe of individual prominence. Intelligence is

spreading, and the private citizen feels quite capable of doing his own thinking. He no longer fears to differ with his preacher, his editor or his political leader. He indulges them as long as they do not insult his intelligence or provoke his common sense. When they do, he puts them aside with as little ceremony as they throw by a last year's hat. No radical theorist is right in detail, though he may have a meritorious principle involved. Hence, no one man has power to force a theory in detail upon a community. Journalism, to be acceptable in this age, must be conducted rather from the standpoint that it is merely a channel for the exchange of thought rather than one which originates it, and the duty of its managers merely to carry out the details of the exchange. Its leaders should bear the tone of compilations of popular thought rather than the personality of an original teacher. Its editors will have to exhibit confidence in the correctness of their theories to prevail against all discussion, rather than an anxious determination to force them at once, by heated argument, to a favorable verdict. The greatness of a newspaper will depend upon how impartially it conducts these principles. The editor must never permit the feeling to grow that he is greater than his paper, or that his paper is greater than the combined force of his readers. No brilliant mind ever published to the world a sterling thought but that a still greater mind seized upon and analyzed it more closely than its author did.

I don't know why I have written you my thoughts in this direction. Not because of any special application to your case, be assured. But the starting of your project caused my mind to run over a kindred field of journalism with which I have been familiar for many years, and of which I have watched the progress with no little interest. Much of it has been conducted with great ability, and yet it has frequently struck me that its best efforts were greatly marred by the too apparent personality and partizanship evident in its management.

Yours truly,

PETER C. KELLOGG.

WISCONSIN CORRESPONDENCE.

JANESVILLE, WISCONSIN, June 21, 1882.

JOSEPH CAIRN SIMPSON, ESQ.—DEAR SIR: Your esteemed favor of May 30th received. I am very much pleased to learn that you are about to engage in an enterprise for which your abilities so eminently qualify you. For many years I have been a close and interested reader, a student, in fact, of your writings, deriving great benefits, in a practical way, from the many valuable lessons and suggestions that you have given from time to time to the reading world. Your writings have possessed unusual interest to me, as I knew they emanated from the cultured mind of a practical horseman—no mere theorist, with his whims, fancies and vagaries. Not among all the Turf writers of America can be found one that so thoroughly understands the true science of breeding, and, at the same time, thoroughly informed in the science, as well, of developing the speed inheritance of a colt, no matter whether trotting bred or racing bred, as Joseph Cairn Simpson.

The field which you have chosen in which to labor is one wherein many golden harvests have been garnered, and I hope and believe that your efforts will soon place you among the successes of your adopted home, for which you have formed so strong attachments.

Although the BREEDER AND SPORTSMAN is to be published so remote from the great breeding interests of the Eastern and Middle States, we are confident that the paper will find the extensive circulation among our intelligent breeders and horsemen that it is sure to merit. Your able papers on breeding, the horse in motion, the horse's foot, etc., gained for the California Spirit of the Times a wide circulation in the East, and to these old subscribers of the California Spirit of the Times, I am sure will be added a greatly increased number.

Breeding in your section of the country has been a revelation in the development of the speed of the youngsters. But remarkable and wonderful as has been the performance of your colts, what would it have benefited the breeding world but for the able pen of one who could, in giving an account of the wonders performed, give us also at the same time a correct analysis of their breeding, and the combination of blood forces producing such happy results?

Mr. Stanford, Mr. Rose, and your numerous successful breeders, no doubt feel a justifiable pride in their glorious triumph, as breeders. At the same time, we trust they all fully appreciate the fact that the able pen is a very important factor in the problem of success, as a business proposition, in a breeding enterprise. Producing a wonderful colt is a gratification to the breeder, but his pride is that the world shall learn of his wonderful colt and the name of the successful breeder; also, the blood forces that have blended so kindly in producing marvellous results.

Basking and frolicking in the sunny field of your golden clime, while our young things are seeking the lee of a friendly straw stack to protect them from the driving snows and sleet of our rigorous winters, has given you an advantage undreamed of in early development. Of course, we are now all watching with deep interest the improvement maturer years may bring; whether the advantage gained at one and two years may be maintained at five or six, the age we feel safe in putting our trotters to the severe tests of circuit campaigns. Our Eastern breeders still look upon Kentucky as the great nursery of trotters, and heavy and successful drafts are being constantly made from their fashionable blood.

Tennessee is occasionally heard from, sending a fast pacer, Little Brown Jug, and a few trotters of merit. It has always seemed a great surprise to me that Tennessee with its unrivalled advantages of climate and grasses has been so much neglected as a breeding State. Its advantages over Kentucky in climate are as great as Kentucky over Wisconsin.

The improvement in breeding in Wisconsin the past few years has been remarkable. Thanks to the liberality of the millionaire lovers of the horse they have placed at the disposal of our breeders the very best blood in the land. Hon. J. I. Case, of Racine, has given us to breed from not only Governor Sprague, for which he paid what was at the time of purchase a remarkable price, \$27,500, but he has several sons of Dictator of rare individual merit and great promise as sires. We will mention, as a "sample," Phallas, by Dictator, full brother to Dexter, 1st dam by Clark Chief, 2d by Erricson, 3d by Sir William, by Sir Archey, &c., can

trot in 2:25, five years old; his full brother Tyrant and many others. Of Gov. Sprague we have the most extravagant faith in the get of Sprague. We are happy in the possession of two—filly and colt—both please me. Swigert has proven a valuable acquisition to our State, and from the class of mares served has been a remarkable success. Had he remained in Kentucky no sire in America would have shown a handsomer list of fast ones. I have four, and like them. One of the best bred sons of Hambletonian, Milwaukee, full brother to Curtis Hambletonian, is owned by Chas. T. Bradley, of Milwaukee; he is also a most successful sire and a favorite with our breeders; from number of mares served he has begotten many very fast and level-headed trotters. Mr. Bradley has by him one of the finest four-year-old fillies in the country, so good that last week he refused for her \$5,000. We have several well-bred sons of Almont in Southern Wisconsin, and all growing successful sires. I have a three-year-old gelding by Athlete, son of Almont, owned by Dr. H. P. Strong, that is the best three-year-old I have ever owned. They say "the best three-year-old in Wisconsin." I am just informed that a filly, two years old, 15 $\frac{1}{2}$ hands, by Swigert, and a good one, has a hind leg broken between pastern and gambrel joints; evidently from a kick in pasture. Now, this is one of those little episodes in breeding, which, while it may furnish variety, is not so very pleasant. You may ask, kill her? Not if veterinary skill can save her. Sired by Swigert, I saw him trot a full mile four weeks from service of 80 mares in 2:29, half in 1:10 $\frac{1}{2}$; dam by Mambrino Star, 2:28 $\frac{1}{2}$; 2d dam Reed's Morgan Messenger, by Hill's Black Hawk, dam by Lady Messenger, by American Messenger, &c.; 3d dam by Evans Backus, &c. She could trot faster than any two-year-old I have ever handled. If I can save her I shall prize her for a brood mare. Sold, her full sister, coming four, for \$1,500; her full brother, coming three, for \$750, and was offered \$800. I will console myself by saying, "glad it was no worse."

You have written many interesting articles on various themes; a very interesting article might be written on "My Experience in Buying Horses for Friends."

With my best wishes for a golden harvest, I am, very truly yours,

MAMBRINO.

LOS ANGELES CORRESPONDENCE.

SUNNY SLOPE, SAN GABRIEL, CAL.,
June 26, 1882.

MR. JOS. CAIRN SIMPSON—DEAR SIR: I received your letter, also your circular, from which I see that you are going to publish a sporting paper in San Francisco. Inclosed please find five dollars for subscription, I am much pleased with your new enterprise, and if good wishes will avail you it will be prosperous.

I am much flattered by your good opinion about my capacity, and would be much pleased to do anything in my power to help along. For the present, time will not permit me to do much, but hope some future day to avail myself of your request. My young trotters are doing well, all trotting finely, but I do not have many in training as yet. This year I have a large number of foals, and not only numerous, but the best bred lot and the best "lookers" I ever saw. This year my colts have run largely to males, Minnie-ha-ha leading off, and followed by sister to Beautiful Bells, sister to A Rose, Georgiana, by Overland, dam Maggie Mitchell, by Clay Pilot, g. d. by Dr. Spaulding's Abdallah; bay mare Sampson, son of Hambletonian, dam by Sealy's American Star, Blonde by Tecumseh, dam by St. Clair, Peg Wofington, Souvenir by The Moor, dam Lulu Jackson, a thoroughbred, by Jack Malone, and two Echo fillies out of a mare by Langford. All these are stallion colts, and all but one by Sultan, and these are not all.

You can see from this that there are several mares by The Moor, and Sultan being by the Moor, it makes very close in-breeding. It has ever been a favorite theory with me, this in-breeding, yet I have seen so many failures that I began to have misgivings about it. For myself I have had no opportunity until this year that would give me a line of facts to go by. This year I have four two-year-olds that I am training; all are perfect in conformation, large size and fast. From this I am led to believe that in-breeding will stand the test with The Moors. The best yearling (stallion) in my stable is an in-bred Moor. He is the largest, has more speed and as much style and beauty of form as any of my stock, whether in-bred or otherwise.

I am for the first time handling yearlings for speed; I have three at work now and then, and, so far, all goes well. I have ever believed that judicious handling can never be done too young, but that is the exact point: What is judicious handling? and it takes much experience and good sense to determine. Nine men in ten will do too much if they are believers in the theory; and again, nine men in ten will do too little if they believe that early development is an injury.

The breeding and training of trotters present an endless school of valuable lessons. Every year adds experience, and every new colt is different from all before it, requiring, in some particulars, a change of treatment. There are many blunders committed, and many colts are ruined by a want of judgment or sense; and again, many fail by accidents or some inherent weakness. But this is not confined to young things. How many old horses are trained and banged from year to year, and how many ever come to a race, but drop out of existence and are never heard of again? Yet some phenomenal youngster appears as a two-year-old, something happens to him, and the world's finger is pointed at him, and all is laid to early training. Whereas, if the colt had not been trained while young, it is nine chances in ten he would have never been heard from at all. Old horses fail too. St. Julien was laid up all summer, Santa Claus has to be retired for this year, Mauds S. had to be withdrawn from the turf for last part of last season; yet there is a Trinket So-So, and others, who were fast when young, and are fast yet. It is true there have been three and two-year-olds that were fast when young, and are not heard from now. Part of these were injured while being worked, but some of them are sound yet, but have not improved on their young form. It is a fact, that some colts, and I believe it runs in families, or rather follows the sire, will trot when young as fast as they ever can. This may be fast, or it may not be better than a four-minute or a three-minute gait, and all the training, whether done when they are young or old, will not get them to trot beyond it. I have trained colts

from many different stallions, and this has been my experience. Each stallion seemed to have a given capacity to get trotters, which would vary some small degree with different mares, yet there was a stubborn uniformity that would make itself felt, and could not be overcome. Yet I could learn colts to trot while young much quicker, with less trouble or toil, and with less liability of hurting or injuring them, than I could older ones of the same families. A stallion may get fast young trotters that will improve with age, or he may get fast young trotters, or slow young trotters, that will not improve with age. Some stallions who get fast young trotters, if turned out for any length of time, say a year, will lose their gait; others again you can turn out for any time, and when you hitch them up you find them where you left them, and ready for improvement.

You speak about the closing of the Embryo having been postponed. I think the Embryo has had its day as it now stands. The nature of the stake is such that there can be no success without a large entry list, and this cannot be got, in my opinion, with Gov. Stanford and myself to enter. There should be a class of colt stakes got up in this State as they have in the East, barring the get of certain stallions, and the quickest way out of it would be to bar Gov. Stanford's and my stable. I have no doubt that there will be other colts in this State the equal, and even superior, to anything we may raise, but it is generally believed that by some mode of early training, or a peculiarity of our stock, that we would carry off such prizes, and there will be no entries. Whereas, if we were barred it would lead to the training of hundreds of youngsters, many of which, or, at least some, would make fast horses, and which their owners would be willing to enter in other stakes, which are free to all, like the Stanford and the Occident stakes, or prizes given at the different district and State fairs.

You see I did not think of writing when I sat down, but start "horse" and a man never knows when to stop. Hoping, however, that it may please you and your readers,
I am yours truly,

L. J. ROSE.

OREGON CORRESPONDENCE.

REEDVILLE, Or., June 12, 1882.

JOS. CAIRN SIMPSON, ESQ.—DEAR SIR: Your favor of the 5th inst. together with circular calling attention to the BREEDER AND SPORTSMAN, came to hand in due time.

It gives me great pleasure to hear of your contemplated enterprise. I know of no one so eminently qualified to conduct a journal in the interests of the breeders and sportsmen of the Pacific coast as yourself, and hope it will meet with a liberal patronage from the great number of people on this coast interested in such matters, and feel confident that it will.

Although your State has eclipsed the world in the breeding and training of trotting horses, we in Oregon have not lost heart; and when the direct railroad connection is made will meet you halfway and try to beat you. I am satisfied we have the blood, but our climate is not so favorable for the development of young trotters as yours. I think that will be obviated before two years pass, by having covered tracks to work under during the rainy season. There is a great interest manifested here now in the breeding and training of trotters, and the lovers of thoroughbreds are numerous. Everything indicates that we shall have some of the grandest contests of speed during the coming summer and fall ever witnessed in the world. When a lot of such horses as Conner, Trade Dollar, Fred Collier, Caddie R., Jim Renwick, Jo Howell, Premium, Billy C., Jim Merritt, Mayflower, Lulu Riggs, and a lot of others that can run to the half-mile stake in 48 or 49 seconds, there is likely to be a horse-race. All of the above horses are now at the Washington County Fair Grounds, where the first meeting takes place, commencing July 3d, and continuing five days. There are about twenty-five trotters entered for the trotting races at the same meeting. The next meeting will be at Portland, the 18th of July, then to Vancouver, W. T., the last of the same month; from there to Olympia, W. T., some time in August, and then to the Oregon State Fair, commencing September 18th. The entries closed there April 1st, with 53 entries for five trotting races. If you could possibly arrange to attend the coming State Fair in Oregon you would never regret it, as you would see the handsomest fair grounds in the United States, and an Agricultural Fair, with the agriculturists in attendance. From twenty to forty thousand people meet there every year, and at least half of them camp on the grounds. All of the farmers, their wives and their children assemble there, get acquainted, exchange views, report their experiences on farming matters, and have a good time generally. Everything indicates that we shall have the most successful fair this year we have ever had. If you should then pay us a visit I don't think you will go home and publish in the BREEDER AND SPORTSMAN that the Oregonians are the meanest people you ever met.

Yours truly,

L. B. LINDSEY.

STOCKTON CORRESPONDENCE.

EDITOR BREEDER AND SPORTSMAN—DEAR SIR: The good people of this coast invariably maugre to come to the front once a year, and especially the people of this valley make a week's holiday of the Fair. They depend on the Managers of the San Joaquin Valley Association to decide on the merits of their running, trotting and pacing horses, well assured that they will have a fair deal and as good a show as the most exacting could desire. At the present time owners are at work in dead earnest to produce a winner, and though the finishing polish of the "grand preparation" will come hereafter, there is enough shown now to warrant high anticipations.

The running comes first, and the opening race of the programme is a district purse of \$800, for three-year-olds and upwards, which closed on the 1st of April with six nominations. The contestants are, G. W. Graham's Kate Carson; J. Shepherd's Minnie Bell; W. Ash's colt. Colonel Dorsey

has two in, and C. McGlashin one. Nearly all are by Joe Daniels, and that he is a grand stock-horse no one will dispute when they see such fine-lookers and speed from flint-lock mares. His opportunities on thoroughbred, proved mares have been limited to so few that he is practically debarred from anything like a show, and yet some of his get have shown well. He stands to-day in the center of a farming community, speaking his piece all alone, and had he been favored with an ordinary share of the mares of the State, Joe Daniels to-day would rank second to no stallion on the coast for first class runners. It seems strange that such a performer and one so well known receives no more encouragement from breeders. The time is not distant when breeders, who desire to rank in the first class, will have to drop their one-pet family system, and the sooner the better. When we have so many other pure strains of the strictest thoroughbred blood, equally rich, there is a desire to make the happiest cross of all, and then we will have first class race horses in numbers.

The second race is a district purse of \$400, for two-year-olds, dash of a mile; the entries to which close on the 15th of July. Many parties are boasting of what they possess, and the prospect of strong competition in this race is good. The third is a district purse of \$500, mile and repeat; boots barred; the entries to which also close on the 15th of July.

Next comes the district trotting: a two-year-old race for a purse of \$800, closed April 1st, ten nominations, get of Reliance, Membrino, Wilkes, Argola, Pearly's Echo and Nephew, and the blood of Rysdyk's Hambletonian, Alexander's Abdallah, Membrino Chief, George Wilkes' Almont, Patchen, Hambrino, Black Hawk, Belmont and Chieftain, crops out in the above race, and it would be difficult to guess the winner. The colts are all doing well, and every owner has a right to claim first money, just now.

The following colts are entered:

G. W. Trahen's blk f Baby Mine, by Nephew.
L. U. Shippee's b f, by Echo.
Fred. Arnold's Ha Ha, b c, by Nephew.
L. M. Moss' b g, by Membrino Wilkes.
D. Vishe's b f, by Peerless.
Warren's b c, by Membrino Wilkes.
C. Giddings —, by Angora.
S. F. Gilmore's —, by Argola.
I. M. Gearnut's b c, by Reliance.
W. Murray's blk f, by Nephew.

This race is much thought of, and not only the owners are looking forward to the final result, but the owners of Stallion, whose get are represented in this race, feel uneasy.

District yearling trotting one-mile race; purse, \$300. Entries close July 15th.

In future, we must cultivate the idea of colt races at home, for the time has come when it is all nonsense for us to think we can make a decent showing in the Bay District Embryo races, and we are satisfied that Palo Alto colts are dangerous; and we place ourselves accordingly.

District trotting, 2:50 class; purse, \$500. There are many eyes drawing a bead on this race. The competitors will be named by our committee. Entries close July 15th. District trotters that never beat 2:38; purse \$800. We have upwards of twenty that have a right to contend for this race, which closes July 15th. Our trotters are being handled by John Williams, W. H. Parker, W. E. Morris, John Donohoe, Fred. Vail and John McCloud, and we have a right to expect loud reports.

Our State Races. The entries close at the usual time, August 1st, for running, trotting and pacing. The programme we have now in frame, and when the proper time comes we shall throw it to the breeze. I promise you it is loud and liberal, and will pay all who take part in it. Our scale for State trotting races will run throughout the entire line, from 2:40 to free for all. We give the pacers a show. Also, a first-rate assortment of State running races. In all, we hang up \$12,000 for speed, four moneys.

Respectfully,

HA. HA.

OAKLAND CORRESPONDENCE.

OAKLAND, June 28, 1882.

EDITOR BREEDER AND SPORTSMAN:—It would not be according to the eternal fitness of things for the second city on the Pacific Coast not to be present at the launch of your fair bark on the great sea of journalism, and bid you God-speed; so put Oakland down as "present" on the muster-roll of your friends, and hear her say with a right good will all manner of pleasant things about the new captain, and listen to her auguries of the brightest success for the new venture. Please accept from us who have known you so well and so long our profoundest faith in the future of your new journal, and receive our congratulations for your hosts of readers who are to have a long felt want supplied. You have done me the honor to intimate that something from my pen would be acceptable to you, and I do myself the pleasure to respond by this letter. If it pleases your editorial mind to write above it "From Our Regular Correspondent," by way of caption, so be it, and I will do my best endeavor to keep your readers posted, in a gossip way, about men and things—and horses, that may seem to jump with your mood—only excuse me, please, from the writing of many statistics after the manner of the world's Gradrinds. I trust that I shall write facts, but I much prefer to sandwich them in between something more appetizing—sugar-coat them with words of my own conceit and fancies of my own brain. It may be that I am something like a hunting friend of mine, who quaintly remarked on an occasion, that one good wild snipe would afford him an admirable day's sport, so one good fact will sometimes last a long time, and give a good pretext for a good deal of imagination. I could tell you that Oakland contains fifty thousand people, but I shan't put in bald figures between ruled columns, for then it would probably be skipped, while, as snow stands, you have got it anyway, whether you like it or not; and thus I might go on to tell you how many square miles we occupy within our extreme limits, but it suits my modesty better to say that she is a city of magnificent distances; that for beauty of situation she is without a rival in this beautiful world of ours; that all her streets are magnificent boulevards; that no spot in vaunted Italy has fairer villa sites; that it is her just and proud boast that her universities, colleges, schools and seminaries are second in

rank to none; that her sons are manly and her daughters beautiful and virtuous; that her citizens are prosperous and happy, and that, having all these things, we are content.

Now, while these are facts, I submit that they are more readable than they would have been if I had dished them up in figures and labeled them "statistics." Perhaps it will have struck you that I have said nothing about the climate of Oakland. Well, to tell you the truth, I couldn't enthuse much over the climate that has been meted out to us by the gods so far this year. Ordinarily, the climate of our city is admirable—much less harsh and cold than that of San Francisco, across the bay. But this spring has been exceptionally cold, windy and disagreeable. We seemed to have shared in the general elemental disturbances that have played such sad havoc on this mundane sphere this year. But, like most of Nature's evils, there has been a compensating good, and that is, that the cool weather has been very favorable to the farmers and the ripening grain crops, so that, in view of the whitening harvests, doubt and gloom have given place to hope and smiles. But I started out to say something about our horses, and, as I think over what has been written, I seem to have told about them after the manner of old widow Bedott. Well, among our other attributes of greatness we are not much behind in the matter of horses, whether we speak of speed, style or breeding. It is true, we cannot boast of any such breeding establishments within or near our borders as Palo Alto or Sunny Slope, but for all that, we have several ambitious and discriminating breeders whose names are on our Great Register, a large number of very fine carriage teams, not a few speedy double teams, and more than several single roadsters whose owners take no man's dust up to a 2:40 gait, and some that will go you better by 10 seconds. Our streets are very favorable for road driving, barring a little hardness of our macadam, and our fast roadsters are daily increasing in the hands of our wealthy citizens, who do not affect a fanner's gait on the thoroughfares of life. It will be my pleasure to give them greater prominence and individuality on another occasion. But I see that I must call a halt as to any further generalizing while I tell you something of the trotters and runners in training at Oakland Trotting Park. The horses have been a little backward in getting into training quarters on account of the backwardness of the spring, but there are more animals taking their work at the Park than there have been in any previous season in the month of June, some eighty odd in round numbers, and some important stables on the way.

The first stable that we approached, pencil in hand, was L. H. Titus', from Los Angeles, or, more accurately speaking, San Gabriel, and we had the good fortune to meet the owner, Mr. Titus, himself, who very kindly chaperoned us among his string of trotters. To our first question, "How is Belle Echo?" he threw open the door of her box, and curtly said, "See for yourself." Belle has greatly improved on her last year's form and for the better, and it was easy to see that she is the pet and the pride of her owner. And when you look her over carefully and critically, and hear Titus say, with an emphasis, "She is second to no animal top of earth, sir!" it does not seem extravagant or hard to believe. She is symmetry itself, and to our eye, and we have seen a good many horses, she is the very perfection of trotting form, and this, with her royal breeding, and the speed and gameness she displayed last year as a four-year-old, we venture the prediction that in the near future she will score in the first rank of great trotters. Titus says that she is all right and as sound as a bullet. She is a beautiful bay, by Echo, and her dam by old Belmont.

The next we come to is a new one to us, a bay stallion, named Exile, six years old, by Echo, dam Belle Mason, by Belmont. You will travel a long way before you will see the superior of this fellow in looks. A beautiful bright bay in color, with black points, about 15 hands 3 inches, a flowing mane, and a tail like a Pasha's standard, a form superior to his celebrated sire and a perfect disposition. He should make his mark high up on the roll of fame; and we add that he can beat 2:30 any day in the week when in trim (and how much less we are not at liberty to say). You will all say that this is a good green horse.

The other members of his stable are the old favorite Echora, who is looking remarkably well, Bullet, Grasshopper, a natural pacer, by Echo, dam a Royal George mare; Hattie Johnson, a large, likely looking bay mare, and a full sister to Gibraltar; and an unnamed Echo filly, that looks like the family.

Mr. Titus has sold the well known trotter Joe Hamilton to G. Valensin.

We pass along, and come to M. Salisbury's stable, under the general superintendence of John H. Goldsmith, the rising trainer and driver.

And some way it comes natural for us to place at the head of this stable the young gray stallion Romeor. This now celebrated 5-year-old has shaped up a good deal since last season, and is looking and feeling well, and when he and Belle Echo come together in the 2:22 class, this season, there will be music in the air, and it will take a wise prophet to pick the winner. It will be a battle royal and worth going a long way to see. We may refresh failing memories by saying that he is by A. W. Richmond, and his dam is Gretchen by Mambrino Pilot.

Goldsmith says, with a complacent look, that he is all right.

In the next box stands the old favorite Gibraltar, known among all the boys as "Old Gib." He is looking well after his season in the harem, and will make the rounds of the circuit.

Alongside of him stands Bateman, who needs no description and no introduction to your readers. He is in good condition.

We next come to one who is comparatively a stranger, one of the new purchases of Mr. Salisbury, the blk. s. Director, 5 years old. This horse is 15 hands 2 inches high, and has about him a business look that may mean trouble along the line when the order comes to march. He is by Dictator, a full brother to Dexter, and his dam is by Mambrino Chief, and is also the dam of Thorndale (2:22½) and Onward (2:25½), so that he takes speed by right of inheritance. Director's own records are—3-year-old, 2:30; 4-year-old, 2:27½. What his 5-year-old may be—*quien sabe*?

Another stranger is Sweetness, b. m., 9 years old, by Volunter; dam by Edward Everett, 2d dam by old Harry Clay. This is a mare of great substance, 16 hands high, and was very speedy, getting a record of 2:30, and then went lame, and got a long let-up. She is now all right, and will be no mean opponent for the best.

And then comes another stranger, a full brother to Little Brown Jug, also a pacer, like his famous brother. All we can say is that he is a dark roan in color, hard looking as

nails, and as big a little horse as a man ever looked at. If he isn't speedy, we give it up, and pass.

Then comes Dashwood, b. s., by Legal Tender, dam by Volunteer, another green pacer.

Goldsmith is also breaking a full brother to Romero, and has in his stables a yearling colt by Santa Claus, dam Sweetness by Volunteer, and a yearling Nutwood colt out of a mare by Volunteer, and that was a full sister to Powers with a record of 2:21.

A. Waldstein's stable is in charge of James Duane, and contains only three animals: Albert W., b. s., by Electioneer; dam full sister to Aurora. This horse has a record of 2:32 as a three-year-old, but this does not tell his speed. He is doing well, and will be entered in the Circuit.

Nelly W., three-year-old, by Electioneer, out of the dam of Albert W. This filly is entered in the Occident and Stanford Stakes, and will probably be entered in the Circuit.

Also, a chestnut filly by Nutwood, out of Albert W.'s dam, that looks well and ought to trot.

Martin Rollins, of Santa Rosa, has quite a stable of horses, the most of which are without public records.

The first in order on our list is a chestnut five-year-old mare by Capt. Webster; dam, the dam of Terry, and owned by Myron Dusenbury, that is a pacer and quite promising. Ch. g., 7 years old, by Patchen, without a record.

A bay Patchen mare, very promising, and that Rollins says can trot in 2:30, and will be entered through the Circuit.

He also showed us a big bay gelding, sire Capt. Webster, dam by Belmont, that Rollins says is the best green horse on the coast. As this is pretty large talk, we hereby put Mr. Rollins on record, in order that horsemen may have an opportunity to test his judgment before the season closes.

He is also working a 5-year-old Echo filly owned by Andy Ryder, our popular County Clerk. We hope she is a good one for the owner's sake.

He has also a gray pacing gelding, owned by John Thomas, by Washington, dam a thoroughbred mare, that he thinks well of, and that will be entered in the pacing classes.

Henry McConn's stable consists of—

Maggie C., br. mare, with a record of 2:25, by Whipple's Hambletonian, and owned by P. Canavan of Virginia City.

Bay colt by Electioneer, dam Stockton Belle, owned by Morrow of San Francisco.

Contractor, 4-year-old, b. c., by Dick Taylor, dam Amy, with record of 2:22, and owned by James McCord of San Francisco, who also owns Blackmoor, in an adjoining box, by Patchen, record, 2:30½.

In the same stable is the b. g. Majors, with a record of 2:34, and owned by Covarrubias of Los Angeles.

Pete Williams' stable consists of eight animals: Frank, ch. g., nine years old, by Moscow, and owned by A. B. Cooper of Alameda; Cinderella, ch. m., by Whipple's Hambletonian, dam Belle, by Belmont, and owned by Martin Carter, of Newark, that is said to be very promising; Dick, b. g., four years old, by imported Hercules, dam a Lomax mare, and owned by Evans of Milpitas; Goldnut, ch. c., two years old, by Nutwood, dam the dam of Lady Sherman, which can trot a '50 gait; also, a gray Nutwood filly, two years old, from a mare by Gen. Taylor, owned by Mr. Carter of Newark, that Williams thinks very highly of; a three-year-old Elmo filly, dam by Niagara, and owned by Mr. Storms of Oakland; a Billy Hayward filly, and a blk. g. by McCracken's Black Hawk.

H. A. Mayhew has three good ones at the Park: Setting Sun, ch. g., by Billy Hayward; Bertie Hayward, by Hayward, from the dam of Poscora Hayward; and a gray two-year-old filly, "Angerstein," all of which have the a family look and share the family speed.

Lee Shaner has in his stable Terry, the pacer; Rowdy Boy, a four-year-old gray gelding, by Rustic; and a gray three-year-old Rustic colt. He has also a few runners—Night Hawk, by Haddington; Haddington, Jr., by Haddington; a Daniel Boone filly, and two Haddington fillies.

John McConnell has in training Poscora Hayward and the Grand Moor, both owned by Mr. Hammond, former partner of Andrew Newland. Rumor has it that Poscora is an extraordinary good horse this season, and that it will take a clinker to beat him.

Gus Walters has the dun pacer Johnny Wiegler, and two or three good ones.

Cox has Dom Pedro, Pauline, and several others without records.

Sawyer has Emperor, out of old Katy Tricks, and another one.

A. L. Hinds has the gray stallion Alonzo Hayward, by Billy Hayward, with a record of 2:30, and five or six young things of more or less promise.

Mathew B. Storn has charge of J. B. Chase's stable, consisting of Wheatly, ch. s., aged, by War Dance; two-year-old filly, by Hubbard; two-year-old, by Shannon; and a four-year-old black gelding, owned by Dr. Taliaferro, of San Rafael, by Shannon, dam Velvetten, by Lodi.

Besides the horses stabled at the Park, there are a number of promising ones in outside stables that take their work at the track. Among this number are the three-year-old Electioneer colt Anteo, owned by Joseph Cairn Simpson, and a yearling, full brother to Anteo, and named Antevolo. I saw Anteo take a little sharp work at the Park on Tuesday morning, and he marks a trotter without doubt. His way of going is very fine, and his ability to stay the distance is already demonstrated, proving the old adage that blood will tell, and that the Electioneers will not quit. And his younger brother is even finer, if possible, and already gives promise of sustaining the very high reputation of a famous family. They are both by Electioneer, from Columbine, now owned at Palo Alto, and she is from Columbia, by imported Bonnie Scotland, and her dam again was Young Fashion, by imported Monarch. Here is rare breeding, and a union of lines famous the world over.

Hoping that I have not trespassed upon good nature in the way of space, I will defer other matters until next week.

INDEX.

SAGEBRUSH TROUT-LIARS.

Either fish are biting more wildly and foolishly this spring than ever before since the days of the Apostles, or those who are doing the fishing are the biggest liars that ever poked a pole and line. Not a man goes forth to the smallest puddle, horse pond or duck pond, that does not report having hauled in from 80 to 250 trout in two hours. They always do it in from two hours to two hours and a half. It is beginning to be strongly suspected by our inland people that there is a band of liars working the lakes from Lundy on the south to Independence on the north. *Virginia Enterprise.*

THE TURF.

Saratoga, Jerome Park, Long Branch, Coney Island and Baltimore are the fashionable places of Turf sports in the East. Lexington, Louisville, St. Louis and Chicago is what is called in that country "the West." The Coney Island Jockey Club has one of the best appointed courses in the country, and the attendance rivals Saratoga and Jerome Park, not alone in numbers, but also in regard to the brilliancy of the assemblage. Convenient to New York, managed by men who rank high in the world, and a favorite place with owners and trainers, it could not well be otherwise than popular.

We copy an account of the opening day, Tuesday, June 13th, from the New York *Herald*, as the general description will be of interest to our readers on this Coast, and give epitomized summaries of the racing. The summaries are abbreviated, so as to give the names of those only which obtained a place, as it would occupy too much space to give the names and pedigrees of all of the starters.

The plan followed hereafter will be to give the most prominent events which occur at the chief meetings, as even a brief synopsis of all the races would take room which can be more advantageously used in other ways. It will be noticed that "old Parole" won a good race, defeating a strong field, in fast time.

CONEY ISLAND JOCKEY CLUB.

The Coney Island Jockey Club yesterday opened the season's racing upon the Sheephead Bay course by a most enjoyable programme of races. Those who had been present at the dusty opening day of two years ago, or the moist and muddy one of a year past, were loud in their praises and thanks for the excellent weather. Each year improves the property of the Club, and whether the visitor is an enthusiastic horse lover or merely bent on an afternoon's outing, the run down to the Sheephead Bay track, and the lounge of a few hours upon the grand stand, or, better still, upon the sloping green turf before it, is sure to send the excursionist home with renewed health and a lively appetite. The means of access to the course from the city left nothing to be desired yesterday. The pleasant sail down the bay on a swift moving steamboat enabled those bound to the races to make close connections with the waiting trains, and, speeding over the narrow gauge railroad toward Manhattan Beach, the trains stopped within a few yards of the entrance to the racing enclosure. Stop-over tickets were given to the many who wished to finish off the view of the races with a visit to the beach and a dinner by the seaside.

Few changes have been made in the arrangements of the Coney Island Jockey Club grounds. None were needed, for the original plan was so carefully considered, and the structures erected on so liberal a scale, that thousands may be accommodated and yet not give the individual sightseer any feeling that there is not enough elbow room. Everything was, of course, in the best of order, and the ground in all its appointments as neat as the best kept suburban estate. In its weather conditions the day could not have been improved. The foliage in and about the premises had no parched look, but rather the rich verdancy of early spring. The lopped trees in the track enclosure did their best to look graceful, but with all their lower limbs cut away to give clear views of the track, they would hardly be styled things of beauty. The trees over the grand stand extension running toward the club house were, however, charming to sit under, and fulfilled their natural function of shade givers admirably. Each year shows a marked improvement in the turf of the lawns. That before the grand stand has now put on a velvety surface, and bids fair to stand the wear and tear of the many restless boot heels that go tramping over it. The track bore evidence of careful attention, and was in the best of order for the runners.

The opening day did not bring a crush of spectators, yet there were a sufficient number present to bring the attendance up into the thousands and give the grand stand, the quarter stretch, the side paddock and especially the area set apart for the odd and even speculators a very animated appearance. The grand stand was comfortably filled, the annex to the right, toward the club house, was crowded, while not a box along the entire line was noted as vacant. The toilets were charming and the display of early summer finery worth the trip to the track to witness. The members of the club were out in force and their quarters, over the weighing room, were crowded at all times. The arrangements for the booking fraternity, who afford profit for the few at the expense of the many and the pleasurable excitement of anticipations for all, were, as before, upon the shaded platform to the right of the stand. It was crowded at all times, and the opening day brought everybody down to their wagering instincts whetted by the winter's rest. The managers of the pools were too busy to be noisy, being kept engaged either making or meeting bets. The admirably systematized scheme enabled the public to reduce its opinions, hopes, suggestions or hints to the concrete form of pool tickets with the least possible trouble and later, in some instances, to convert these tickets into good coin of the Commonwealth with equal dispatch and readiness. Such of the spectators as did not care to take a ticketed interest in the races did not have their attention distracted by the traffic in odds. Upon the track the races were close enough to be interesting, without enough uncertainty to make them worth seeing. They were punctually started, and the jockeys were generally careful not to have too many breakaways and false starts. In the first race the favorite did not win, and the holders of the tickets were well rewarded. In the next the ladies were delighted to see the little boy jockey, in his rich costume of cherry and black and gold, force Itaska to the front. The P. Lorillard colors had not been favorites in the mutuels, which accordingly paid over \$70 when the race was over. In the mile and a half race for allages, international Parole was a starter, and though on the first rush past the grand stand with one-third of the race over, the old brown horse appeared to be lost in the rift of flyers, Feakes knew the animal he was striding, and in the last third of the race the P. Lorillard colors again came to the front and another victory was added to the long list of Parole triumphs. Too many friends and backers, how-

ever, did not make the victory a very profitable one to the army of Parole ticket-holders. The Tidal Stakes, for three-year-olds, did not bring out such a great race as the Hindoo-Crickmore struggle of last June, but a fair field of starters gave a satisfactory race.

The races over, the crowd dispersed in many directions. The drive up the ocean parkway and thence to the city via Prospect Park and the suburbs of Brooklyn tempted many, who found a capital road in the best of driving condition. The railroad travelers took trains in either direction, depending whether dinner was to be taken at the shore or in town. The day had been one of exceptional enjoyment, with such air, sky and foliage as the ordinary June day does not always bring.

The following gentlemen were the officers of the day: Judges—Messrs. J. H. Bradford, J. G. K. Lawrence and J. G. Heckscher.

Timers—Messrs. C. Fellows and W. M. Conner.

Dismounting Judge—Mr. W. K. Vanderbilt.

Starter—Mr. J. Sheridan.

The following are the details of the racing:

FIRST RACE.—Purse \$500, for all ages. Five furlongs. Preakness Stable's b f Bonnie Lizzie, 4 yrs, by Hurrah—Bonnie Kate; 113 lbs. (P. Fisher) 1
Morris & Patton's b g Fellowplay, 4 yrs, by Longfellow—Platina; 115 lbs. (Brown) 2
H. Welch's b g Wakefield, 5 yrs, by Wanderer—Australia; 117 lbs. (Jones) 3
And thirteen others ran unplaced.
Time, 1:02¼.

SECOND RACE.—Purse \$500, for three year-olds and upward; winner to be sold at auction. If entered to be sold for \$5,000, to carry weight for age; \$4,000, allowed 5 lbs.; \$3,000, allowed 10 lbs; one pound allowed for each \$100 less down to \$1000. One mile and a quarter. P. Lorillard's b g Itaska, 3 yrs, by Saxon—Betty Washington; to be sold for \$1,000; 70 lbs. (P. Hyslop) 1
J. Daly's b c Strathpey, 4 yrs, by Glenelg—Polka; \$1,000; 88 lbs. (J. McLaughlin) 2
Dwyer Bros' b g Warfield, aged, by War Dance—Flora; \$2,500 104 lbs. (F. McLaughlin) 3
And six others ran unplaced.
Time, 2:11¼.

THIRD RACE.—Purse \$600, for all ages. Winners of any race of 1882 of the value of \$1,000 to carry weight for age; of two such races, 3 lbs.; of three or more, 5 lbs. extra; other horses allowed 5 lbs.; maidens allowed 12 lbs. extra. One mile and a half. P. Lorillard's b g Parole, aged, by Leamington—Maiden; 115 lbs. (Peakes) 1
Oden Bowie's h g Compensation, 4 yrs, by Catesby—Australia; 110 lbs. (Brophy) 2
G. L. Lorillard's ch g Monitor, 5 yrs, by Glenelg—Mint; 115 lbs. (Costello) 3
And three others ran unplaced.
Time, 2:36¼.

FOURTH RACE.—The Tidal Stakes, for three-year-olds; a sweepstake of \$100 each, half forfeit, and \$20 if declared out before July 1, 1881, for foals of 1879, with \$1,000 added. The second to receive \$250 out of the stakes. One mile. Closed with 73 subscribers, of which 13 declared out. Dwyer Brothers' b c Rummymede, by Billet—Mercedes; 113 lbs. (J. McLaughlin) 1
D. D. Withers' ch c by Stouche—Julietta; 118 lbs. (Barbee) 2
W. Lakeland's ch c Babcock, by Buckden—Ethel Sprague; 118 lbs. (Owner) 3
Spellman & Co's c c Hilarity, by Bonnie Scotland—Beulah; 113 lbs. (Spellman) 0
L. C. Bruce's ch c Timbucktoo, by Lever—Evangelina; 113 lbs. (Brophy) 0
Time, 1:43¾.

FIFTH RACE.—Purse, \$500. One mile. G. L. Lorillard's ch c Volusia, 3 yrs, by Pat Malloy—Vandalia; 103 lbs. (Ural) 1
Preakness Stable's ch c McBeth, 3 yrs, by Macaroon—Jersey Belle; 103 lbs. (P. Fisher) 2
Dwyer Brothers, b g Blenheim, 3 yrs, by Billet—Keno; 100 lbs. (J. McLaughlin) 3
W. Jennings' b f Farewell, 3 years old, by Lisbon—Fair; 95 lbs. (O'Hara) 0
Mr. Somerville's La Belle N., 3 yrs, by Reform—Megara; 98 lbs. (Blaylock) 0
Time, 1:43¾.

STEEPLECHASE.—Purse \$550, of which \$100 to the second, and \$50 to the third horse. Horses which have not won a steeplechase in 1882 allowed 7 lbs.; those which have never won a steeplechase allowed 12 lbs.; winners of one steeplechase in 1882 to carry weight for age; winners of two or more steeplechases of 1882 to carry 7 lbs. extra. Three horses, two of which shall be the property of different owners, to start, or no race. The short steeplechase course.

Geo. Sutcliffe's ch h Day Star, aged, by Star Davis—Squeeze 'em; 144 lbs. (Fitzpatrick) 1
J. N. Ackerman's b g Ohio Boy, aged, by Hurrah—Charm; 144 lbs. (Nolan) 2
James McMahon's b h Ike Bonham, aged, by Bonnie Scotland—Viola; 141 lbs. (Harley) 3
R. Bradley's ch m Lilly Morson, 5 yrs, by Brennan—Larkin; 133 lbs. (Dickens) 4
Stanley Williams' ch g Woodcock, 5 yrs, by War Dance—Miss Grey; 140 lbs. (Holmes) 5
C. Reed's b h Turfman, 5 years old, by Revolver—Regards; 133 lbs. (Meany) 6
Dr. Lynne's g h Derby, aged, by Eugene—Kate Sovereign; 144 lbs. (McBride) 7
Time, 5:09¾.

On the second day there were five events, and the usual steeple chase, a dangerous kind of racing that, however, is now very popular at the East. The chief interest of the day was centered in the Foam stakes, which is one of the most valuable two-year-old stakes run in the country. There were 61 subscribers, of whom eleven appeared at the post, and E. V. Snedeker's filly Soubrette, by Alarm from Susan Beane, was made the favorite on the strength of her winning a two-year-old purse at Jerome Park, in the excellent time of 49 sec., with 107 pounds up, on which occasion Parthenia was second. On this occasion, however, the latter, a fine filly, bred by P. Lorillard, turned the tables on Soubrette, and won a fine race in 1:03¾, the Dwyer Brothers' colt George Kenney being second and G. L. Lorillard's Magnate being third. Parthenia is by Alarm from Maiden, and is thus a half sister to that celebrated horse Parole, and she promises well for her many future engagements. In the Coney Island stakes, a dash of a mile and a quarter for three-year-olds and upwards, there were forty seven subscribers, but Hindoo frightened them all away save Barrett, and with five to one on him, the great son of Virgil and Florence won in a canter in 1:57¾, having made the first mile in 1:42. The steeple chase was won by Disturbance, who appears to be the best horse across country that is to be found at the East.

On the third day there were again five races, and some very heavy investments were made on the result of the Mermaid stakes and of the selling race. The former is a great three-year-old filly stake, and, notwithstanding that Hiawasse had beaten Rica in the Ladies' stake, a mile and a half, at Jerome Park, the latter was made a favorite, as it was believed a mile and a furlong would suit her better. The race, however, was won by Hiawasse, with Rica second and Francesca third, in 1:58¾. The winner is owned by P. Lorillard, and is by imported Saxon, her dam being the whilom famous racer Vandalia; Rica is by Kingfisher from Lady Mentmore, and Francesca is by Leamington from Maggie B. B., and thus an own sister to Iroquois. The selling sweepstakes have become very popular, as by this method owners have the privilege of handicapping their own horses. In this race horses entered to be sold for \$5,-

000 carried weight for age; if for \$4,000, allowed five, and if for \$3,000, then ten pounds weight off; and one pound for each \$100 down to \$1,000. There were twelve horses ran, and the winner was Barrett, the favorite, entered to be sold for \$2,500, and P. Lorillard had to pay \$4,100 to bring back this son of Bonnie Scotland and Sue Washington to the Rancous stable.

The fourth was the Cup day, and, as is the case at Ascot and Goodwood, the assemblage was the most numerous and fashionable of any day of the meeting. The weather was delightful, the course in capital condition, and the five events afforded racing of the most exciting character. The chief interest was centered in the Coney Island Cup, two miles and a quarter, which had closed with the pick of the best horses in the country, but the prowess of Hindoo again reduced the field to three starters, Eole and Parole being the only two contestants. At one time it was hoped that Thora would put in an appearance, but as she would have had to carry a ten-pound penalty for winning the Baltimore and Westchester Cups, she was wisely withheld for the Monmouth Cup at Long Branch, where she will yet have to carry five pounds extra, while Hindoo is penalized three pounds. This was a remarkable race, and the following short but graphic account is taken from the New York World:

THE CONEY ISLAND CUP, for three-year-olds and upward; a sweepstakes of \$50 each, half forfeit, with \$1,500 added; the second to receive \$300 out of the stakes; three-year-olds to carry 90 lbs.; four-year-olds, 105 lbs.; five-year-olds and upward, 114 lbs.; sex allowances; the winner of the Baltimore or Westchester Cup of 1882 to carry 7 lbs. extra; of both, 10 lbs. extra. Two miles and a quarter.

Starters.

Dwyer Brothers' br. c. Hindoo, by Virgil, dam Florence, 4 years old, 105 lbs.	(J. McLaughlin)	1
F. Gebhard's b. c. Eole, by Eolus, dam War Song, 4 years old, 108 lbs.	(Barbee)	2
P. Lorillard's br. g. Parole, by Leamington, dam Maiden, aged, 111 lbs.	(Feakes)	3

Time, 3:58.

THE BETTING.—Hindoo, in the pools, sold for \$300; Eole, \$75; Parole, \$30. In the books there were 3 to 10 against Hindoo, 7 to 2 against Eole, 10 to 1 against Parole. The mutuals paid \$6.75.

Exactly to the minute for which the race was fixed—5 P.M.—the three moved up for the flag with Eole on the outside. They got an even start, and as they came to the turn Barbee took the lead with Eole, and as the horse ran somewhat sluggishly up the stretch, Barbee "bustled" him right along at the lower end of the stand, which gave him such a lead that as they passed the judges' stand Eole led by five lengths, with Parole third, six lengths behind Hindoo. In the run round the quarter turn McLaughlin moved Hindoo up a trifle, so that Eole led by only four lengths at the quarter. There was no change in the run down the backstretch, nor in the run round the turn, Eole leading at the end of the mile by four lengths, Parole ten lengths behind Hindoo. They ran up the stretch in the same position, there being no change until they were well into the last mile. Then Hindoo began to gain slowly, and at the quarter was but two lengths behind Eole. They continued to run two lengths apart to the five furlongs, after which Hindoo gained at every stride, and amid the greatest excitement and cheering, the two went past the half-mile post as nearly even as they could run. They stayed together until nearly opposite the Dwyer stables, when McLaughlin cut loose and letting Hindoo go right along he quickly led, first by a length, then by two lengths, until, when the two miles were finished, having been run in 3:29½, he led by four lengths, with Parole rapidly closing in upon Eole.

In the run round the turn Hindoo increased his lead to six lengths, but when well into the stretch so strong did Eole respond to Barbee's call that half-way up the stretch the distance was reduced to three lengths, which for an instant raised the hopes of the admirers of Eole, so that some began to claim the race. Their hopes were quickly dashed as Hindoo drew away, and amid the cheers of nearly all present, passed the post an easy winner by four lengths, with Eole a dozen lengths in front of Parole, on whom Feakes took things very easily when he found that he could not reach either of the leaders. The time, 3:58, although very fast, is a trifle slower than was expected, some few bets having been made that the famous dead-heat record of 3:56½, made by Preakness and Springbok at Saratoga in 1875, would be beaten. This probably would have been the case had Eole been able to push Hindoo in the run up the stretch, for it will be seen from the time of the several quarters that the last quarter was very slow.

Quarters.

1st—28.	
2d—25½; half mile	0.54
3d—26; three quarters	1.20
4th—25½; mile	1.45½
5th—25½; mile and a quarter	2.11¼
6th—26½; mile and a half	2.38
7th—26½; mile and three quarters	3.04¼
8th—25½; two miles	3.29¾
9th—28½; two miles and a quarter	3.58

The other races of the day call for no special comment, save that in the steeple chase the mare Lilly Munson fell at one of the fences and threw her jockey, Dicken, who had his collar bone broken and was otherwise badly shaken, but not in the manner to seriously disable him. Another example of the danger of steeple chasing.

Again lovely weather and grand sport was the verdict of the immense assemblage that witnessed the fifth and sixth days of the meeting. It was poor betting for the talent, for when the backers of the favorites get two or three facers they are apt to plunge on the outsiders, that, in case they win, will give them a more liberal return on their investment. The chief event on Tuesday was the two-year-old stakes; and in this the previous performances of the favorites were eclipsed.

In the Foam Stakes, five furlongs, of the sixty-five subscribers there were eleven that sported silk, and P. Lorillard's Pizarro and the George Kenney of the Dwyer Brothers were made first choice, while the winner, Jacobus, was only in the middle division, although he made a favorable impression at Jerome Park. Jacobus is by Ill-Used from Nellie James, and was purchased by J. E. Kelley from Mr. Belmont, for \$10,000, with other untried colts included. This was the first time the Blue and Canary was sported, and the result augurs well for the success of the new colors. Mr. Kelley is well known here in sporting circles in connection with the famous four mile and repeat race won by Foster some six years since, in which he is said to have landed a good stake.

On Wednesday there were six races, and they were generally disastrous to backers, the first race for all ages resulting in the victory of Mr. Withers' Stonehenge-Julieta colt, selling for \$30 against \$50 for Fellowplay and Barrett,

the former winning from the latter a sharp race of a mile by a short head, in 1:43½. The next and prominent event of the meeting was the Coney Island Derby, in which it was thought that Runnymede and Apollo would fight their western battles over again, and try to gain the best of the day against Forester, that had hitherto been classed as the first three-year-old of the season. On the strength of the latter having won both the Withers and the Belmont, he was made first favorite at \$200 against \$85 for Runnymede and \$15 for Carley B., Apollo being absent. Forester made the running, but Runnymede closed on the favorite on the home stretch, making the mile and a half in 2:37, the best time made in a three-year-old stake this season. Runnymede is by imported Billet, from Mercedes, is owned by the Dwyer Brothers, and in this colt it really appears as if they had a formidable successor in the three-year-old stakes, to Luke Blackburn and Hindoo.

THE CAPITAL TURF CLUB.

The Spring meeting of this association was held at the Agricultural Park, Sacramento, commencing on Wednesday, June 14th, and continuing the three remaining days of the week. The following is the official record of the proceedings:

FIRST DAY, JUNE 14.

FIRST RACE.—Running stake, three-quarters of a mile dash; \$20 entrance; \$10 forfeit; \$100 added; second to save stake.
Theo. Winters names Duke of Norfolk..... 1
James McM. Shafter names Haddington..... 2
H. C. Judson names b. h. Belshaw..... 3
Time, 1:16.

SECOND RACE.—Running stake, mile dash; \$25 entrance; \$15 forfeit; \$150 added.
H. C. Judson names s. m. May D..... 1
James McM. Shafter names Night Hawk..... 2
A. Miller names b. h. Boots..... 3
Theo. Winters names ch. f. Atlanta..... 4
Time, 1:43½.

THIRD RACE.—Running race, half mile dash; \$20 entrance; \$10 forfeit; \$75 added.
A. Miller names filly, by Monday, from dam of Douglas..... 1
Theo. Winters names b. f. Clara W..... 2
Time, 1:51.

SECOND DAY, JUNE 15.

FIRST RACE.—Trotting purse, for the three-minute class; \$250; \$150 to first, \$75 for second, and \$25 to the third horse.
Wilbur Smith names b. m. Adalia..... 3 2 1 1 1
Charles Shear names b. s. General..... 4 4 2 2 2
M. W. Hicks names b. m. Pearl..... 1 3 dis
C. Coward, by consent, names b. g. Starr..... 2 1 3 3 dis
Time, 2:32½, 2:34½, 2:37, 2:36, 2:36.

SECOND RACE.—Trotting purse, of \$400, for the 2:30 class, of which \$240 to the first, \$120 to the second, and \$40 to the third horse.
J. H. Goldsmith names b. s. Inca..... 2 1 1 2 1
Wilbur Smith names b. g. Clairmont..... 1 2 3 3 2
Henry McCoun names g. g. Blackmore..... 3 3 2 1 3
Time, 2:30¼, 2:32½, 2:30¾, 2:30¾, 2:34¼.

THIRD DAY, JUNE 16.

FIRST RACE.—Running stake for two-year-olds; five-eighths of a mile dash; \$25 entrance; \$10 forfeit; \$150 added.
A. Miller names b. f. by Monday, from dam of Douglas..... 1
Theo. Winters names b. f. Clara W..... 2
Time, 1:07.

SECOND RACE.—Selling race; \$40 entrance; \$10 forfeit; \$150 added; one and one-quarter miles.
James McM. Shafter names Haddington (\$800)..... 1
W. L. Appleby names b. h. Belshaw (\$800)..... 2
H. Schwartz names b. f. Sister to Lottery (\$500)..... 3
Time, 2:14.

THIRD RACE.—Running stake, one mile and repeat; \$50 entrance; \$15 forfeit; \$150 added.
James McM. Shafter names Night Hawk..... 3 1 1
H. C. Judson names s. m. May D..... 2 3 2
A. Miller names b. h. Boots..... 1 2 3
Time, 1:45½, 1:47, 1:46½.

FOURTH DAY, JUNE 17.

FIRST RACE.—Trotting purse, three-minute class; \$250.
Wilbur Smith names b. m. Adalia..... 2 1 1 1
H. G. Cox names b. s. Don Pedro..... 3 2 2 3
M. W. Hicks names b. m. Pearl..... 1 3 4 4
Charles Shear names b. s. General..... 4 4 3 2
Time, 2:33, 2:35, 2:33, 2:35½.

SECOND RACE.—Gentlemen's buggy stake; \$10 entrance; \$50 added; two miles out; winner to receive whole amount.
J. D. Young names b. g. Colonel..... 1
M. Toomey names b. g. Robin Hood..... 2
J. H. McNassar names b. m. Mollie A..... 3
Time, 5:48.

THIRD RACE.—Facing; purse of \$200; heats of a mile.
Nels McDonald names r. g. Brince..... 3 1 1
S. C. Tyson names b. g. Prince..... 2 2 2
Charles Shear names b. s. Revenue..... 2 3 3
M. Toomey names b. g. St. Valentine..... 4 dis
Time, 2:43½, 2:43, 2:42½.

It is pleasant to announce that the proceedings passed off without a single hitch, and that they gave great satisfaction to the many visitors at the track. The financial result was also quite favorable, when it is considered that this was the first meeting held under the auspices of the association; for, after all the accounts were paid, there was a surplus of \$4,100. This success must be attributed to the energy and zeal of the executive officers, as also to the liberality of the citizens of Sacramento, whose subscriptions warranted the announcement of the programme on an enterprising scale. A committee, consisting of Messrs. J. H. Miller, J. McNassar and Ed. F. Smith, has been appointed to effect a perfect organization, with Mr. Chris. Green as President, Mr. J. W. Wilson as Vice President, Mr. W. P. Emery as Secretary, and Mr. E. L. Billings as Treasurer.

The following is the list of the present members; and as nothing succeeds like success, it is probable that within a short period there will be such an accession to the list as to place the Capital Turf Club on a solid financial basis: Messrs. Chris. Green, J. W. Wilson, E. L. Billings, A. L. Frost, E. Walters, Robert Allen, H. S. Beals, W. O. Bowers, S. S. Bede, J. H. McNassar, E. G. Blessing, Henry Grice, W. A. Heury, A. Weiman, A. J. Rhoades, Isidore Townsend, John Mackey, Phil Seibenhaller, G. Valensin, J. H. Miller, Ed. F. Smith, John McFetish, and J. W. Houston. We wish the Capital Turf Club every success.

THE TRACK.

There is so little transpiring at the present time, in the way of trotting, to our readers on this coast, and also being so hurried to get our paper out at the date fixed, that this Department will be left blank for this number. At the best there would be a meager showing, and the following week there will be a full allotment of space to the sports of the Track. In that will be an account which can be depended upon as accurate, from the meeting at Salt Lake, and we hope to receive reports from the main Eastern Meetings which came off last week.

TURF AND TRACK.

FOR BLANCHARD'S \$10,000 PURSE, for the 2:17 Class, that will come off at Beacon Park, Boston, on September 14th, next, there are thirteen entries, as follows: Commodore N., W. Kitson, St. Paul; J. E. Turner, Philadelphia; H. S. Russell, Milton, Mass.; G. W. Sanders, Cleveland; J. H. Phillips, Philadelphia; E. L. Norcross, Manchester, Maine; J. Monroe, Chicago; J. E. Stewart, Boston; Gus Wilson, Philadelphia; James Golden, Medford, Mass.; L. B. Brown, Providence, R. I.; W. P. Balch, Boston, Mass., and Charles S. Green, Babylon, N. Y. The conditions of the race are 10 per cent. entrance, of which 2½ per cent. at the time of nomination, and a like amount on the first days of July, August and September. The entrance money is to be forfeited on failure of any of these regular payments, and the horses are not to be named until August 31st. This is a new departure in Trotting stakes, and assimilates in a slight degree to the Post matches that were so popular in England a century since, when the respective horses were named at the Post.

FROM THE WASHINGTON COUNTY FAIR GROUNDS, in Oregon, the advices are very favorable for the meeting that commences there July 3d, continuing throughout the week. The track is admirably situated, within easy reach of Hillsborough, and with the many improvements made, the buildings present a handsome appearance, and the grounds, almost surrounded by umbrageous trees, form as pretty a picture as can be found on the Pacific Coast. Although sixty new stalls have been built, the arrivals are so large that doubts are expressed if even now the accommodations will be sufficient. This fact speaks volumes for the future prosperity of the turf in Oregon.

ON JULY 5TH, a Running programme has been arranged at San Diego, the first race being half mile and repeat, for \$100; the second, a half mile dash, for \$75, for three-year-olds, raised in the county; then a purse of \$50, for two-year-olds, owned in the county; and the last is a handicap, for beaten horses. Among other attractions, there is a slow mule race, that is very amusing, as, contrary to the general rules, the prize is given to the last animal under the wire, that has not come to a stop during the race.

THE CITIZENS OF GALT, SACRAMENTO COUNTY, are making great preparations for the celebration of the Fourth of July, and, among other attractions, they offer a varied programme of races, consisting of trotting, running and pacing, that will doubtless lead to a lively competition among the fast horses around that district.

ALGONA, a son of Almont, has been purchased by Mr. J. B. Haggin, and has been sent to that gentleman's stock farm in Sacramento County; as also a two-year-old filly, by Algona, bought from Mr. E. Giddings, of Lemoore, Tulare County.

THE FIRST MEETING OF THE MEXICAN JOCKEY CLUB, that was held a few weeks since at Mexico, was a pronounced success, both in regard to the attendance and the financial result. All the wealth, beauty and fashion of the city graced the race-track with their presence, and the principal trotting purse was won by Halcon Negro, an American horse. The running races did not show such large fields as might have been expected, but, with improved facilities of transportation, California will surely be represented, and our thoroughbreds will quickly follow the iron horse, to try conclusions with Mexico's purest and finest strains of trotting stock.

AT MR. CLAUD SPRECKEL'S APTOS RANCH, a great loss has been felt in the death of that noted brood mare, Ashcat. She was by Rysdyk's Hambletonian, her dam by American Star, and her grand-dam by Abdallah. Ashcat was the dam of Ajax, Hambletonian, Jr., and Grapevine. The mare died foaling, but the colt was saved, and is doing well. Mr. Spreckels has four colts by Speculation, all of which are of a very promising description.

The Tulare Valley Agricultural Association has made arrangements to lay out a fine race track at Visalia, with a grand stand, stalls and the usual buildings required in a first-class race course. The contract for these has been given to Messrs. Fox and Wild, but the executive officers have decided to lay out the track by day work, as the bids were too high, and by keeping the operatives under their own supervision, they will see that the work is completed in the best and most efficient manner.

Two of our legal gentlemen—Judge R. E. Warren and A. J. Gifford—went to Butte Creek yesterday evening for a quiet fish. The game they were after was catfish, and they yanked them out as fast as they could bait their hooks and throw in. They did not fish over an hour, but when they tied up their lives each had a splendid string. Persons who live along Butte Creek are of the opinion that in a few years the tules even will be filled with these fish. We hear that a party of fishers will go to Butte Creek on Sunday evening, build up a rousing camp-fire on the bank, and spend the night there. Boarders at the hotels can expect plenty of brain-food for breakfast on Monday morning.—Butte Record.

Yesterday afternoon, says the Butte Record, about a dozen of our German citizens went down to the river for an afternoon's sport at fishing, and they really had good luck and a "bully" time. Some, who did not care to angle, spent a greater portion of their time at bathing in the river, but they were promptly on hand when the lunch hour arrived. Before going to lunch, all the hooks were well baited and the poles set. During the progress of the meal, E. Jacobs, who is a constant practical joker, slipped to the river, hauled up one of the lures, and attached to it a fish made of canvas filled with sawdust. It was painted and fixed up to resemble a large salmon. Its weight was twenty-six pounds. After the feed, all hands rushed to the river-bank to make a haul. Every line with one exception came out easily, there being only a water-haul. One young fellow tugged and jerked and raised the sawdust fish to the surface. He was wild with excitement, and thought he was about to land a whale. He couldn't land his game with the pole, so he pulled off his boots and jumped into the stream, and thus secured his catch. It was brought ashore, but goodness! he was mad as a hornet, and threatened to pulverize the whole gang. He was finally pacified, and stood treat for the whole party when they returned home.

THE PADDOCK.

There is usually a surprising neglect among breeders in sending a list of their foals for publication. The compilers of stud books are not only put to a great deal of unnecessary trouble, but there are quite a large number of breeders who never send the desired intelligence, and hence they are omitted from the volumes. We would like to obtain every foal which has any pretensions to breeding—thoroughbred or trotting—which has been dropped on the coast this year, so as to complete the record, and will be obliged if the owners will furnish them. It is not a great deal of trouble. If many a letter can be sent, if one or two, a postal card will bring the information. We make a grand start with the Palo Alto foals, and hope to add to this list until all are placed on record. This will give a better idea of the magnitude of the breeding interests of the coast than volumes of general information.

LIST OF PALO ALTO FOALS FOR 1882.

TROTTER BRED.

- Jan. 6—Lady Ellen, by Mohawk Chief; bay colt, by General Benton.
 Jan. 10—Cleopatra, by Fred Low; brown colt, by General Benton.
 Jan. 15—Cornelia, by Fred Low; bay filly, by Gen. Benton.
 Jan. 19—Alvoretta, by George Lancaster; bay colt, by Electioneer.
 Jan. 25—Norma, by Alexander's Norman; bay colt, by Electioneer.
 Jan. 23—Piney Lewis, by Longfellow; bay filly, by Electioneer.
 Jan. 26—Alameda Maid, by Whipple's Hambletonian; bay filly, by Electioneer.
 Jan. 28—Marla Pilot, by Mambrino Pilot; bay filly, by Electioneer.
 Jan. 29—Mamie C., by Imp. Hercules; bay colt, by Electioneer.
 Jan. 29—Eliza Dolph, by Wild Idle; bay filly, by Electioneer.
 Jan. 30—Barnes' Idol, by Idol; bay filly, by Electioneer.
 Feb. 3—Lady Kline, by Mohawk Chief; bay filly, by Gen. Benton.
 Feb. 3—Glendale, by Messenger Duroc; bay filly, by Gen. Benton.
 Feb. 6—Electa, by Electioneer; bay filly, by Gen. Benton.
 Feb. 8—Amerignita, by Mohawk Chief; brown colt, by Gen. Benton.
 Feb. 9—Nellie Walker, by Thorndale, or son of Edwin Forrest; bay filly, by Gen. Benton.
 Feb. 15—Dane Winnie, by Planet; bay colt, by Electioneer.
 Feb. 16—Fannie Lewis, by Imp. Buckden; bay colt, by Gen. Benton.
 Feb. 18—Texanna, by Foreigner; bay filly, by Gen. Benton.
 Feb. 20—Alameda, by Langford; bay filly, by Fallis, son of Electioneer.
 Feb. 20—Blarney, by Blarney Stone; bay colt, by Bentonian, son of Gen. Benton.
 Feb. 21—Daisy C., by The Moor; brown colt, by Gen. Benton.
 Feb. 25—Mayflower, by St. Clair; bay filly, by Electioneer.
 Feb. 25—Mollie Shelton, by Rifleman, brown filly, by Electioneer.
 Feb. 28—Maggie Mitchell, by Clay Pilot; bay filly, by Electioneer.
 March 4—Aurora, by John Nelson; bay filly, by Electioneer.
 March 6—Sallie Hamlet, by Hamlet, son of Volunteer; bay colt, by Electioneer.
 March 7—Beautiful Bells, by the "Moor;" brown colt, by Electioneer.
 March 7—Prussian Maid, by Signal; bay colt, by Shannon.
 March 8—Glencora, by Mohawk Chief; brown colt, by Electioneer.
 March 10—Lizzie Collins, by Stansifer's Woful; bay filly, by Electioneer.
 March 17—Waxana, by General Benton; bay colt, by Electioneer.
 March 18—Abbie, by Almont; bay colt, by Electioneer.
 March 18—Tipperra, by Tippetary; bay filly, by Electioneer.
 March 19—Sister to Irene, by Mohawk Chief; bay colt, by Gen. Benton.
 March 19—Junietta, by Fred Lowe; bay colt, by Gen. Benton.
 March 21—Ashland Mare, by Ashland; bay filly, by Gen. Benton.
 March 25—Mamie, by Hambletonian, Jr.; bay colt, by Electioneer.
 March 26—Lillian, by Lodi; bay filly, by Gen. Benton.
 March 26—Blooming, by Messenger Duroc; chestnut filly, by Shannon.
 March 28—Mabell, by Electioneer; bay filly, by Gen. Benton.
 March 28—Winona, by Almont; bay filly, by Electioneer.
 March 31—Esther, by Express; bay colt, by Electioneer.
 April 1—Ada, by Messenger Duroc; bay filly, by Gen. Benton.
 April 3—Amy, by Messenger Duroc; brown colt, by Electioneer.
 April 4—Lady Morgan, by Rysdyk's Hambletonian; chestnut filly, by Gen. Benton.
 April 4—Lilly, by Mohawk Chief; brown colt, by Electioneer.
 April 5—Wilhelmina, by Messenger Duroc; bay colt, by Gen. Benton.
 April 6—Frolic, by Thunder; black colt, by Electioneer.
 April 9—American Girl, by Toronto Sontag; bay colt, by Electioneer.
 April 10—Elaine, by Messenger Duroc; chestnut filly, by Gen. Benton.
 April 14—Bijou, by Electioneer; bay filly, by Gen. Benton.
 April 15—Lilly Roberts, by Mohawk Chief; bay filly, by Shannon.
 April 16—Clara, by Mohawk Chief; bay colt, by Shannon.
 April 17—Consolation, by Dictator; bay filly, by Electioneer.
 April 21—Lady Thorn, Jr., by Williams' Mambrino; bay colt, by Electioneer.
 April 27—Adelaide, by Donald; bay colt, by Electioneer.
 April 27—Lady Dooley, by Black Hawk; bay filly, by Electioneer.
 May 2—Melinche, by St. Clair; bay filly, by Electioneer.
 May 2—Irene, by Mohawk Chief; chestnut filly, by General Benton.
 May 2—Dixie, by Billy Townes; bay filly, by Electioneer.
 May 2—Juliet, by Mohawk Chief; bay filly, by Electioneer.
 May 3—Mohawk Waxey, by Mohawk Chief; bay filly, by General Benton.

- May 3—Columbine, by A. W. Richmond; bay colt, by Electioneer.
 May 10—Emma Robson, by Woodburr; bay colt, by Electioneer.
 May 11—Alice, by Almont; bay colt, by Electioneer.
 May 17—Idabelle, by Rysdyk's Hambletonian; chestnut filly, by Shannon.
 May 17—Wildred, by Mohawk Chief; bay filly, by General Benton.
 May 19—Sprite, by Belmont; bay colt, by Electioneer.
 May 23—Mayflower Mohawk, by Mohawk Chief; bay filly, by Electioneer.
 May 23—Prima Donna, by Mohawk Chief; bay filly, by General Benton.

THOROUGHBRED FOALS.

1882.
 January 17—Riglin, by imp. Glengarry; brown colt, by Shannon.
 January 24—Boydana, by imp. Knight of St. George; bay filly, by Shannon.
 February 2—Robin Girl, by Enquirer; bay colt, by Shannon.
 February 6—Hattie Hawthorne, by Enquirer; brown colt, by Flood.
 February 15—Sallie Gardner, by Vandal; bay colt, by Shannon.
 February 16—Planetia, by Planet; chestnut colt, by Flood.
 February 28—Lizzie Whips, by Enquirer; chestnut filly, by Shannon.
 March 8—Miss Peyton, by imp. Glengarry; bay colt, by Shannon.
 March 23—Katharion, by Harry of the West; bay filly, by Shannon.
 April 2—Bettie Bishop, by imp. Buckden; bay colt, by Shannon.
 April 18—Florence Anderson, by Enquirer; bay colt, by Shannon.
 April 16—Frou Frou, by Asteroid; bay filly, by Flood.
 May 5—Rivual, by Rivoli; bay filly, by Flood.
 May 16—Cubet, by imp. Australian; bay filly, by Shannon.

THE HERD.

Our contributors in the Cattle Department of the BREEDER AND SPORTSMAN have not been as prompt as those who make other fields a specialty, though we have the assurance that when the busy season of haying and harvesting is over there shall be no lack. The breeders of these valuable animals are somewhat skeptical that a paper which gives much consideration to horses will find room for a race over which there cannot be so much excitement. Still, we can assure them that it rests with those who are the most interested in this branch of rural economy whether it shall be so or not. We will gladly give the room, though from the nature of things it depends more on correspondents to give life to the subject than anything editorial labor can accomplish. There are scores of breeders in California who can send interesting communications, and about the only time their names are mentioned is during the fairs. Should these take the trouble to write relative to their experiences, they will benefit that branch of the breeding interests of the Pacific Coast, and be of direct service to themselves. All we can do is to solicit the favors of communications, which we will be pleased to publish, and do everything in our power to forward the business. There are herds here of Short-horns, Jerseys, Ayrshires, Herefords, Holsteins, Devons, Guernseys, etc., which will rank as high as those of any country, and in the acknowledged superiority of this coast for the production of the best specimens of the equine race, it will be singular indeed if there are not the same advantages for the bovine.

HOLSTEINS AS BUTTER COWS.

TO THE EDITOR OF THE GAZETTE: During the past winter and early spring we have tested a few of our cows, and quite a number of our young heifers, for butter. Considering all the circumstances, the very young age of most of the heifers, the fact that they were imported last fall and dropped their calves soon after coming out of quarantine, and before they were acclimated, also that these tests were made in winter on winter feed, corn fodder not cut, long hay with grain feed of bran, and ground oats, with not over a quart of corn meal per day—a feed not calculated to produce butter—we are very much gratified with the result:

	lbs.	oz.
Janek, 8 years old, tested last season	19	15
Egis, 8 years old, last February, 4 months after calving	15	8
Topaz, 4 years old	13	3½
Rarity, 4 years old	12	13
Netherland Queen, before she was 3 years old	14	4
Netherland Queen, at 3 years old	14	11½
Oriana, before she was 3 years old	13	3½
Frolicsome, 3 years old	13	
Meadow Lily, 3 years old	12	10
Carlotta, 3 years old	12	1
Clothild, 3 years old	12	3½
Isadora, 23 months old	10	13½
Meadow Maid, 23 months old	9	4½
Carno, 2 years old	9	7
Amazon, 2 years old	9	5½
Catula, 2 years old	8	14½
Hernstein, 2 years old	8	12
Kitty, 22 months old	8	5½
Marjorie Daw, 23 months old	8	13½
Mistletoe, 23 months old	8	5

A few of the above were tested for 4 days, and a few others for 8 days, but we have given the rate per week, in order to have all uniform. We again call the attention of the reader to the very young age of these heifers, and the fact that they are not yet acclimated; also that these records were made on winter feed. Our cow, Netherland Queen, has just closed her four-year-old milk record, 15,641 lbs. in one year. Last Autumn she was shipped to the State and other fairs, being away two weeks, during which time she shrank 40 per cent. on her milk, and did not again recover, which on an estimate, would reduce her record over 1,000 lbs. Our three-year-old heifers are now milking from 54 to

60 lbs. per day, each; many of our two-year-olds, over 40 lbs., and some about 50 lbs., although not acclimated. Syracuse, N. Y.

SMITHS & POWELL.
—Breeder's Gazette.

SALES OF JERSEY CATTLE IN NEW YORK—COOMASSIE AND HER DESCENDANTS.

From the *National Live Stock Journal* the following is copied, and to those who are not posted in the capacity of these popular cattle, the story of such a yield of butter will appear incredible:

The public sales of Jersey cattle, conducted by Messrs. P. C. Kellogg & Co., in New York city, commencing May 9th, and continuing four days, were remarkable, not only for the very high prices paid for several animals, but also for the satisfactory average on the large number sold. As will be seen by the detailed report elsewhere in this issue, two hundred and fifty animals brought \$108,400, an average of \$433 each. Fourteen of them sold at prices ranging from \$1,000 to \$4,800, realizing a total of \$29,585, being an average of over \$2,100 each. Instead of, as was anticipated by many, the market being overloaded by offering so many at one time, the demand seemed to increase as the sale progressed, and the average of the last day was the best of all. Fifty head belonging to the late firm of Cooper, Maddux & Co. were sold on that day for \$38,885, an average of \$761.86 each. The cup which is given each year at Messrs. P. C. Kellogg & Co.'s combination sales to the breeder making the highest average on five or more animals was won by Mr. A. B. Darling, of New York city, who consigned six head that brought \$854.17 each. The result of these sales is certainly most encouraging to breeders of this popular race of cattle. There were about 200 people in attendance each day, a large proportion of whom were breeders. On the first day some disappointment was manifested that higher prices were not reached, but on the second day this feeling was dissipated; and when Princess 2d, a descendant of Coomassie, was sold for \$4,800, there was great excitement. This cow, five years old, was consigned by Mr. S. M. Burnham. There were four or five competitors for her, but Mr. Pierce, of Boston, and Mr. Moulton, of Vermont, made the highest bids next to Mr. Shoemaker, of Baltimore, who secured her. Our representative, Mr. E. T. Blois, attended these sales, and through him we have some interesting particulars in reference to the famous cow Coomassie, the granddam of Princess 2d, who has the honor of having been sold for the highest price ever paid for any animal of this breed.

Mr. Burnham purchased Coomassie two years ago, paying for her \$210, a little over \$1,000. Her prize-winnings had become so uninterrupted that by common consent the cow was admitted to be the type of the Jersey, and competition at last practically ceased, but one aspirant for championship honors appearing against her in each of the last two years, these only to be easily vanquished. Her prizes at the Royal Jersey Agricultural Show were, in 1876, 1st prize in young cow class; in 1877, 1st prize in old cow class; in 1878, 1879 and 1880, 1st prize in champion cow class; in 1880, 3d prize for richest milk, in a class of 16; also from 1874 to 1877, four 1st parish prizes. But the cow was something more than a prize-winner. She was destined to be the founder of a better family whose certainty of transmission of dairy qualities stands unrivaled in this country to-day. Not only was the cow herself good, but she had the power of sending down through two and three generations her great qualities, generally intensifying them. This ability, so rarely found in great cows, of multiplying and retaining the butter yield, she possesses to a remarkable degree, as will be seen from the list below.

The importation of Coomassie was not only the result of Ona's remarkable test, and the fact of the cow being champion over Jersey, but the desire as well, on the part of her owner, to have a distinctive strain of his own. Starting with the test of Ona, and that of the old cow herself, he sought for confirmation of his belief in the powers of the strain from the descendants of the first three sons, these being the only ones that have contributed to the increase of the stock. One son was represented in Ona. The next example was sought in an inbred great-granddaughter Island Star, tracing to another son. The butter came again. At two years of age she made 1 lb. 5 oz. per day on grass alone, and ten months later made equal to 11 lbs. 6 oz. in 7 days. Remarkable as this was, it was the more so from the fact that at this time the heifer was six and a half months in calf. To complete the chain, a test was needed from a daughter of the third son. This was soon furnished by La Rouge, who made, at four years, 11 lbs. 2 oz. in seven days. Thus the butter power of Coomassie was traced through each of her first three sons, from whom have sprung all the tribe, King Koffee, her inbred son, just entering service. New examples of this quality were not wanting, and the list, as far as is known, shows a degree of certainty which is indeed remarkable. The strain is in its infancy, and those interested have had to rely upon young animals for the tests they needed to confirm their opinion of its merits. The list is as follows:

- Coomassie, 16 lbs. 11 ozs. in 7 days.
 Tracing to Koffee, the oldest son, are:
 Island Star, 11 lbs. 6 ozs. in 7 days, 10 months after dropping calf, at 2 years old; 6½ months in calf.
 Queen of Ashantee, 10 lbs. 14 ozs. in 7 days, 6½ months after calving, at 2 years old; 8 lbs. 12 ozs. in 7 days, 11 months after calving, at 2 years old.
 Auntychel, 9 lbs. 3 ozs. in 7 days, 7 months after calving, at 2 years old; 5½ months in calf.
 Mabel of Trinity, 9 lbs. 10 ozs., at 2 years, 3 months after calving.
 Fancy Fawkes, 8 lbs. 3 ozs. 7 months after first calf.
 Morning Star, 7 lbs. 14 ozs. 10 months after first calf, at 2 years old; 6½ months in calf.
 Tracing to Khedive, the second son, are:
 Ona, 17 lbs. 4 ozs in 7 days, at 3 years old; 11 lbs. 4 ozs. in 7 days, 7 months after.
 Princess of Ashantee, 11 lbs. 13 ozs. in 7 days, at 2 years, and 16 quarts per day.
 Princess 2d—her share 42 lbs., made by Coomassie, Ona and herself, in one week, on short winter feed; Coomassie being 11 years old, and 3 months in milk, Ona 5 months in milk, and Princess 2d 10 days after calving.
 Tracing to Vertumnus, the third son, are:
 La Rouge, 14 lbs. 2 ozs. in 7 days, at 4 years old.
 Lady Velvetine, 15 lbs. 12 ozs. in 7 days, at 3½ years old.
 Le Gros' Lily of the Valley, 8 lbs. 12 ozs. in 6 days, at 2 years old.
 Pnnchinello, 15 quarts of milk on first calf.

The scale of points for a Jersey cow has of late been considered an excellent thing to judge prize winners by, but not useful as an indication of any essential dairy qualities. A greater mistake was never made. It is not claimed that from it can be told how much butter and milk a cow will produce, but that one should be able to tell comparatively whether his animal will be useful for these purposes. Look at it carefully and see how many points are given for fancy characteristics, and how insignificant they are to the number that indicate the splendid capacity to turn food into milk and butter, without adding flesh to the carcass or undue size to the bony structure. Of this we think Coomassie an excellent exemplification. She scores extraordinarily high, and has the dairy quality and potency to transmit it. More prize winners in Jersey trace to Coomassie than to any other one individual animal known there.

The splendid udder development of all the tribe is worth noticing, and seems as invariable as their butter qualities. In almost every instance they have enormous udders, running well forward and back, with yellow skins and well-spread teats. Their escutcheons are uniformly good. Princess 2d, that sold for \$4,800 is the first of the blood that Mr. Burnham ever offered for sale.

GUERNSEY CATTLE.

The following first rate description of the Guernseys is by a correspondent of the *London Field*. This justly celebrated breed of cattle has not yet met with the favor in America they so richly deserve, but are becoming better appreciated. One of the finest herds of Guernseys in the United States belongs to H. Pierce, of San Francisco:

This race of cattle seldom get the name and credit they deserve, being often coupled with the Jersey or Alderney. Comparatively few people know that there is any difference between the Guernsey and Jersey, most being frequently ignorant of the fact that the Guernseys are a distinct breed, and, in reality, very different from the Jersey. One great advantage is that they are altogether a more fleshy animal, without the exceedingly bony frame that, though good for converting a small amount of food into milk, gives no protection from hard weather, and will not fatten. There is little doubt that this race of cattle could be well acclimatized and bred to a very hardy, useful breed. Size could be cultivated; they could be in time brought to a larger animal than they are at present, though there are many fair-sized Guernseys to be seen now. The English farmer has ordinarily nothing to fall back upon but "market value." He has no breed that combines quality as well as good milking properties. The "better" he breeds his stock, so to speak, the less chance he has of having a good dairy. His down-cowling heifers are of no special value; whereas, if they were thoroughbred and had quality, whether Short-Horn, Devon, or, in fact, any breed, he would have a considerable chance of obtaining high prices for them. The Guernsey heifers are of high value, and will always obtain a price, especially now the Americans have taken them up.

The Guernsey cow is a long, deep animal, her depth being carried on all through—wide pins, and lots of room behind, and gradually forming into a light dairy-looking forehead; narrow shoulder tops, and a thin neck and head, the legs short and clean, with no daylight at all under the body. The fawn and white patches, cream-colored nose, and general orange gloss denote the true breed. They are not the small cow they are generally supposed to be. Mr. James, whose name is well known as a breeder of first-class Guernsey stock, both for show and good milkers, says: "Some of our cattle will come very little short in weight of an ordinary Short-Horn at three years old." Then he goes on: "I farmed for many years in the South of Scotland, and bred Short-Horns. I had the opportunity of comparing the two breeds." This surely speaks well for the Guernsey.

Though different in many ways, there is a great similarity between the Jersey and Guernsey, both breeds being essentially butter-maker's cows, giving similar amounts of butter, and of the same quality. This butter, as is well known, is of superb quality, color and taste, and always fetches the highest price. The Guernsey gives more milk, often three to four gallons to the two or two and a half of the Jersey. In fact, a dairy of Guernseys would give more milk than the average of ordinary Short-Horns, especially if selected and bred for it. The first-prize Guernsey cow at the Royal Counties' Show at Salisbury in June last, gave one an excellent idea of what the breed should be. She was deep, long and wedge-shaped, with a splendid bag, and was then giving four gallons per day of milk of good quality, which is not very wonderful for the breed. A Guernsey heifer, after her first calf, was only the other day giving four gallons a day. This was not a prize animal. A Guernsey will yield 350 pounds to 400 pounds of the finest butter in the year.

There is a structural limit to the production of every cow—that is, in the actual mechanism of the animal itself. There are no two animals made exactly alike, inside or out. Any difference in the formation of the internal structure might make a difference of many gallons yield in the course of the year. This does not infer that the anatomy of cows is in any way different; but there are undoubtedly structures better formed for produce than others.

As regards the breeding of good dairy cows, it is always allowed that like, to a certain extent, produces like, externally and internally. Then, again, there is the law of variation, against which the breeder of good stock always has to struggle. Be it as it may, the only safe road to certainty, or, we might say, success, in breeding good milkers, is to breed from pedigree milking stock. This seldom can be obtained where a pedigree Short-Horn bull is used. You cannot have the milking type unless you breed from animals which have been milkers. The Guernseys, both bull and cow, are descended from stock which have been esteemed for their large produce of milk and butter for generations. With regard to bulls for producing good milkers, it is sometimes argued that the milking properties of a cow invariably descend through the female line; but this gives no ground for any rule, as there are, and have been, many bulls which have produced good milkers. For instance, the Earl of Dublin and the Jamestown bull had this milking propensity.

The structural economy of a Guernsey allows her to convert the food she eats into produce far more perfectly than the ordinary dairy cow. Of course there are advantages in having massive-framed animals, in order to attain great weight when fattened out; but massive frames require a good deal to support life during the time they are in milk, leaving the remainder for the production of milk.

It is easier to infuse flesh into a milking breed of cattle than to create a "milking propensity" in a fleshy breed. By selecting the large ones, and feeding the calves well, there is no doubt this breed might be made fit for any tenant farmer.

AYRSHIRE STATISTICS.

ED. GAZETTE: The following statistics of Ayrshires were recently sent me. Perhaps they may be of interest to publish: Alonzo Libby, Saccarappa, Maine, reports a daily weight of milk, as follows: Queen of Ayr 4th 4465, from March 24 to April 23, 1882, 31 days, gave 1,377 lbs.; from April 24 to May 23, 1882, 30 days, gave 1,350½; and Queen of Ayr 5th 4466, for the same time, gave for 31 days 1,541 lbs.; for 30 days, 1,520½. Norman Gourlay, Victor, N. Y., reports: Guess 2d 3120 as giving, for the 30 days of June, 1881, 1,258 lbs., and for 7 days, from the 12th to 18th of same month, she averaged 53 lbs. a day, and made from the milk 14 lbs. 6 oz. butter before salting.

Wm. Fairweather, McLane, Pa., states that he has butchered Nonesuch 3018, aged 12 years. Live weight, 1,150 lbs.; dressed, 732 lbs. beef.

—Breeder's Gazette.

C. M. WINSLOW.

ATHLETICS.

THE GROWTH OF ATHLETICS.

The first attempt to introduce amateur athletics on the Pacific Coast was made by a few members of the Olympic Club, in 1875, at the Recreation Grounds in this city. The track was of macadam, about one-third of a mile in circumference, with sharp corners, and a fall of about six feet diagonally from the north to the south corner. The few enthusiasts of that time struggled manfully to create an interest among the members of the club and the public in purely amateur and honorable sports, but up to this year the want of suitable grounds for the purpose has made it an arduous and disheartening undertaking. The Recreation Grounds and Bay District Track, unprotected from the chilling and fog-laden winds for which San Francisco is noted, were of little encouragement to beginners in training; and spectators were not anxious to put themselves to the discomfort of viewing a second meeting through the clouds of dust prevailing at almost any time of the season when it is possible to give a meeting here, especially as every event was at such a distance from them that it was impossible to know anything of the outcome until it had been reported from mouth to mouth. Dissensions in the club and the want of an intelligent report of meetings by the newspapers prevented any combined action toward the support of athletics. Being virtually isolated from the rest of the world, home athletics were of small moment. The meeting of the Bay District Track last Thanksgiving Day passed off very well, but the audience was too far from the track to fully understand and appreciate all the events. The Olympic Athletic Club is now in possession of grounds of its own, corner Fourteenth and Center streets, Oakland. They have put in a good track for running and bicycle riding, good dressing rooms, and everything of necessity, both for training and convenience at athletic meetings. All of their events are usually open to amateurs. Other clubs can easily obtain the use of grounds for their members, and by opening most of their events and holding their meetings there, the interest in athletics will rapidly increase, and the stimulating effects of an enthusiastic and appreciative audience will, undoubtedly, develop among us numerous first-class athletes in all branches of manly sports. We have enough material, in embryo, we brag about our climate and horses, and there is no longer any reason for hanging back on account of poor accommodations. A new departure and combined action by all friends of the cause will insure success.

THE CHAMPIONSHIP.

The defeat of L. E. Meyers at the Championship meeting on June 10th has had a most disastrous effect on his newspaper admirers, and such backing and filling to frame excuses for the champion is seldom indulged in by independent sporting journals. He has been credited this season with beating several records, both at shorter and longer distances than the event in which he was defeated, and his friends were anxious to back him as a winner to the tune of several thousand dollars, for which they have since duly repented in sack-cloth and ashes. There was no hint of lack of condition before the race, but immediately afterwards it was suddenly realized that, record breaking to the contrary notwithstanding, he was far below last year's form. His conqueror slept but two hours the night before while journeying to New York, and still eclipsed any time made by Meyers at the same distance when compelled to breast the tape to obtain a record. And Brooks was not allowed to go over the mark three times without being even penalized. It is a long time since Meyers has been started by a man not under the glamour of his fame, and independent enough to insist that the pistol should decide the start. The innovation is a wholesome one, and will undoubtedly encourage athletics who of late have been compelled to put up with wretched starting for the sake of beating a record. Of late it had become a common occurrence in amateur handicap meetings in the East, for scratch man to creep over the mark two or three yards before the pistol was fired, and the only penalty was to be sent back to scratch without being penalized. Such culpable carelessness should be frowned on by all handicappers, whose efforts to equalize the chances of competitors are entirely frustrated. Fortunately for athletics on this coast thus far, the starter in all events has attended to his duties without showing the least favoritism; and the unusually large audience at the championship meeting was no doubt partly due to the knowledge that enough money was at stake on the important event to ensure an honest start by the pistol, or an enforcement of the penalty, as well as the fact that the event would be closely contested.

Mr. Meyers undoubtedly deserves all honor for what he has accomplished by sheer perseverance and pluck, and we wish there were more amateurs as enthusiastic as he has shown himself to be; but still, why the penalty should be ignored for a couple of years on account of one individual, is more than the heathen in this benighted region can comprehend.

Annexed are the entries, and a synopsis of the race. Those who appeared at the starting post were: H. S. Brooks, Jr., Yale College, 1; S. Derickson, M. A. C., 2; A. Waldron, M. A. C., 3; A. C. Cooper, W. A. C., 0. Cooper did not start, and Derickson ceasing to persevere, Brooks trotted to the tape in 30 4-5s. Second heat—Entries: L. E. Meyers, M. A. C., 1; W. C. Wilmer, N. Y. A. C., 2; J. B. White, M. A. C.,

3; B. H. Tobey, W. A. C., 0; E. J. Wendell, N. Y. A. C., 0. Neither Wendell nor Tobey started, and Meyers won by two yards, in 23 3-4s. Final heat—Brooks, 1; Meyers, 2; Derickson, 3. Wilmer did not start. Brooks stood like a statue on the mark, but the others were very nervous, and got put back once for their stealing propensities; but when the pistol was fired they both gained the lost yard, and all then ran side by side for 25 yards; but at the turn it was plain to be seen that the Yale man had the pride of place, and he was never headed throughout, but had Meyers beaten 50 yards from home, while Derickson was out of the hunt altogether. Time—22 3-5.

The following are the records beaten at the same meeting: Throwing the hammer—F. L. Lambrecht, P. A. C., 93 ft. ½ in., W. L. Condon having held the best record for four hours, with 89 ft. 10 ¾ in. Putting the shot—F. L. Lambrecht, 39 ft. 9 ¾ in. The hurdle race, 120 yds., over 10 hurdles, was made by J. A. Tivey, W. A. C., in 16 4-5s, the best record for American amateurs. Throwing of the 56 lb weight resulted in the victory of H. W. Best, Boston Y. M. A. C., with 24 ft. 10 ¾ in., the best on record.

In connection with the above, we annex the following from the *N. Y. Clipper*: "The defeat of L. E. Meyers by H. S. Brooks, in the 220-yards race at the championship meeting, naturally gave rise to a general desire to see the men engage in a match race at the same distance, for which each should undergo a special preparation. With a view to bringing about such a meeting, a retired amateur runner decided to offer a silver cup of the value of \$150, and having readily gained the consent of Meyers, addressed a communication to the Yalencian, notifying him of his intention, and that the choice of ground was left to him (Brooks). Promptly replying thereto, the latter says: 'It will be impossible for me to meet Mr. Meyers, as I have broken training for the season. My time is not my own, as I am just in the midst of my annual examinations. I leave for home (San Francisco) in a few days, and have made all my arrangements. I will be most happy to meet Mr. Meyers at some future time, and I am sure I am very much obliged to you for your very kind offer of a prize.' That settles the matter for the present, but it is probable that the coming Autumn will witness the wished-for race. Until which time it is to be hoped that both men will continue well."

THE OLYMPIC ATHLETIC CLUB HANDICAP MEETING, at their grounds, at Oakland, announced for July 8th, has been postponed for two weeks, in order to allow competitors to enjoy the coming holidays—and recover from the usual effects. It is to be hoped that entries and competitors will be plentiful, as the events are open to all amateurs, and the grounds are the only ones on the coast suitably arranged for the proper management of an athletic meeting. The officers will make it a point to keep the inner grounds clear, in order that every event shall be in full view of the spectators.

AT THE HALF-MILE TRACK, last Sunday, a match between M. Geary and John Larkey, of 100 yards, for an alleged stake of \$100 a side, was won in a jog by Geary. The time, with almost a gale of wind at their backs, was 10 ¾ seconds. Larkey has been credited with numerous trials in even time, and could almost immediately repeat in 10 ¾, but even with the wind directly behind him, was beaten in the most hollow manner in the above time.

THE GUN.

THE COSMOPOLITAN SHOOTING CLUB.—This Club held its annual session in Police Court No. 1, on Tuesday last, Judge Hale Rix in the chair. The following officers were elected to serve for the ensuing term: President, Judge Rix (unanimously re-elected); Vice-President, George W. Shorten; Secretary and Treasurer, Jerry Brownell, Jr. Board of Directors—A. Anlt, F. Maskey and F. Putzman, Jr. Probably in the last week of this month the Cosmopolitan will shoot their fourth match with the California Club for the diamond trophy. The latter Club has but one match to its credit, so that if the Cosmopolitan wins in the coming event, they will count the diamond trophy among their spoils.

DOVE SHOOTING.—The close season for this favorite bird with our wing shots, expires to-day, and many of our local sportsmen have gone into the country to spend their Fourth of July vacation hunting these fleet wingers. The last legislature very wisely classed the dove as a game bird, and made it unlawful to shoot or trap it between January first and July first. The wisdom of this course is shown by the increased number of birds this year.

There are young ducks about the size of quail up in the breeding grounds, up river. The little fellows are very difficult to catch, as they run and hide in the tules and get out of the way. The old one will almost allow herself to be caught in saving the young ones. One old mallard was seen with nine little ones.

Up on the Suisun marshes it is stated that there is more feed for the ducks than for years past. The hunters may expect a fine season this year.

Charles W. Kellogg, of Oakland, will to-day nstrap his gun-case at Summer Home Farm, Santa Cruz Mountains, for a four-days' dove hunt.

There are a good many ducks up in the Suisun marshes now. Many teal and mallard breed there during the Summer.

J. H. Jellet will open his dove shooting practice to-morrow, at Soquel, Santa Cruz County.

Ben Brown and Robert Liddle, of Liddle & Kaeding, have gone dove shooting in the neighborhood of San Jose.

Sam Platt will open dove season to-day, at San Mateo.

J. V. Coleman, of Meulo Park, will shoot doves in the neighborhood of his residence.

Judge Rix, Dr. Leavitt, Philip Funcke and John Muller, will scour the fields around Pleasanton and Sunol for doves to-day.

Fine dove shooting can be had near Cloverdale, Sonoma County.

Messrs Wm. Lindsey and Wm. Golcher, Sr., leave to-day for Novato, Marin County, dove hunting.

There were two or three inches of water covering the Suisun marshes during the high tides of last week.

Wild celery is very plentiful in Suisun marshes. This will make it good for the canvasbacks this Winter.

THE Breeder and Sportsman.

PUBLISHED BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 1338.

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

Money should be sent by postal order, draft or by registered letter.
Communications must be accompanied by the writer's name and address
not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR
SAN FRANCISCO, - - SATURDAY, JULY 1, 1882

GREETING.

To those who prefer the sunny side of life, who appreciate the many enjoyments the Great Creator has placed within our reach, who are not held in bondage by fanaticism to see merit in gloom, and to consider all diversions frivolous, if not absolutely wicked; to those who can discover the golden edging to the blackest cloud, and who have faith that there is always a silver lining within the shadow; to those who seek to make the bright days brighter, and who are earnest in their endeavors to increase the happiness of all, our greeting is presented.

There is implanted in every human being a desire for enjoyment. In place of trying to eradicate it as a pernicious propensity, our effort will be to direct it so that it may be beneficially indulged. Believing that there is little virtue in austerity, or salvation in asceticism, our aim will be to follow paths which lead in other directions.

By the side of the mountain brook, when the Spring flowers are blooming, and the linnets and robins are singing their liveliest notes;

Through the forests, when there is quiet and fragrance, and where the interlocking branches form giant arches, and the music of the breeze sighing through the twigs;

Among verdant fields, where foals are gamboling around their dams, and the lowing of cattle and the bleating of sheep welcoming the herdsman and shepherd;

Over the glad waters, where the spray is sparkling in the sunshine, and the white sails are in a tremor, and the masts quivering in the excitement of motion swift, and as graceful as the flight of the seagull;

By the side of the racecourse, when there is an eager strife for mastery, and the blood bounds through the veins and arteries, and there are shouts and cheers, and an intensity of feeling indescribable;

On the plains, where the fleet courser flits by like the shadows of cloudlets over a waving grain-field when there is a brisk wind driving the fleecy figments of vapor between earth and sun;

Under the leaf of the coppice, when the flag-tailed setter or staunch pointer is transformed into a statue, and then the whirr of wings, the sharp report, and the puff of smoke vanishing in the clear air;

Through orchards, crimson with the flowers of the peach and almond, white with the bloom of the pear, and rich with the perfume of orange blossoms;

Meandering among the vines, green as emerald when the hills are sere and brown, and the clusters hang embowered in the abundant foliage, shining in purple, red, topaz-colored and luscious;

Winding among fields, when the grain stalks are bending beneath the bearded heads, and there is the rattle of the reaper and the hum of the thresher;

Halting at the grounds where the young men are developing activity and strength to fit them for the sterner battles of life, and there is a fierce emulation to excel—determination, the antithesis of irresolution—health against the flaccidity of indolence and luxury;

Quiet walks in the evening, to weep and laugh over the sorrows and joys, so skilfully counterfeited as to appear actual; lessons burned into the mind with the red-hot iron of realistic effect;

Visits to the family circle, when there is a glow on the hearth; devotees bending over the figures of kings, queens, bishops and knights; eager parties debating the last hand at whist:

This is the merest sketch of the route we intend to compass, a hint of the long journey contemplated.

While the course is marked through a country of sunshine and flowers, enlivened with the song of birds, and which Nature has clothed with a gay garb, there is instruction on either side of the road.

There are learned professors among the travelers to proffer lessons which will benefit, and illustrators who will picture from practical results.

Far from recommending that men—even those who can afford to do so—should spend their whole time in sport, our desires are that they should blend amusement with labor, so that each may have its appropriate place in life. Sport alone is like wearing garments made entirely of decorations, like a meal of condiments and sauces. Ornaments add beauty to the dress, sauces give relish and piquancy to the repast. But there must be strong warp and woof to support the lighter fabrics, and substantial food to produce brain, muscle and bones which will endure the strains which active life imposes. To withstand this strain, it is necessary that there should be a proper apportionment of work and a fitting time for recreation. Labor—constant, unremitting labor, especially that work which compels sedentary habits, or long hours of in-door confinement—will speedily wear out the strongest constitution, and there is absolute necessity for relaxation and change. The racehorse, with sinews and muscles of the truest kind, endurance perfected by breeding from the best for a score of generations, can not stand being “keyed up” for long periods. There must be a cessation in the exercise, a change from the track to the roads or fields, else there is a waste which can never be repaired. Man, though capable of undergoing more severe training without permanent injury than animal of any kind, is still amenable to natural laws; and, besides physical loss, the greater danger is from the strain on the brain, and consequently the failure of nerve force.

To aid in adjusting the proper balance between labor and sport, to remove the obstacles which are in the way of a better understanding of the relation between sport and good morals, and to assist in advancing the interests and increasing the enjoyments of all, are our fervent desires.

THANKS.

We return our sincere, heartfelt thanks for the kind notices which our contemporaries have given the BREEDER AND SPORTSMAN. They have been so manifold that to acknowledge separately would appear vainglorious, and hence we make the return general.

The Eastern turf and rural papers, the press of the Pacific Coast, have been lavish in good words and kind wishes for our enterprise, and we shall do our utmost to render the paper worthy of the encomiums, the flattering prognostics which have been awarded. There is a feeling of responsibility, arising from these friendly greetings, which at times impresses us with the fear that we will not be able to meet the expectations; and then there is the stimulus of good wishes, so copiously offered, which will nerve us to continued exertion, to prove in a measure at least worthy of the trust. Should there be, at any time, a desire for ease, a sort of a hankering for a break in the work, an anxiety to escape from the self-imposed task, the remembrance of the encouraging “send-off” will brace us up and the struggle be renewed with a determination to last out the race.

But were it not for the assistance we have been so fortunate in securing, the misgivings would be increased, and sanguine as we are, there might be at times doubt and despondency.

Beside the regular forces ready for duty, however arduous, and who can be depended on to carry out the plans to a successful issue, there are volunteers which complete a grand army, and make the certainty of ultimate victory. It is only necessary

to refer to the names, which are given in another place, to show that at the head of every division are generals who are eminently capable, and there is an *esprit*, collectively and individually, as well as knowledge, which insures the departments being handled in a way which must be satisfactory. We can scarcely overestimate the important aid which those gentlemen lend who favor us with presenting to our readers such a wealth of varied information as their contributions will show. With these coadjutors comes confidence, and a reliance that our journal will merit the plaudits, for which we again thank our brethren of the press.

THEN AND NOW.

WHEN good old Isaak Walton used to wander along the umbrageous banks of his favorite streams he never had any misgiving about being able to fill his creel because there were no fish left in the waters. His philosophic meditations were not disturbed by intrusive thoughts of vengeance and mental curses against those vandals who deplete the water courses of their inhabitants. The sky, the clouds, the air, the wind, the water, the shadows, and the momentous question as to colors and shape of fly, were subjects which had the bearing on the result of the day's sport.

His prophetic mind gave no hint as to the possibilities of lime, soap root or *cocculus indicus*. He never dreamed of giant powder, and all his philosophic musings never wrought up his imagination to the point of supposing it possible that such agencies would almost destroy the sport which made his name famous. “The Compleat Angler, or the Contemplative Man's Recreation,” tells us how to catch fish, but not how to catch the man who kills the fish and sweeps the streams.

If Sir Isaak was “behind the times” through the accident of having lived in the seventeenth century, he had the advantage of us in some respects. If he did not have a split bamboo pole with nicked fittings, and improved gut leaders or casting line, he could make his cast where a dozen or two others had not already done so the same day. If he had no hundreds of varieties of ready-made flies, waterproof line and automatic reel, he had a chance to catch something with a rude home-made tackle. If he knew nothing about the breeding and hatching of trout by artificial means, or the stocking of streams, he had the satisfaction of “working” those stocked by nature. In short, had our venerable father of the gentle sport lived now-a-days, the “Contemplative Recreation” would not have been written, for instead of sitting on a bank “contemplating” and waiting for bites, he would have put in his time swearing at the Portuguese woodchoppers who blasted out the pools and destroyed the fish. The man who sits by on many of our streams must sit by them and wait for the fish to grow.

OUR CORRESPONDENTS.

We must say that there never was a paper which commenced with a more brilliant array of correspondents than the BREEDER AND SPORTSMAN, and the pages of the first number afford the best proof of the correctness of the statement.

It is superfluous to say more than to call attention to the contributions, and request for them a careful perusal. It is, in fact, all that we can do at present, as individually and collectively they are worthy of so high praise that it would require a great deal of room to do them justice. Still better, we have an assurance of a continuation of the favors, especially when the busy racing season is over. Then will come the discussion of topics which are of paramount interest to breeders, trainers, the disciples of Nimrod and Walton, and all others who are interested in the various fields this paper covers.

Exciting as the Summer exploits are, there will be no lack of interest when the long evenings give more time for the consideration of questions of so much importance. In the meantime there will be news from the race courses, from the breeding farms, from the woods and streams, from the rifle grounds, from every place, in this busy season of sport. And again we have to thank our correspondents for the favor which are beyond prices.

EDITORIAL DUTIES.

The letter of Mr. Kellogg, in calling attention to the editorial management of a journal the main topics of which are breeding and sport, will naturally lead to an expression of our views on the subject; and there could not be a more appropriate place than in the first number of the BREEDER AND SPORTSMAN.

No one can value correspondence more than we do. In a paper of this kind, it is a feature which does not yield in importance to any other department, and we regard ourselves as being extremely fortunate in securing such an array of talent as these columns will show. But the idea that the editor is merely a clerical officer, gathering and arranging the contributions, printing them without comment, unless statistical errors are to be corrected, is far different from what we hold the duties of a manager to be. Mr. Kellogg is right in advising that partisanship be avoided. We have an utter abhorrence of "organs," when that term means the adhering, right or wrong, to a party, or any pre-arranged course of action which is marked by those who control for the organ to follow. In that case the editor is a servitor, wearing the collar of thralldom inscribed with the name of his owners, and as much a chattel as though he were a dog. It matters not whether the ownership is vested in a party or an individual, the slavery is the same. There is such a thing as independence in turf journals, however, as well as in those which have the most potent influence in the political world, though independence can not be real without opinions to sustain it; and these opinions must not be kept in the background, but supported publicly, manfully, and in accordance with convictions. There are numerous topics which elicit differences of opinion in a paper which makes the breeding, rearing, training, racing and trotting of horses one of the prominent features of its columns. It will not answer for the paper to ignore these questions in the editorial pages, no matter how capably they are handled by correspondents; and the editor does not fulfil his trust, when, from motives of expediency, he keeps aloof from the discussion.

The contributors stand in the position of attorneys, doing the best they can to forward the interests of their clients; the editor has judicial duties, which he must not shirk. This does not compel him to take sides with either of the contestants, or to turn the duel into a triangular battle. By such a course, he would lower the dignity of his position, and incur the charge of favoritism to one or other of the disputants. But it is seldom, indeed, that the editor is called upon in a controversy between correspondents to decide any of the points at issue, especially when the disagreement is in relation to the places which should be awarded rival families of horses.

The readers generally care little about the individual preferences of the editor, so far as his fancies in that direction go, though they have a right to expect that he will not give an undue prominence to any particular strain. Fancy has a great deal to do with preferences in the breeding of horses of every description. One man favors the Normans for heavy draft, another the Clydesdale, and still another is sure that the "Shire horse" is the proper animal for the moving of heavy loads. With fast trotters, there is the greatest disparity in the views of breeders, and every family of note has enthusiastic advocates. These advocates are prone to disparage the families which are outside of their favorites; and, unfortunately, many think that decrying those which come in competition exalts the race that is their particular hobby. There is a jealousy among owners as well as writers, and, like the youngster who has become hopelessly smitten with some fair damsel, praise of others is a bitter poison to their minds. We presume that this is the feature which our esteemed correspondent had in his mind while giving the advice, and the fear of raising any animosities what he counsels avoiding. This is very well. But to pander to the absurd jealousy of those who are so thin-skinned, by avoiding editorial articles which have a bearing on the important questions of breeding, will not be

our course. Egotistical though it may appear, we have a good deal of confidence in the judgment which has come from many years of experience, and a close observation; and we shall not hesitate to present our views whenever we deem the occasion requires that they shall be given.

There are other questions which demand still more emphatic handling on the part of the editor. There are practices to commend or reprobate; in the management of courses, there are points to praise, errors to condemn; and there is scarcely a fair or meeting which does not present salient characteristics.

We would much rather write words of commendation than censure—and the turf millenium will be close at hand when there is little necessity for rebuke. When the necessity arises, when castigation is the only remedy, the lash must be laid on with a will.

To return to the letter of Mr. Kellogg. We think our readers will coincide with us in hearty commendations, if even there are points of difference of opinion. One portion of his advice we shall follow, viz., giving both sides a full hearing irrespective of our belief.

From discussion comes knowledge, and if we are wrong in the premises, no one will more cheerfully concede the error, and just as cheerfully adopt contrary views to those which have been promulgated. Again, the advice to avoid personalities and partisanship is as sound as "heart of oak," and is well worthy of being kept in constant remembrance.

OUR ASSOCIATES.

We are indeed fortunate in the Field Marshals who are at the head of the various departments, and this good luck is shared by our readers.

Piercy Wilson, who has had long experience in journalism, closely identified with all pertaining to papers of the stamp of the BREEDER AND SPORTSMAN, is a valued general auxiliary.

Charles G. Yale has charge of the Yachting and Fishing columns, and it is supererogatory to state that there is no one better qualified to handle these important departments, East or West.

T. T. Williams is an enthusiast in all pertaining to Dogs, and in England, Australia and this country the love for "man's best and truest companion" has never wavered. When joined to such a complete knowledge of all varieties of the species, Mr. Williams is peculiarly well fitted for the place.

Athletics are under the charge of Dwight Germain, and again we will have the endorsement of every one who is acquainted with Mr. Germain, that better could not be obtained.

Boating is under the supervision of as competent a man as there is on the coast, but for the present, at least, he desires to remain *incognito*. We have not the least hesitation in promising that there shall be no lack, and in this department the work will show that the tiller is in good hands.

Bicycling requires a person who has the right knowledge of this popular exercise, and in obtaining the aid of Geo. H. Strong to oversee the department, we feel that it is on a par with the others.

These gentlemen, and others outside of the ranks of journalism, as it may be termed, who aid in the various departments, are equally as proficient, and thus we can safely say, that there never was a paper which had a brighter prospect.

THE EARLY TRAINING OF COLTS.

In the admirable letter of Mr. Rose he makes a strong point when writing of the early training of colts. The idea is novel, and much as has been printed and said on the subject, we never heard it advanced before. That is, if two men are training colts, one a firm believer in the system, the other of a contrary opinion, in a great majority of instances the former will do too much, the latter too little. There would be a guard in the one case fearful of doing injury, the confidence in the powers of the animal might tend to overwork. With a very prom-

ising colt the danger is increased, especially when the aim is to develop phenomenal speed. So far as our experience has gone, there is a guide which will do to rely upon, provided due care is taken in noting the indications. If the colt does his allotted task cheerfully, eats with a relish, has no heat or swelling of the limbs, and there is a bright look in his eyes, it is safe to say that the work is proper. But then there are colts of such high spirit that they never exhibit fatigue until their powers have been completely exhausted, while others are so sluggish that it requires continual urging to get them along from the first. As Mr. Rose says, there is constant necessity for careful handling, and it is impossible to lay down rules which can be depended upon in all instances. The impetus which the wonderful performances of the California colts has given to the trotting of youngsters makes this one of the most important questions for the consideration of breeders at the present time, and we hope that it will be fully discussed.

CLOSING OF STAKES.

As will be learned from the advertisement, the "Fixed Events" of the Pacific Coast Blood-horse Association close on the first of August. There is scarcely a doubt that every one of the stakes will have the largest number of nominations ever made on the Pacific coast. The fact is, that every one who owns a thoroughbred yearling can not afford to leave it out; and though he may think that the larger breeders have the pull over him in numbers, the history of the turf will show that those who have bred on a small scale have gained their full share of the good things.

The classification gives the opportunity for the nominator to select, and as the stakes range from half a mile to two, the distances can be chosen according to the anticipated merits. Scan the advertisement, weigh well the necessity for every man, who is in a position, to name, and then—why, name in every stake on the bill.

THE FAIRS.

In the hurry of getting out the first number, we are forced to postpone a good deal which properly should have been given a place. It does not require an apology, however, as no matter how little a person may know of the newspaper business, the truth is evident that one number would not suffice to write proper acknowledgments, or call attention to every advertisement. As the weeks come, due attention will be given to these prominent matters.

The Fairs of California deservedly rank high among the agricultural exhibitions of the country, and we will take pleasure in presenting their claims—in the first place, to those who must assist in keeping them up to the mark; in the second, to the public, by giving such a description as they are so well entitled to. Give us time to get properly "warmed up," and we will endeavor to do this part in a way that will be satisfactory.

THE FIRST OF AUGUST.

The first of August is an important day in the diary of a turfman. Following the Eastern practice, the prominent California stakes close on that day, and the Fairs have generally adopted that date for the entries to close in the trotting purses. Between this and that time there will be many questions asked, and as nearly as we can learn there is a likelihood of favorable answers being returned, as the horses are generally doing well. So far the classification appears to be very satisfactory, and there is a certainty of numerous entries. As a majority of the Fair programmes are advertised, owners and trainers can see what there is before them. There is certainly quite a variety, and it looks as though a horse which has any pretensions can find a place which will suit him.

CROWDED OUT.

Proofs everywhere. There is an avalanche of matter, every line of it timely, every paragraph worthy of a place. Sixteen pages are a bagatelle. Four times sixteen would be necessary to do justice; and were it not that we are determined to start at a pace we feel confident of bettering, an other form would have been sent to press.

ROWING.

The action of the Fourth of July Committee in appropriating a small sum of money for a regatta at Long Bridge on the National holiday, will do much to increase the public interest in rowing. San Francisco should be preeminent in aquatic sports, as the opportunities for amusement on the water are numerous. For yachting, our magnificent bay offers unrivaled attractions. During several months of the year the most adventurous yachtsman can enjoy the delights of a half gale any afternoon his soul hankers for the excitement of scudding under reefed canvas. These stiff winds are not as acceptable to oarsmen as to the yachting fraternity, but they are not violent or changeable enough to prevent rowing in racing craft, or even to mar the sport. The mornings are almost invariably beautiful. For four hours in the forenoon the most timid oarsman can enjoy the pleasures of a row on a sheet of water as bright as a mirror and as smooth as a mill pond. The winds come up with the regularity of clockwork, and blow in the same direction with a conscientiousness that speaks volumes for the steadiness of the clerk of the weather. During the afternoon gale the sheltered water along the wharves offers a course of three miles which is rarely so rough that an ordinary shell twelve inches in beam can not go through it without much discomfort to the occupant. In other parts of the world, is it possible to do as much rowing in a year as on San Francisco Bay? The sun never shines so fiercely that a row is not possible and pleasant, and the rigors of frost and ice are unknown. Except when a fierce southeaster or icy norther lashes the tide into the semblance of a sea, a moderately expert sculler can dance over the bay in a light practice boat with safety and comfort. For fully ten months in the year the bay is fit for ordinary racing craft, and there do not occur more than three weeks in the twelve months, when a resolute oarsman would be compelled to take his exercise on land. For some inexplicable reason, however, regattas are generally held at the time of the year least favorable to racing. The Fall is by far the best season for rowing on San Francisco Bay. In September the trade winds die away, and until the southeasterly gales begin in Winter, the bay is generally as calm as a duck pond. If the present custom of holding regattas during the existence of the trade winds should prevail, a modification in the class of boats used for racing would be most desirable. These matters, however, generally accommodate themselves to circumstances, and already a class of racing boats, designated as "barges," has established itself in favor. The weatherly qualities of the barge makes it available on any day during the Summer months, and in this respect the rough boat is preferable to the fine shell, which often makes the postponement of an important race necessary. The wind never blows strong enough during the Summer to deter a barge, and crew from making the trip over the stiff course from Long Bridge to the Rolling Mills, and to the spectators the contest is just as interesting as if the crews were in paper shells. Among scullers the same tendency to rough boats is observed, and the "wherry" has become very popular, and promises to become more so. The narrow racing shell may in time undergo the process of evolution, and give place to a class of boats with more beam and less length. On a fine morning a thirty pound single scull of eleven or twelve inch beam may show to great advantage; but for every afternoon during six months of the year, a boat with a few inches more beam would lead her a merry dance over the white caps.

For the first time in some years we are to have a first-class four-oar shell race. For this contest on the Fourth of July, the South End, the Golden Gate, the Pioneer and the Ariel Clubs have each entered a crew, and if they all come to the line as promised a good race is sure to result. Four-oar shell racing has gone out of fashion somewhat since the Pioneer Club won the McKiuley Cup and the championship. The St. George Club made a desperate attempt to revive the sport, and died in the attempt. Since then the Pioneer Club has had a monopoly of shell rowing, and has improved the opportunity by keeping its boat where it could gather dust and cobwebs. The younger clubs have devoted much of their energy to barge racing, and with two of them the contest on the Fourth will be a *debut* in fine boats. The Pioneer crew should win, as they have a really fine paper boat that has done some fast work. It is very dubious, however, if, even with this advantage, the Pioneers come first to the stake. In their initial pulls they showed up very badly. L. C. White, the sculler, is in the bow, and seems altogether out of place there. The rig of the boat evidently disagrees very badly with him, and he labors hard at the oar without doing effective work. R. Crowley, at forward waist, has a reprehensible habit of hooping his back, and nearly smiting his knees with his chin every time he reaches for the stroke. R. C. Lyne, at No. 3 seat, pulls a vigorous oar, but his style differs from that of the two men in front of him. John Sullivan, the sculler, is stroke oar, and pulls in good form, but is out of place. The stroke seat is not his best position. The crew is, therefore, anything but a strong one. It needs a good deal of practice to become fast, and not having the opportunity to get it, must expect a hard race in slow time. The Ariel four have had a few spins, and though a lighter crew, do far better work than the Pioneer men. Fred. Smith is stroke, and while not the loveliest in the world, pulls hard, and does fully his share of the work. Sam. Watkins, the sculler, is in the bow, and steers well. The crew is handicapped in boats, but in lumpy water will make the Pioneer men row the whole distance. The Golden Gate crew will use the paper shell formerly owned by the St. George Club, but so far have not appeared in anything but their barge. If they show up to equal advantage in the paper boat they will be the strongest crew in the list, as the South End men are also handicapped in a wooden boat of uncertain age and speed.

The Fourth of July Regatta will commence at 9 A. M., and the course will be from Long Bridge, running south, one mile and return. The disadvantage of Long Bridge is that it offers very poor accommodations for spectators, and if the wind blows with all its accustomed vigor in the afternoon the less enthusiastic admirers of aquatic sport will have their endurance severely tested. The committee having charge of the

regatta is, however, experienced and competent, and will doubtless arrange matters to the best advantage for competitors and spectators. The single scull race will be rowed at 9 A. M., before the procession. All other races will be rowed after the procession. For the single scull race the possible entries are: Henry Peterson, John Sullivan, Louis White, Denis Griffin, Sam Watkins and R. Crowley. Peterson, of whom great things have long been expected, is regarded as the favorite, and it is intended that he will row the course nearly a minute faster than it has ever before been rowed in a public trial. Out of such a large field there ought to be some one to keep him company, and there are several who fancy they can, even if the extra minute is annihilated. In some respects Peterson's sculling is very good, but he has a few very grave faults which will tell against him when he meets a man with force enough to rush him from the start, and stamina enough to row stroke for stroke with him over the course. While he is not in proper fix for a hard race, having been recently under the doctor's care, Sullivan is also comparatively untrained, and Griffin has had insufficient practice and will very likely find himself outclassed in such company. The boy sculls in better style than most of the Long Bridge men, but he lacks the weight. With ten or fifteen pounds to help him over a stiff course he would make a first class sculler, but it is very doubtful if an oarsman of his inches can get in the front rank. Watkins will come to the post in better trim than any man in the race, but will have a heavy contract on hand to keep Peterson, White or Sullivan company. Samuel is a very game and cool sculler, but he is troubled to a considerable extent with the "slows," and when it comes to a contest of good force and nerve pluck the fast man is very likely to give the plucky one his wash. In speculations on sculling matches one generally hears a great deal about the "game-ness" of the race, but the result generally shows that pace is the great desideratum. Any man can be game when he finds himself drawing away from his opponent. Of course, it is not denied that game-ness is an essential qualification for a sculler. A man who gets into his boat in fear and trembling had better stay on shore; but so may he if his sole reliance is on pluck. A good many game men have tried conclusions with Hanlon, but none of them have found that rowing a stern chase was a profitable business.

In this Fourth of July regatta it looks as if some of the scullers were arranging a fat contract for themselves, by entering in several races. One man is booked for four races, expecting, of course, that he will capture a few prizes. It is respectfully suggested to the Committee of Arrangements that, in the interest of rowing, the men who take part in the first class single scull race be debarred from competition in the wherry race. There are a number of young scullers on the bay who would gladly enter for the wherry race, and make a spirited contest if left to themselves, but who will either form the tail end of a procession if pitted against old scullers, or else will fail to come to the post. The Nautilus Club ought to push forward two entries for the wherry race, the Tritons and the Dolphins two or three, and the Ariel, Golden Gate and Pioneer Clubs four more. All these entries would be genuine junior scullers, and a competition between them would be lively and interesting. The barge race will bring the South End and Golden Gate crews into rivalry once more. The Pioneer Club has a new barge crew in training, with Captain Brannan stroke, Al Tobin after waist, T. Flynn forward waist, and Long bow. The Club is rather badly off for fast barges, and unless the crew can get a new boat before the Fourth, they will be shown the way over the course. The Dolphin and Triton Clubs will enter for the junior barge race, having an objection to competing with professionals, which is not generally shared by the other clubs. In fact, since the collapse of the Amateur Rowing Association, the regard for amateur rules has died out almost entirely, and among the better oarsmen it would be hard to find one who has not rowed for a money stake. It is somewhat significant, too, that the interest in rowing has greatly increased since the dismemberment of the Amateur Association. It would not be well to infer from this that an amateur association is undesirable. On the contrary, it is most desirable, but its management must be intelligent or liberal, or it will defeat the good object of its organization. The trouble with the Pacific Amateur Association was that its professed object was to taboo professional rowing, which was a grievous mistake, as there is no antagonism between the men who row for money stakes and those who row for mugs. The only thing necessary is to keep them apart, and let each row in his own class, and by such an arrangement advance and maintain the popularity of a most admirable pastime.

ON THE STANDING OF THE ROWING CLUBS on the Pacific Coast we have received many questions, especially in regard to the rules of all Eastern amateur rowing and athletic clubs. We would respectfully refer all questioners to some one of authority among the shells. So far as we can see, there is no particular and general restriction enforced in regard to the amateur standing of members of such clubs. Well known professional athletes are unhesitatingly elected to membership, and, after becoming members, are even encouraged to make matches for any amount of money, to be rowed Sundays, without any hint of its being for a prize, and pools and bets on the event are freely quoted several days in advance. Amateurs who have been disqualified by Athletic Associations should by all means join a Pacific Coast Rowing Club.

THE LONG BRIDGE REGATTA.

The Executive Body of the Fourth of July Committee has proposed the following programme for the regatta on Tuesday next at Long Bridge:

- First—Single shell race; first prize, \$40; second, \$20.
- Second—Wherry; first prize, \$30; second, \$15.
- Third—Four-oared shell; first prize, \$50.
- Fourth—Four-oared shell, lapstreak; \$30.
- Fifth—Barge, for seniors; first prize, \$40; second, \$20.
- Sixth—Barge, for juniors; first prize, \$30; second, \$15.
- Seventh—Whitehall, double sculls, 19 feet; first prize, \$20; second, \$10.
- Eighth—Ships' boats, not over 24 feet; first prize, \$25; second, \$15.

Entries must be made at the rooms of the Committee, No. 235 Kearny street, not later than to-day, and are subject to the following conditions:

If not more than two boats enter for any one race, there shall be but one prize; and if only one entry, there shall be no race.

The single scull race will take place at 9 A. M., and all

other races at 12:30 P. M., or immediately after the procession. Judges, Captain Charles Nelson, Captain C. L. Dingley, M. Price. Referee, Charles Yale. A band will furnish music during the regatta.

YACHTING.

Mr. P. Lorillard's steam yacht, *Radha*, is credited with a very high comparative speed. She has steamed seventeen miles an hour, and yet it is the opinion of all hands on board that what is in her has not been exhibited up to the present time. Since she was launched she has had three different propeller wheels, each of different types, and with each one has her speed been improved. At present her four-bladed screw, said to be an improvement on all former ones, is of a type made on the Hudson River, but a Philadelphia firm are now making a screw propeller for her that they claim will improve her speed. The steam yachting fraternity are much interested in the matter.

There are four new steam yachts nearing completion in New York.

The new keel schooner *Varna*, built at Voak, Conn., by G. L. Davoll, is 94 feet over all; 85 feet water line; 22 feet 6 inches beam; 10 feet deep, and 9 feet draught. She is owned by Mr. Geo. H. B. Hill, former owner of the *Prospero*. No expense has been spared in construction or outfit.

If anybody wants a fine, large, steel center-board, they will find it up on the *Petaluma* flats. The only trouble is the flats are wide and the board was not buoyed.

The sloop *Elia*, which was wrecked on Mare Island, a couple of weeks ago, is being repaired at San Quentin.

THE YACHT CRUISE.—The Yachts of the San Francisco Yacht Club leave to-day on a cruise up river.

The following orders have been issued by Commodore Harrison:

Yachts of the S. F. Y. C. will assemble at Front street wharf, previous to 2 P. M. on Saturday, July 1st, and at 2 P. M. sharp, the preparatory gun will fire, and five minutes later, the starting gun, when the fleet will get under way, and proceed to Martinez, anchoring outside of the line of the wharves.

On Sunday, at 11 A. M., the preparatory gun will fire, and five minutes later, the starting gun, when the fleet will get under way, and proceed to Antioch, making fast there alongside of each other at the wharf.

On Monday, at 6 A. M., the preparatory gun will fire, and five minutes later the starting gun, when yachts will get under way and proceed to Benicia, anchoring close to the steamboat wharf.

On Tuesday, July 4th, at 8 A. M., the fleet will dress ship. There will be a regatta while the fleet is at Benicia. At 2 P. M., the preparatory gun will fire, and five minutes later, the starting gun, when yachts will get under way and try rate of sailing to San Francisco.

On May 17, the steam yacht "*Boadicea*," was launched from the works of Messrs. John Elder & Co., on the Clyde, for the head of the firm, Mr. William Pearce. The new yacht is 180 feet in length, 24 feet 2 inches beam, and 13 feet 11 inches deep (moulded), with a yacht measurement tonnage of 446. The new yacht, which is expected to be propelled at the rate of 15 knots per hour, is built of steel, and her engines are of the most recently improved type, having cylinders of 23 inches and 48 inches diameter by 2 feet 6 inches stroke, to indicate 600 horse-power. The boiler is to carry 110 lb. pressure, and is constructed with a shell of the best soft steel and corrugated furnaces. The propeller is of manganese bronze.

The *Whitewing* has had an accident with her board. The staple broke on the chain barrel and they lost the end of the chain. The board was a new one, heavier than that of the *Chispa*.

The *Nellie* will take Mr. Bowie, Mr. Harlow, Mr. Edgar, and several friends to Santa Cruz. She will stay in Monterey Bay about two weeks.

The sloop *Nellie* has gone on a three day's cruise up river.

Four gentlemen, three of them owners of yachts, have purchased the residence on the beach road, in the rear of the San Francisco Yacht Club at New Sausalito, and will fit it up as a private club house.

There is talk of a new yacht club, to be called the "California." There are to be no officers, and all the members are to have their own way, each one bossing his own boat, and having nothing to say about those of others; but, come to think of it, that is the way in all clubs. It is difficult to see the use of another yacht club in this bay, when the two now in existence are far from being in strait financial condition. There are a number of rich men belonging to them, but they do not make, unfortunately, rich clubs. The clubs own their houses and are out of debt, but when entertainments are to be given, the club treasuries cannot be called upon to any extent. Charges have to be made or subscriptions given. With this condition of things, we think a third club seems not only unnecessary but possibly dangerous to the yachting interests of San Francisco.

The Fisherman's Regatta, at Benicia, promises to be an aquatic event of considerable interest. Mr. John Eckley, formerly Commodore of the San Francisco, who resides at his farm on Carquinez Straits, was the originator of the idea, and has done most in getting up the race and arranging the details. There are some 800 boats in the straits, bays and rivers, engaged in salmon fishing, and it is thought that from 150 to 200 of them will enter the race. Of course, there will be a great many collisions, and possibly, some capsizes. So large a fleet under way will, however, make a spectacle worth seeing. The race is comprised of boats engaged in salmon fishery, so it is, of course, not a "yachting" event, but the yacht fleet will, on its return from Antioch, remain a day in Carquinez Straits, and the yachtsmen will be on hand to see the fisherm in race.

MISTAKE.

The added money in the Winters Stake is \$300 in place of \$500, as it appears in the advertisement. The error came from using the old bill and overlooking the change that was made at a late meeting of the Trustees. At the same time the added money in the Pacific Cup was reduced from \$1,000 to \$600.

THE RIFLE.

We are fortunate, indeed, in securing the valuable assistance of Dr. E. H. Pardee in this department, and feel that this addition to the force makes it invincible. Dr. Pardee will extend his communications through several numbers, showing the successive steps in progressing from the sling and bow to the latest improvements which make so terrible and effective a weapon of the modern rifle. There is not one more capable, having continued practice and study, joining field and target practice, and never suffering the most minute point to escape.

There is a fascination in shooting which none but the ardent sportsman can understand. Apart from the fierce excitement in the pursuit of the larger species of game, there is the satisfaction of excelling in target practice, and even the mere "shooting at a mark" alone, and with the stimulus of excellent previous efforts, is a pleasure. The rifle plays an important part in the sports of the Pacific Coast. The grizzly and cinnamon bears, more to be feared than the "man-eaters" of India, the California tiger, the panther, the buffalo, elk, deer, antelope, &c., gain a field for the use of the single bullet which no other country can equal. California has developed talent at the butts which ranks with the foremost of the world, and altogether the columns under the caption of "The Rifle" will be of exceeding interest.

ANCIENT AND MODERN ARMS.

MR. EDITOR:—As we turn over the pages of ancient history, we find from the earliest ages of the world, a "prone-ness, a disposition of mankind, to disagree, which not only holds good in the individual, but communities have risen against communities, and nation against nation, resulting in bloody war. While it is not in the province of this article to speak of the causes of the sanguinary conflicts, it will be but proper to speak of war as a science, and the ingenuity of man to invent the most deadly instruments for the destruction of his fellow-men. Arms, therefore, may be regarded to mean every imaginable weapon that the ingenuity of man could contrive both for defensive and offensive, for "self-preservation" in all ages has been regarded "the first law of nature." And the great study of the civil engineer, is to invent some method in developing the ruling passion to injure, slaughter and kill, while remaining himself in comparative safety.

The first weapons that were recognized in the infancy of the world were the "sling" and the "bow," which in those primitive days were manipulated with such wonderful precision, and power, that large armies were decimated, until the dying and the dead, upon the battlefield in many places would be as thick as sardines in a box, and the earth saturated and fertilized with human blood. The sling and bow were the recognized weapons, for centuries, when the fertile brain of some inventive genius introduced the battle-axe, the spear, the sword, and javelins, as auxiliaries to the sling and bow, and were used with terrible slaughter in close engagements.

The biblical account of the tragical death of Goliath, with a stone from the brook, only proves that David was a "dead shot," and that Goliath had underrated the ability of the young chieftain, in the art and science of trajectory, as practiced in those antiquated days.

From authentic and reliable sources we are led to believe that an immense force was given to the stone from the sling, and with a precision that to us appears almost incredible, and can only be equaled or excelled by our system of modern gunnery. Lead balls were used as projectiles, and the account given by Seneca of their great velocity appears to be fabulous, for even with our modern gunnery no theory has ever been advanced whereby the leaden missile is melted by the atmospheric friction in its passage through the air. And, I think, if the spirit of Seneca could be communicated with by some man of the present day who understands the principles and laws of gunnery, he could be made to see that his philosophy when in the flesh was false, and would be glad to issue a contradiction of his former statement, and say that no sling could impart sufficient power to a leaden ball whereby its great force and velocity through the atmosphere would cause it to become so heated by friction that it would fuse and melt.

The strongest advocates and the greatest experts in the use of the sling is given to the Phœnicians, or the inhabitants of the Balaeric Islands, where it was regarded by all classes and sexes one of the necessary accomplishments, and their fame in the use of the sling became universally acknowledged, which grew up from a spirit of emulation and assiduity in its use. The children of the Island, in the sling days, were not allowed breakfast until they struck their food, which was perched upon the top of a high pole, with a stone from a sling. Like the mau digging after the woodchuck, he had to get him, as he had no meat for breakfast. I will dismiss the sling by saying, like many men, it outlived its usefulness, and the last account we have of it as an instrument of war was in the Huguenot campaign in 1572.

The bow dates back in the dimness of the past to remote antiquity, and the first account given of it may be found in the 21st chapter of Genesis and 20th verse, when the ruler in speaking of Ishmael, says: "And God was with the lad, and he grew and dwelt in the wilderness, and he became an archer."

History tells us some remarkable and almost incredible stories regarding the abilities of the bygone expert archers. And not being very credulous myself, I must confess I feel a little sensitive about taking the dose, though I am free to admit that the general shape and contour of the arrow is much better fitted to pass through the atmosphere with less resistance than the old spherical ball; but with all that advantage, when we compare the power of a man's arm to that of the expansive power of gas produced from the combustion of gunpowder, the argument is like the handle of a jug, all on one side. And in some future article I will endeavor to give the power and quantity of gas generated from one hundred grains of rifle powder; the result of which will be almost incredible to those who have never given the subject thought and attention. History is prolific with Roman and Grecian authority in giving detailed accounts of this little engine of war, which, if true (and who can doubt history) the battles fought during the existence of the Roman Republic were more sanguinary and bloody than those

fought with our more modern implements of war. But when history tells me that battles have been fought with the cross-bow at 700 yards, I must confess that our archery clubs here are but lilliputians in their feeble attempt to cope with the brown-arm, scar-worn veteran of the bow one thousand years ago.

(To be continued.)

SNAP SHOOTING.

About three years ago, Colonel Horace Fletcher, of San Francisco, published a pamphlet of about forty pages, entitled "The A B C of Snap Shooting," in which the author advocated a method of practice with rifles of 22-caliber at moving globes, as the simplest, quickest and most economical method of acquiring proficiency in shooting.

The "A B C" met with immediate favor with the most practical shots in this country and Europe, where it went, particularly the officers of the Regular Army; and the United States Cartridge Company acquired the right of publication and distributed thousands of copies gratuitously.

Numbers of examples of splendid results from this practice having come to our knowledge, we propose to devote space occasionally to notice of this branch of sport.

Col. Fletcher has promised contributions on the subject, which will be valuable to those interested in learning to shoot.

An English gentleman who has lived in Germany much of his life, and who won no less than a dozen first prizes at different rifle meetings in Germany, Austria and Switzerland last season, in two of which more than eight thousand rifle-men competed, writes to say, that all his skill with both rifle and pistol was acquired in two seasons by following the course prescribed by Col. Fletcher in the "A B C," and he expresses the opinion that his acquisition of skill was due to the method, and not to the man, because, at beginning, he was as clumsy as possible for any one to be.

There is undoubtedly a one-two-three method of practice which is applicable to shooting, as there is to everything else, and which, if followed as prescribed, will unravel the difficulty of learning as easily as the practice of the scales in music will take the kinks out of clumsy fingers.

Perfect acquaintance and sympathy is necessary between the gun, muscles and eye, which can be acquired in one-tenth the time, and at one-tenth the expense, by using the minimum caliber of rifle in a systematic manner.

We would be very glad to receive communications from gentlemen who practice snap shooting with the rifle.

Deer shooting, to-day, marks the opening of the deer shooting season, and many an enthusiastic hunter, spread before his camp-fire built on mountain sides, anxiously awaited last night the coming of dawn. Deer this year are plentiful throughout the State, and residents of few cities in the world possess such opportunities as San Franciscans to enjoy the pleasures of deer hunting without the loss of much time. A four-hours' ride from this city will take them to ground where the game can be had.

Deer are quite plenty on the hills near Pescadero, San Mateo County, and as soon as the season opens hunters hope for big hauls of fine game. A farmer saw a band of five deer in his grain field a few evenings ago.

TRAP AND WING.

THE ALAMEDA CLUB.

The muster of the Alameda County Sportsman's Club at Bird's Point, on Saturday last, was not so large in numbers as had been generally expected. The chief event was the match at 10 birds, 21 yards rise, State Sportsman's Association rules, in which the high wind and the good flyers so bothered the shooters that on the average the birds beat the guns. Following is the score:

A. W. Havens.....	1	0	0	0	1	1	1	0	0	1	—5
W. W. Haskell.....	1	1	0	1	1	0	0	0	1	1	—6
R. E. Bell.....	0	0	1	0	1	0	1	0	1	0	—4
J. G. Edwards.....	0	0	0	0	1	1	1	1	1	1	—5
Wm. Mortimer.....	1	0	1	1	1	0	0	0	0	1	—5
C. Tuttle.....	0	1	1	0	1	1	1	1	1	0	—7
Homer Fritch.....	1	0	1	1	1	1	0	1	0	0	—6
West.....	0	1	1	1	1	0	0	wdn			
Mayhew.....	0	1	1	1	1	1	1	0	1	1	—7

*Died out of bounds.

There being a tie between Messrs. Tuttle and Mayhew, they shot off at five singles, and the former gentleman was the victor, killing three out of the five. There was then a five-bird match at 26 yards, in which Mr. Havens was the winner by a clean score, and this was followed by two other matches on the same terms, in which Messrs. Adams and Galindo divided the honors. There were some speculative matches shot between individual members, and some contests on the freeze out principle, and it was only when darkness set in that the fire irons were relegated to their cases, and the members and visitors returned to their homes.

THE CALIFORNIA CLUB.

On Sunday last there was a contest for the several trophies of this club, represented by three medals. There were thirteen entries, and, as will be seen, the shooting was close and exciting to the finish. The conditions were twelve birds at twenty-one yards rise, under the California Club rules, and the score was as follows:

J. Burris.....	1	1	1	0	1	1	0	1	1	1	0	—9
D. Berwick.....	1	1	1	0	1	1	1	0	1	0	1	—9
R. Ellon.....	1	0	1	1	1	1	1	1	0	1	0	—10
Dr. Hays.....	1	0	1	1	1	0	1	1	1	0	0	—9
J. H. Jellett.....	1	1	1	1	1	0	1	0	0	1	1	—9
F. Locan.....	1	0	0	1	1	1	1	0	1	0	1	—6
S. E. Knowles.....	0	1	1	0	1	1	0	1	1	1	1	—11
T. A. Pearson.....	1	1	1	1	1	1	0	1	1	1	1	—11
P. J. Walsh.....	1	1	0	1	1	1	1	0	1	0	0	—6
B. Bogart.....	1	0	1	1	1	1	1	1	0	0	1	—9
G. W. Roche.....	1	1	1	0	1	1	0	1	1	0	1	—9
Dr. Chismore.....	1	0	0	1	1	0	0	1	1	1	1	—8
C. Robinson.....	1	1	1	0	1	0	1	1	1	1	1	—10

*Died out of bounds.

A match of four doubles was next shot, with the following result:

Dr. Hays.....	10	11	10	10	—5
Jellett.....	10	11	11	11	—5
Robinson.....	11	11	11	11	—7
Pierson.....	11	11	11	11	—6
Walsh.....	11	11	11	11	—7
Bogart.....	11	11	11	11	—5
Chismore.....	11	11	11	11	—8
Locan.....	10	11	11	11	—4
Weeks.....	11	11	11	11	—8

Dr. Chismore and T. Weeks divided first and second money, the ties on seven kills taking the fragments.

A match at six birds for three prizes—\$32 50, \$19 50 and \$13—followed. J. A. A. Robinson and P. Welch divided first and second money, and Roche and C. Robinson divided third.

Several other matches followed, the shooting lasting until daylight gave way. The best contested match was the last one, at five birds, Hurlingham rules, resulting in clean scores for all competitors, as follows:

Bogart.....	1	1	1	1	1	—5
Roche.....	1	1	1	1	1	—5
Locan.....	1	1	1	1	1	—5
Pierson.....	1	1	1	1	1	—5
Weeks.....	1	1	1	1	1	—5
Walsh.....	1	1	1	1	1	—5
Pierson.....	1	1	1	1	1	—5
Robinson.....	1	1	1	1	1	—5

In the off-shoot at two birds four fell out, leaving the contest between Messrs. Pierson and Robinson, which resulted in favor of Mr. Robinson.

The Occidental Club held their first meeting at South San Francisco, on Saturday. The match was at clay pigeons, and terminated in a victory for P. J. Walsh, who scored 9 out of 12, thus winning the gold medal. F. Miller took second prize, with a score of 8.

The Ligowsky Flying Clay Pigeon and Trap form an excellent substitute for pigeons, both in practice and in match shooting. The trap is of very ingenious device, and the pigeon is light pottery clay, weighing about 1¼ ounce, which on being thrown by the spring, imitates exactly the flight of that bird. There are many features in these imitations that will recommend them to the popular favor, the chief one being that it enables a person to become a crack shot on the wing without the expensive use of pigeons. Pierce & Co., 1209 Broadway, Oakland, are the sole agents for the Pacific Coast, and from them circulars, containing all necessary information, can be obtained.

FISH.

Mr. Horace C. Ladd, of the W. U. Telegraph Co., is about starting on a three weeks fishing trip to Gualala River.

Last Sunday Messrs. Green and Sellers caught 525 trout from the San Lorenzo creek, Santa Cruz county, Mr. Green catching 300 of them.

On Sunday last, the Cyante creek, Santa Cruz county, yielded a number of trout to aspiring anglers. Mr. Swan caught 100, Mr. Marsh 37, Mr. Reynolds 35, Mr. Sloane 85, and Mr. Mastick 83.

Mr. Fred. A. Walton, of Navarro River, Mendocino county, was in this city recently for a few days. Fred. is acknowledged to be one of the best handlers of a rod on the coast.

Mr. Fred. S. Butler, who used to be an enthusiastic angler, has hung up his rod for several seasons past because the fish he caught did not bend it enough. He wants pounds, not ounces. We all like big fish, but we cannot all wait, like Fred. is doing, for them to grow.

A pair of gum boots and a rod do not make a fisherman, though they make a good many we meet on the cars.

Eugene Gaylord and T. W. Sigourney, of Nevada City, have been up on a fishing excursion to Bowman's dam.

Wm. Magee and Mr. Johnson, while on a fishing trip on the Mokelumne river, above West Point, saw a bear and succeeded in killing it.

Several large carp were caught in Butte creek the other day.

The Butte Record has reports of 16-inch trout having been caught in two-inch streams. At that rate trout fishing ought to be pretty good up in that region.

Some 1700 pounds of trout were shipped from Truckee to San Francisco, one day last week. The trout were all from Tahoe.

It does not follow that because a fly does well in a creek on a certain day, the same fly will always answer there. Lots of time is sometimes wasted trying to make trout take flies they don't like. And a hard thing to coax is a trout. After a man has tried an hour or two unsuccessfully it is time to try a new color, and keep on experimenting until the "killer" is found.

The case of S. P. Taylor, who was convicted of failure to provide a fish ladder at his dam, in Paper Mill Creek, will undoubtedly be appealed. It is hoped that the decision of the lower Court will be sustained.

Governor Perkins, ex-Governor Booth, Hon. B. B. Redding, President Reed, of the State University, and James McClatchy, editor of the Sacramento Bee, will spend the Fourth of July fishing on the McCloud River.

W. W. Taylor is rusticiating at Lake Tahoe, but will soon leave for his favorite fishing grounds, Weber and Independence lakes. He sent fifty fish to this city on Monday last from Tahoe. They ran from one-half to three pounds in weight.

That enthusiastic fisherman, Bill Battams, has got a holiday at last—the first two weeks in over twenty years. True to his instincts, he left for Weber and Independence lakes on Saturday last.

Messrs. Green, Ziegler and Searles leave to-day for Salmon Creek, Sonoma County, to remain until the fifth inst. These same well-known fishermen took twenty-six fish from this stream early in the season. The fish are reported now as taking the fly readily, and affording royal sport.

The Los Gatos Creek, Santa Clara County, is well supplied with fish this year, and of good size. Mr. Wilcox, Superintendent of the San Jose Water Works, caught forty in a morning's fishing, five of them averaging a pound each. W. D. Tisdale, Cashier of the Farmer's and National Bank of San Jose, caught fourteen pounds of the speckled beauties in one day. J. C. Harvey, of San Jose, also caught one hundred and thirty-one in one day's fishing. J. W. Ainsworth, of San Francisco, who has been stopping at Alma the past week fishing only for enough to supply his table, averaged thirty a day, working the stream about two hours each morning. The best part of the stream lies between Wright's and Alma. The Los Gatos Creek is one of the finest in the State, and easy of access. Its many ripples, fine holes and clear space for fly casting, invite the ardent disciple of Izaak, as the train whirled him along its banks, to streams more remote and less worthy of his attention.

That portion of the St. Helena Creek passing through Pope Valley, Napa County, abounds with trout this season. Some fine creels are reported to have been made by visitors from St. Helena.

THE KENNEL.

FIELD DOGS IN CALIFORNIA.

A few years ago, when gold hunting was the leading pursuit in this State, few men cared for the pleasures of the field. Mining was such an uncertain business, that most of those who followed it demanded for recreation something in the nature of gregarious hilarity. The race track, theaters and saloons were resorted to most frequently for amusement. When commerce, agriculture, vine culture, fine stock-raising and kindred industries began to assume respectable proportions, a taste for field sports was more generally cultivated, until, I think, I am safe in saying that ten sportsmen are afield now on any general holiday to where there was one ten years ago.

With the desire for field sports came the desire for the best of field accoutrements, for Californians never like to be outdone in anything they undertake, and they have to-day probably as fine guns as the sportsmen of any other State.

Next to the gun, in order of importance, comes the sportsman's best and dearest friend, his dog.

I know that all sportsmen will agree with me when I say that a day spent in upland shooting (and it is of this kind that I shall speak) without a stannch, good-nosed dog, would be very unsatisfactory and lonesome work. Upland shooting requires more physical exertion than any other sort, and for that reason is to be most recommended to gentlemen following sedentary pursuits; it also requires more skill in both master and dog.

Let me say to any young sportsman who is going to hunt quail, and that is the *ne plus ultra* of hunting, that he had better not waste time and money breaking or having broke a cold blooded dog. I tell you, it requires the stamina and courage of the blue blood to travel for eight or ten hours on a hot September day.

There are two breeds of dogs, viz: the setter and pointer, which, if pure bred, may be depended on to stand up to the rack in condition.

Of the two breeds I prefer the former, although the latter requires the least water when hunting.

There are three prominent breeds of setters, which I will name, as I think, in the order of their merits—the English, Irish and Gordon, or Scotch setter.

I prefer the setter to the pointer for the reason that the former has far more dash, style, generally more speed, and is much more affectionate.

If one wants to take a day at fowl or snipe shooting, the setter is better fitted by Nature to stand the water, though he should never be used to any great extent in the water, as that will give him rheumatism and other diseases. If the sportsman hunts most of the time for water fowl, the best dog for him is an Irish water spaniel.

In a country where game is extremely abundant, a person would probably get as large a bag without as with a dog, but, sincerely, I would sooner kill one bird from a staunch, handsome "point" than to fire into a flock and kill a dozen. I don't think that there is anything that equals in point of beauty, barring a beautiful woman and a thoroughbred horse, a handsome setter pointing. No artist that ever lived can reproduce the expression, poise and attitude of the animal. I have seen sketches by artists of world-wide reputations, and I have never yet seen one that did half justice to the subject. I have seen men tremble all over with excitement on seeing a dog on point, and be so pleased and carried away with pleasure at this evidence of breeding and nose that they could almost hug their pet.

We in this State are fast acquiring a fine lot of thoroughbred field dogs, and that is the only sort (thoroughbred) a gentleman should own of any breed. It don't cost any more to feed such a one than it does to feed a cur.

It may cost from twenty to fifty dollars to secure a fine puppy, but after you once own a thoroughbred, my word for it, you will never waste time on a mongrel.

When I say thoroughbred, I don't mean a dog said to be by somebody's dog out of somebody else's bitch, and above all things, deliver me from a dog that has been "stolen from off an English ship." That dog is ubiquitous, he is a dog of fabulous imaginary value, he is possibly descended from Royal ancestors; covered with canine glory, but I prefer to patronize some reputable dog breeder, pay a good price for a dog whose pedigree is unquestioned, break him myself, for that is not a herculean task, but, on the contrary, to me a pleasure, so that when I go to the field I know I have a companion who is intelligent and "game," who will stay by me from sun to sun, and do his part in making the day pleasant and securing a fair bag of game.

It is not generally known outside of a small coterie that the breeding of sporting dogs has become a scientific business. Nor is it generally known that large sums of money are invested in kennels of dogs.

Mr. A. H. Moore, of Philadelphia, has in the neighborhood of twenty thousand dollars so invested, and the following gentlemen have from two to ten thousand dollars laid out in similar enterprises: J. C. Goodcell, Brooklyn, N. Y.; Mr. Snellenburg, New Brighton, Penn.; J. C. Higgins, Wilmington, Del.; John Bolus, Wooster, Ohio, and G. W. Campbell, Tennessee. The St. Louis Kennel Club, composed of wealthy gentlemen, residents of that city, have disbanded, the members retaining such dogs as they desired for their own use and disposing of the rest. They imported from England at least ten thousand dollars' worth of pointers, "Faust," who stood at the head of their stud, cost \$1,500. Their other stud dog, Bow, cost \$900. Mr. Goodcell refused \$1,000 for his Llewellyn setter puppy, Plantagenet, 14 months old, after he had run in the Eastern Field Trials last fall. Countess Bear, the dam of Mr. Llewellyn's cracker, Dashing Bondhu, Dashing Beauty and Burgess Dashing Berywn, was imported to this country from Mr. Llewellyn's kennels in England by the Montview K. Club. When that association dissolved she was advertised for sale at \$750, and as soon as Mr. Llewellyn received that information he cabled across the Atlantic and claimed her at that price. He has since taken her back to England to add more bench and field prize winners to the long list already produced by the incomparable strain of setters that bear his name. This same gentleman paid \$1,650 for Dash II, the sire of the three pups I named from Countess Bear. He also refused

Mr. Moore's offer of \$3,750 for his great winner Count Wind'em. Nor is it generally known what rich stakes are contended for in the Eastern States every year at field trials. Mr. Sanborn's Llewellyn setter Count Noble, by Count Wind'em out of Nora, won first, \$435, and Daisy Laversack second, \$290, in the Derby of 1880, at Vincennes, Ind.

You see, dear reader, that dogs cost and represent money, and when a gentleman who owns a fine bitch and has paid, possibly \$50, to have her mated to a suitable mate, charges a reasonable price for her puppies, don't elevate your nose in a contemptuous manner and say, "Nice fellow; wants money for a dog!" for dog-breeding is just as honorable and becomes any gentleman just as much as horse or cattle breeding, and I apprehend that no one would think of going to Governor Stanford, or any other breeder, and asking him to give them a colt, or a calf, as the case might be. I have heard some talk of a Bench Show in San Francisco this fall, and hope that one will be held and conducted so as to make it a success.

The Gilroy Rod and Gun Club are going to hold a Field Trial in October, and have selected grounds near that place for it. A number of owners of good dogs throughout the State object to meeting the Gilroy dogs right at home, and Folsom and Vacaville have been suggested as better places. I think Folsom the best place that could be selected, and if the Gilroy Club cannot be induced to change the location of their trials I suggest that the Folsom Sportsman's Club hold a Field Trial there any way. I think they could count on twenty entries at least. Let those interested in these matters come forward and through your columns give expression to their opinions.

C. N. Post.
Sacramento, June 25, 1882.

COURSING IN CALIFORNIA.

Before many years have elapsed, coursing is destined to hold a rank second to none among the field sports of California. One of the most ancient of all pastimes, and the especial sport of Greece and Rome, it has vastly improved both in practice and popularity, until to-day it is chief among all the field sports in England and Ireland. In the second century of the Christian era Arrian published a defense of coursing. Oppian, in the *Cynegeticus*, attributes to Pollux the practice of the chase with dogs about 200 years after the Levitical law was made. A greyhound was the especial pet and inseparable companion of Alcibiades. Alexander the Great built a city in honor of a greyhound, and the Emperor Hadrian declared solemn rites and sacrifices to another for his endurance and sagacity. The *celeres*, the dogs of speed, as greyhounds of all kinds were classed in contradistinction to the *pugnaces* (fighting) and *sagaces* (intelligent), who used cunning to capture their prey, were originally from the Celtic nations. The *vertragi*, *canes celeres*, or dogs that hunted by sight alone, are spoken of by Xenophon as Celtic novelties, just introduced into Greece. So it may fairly be presumed that the earlier greyhounds possessed nose, as well as sight and speed. It is not the intention of this article to enter further into the ancient history of the greyhound, and the above facts are simply given to show that the oldest sports are popular to-day, and that coursing, like horse racing, is as ancient as it is popular. The modifications made in the sport since it was first made a pastime instead of an ignorant savage's means of obtaining food, are but few and extremely simple. The early Norman kings found the greyhound in England, and used him for their sport. The race between the dog and his quarry was all the sport they needed, until at last a rivalry sprang up between gentlemen as to who owned the gamest and fleetest dog, and some rude rules to guide the judges were first introduced. These prevailed, with more or less local alterations, until the reign of Queen Elizabeth, when good old Thomas, Duke of Norfolk, at the special request of the virgin Queen, drew up a set of rules for the better determination of coursing matches. These rules, with some very triding additional rules respecting nominations for stakes, are precisely the same as are in vogue to-day, and control the great match for the Waterloo Cup, as well as all coursing matches in England, Australia and California. On all the vast Continent of America, in all parts of which hare or jack rabbits are plentiful and coursing grounds unexcelled, the State of California alone possesses coursing clubs, and here alone is the sport of coursing carried on.

Officers stationed at the Presidio have from time to time taken a few greyhounds from this State to the great north-western plains, but no further attempt has ever been made to introduce this noble sport east of the Sierra Nevada. General Custer got his celebrated greyhound from Captain Lord, who, when stationed here, procured a brace of pups from Tom Tunstead, one of the most active members of the old Pioneer Club. Of the original founders of the sport of coursing in California, where it has from the very first been carried out according to rule, but few are left. Prominent among them is Clem Dixon, by no means young in years, but a very boy for sport and his love for the unrestrained fun of a meet in the country. Clem may fairly be said to be the father of coursing in America, being the first man who ever slipped a pair of dogs and judged a race in the State of California. What the sport is here to-day, is more owing to the enthusiastic efforts of Clem Dixon than of any other man.

By purchase and importation, he, with others, has improved the breed of greyhounds in this State until they are not only the equal of any in the world, but are superior in point of bottom and endurance to any that can be brought from the British Isles. Since the importation of Franklin's old blue dog Speculation—a winner in several English matches—by Captain Bingham, no dog has been brought to this coast capable of improving the breed, or in any way excelling the dogs already here. When Speculation arrived, a new strain was needed to mix with the blood of Underwriter, Factor, Cartwright, Thornhill and Jones, who were then dominating all the kennels in the State. By good fortune Speculation was just the needed cross, and to-day every coursing-match shows one or more winners who trace their lineage back to the old blue dog. To tell of the past and gone glories of California coursing matches at Merced, and Livermore, and Bantas, and Ellis, and Benicia, and Sacramento, and Stockton, and Folsom, would fill a paper as large as a blanket and having as many pages as Webster's Dictionary. It warms one's heart and makes one long for the cool days of early winter, when the dogs will once more wake up the lazy shepherds on the *Ruy Blas*, to call to mind the fearful leap of Quicksilver, the like of which was never made before or since by any animal, the three successive victories of Tom Tomstead's pet Minnehaha, and her final defeat by Ruler. How the writer's hand trembles, and his blood grows turgid with in-

dignation when he calls to mind the sad fate of the three times victor, by poison administered by a callous beast in human shape, whom it were base and fulsome flattery to call a mangy cur, and upon whose ignoble head may the scorching curses of all good sportsmen rest. It makes one long for the leash once more when he thinks of the deeds of Kitty Clover, Jemima, the lordly Monarch, Paul Jones, Pride of the Canyon and her son, Chief of the Canyon, old Thornhill, Master Joe, and a hundred others whose names do not as readily come to mind. The game of that plucky son of California, McGrath, who, less than two years ago, lay down to die of exhaustion on the plains of Merced, beside the hare whose speed had cost him his life, is a theme better fitted for the poet or novelist than for the prosaic writer on sports, who occasionally contributes to the papers.

Coursing in California is not confined to any particular spot or section. It is becoming general, owing to the efforts of the several clubs, whose membership rolls include most of the ardent coursers in the State. Six years ago there was only one club worth mentioning—the Pioneer Club—now there are many.

The Pacific Coast Coursing Club is really an offshoot from the old Pioneer Club, and was formed by a few gentlemen who left the parent organization because they thought it was not sufficiently progressive. At the time of its organization the club decided that all the matches held under its auspices should be decided by three judges, and has enforced this rule ever since. In this respect the club is unique, for the law all over the world is one judge, and only one. The members of the club find that the rule works well, and so far have shown no disposition to go back to the old plan of letting one judge decide the matches.

Next in age, though by no means second to any other in strength and importance, is the California Coursing Club, formed last year. This young organization has shown a surprising amount of life and vigor, and bids fair to outstrip its older competitors unless they bestir themselves.

The youngest club in the city is the Occidental Coursing Association, which owes its existence to the efforts of D. L. Levy.

Outside of San Francisco, the Capital Coursing Club, of Sacramento, is the oldest organization devoted to the noble sport of coursing.

The Stockton Coursing Club comes next, while the Folsom Club, Willows Coursing Club, San Jose Club, Alameda Club, Santa Rosa Club, Winters Club, Galt Club and several others are about coequal in the date of formation.

All of the San Francisco clubs hold an open meeting in the Spring of the year, generally at Merced, and a club meeting for members' dogs only, in the Fall. Generally from twenty-four to thirty-two is the size of the stake, and the prizes run for, about \$200 in money and plate. These matches are generally attended by several hundred people, in spite of the distance from home at which they are held. They have been so often described that little need be said about them here. The plains of Merced cannot be equalled as a coursing ground by any place in the world. This phrase may seem vain and meaningless, but is in strict accordance with the truth. The writer has seen the flats at Altar and the pen at Plumptre, as well as the best known coursing grounds in Australia, and has never seen a place where both hare, dogs and spectators, had so good a show as at Merced.

In a future number the present state of California kennels and the records of a few of the old heroes of the leash will be spoken of.

THAT COURSING TOURNAMENT.

The Occidental Coursing Association, by Mr. D. L. Levy, advertises a "grand coursing tournament, to take place at the Half Mile Track, on July 2d and 3d." The circular speaks of England's choicest sport being brought to the doors of the people, and mentions the fact that a number of trapped hares have been procured from the plains of Auburn and Merced. It also announces that the great Baron Waldken and Tampete will compete for \$500 a side. There are so many things about this so-called tournament which do not commend it to the esteem of sportsmen, that we had almost decided to let the affair go by default, and merely state that it would simply be a miserable travesty upon the sport which it pretended to represent. It occurs to us, however, that the non-sporting reporters of the daily press, who, with few exceptions, are not familiar with coursing, will not be likely to put the affair in its true light, and that to prevent people from gaining an incorrect idea of a noble sport, it is our duty to go more fully into the matter. The projector of the enterprise may be, and doubtless is, desirous of providing the public with a certain amount of amusement in exchange for the gate money he will receive, but it is utterly impossible for him to keep his word and show the public a coursing match. Again, the match between Baron Waldken and Tampete is not a bona fide affair, in that the stake is not put up as alleged, and further, no man not an idiot would back a dog in the condition in which Waldken appears on the streets for 500 cents, let alone 500 dollars. This match is regarded by all coursing men as simply a bait to catch spectators, and they object vigorously to have the sport they admire burlesqued by one who does not understand the difference between a "wrench" and a "turn." Trapped hare will not and cannot run, and Mr. Levy will find that the dogs entered, poor in condition, as they all will be, will gobble up his Auburn and Merced hares as quickly as they would as many cotton-tail rabbits. Even if the hares would run, the confined limits of the race track are dangerous to the dogs and death to the hares, who should at least be accorded what every sportsman gives his game—a chance for its life. If Mr. Levy called his affair a hare-killing match and took down that sign about a match for \$500 a side, the matter would concern no one but the public, who paid to see it, and the Society for the Prevention of Cruelty to Animals, but so long as he has chosen to dignify it with the name of a sport that it only burlesques, it becomes our unpleasant task to protect the sport of coursing from the disgrace about to be thrust upon it.

CLEVELAND BENCH SHOW.

Cleveland has just closed its first dog show, held under the auspices of the Cleveland Bench Show Association, so San Francisco dog fanciers can proudly point to the fact that in the matter of dog shows this city is five long years ahead of the city of Cleveland. The Cleveland Bench Show was a grand success financially, in which respect it came out a trifle ahead of those held in this city. Eight thousand persons paid admission during the week the show was open. The show was managed by Charles Lincoln, the Secret

of the Westminster Kennel Club, and in spite of his good sense and tact, left behind the usual amount of heart-burning and kicking on the part of the losers. Setters were well represented, as were also most of the different types of field dogs, but in the fancy classes, in which this city excels, Cleveland made but a poor showing. The greyhounds were poorly represented and few in number, and the same may be said of the mastiffs, St. Bernards, Newfoundlanders, collies and bull dogs. The show of toy terriers was also poor and small. A Mexican hairless dog which won the first prize in the miscellaneous class at the last San Francisco dog show, obtained a precisely similar honor at Cleveland.

LAVESACKS AND LLEWELLINS.

The verbal fight between the champions of the Laverack and Llewellyn setters is raging with great force in the East and in England. Llewellyn, Arnold, Burgess, E. A. Herzberg and a dozen other well posted gentlemen, are now in the fight, and fairly fill the sporting papers with arguments and assertions. The question of field qualities is an important point, and if some of the readers of the BREEDER will favor us with their experience of the relative work done by these two breeds in this State, valuable information will be added to the large fund already gathered by this discussion.

ANSWERS TO CORRESPONDENTS.

Under this head will be found replies to all questions that may be asked of the Kennel Editor in relation to breeding, breaking, or entering dogs, feeding or curing them of any ordinary disease. Correspondents must state plainly what are the peculiar symptoms of the malady for which they need advice, and in all cases, especially when desiring to know the best way to correct a dog of a fault, must be careful to state the age and sex. No answers will be sent by mail, and all questions must be marked Kennel—Editor WEEKLY BREEDER AND SPORTSMAN, San Francisco, Cal.

A few questions have already been received, to which answers will be found below.

GEORGE, SAN JOSE.—Sore and inflamed feet, if neglected, are liable to lame a dog for life. Cure: Physic; stop all salted meat; keep the dog well bedded, and do not require him to move out for his food. Bathe the feet with warm water and poultice with linseed meal twice a day. If any pus collects about the claws, the sacs should be carefully lanced and friar's balsam applied to the opening. When the feet are healed, the claws will be found an undue length for lack of wear. They should be cut down with strong shears or nippers. Always use cooling remedies; never salt water, pickle or brine, as the latter only increase the inflammation and aggravate the disease. The cause is over-work on hard rough ground, neglect, drib and over feeding.

C. F., SAN FRANCISCO.—No case of rabies has ever yet been heard of in the State of California. Cats and other animals are sometimes afflicted with rabies in England and in the Eastern States. The disease is liable to be imported here at any time. Statistics prove that only about one in thirty persons bitten by rabid dogs suffer fatal consequences. As an actual fact, rabies is an extremely scarce and rare disease, and frequently the symptoms of poisoning are mistaken for rabies. In nearly twenty-five years' experience with dogs, seventeen of which were spent in England, the writer has only seen one genuine case of rabies, though he has seen fifty dogs slaughtered under the supposition that they had hydrophobia, when the fact is they had nothing of the kind.

H. J. W., SAN FRANCISCO.—Mix. Arsenic, freshly powdered, is thought to be a specific cure for all except tape worms, and will remove even them in many cases.

BICYCLING.

This most exhilarating amusement, although of but recent date in its present improved form, has grown with such rapidity, that it fairly overshadows all other athletic sports. The reason is apparent in the ease with which it is mastered, and the large proportionate return, in speed and distance traversed, for the comparatively small outlay of strength. The ease of motion, consciousness of power, and the perfect independence of the rider, render it a most fascinating sport to those who have the patience to master it, and are not too indolent or old for any moderate exertion. For its best enjoyment a perfectly smooth road, like that of a park, may be considered essential, although it may be questioned if the monotony would not in time tire the rider more than a variety of hill and dale, with occasional irregularities, requiring greater watchfulness.

So much has been written about it, that it is hardly necessary now to go into its history at length. Suffice it to say that, from the clumsy device of a hundred years ago, having two slow wheels, united by a perch, with a saddle, upon which the operator could sit and propel himself by striking his feet against the ground at intervals, the development has been gradual. The addition of cranks to the driving wheel, and the riveting of this wheel so that the machine could be turned, was made in 1866 by a Frenchman, and from this grew the velocipede of a dozen years ago. The machine yet lacked something to fit it for outdoor use, and again fell into disuse, but a few English mechanics saw in it the germ of a useful vehicle and an important industry. The enlarging of the front wheel and the reduction of the rear one, the adoption of the suspension or spider wheel, the use of hollow metal for the different parts, to produce lightness and rigidity, and, perhaps, more than all else, the application of the rubber tire, by which the greater part of the vibration and unpleasant jar of the road are absorbed, have finally accomplished the result, and made the bicycle a practical and a beautiful vehicle.

Any good, ordinary country road is suitable for a bicycle, provided it is not so rough as to be disagreeable for riding in any vehicle, or is not deep with loose sand or gravel. A speed of from eight to twelve miles per hour is easily attainable, and may be kept up by a seasoned rider for hours. Fifty miles inside of three hours, one hundred miles upon an ordinary road in a little over seven hours, and two hundred and twenty miles in twenty-four hours, have been accomplished, while the number of riders who have accomplished one hundred miles and upwards in a day is legion. It is estimated that 250,000 bicycles are now in use in England, 75,000 of which are used in London alone.

Everybody, as the saying goes, rides a bicycle in England, and the Governments of both France and England provide them for the mail carriers, while, in some instances, the Park policemen are also mounted. The number in use in this country was estimated at upwards of 10,000 before this season, but they are increasing so rapidly that it is difficult to give the number with much accuracy.

A New York physician says: "If we could only get every professional man, bank presidents, brokers and writers, and the rest of the community, to patronize the bicycle, the majority of the doctors in New York would be given an indefinite vacation. It is better than ball playing, swimming or shooting, as no one runs the risk of being injured. The coming man will ride the bicycle."

At the Crystal Palace Grounds, London, in the early part of June, H. L. Curtis rode one mile in 2 min. 43 1-5 sec., being the fastest on record by about 3 seconds.

There will be a number of interesting bicycle races on the 22d of July, upon the grounds of the Olympic Athletic Club in Oakland.

THE STAGE.

"Caryswold," the drama in which Miss Ada Ward made her debut at the Baldwin Theatre, appears to have been condensed from one of those curdling and pathetic stories that have made the success of the London Journal and other famous London penny periodicals. The plot, although lacking in constructive sequence, is still quite interesting, and at times rises to a high dramatic plane, but the somber incidents require more lighting up to make the play acceptable, although it must be owned that the first scene, as depicted at the Baldwin, is one of the most lurid, sensational effects ever produced in a theater. Miss Ada Ward made an immediate favorable impression, and her entrance was greeted with a round of applause, that is so appreciated, especially by those who make their first bow before a foreign audience. Miss Ward has many natural qualifications for an actress, and they have evidently been improved by careful study in the modern English school. Endowed with a winsome, mobile and expressive countenance, a well formed, svelte and willowy figure, she is ever graceful and appropriate in gesture, and with a soft, well trained, melodious voice, Miss Ward appears capable of occupying an important niche in the society drama of the day. Naturally this judgment will have to be ratified by future efforts that may develop the strength and versatility with which she is credited by the foreign press. "Caryswold" was very well cast, and under the careful stage management of Dave Belasco and with the excellent scenic effects by William Porter, the drama met with a favorable reception and was continued throughout the week to good business. Mr. Colton played the principal part, a gentlemanly villain of the deepest dye, in a somewhat too expressive manner, and the remainder of the cast included Messrs. Grismer, Bradley and Jennings, Miss Phebe Davis, Miss Lillie Owen, Belle Gossman, and Miss Constance Murielle, the latter meeting with a warm reception on her return from the East.

In regard to the future management of the Baldwin Theatre, matters appear still to be involved in great doubt. Finding that the theatre was let for intermediate dates, thus preventing any continuity of action, Mr. Gus Frohman retires from the management, but if he can make any satisfactory arrangement, he will secure a lease and will engage a good stock company, playing stars and small combinations. Mr. Frohman has conducted the theater, during his short regime, in a very liberal and efficient manner, and should he resume the reins of management and secure proper attractions, he will be sure of meeting with liberal support. The trial "Uncle Tom's Cabin" combination commences a week's engagement on Monday next, and if successful at the usual popular prices, the piece may remain on the boards for a fortnight.

On the 17th we shall see the Hanlon-Lees in their athletic and acrobatic absurdity, "Le Voyage en Suisse," but whether or not under the management of Tom Maguire, remains to be seen. There is little doubt but that the veteran secured a refusal of this theater for this date, but it is said that he allowed the contract to run beyond the specified time, and that it is thus annulled. Under whatever management they appear, it is to be hoped that the terms will be such as to allow some margin of profit, and in that case the Hanlon-Lees will be almost the first to break the spell of ill-luck that, outside of "Uncle Tom," has attended the combination system this season.

At the California, J. K. Emmet enters on the third and last week of his engagement, which has not met with the success that the undoubted merits of the star so well deserve. There is not on the stage a more natural and sympathetic actor than Emmet, but with his experience he surely might have known that he could not secure in San Francisco paying audiences, in one piece, to a three weeks' run. It is this egregious error that causes so much theatrical sore-headedness among stars and combinations on their return to the East, when, ignoring the true cause of their lack of success, they abuse San Francisco and its people and swear they will never be caught here again. Not for one moment alluding to J. K. Emmet, who will always be a favorite here, there are certain stars and combinations whose absence will always be greatly preferred to their company in this self same misguided city that is yet so appreciative of true musical and dramatic talent.

At the Standard Theatre the amusing burlesque of "Our Goblins," will be replaced this evening by a musical absurdity entitled "My Brudder in-Law," in which it is said that the Mitchell's Pleasure Party will strengthen the favorable impression they have created. Of its kind this is one of the most talented and versatile troupes we have ever seen on the road, and if opportunities are given in the new piece it is sure that the comedians will avail themselves of the advantage. There was some talk of their resuming their old standpoint at the Bush Street Theater, which would then pass under the management of William Emerson, but the negotiations to this effect, at this time of writing, have not arrived at a satisfactory conclusion. In case of success Mr. Emerson would devote the theater to light comedy, burlesque and negro minstrelsy; and under his liberal and experienced management the Bush Street would certainly become one of the most popular establishments in the city.

The Gardens continue to be well patronized, and during the coming week the attractions will be "The Voltigeurs," by Robert Planquette, the composer of the "Bells of Corneville" at the Tivoli, and a grand spectacular opera by John Barnett, with the romantic title of "Aolia, or the Mountain Sylph" at the Winter Garden. These are great holiday cards.

Mlle. Sara Bernhardt made her re-appearance in Paris, under the joint mantle of financial sympathy and of Figaro supervision. It was a benefit for Madame Cheret, the widow of the most kindly and talented Parisian scenic artist, and what with the great newspapers' puff, and the many excellent actors who volunteered their services, it was a monied and artistic success. This was her first appearance in Paris after breaking with the Theatre Francais, and fault, still

graver in Parisian eyes of getting married to Mr. Damala, who possessed the aspirations of being a first-class actor rather than a third-class broker in the Levant trade. The most fabulous sums were paid for the stalls and boxes, the total receipts amounting to some \$12,000. The house was crammed with the beauty, fashion and finance of the gay capital, the play was "Camille" and when Bernhardt made her appearance there was a subdued murmur of chilly import, when a voice from the gallery interrupted her opening lines with—

Ho-la,
La-v-la,
La-femme-à,
Damala,

which in a free translation means: "Here she is, Whoop-la, the wife of Damala." A tremor ran around the house, the celebrated artiste faltered in her words, and at one moment it seemed as if she would break down, but she rallied, and after a well fought battle she re-conquered the suffrages of that fickle constituency, and is now the reigning sensation of Paris. Her husband was simply credited with a mild success, due more to his good looks than to his good acting.

It appears that Mrs. Langtry will come to this country in October, under Henry Abbey's management. Her repertoire as yet consists of "She Stoops to Conquer," "The Unequal Match," and "As You Like It." The Jerseys have always commanded outrageous prices, but whatever the Jersey Lily demands, for Abbey "There's millions in it."

Miss Jeffreys Lewis lately left for England, but will return early in August, to star in "La Belle Russe," which drama, despite the almost general condemnation of the New York critics, has proved to be a great popular success. After stigmatizing it as a plagiarism, and an obscene production unworthy of the first theater in America, it must be rather obnoxious to these gentlemen to see the piece, instead of "going to the dogs," run further into the dog days of any regular season at Wallack's for the last decade. "La Belle Russe" will be the great success of the coming season.

Max Freeman appears never to know when he is well off. It is but a short time since he secured the position of Stage Manager at the Union Square Theatre, with the privilege of playing eccentric parts. This was a great step in the profession, but in a weak moment, at Boston, he undertook to try Charles Thorne's part in "The Banker's Daughter," and thus imperilled the success of the Union Square Company. This led to an angry discussion, and Max Freeman was released from his engagement, and now goes on the road to play a character with a few lines, the waiter in the comedy of "Divorçons." Such are the ups and downs of dramatic life.

The Union Square Company will appear at the California Theatre in the first week of August, and after playing their usual repertoire, will produce "The Lights of London," with a strong cast, new scenery and novel effects, that made the drama such a success last season in New York. Miss Eleanor Carey comes as the leading lady, and as she is a great favorite here, she will doubtless meet with a generous and well-merited reception. Mr. de Belville also returns to the scene of his former successes. Both these artists came from the Australian Colonies, and made their first appearance at the Baldwin, and they are now at the head of their profession. It is probable that Miss Ada Ward will follow suit, although if Mr. Gus Frohman should form a stock company, we should be pleased to see him secure this lady for the leading position.

King Headly, a well known aspirant for Thespian and Athletic renown, has branched off with the world of letters sending to the N. Y. Clipper a very pretty and pathetic poem entitled "A Broken Life" which was much admired. Unfortunately Mr. Willie Winter, some fifteen years since, was seized with the same inspiration and told the story in the self same verse. King Headly is evidently as unreliable in his lyric feet as he was with his pedal extremities in this city.

Miss Bessie Darling announces her intention to star the coming season in a drama entitled "A Perfidious Woman," alleged to be founded on the same story that furnished the main plot for "La Belle Russe." And, by the way, Amory Sullivan and Miss Adeline Stanhope were recently enjoined in the Vice-Chancellor's court from producing a drama entitled "A Beautiful Wretch" which was simply "Forget Me Not," copies of which were sold openly in this city at \$25 each. At the time Miss Stanhope was making a success of Stephanie in the English provinces.

Rossi recently appeared as King Lear, in London, supported by an English speaking company, and met with no better success than when here. The critics pronounced it an insult to English dramatic art. On subsequent nights he played the fourth and fifth acts in English, and met with a more cordial reception, but if the great tragedian's vernacular was as strong and varied as when he poured forth in regard to his broken engagements an avalanche of woes and expletives in Manager Kelley's ears, the English public were treated to a rare and artistic exhibition.

It is said that J. H. Haverly has the idea of incorporating all his theatrical ventures into a joint stock company. This is no startling innovation, as the London Alhambra, the largest and handsomest music hall in the world, has for years been conducted on this principle, and efficient management has made good returns on the investment. But the difficulty is to find the managers who combine the qualities of prudence, enterprise, energy, judgment and liberality. They who possess such attributes generally elect "to paddle their own canoe," and not to be at the beck of every disgruntled stockholder. We think the project will not prove a success.

James O'Neill recently produced a new drama at Chicago entitled "The Two Brothers" and the play was another failure to be added to the many dramatic disasters registered so early in this season. O'Neill will star during the next campaign with Mr. John Malone as his leading man. The latter gentleman is said to be rapidly improving in his newly adopted profession.

Miss Constance Murielle made quite a hit as Mrs. Blythe in "The Colonel" in the Eastern and Canadian tour of that eccentric play. This is no surprise as the lady possesses the dash, vim, grace and pleasing face that are requisite for the charming foil to the female aesthetic cranks. Outside the large cities "The Colonel" has not scored a great success.

[FOR THE BREEDER AND SPORTSMAN.]

OUT-DOOR GAMES.

The snrest of all natural prophylactics is active exercise in the open air. This being an admitted fact, the next consideration is how to invite and encourage it. It is said that air is a part of our daily food, and a most important part. The purity of our blood depends greatly on the quality of the air we breathe. Now if a person be confined to the counting-room or workshop all day, and returning to his or her home at evening to spend the time until the hour of retiring for the night, in an ill ventilated dwelling or close room, as do a majority of both old and young, we may naturally look for precisely what we get, viz: an aggregation of diseases, and as a restorative the sagacious adopt the panacea prescribed by some sensible and good friend—exercise in the open air and an indulgence in some healthful and invigorating out-door game.

It has been said by a writer in the *Medical Review* that out door life is both a remedy and a prevention of all known disorders of the respiratory organs; consumption, in all but its last stages having been conquered by transferring the battle-ground from the sick-room to the wilderness of the next mountain range. Whether this be the case or not, it is beyond controversy that out-door games and out-door air and exercise contribute to health.

In England out-door games are universal in adoption, and the same in Germany and Switzerland, and, in fact, in most European countries. The United States introduced them into prominence about twenty years ago, commencing with an improvement on the old-fashioned system of playing baseball, and culminating, after cricket, quoits, croquet and polo had severally been revived or introduced, in the fascinating game of lawn-tennis.

It is my purpose, at this time, only to allude in general terms to these various games, as possessing in each a peculiar attraction for exercise and healthful attendants, and to urge their more universal adoption in the promotion of health, beneficent recreation and delightful amusement.

We should be glad to see base ball extended beyond the limits of professional clubs, when, as in times of old, school holidays found the pupils engaged in unlimited numbers in this invigorating game, and the public playgrounds were made to ring with the joyous notes of glee and satisfaction of the participants. Nor was the game confined to the "boys," for young men, middle aged and old men, married and single, took part with as much gusto and satisfaction as the youth. And then we had more sturdy, rosy, healthful boys, and harder and more elastic men.

Cricket is particularly English, and though there was a time when it seemed likely to flourish in the United States—and principally through the action of some English gentlemen at New York City and Philadelphia, who induced the cricketers from Canada to visit them in friendly contests during a few years—yet the game at this time finds its popularity at the seaboard, with Philadelphia as the nucleus. It has many attractions and is filled with the right kind of exercise, and is now making a bid for popular favor.

Quoits, once universal in almost every town and hamlet in the United States, and a game which expanded the chest, strengthened the limbs, and called into requisition the entire muscular force of the whole body, and which to-day has no superior as a game for exercise, amusement and healthful attendants, is now almost unheard of; and in this neglect or forgetfulness or indifference to a noble game, how much is lost to young and old, both of extreme pleasure and delightful recreation. If any of the olden games deserve to be restored to popular favor, it is decidedly the game of quoits.

Polo is played on horseback—introduced by Bennett, of the New York *Herald*—and has found no favor except in the few intimates of this gentleman, who after a limited number of exhibitions or games, surfeited with it and dropped it into insignificance. It is an out-door game, and I mention it in that connection and nothing more.

Lawn tennis is a recent importation, and our young men and misses who understand and can play the game go in ecstasies over it. That it is a cheery, rollicking game none can deny, and that skill is required to make a good play is equally undeniable. That it will become popular, however, is a question, simply from the lack of zeal manifested by our young people in spreading the game.

Croquet, once the favorite among old and young, has been snuffed to drop of late years, and partially abandoned, until the present season, when a revival of this fascinating, mirthful and controversial game seems to have taken place. A recent visit to the Southern portion of San Francisco and to Oakland and Alameda, developed a large number of private grounds freshly prepared for this delightful, invigorating game, and we recognized the screams of old, as they came thick and fast on our ear: "You are out of position." "You can't hit me until you have gone through a wicket." "Loose raquet him." "Send him down to the end." "You have not hit the stake." "I am a rover." "Come down here and help me." "You can't play on my ball." "I can." "You can't," and followed by a battle of wild clamoring for and against, until a sharp whack and a flying ball proclaims the point settled, and a chorus of merry voices, coupled with ringing laughter and shouts of joy attest the merry fun and rare delight experienced by the players. Sometimes, it is true, little misunderstandings will arise, but over croquet they are only transient.

Heads of families, the young ladies and gentlemen and the boys and girls even down to the little children can understandingly engage in this game, with little or no instruction. It is attractive, it is healthful; it is innocent, and pure, and no wonder that it finds renewed favor with the masses, especially as it is within the reach of all.

I have called attention to the various games connected with out-door exercise, and have not forgotten archery or bicycle exercise, as being connected with out-door exercise, though not of course classed with games. They commend themselves as beneficial and amusing.

It is more particularly my purpose at this time to call attention to these games as aids to health and sources of pleasure and amusement, and to impress, if possible, the advantages that will accrue by their introduction and increased adoption.

As it is the purpose of the BREEDER AND SPORTSMAN to give particular attention to all out-door games and pastimes, I trust those who are interested will join in making this department of the paper complete. There is a grand field in California for sports of this class, as the Winter time is favorable, with few interruptions, as well as Spring, Summer and Autumn, and much depends on correspondents, their assistance being an indispensable adjunct to editorial labor.

SAN FRANCISCO, June 25th, 1882.

T. W. H.

ECCENTRICITIES OF SALMON AND TROUT.

ROBERT B. ROOSEVELT.

I was fishing the Nipissiquit River in New Brunswick many years ago. The weather was warm and dry, the water clear and low, and the salmon, although they could be seen from the overhanging cliffs lying thick in the pools, were shy and would not bite. My friend and myself had exhausted the resources of our fly-books; no lure, however tempting, would entice another fish to the surface, and the standard and accepted flies were at a total discount. Finding ordinary methods vain, I proceeded to test one of my theories. I always carried my box of fly-making materials with me on every excursion after salmon, and having recourse to it, I proceeded to manufacture so strange and unnatural an insect as had never braved the air of heaven—a thing so unnatural that it could not be known to the finny foe. The result justified my hopes. When I tried it the following morning the salmon were moved to wonder and curiosity, if not to appetite. Fish after fish rose at it and two rewarded my enterprise by taking it. The same success attended me in my evening's fishing, the pools being rested during the heat and glare of the day. Next day that fly was, as I had anticipated, useless, but I had manufactured another. The first was pure green, the next was light yellow. It brought one or two victims to the gaff, and was followed by a series of strange and contrasted devices until even my stock of out-of-the-way material, which was as rare as it was extensive, for it was the callings from Dr. Andrew Clerk's unlimited resources that he had kindly placed at my disposal, was exhausted. But I had had fair sport and managed to supply the table at a time when by no other method could a fish be obtained. I had a modified renewal of this experience the present Spring. I was fishing for trout on a Long Island preserve, which is remarkable for the size and shyness of the fish. They were breaking here and there over the pond quite freely, but would not touch the fly, although it was cast over immediately and where they had risen. I had changed fly after fly—had imitated the natural flies perfectly. Beside the gnats there were two flies on the water, the American May fly—much smaller than the English, but of the same color—and the caddis. Of course I had the

in my book, and of several sizes, but they were in vain; the red ibis and the black gnat were equally useless, and I could find nothing which would tempt the dainty palates or vagrant fancies of my longed-for victims. I had with me a book, of which Mr. Holberton had just made me a present as a specimen of his handiwork, and among its contents I noticed a large cinnamon fly, too large for our Long Island waters, and intended probably for Maine or Canada. I made up my mind at once that I would astonish those exacting Long Island species, and I did. I put it in for a hand fly, and when I cast, could see it in the water fifty feet off. It looked like a small bird, but it stirred fish hunger or curiosity to the caudal fins. I got rise after rise at it. It was simply irresistible, and although of course many that rose only looked at and did not take it, I managed to make a fine catch and had splendid sport. So much for trying to meet, the eccentricities of trout by diversity of lure and method, a good thing to do whenever ordinary methods fail.—*Turf Field and Farm.*

MARKET REPORT.

WHEAT—Trade is light and market steady at \$1 70 per cwt for No 1, and \$1 65 for No 2, from date up to the winter months.

BARLEY—The crop now being harvested will show a large yield. Already receipts of new feed have been unexpectedly large, and the same has had a very depressing effect upon the market. Choice old brewing is scarce and strong at \$2; new feed, \$1 15 to \$1 20 per cwt.

OATS—Consignments of the new crop are expected soon. Recent arrivals from Oregon and Washington have been liberal. The market is weak and has a downward tendency. For choice, \$1 60 per cwt is a top figure. There is a speculative demand for No 2 large Yellow for October and November delivery, but sellers are scarce. Spot quotations are as follows: Large Yellow, \$1 80 to \$1 85; White, \$1 85; Nebraska Yellow, \$1 77 1/2 per cwt.

RYE—Very quiet at \$1 95 to \$2 per cwt. For futures the market is very weak.

FEED—Middlings, \$25 to \$26; Shorts, \$20 to \$21; Ground Barley, \$28 to \$29 for new, \$32 to \$36 for mixed, and \$36 to \$38 for old; Oil Cake Meal, \$27 to \$30; Cracked Corn, \$39; Corn Meal, \$39 per ton.

HAY—Receipts of new crop are free. Quotable at \$12 to \$15 per ton.

STRAW—Scarce and in demand at 70 to 75¢ per bale.

BEANS—Pea and small White, \$4 to \$5; Pink and Red, \$2 50 to \$3; Limas, \$4 to \$5; Bayos, \$3 to \$3 25; Butter, \$3 75 to \$4 25 per cwt.

POTATOES—Supplies are free at 75¢ to \$1 15 per cwt, as to kind and quality.

ONIONS—Prices rule low, say 50 to 60¢ per cwt. The major portion of the receipts come from Stockton.

BUTTER—Good to choice ranch roll, 28 to 30¢ per lb. Market dull.

EGGS—Good to choice ranch, 25¢ to 27¢ per doz.

HONEY—New comb, 16 to 18¢; extracted, 8 to 9¢ per lb.

WOOL—Choice foot-hill and northern, 24 to 30¢; San Joaquin, 15 to 20¢; bright coast, 20 to 22¢; do burry, 14 to 18¢ per lb.

THIRD DAY—Thursday, Aug. 24.

No. 5—TROTting RACE.—Free for all three-year-olds owned in the District; purse, \$300. First horse, \$180; second, \$90; third, \$30. Closed May 1st, with the following entries:
C. Stingell names b. f. Debby Mott, by Grey McClellan.
W. J. Starr names blk. f. Starr, by Naubuck.
E. B. Conway names h. c. Magnet, by Brigadier.
J. E. Foster names hr. s. Buck Foster, by Gen'l Dana.
W. M. Wood names b. c. Ned, by Overland.
L. H. Boggs names b. c. Warwick, by Milton Medium.
No. 6—TROTting RACE.—Free for all that never beat 2:25; purse, \$500. First horse, \$300; second, \$150; third, \$50.

FOURTH DAY—Friday, Aug. 25.

No. 7—TROTting RACE.—Free to all horses that never beat 2:40; purse, \$500. First horse, \$300; second, \$150; third, \$50.
No. 8—RUNNING RACE.—Free for all; single dash; one mile; purse, \$200. First horse, \$120; second, \$60; third, \$20.
No. 9—TROTting RACE.—Free for all horses that never beat 2:30; purse, \$300. First horse, \$30; second, \$150; third, \$50.

FIFTH DAY—Saturday, Aug. 26.

No. 10—RUNNING RACE.—Free for all three-year-olds; one mile and repeat; purse, \$200. First horse, \$120; second, \$60; third, \$20.
No. 11—TROTting RACE.—Free to all that never beat 2:21; purse, \$700. First horse, \$400; second, \$200; third, \$100.

ENTRIES.

1. Entries must be made in writing and dated, and give sex, color and marks of horse; also name and residence of owner.
2. State number of the race in which you wish to enter.
3. State name of sire and dam of horse entered if known; if unknown, state the fact.
4. State name and postoffice address of party entering the horse.
5. If name of horse has been changed, state former name.
6. Send entrance fee to all nominations.

CONDITIONS.

1. Entries to all races, except Nos. 1 and 5, to close with the Secretary at 12 o'clock m. on Monday, the first day of August, 1882.
2. Entrance fee to the above races will be 10 per cent. of the purse, and must accompany the nomination.
3. In all races five to enter and three to start. Any horse distanced or not starting will forfeit his entrance fee. No money will be paid for a walk over.
4. Rules of the Pacific Blood Horse Association to govern running races, and of the National Trotting Association to govern trotting.
5. No horse entered in a purse can be withdrawn except by consent of the Judges.
6. All trotting and pacing races, except No. 1, will be mile heats, 3 best in 5.

J. P. CLARK, President.

CHARLES HOFFER, Secretary.

SECOND

ANNUAL EXHIBITION

OF THE

FIFTH DAY—Friday, Sept. 29th.

No. 11. RUNNING—1½ mile dash. Free for all; \$50 entrance; \$15 forfeit; \$200 added. Second horse to receive his entrance and one-third of added money.
No. 12. SAME DAY—TROTting—2:27 class. Purse \$400.
No. 13. SAME DAY—TROTting—For two-year-olds. Purse \$400.

SIXTH DAY—Saturday, Sept. 30th.

No. 14. TROTting—2:22 class. Purse \$750.
No. 15. SAME DAY—TROTting—2:30 class. Two miles and repeat. Purse \$500.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year-old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nominations. Purse divided at the rate of sixty per cent to first horse, thirty per cent to second and ten per cent to third.
National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.
All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.

Those who have nominations in stakes must name to the Secretary, in writing, the horse they will start on Tuesday, on the Monday previous; and on Thursday the Tuesday previous, and on Friday, the Wednesday previous, by twelve o'clock m. This rule is obvious, and must be strictly adhered to.
No added money paid for a walk over.
Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.
All entries to be made in writing, giving name, sex, color, and marks of horses; also, name and residence of owner, and drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers.

Entries to all the above races to close with the Secretary on Tuesday, August 1st, 1882.
Write "Entries to Races" on outside of envelope.
A. KING, President.
T. S. MONTGOMERY, Secretary.

Pacific Coast Blood Horse As'n.

PROGRAMME.

FIXED EVENTS—SPRING & FALL MEETINGS

1883 and 1884.

BALDWIN STAKE FOR 1882

SPRING MEETING.

FIRST DAY.

WINTERS' STAKE—For three-year-olds, to be run the first day of the Spring Meeting; dash of one-and-a-half miles; \$100 each, \$25 forfeit, \$500 added; second to have \$150, third to save stake. Nominations in above to be made for 1884.

SAME DAY—CALIFORNIA STAKE—For two-year-olds, \$50 each, \$25 forfeit, \$250 added; to be run on the first day of the Spring Meeting; second to save stake; dash of half a mile. Nominations in above to be made for 1883.

SECOND DAY.

PACIFIC CUP—Handicap of \$100 each, \$50 forfeit, \$20 declaration, \$1,000 added; second to receive \$300, third to save stake; two and a quarter miles; to be run on the second day of the Spring Meeting. Will close the 1st of March, 1883.

THIRD DAY.

"SPIRIT OF THE TIMES" STAKE—Dash of one-and-three-quarter miles for all three-year-olds; \$100 each, \$25 forfeit, \$300 added; \$150 to second, third to save stake. Nominations in above to be made for 1884.

SAME DAY—CANON STAKE—Dash of three-quarters of a mile for two-year-olds; \$50 each, \$25 forfeit, \$250 added; second horse to save stake. When any California two-year-old beats the time of Connor, 1:15 for three-quarters of a mile, the Stake to be named after the colt which heats it. Nominations to be made for 1883.

FALL MEETING.

FIRST DAY.

LADIES' STAKE—For two-year-old fillies; \$50 entrance, \$25 forfeit, \$200 added; three-quarters of a mile; second to save entrance. Nominations to be made for 1883.
THE VESTAL STAKE—For three-year-old fillies, one-and-a-quarter miles; \$25 p. p. \$300 added; second to receive \$100, third to save stake. Nominations to be made for 1884.

SECOND DAY.

STALLION STAKE—Conditions—Only those three-year-olds are eligible which are the get of stallions named in this State. The stallions have to subscribe the amount charged for their services to the fund; private stallions at the price of their last season, and those which have not made a public season, to pay \$50, that sum being the minimum price. The owner of the get of a stallion is competent to name. The stake for the colts shall be \$100 each, \$25 forfeit; plate or money added at the discretion of the Committee; distance, 1½ miles. To close for 1881 on the 1st of August next, at which time both stallions and colts (progeny) must be named.

THIRD DAY.

THE BALDWIN STAKE—Post stake for all ages; dash of four miles; \$250 each, p. p. \$1,000 added; second, \$400, third to save stake. Will close on the 1st of August, 1882, for that year.

SAME DAY—FINIGAN STAKE—For two-year-olds; dash of a mile; \$50 each, \$25 forfeit; \$250 added; second to save stake. Nominations to be made for 1883.

SAME DAY—FAME STAKE—For three-year-olds; dash of two miles; \$100 each, \$25 forfeit; \$500 added; second to have \$150; third to save stake. Nominations to be made for 1883.
All of these Stakes close on the first day of August next, the colts rating now as yearlings, foals of 1880. Nominations to be made to C. M. Chase, Assistant Secretary, P. O. box 1,961, S. F., P. C. B. H. A. To be valid, they must be plainly postmarked on that day, 1st of August.

THEO. WINTERS, President.
JOS. CAIRN SIMPSON, Secretary.
C. M. CHASE, As't Sec'y.

NOTABLE HORSES OF CALIFORNIA.

ROMERO.

A beautiful dark grey, neither dappled or iron, but between the two shades. A handsome horse in either way the phrase is accepted. Not only handsome, but standing the first of his age, and entitled to the foremost place in the record of four-year-old stallions. We present him with an additional feeling of pride, inasmuch as we brought his sire to California, and never met a horse he could not beat on the road. There was a long stretch of straight work on the boulevard, and we always took delight in driving "Alf" along it. He went so squarely as well as fast that there was pleasure in driving him, and there never was any hitching, single-footing or any other of the provoking propensities which road horses are some times prone to indulge in. Straight, honest trotting, never clampering, never making a mistake, and when his competitor would lock him, there was always a link to let out and a reserve of speed for an emergency. Those who take delight in the peculiar American custom of road-driving will understand the pleasure there is in having a horse of this kind to handle, and appreciate the eulogy of a good sire to a worthy son. Sterne, in writing the biography of Tristram Shandy, dated

the origin of his hero rather further back than we will that of Romero, and yet pedigree is everything in a horse. His sire, A. W. Richmond, was by Linford's Blackbird, and the dam of Richmond was a white mare brought from Ohio to Iowa by Thomas W. Pope, a Methodist clergyman, with the proverbial love of a horse which the cloth are celebrated for. She was a great old mare, capable of making the twelve miles from the residence of her owner to the river in three-quarters of an hour, and coming home something faster. She was by a thoroughbred horse owned near Cleveland, and her dam was said to be by an Arabian. From the peculiar markings, however, this was doubtless an Opelousas horse, and these horses being called in Northern New York, Ohio and Pennsylvania Arabians, this was the reason for the nomenclature. Which of the Barb or Arabian horses which came to the United States was the progenitor of these spotted horses is in doubt. Albroni, or Spanker, or Spottee are each credited with the paternity, though there is little question that the blood was from the Orient. At all events these rat-tailed, ragged-hipped horses had great powers of endurance, and some of the best horses

were of the blood. The dam of Romero, Gretchen, can claim to be one of the great brood mares of the United States. With two sons in the 2:30 list, and another which is only a trifle outside of that mark, she is entitled to the place, and there is a good prospect of others of her progeny coming into the charmed circle. There are reports that her two-year-old daughter, Zeluska, is still faster than any which have preceded her, and that there is a strong probability that the record for this age will be beaten by her.

Gretchen was by Mambrino Pilot, the sire of Hannis, Mambrino Gift, and others of renown, and her dam was by Canada Chief, her second dam by Fanning's Tooe, and her third dam by imported Leviathan. Thus the pedigree on both sides is good, showing a preponderance of the blood which Fanny Kemble said "only did it quite well," and therefore there was reasonable expectation that Romero should make a good showing. Still to take the first place in the calendar was more than could be anticipated; and that a colt with so little work as he had, should make a bound to the top of the ladder, scarcely to be looked for. He was not broken until after he was three years old, and

ran with a band of mares on Charley Thomass' ranch, near San Diego. He was bred by Hancock M. Johnston, at Los Angeles, and only driven six weeks when he was thrown out of training. In that time he showed 2:36, and his owner was confident that he could show still faster, though a slight injury to his leg necessitated his being thrown out of work. The winter before he was four years old Mr. Salisbury purchased him, and he was placed in the hands of John H. Goldsmith. From the first there was great improvement, and it was evident that he must make a fast horse, with the usual proviso that there should be no mishap befall him. His first race was trotted at Santa Rosa, and in this he was beaten by Alex. Button. The fastest heat was 2:26½, and from the way he trotted it was palpable that even this fast work for a four-year-old was no measure of his powers. Button won the fast heat, though when they met at Oakland the following week Romero scored 2:22½ to his credit, which gave him the pride of place in the four-year-old stallion race. This mark he seemed easily to accomplish, making it again on the Bay District Course, and at the same time going so easily that it appeared to be much within his rate. Still he had a tough customer in Belle Echo, and in every race they met it was doubtful to the last which would prove the victor. This made the races when they came together of the highest interest, and gives additional zest to those which are before them for this year. As Belle will doubtless be the next illustration of the "Notable Horses of California," the comments can be deferred, though it will suffice to say that there will be fierce battles before the fight is ended.

In saying that Romero is a handsome gray, does not quite express the beauty of his form. He is a trifle over fifteen hands two inches in height, and a lengthy horse, that is, he is somewhat longer than he is high. Apart from the symmetry of his formation he has the "points" which will please the eye of a horseman. The very best kind of legs and feet. A good head, showing intelligence of a high cast, and this in a trotter is now duly appreciated. Without sense the trotter is of little account, and a "level head" is a recognized essential feature. This is what gives the determination to stick to the trot under any circumstances, and pulls races out of the fire when they appear to be hopelessly lost. His action is nearly perfect. Last year there was an excess of motion in knee and hock; this year there is more ease, while he has not lost the freedom which is so necessary to give the proper stride. Altogether he is very nearly a model of the American trotter, and should there be the improvement which can rightly be anticipated, he will be a very hard one to beat. The cut is capital, giving the points as exactly as can be shown in a picture, and the artist, Mr. Wyttenbach, has done the famous horse due credit in the portrait. We are not prone to predict, though we must say that if Romero does not lower the five-year-old record, we will be disappointed.

TROUT FISHING ON WIND RIVER.

The following account of fishing on Wind river is copied from the New York Herald, the correspondence being inscribed "Fort Keogh, M. T., May 10th, 1882." The fish are almost too plentiful in that country to make the sport as enticing as when it requires some time to fill a fair-sized creel, and the loading down a Government ambulance in a few hours with real "speckled beauties" is rather a tough story for those to believe who are only conversant with the Eastern trout streams. Californians who make trips to the streams of the upper country, and those of the Argonauts who had a fancy for the gentle sport, will not dispute Mr. Brisbin's statement; and before long, when the letters come from the parties visiting the happy fishing of the North, there may be something as exciting as that which is so graphically portrayed in the following:

My first experience at trout fishing out West was in the Wind River country. We had camped late one night on the Big Popoagie River, and the guides told me it was a famous trout stream. In the morning I rose at reveille, and taking my rod, went down the stream and cast the line, baiting with a grasshopper. Hardly had the bait touched the water before it was taken under by a trout. Another and another was taken until I had six, when I went back to camp to have them cooked for my breakfast. These trout were one to one and one-half pounders, red speckled, and their meat hard, firm and sweet. They were as good as any brook trout I had ever eaten.

Next day we camped at three o'clock on the Little Popoagie, and all hands turned out for a fish. The soldiers caught enough for the companies, and Major Jackson and I took forty and thirty-seven respectively. They were smaller than the Big Popoagie trout, and even better, I thought. The guide said there was a lake at the head of the stream, about six miles distant, and Jackson and I rode up to it. The trout were enormous—one taken weighing nearly three pounds. Nelson, my guide, told me over on the North Fork of the Wind River I would find still better fishing and very large trout. Jackson and I one day took an ambulance and went over. Almost at the first cast I hooked a monster. I tried to land him, but in vain. "Drown him!" cried Jackson, and I gave him the line. Whizz! whirr! went the reel, and he ran down the stream like a race horse. Turning short about, he came up again.

"That will never do!" cried Jackson. "He will go under a log or get the line fast! Reel him in, man!" I did reel him in, even running back a few steps to gain line. But it was too late. He went under a cottonwood tree which had fallen into the stream, and parted my line with a snap.

"That's as bad as Bob Roosevelt would do," cried Jackson, and I felt humiliated.

"I'm going to wade," continued Jackson.

"And take a mean advantage of your superior," I added, "knowing he has the rheumatism and can't go in."

"Never mind," responded the little man, and in he went. "Come on, Jackson," I said, "you will catch your death of cold; besides the water is full five feet deep."

The little man waded out until he was waist deep and cast his line. There was a splash, as if some one had thrown a stone into the river, and under the line went. I laid my rod down and watched Jackson. First, one went the reel and the play was enormous. Slowly Jackson drew him up until we could see his back, and then off he went again, Jackson following him. Again and again he wound him up and let him out until I could see his head, and saw he was

drowning. Jackson came on shore and we landed him, a full four-pounder, undressed.

I repaired my line, and in an hour we had a full string—fifty pounds at least—and returned to camp, Jackson well wrapped up in the ambulance driver's blanket to prevent him from taking cold.

Two days later we crossed the divide and encamped in a beautiful cottonwood grove on the banks of Little Wind River. I had often heard of the trout in this river, and at once made arrangements for a general fish. Part of the officers were to go up the stream and part fish down, while Jackson and myself, advised by Crutcher, the guide, had determined to fish in a little stream called Trout Creek. The one who took the greatest amount of trout in pounds was to have a feast, and the one who secured the largest single trout to be given a fine buffalo robe. The sun was just rising when we set out up the beautiful valley. Parting at the forks of the trail with our friends, they went down to the river while Jackson and I turned toward the hills.

"Remember," cried Jackson, after the throng of retreating horsemen and ambulances, "the man that is late don't count; four o'clock sharp, gentlemen, if you please, at Crutcher's house."

A sharp drive of an hour across the open country brought us to a large meadow through which Crutcher said the stream we were in quest of ran. It was an insignificant little affair, very crooked, but full of deep holes and enticing shallows. It was the veritable picture of the famous "Willows," and the trout sang all day:

Down in the dark holes I keep
And there in the moonlight I float and sleep,
By cottonwood log and the springing bog
And the arching willows I lie in a cove.

We were soon at work lifting out the speckled denizens. Taking my post behind a leaning cottonwood tree I let my line drop over the bank, and hardly had it touched the water before there was a splash, a jerk, and I landed a half-pounder.

"A good beginning," cried Jackson, who was still fixing his rod.

"Take him off," I said, "for I am afraid to move. The water is very clear and they are wild, so we will have to keep under cover."

Jackson took my fish off, and calling to a soldier to assist me, hurried down the stream. I could see the old fisherman was being consumed by a desire to begin the sport. What is it in a man that makes him so love to shoot birds and catch fish? How we dream in the spring of the glorious summer days, when we shall linger along the green banks of the bright flowing streams or wander through the valleys that conduct them toward their ocean homes, listening to the whirr of the wing that is to be broken by our swift flying shot. There is, indeed, an earthly bliss in hunting and fishing known only to the true lovers of field sports.

But I forgot quite. From my perch behind the cottonwood stump I cast again and again, each time hooking my nimble victim until eleven had been landed from one hole. They were not large trout, perhaps from half to three-quarters of a pound. Just right for table use and very fat, their sleek sides and deep vermilion spots glistening like silver in the sunlight. Half an hour later I overtook Jackson and found him with a full string. We emptied our strings twice into the ambulance, and then we lunched under the shade of a wide spreading cottonwood tree.

Two hours later the driver came to say if we intended to ride home in the ambulance we must stop fishing, as we had all the springs with our own weight would bear. Every one who has seen a government army ambulance knows the seats run lengthwise, and sure enough the space between the seats was well filled with trout. I could hardly realize that we had taken so many; but there they were.

It was not yet quite three o'clock when we arrived at Crutcher's house, but some of the party were there before us, each having taken great abundance of fish. Lieutenant Dinwiddie had the largest trout, having taken a three-pounder. Jackson and I had by far the largest number and the greatest weight, he claiming seventy-six pounds when they were divided. I had sixty-four.

I longed to catch one of the big trout in the Wind River, and Jackson, Russell and I agreed to go out alone next day and try the deep water for some of the monsters reported to lie hidden in the dark green pools. I found a glassy looking place and whipped it vigorously, but the hermit, if there, would not rise. Russell was more fortunate and raised a three-pounder, but could not land him. Jackson, after some patient angling, hooked his prize and called loudly for help. We found him playing the largest trout I had ever seen in the country. Up and down the stream they went, Jack doing his best to drown him. He threshed the water into a foam, and now and then showed a head that looked almost as large as a sheep's head. After a long fight he was safely brought to shore, and was a full three-and-a-half pounder.

We took a great many small ones, but it was late in the day and I had almost begun to despair of getting a hermit, when, while whipping the water near a cottonwood log, I felt a sudden jerk. I did not see him, but I knew he was there all the same, and he pulled like a yearling calf. I let him run, and called to Jackson to come and help me. We were soon playing him, and got him away from the log. He started down the river, and the stream being clear we let him run. He carried out nearly one hundred feet of line before he stopped. "Now wind him up carefully," said Jackson, "and see he don't double back under the log or he will break the line, certain."

He lay so still and was so heavy I thought him dead, but just as I raised his head so he got a sniff of fresh air away he went again toward a shallow below.

"Run him into the shallow," cried Jackson, "and we will drown him." I tried it, but found the task more difficult than I had anticipated. I was sure he would part my line, and, asking Jackson to hold the rod and reel a moment, I waded in behind him and pounced upon his back. The line parted almost immediately, and I was afraid he would escape.

"Lie down upon him," said Jackson, and I did. He struggled under me like a young whale, and to make sure of him I thrust my hand into his mouth and seized him through the gills. Drawing his sleek carcass from the water I held him up, as fine a specimen of an old hermit as ever was seen. He bit me horribly, and made the blood run, but what did I care for that so I had my prize safe? What sportsman would not stand a bite on the hand for the honor of capturing such a monster trout? I have taken many fine trout since in western streams, but none finer than this one from the Wind River.

The next day Crutcher, our guide, announced that he would give us a frontier dinner at his house, or rather cabin, up the valley. Crutcher had for a wife a Sioux squaw, a

fine looking woman, and said to be a good cook. The following is, as near as I can remember, the bill of fare served:

SOUP.
Green pea and bean.
FISH.
Baked trout and boiled whitefish.
MEATS.
Rocky Mountain sheep, roast; elk, roast; fried antelope.
ENTREES.
New potatoes, peas, radishes, mashed turnips and lettuce.
DESSERT.
Pumpkin pie, wild raspberry pie, cream on canned peaches, wild sweet raspberries in cream.

The fresh bread and sweet new butter were the best part of the dinner, and I never ate better anywhere.

There are hundreds of fine trout streams out west, and I could fill a side of the Herald with descriptions that would make the mouths of your New York sportsmen water. What I have said, however, will be sufficient, and the description of the Wind River will answer for a hundred other streams equally as good for trouting. We actually catch the hermit trout and not in our dreams:

When the streams with moonlight gleams,
Sparkle all silver and starlight gleams,
Then, then look out for the hermit trout,
For he springs and dimples the shallows about,
While the tired angler dreams.

JAMES S. BRISBIN.

THE CALIFORNIA TROUT.

Dr. T. H. Bean, a well-informed ichthyologist of the Smithsonian Institute, writes to Mr. E. G. Blackford of the New York Commission a letter, which is published in *Forest and Stream*, in which he says the trout found in California are the following:

1. *Salmo irideus*, Gibbons.—California brook trout, rainbow trout, occurs west of the Sierra Nevada, throughout California and northward to Oregon. I have collected a young trout at Sitka which is so nearly like *irideus* that I referred it to that species in my "Preliminary Catalogue of Alaskan Fishes." Young *irideus* cannot be distinguished from young *gairdneri* by one who is little acquainted with fishes.

2. *Salmo gairdneri*, Rich.—Steelhead, hardhead, salmon trout, ah shut (Sitka). Sacramento River to Kodiak, Alaska. The adult bears a striking resemblance to the salar or Maine salmon, and reaches a weight of twenty pounds or more. I found gravid females at Sitka, in June, 1880. As already remarked, it is very difficult to distinguish the difference between the young of this and the last, though the adults are easily enough separated.

3. *Salmo purpuratus pallasi*. Columbia River salmon trout, Rocky Mountain brook trout, lake trout, "the salmon trout of the Rocky Mountain region," "not common south of Mount Shasta in California." Abundant in Washington, Oregon, British Columbia and Southern Alaska. This is a black spotted species, with red patches on the lower jaw, and is readily distinguished from the two preceding. You remember the pair which was sent you from the museum over a year ago, marked Sitka, L. A. Beardslee and T. H. Bean.

4. *Salmo purpuratus*, var. Henshaw, Gill & Jordan.—Lake Tahoe trout, silver trout, black trout found in Lake Tahoe, Pyramid Lake and streams of the Sierra Nevada. Considered by Prof. Jordan to be a variety of *S. purpuratus*. This trout is regularly brought to San Francisco market.

Two of the above species (*irideus* and *purpuratus*), were included in the lot which we received from you April 6, 1882. You have also sent us the Lake Tahoe trout at another time. With the trout forwarded April 6th there was a species of California salmon from Willow Brook, Minnesota.

The only species of red-spotted trout so far known on the whole west coast is the *Salvelinus malma* (Walbaum) Jordan & Gilbert. This is the Dolly Varden trout, bull trout, red-spotted trout, salmon trout, Galetz (Russian), Ahn Chnck, (Kodiakmint); it is found west of the Cascade Range, from Northern California to, at least, Colville River in Alaska. In other words, throughout the mainland and islands of Alaska. This trout has received a great many scientific names, but the one here given is apparently the oldest. The sea-run individuals lose their red spots, and are then analogous to the *Salmo immaculatus* of H. R. Storer. This is much like the common brook of the East (*S. fontinalis*), reaching its greatest size in cold, northern waters. At Kodiak it forms an important article of export under the name of salmon trout. Now, as to the question: "Is there any difference between the California mountain or rainbow trout and the McCloud River trout?" In my opinion the two names are applied to the same fish (*Salmo irideus*), and I think there is no other black-spotted trout in the McCloud. Besides this *irideus*, there is the red-spotted species (*Salvelinus malma*). I have the impression that we have never received any other black-spotted species from the McCloud than *irideus*. However, I will look up the records and inform you if I find that I am in error. "McCloud River trout" is a bad name, because you cannot know whether reference is made to the red-spotted or the black-spotted one. Rainbow trout is a good descriptive term for *S. irideus*.

OUR FIRST BEAR STORY.—From the *Calaveras Chronicle* we learn that two men, named William Magee and William Johnson, were out fishing recently on the Mokelumne River, above West Point, and beside their fishing outfit had provided themselves for a hunt as well, so as to take in all the sport that might offer on their trip. While on their way home, and within four miles of West Point, their attention was attracted by the fierce barking of one of their dogs in the woods a short distance from the road. On going to ascertain the cause, they found that the hound had treed a very respectable sized cinnamon bear. Magee leveled his rifle on the animal and lodged a ball in his shoulder, which caused the bear to let go his hold and drop to the ground, a distance of about twenty feet. The hound immediately fastened on to the bear as he landed, but would have paid dearly for his totemy had not another dog belonging to the party come up and attacked the enemy in the rear about the same time, getting a hold that made the bear weaken at once and let go the hound and turn upon his rear adversary. No sooner was the hound free than he retired precipitately, having had enough of the fight. The other dog, seeing he was to be alone in the contest, also beat a hasty retreat. Once free from the dogs, the bear ascended the tree with wonderful rapidity, and did not stop until he had reached some large branches at least seventy feet from the ground. Magee fired twice at the animal, and only at the second shot did he leave his lofty perch, and struck the ground with tremendous force. The animal, though emaciated, having just emerged from the snow of the mountains, weighed 400 pounds dressed. One of the fore paws was brought to this place and shown to us, and it was no small one either.

HONOLULU CORRESPONDENCE.

HONOLULU, June 13th, 1882.

MR. JOSEPH CAIRN SIMPSON—DEAR SIR:—Your favor of May 30th duly came to hand, and in answer, please first to put my name on your list, and then believe that I will do my best to add to your subscribers on the Islands. As to racing information I shall be at all times glad to give you every information in my power, the more so as there is no paper published here that shows any interest in racing or breeding, or indeed any other sport; but for the past six months there is little that has transpired here in this line that would be interesting to your readers. The plain fact is that racing here is not in a very healthy condition, as there appears among a certain clique an evident desire to scoop in the winnings through transactions of questionable character, rather than run the risk of competition all open and above board. The result of the races that have just taken place fully justifies these remarks, as there was marked evidence that in some cases the programme of winners was planned out in advance, although there are many victims among those who lost their money who still think that their money was lost on the square. Following is the list of races and entries:

Kamehameka Day.

KAPIOLANI PLATE.—\$100. Free to all Hawaiian-bred horses; catch weight. Mile dash.
J. A. Cummins' b g B. G. Stanford..... 1
G. Lucas' b g Stranger..... 2
G. B. Kelly's ch m Venus..... 3
Time, 1:43½.

KING'S PLATE.—\$125. Open to all three year-olds; to carry 100 pounds. Mile and repeat.
W. H. Cornwell's gr h Garfield..... 1
G. B. Kelly's b h Hancock..... Dist.
Time, 1:50½.

These colts have been pitted against each other several times with varying results, but the general impression is that Hancock is the best horse when in condition, but it was a notable fact that he had been ailing for the ten days previous to the race. Still, for a time he made a good showing, and the winner was received with cheers, which he would have deserved had he beaten Hancock on even merits, the latter being weak and weighted down with a surplus impost of 35 pounds.

QUEEN EMMA PLATE.—\$100 Free to all. A dash of three-quarters of a mile.
G. A. Cummins' b g B. G. Stanford..... 1
O. Stillman's b h Mark Twain..... 2
G. B. Kelly's ch m Venus..... 3
M. E. Allbaugh's ch m Romping Girl..... Dist.
Time, 1:20.

In this race the betting was principally on Stanford against the field, it not being generally known that Mark Twain was the only true contestant, the others being entered merely as a blind. Thus, the Romping Girl is a fine speedy mare, and I have seen her run three-quarters of a mile in 1:17½, and on this occasion it would have been dollars to cents on her had she been meant, but she was withdrawn on the plea of acting ugly at the post, and such a serious breach of the racing laws was allowed to pass unnoticed.

LEAHI CUP.—Mule race; a mile dash; free to all, at catch weights.
C. A. Bailey's Nigger..... 1
C. A. Dick's Kate..... 2
H. N. Crabbe's Minnie..... 3
L. J. Aylette's Coco Head..... 4

REGENT'S PLATE.—\$100; free to all Hawaiian-bred horses; mile and repeat, at catch weights.
J. A. Cummins' b g Stanford..... 1
G. B. Kelly's ch m Venus..... Dist.
G. Lucas' b g Stranger..... Dist.
Time, 1:49½.

RECIPROCITY PLATE.—\$100; trotting; best three in five, to harness, for all horses that have not a better record than 2:40 in any public race in the Kingdom.
M. E. Allbaugh's ch m. Coquette..... 1
James Dodd's ch. g. Thomas H..... dr.
Time, 2:39½.

Thos. H. having pink-eye, the handlers of Coquette asked the judges to let them trot Coquette against the time, 2:40. They consented. The money was there and did not belong to them, and it was an easy thing. According to the terms of this race, Rarus or Goldsmith Maid could have entered, or even Maud S. Coquette has a record of 2:28¾.

PARK CUP.—\$75. Three-quarters of a mile. Free for all three-year-olds bred in Kingdom; catch weights.
W. H. Colburn enters Unnamed..... 1
J. F. Colburn enters Equal Rights..... 2
Time, 1:24½.

EXPRESS CUP.—\$75. Trotting race; one mile free to all horses driven in a public hack six months.
Keopuhiwa enters b m Dolly..... 1
Manuel Reis enters b m Mollie..... 2
Time, 3:51½.

This was the most enjoyable race of the day. The horses were driven by their owners, one a native and the other a Portuguese. No jockey tricks, but a good square race.

PONY RACE.—\$50. One mile dash, for ponies bred in the Kingdom; not over 13½ hands; catch weights.
J. Lishman enters Why Not..... 1
O. J. Holt enters Tyrnat..... 2
J. Kaanaana enters Mokuichua..... 3
J. H. King enters Bbshwhacker..... 4
Time, 2:05.

KAMEHAMEHA PLATE.—\$200. Free for all trotters; best three in five, to harness.
W. H. Cornwell's b g Oliver..... 1 2 1 2 1
M. E. Allbaugh's ch m Coquette..... 2 1 2 1 2

This was a queer sort of a race, in which a great deal of money changed hands. The best time was 2:35, and to an unprejudiced mind it appeared as if the heats were trotted to suit the betting.

LUNAMAKAAINANA PLATE.—\$100. Free for all; a mile and a half dash; to carry 100 pounds.
W. H. Cornwell's gr h Garfield..... 1
G. Kelly's b h Hancock..... 2
Time, 2:45.

KAIULANI CUP.—\$75. Hurdle race; a mile dash, over four hurdles; free for all, at catch weights.
C. Lucas' b g Stranger..... w. o.
M. E. Allbaugh's ch m Romping Girl..... dr.
Time, 2:19½.

For some unknown reasons Romping Girl did not start, but the judges allowed Stranger to walk over for the cup. But, then, had they adhered rigidly to the rules, there would have been fewer races. There is naught to be said of the Racing Committee in the way of blame. They made some errors, but, then, they were chosen principally to ward off the idea that anything but square racing would be allowed, and as far as they were concerned such was the case; but when it came to fine racing points and decisions, they knew as much about them as I do about elephants.

Send us some horses that can not be controlled by any clique, and we shall have better sport next time.

Yours,

KAAMAINA.

BREEZES FROM MOUNT AND DELL.

HIGHLAND SPRINGS CAMP,
Lake Co., July 2, 1882. }

EDITOR BREEDER AND SPORTSMAN: 'Tis the figure above that follows the eight, which speaks the truth; there is one notch more cut in the stick that stands recorded to our allotted time. And then why not be industrious and persistent and wait not for a more favorable opportunity, but grasp the occasion to enjoy every pleasure that nature's bountiful store has conceived for man, and which only health of mind and body can appreciate? Lay down the hammer and trowel, the needle, book and pen, and bid good-bye to the city's dust, the poisonous gases, the destroying malaria that causes typhoid, the excruciating neuralgia and rheumatism, dyspepsia and biliousness, and let every man, woman and child leave that ocean fog, the summer winds, that heavy damp atmosphere, at least once a year, and go to the mountains, where there exists no malaria, no ache or pain, if only but for a few days, there to inhale the pure mountain air and drink the water that glows and sparkles with the elixir of life. You then can return, refreshed and restored, with mind and body strong, and for every day so spent years will be added to your life. You can become more useful to yourself and a pleasure to your friends, and then fit to live. Each year I can notice a greater desire for the people of the city to avail themselves of this very important change and pleasure. The watering places are this year well patronized—the pleasure seekers are taxing the stage lines to their full capacity. Lake county has been specially favored, and that justly, as I do not think that any county in the State offers a finer climate, a greater variety of mineral waters and springs, picturesque mountain scenery, abundance of game and fish, and a great variety of beautiful mountain songsters, various flowering shrubs and trees that are interwoven with the wild climatis and grapevine. Each county, however, has its special attractions, and one cannot go astray without realizing sufficient pleasure to well repay him for the trip.

There are times, however, when the traveler in the mountains becomes wearied and tired, and he whiles in a half dozen hours in a stage coach, climbing the steep winding road over the rugged mountains, in midday, when the full rays of the noonday sun are reflected from the parched brown surface, which is generally void of all moisture or vegetation, especially on the southern slopes; the dust rising from under the horses' feet and curling up in dense volumes settles in the coach so thick that you can scarcely recognize your traveling companions. Yet you soon forget the tedious part, for when the summit is reached a gentle refreshing breeze fans you to consciousness. As from a dream, you become spell-bound and speechless, suddenly beholding before you as if by magic a panorama so grand and beautiful, and extending so far that part is lost from view; as the eye cannot follow the vast extent of the valleys beneath you—so charming and beautiful—frescoed with waving grasses, wild flowers, vines, fields of grain and corn, which are varied and blended in many shades and colors as to their near approach to ripening; with orchards and their golden tropical and semi-tropical fruits well defined; the rivers and streams, having their curves and angles outlined with the foliage of massive oaks and cottonwood trees; lakes, with their placid waters so clear and still that they resemble immense mirrors placed there, which are reflecting the sun's rays in obedience to nature's laws, which provide nourishment and warmth to both animal and vegetable life. With herds of fat and silky-coated cattle, horses and sheep quietly feeding, their shepherds near at hand, dreaming away a lazy existence. The vulture and turkey buzzard, with outstretched and motionless wings quietly drifting with the currents in a deep blue and cloudless sky, the sun's rays reflecting upon their purple and bronzed feathers, which cast a moving shadow upon the earth. For the moment you are startled—'tis the shadow of death—for their bright piercing eyes are feasting and fattening their feathered carcasses, and transmitting a thanksgiving feast to their naked and wistful young, who are secretly nestled on some rugged projecting cliff that overlooks the dying struggles of some poor creature beneath them. In astonishment you look and move not, and still look again at the grand panorama, and think of the strange workings of Nature. With one full breath of the mountain elixir and another you feel as though the depths of unlimited space in the heavens could be explored; you advance, and in the twinkling of an eye you are lost, and know not where you stand.

WHEATSTONE.

A CHALLENGE FROM M. W. HICKS.

EDITOR BREEDER AND SPORTSMAN: This is a country exceptionally free in its speech; a fact with which I have no quarrel, merely claiming the right to "talk back." Mr. John Mackey, Superintendent for Messrs. Haggin and Tevis, has made the public declaration that my stock all "duffed." As I have stallions asking public patronage, and am breeding trotters for sale, this declaration, if unanswered, would be prejudicial to my interests. Now, as I have representatives of the Hambletonian, Mambrino and Bashaw families, backed up by stout thorough blood in the distance, if they are quitters it must be the fault of their management. It is true that most of my stock have a pacing cross, but pacing blood did not hurt Lady Thorn, Mand S., or Santa Claus, and ought not to prove an injury in regard to mine. But this talk does not refute the gentleman's charge, nor will it convince the public; so I will make Mr. Mackey a friendly proposition that will settle the question, in which the public as well as ourselves are interested. The firm for which Mr. Mackey is employed are older breeders than myself, and probably breed fifty colts to my one. Now, I will match a one-year-old, a two-year-old, a three-year-old, and a mature horse, of my breeding, against like classes bred by Messrs. Haggin & Tevis, for two hundred dollars a race; and to make the test of staying qualities more thorough, I will make the yearling race mile heats; the two-year-old race, best three in five; and the three-year-old race two mile heats. Races to be trotted at any agreed time between now and November, on the Sacramento track.

M. W. HICKS.

Florin, June 29, 1882.

CORRESPONDENCE.

LEMOORE, Tulare Co., July 5, 1882.

EDITOR BREEDER AND SPORTSMAN: This is the Upper San Joaquin, or perhaps we had better say the Tulare Valley. Ordinarily a fair grain country, a most excellent stock country, as well as the very best part of the State for raising most kinds of fruit. But this is our dry year; consequently a small allowance of grain. This immediate section—Mussel Slough country—will produce about half a crop of grain, but as irrigation is the order here, summer crops follow. Those, with the frequent cutting of the alfalfa fields, will make quite a busy and prosperous season.

In your Stockton correspondence, last issue, there seems to be a little mistake in the name of the sire of the colts from this county entered in the two-year-old race, Stockton District, to be trotted next week. The name of the horse is *Algona*, a son of Almont, not "Angora" or "Argola," as published. Algona was bred and raised by Gen. Withers, of Kentucky, and introduced here by S. F. Gilmore, in the spring of 1879. Since which time he has been kept here till April of this year, when he was sold to J. B. Haggin and taken to Sacramento county. He was really the first trotting stallion ever introduced here. As might have been expected few, if any, mares here were well enough bred to produce trotters. Such as they were, however, a fair number were bred to him. Consequently we have in and around Lemoore a number of half-bred trotting colts. Among those, two or three only have been handled at all for speed, one of which has been sold, the other two have been entered to trot at Stockton this fall. Your correspondent, in speaking of the race and colts, says "they are all doing well." This is likely true so far as the colts at Stockton and vicinity are concerned. But if I am correctly informed, three of the colts for this race are in this county, two of them in training at Visalia. The colts at Visalia are s. c. Almoore by Algona, named by H. Robinson, not S. F. Gilmore, as stated by your correspondent, and a nephew filly named by Mr. Murray and being handled by him, Robinson & Gambling have their stable of horses at Visalia; among them is the colt Almoore. It is said he is doing well and going fast. Likely the same could be said of the nephew-filly being worked by Mr. Murray. The other colt from this county is by Algona and kept on the farm of the owner, Mr. E. Giddings, near Lemoore. He was handled a little as a yearling and showed quite well for an alfalfa raised colt and one handled only by the boys on the farm. But, unfortunately, soon after he was entered in this race, he went lame, and has been entirely laid up till within a few days. He is now much better, and hopes are entertained that he will be able to work a little from now on, and possibly be able to start in the race.

Yours,

E.

ATHLETICS.

Harmon, the well-known sprinter, is reported as anxious to concede McComb some yards in a short distance sprint.

There are rumors of a five-mile match between P. McIntyre and G. Gnerrero for a stake of \$500 a side. McComb don't love the distance, and Guerrero's backers are not very plentiful. We hardly think the match will come off this season.

H. S. Brooks, who defeated L. E. Myers at the championship meeting, is expected to arrive in this city in a few days. R. S. Haley, of the O. A. C., is anxious to meet him in a dash of 100 or 220 yards. If Mr. Brooks is able and willing to accommodate him, the event will be a treat to our local athletes. Two years ago Mr. Brooks could not be induced to compete in the O. A. C. handicaps, in which Haley was scratch man. And he would undoubtedly have needed a liberal handicap at that time. Since then Brooks has gained the reputation of being a first-class amateur at Bob's favorite distances, and will not need the services of the handicapper.

A BRILLIANT PERFORMANCE.

In the Civil Service sports that opened in London Jun-3d, there was an event to which we desire to call the attention of our athletes. This was the handicap in which all the cracks were entered, and, as may be seen by the following description, was a brilliant triumph for W. G. George: "His magnificent running really made the race too easy for him, for he was the only one in it. Going off with a wonderfully easy stride, he slipped along without in any way revealing the pace he was going at, and it was only when the watch showed 1m. 17½s. for the first lap that one commenced to realize what was going on. When, however, he got amongst his men, going up the back stretch for the second time, and ran through them as though they were so many ordinary limit markers instead of aspiring champions, the excitement grew apace, and waxed stronger when he took the lead at the half mile. As he came down the straight for the second time, forty yards or more ahead of every one else, cheering set in, but some old hands thought he must be going too fast, and screamed at him to take care. As the watch showed 2m. 45s. for two laps, there was some reason for their fears, but George kept on. Up the back he, not unnaturally, began to get slower, and Birkett (50 yards), putting it on along the top, got nearer, and improving his position until he had no more spurt left, finished 18 yards only behind George, who broke the worsted in 4m. 19.2-5s., not by any means so much exhausted as one would expect, although we do not join in the belief (shared by himself) that he could have done very much better. At the outside, he might have knocked off the odd 2-5, had he been pressed. The quarter-mile time was not taken, but the half was completed in 2m. 4½s., and the three-quarters in 3m. 8½s. Birkett ran quite up to his form, and would have done 4m. 32s. for the full distance."

Our athletes, who lead an easy life six months, then enter a mile run without previous training, and are badly beaten in much worse time than five minutes, will probably not be comforted by reading the above. A hundred yards dash, with a sufficient handicap to insure the winning of the medal, without having to exercise half a dozen times to fit themselves for the event, seems to be the height of their ambition.

Several members of the O. A. C. are anxious to beat some of the Club records, and would like to see a few good medals offered as an encouragement to go into active training for the purpose. They should by all means be accommodated. The best part of the season for athletics on this coast is still before us, and the athletes who have survived the holidays propose to go to work in earnest on the new track. It behooves the officers of the Club to give them as much encouragement as possible.

THE TURF.

THE CHICAGO RACES.

Similar to the Coney Island Jockey Club, of whose brilliant meeting at Sheepshead Bay, Long Island, we wrote at such length in the last issue, the Chicago Driving Park Association seems at once to have attained to a pinnacle of success that in less liberal and enterprising hands it would have taken a decade to achieve. Following in the steps of the Chicago Jockey Club, that commenced operations in 1877, the present Association was formed about the commencement of last year, with a capital of \$100,000 and an executive committee of wealth, experience, liberality and social standing—a combination so devoutly to be wished for in an enterprise of this character. Under these favorable auspices two successful meetings were held last year, and the programmes for the running races commencing Saturday, June 24th, and for the trotting races that begin on July 15th, are of such a varied and brilliant character as to enlist the largest number of entries ever registered in a western city, including horses of finest quality from almost every State of the Union. At both these meetings California is well represented, and although our hopes in the promise of our horses have not been fully realized, in their running there is much to be proud of, considering the unfavorable conditions that marked their first appearance on the Eastern Turf.

There was no secret about the fact among the Californian owners and trainers, that if a violent rain storm came on during the meeting, the consequent heavy track would greatly impede the chances of our horses. Surely enough, as luck would have it, a heavy storm came up on Saturday, continuing the Sunday, and necessitating the postponement of the races to the 26th of June. On that day there was a fair attendance, with rather warm and sunny weather, but the track was yet heavy, and the time made was therefore slow.

The first race was the "Inaugural Rush," for a purse of \$300, for all ages, which was won by Bootjack, the favorite, with Gus Matthews second and Clarissima third, with Ranger and Good Night unplaced.

The second race was the Ladies' Stake, three-quarters of a mile, for two-year-old fillies, \$50 each, half forfeit, with \$800 added. This was won easily by Miss Woodford, the favorite, with Vis-a-Vis second, and Blue Grass Belle, Orange Blossom and Olean in the order mentioned. Time, 1:20½.

The third was the Board of Trade Handicap, a mile and a-half dash, in which there was some heavy wagering at the following odds and weights: Bend Or, 4 years, 117 pounds, \$400; John Davis, aged, 108, \$350; Monogram, 3 years, 107, \$85; Mr. Baldwin's Sunday, 3 years, 91, \$75; Aliunde, 5 years, 108, \$65, while \$80 was given for the field, in which were Blazes, 4 years, 117 pounds; Annie G., 5 years, 110; Babe, 4 years, 101, and Intrinsic, 4 years, 96 pounds. With a good start, Babe and Sunday took the lead, and held it for a mile, when they gave place to Blazes and John Davis, followed by Bend Or. The last named waited until well up the stretch, when he passed the leaders, and, keeping the lead, won without special exertion by half a length from John Davis, with Aliunde third, two lengths further off. Time, 2:46½.

The fourth race was mile heats, over four hurdles, which was won by Guy, he winning the first heat in 1:58½, Judge Burnett taking the second heat in 1:55½, and Guy securing the final heat in 1:58½.

The last race was an extra purse for horses that had not run this year, a mile and a furlong, in which there were ten starters. It was won by Stanton in 2 min.

On the Tuesday, the proceedings commenced with the Flash Stakes, in which our California crack, Gano, made his debut on an Eastern track. The weather was fine and the attendance large. The Flash is for two-year-olds, five furlongs, in which there were forty-seven subscribers. Punster was the favorite at \$225, Ascender next choice at \$185, Barnes \$75, and the field \$50, comprising Barnes, Slocum, Atzee, April Fool and Pearl Thorne. To a good start, Barnes and Ascender took the lead, which they held, with the others bunched and well up, until well round the turn. It was a good race home, Ascender beating Barnes by half a length in 1:03, he being three lengths in front of Pearl Thorne, who was followed by Gano, Slocum, Punster, April Fool and Atzee. The defeat of Punster was a great blow to some of the Kentuckians present and to some of the Chicago speculators, but the majority of the local betters backed Captain Cottrell's colt. The winner is a bay gelding, by imported Buckden, dam Ascension, and promises to be very useful to the Mobile stable.

The second race was the Selling Purse, of \$300, for all ages, a mile and an eighth, which was won by Flash in 1:57½, Tom Barlow second, Churchill third, and nine others unplaced.

The next was the Green Stakes, a mile and a quarter, for three-year-olds, that did not win last year, for which there were fifty-six nominations. Harry Gilmore was the favorite at \$100 against \$70 for Mistral, \$40 for Plunkett and \$50 for the field, in which were Gunnar, Washburn, Glenarm and Gus Matthews. Gilmore and Gus made the running until well in the homestretch, when Tom Plunkett and Gunnar came to the front, the former winning by half a length, with Gilmore third. Time, 2:13¾.

The last race was a Club Purse of \$300, for all ages, heats of five furlongs, and was run in a heavy rain storm. There were eleven starters. Bell Boy took the first heat in 1:04, Mamie W. the second in 1:08½. In the third heat the filly was favorite at \$100 to \$30, and won easily in 1:11½. The Mutual pools paid \$50 for every \$5 invested.

On the Thursday, in the first race, a Club Purse of \$350, for all ages, was won by the favorite, John Davis, Metropolis being second, Madame Rowett third, with five other starters. Time, 2:11.

The next was the Illinois Oaks, a mile and a half, for three-year-old fillies, \$50 each, half forfeit, with \$800 added, and in this the Duchess of Norfolk made her first appearance. On the faith of her reputation here, she was made equal favorite at \$225 with Belle of Runnymede, Pearl Jennings and Pinafore selling for \$135 each, and Lizzie McWhirter and Katie Creel \$25 each. The two favorites made the running for a mile, and in the deep mud, then pumped themselves out, and Katie Creel, judiciously ridden, came to the front and beat the Belle out, Lizzie McWhirter securing the third position. Time was 2:54, and the Mutual pools paid \$117 20, an excellent \$5 investment.

In the Merchants' Stake, for all ages, a mile and a quarter, Checkmate won handily in 2:22, with Blazes second, Bootjack third, and six others unplaced, including Mr. Baldwin's filly Sunday, who apparently found herself in too good a company.

The Steeplechase was won by Guy, and the final race was an Owners' Handicap, in which there were eleven starters, including Gano, who sold for \$150, against \$175 for Mary Corbett, and the field \$325. The affair was very one-sided, Saunterer taking the lead, and winning easily in 1:19½, with Jack Haverly second and Arno third. The French pools paid \$70, another good turn for the outsiders.

It rained almost all the night on Thursday, and then there was another down pour an hour before the races, making the track so muddy and disagreeable that the attendance was very slight. The first race was "The Criterion," a dash of three-quarters of a mile for two-year-old colts, which closed with forty-one nominations. Of these there were but five that came to the post; Ascender being a great favorite at \$100, against \$30 for the field, in which were the two Californians, Lucky B. and Grismer, Idle Pat and Atzee. The start was pretty even, and Lucky B. made the running with Ascender, the latter having slightly the best of it at the distance, but Lucky B. rallied and won by a short head in 1:28½. In the selling purse, \$300 for all ages, a dash of a mile and a quarter, Ecker won in 2:31½, with Bailey second and Barlow third, with Edison, John Happy and Third Out unplaced. The third was a handicap purse, which was taken by Metropolis, Tosco second, Startle third, and Windrush last. Time, 3:42½. The fourth was a blub purse, for all ages, mile heats, in which there were only two starters, Lizzie S. and Force, the former winning two straight heats in 2:01½ and 2:05½. The fifth race, a dash of a mile for beaten horses, was won by Farragut, with John Sullivan second and John Henry third. Time, 2:04. With the exception of the Criterion stake the proceedings were voted as somewhat slow.

On Saturday the day was fine, the attendance good, and the track was improving rapidly under a strong breeze, though still it was pronounced very heavy and slower than when the mud was thinner. The first race was the Chicago Stakes for three-year-old colts, one and one-half miles. Bengal was the favorite, at \$275; Monogram, \$200; Stanton, \$180. There was an exciting race at the finish, Stanton winning under persuasion of both whip and steel. The second race was the Chicago Cup, and the Californians spiritedly stuck to Clara D., although Checkmate was the favorite at \$420, John Davis selling the next choice at \$200, Blazes bringing \$65 and Clara D. \$65. There was little variation in the race, as John Davis took the lead at the start and never relinquished it, while Clara D. appeared to be watching Checkmate; and though she ran into the second place very handily, she could not reach the victor, John Davis coming in without even having his position in jeopardy. To beat Checkmate was held to be a full measure of glory for the California mare, and the predictions are rife that she will yet place a good race to the Occidental contingent.

The next event was the club purse of \$400, 1¼ miles. Just before the race, Topsy was the favorite in the pools at \$130; Duchess of Norfolk, \$100; and Madame Rowett, \$25. Topsy got the best of the start, and led to the lower turn, the Duchess next coming round the turn. The Duchess then took the lead and won easily by two lengths, Topsy second, Rowett third. Time, 2:12½. For the second heat, in the pools Duchess brought \$100, field \$25. The Duchess went to the lead at once, and was never headed, winning in a canter by half a dozen lengths, Rowett second. Time, 2:16½.

The fourth race was a hurdle handicap, two miles. In the pools Judge Burnett brought \$100, field \$100. The three ran well together to the fourth hurdle, where Nora fell and rolled directly over her rider, injuring him quite severely. After passing the fifth hurdle, Burnett won easily by half a dozen lengths. Time, 1:20.

The fifth race was a selling purse, one and a half miles, all ages. In the pools Sam Recker brought \$100, John Sullivan \$70, Jack Haverly \$40. Sullivan and Haverly ran head and head for seven furlongs, when Haverly began to fall away and Recker to move up, but Sullivan held the lead and won by four lengths. Recker second, Haverly third. Time, 2:52.

The sixth race was three-quarters of a mile, all ages. In the pools Bell Boy brought \$165, Saunterer \$125, field \$25. The finish was between Goodnight and Saunterer. The former won. Saunterer second, Intrinsic third. Time, 1:22.

On the Monday the promise of good weather was not fulfilled. The rain fell in the night and early in the morning, making the track quite heavy. Just before the first race a drizzling rain set in, and increased to a heavy down-pour before the second race was run, making the track deep in mud and compelling a postponement of the day's programme at the conclusion of the second race. For the first event, Nursery stakes, mile dash, Lucky B. was the favorite in the pools. He got away badly, and an effort to make up lost ground and force the pace over such a heavy track was too much for him, and Ascender, who ran a waiting race, three-quarters of a mile, came in a rush in the last furlong, and won. Time, 1:58, Lucky B. dropping to third place. With a good track he would give the Mobile crack a very lively race for that distance. In the two-mile heats, Clara D. had everything her way, settling the pace throughout and winning at will, under a strong pull, in two straight heats. She demonstrated that she is a good mud horse, as at the conclusion of each heat she scarcely took a long breath, while the others were dead tired. Time, 4:05½, 4:11.

On Tuesday the first race, three-quarters of a mile for maidens of all ages, John Henry won by half a length, Intrinsic second. Time, 1:27. In the second race, one mile, for three-year-olds that have not run first or second this year, colts 103 pounds, fillies 98 pounds, Boatman won by a length, Jesse James second. Time, 2:01½. In the third race, Selling Purse, half a mile, for two-year-olds, Virgil (filly) won by half a length, Early Bird second. Time, 0:56½. In the fourth race, one mile and one-eighth, for

no winners at this meeting, Lizzie S. won by half a length, Tom Barlow second. Time, 2:11½. The fifth race was the Illinois Derby, for three-year-old colts and fillies. In the pools Duchess of Norfolk sold for \$700; Stanton, \$450; Anglia, \$320; Gunnar, \$310; Bengal, \$325; Monogram, \$200. Gunnar won, hands down, by four open lengths, Stanton second, Bengal third. Monogram, Anglia and Duchess of Norfolk were beaten off, and pulled up, finishing as named. In the sixth race, two miles, for all ages, Bootjack won by a nose, Lida Stanhope second. Time, 4:07½. The seventh race was mile heats, best three in five, for all ages. The starters were Force and Metropolis. Metropolis took the lead and held it to the finish in each heat. Best time, 2:00. The eighth race, handicap steeplechase, for all ages, about two and a half miles, was won by Edison by a quarter of a mile, Strychnine second, Bailey third. The ninth race, selling purse, for all ages, one and a quarter miles, was won by D. dette in a canter by half a dozen lengths, Amazon second. Time, 2:24½. The tenth race, Owners' handicap, for all ages, three-quarters of a mile, was won by Good Night by half a length, Lizzie S. second, Raybee third. Time, 1:21½. The eleventh race for all ages, maiden allowance, one and a half miles, was won by Flander in a canter by a dozen lengths, Pope Leo second. Time, 3:55½. The twelfth race, for maiden two-year-olds, five-eighths of a mile, was won by Idle Pal by two necks, Slocum second. Time, 1:09.

Wednesday was an extra day. The attendance was light, but the day was bright and warm and the track heavy. The first race was 1¼ miles for non-winning three-year-olds. In the pools Belle of Runnymede brought \$125, the field \$50. From the start Flone made the running with John Sullivan lagged on her; Viron, third; Belle of Runnymede, fourth. At the half-mile post Runnymede joined the leaders and at the three-quarter mile post she and Sullivan were together and at distance, and both got the whip, but Sullivan won by a neck; the Belle second, four lengths before Willansee, third; Flone, fourth; Tricks, fifth; Viron, last. Time, 2:18. The Mutuals paid \$45 10. The second was three-quarters of a mile for non-winning three-year-olds at this meeting. In the pools Grismer brought \$100, Baritone \$90. The start was even and Baritone led to the half-mile post, when Grismer went to the front and won handsomely by a length. Time, 1:22½.

The third race was a selling purse, 1¼ miles, for all ages. In the pools Mammothist brought \$200, Farragut \$165, Bailey \$110, the field \$65. At the start Farragut, Mammothist and Jack Haverly were together in front, and led without material change for three-quarters of a mile. On the far side, Bailey, running alone, in fourth place, drew up to a length from the leaders, and at the three-quarter post the whole field ran into a bunch, from which Bailey emerged in the lead and won easily by two lengths; Jack Haverly, second, half a length before Katie B., third; Farragut, fourth; Mammothist, fifth; Ed. Reardon, last. Time, 2:47.

The fourth race was mile heats, all ages, allowance for beaten horses. In the first heat pools sold, Clara D. \$250, the field \$71. Athelstane and Tom Barlow had a little the best of it at the start. Around the first turn Clara D. and Clarissima went forward. At the half-mile Tom Barlow ran into second place and lapped on Clara D. After a driving finish Clara D. won by a length: Clarissima, third, three lengths away; Amazon, fourth; Athelstane, distanced. Time, 1:49½. In the second heat pools Clara D. brought \$175, the field \$25. Clara D. was never headed, winning by two lengths; Tom Barlow, second, two lengths before Clarissima, third; Amazon, last. Time, 1:48.

TURF AND TRACK.

The July stakes for two-year-olds at Newmarket, England, five furlongs one hundred and thirty-six yards, was won by Macbeth, Fulmen second, and Lyndell third. The maiden plate, two-year-old colts and fillies, five furlongs, was won by Conleur de Rosa, Canon second and Bisserta third. P. Lorillard's Winonah ran.

Mr. P. Lorillard has recently purchased of Messrs. McIntyre & Swiney, of Kentucky, the chestnut colt foaled in 1881 by Wanderer, dam Katie Pearce, by imp. Leamington, out of Stamps, by Lexington. The colt has been named Wonder. This is close inbreeding to strong and swift stock, as Katie Pearce was a good racer, and Wanderer a famous son of Lexington, second almost to none.

The Breeders' Stakes at Monmouth Park, New Jersey, filled well, but not up to expectations, there being a decided falling off when compared with the figures of previous years. In 1881 the stake had 142 nominations, the present year 166; the stake which has just closed (to be run in 1883) has only 110. This is to be regretted, as the Association have gone to great pains to form the best stake ever constructed. The principal entries are G. Lorillard, 13; P. Lorillard, 17; D. D. Withers, 10; L. Stanford, 12; A. Belmont, 5; Dwyer Brothers, 5; Whitten Brothers, 4; R. W. Walden, 6; Prekness Stable, 5; Mr. Kelso and B. G. Thomas, 3 each. This proves that Ex-Governor Stanford is not content with owning the best young trotting stock, but that he will as well enter the lists against all the best Eastern thoroughbreds. We wish him success.

Judge Mee has two promising fillies this summer, both sired by Thad Stevens. The one from Katie Pease is handsome, lusty, and as playful as a kitten, and she promises well. The other is from Mistake—a daughter of Katie Pease sired by Wildidle—and she, being a first and late foal, is delicate, although prettily formed. Katie and her progeny are the pets of the household, and Judge McKinstry, a fine three-year-old, her only son, by Grinstead or Thad Stevens, will at once go into active training for the fall campaign; making his first appearance probably at the Golden Gate Fair. Katie this year was sent to Wheatley who, although a famous son of War Dance, has as yet had but few opportunities at the stud.

In the Brighton Beach stakes at Long Island on the 16th of June, there was a pretty big bid at a brand, Laura Glass being doubly pulled so as to allow her stable companion, Aurelius, to win, he being a rank outsider in the betting. They came in first and second, and were both disqualified, the race being given to Florimel, the third horse. At a recent meeting of the Executive Committee it was resolved that the two jockeys, Brophy and Hughes, be exonerated, as they rode to instructions, that, when examined, they at once disclosed; that Frank McCabe, the trainer of both horses, be censured by the President; that Dominick Colazzi, who named Laura Glass, be suspended for the season; that Wm. Lovell, who entered Aurelius, be expelled, and

that both Laura Glass and Aurelius be ruled off the track. This is a severe and summary punishment that puts an end to the racing career of two useful horses, but such salutary examples are necessary to prevent frauds of a similar description.

From Honolulu we hear that there is a notable increase in the demand for good trotting strains. In a few years King Kalakaua will have some fine young stock from Boswell, by Almont and Triumph, by C. M. Clay, owned by his Majesty. There are also several fine mares there with foals by Patchen, Vernon, King William and Boswell, as also some fine youngsters, the produce of Waterford, Gloster and Basswood. A mare from the Winters' ranch called Rosewood, although she was a failure there, is much thought of by Mr. James Campbell, her present owner. She is now in foal to Gloster, who was sired by Jack Rowatt, a grandson of Lexington, his dam being Lady Fairfield by Bonnie Scotland. This is a rare cross. Mr. H. A. Agnew has also some ten head in his stable, and among them several fast ones. Among the principal ones are mentioned a bay colt by Corbett's Irvington from Lady Hamilton, and another one by Irvington from Kate, a fast pacer; a bay mare, Maude Bowley, and some other good stock.

A telegraphic dispatch tells of a sad occurrence that is said to have taken place at Sheepshead Bay on the 27th of June. It appears that in a private race between two well known sporting gentlemen, one of the horses dropped dead at the conclusion of the contest. An eye-witness of the affair said that Pierre Lorillard and Carroll Livingstone appeared on the track hours before the races on Tuesday morning. Lorillard, who weighs about 240 pounds, was mounted on a magnificent bay; Livingstone, whose weight is some fifteen or twenty pounds less than Lorillard's, rode a smaller bay. The gentlemen bantered each other for a short race, each feeling confident that he could win. A dash of a quarter of a mile was agreed on for a sweepstakes of 25 cents. Starting at the three-quarters pole, just below the turn into the home stretch, Lorillard soon gained the lead, while Livingstone dashed on at his flanks until near the judge's stand, where Lorillard opened a slight gap, winning the race by about a length and a half, in the fast time of 28 seconds. Livingstone's horse carried him a few rods beyond the stand, when he fell and expired, it is supposed from the bursting of a blood-vessel. The racers had been used by the gentlemen as saddle-horses.

Although the grand meetings of the circuits at the East have not yet commenced, it is extraordinary to note the number of horses that are working themselves into a foremost position, as already the following horses have dropped into the 2:30 class during the past year:

Buffalo Girl, b. m., converted pacer, by Pocahontas Boy	2:24
Charley Hood, b. g., by Pearsall	2:29 1/2
Clara M., b. m.	2:29 1/2
Clara Cleveland, ch. m., Fall 1881	2:29 1/2
Commander, b. h., by Blue Bull	2:26 1/4
Cornelia, bl. m.	2:26
Claremont, b. h., by Fred Low	2:29
Dou, gr. g., by Idol (Akers' or Peck's)	2:24 1/2
Douglas, gr. g., by son of Woful, dam by Henry Clay	2:25
Elmer, br. g., by Gooding's Champion	2:26 1/2
Estelle, b. m.	2:26 1/2
Florence M., ch. m., by Blue Bull, dam by Red Buck	2:25 1/2

We append a few of the records that call for special attention:

At Poughkeepsie, on the 27th June, Early Rose won the 2:23 purse, she winning the first, third and fifth heats in 2:22 1/4, 2:22, and 2:23. The second heat was a dead-heat between Early Rose and Tariff in 2:20 1/4, and Pickard won the fourth heat in 2:22 1/4. The three-minute purse was won by Crown Point Maid in three straight heats; time, 2:30 1/4, 2:30 1/2, and 2:30 1/2. On the 28th, George M., in three straight heats, won the 2:23 class. Time, 2:24, 2:26 1/4, 2:27. Frank won the 2:33 class in three straight heats. Time, 2:27, 2:27 1/2, 2:26 1/4.

At Grand Rapids, on the same day, the 2:20 class race, purse \$800, two starters, was won by Annie W., William H. second. Time, 2:27, 2:24 1/2, 2:25 1/4. The free-for-all pacing race, purse \$600, four starters, was won by Bay Billy, Buffalo Girl second, Sweetzer third. Time, 2:23 1/2, 2:23 1/4, 2:24.

On the 15th, Californians will be more directly interested in these events, as at Chicago the State will be well represented.

At the Hillsboro, Oregon, races, on the 3d, the trotting, 2:50 class, was won by Maggie Arnold, Stranger second. Time, 2:39 1/4, 2:39 1/2, 2:37, 2:39, 2:40. The three-quarter dash was won by Jim Merritt, Joe Howell second. Renwick third. Time, 1:17, fastest ever made on the track. On the following day, Collier won the mile and a quarter dash, beating Joe Howell and Trade Dollar, in 2:13 1/4. Pedro won the trotting race, beating Tempest and Maggie Arnold. Best time, 2:33 1/4.

THE CONEY ISLAND RACES.

On Saturday, July 1st, in the one-mile race, Frankie B and Nellie Peyton made a dead heat, Coinage third. Time, 1:44 1/4. Frankie B. and Nellie ran the race off, and the former won by a head. Time, 1:45. In the mile and one-eighth race, Talisman won, Bedouin second, Edwin A. third. Time, 1:57 1/2. A claim of foul against the winner was not allowed. In the seven-furlong race, Carrie B. won, Nonplus second, Tittlebat third. Time, 1:31 1/4. In the mile and one-eighth race, Arsenic won, Marchioness second, Batou Rouge third. Time, 1:57 1/2. In the hurdle race, a mile and a half, King Dutchman won, Harry O. second, Gift third. Time, 2:52 1/2. Doigassial fell.

On the Monday, the seven-eighths mile was won by Laila, Mary Warren second, Belle of the North third. Time, 1:30 1/4. In the three-quarters mile, Prosper won, Ida D.

second, Monk third. Time, 1:16 1/4. In the one-mile, Vanguard won, Bonheur second, L. B. Sprague third. Time, 1:45 1/4. All the horses except Vanguard and Bonheur got off on a false start, and run over the whole course. In the hurdle race, a mile and a quarter, Gift won, Delaware second, Dallgaisan third. Time, 2:24 1/4.

At Coney Island, on the 4th of July, the three-quarters of a mile race, Tittlebat won; Elector second. Time, 1:18. The seven furlongs race Bedouin won; Bridcake second. Time, 1:32. The mile and furlong race Capias won; Oakdale second. Time, 1:58. The mile and a quarter race Brambleton won; Milesia second. Time, 2:16 1/4. The three-quarters of a mile race Owen Bowling won; Mary Warren second. Time, 1:19 1/2. The Independence stakes, steeplechase over the short course, Kittie Clark won; Ike Bonham second. Time, 2:40.

AT MONMOUTH PARK.

At this, the favorite race track of Long Branch, on the 4th of July, the first race, the 1/2-mile race, was won by Barrett easily; Greenland second. Time, 1:56 1/4. The 3/4-mile race Pizarro won; Clonmel second. Time, 1:03 1/4. The Lorillard stakes race, 1 1/2-mile, Runnymede won by a head; Forester second. Time, 2:40. The Shrewsbury handicap, 1 1/4-mile, Glenmore won; Glidelia second. Time, 3:08 1/4. In the auction race, 1 1/2-mile, Mary Anderson and Strathpey ran. The former won. Time, 2:26 1/4. In the race for the Wether cup for gentlemen riders, 3/4-mile, Corsair, ridden by Mr. Holmes, won; Arsenic, Mr. Ward in the saddle, second. Time, 1:19 1/4. The steeplechase, full course, Frank Short won; Bernardine second. Time, 5:30.

On Monday, the five-eighths mile, for two-year-olds, was won by Blackman, Fairfield second, Marc Antony third. Time, 1:04. In the one mile, three-year-olds, Amazon won, Bienheim second, Bouthier third. Time, 1:46 1/4. In the mile and an eighth, Sweet Home won, Warfield second, Duplex third. Time, 1:58. In the mile and three-eighths, Parole won, Hilarity second, Francisco third. Time, 2:26 1/4. In the seven-eighths mile, Little Phil won, Sir Hugh second, Clarence third. Time, 1:28 1/4, the best on record. In the hurdle race, a mile and a quarter, Frank Short won, Bernardine second, Ohio Boy third. Time, 2:24 1/4.

SCENES AT CONEY ISLAND RACES.

"Here's your winners in all the races," are the hopeful words which fall upon the ears of the sports as they flock through the entrance to the course at Sheepshead Bay. An investment of twenty-five cents secures a sealed envelope inclosing a slip of paper on which are the names of the "sure winners." The selections are either based on the betting at Brighton Beach or Hunter's Point the night before, or on the judgment of the enterprising vendor of "tips," which is very probable not a whit better than that of the buyer. One of the slips, bought for curiosity by the writer on Wednesday last, did not bear the name of a single winner. But then that day was declared by veterans to be "one of the worst ever seen on the turf." Last year the sale of selections in envelopes was confined to an individual who had lost a small fortune in backing his selections, and who sought to recover it by selecting for others. In a few cases his judgment was followed in opposition to that of the "knowing ones" with probable result, but as a general rule he did no better than the average sport who follows the favorites. This year his place has been taken by a dozen or more "envelope touts," mostly youths in need of the means of betting.

Two dozen bookmakers all in a row make of the covered platform devoted to betting purposes a perfect pandemonium. Kelly & Bliss own the entire privileges, and sublet them, retaining only the mutual and auction pools and two bookstands. The auction pool is falling more and more into disfavor. Either in the books or mutuals the fraternity can get much more for their money. In a few years the peculiarly American style of betting will have entirely given place to the French and English styles.

How much better are controlled by signs and omens is illustrated by the following narration, made to the reporter the other day:

"I was in the line going up to buy Barrett, intending to put \$20 on him, although I had a strong affection, born of past winnings, for the Julietta colt. The man ahead of me called for two tickets on Barrett, and the absent-minded ticket-seller called out to the marker, 'Withers' colt two.' 'I don't want the colt; I want Barrett,' exclaimed the buyer impatiently, and the mistake was immediately corrected. That incident put nearly \$200 in my pocket, for, impelled by a sudden impulse, I took the rejected tickets and two more, and exchanged them after the race for \$200."

Rev. Justin D. Fulton has been dilating on the growing female appetite for alcoholic liquors. If he were to visit Sheepshead Bay on a race day he might find a subject for another discourse. The women who come down to the sea to "bet their money like little men," are neither few nor far between. From the handful of two years ago they have grown into a very considerable section of the patrons of the course. And their judgment, not by any means based on a knowledge of the horses, is generally better than that of the men. One lady who sat in the immediate vicinity of the reporters on Blue Wednesday last, "picked" four of the five winners, a feat which none of her male friends, judging from their expressions, were able to accomplish.

"If she were playing poker," said one of these gentlemen afterward, "and were to go in on a shutter, she'd draw a house and lot sure."

The female choice is often dictated by the name of the horse or the color of the rider. And the dismay of "old uns" when a winner is thus chosen can be better imagined than described.—*New York Star*.

THE SPRING MEETING OF THE BLOOD HORSE ASSOCIATION.

OFFICIAL REPORT.

The races were held at the Bay District Track. The weather was fine and the attendance fair in numbers, while the track was in fine order, and the time, in many cases, was fast.

First Day, April 25th.

FIRST RACE.—California Stakes for two-year-olds; \$50 each, \$25 forfeit with \$250 added; the second to save stake; a dash of half a mile; 30 subscribers, of whom 18 paid forfeit.

E. J. Baldwin's b c Gano, by Grinstead—Santa Anita; 100 lbs. 1
P. Coutts' b c Panama, by Shannon—Abbie W.; 100 lbs. 2
T. Winters' b f Clara W., by Norfolk—Ballarina; 100 lbs. 3

The following ran unplaced: Put, Robinson's May B., by Shannon—Jessie R.; P. Coutts' Flou-Flou, by Monday—Jennie C.; T. Winters' Lou Spencer, by Norfolk—Ballarina; E. J. Baldwin's Lucky B., by Rutherford—Maggie Emerson; J. B. Chase's Laura, by Shannon—Folly; Palo Alto Stable's ch f Satanela, by Levelev—Frou Frou; W. Boots' ch g Bob Wooding—Lizzie

Marshall; J. B. Haggin's Nubia, by Leinster—Addie A.; and the same owners, Sophia, by Bazaar from Sophia Jamison.

Time, 51 s.

SECOND RACE.—The Coutts' stake for all ages, \$50 each, \$25 forfeit with \$200 added; the second to save stake. A dash of a mile and a quarter free for all.

T. Winters' ch f Atalanta, 3 yrs, by Norfolk—Lady Jane; 97 lbs. 1
Palo Alto Stable's b f Precious, 3 yrs, by Lever—Frolic; 97 lbs. 2
P. J. Shafter's b m Night Hawk, 5 yrs, by Haddington—Napa Queen; 117 lbs. 3

A. J. Stimler's ch g Fred Collier, by Joe Hooker—Puss; and Wm. Boots' ch c Inauguration, ran unplaced, while C. McLaughlin's b h Boots paid forfeit. Time, 2:11.

THIRD RACE.—The Winters Stake, \$100 each and \$25 forfeit with \$5 added; \$150 to the second and the third to save his stake—a dash of one mile and a half for three-year-olds—closed with 18 subscribers, of whom 16 paid forfeit.

T. Winters' b f The Duchess of Norfolk, by Norfolk—Marion; 102 lbs. 1
P. Coutts' br c Forest King, by Monday—Abbie W.; 105 lbs. 2

Time, 2:30 1/4.
FOURTH RACE.—The Coquette Stakes, \$50 each and \$25 forfeit, with \$200 added; the second to save stake. A dash of a mile and an eighth for maiden fillies.

Geo. Hearst's ch f Maria F., by Leinster—Flush; 113 lbs. 1
T. Winters' ch f Hattie B., by Norfolk—Maggie Dale; 113 lbs. 2
J. & H. C. Judson's ch f Lottie J., by Wildidle—Lizzie Brown; 113 lbs. 3

Time, 1:58.
Second Day, April 27th.
FIRST RACE.—The Hearst Stake, \$50 each and \$25 forfeit, with \$150 added; second to save stake. A dash of three quarters of a mile, free for all. Five subscribers, of whom two paid forfeit.

A. G. Wood's ch g Jim Renwick, 4 yrs, by Joe Hooker—Big Gun; 115 lbs. 1
T. Winters' ch f Atalanta, 3 yrs, by Norfolk—Lady Jane; 101 lbs. 2
J. P. Shafter's b m Night Hawk, 5 yrs, by Haddington—Napa Queen; 115 lbs. 3

Time, 1:15.
SECOND RACE.—The Trial Stakes, \$50 each; \$25 forfeit with \$25 added; the second to save his stake. A dash of a mile and five-eighths for maiden three-year-olds, the winner of the Coquette Stakes to carry seven pounds extra. Four subscribers, of whom two paid forfeit.

Geo. Hearst's ch f Maria F., by Leinster—Flush; 120 lbs (incl. 7 lbs extra). 1
T. Winters' ch f Hattie B., by Norfolk—Maggie Dale; 113 lbs. 2

Time, 2:53 1/4.
THIRD RACE.—Selling Purse, \$200; \$50 to second; entrance-fee, 5 per cent., to third; horses entered to be sold at \$1,000, to carry regular weight; 2 lbs allowed off for every \$100 under that valuation; winner to be claimed by any one, and if the sum is in excess of the amount entered, then half the surplus to second, and half to the association. One mile and a furlong. Eight subscribers, of whom two paid forfeit.

Norris Bros' b m Minnie Norris, 4 yrs, entered to be sold for \$400, by Leinster, her dam by Belmont; 101 lbs. 1
J. & H. C. Judson's b g Belshaw, 4 yrs, \$500, by Wildidle—Susie W.; 105 lbs. 2

J. N. Randall's b g Geo. Bender, aged, \$400, sire unknown, his dam Sugar Plum; 107 lbs. 3
P. J. Shafter's b h Haddington, 5 yrs, \$1,000, by imp. Haddington—Lizzie Marshall; 109 lbs; and H. Schwartz's b f Sister to Lottery, 3 yrs, \$500, by Monday, dam Virginia, ran unplaced, and the winner was sold to the Palo Alto Stable for \$550. Time, 1:57.

FOURTH RACE.—The Pacific Cup, a handicap of \$100 each, \$50 forfeit \$20 if declared, with \$1,000 added, of which \$300 to the second, and the third horse to save stake. A dash of two miles and a quarter. Eight subscribers, of whom two declared out and three paid forfeit.

T. Winters' b f The Duchess of Norfolk, 3 yrs, by Norfolk—Marion; 93 lbs. 1
C. McLaughlin's b h Boots, 4 yrs, by imp. Hercules—Emma Barnes; 106 lbs. 2

The Palo Alto Stable's b f Precious, 3 yrs, by Lever—Frolic; 87 lbs. 3
E. J. Baldwin's b m Clara D., aged, by Glenelg—Nun; 120 lbs; and W. Boots' br h Nathan Coombs, aged, by Lodi—Miami; 114 lbs; both declared out.

A. J. Stimler's ch g Fred Collier, 4 yrs, by Joe Hooker—Puss; 112 lbs; T. Winters' ch f Atalanta, 3 yrs, by Norfolk—Lady Jane; 87 lbs; and J. B. Chase's br m Winifred, 4 yrs, by Joe Daniels—Electra; 102 lbs; paid forfeit. Time, 3:53 1/4.

Third Day, April 29th.

FIRST RACE.—The Connor Stake, for two-year-olds; \$50 each, \$25 for fee, with \$250 added; the second to save his stake. A dash of three quarters of a mile. 23 subscribers, of whom 20 paid forfeit. When any California two-year-old in this stake beats the time of Connor, 1:15 1/2 for this distance, then the stake to be named after the colt that beats it. Colts 100 lbs; fillies, 97 lbs.

E. J. Baldwin's b c Gano, by Grinstead—Santa Anita. 1
E. J. Baldwin's Lucky B., by Rutherford—Maggie Emerson. 2
J. B. Haggin's b f Nubia, by Leinster—Addie A. 3

Palo Alto Stable's ch f Satanela, by Levelev—Frou Frou; Palo Alto Stable's ch f, by Wildidle—Kosa; P. Robinson's ch f May B., by Shannon—Jessie R.; P. Coutts' b c Panama, by Shannon—Abbie W.; P. Coutts' bl f Frou Frou, by Monday—Jennie C. ran unplaced. Time, 1:15.

This stake, according to the rules, will be known in the future as the Gano Stake, until under the same conditions the time of 1:15 is surpassed, and then by the name of the two-year-old that beats it.

SECOND RACE.—The Spirit of the Times Stake, \$100 each; \$25 forfeit, with \$300 added; \$150 to the second and the third to save his stake. A dash of a mile and three quarters for three-year-olds. Closed with eighteen subscribers, of whom sixteen paid forfeit.

T. Winters' b f The Duchess of Norfolk, by Norfolk—Marion; 102 lbs. 1
The Palo Alto Stable's b f Precious, by Lever—Frolic; 102 lbs. 2

Time, 3:04.
THIRD RACE.—A Selling Purse of \$200; the second horse to receive \$5 and the entrance, five per cent., to the third. Dash of a mile and a quarter. Horses entered to be sold for \$1,000 to carry entitled weight and two pounds allowed off for each \$100 under the fixed valuation. The winner can be claimed by any one.

J. & H. C. Judson's b g Belshaw, 4 yrs, \$500, by Wildidle—Susie; 105 lbs. 1
J. N. Randall's b g Geo. Bender, aged, \$100, his sire unknown and his dam Sugar Plum; 107 lbs. 2

P. J. Shafter's h h Haddington, 5 yrs, \$1,000, by imp. Haddington—Prairie Flower; 122 lbs. 3
H. Schwartz's b f Sister to Lottery, 3 yrs, \$500, by Monday—Virginia; 87 lbs. 4

Time, 2:13.
FOURTH RACE.—Member's Cup, of \$100 valuation, presented by Theo. Winters, Esq.; to be ridden by members only. A dash of a mile. Entrance ten per cent. to second horse. To carry 160 lbs. Horses must have been used upon the road for saddle or driving purposes up to April 1st.

Isadore Townsend names his b m Mollie H. 1
Dr. Talliaferro names his b g Ebony. 2

In the absence of Mr. Townsend, the race became void on account of the members' clause, but with Mr. Winters' consent the horses were ridden by jockeys, with Mr. Johnson on the winner and Matt Stern on Ebony; the weights being reduced to 140 pounds.

Time, 1:49 1/2.
FIFTH RACE.—The Consolation Purse, \$100; the second horse to receive \$25 and the third \$15; entrance free. One mile.

T. Winters' ch f Hattie B., 3 yrs, by Norfolk—Maggie Dale; 87 lbs. 1
J. N. Randall's b g Geo. Bender, aged, his sire unknown, his dam Sugar Plum; 109 lbs. 2

Time, 1:44.
The Extra Day, May 2d.

FIRST RACE.—The Sequel Stakes, for three-year-olds; \$25 p. p. with \$150 added. A mile and a furlong.

Geo. Hearst's ch f Maria F., by Leinster—Flush; 107 lbs. 1
W. Boots' ch c Inauguration, by Wildidle—Miami; 107 lbs. 2
T. Winters' ch f Hattie B., by Norfolk—Maggie Dale; 107 lbs. 3

Time, 2:00.
SECOND RACE.—The Junior Stakes, for beaten two-year-olds; \$25 p. p. with \$100 added. Five furlongs.

Palo Alto Stable's ch f Satanela, by Levelev—Frou Frou; 107 lbs. 1
J. B. Haggin's b f Nubia, by Leinster—Addie A.; 107 lbs. 2
T. Winters' b f Clara W., by Norfolk—Ballarina; 107 lbs. 3

Time, 1:02 1/2.
THIRD RACE.—A handicap for all ages; \$25 each with \$150 added. A mile and a quarter.

Geo. Hearst's b c The Duke of Monday, 3 yrs, by Monday—Demirep; 110 lbs. 1
J. & H. C. Judson's b g Belshaw, 4 yrs, by Wildidle—Susie W.; 100 lbs. 2
W. Boots' b m Bonnie Jean, 5 yrs, by Hercules—Lizzie Marshall; 93 lbs. 3

Time, 2:11 1/4.
FOURTH RACE.—Purse \$150, for horses that have started and never won. Mile heats.

P. J. Shafter's s in Night Hawk, by imp. Haddington—Napa Queen; 110 lbs. 1
H. Schwartz's b f Sister to Lottery, by Monday—Virginia; 87 lbs. 2

Time, 1:45, 1:46.
JOSEPH CAIRN SIMPSON, Sec'y. THOMAS WINTERS, Pres't.
C. M. CHASE, Assistant Sec'y.

ROWING.

The city regatta at Long Bridge, on Tuesday, was far more successful than there was reason to expect. The prizes were, to use the least offensive word "small." The entries and the attendance were however in the inverse ratio to the trophies, and several of the contests were close enough to be exciting. As usual at rowing matches on our harbor the length of the course was guessed at. No two races were started from the same point in consequence of the wind and tide, so that the time taken was worthless as a test of comparative merit. Even had the course been properly surveyed, the time would have been still valueless, as the timer did his work with an ordinary watch and in such a manner that in two races he was most undoubtedly several minutes wrong. When the glaring error was observed by one of the judges, who is a rowing man, the time was shaved down to reasonable proportions and in its reconstructed form given to the press as an honest record. The management of the regatta was by no means good, but considering that the regatta was only an experiment, it might have been worse. There was no police boat and the course was kept as clear as a lot of boys in small boats chose to make it. Several times when a race was about to be started some pestiferous boat-sailer came booming over the course in his scow or plunger and the oarsmen had to wait until the defiant trespasser had been blown out of the way. The yacht Ariel also contributed to the disadvantages of rowing by anchoring right on the course and allowing her boat to swing out at the stern at the full length of a long rope. Considering that the Ariel is owned by a gentleman who takes a lively interest in aquatic sport, the disposition made of the yacht on this occasion seemed very strange. The only explanation is that Mr. Lloyd was not a party to it, and would have speedily corrected the trouble had he been present. The stiff wind blew across the course all day, and made it impossible to give the competing boats a fair flying start. Had the committee taken the precaution to stretch a line across the course and start the boats from an anchored skiff, the difficulty of sending the competitors off on even terms would have been greatly lessened, and the patience of the spectators would not have been so sorely tried. The honesty and earnestness of the contest compensated however for the shortcomings of the hasty arrangements, and an annual city regatta may now be regarded as a fixture. Every member of the Fourth of July Committee who witnessed the races and observed the large crowd in attendance expressed the belief that the few hundred dollars given in prizes were well spent, and should have been doubled. It would be a good idea to put a premium on promptness in the next regatta by starting all races on time. Let the Committee of arrangements advertise that the races will be started in their regular order, and that ten minutes after each signal gun the men or crews must be on the line. This will prevent the delays that are sure to occur when men know that the race will not be started until they have completed their slow and careful preparations, and pulled up to the line as if time was of no object.

The first event of the regatta was the single scull-race and to oarsmen was one of the most important. The question of superiority among the young scullers has been in dispute for some time, and this was the first occasion on which they all met on very even terms; Griffin, who seems to row under a lucky star, won the choice of positions, and took the sheltered station under the wharf. Watkins was next, with White, Peterson and Sullivan, who always draws the outside position, lying in the stream. The outside stations were about as good as the inner ones, however, as the tide was running in swiftly, and except a strip of lumpy water near the stakeboats, the course was pretty smooth. Griffin and White had the best of the start. White, who rowed a fine boat recently built by Waters & Co., was expected to lead in the first quarter, but Watkins and Peterson held him well, and he passed the cattle wharf without much advantage. The rowing men watched Peterson closely, as it was his *debut* as a sculler in shells, and were not surprised to see him display a great turn of speed. It is very doubtful if his boat was rigged as well as she might be. She seemed a little down at the stern, but despite this disadvantage he sent her flying along at a tremendous pace, with a powerful stroke of thirty to the minute. He rowed with great steadiness, and in view of his great strength, he looked a winner half way to the stakeboat. Meantime Sullivan had steered himself out of the race, and Griffin had gone inshore unobserved and was diligently working his passage through the smooth water. Peterson came toward the stakeboat like a quarter-horse, but the wind had carried him to leeward and he had to turn his boat at right angles and row forty yards toward shore to make the turn. He rowed those forty yards in such a lively manner that he got around first, and started for home with enough in hand to make him a winner by two hundred yards if he had been pushed. The race for second place fully demonstrated the abilities of White, Watkins and Griffin. White turned better than Watkins, and Griffin got around a few moments after. Coming home, Griffin steadily forged ahead, and half way to the wharf the three boats were in line once more. It then became a question of stamina, and White let go suddenly. Watkins and Griffin continued the battle to the very end. On the last hundred yards Watkins made a desperate effort to get to the front, but Griffin held him and finished a clear length ahead and in good fix for another mile. The race demonstrated the fact that Peterson was by all odds the best sculler on the bay at present, while Griffin possesses abilities far higher than he has been accredited with. He rows in good form and improves over a long distance. Watkins had the advantage of him a boat's length and should have beaten him. White was the best boated man in the race, but his hard

style of rowing proved too much for his condition when he had men alongside who could make the pace and keep it. In smooth water he may have done better, but nobody but Peterson could have won. Peterson is little more than a boy, though a giant in size, standing nearly six feet and weighing 185 pounds in his boat. He has been almost raised on the water. Griffin is the lightest sculler on the bay, weighing 135 pounds, but hard as a rock and full of pluck.

The four oar shell race, which ought to have been the best contest of the day, was a very miserable exhibition. The Pioneer crew rowed a fine paper boat, while the Ariel and South End crews used a couple of old wooden shells nearly a minute slower. The race was not rowed until the afternoon, by which time the wind was very strong. When the word was given, the Ariels, who had the middle station, struck off evenly and headed straight for the stake-boat. The Pioneers, who had the outside, rushed inshore, and the stroke side being evidently stronger than the bow, they ran up straight in the wind and fouled the South End boat. The foul was most unmistakably accidental. For a moment both crews stopped rowing, and then the Pioneers turned back and went for their stake-boat, and the South Enders followed rowing very badly, and evidently having all they could do to manage their boat in the rough water. The Pioneers did not do the liveliest rowing in the world, but the excellence of their boat helped them along, and they got to the stake-boat close behind the Ariels. The latter made a bad turn, but the Pioneers got around in good style and started for home with the race in hand. Towards the finish they nearly ran into the yacht Ariel and lost so much way that the Ariel crew went by and gained a length. The race then became exciting. The Pioneers, by a spurt, got ahead of the Ariels once more, but the effort had taken so much out of them that they began to fall away and finally crossed the line with only a few feet to spare. It looked as if in another hundred yards they would have been beaten, and only for the superiority of their boat that result should have certainly followed their bad steering. After their hard race, however, they deserved the prize, but the referee disqualified them, although the South Enders waived all claims to the money and declined to enter a protest. Considering the manner in which the regatta was conducted, this interpretation of the rules was very severe and hardly fair. In any event, the South Enders could not have won, and the foul did not interfere with the Ariels, who were beaten on their merits. Under the circumstances the Pioneers should have had the race, but the referee was probably disposed to hold them to strict account, as a moment before the start he warned White to avoid a foul, and was promised that nothing of the kind should occur.

The amateur wherry race for a cup presented by Colonel Andrews was a tame affair, owing to the inability of Mr. Haughey to sit his boat properly on the rough water. H. W. Tuckey, the other contestant, rowed a weak stroke throughout, and won by half a mile. Both gentlemen were of the Triton Club. The professional wherry race which followed was even more ridiculous than the amateur contest. The entries were Thomas Murphy and R. C. Lyne, of the Pioneer Club, and B. Kehrlein, of the Triton Club. Murphy and Lyne, after carefully considering the matter, arrived at the conclusion that the race lay between them, and accordingly did nothing but watch each other from the start. The result was that while Kehrlein was steadily pulling up the course towards his stake-boat, Lyne and Murphy were going at a terrific pace towards the scene of the literary exercises on Mission street. But for the frantic shouts of Mike Price, whose new boat Lyne was rowing, the determined rivals would have knocked a hole in the Point of Rocks, but seeing this obstacle at the last moment, they veered off sixteen points, and began to look for the stake-boats. By this time Mr. Kehrlein was turning homeward. He finally reached the post without mishap or fatigue, and took first money, much to the disgust of the veterans, who had already pocketed the purse in their minds. Murphy, after a hard tussle with his old wherry, which looked like a monitor beside the racing craft of his antagonists, gave up the struggle, and when last seen was dancing over the white caps in the direction of San Jose.

The four-oar lapstreak race between the Golden Gate and Ariel crews was a tame affair, and was won easily by the Golden Gate men. The Stroke of the Ariels had much to do with their defeat, as he has a bad habit of gluing his knees together and swinging diagonally across the boat instead of fore and aft. Besides, he pulls too low a stroke for a racing four. They ought to have beaten the Golden Gates, for their rowing was not beautiful. The most praiseworthy exhibition of the day in crew rowing was given by the new South End crew, in the Senior barge race, in which two crews from the Ariel Club also entered. The South End men are the most taking four that have appeared this year on the water, and ought to have the championship within their grasp. They are a very powerful four, and row with a dash that is particularly attractive after one has watched the listless exhibition of some of the other crews. They rowed right away from the others. In the Junior barge race, the Dolphins won easily. It is hardly creditable for such a heavy crew as the Dolphin four to be always ambitious of "Junior" honors. They are heavy enough and have practice enough to row in any company.

The Whitehall boat race demonstrated how easily Smith and Watkins could row away from professional Whitehall boatmen.

The Ariel lads row very evenly together, and not having the "kink" in their arms that Whitehall pullers think is indispensable, get up a fine pace without much labor. Their new boat, which was built for the race next Sunday, seems light, and draws little water, but she has a great deal of side, and will be a heavy load when the wind bears on her amidships. She was built by Twigg, and as far as workmanship goes, is a creditable production.

The disadvantage of the constant and almost unvaried practice in heavy boats is the carelessness in style which many of the crews acquire. When four strong men pull in a heavy barge with some regard for time but none for any other essential, the boat is sure to make fair headway. The oarsmen, however, are the very opposite. Their good qualities experience no development, while their bad points grow with discouraging rapidity. This fact was particularly noticeable from Long Bridge the other night, when several crews were practicing for the regatta on the Fourth. There was not of the entire lot a single "four" that would have passed muster in a first class crew. Not that there were no first class men in the crews. On the contrary, the material seemed of a good quality, but the method of its preparation had evidently been very hasty and ill-judged. The men

seemed to have been thrown together without regard to their peculiarities or those of their boats. Some men were sliding short and others were using twenty-four inches of slide at every stroke. In one boat the bow-oar was swinging back until his head threatened to knock a hole through the deck while the after waist was trying to butt the stroke oar every time he slid up for the stroke. The complete and lamentable absence of coaching was very vigorously exemplified, and must have been a sorry spectacle for the experienced captains of several clubs, who looked on in gloomy silence. Judging by what can be seen from Long Bridge any evening, there is no danger of the records being broken at the regatta on the Fourth, and it would be a gross misrepresentation of facts to assert that there is a really formidable four on the bay at present. That out of several of the clubs a first class crew could easily be got is plain enough, but, owing either to the disinclination of the proper men to sit together, or their aversion to reasonable practice and training, they have not so far organized and shown themselves on the water.

THE CITY'S REGATTA.

The contestants and result of the Fourth of July regatta at Long Bridge were as follows:

Single scull race—H. Peterson, G. G. R. C., 1 by ten lengths; D. Griffin, G. G. R. C., 2; Sam Watkins, A. R. C., 3; L. C. White, P. R. C., 4; J. Sullivan, P. R. C., 0.

Four-oar shell race—Pioneer crew, L. C. White, R. Crowley, R. Lyne, J. Sullivan, 1; Ariel crew, Sam Watkins, Oscar Branch, Alfred Branch, Fred. Smith, 2; South End crew, J. Dougherty, J. Daly, I. Cleary, Fred. Smith, 0.

Amateur wherry—H. Tuckey, Triton B. C., 1 by half a mile; J. Haughey, 2.

Professional wherry—Ben. Kehrlein, Triton B. C., 1 by six lengths; R. C. Lyne, P. R. C., 2; Tom Murphy, P. R. C., 0.

Four-oar lapstreak—Golden Gate crew, D. Griffin, J. D. Griffin, P. Connors, John Walthorn, 1 by five lengths; Ariel crew, W. Well, Jeff. Blake, Ben. Smith, Thomas Maher, 2.

First-class barge race—South End crew, W. Thomas, J. Wilder, S. Duplessa, M. O'Neil, 1 by five lengths; Ariel crew, Sam Watkins, Alf Branch, Oscar Branch, Fred. Smith, 2; Ariel crew, Jas. Ward, W. Welch, R. Ranton, Jos. Cochran, 3.

Second class barge race—Dolphin crew, T. T. Frazer, G. Van Graw, F. Moss, E. Peterson, 1 by three lengths; South End crew, D. Dougherty, E. Quigley, W. Turner, J. J. Barrett, 2; Golden Gate crew, John Flynn, Wm. Smith, John Lamb, Dan. Griffin, 3.

Whitehall double scull—Sam. Watkins and Fred. Smith, 1; John Engels and Wm. Pinkney, 2.

Referee—Chas. G. Yale. Judges—Captain C. L. Dingley, Captain C. Nelson, Mr. Pierce.

Stevenson, of the Ariel Club, and Flynn of the Pioneer Club, will row over the Long Bridge two-mile course on Sunday, the 16th, for \$200. Each man backs himself and the race is play or pay. The only proviso is smooth water, which Stevenson demands. The Pioneer man would rather have it a little rough.

Last week the Neptune Swimming and Rowing Club elected the following officers to serve for the ensuing year: President, A. E. McDowell; Vice-President, J. W. F. Peat; Secretary and Treasurer, L. Osborne; Captain C. Pennell, R. B. Cunningham and N. J. Smith, Directors.

The performance of Peterson on Tuesday last led to speculations on his ability to row Austin Stevenson, and it would not be surprising if a match should result. The Long Bridge lad seems to have more pace than the Vallejoite, but whether he can stay the distance is to be yet demonstrated.

The Hillsdale crew have entered for the race for the senior fours in the Marlow regatta. Only two local crews—the Cookham and Marlow—have entered against them. The course is one mile long and is rowed down stream.

A match between Watkins and Griffin is talked of, but no money is up so far. Over a three-mile course Griffin will make it very interesting for the Ariel man, if properly boated.

YACHTING.

SIGNALS AND PENNANTS.—The by-laws of the N. Y. Y. C. have been changed to read as follows: "The distinguishing signal of the club shall be a pointed flag; the device a white five-pointed star in the centre of two red stripes, they being in width one-fifth of that of the signal, one running lengthwise through it in the middle, the other running crosswise through it at one-third the length of the signal from its head, all on a blue field. Each yacht shall have a distinguishing signal flag and shall show it when signalled by another yacht. The Commodore shall display a broad pennant, with a foul anchor encircled by thirteen five-pointed stars in white on a blue field; the Vice-Commodore, a broad pennant with a similar device on a red field; the Rear Commodore, a broad pennant with a similar device in red on a white field. The Acting Commodore, under chapter 10, shall display a broad pennant, blue field, without device. These pennants shall be burgees—viz., tapering, swallow-tailed flags. All the foregoing mentioned flags shall be, in length, one-half of one inch for each foot of height of truck from the water, and, in width, two-thirds the length. Each yacht shall also have a blue pennant—in length, at the head, three-quarters of one inch to the foot, as aforesaid; in width, one-tenth the length; to be used as a day or night pennant. Each yacht shall have a set of signal flags, such as may be ordered by the club, to be not less than four feet long. Single masted yachts, while cruising in squadron, shall display their private signal when under sail and the club flag when at anchor."

NEW YORK MEASUREMENT.—In the New York Yacht Club the rule of measurement for time allowances has been changed as follows: The actual load water line of each yacht shall be divided into four equal parts and a section taken at each point of division, making five sections. The area in square feet of each section shall be taken as follows: From the bottom of keel to a line which is three per cent. of the length of the load water line, as above, and parallel with it. In case the plank sheer at any section or sections be below this predetermined line the actual height

SAN FRANCISCO, - - SATURDAY, JULY 8, 1882

CONGRATULATORY.

Every mail brings us something which is worthy of record, only that it may be considered too eulogistic. In some of the letters it would be "We like the looks of the paper, and it seems as though California had a paper of which Californians need not be ashamed." In another we like the "Greetings," and your idea of "editorial duties" meets our approbation. We are glad to hear the indorsements and hope to continue to merit the good wishes. We shall certainly do our best to be worthy of the encomiums and shall endeavor to continue to be worthy of the credit. The turf journalist has a task before him which is anything but easy. There are errors to correct, abuses to remedy. There are unpleasant tasks which cannot be shirked, and duties which must be performed. Yet there are many things to commend and these we take pleasure in noting. Being much in this branch of journalism gives us pleasure, and to record the breeding of a performer which has become distinguished is a joy. There are lessons to be learned from pedigrees, and the genealogy of a winner is instructive to those who make a study of lines. The winner gives a clue to the future winners, and the strains in his pedigree are a source of information. All this is a pleasant part of the journalism of the turf. To write of lines which have proven victorious, to delineate the genealogical tree, the branches of which are marked with names which are renowned in hippic animals is a pleasant interlude. But to censure, to find fault, to castigate, easy as it may appear, always brings sorrow, and we wish that there was only a bright side to picture. To bring out the sunny side it may be necessary to show the darker, and in the portrayal of that which is faulty there may be an opportunity to gild the sombre edge. This is the side of the picture we would fain look at. We have always the desire to put glowing colors on the canvas, and if it rests with us there always will be a brilliant daub of color. It may be a daub, the red shawl on the dark-eyed gypsey, and yet there is life in the coloring, and something to relieve the monotony of every day life. And thus we feel pleasure in the congratulations we have noted, and will endeavor to merit the continuance of the good wishes.

WASTING TIME.

Why it should be considered as a neglect of manners because one manifests an interest in some of the out-door sports, is to us inexplicable. As "self-preservation is the first law of Nature," the young man who neglects his physical welfare does not obey this law. If he holds his nose so close to the grindstone that he gradually wears it and himself away, there are more noses and more grindstones, but his personality is no longer interested. The great system of modern civilization is grand in the extreme, but is apt to be rather rough on the individual; and the man who allows himself passively to be crushed beneath the ever-moving Juggernaut wheels of "business," receives no pity, even from those whose influence causes the sacrifice.

We all need rest; we all need change; we all need recreation. The employer, who is getting rich, does not seem to care for a change. He wants

to keep right on. But the man who does the work and isn't getting rich, does need the change and ought to have it.

But if a young man happens to have a hobby, such as shooting, fishing, rowing, sailing, bicycling, or any other out-door sport, he has, in most places here, to keep the liking hidden like a skeleton in a closet. It does not behoove him to say much about it or to let much be known about it. He must keep it dark the same as he would if he gambled or did any other disreputable thing.

This is not as it should be by any manner of means. The young men should be encouraged to take up some manly pastime and follow it. The employers can exercise a wholesome restraint which will prevent any undue allegiance to it; but they need not frown down everything connected with man's hobby.

Some men are fond of music, some of gardening, some of taking care of chickens, some run to secret societies and others to church festivals and the like; all of which are very good in their way. And none of these can any objection be made. But let a man want to handle an oar, rod or gun, take a tiller or the lines, and an outcry is raised that he is wasting his time and endangering his business prospects.

The writer knows of men who are ardent lovers of these sports but never let themselves think of them for fear of the displeasure of their employers; who forego these pleasures and lead humdrum lives of changeless rounds because some tyrannical employer, too fat or lazy to take exercise, too old to enjoy pleasure, and too rich to afford to spend money for amusement, decrees that all persons who are under him shall "stick to business."

We have no patience with the utter selfishness that condemns men to treat their employees in his way. Time spent in health-giving recreation is time well spent. The pecuniary feature of our short lives is prominent enough at all times, but ought not to stand in the way of everything.

Men who waste their employers' time are to be blamed of course. But they are to blame, too, if they waste their own time by passing through life without an effort to enjoy themselves in some rational manner when and how they can.

THE DOG.

One of the aims of the BREEDER is to popularize the breeding and breaking of well-bred dogs for use in the hunting field. While we admire the points of a well-bred bull terrier or bull dog, we are among those who hold the opinion that man's best friend among the animals can be put to a better use than by affording the means to carry out the brutal and degrading sports of the dog pit and the rat pit. For this reason the doings of dog fighters will find no space in these columns. This exclusion may give offense to a few, but we beg them to remember that dog fighting and rat killing are not now considered gentlemanly sports, and while we presume to dictate to no man as to what course of conduct he shall pursue, yet we hold it our right and province to condemn the acts of those who set at defiance the laws passed for the protection of the brute creation. A celebrated writer has said that the finest sight in the world is a beautiful girl seated on a thoroughbred horse. To our mind, an equally fine sight is a trace of fine setters or pointers quartering their ground or standing their game. Another right that ranks in point of beauty with either is a pair of fleet greyhounds just slipped after a hare. Yet another fine sight is a pack of fox or buck hounds on a hot scent or in view of their game, and none of these glorious visions of animal beauty take precedence of the handsome appearance presented by a noble St. Bernard or Newfoundland dog taking charge of its master's children. But few artists have ever lived who were able to do even common justice to any of these charming illustrations of the beauty of canine life, and the greatest of them all, Sir Edwin Landseer, made a sad and irreparable blunder. In attempting to delineate the perfect Newfoundland, he produced a halfbred animal which, though noble enough in appearance as a dog, was a perfect

failure as a Newfoundland, and would not claim a second glance in a bench show. The general public can learn much about the kennel, and as yet the art of breaking dogs is not an exact science. New ideas and new rules will be spoken of in the BREEDER as fast as they come up, and it will ever be our pleasure to cater to the special demands of our friends in these matters. Dog thieves and dog poisoners will find the BREEDER their unrelenting foe, as will also those scoundrels who impose worthless dogs at high prices upon credulous and unsuspecting purchasers. We shall always be ready and willing to advise our readers as far as possible in all matters pertaining to the breeding, rearing, purchase and cure of man's best friend, the dog.

FISH AND GAME.

It is a common saying among yachtmen that "boat builders do not know anything about boats," because, as a general rule, they do not sail them, and the improvements come from the users and not the constructors. We have all of us, no doubt, had experience of the fact that many people who hire out as cooks know nothing about cookery; and that the average servant whose mission in life is to keep house, and who makes a living by it, knows nothing about housekeeping.

These apparent contradictions are not confined to the walks in life in which professionals are concerned, by any means, nor to any class of persons, or any branch of business; and, to tell the truth, it would be hard to find a class where a more evident illustration can be shown than among lovers of the rod and gun.

How many fishermen know anything about fish? How many hunters know anything about game? They know where to catch the fish and how to do it. They know where to hunt for game and how to shoot it. That is, some of them do. They pick up just enough knowledge about the habits of game as is useful to them in hunting it. About the families, varieties, species, history, habits, etc., they know nothing. As to the structure of a fish, bird, or animal, not one sportsman in a hundred knows a single thing. They can tell a fish which has a good, tender and juicy taste; but can not always tell this. Sturgeon disguised as tenderloin of sole, or as baked sea-bass, or any one of the many things that much maligned but useful fish is made to do duty for, will continue to fool people for years to come. Mighty few can distinguish the species of trout. They can not tell the *salmo iridea* from the *salmo fontinalis*, unless some one says the stream has been stocked with Eastern trout. Whether the *salmo purpuratus* is any relation to the *salvelinus malma* is to them a profound mystery. And they can not tell which of these scientific names means in the vernacular rainbow trout, salmon trout, brook trout, lake trout, silver trout, black trout, red-spotted trout, Dolly Varden trout, bull trout, or any other trout.

They can tell quail when they see it in the market with its feathers on, or, when broiled, it reclines on its native toast, because, then the toast is what prospectors call an "indication."

As to ducks—those universally hunted birds—every sportsman considers himself an expert. Yet, as little is known about them as can possibly be. Every hunter thinks he knows their habitat better than any other. Pin him down to facts and details, and he will tell you how they hover over the marshes up at Teal Station, in the "String Ponds," at the Hard Ground Club rendezvous, at Mayberry Slough, at Boulder Island, or in the Sherman Island tules, which are protected by the ægis of the Tule Belle Club; or else he will refer to the Alvarado Creeks, where the Pelican Club used to reverse the ancient legend of that capaciously throated and pocketed bird by the older ones "drawing blood" from the younger by means of poker, and where pot-hunters always found markets for their game on Sunday afternoons, when the Club returned home after its all-night work. This is the idea of habitat in the mind of the average hunter—strictly local in its character; and as to distinguishing species, all the knowledge of the

combined sporting clubs of this coast would not be sufficient to judicially decide the difference between blue-winged teal and cinnamon teal; whether they are the same or different species; or one or the other the male or female of the same species. In fact, we do not believe there is one sportsman in a hundred who knows whether a duck is of the family *Anatidae* and order *Anseres*, or of the order *Anseres* and family *Anatidae*, or which of the sub-families, *Anatinae* and *Fuligulinae* is the fresh water and which the sea duck. There are very few of them who know whether *Anas boschas* is a common domestic, or a wild canvas-back duck. Some of them even make the mistake of confounding the species in practice, when game is scarce and the man not around.

Some hunters have even doubled their stock of natural history knowledge since the invention of the "clay pigeon," by learning to distinguish the live pigeon from that one, and finding that a new species is added to the genus *Columba*.

It is by no means to be inferred from these remarks that we consider it necessary for a hunter or fisherman to be a scientist as well. But we feel assured that the additional pleasure which will be derived from at least a slight knowledge of natural history will repay any sportsman who gives it slight attention. All prominent sporting papers now give space to natural history items, and the BREEDER AND SPORTSMAN intends following the excellent example. Without having a special department for this purpose, we intend giving, from week to week, such items of general interest concerning natural history as will, we hope, lead our readers to pursue the subject further.

CORRESPONDENCE.

There was some fault in the mails, and many of our letters came as the printer insisted on locking the forms up. Fortunately they were of a kind which will keep, and so the next week's issue will contain them. Then there came from Highland Springs an account of the first deer hunt of the season; and within a few minutes thereafter a letter from Hanford. We can scarcely find words to express the obligations we are under to "Our Correspondents." And we have not the least hesitation in stating that in this foremost essential the BREEDER AND SPORTSMAN will not be second in the race to any paper. In fact, it brings to our remembrance the histories of the long past many years ago, so many that we will have to acknowledge more seasons passed than an observer—that is, a casual one—would credit; and we place the contributors the equal of those who made the old *Spirit of the Times* so readable in its palmiest days. This will be granted when both numbers are looked over, and then the next will clinch the argument. We state, without fear of contradiction, that the BREEDER AND SPORTSMAN starts out with a more brilliant corps of correspondents than any paper in the United States, and this we hold to be the main feature.

Again we say that our correspondents are the chief upholders of the paper, and with their aid we have no fears of ultimate success.

THE EMBRYO STAKE.

The advertisement of this stake appears in the appropriate column. Heretofore it has closed on the 1st of March, at which time many of the foals were not dropped. This season it was thought best to postpone until the first of August in order that those who desired to make nominations could see how the foals looked before entering into the engagement. We cannot agree with our correspondent that it should be passed over or that any should be barred from participating. While it is true that there was a general scare when the Palo Alto and Sunny Slope colts made such a terrible break in the records, there is now a disposition to keep trying, in hopes that others may have the same good fortune.

Then the Pacific Breeders' Association can scarcely take upon itself to say that the stock of all the other breeders are inferior, and always will be,

to those of these two celebrated breeding farms. The Embryo gives the opportunity of making engagements at a very small cost, and the engagement encourages training. The training gives purchasers a line to base a valuation upon, and those which are, perhaps, several grades below first-class bear a greatly enhanced value over what it would have been if they had not been educated

THAT CHALLENGE.

In racing parlance, challenges are always in order, from the time of the Crusaders when the courtly knight was ever ready to break a lance on his Flemish or Spanish charger; or when the first noblemen in England would test the power of their best strains of thoroughbreds by challenging for the Whip with a hogshead of claret to the winner over the Beacon course; or among our sporting and financial magnates who shall possess the King or Queen of the turf. Imbued with a stimilar spirit, Mr. M. W. Hicks enters the trotting arena with a challenge to be found in another column. There is evidently somewhat of the character of Faulconbridge in Mr. Hicks' personality. He does not soften his phrases. "Soft" to his idea is euphonious, but has not the power or expression of "duffer." Messrs. Haggin and Tevis may accept the conditions, but there is one of them to which many objections may be urged, and we deem that the gentleman has gone rather beyond the bounds of discretion in his stipulation of mile and repeat in the yearling form. A mile dash is surely sufficient to test speed and endurance at so tender an age.

SACRAMENTO LETTER.

DEAR SIMPSON: Admiration and Respect—"These are my sentiments," which expressed at the present time not only denote their usual definition, but may be used in the sense of Dryden and our old friend Shok—namely: "Your boldness I with admiration see," and "In one respect I'll assist thee." Therefore you will find my name with the usual fee in the hands of your gentlemanly solicitor. I made an ineffectual attempt to have something ready for your introductory number, but owing to a pressure of business in another direction I did not complete it in time; and then again I do not know but I had rather write after having seen the make-up of your excellent paper. I am more than surprised at its neat and dressy form. I received it Saturday night, took it home, and exhibited it to the family first, who likewise admired the "make-up." I remarked to my wife that the first thing we would read was the "Greeting." So I read it aloud to her, after which she casually remarked, "Why, he writes like a young man who intends to settle here and grow up with the country." I explained that she hit it exactly, that the writer was young in every way except that of experience with topics of this character, and that in almost every paragraph written in that salutation he had received a schooling upon the subject, which fact should be readily recognized by all interested in the innocent sports that make up a holiday; and give recreation to both brain and mind that should be indulged in by those who think of it the least, but could be induced by the perusal of a journal of this character, conducted in such a manner as to be independent of politics and interests outside of its line of policy set forth in the beginning, and to which it must adhere.

Healthful sports and good morals have a relation which could be intermingled with society had we at all times the proper devotees of them. But when morality is completely frowned down by the intrusion of brutal performances, by many called Sport, then recreative and innocent sports, of which we are all, individually and collectively, more or less fond of, falls with it. The association of immoral practices with that of innocent amusement should be discountenanced by journals of this character, of which I have no fear in your case. There is no doubt but what your list of subscribers in Sacramento will be large, as the citizens of this city are noted for their liberality, and contribute handsomely, whether for charitable, religious, political or sporting occurrences. For instance: The Capital Turf Club of this city concluded to give a spring meeting. Their funds were low, and a soliciting committee was appointed. They started out, and in three days had the magnificent sum of \$1,300 subscribed. Upon their heels came the Fourth of July Committee, who succeeded in raising, in about the same time, about \$3,000. Thus you will see that our city gave for sport and recreation alone \$4,300 in less than two weeks. We had our Spring meeting, which, in every particular, was a success. This club is now upon a substantial footing, and will, during each succeeding year, give their Spring meet, which will, in all probability, follow the blood-horse meeting. So we will be enabled to have two meetings each Spring, the value of which will be recognized by the breeders who desire to "repeat" the colts that did not suit them in their

first run. The indications for a lively Fall meeting clear through the circuit are good, both for running and trotting. It is rumored that many of the horses that took part in the races this Spring at Salt Lake will come to this coast, as the season will be too short for them to go East. George Hearst's stable will return from there this week, to which has been made an addition of one or two good ones. He will be a formidable competitor for all this Fall.

There is a general dissatisfaction at the result of the Chicago races respecting the performances of California horses, which we know were better than many who won when they left here. But, as I have often remarked, the only way to properly compete with the Eastern horses is to go there in the Fall and train with them in the mud. Trained as they are upon spring-board tracks, where the rebound exhilarates instead of deadening, is the greatest drawback we have in competing with them. When our horses strike the Eastern tracks in the midst of a thunder shower, which keeps up for two or three weeks, and undertake to work on a track that is almost impossible for a man to run on, it is not to be supposed that we can win. This kind of a track will make a horse leg-weary before he has attempted to exert himself in the way of speed. The Duchess of Norfolk we know to be a fast and game filly. We know she has run in her trials barefooted almost a minute faster than she ran the two miles at Chicago—with more weight up too. We know that she is a mare that runs altogether on her courage, and never was hit with whip or spur up to the day she left. Her defeat at Chicago at the Derby must be attributed to weather and track—not that we are trying to explain away our defeat, but to show those who are always ready to ridicule our Eastern attempts that it is the fault of those having them in charge, and not our breeding; not but what they believed they were doing right, but they erred in their judgment. Gentlemen, you must Winter there before you can come to the post in condition such as is needed in that climate. But I would advise the losers to stand by the little mare, as she will pull them all out when they least expect.

Word has been received here that Mr. Thomas Delaney has accepted a proposition made by Mr. Jack Gilmer to take charge of his stable, and that he will be with us this Fall with a string of fast ones. Munro Johnson is coming for the Duke of Norfolk, Atlanta, Clara W., a yearling and two year-old from Mattie A., and the little Prince of Norfolk, a full brother to the Duke and Duchess. Mr. Winters wants them all to look out, for he is still coming. Willis Hull is working up Mr. Pritchard's stable, eight in number, at the head of which stands Frank Rhoads, the handsomest Leinster get; also the Leinster filly that won the five-eighths at Oakland last Spring. She is a very promising filly, and in the Breeders stake at the State Fair she will start with the Duchess, Maria F., Duke of Monday, Judge McKiustry, Precious and Idler. The distance is one mile and a half, and the pace, I imagine, will be faster than we have ever seen on this Coast—each will make the other run to win it. No canter nor hands down in that field will win. Frank Duppister is working up his stable with the intention of being first at the finish in more than one race. He has Schwartz's Lottery filly, Robson's May D., and one or two green ones. Miller is working up old Boots, with his eye on the \$1,000—that will be in the Post stake of three miles this Fall. He is also keying up the Monday filly, sister to Douglass, who is liable to carry off the two-year-old stakes. Charley Shear says he has a lot of trotters, mostly colts, about his age that he intends to land in first-class order. He says he has one for every class clear through the circuit. Being that he is the only one of the old guard left, he intends to make reparation for all their follies and go to the front every time. He says there is no money in being a good second. He must and will be first.

The sorrel horse Thump Winston, formerly Kent, is showing up better than ever; he is likely to be troublesome in both the twenty-five and thirty class this Fall. McIntyre is working Reavis' stable of Blackbirds and promises to be ready when the bell taps. Wilbur Smith has been driving Clairmount and Adalia double, having in view probably the capture of the double-team prize. Dr. Hicks, Valensin Cochran, Jim McDonald and other suburban stables are quietly at work sharpening up and feeling of their respective favorites. The report from all is—good as could be expected. Another breeder of some magnitude has sprung up in our midst in the person of the genial Col. J. McNassar, ably assisted by his son, John H.

They have purchased the Kleinhaus place, about five miles down the river. It contains about 650 acres of good bottom land. Besides the usual amount of hay and grain, they intend to raise a few trotters. To commence with, they have sixteen as fine looking brood mares as the next man; in size they range from 15-3 to 16 hands; in weight from 900 to 1,200 lbs.—well-bred, rangy-looking mares. At the head of these stand Ensign, a beautiful chestnut stallion, about 15-3 hands, well proportioned and speedy. He is by Gold Dnst. Next to him is Silver Cliff, who is by Lexington Gold Lnst. This stud of horses were brought to this country by the Colonel, from Colorado.

His pride and his joy, Bob Newton, met with a mishap while en route, which resulted in his death, by which we lost a valuable acquisition to our trotters of this State. His private record was 2:16½, made over the figure 8 track at Peoria, Ill., previous to which he trotted the fifth heat in 2:24½, making the last half in 1:05, after which the Colonel sold him for \$16,000 and repurchased shortly after for about the same amount. His loss is irreparable to the Colonel, but he says he has some coming that wont be very slow.

We hail his appearance in the Breeder's circle; in his case as with many others, it is done for the sport and love he has for the Turf, more than for the pecuniary returns, which are of slow growth. But then, here I should be stopped, as my letter is fast assuming proportions entirely inadequate to your liberality of space. Wishing you any amount of success in your new enterprise, and that admiration and respect will be rendered by all,

I remain, sincerely your friend,

MILE-AND-A-QUARTER.

SACRAMENTO, July 6, 1882.

THE KENNEL.

FIXTURES.

BENCH SHOWS.—Western Pennsylvania Society's English Setter Bench Show Derby, Pittsburgh, Pa., for English setter puppies whelped on or after March 1, 1882. Entries closed December 1, 1882. I. R. Stayton, Allegheny City, Pa., secretary.

FIELD TRIALS.—National American Kennel Club's trials on prairie chickens, Fairmont, Minn., September 4. Entries to American Field Derby closed July 1; to All-Age Stake, September 4. Joseph H. Dew, Columbia, Tenn., special secretary for these trials.

Gilroy Rod and Gun Club's trials on quails, near Gilroy, Cal., October 23. Open to dogs owned in California, Oregon, Nevada and Arizona. E. Leavesley, secretary, Gilroy, Cal.

Eastern Field Trials Club's trials on quails, near High Point, N. C., November 17. Entries to Derby close July 1; to All-Age and Members' Stake, November 1. Fred N. Hall, secretary, P. O. Box 884, New York.

National American Kennel Club's trials on quails, Grand Junction, Tenn., December 4. D. Bryson, Memphis, Tenn. secretary.

SUNDAY'S RABBIT KILLING.

The time has come for the sporting press of America to point out to the public, in the plainest possible language, the difference between real sport and the so-called sporting exhibitions gotten up for gate money. Speculators, who, without any knowledge of the sport which they pretend to illustrate, make of it, by their burlesque travesties, a bye word and a reproach. While the true sportsmen are laboring hard to popularize their favorite amusements, these speculators in the art of humbuggery cause hundreds of people, who do not know what true sport really is, to class it with the miserable gate money affairs presented to their notice by the speculators. The sporting papers which announce themselves as gentlemen's papers, devoted to the interests of manly and respectable sport, are false to the cause they claim to represent, and recreant to their trust, when they fail to show up in their true light all performances and exhibitions given under the name of sport, and which are liable to bring discredit upon an honorable and respectable amusement. A full knowledge of this moral responsibility and obligation, called forth in these columns last week an exposure of the hollow and fraudulent pretenses of the so-called coursing tournament given under the auspices of the Occidental Coursing Association. Strangely enough, the BREEDER AND SPORTSMAN was the only one of the many papers published in San Francisco which did not maintain a financially discreet silence about that tournament, or else beslave it with fulsome and unwarranted flattery.

One paper said that the trapped hares procured by Mr. Levy were in fine condition, and that splendid sport was anticipated. Another said that the tournament afforded a splendid chance for the general public to witness the noble sport of coursing almost at their very doors; and so on and so on through an endless variety of sickening changes.

The BREEDER AND SPORTSMAN spoke of the affair as follows:

"This match is regarded by all coursing men as simply a bait to catch spectators, and they object vigorously to have the sport they admire burlesqued by one who does not understand the difference between a 'wrench' and a 'turn.' Trapped hare will not and cannot run, and Mr. Levy will find that the dogs entered, poor in condition, as they all will be, will gobble up his Anburn and Merced hares as quickly as they would as many cotton-tail rabbits. Even if the hares would run, the confined limits of the race track are dangerous to the dogs and death to the hares, who should at least be accorded what every sportsman gives his game—a chance for its life. If Mr. Levy called his affair a hare-killing match, and took down that sign about a match for \$500 a side, the matter would concern no one but the public, who paid to see it, and the Society for the Prevention of Cruelty to Animals, but so long as he has chosen to dignify it with the name of a sport that it only burlesques, it becomes our unpleasant task to protect the sport of coursing from the disgrace about to be thrust upon it."

The task was really an unpleasant one, for not only is it a violence to our feelings to censure any one, but many personal and some intimate friends of the Kennel Editor had allowed their names to be used in connection with the match, and had especially asked as a favor that the affair either be let alone or spoken of as a first-class, bona fide coursing match.

The result of the exhibition on Sunday last showed that all the anticipations of this paper were correct, except that the miserable, unsportsmanlike nature of the affair had not been stated in sufficiently strong terms of condemnation.

A very few lines will suffice for a description of the exhibition, the like of which it is to be hoped will never again be permitted in a civilized country. About three-fourths of an acre of ground, at the eastern end of the Half Mile Track, had been cleared of shrubbery, and was set aside for the hare killing. Around this contracted space was a slight fence, over which leaned a close row of spectators. Behind the spectators was the track, and behind that the high, close fence that environs the track. The lower end of the centre of the track is full of a coarse growth of lupins and stunted shrubs; consequently, as all sportsmen well know, was utterly inaccessible to the hare as a place of refuge, for instinct teaches the hare always to keep to the open ground when pursued. More than half of the open ground is sandy, which means certain capture to any hare that chanced to venture on it. Under these circumstances, had the hares provided by Mr. Levy been the freest and fleetest animals that ever traveled sixteen miles for water on the great San Joaquin plains, and untrammelled by any deprivation of their liberty, they would still have no chance to escape, and would fall an easy prey to any yelping terrier that fancied a hare lunch. What must be thought, then, of men who would attempt to give a coursing match on such grounds, and use for game poor, miserable hares that had been half

killed by their first capture, and utterly deprived of the ability to run by weeks of confinement and improper feeding?

Before the brutality commenced, the two thousand spectators were regaled with music by a remarkably aggressive brass band, which looked like a relic of the last female "pedestrian tournament," and was fully in accord with the other surroundings of the "coursing tournament."

About half-past one o'clock the Secretary of the Occidental Association ordered the first pair, Baron Waldken and Pacific Life, to be placed in the slips.

The band ceased playing, the various keepers of "cage games" and other devices to catch the unwary stopped their requests to "gentlemen sportsmen" to try their luck, and all was hushed and still for the first chapter in the great brutality of the 19th century. The dogs were put in charge of Joe Stadfeldt, the "slipper," and F. Conlon, who appeared to be the master of ceremonies, came out of a tent, bearing in his hands a poor, miserable crying leveret. After manning the animal around until the little life it originally had was nearly squeezed out of its body, Conlon took it about forty yards and then let it loose. At the same time Stadfeldt slipped the eager dogs. Baron Waldken did not seem to care about the business, but the dog substituted for Pacific Life, which was drawn, dashed off at full speed, and before the hare had traveled 80 feet, had caught and killed it. Time and again this miserable burlesque on sport was repeated. As the BREEDER AND SPORTSMAN stated, "the trapped hares could not and did not run" and in no case did one of them succeed in eluding the dogs a distance of 200 yards. Even the saplings that had never seen a hare before ran down and killed these poor frightened things as easily as a terrier catches and kills a rat. One or two of them ran into the crowd of spectators, and were kicked to death by the boys. The sight was sickening, and before half a dozen courses had been run most of the respectable visitors left the track in disgust. Further description of the affair is unnecessary, and could only cater to morbid appetites. The official record of the tournament is as follows:

FIRST TIES.—Levy's Baron Waldken ran a bye.
Con Shay's Lady Lyons beat C. Mooney's Kitty Clover, who got unsighted.

S. L. Brook's Jeff Davis, beat F. F. Lord's Sam. Tilden.
John Egan's Star beat John Shay's Lady Mary.

R. Bell's Cherokee beat J. Kelly's Con Hollow.
John Grace's Parnell beat D. L. Levy's Prairie Girl.

SECOND TIES.—Lady Lyons beat Baron Waldken.
Star beat Jeff Davis.

Parnell beat Cherokee.
FINAL TIES.—Lady of Lyons beat Star.

Cherokee ran a bye.

PUPPY STAKES.

S. King's Maude beat Thomas Brady's Lady Mac.
J. Kelly's Lily of Killarney beat J. Shay's Carig Baun.

SECOND TIES.—Maude beat Lily of Killarney.

SAPLING STAKES.

P. J. Jacoby's Cassie Mara beat F. Conlon's Maid of the Mill.
M. Galvini's Bingo beat J. Whelan's Spotted Ida.

SECOND TIES.—Cassie Mara beat Bingo.

The prizes were awarded as follows: Old Dogs—First prize, Lady of Lyons; second prize, Cherokee; third prize, Star; fourth prize, Jeff Davis. Puppies—First prize, Maude; second prize, Lily of Killarney. Saplings—First prize, Cassie Mara; second prize, Bingo.

The Judges were J. Sillery, H. Boscongh, and J. L. Rivers. Stewards, John Shay, F. Conlon. Slipper, Joseph Stadfeldt.

STANDARD MEASUREMENT OF DOGS.

EDITOR BREEDER AND SPORTSMAN.—DEAR SIR: For a long time I have given considerable thought to the subject of Bench Shows. I have written the Eastern and Western sporting papers to publish the measurements of prize winners, and have collected quite a number of measurements, but not sufficient to warrant a basis for the proper shape at different weights of sporting dogs. Stonehinge was the first to collect and publish a gradation of points as a guide for judges. Tileston placed them in a much more compact form, and is an excellent little book, but nowhere have I found any measurement for standards for different weights, and yet it seems such an easy thing to do, with so many Bench Shows taking place all over the country. A standard of excellence might be arrived at, with very little trouble, that can be used by every judge. It might also be used to advantage by those wishing to enter dogs, thereby preventing many dogs utterly inferior being placed upon exhibition, and also raise the standards, making it easier for judges and more enjoyable to patrons. I placed by themselves, first, the dogs of the different breeds, then bitches, so that after a while I can average. For instance, Lavarack dogs, Lavarack bitches, Gordon dogs, Gordon bitches.

I would suggest, so that measurements may be taken uniformly, that they come under the following heads:

- 1.—Length of head.
- 2.—Length of body.
- 3.—Length of tail.
- From which you have—
- 4.—Length from tip to tip.
- 5.—Height at shoulder.
- 6.—Height of forearm.
- From which you have—
- 7.—Height to shoulder.
- 8.—Girth of muzzle midway between eyes and tip of nose.
- 9.—Girth of neck midway between head and shoulders.
- 10.—Girth of skull at apex.
- 11.—Girth of chest.
- 12.—Girth of loin.
- 13.—Girth of stifle.
- 14.—Girth of forearm one inch from elbow.
- 15.—Corner of eye to end of nose.
- 16.—Width of head between ears.
- 17.—Spread of ears.
- From which you have—
- 18.—Length of ears.
- 19.—Weight.
- 20.—Age.

Making a maximum of twenty points to go by, and sufficient to take in all the principal measurements of the dog or bitch.

If the judges of the different Bench Shows, at the time the winners are announced, will hand to the Secretary, or

duly authorized member, the measurements of said winners, and should they be published in the *American Field* or *Forest Stream*, the BREEDER AND SPORTSMAN will compile them, and as soon as a sufficient number of prize winners are obtained, an average will be made, and the information will be given to the public.

I write the foregoing for the purpose of helping to raise, in my small way, the standard of American sporting dogs, and uphold it as an honorable calling as that of breeding horses or cattle. All have their votaries, but from lack of, say the gentleman, the one who finds a pleasure with the dog, is not looked upon with as much respect as are the others.

No country can excel ours for pleasure with the dog and gun, and if by striving for a standard of excellence for the dumb animal would bring about a higher order for the others, I shall not have taken up my pen in vain. There is luck in odd numbers. Starting with the *Forest and Stream* on the Atlantic, midway the *American Field*, and here on the Pacific we open the Golden Gate to the BREEDER AND SPORTSMAN.

Respectfully yours,

SUDS.

SAN FRANCISCO, CAL., July 5, 1882.

* I do not consider it of sufficient importance to make a separate head for measurement of height of hock.

† Measure, drawing tauter close to forearm, and not outside of feather tips, as some have.

A WELL TRAINED DOG.

The writer once knew a dog dealer who always named his dogs Mike. When asked the reason for this fancy he replied in a burst of confidence "Oh you see my own name is Mike, and when buyers come and ask me if my dogs are well trained I always reply, 'What Mike well trained?' he's broke sir, he is, and when you say he's broke you say it all." This always used to satisfy Mike's purchasers and eased the conscience of the human Mike. It must have been a lineal descendant of Mike that presented Mrs. Coit with a splendid looking sleuth hound with which she started out deer hunting last week. This celebrated animal was called Bill, and was warranted by his owner to trail deer as long as he had a leg to stand on, and also to show a most thorough indifference to any other kind of game. Said the original possessor of Bill to his fair friend, "That dog could wade through a whole ocean of jack rabbits or foxes, and would never for an instant lose scent of a deer that had passed over the bed of the ocean a year before. Mrs. Coit believed this Modern Munchausen and the day after Bill came into her possession, and in company with a friend started out on a hunt; for be it known to the uninitiated, Mrs. Coit, though a delicate looking lady, is an untiring hunter and a splendid shot. The parties had not gone far when Bill commenced to show by his actions that he had struck a scent. After a few undecided sniffs he put down his nose in good style and started off for a clump of brush at a twelve-mile gait.

"What style, what pace," whispered Mrs. Coit to her companion. "I really believe that Bill is one of the best as well as the handsomest dogs I ever saw."

"Ah, he's sighted now," said Mrs. Coit, as the melodious music of William's wrinkled throat was heard coming up the ravine. "But where is the dog? Bill is driving this way and the game must surely be ahead of him."

"Well, I don't know where the deer is, but I can see a jack-rabbit a few jumps ahead of Bill," replied Mrs. Coit's companion.

When the horrible truth dawned across Mrs. Coit's mind that the great William had disgraced himself and her by chasing a miserable rabbit, she turned and went home without speaking another word, and when Bill came home about two hours later with the blood of the rabbit on his chops, she positively declined to allow him to enter the house.

ANSWERS TO CORRESPONDENTS.

Under this head will be found replies to all questions that may be asked of the Kennel Editor in relation to breeding, breaking, or entering dogs, feeding or curing them of any ordinary disease. Correspondents must state plainly what are the peculiar symptoms of the malady for which they need advice, and in all cases, especially when desiring to know the best way to correct a dog of a fault, must be careful to state the age and sex. No answers will be sent by mail, and all questions must be marked Kennel Editor WEEKLY BREEDER AND SPORTSMAN, San Francisco, Cal.

J. C. MARXSVILLE.—Your dog is evidently suffering from dirt or neglect. Wash once a day with warm water and carbolic acid soap. Bed on new pine or redwood shavings instead of straw, and change bed every day. Give the kennel a coat of chloride of lime at least twice a week. Avoid heating food, and especially salt meat. If the irritation does not disappear in a few days, give a mild dose of castor oil or Epsom salts. Avoid any application of a stimulating nature to the sore places.

CAVIS, SAN FRANCISCO.—Dew claws are not an injury to a dog, and there is not any need to remove them. They can be taken off without leaving a scar by carefully cutting open the skin at the base of the claw and then removing the excrescence at the joint. That can be done with a sharp knife or pair of scissors. Some operators twist the claw off at the joint with their fingers. After removal, put a small piece of plaster over the incision in the skin and bandage carefully. Care must be taken not to bandage too tightly or inflammation is liable to set in and cause serious trouble.

A. T., SAN FRANCISCO.—The best cure for common muscular rheumatism in a dog, caused by wet exposure and damp bedding, is warm baths, warm bedding, an occasional purge of blue mass and aloes, and the following liniment, which never fails to give immediate relief from the pain, whether in dogs, horses or human beings, provided the disease has not gone too far: "Spirits Wine, one ounce; Chloroform, one ounce; Veratris, four grains. Rub in whiskey until dry, and repeat the operation when there are evidences of pain.

A. B., SAN JOSE.—A dog has 42 teeth—six upper and lower incisors, twelve upper and fourteen lower molars. Occasionally extra or supernumerary teeth are found, in some cases as many as six.

M. W. Hicks.

FISH RANCH.—The Reno (Nev.) Journal says: "At Lake Anna, near Fort Bidwell, Henry Woodson has started a fishery. He commenced operations three years ago with 2,000 common brook trout. Now he has realized so handsomely from them that he has sold 30,000, and 12,000 spawn have been sent to Germany. The trout attained a weight of seven pounds in thirty-one months, which is remarkably rapid growing. He supplies the whole Bidwell county with fresh fish. The lake is forty-five acres in extent. He has also a small lake stocked with catfish. Mr. Woodson has made it a profitable business, and every year adds to his wealth."

THE HERD.

BEEF AND STOCK CATTLE.—Last week Mr. Hemler got back from Pitt River; he bought four hundred head of stock cattle on the trip and will have most of them brought to his place at Pete's Valley and fattened for this market. He reports that young beeves will be ready for market about the beginning of July. Copious rains have fallen all over that country; grass is very good and cattle coming on rapidly. Nearly all the animals that will be offered for beef will be from one to two years younger than in previous years. During the past season, all over Eastern Oregon and Nevada the Eastern demand for beef has been so great that fully matured animals have all been sold off, and now younger stock must be taken to supply the demand; these being of less weight each than older animals, greater numbers are needed to make the usual quantity. At present beef cattle cost only about one cent per pound more than last year's price. Stock cattle sell readily at an advance of from three to four dollars per head. The present prospect for stockmen is very favorable; the feed never looked better, and the demand for beef is constantly increasing, both at home and in the foreign markets.—*Greenville Bulletin*.

HOW TO JUDGE SHEEP.

The day has come when the loose end methods of old fashioned farmers will no longer be found profitable. All the resources of science are rapidly being opened to the agriculturist, while the open pages of the Stud Book elevate the calling of the stock raiser almost to a science. What the Stud Book has done for the thoroughbred horse, the Devonshire, Ayreshire, Jersey and other standard breeds of cattle, could be equally well done for the various fine breeds of sheep. The importance of grading their flocks up to a higher standard of wool and mutton excellence, is daily becoming more pressing to the California sheep raiser, and like energetic men they are quick to seize upon every scrap of information which may tend to increase their profits. Hence the sale of graded and thoroughbred Cotswolds, Leicesters and Merinos, for breeding purposes, is rapidly advancing to huge proportions. Sellers are always able to protect themselves, but the buyers are too often in the dark. For that reason the publication in the BREEDER of the following scale of points of excellence, prepared by a special committee of the Indiana State Wool Growers' Association, should prove a valuable assistance to the wool growers of our State:

In bringing the matter before the Indiana Association, the committee having it in charge said:

In presenting this knowledge to the Wool Growers' Association of the State of Indiana, your committee has been to a great deal of trouble and bother in summing up what we consider to be the greatest benefit to the Association.

The scale of points to be taken into consideration in the breeding of all the different breeds of sheep, is the blood of the sire and dam; this must be ascertained before we commence to breed our sheep up to standard, or otherwise we had better not try to breed to any given point, for without pure blood being infused into our flocks, it would be useless to make the trial.

SCALE OF ONE HUNDRED POINTS FOR COTSWOLD SHEEP.

BLOOD.—Thoroughbred, purely bred from one or more importations of Cotswold sheep of some reputable breeder from England. Seven points.

HEAD.—Not too fine; moderately small and broad between the eyes and nostrils, but without a short thick appearance, and in young animals, covered on crown with long lustrous wool. Seven points.

FACE.—Either white or slightly mixed with grey, or white dappled with brown. Four points.

NOSTRILS.—Wide and expanded; nose dark. One point.

EYES.—Prominent but mild looking. Two points.

EARS.—Broad, long, moderately thin and covered with wool. Four points.

COLLAR.—Full from breast, and shoulders tapering gradually all the way to where the head and neck joins. The neck of rams should be short, thick and strong, indicating constitutional vigor. The neck of ewe should be fine and graceful, and free from coarse and loose skin. (Collar five points with ewe.) Six points.

SHOULDERS.—Broad and full, and at the same time join so gracefully to the collar forward, and the chin backward, as not to leave the least hollow in either place. Seven points.

FORE LEGS.—The mutton on the arm or fore thigh should come quite to the knee—leg upright, with heavy bone, being clear from superfluous skin, with wool to fetlocks, and may be mixed with grey. Four points.

BREAST.—Broad and well formed, keeping the legs wide apart. Girth on chest full and deep. Eight points.

FORE FLANK.—Quite full, not showing hollow behind the shoulder. (Four points with ewe.) Five points.

BACK AND LOIN.—Broad, flat and straight, from which the ribs must spring with a fine circular arch, and scrotum of rams well covered with wool. Ten points.

BELLY.—Straight on underline. (Five points with ewe.) Three points.

QUARTERS.—Long and full with mutton quite down to the hock. Eight points.

HOCK.—Should neither stand in or out. Two points.

TWIST.—Or junction inside the thighs should be deep, wide and full; which, with a broad breast, will keep the legs open and upright. Four points.

FLEECE.—The whole body should be covered with long lustrous wool. Eighteen points.

ONE HUNDRED POINTS OF EXCELLENCE FOR MERINO SHEEP.

BLOOD.—Thoroughbred—i. e., purely bred, from one or more of the direct importations of Merino sheep from Spain, prior to the year 1812, without admixture of any other blood. One point.

CONSTITUTION.—Indicated by form of body; deep, large breast cavity, broad back, heavy quarters, with muscular development forming capacious abdomen. Skin thick, but soft, of fine texture, and pink color; expansive nostril; brilliant eyes, healthful countenance, and good size, age considered. Fifteen points.

SIZE.—In fair condition, with fleece of twelve months' growth; full grown rams should weigh not less than 150 pounds, and ewes not less than 100 pounds. Seven points.

GENERAL APPEARANCE.—Good carriage, bold style, elastic movement, showing in particular parts, as well as general outline, symmetry of form. Three points.

BODY.—Throughout, heavy bones, well proportioned in length, smooth joints, ribs starting horizontally from back bone and well rounded to the breast-bone, which should be

wide, strong and prominent in front; strong backbone, straight and well proportioned as to length. Heavy, muscular quarters, deep through and squarely formed behind and before, with shoulders well set on, neither projecting sharply above the backbone, nor standing so wide and flat as to incur liability to slip shoulder. Folds on the ram should be larger than on the ewes. Large and pendulous folds from the chin or jaws succeeding each other down the neck to the brisket, ending with large fold or "apron," and extending up the sides of the neck, but lighter if at all extending over top of neck, also behind the fore-leg or shoulder, one on front of hind leg, hanging well down across the flank, also on rear of hind legs, or quarters, extending upward toward the tail, with one or two on and around the tail, giving the animal a square appearance on the hind quarters, and straight down as may be from end of tail to the joints and hind feet. Eighteen points.

HEAD.—Wide between the ears, and between the eyes and across the nose; short from top of head to tip of nose; face straight; eyes clear and prominent; ears thick, medium size, and, together with face, nose and lips, white and covered with soft fur or downy wool. Ewes should give no appearance of horns; while upon rams the horns should be clear in color, symmetrically curved, without tendency to press upon the side of the head or to extreme expansion. Six points.

NECK.—Medium length, good bone and muscular development; and especially with the rams, heavier toward the shoulders, well set high up, and rising from that point to the back of the head. Five points.

LEGS AND FEET.—Legs medium or short in length, straight and set well apart forward and back, heavy bone, smooth joints, with large muscular development of the fore-arm; thick, heavy thighs, wide down to hock joints, and from knee joints downward covered with short wool, or the soft furry covering peculiar to the ears and face; hoofs well shaped and of clear color. Five points.

COVERING.—Tendency to hair and bare upon any part of the sheep, is to be avoided. Evenness of fleece in length, quality, density, luster, crimp, truthness, strength and elasticity, covering the entire body, belly and legs to the knees; head well covered forward, squarely to a line in front of the eyes; well filled between the eyes, ears or horns, and well upon the cheeks; muzzle clear, with small opening up to and around the eyes. Scrotum of rams covered with wool free from tendency to hair. Fifteen points.

QUALITY.—Medium, but such as is known in our markets as fine delaine and fine clothing wool, distinctly better in quality, luster, crimp, and elasticity, than the wools of same length grown upon the common grade sheep. Five points.

DENSITY.—Shown by the compactness of the fleece throughout, which should open free but close, showing very little of the skin at any point, even at the extremities. Ten points.

LENGTH.—At one year's growth not less than two and one-half inches, and as near as may be uniform in length to the extremities of the fleece. Five points.

OIL.—Evenly distributed; soft and flowing freely from skin to surface; medium in quality, and of a light color. Five points.

ONE HUNDRED POINTS OF EXCELLENCE FOR THE DOWNS SHEEP.

BLOOD.—Purely bred from one or more of direct importation from Great Britain. Ten points.

CONSTITUTION.—Constitution and quality indicated by the form of body; deep and large in breast and through the heart, back wide, straight, and well covered with lean meat or muscle; wide and full in the thigh, deep in flank; skin thick but soft and of a saffron color; prominent, brilliant eyes and healthful countenance. Twenty-five points.

SIZE.—In fair condition, when fully matured, rams should weigh not less than 200 pounds, and ewes not less than 175 pounds. Ten points.

GENERAL APPEARANCE.—General appearance and character, good carriage; head well up, elastic movement, showing great symmetry of form and uniformity of character throughout. Ten points.

BODY.—Well proportioned, small bones, great scale and length, well finished hind quarters, thick back and loins, standing with legs well placed outside, breast wide and prominent in front, brisket wide and extending well forward. Ten points.

HEAD.—Head short and broad; wide between the ears and between the eyes; short from top of head to tip of nose; ears short, of medium size and covered with downy wool; head should be well covered with wool to a point even with eyes, without any appearance of horns; color dark brown in some families and fawn color in others without speck or spot; light muzzle not objectionable. Ten points.

NECK.—Short and heavy, especially towards shoulders. Five points.

LEGS AND FEET.—Broad and short and well set apart, color same as head and woolled to the hoof, which must be well shaped. Five points.

COVERING.—Body, belly, head and legs well covered with fleece of even length and quality. Scrotum of rams well covered. Ten points.

QUALITY OF WOOL.—Medium such as is known in our markets as "medium-delaine" and "half-combing wool," strong, fine, lustrous fibre, without tendency to mat or felt together, and at one year's growth not less than three and one-half inches in length. Five points.

About two miles south of McDenney's, or Sugar Pine Point, Lake Tahoe, says the *Oroville Mercury*, there puts into the lake from the west a fine mountain stream, which heads among the craggy, snow-laden peaks of the western summit of the Sierra. Like the water of the lake, that of the stream is translucent—as clear as it is possible for water to be, and so soft and pure and cold. At the mouth for several hundred yards it meanders through a nice little meadow with willows and tall grass, and is deep, though where it enters the lake it shoals and somewhat widens. This stream is a favorite breeding ground for trout, and at certain seasons of the year they fairly throng its waters. Up the little creek, a few score of yards from the mouth, is a corral in the water into which the trout ascending the stream can enter, but cannot pass down again without the aid of the keeper, and consequently an abundant supply of trout is almost always attainable. Spawn is here collected in quantities as called for, and carefully packed in moss and sent abroad for propagation to stock other streams and ponds.

PERSONAL.—Charles Kaeding of the firm of Liddle & Kaeding, who has been in Europe some months purchasing for the firm, left Queenstown on July 4th, on his return to this city.

BICYCLING.

BICYCLES AND TRICYCLES.

In England, the more sociable and less dangerous tricycle is fast gaining in popularity upon the more rapid bicycle. As yet the tricycle only numbers its hundreds where its elder rival counts its thousands, but before long the proportion may be reversed. The recent meet of four hundred tricyclists at Barnes has given great stimulus to the demand for three-wheelers. The extent to which the tricycle is being used by ladies, may possibly lead to the gradual introduction of the much talked of but seldom seen duplex garment which figures so largely in the dress of the future. For tricycling it ought to be quite as much a matter of course as the riding-habit is for riding. But according to a very pleasing picture in a recent number of *Punch*, the ladies can enjoy this pastime without having to resort to such methods. The cut represents two charming girls seated in a tricycle, working the treadle in sewing-machine manner, while accompanying them are two handsome youths on bicycles, with whom they are engaged in pleasant conversation. It is pounds to shillings that those same young gallants have some steel wire about them, so that if their fair companions become tired, or were puzzled by a rising slope, they could hitch on and draw them out—of their difficulties.

Bicycling is advancing with rapid strides in England. It is much indebted for its popularity to Royal favor, quite a number of machines having been ordered by the English and other European Royal houses.

The annual 100-mile road race of the London Bicycle Club (Eng.), from Bath to London, took place last month, and was won in seven and one-half hours. There were between sixty and seventy entries for the race.

In view of the immense impetus given to this healthful and invigorating pastime, that is now acknowledged as so essential to the preservation of health to those whose occupations are of a sedentary character, we advise all such to join the army of wheelmen who now make the smooth, level roads across the bay so lovely with their swift and graceful vehicles.

LEAGUE RIDING REGULATIONS.

Members should keep as much as possible to the right side of the road. It is illegal to ride on any path set aside for foot passengers, and the practice must be avoided.

The rules of the road should be most strictly followed out.

In meeting keep to the right. In overtaking pass to the left.

In passing a vehicle or foot passenger notice should be given at a sufficient distance by whistle, bell, or otherwise.

Never pass between two vehicles or riders when overtaking them.

If any vehicle or rider wishes to pass keep well over to the right.

It is considered advisable to avoid, as much as possible, the use of the voice when passing foot passengers or vehicles.

In meeting or passing restive horses, a dismount should only be made if requested, as sudden dismounts often have the worst effect. A slow pace, and a few words, form the best course. A rider should always keep as far away from the horse as possible.

Riders should not take the ground in front of a horse until at least forty feet ahead.

The above rules should be observed in every particular by wheelmen, and thus avoid the possibility of accidents.

Ride slow around curves, and under no circumstances indulge in racing. Wheelmen are sometimes asked by drivers to try their metal with their horses, but this must be avoided.

The famous old Julia, one of George Steers' best boats, has been put all in order after her original design. She was built in 1854, and sailed many matches, several of which were with the Rebecca, the most noted one being that of twenty miles to windward, outside of Sandy Hook, in a stiff southeast breeze. She beat the Rebecca about twenty minutes in this race. The Julia's dimensions now are: Length over all, 78 feet 8 inches; length on water line, 70 feet; extreme breadth, 20 feet 6 inches; depth of hold, 6 feet 8 inches; draft of water, 6 feet 4 inches. Her new center-board, which replaces the old keel, is 14 feet in length. It is of oak, working in a yellow pine case. Although this famous yacht was built in 1854, and many changes have been made in her since, still the carpenters found her timbers and planking sound, showing little evidence of age and none of decay. Her keel, keelson, deadwoods, stem, sternpost, frames, wales, top timbers, deck frames, deck beams and rails are all of oak. She is ceiled with yellow pine and her decks are of clear white pine. She has a counter stern and will steer this year with a diamond screw wheel. Following are the dimensions of the "sticks" that have been put in her: Mainmast, 73 feet in length; from deck to hounds, 59 feet; length of mast-head, 7 feet 9 inches; topmast, 39 feet in length; main-boom, 63 feet; maingaff, 30 feet; bowsprit, 26 feet; center-board, 14 feet.

The blue fishing of Monterey Bay is said to be excellent just now. A party of gentlemen caught 69 of these fish on the 4th. One of the fish was the largest of the kind ever caught there, being over 18 inches long and weighing somewhat over three pounds. The party consisted of George Cope, John Pew, E. B. Young and Mr. Delamaldi. They were in a fisherman's boat and made fast to the kelp about two miles from the lighthouse. Sand fleas were used for bait, and small hooks with light sinkers were employed. The party fished with poles and had good sport. In addition to the blue fish some sea trout and one sea gopher was caught; the latter was found in deep water. The bluefish are increasing in numbers each year in Monterey, this being the third year since they first put in an appearance there.

The Guardian Angel Roman Catholic Church, in close proximity to the Brighton Beach, Brooklyn, race track, for some time past has been in a straightened pecuniary condition. On learning this, the executive officers of the track offered to donate one day's receipts to the church, and on June 26th the result was \$1,700 from the gate and \$500 from the purse money, an aggregate of \$2,200 that passed into the treasury of the religious institution. Is it not time for a certain straight-laced Brooklyn divine to enlarge on this last fearful kink of the sporting community?

THE STAGE.

The season that has just passed has certainly been the most quiescent of a series of annual disasters, for it may be safely averred that, outside of the Gardens, there has been a great deal more lost than made in theatrical enterprises in this city, but the losses have not been so large as in previous years. Now, all the possible changes of the Thespian bells have been rung, and it yet remains to be said what is the true, popular and managerial keynote. There is no doubt but that we have had liberal and enterprising managers in our midst, who have brought forward the most expensive talent that figured in the stellar system, and that sometimes great returns have been made from these extraordinary outlays; the Booth, Nielson, "Diplomacy" and "Hazel Kirke" engagements forming the red letters of the few past years, but the failures are, in the words of Bardwell Slote, "in a large majority." Manager Maguire has sunk a small fortune in trying to run a stock company at the Baldwin that was not to be excelled outside of New York, and there only by the Union Square and Wallack's Theatres. Manager Locke has played a series of novelties at the Bush Street Theatre, and the Comic Opera Company, with Miss Emily Melville at the head, was scarcely to be surpassed by any organization in the East. The Grand Opera House has been closed save for special occasions, and thus, by charging special rates, has probably made more money than any of the other theatres. The California Theatre has been conducted under the Haverly regime on somewhat vacillating principles, but with a good, honest faith towards the public that merited better returns. It is sincerely to be desired that the coming attractions will show such a balance to the good that will justify that enterprising Manager in continuing to cater for our fickle yet liberal-minded public during the Winter months, when the best attractions are so in demand at the East. At the Standard, William Emerson has made a bold and successful bid for popularity with his Minstrels, but it is doubtful if his later ventures have added to the exchequer. He it was who, for a season, first appealed to the masses with his moderate charges of admission, and although the example was followed by the Rial Combination at the California, and by Mr. Gus Frohman at the Baldwin, it is very doubtful if a good entertainment can possibly be offered, in the long run, at a first-class theatre at such prices as 75 cents, 50 cents and 25 cents entrance. In solving such a problem, Mr. Frohman certainly came closest to the solution, but even with him it was, we opine, somewhat like squaring the circle.

Alluding to the recent successful production of George R. Sims' melodrama at the Princess' Theatre, the *Times* remarks: "The Roving Rye," contains, along with much that is clever and that gives promise of better things, all the vices of the transpontine drama in its most objectionable form. It reeks of the slums, and the tone of it is such as can only commend itself to the minds wholly destitute of artistic sentiment. It is difficult to say which is its more conspicuous feature—the exaggerated virtue which throughout the piece invariably accompanies poverty or the equally exaggerated wickedness which is the unalloyed concomitant of wealth and education. All this is the more deplorable from its being presented with much dramatic ingenuity and resource. There is not a scene or passage from the beginning of the first act to the end of the fifth which is not full of life and movement. Indeed, dramatic situations of the most startling kind follow each other with a bewildering rapidity that must make even the gallery long for a moment's repose. Through five crowded acts the fight between villainy and virtue goes on—success inclining now to the one side and now to the other. There are at least three attempts at murder—by bullet, by poison and by drowning. There is a burglary with violence, there are two attempts at abduction, and there is a wreck at sea and a perilous rescue. Interspersed with these events are picturesque, but irrelevant sketches of gypsy life and of the interior of the old thieving dens of Seven Dials. Here and there Mr. Sims deepens his colors, until the sombreness of his picture is both appalling and even repulsive, as it is where he shows us murder carried on not as a "fine art," but distinctly as a trade in the lowest river-side slums of Ratcliffe highway. The morbid dwelling upon horrors which goes to make up the fourth act is positively loathsome. It is matter for surprise and also matter for regret that a dramatist of Mr. Sims' standing should not have turned his talents into a worthier channel than the writing of this bad, mischievous play."

Mr. Gye has had a serious altercation with Mme. Christine Nilsson once more, in connection with a broken contract. The matter passed into the hands of her lawyers, and among other indiscreet things, Mr. Gye said that the fair songstress, a short time since, was very eager to make an engagement, and that this time he desired a "guarantee of good faith." The solicitor replied that he was amused by Mr. Gye's picture of his client "going cap in hand to him for an engagement," and is sure that "no such exciting chase has yet fallen to her experience." To close the case, he puts his client's position in a nutshell with these words: "With Mme. Nilsson it is not a question of formal contract, but one of contract at all. There was a negotiation for a contract, the form of contract was tendered and rejected, and thereupon the abortive negotiation was closed."

It would really appear as if Sara Bernhardt in her marriage had stolen a few leaves from the happier life of "Camille." She looks better, acts better, and behaves better than ever before. Her solemn-looking Greek husband, either through his strength of will, or her weakness through love, has succeeded in transforming her whole nature. "He is the first man," said she to a friend, "who ever made love to me of whom I am afraid. He can make me do what he likes."

On the 17th instant the celebrated Hanlon-Lees open at the Baldwin Theater in their amusing acrobatic absurdity entitled "Le Voyage en Suisse." In their recent engagement in Chicago, the piece was a great success, drawing so well that their stay might have been prolonged, but their opening having been arranged here for the above date, they were obliged to refuse the flattering offers made to them. The company numbers twenty-seven persons.

Miss Genevieve Ward is seriously ill in England. She was never famous in any character except her last creation, Stephanie, in "Forget-me-not."

Wallack's Theater closed last Wednesday, with the fiftieth representation of "La Belle Russe." The drama was a great financial success, and during the next season it promises to be the best drawing card in the road, as the cast is small and easily controlled. Miss Jeffreys-Lewis will assume her original character as "La Belle Russe."

A new domestic drama, by Charles Reade, entitled "Single Heart and Double Face," was produced at the Princess Theatre, Edinburgh, and was well received. The plot is interesting, but appears to be rather tame in comparison with the blood, thunder and carpenter drama so much in vogue at the present time.

Mrs. Langtry, as a beauty, was deemed a trifle fast, and now that she has adopted the stage as a career, she keeps up this reputation. At the conclusion of her engagement at Glasgow, she, in company with her maid, took a special train at midnight, and arrived in London at 9:30 A. M., in order to meet a large number of her friends at dinner at Mrs. Labouchere's, who wished to congratulate her on the great success she had achieved in the English provinces. The trip cost the lady £103 15s., and, in the way of advertising, was cheap at the price.

Miss Maud Granger is suffering from illness and poverty, and application has been made to the Executive Officers of the Actors' Fund for her relief, but as yet apparently without result. Miss Granger was the original Dora in "Diplomacy," when that drama was produced at the California, and it is astonishing the number of misfortunes that have befallen those who took part in that play. A benefit for Miss Granger would be in order, but unfortunately the weather in New York is not propitious for such an undertaking.

Melodrama with startling, lurid scenic effects will have full sway next season. "Taken from Life," "Mankind" and "Romany Rye" are among the novelties promised. McVickers' Theatre, Chicago, where "Taken from Life" will have its first American representation, is now being altered and refitted. The regular season will open with "Taken from Life," and the scenery and mechanical effects to be introduced in it, Mr. Colville says, will be the most expensive and intricate ever used in this country. Genuine gypsies will be introduced in the encampment scene. The inaugural performance will be given July 31.

Edwin Booth met with a flattering reception on his first appearance at the Adelphi, in London, on the 25th of June last. This Theatre has always been identified with the melodrama, "The Green Bushes," "Oliver Twist" and "The Colleen Bawn" showing the range of its, multifarious successes and it was deemed hazardous to test the legitimate on this stage. The play was "Richelieu" and Mr. Booth made the most marked effect in the famous scene in which Richelieu draws the awful circle of the power of Rome around Julie, but his unquestionable success according to the general impression was a success of declamation, rather than of tragic art.

As a comment on popular criticism *The Score* states that the following incident recently occurred in a village not thirty miles from Boston: An Irish laborer was taken to a concert for the first time and was asked how he liked it. "Well," he replied, "I looked it all except a piece called quartet. They didn't know that at all. Furrst the two ladies begun singing, and the min waited for them to stop, but thin they got tired of waitin' and started in anyhow. But the ladies kipt on, as it was quite roight they should, and thin whin they all stopped singin' the gurr! at the piany she didn't know the piece was done and just kipt on a whoile by herself. They spoilt it intirely; but I didn't loike the piece anywa."

At a recent meeting in London for the promotion of the Actors' Benevolent Fund, Henry Irving spoke as follows: "You must distinctly bear in mind that this proposed scheme is not one of charity; it is one of aid—aid of which we might all of us at some time be in need. When brother or sister in fortune helps brother or sister in distress, we do not call it charity. We must all bear in mind this one thing—that we do not ask charity or accept it. We help each other and ourselves. It is the accident of our lives or our calling which may make such help as we can give welcome or even necessary, but it is useful that we have some actual scheme, perpetual in its aim, comprehensive in its scope, large-hearted in its workings, which may enable us to give that aid while we can, and to accept it should we fall on evil times."

At the present the outlook is more promising than it has been for months past. At the California, Haverly's Mastodon Minstrels ought to crowd the house through a good three weeks' engagement, as they are favorites here, and come re-inforced with new faces and new songs and interludes. At the Standard, "My Brudder-in-Law" will probably give place on Thursday, to "H. M. S. Pinafore," that if properly produced is never lacking in popularity. At the Baldwin, a new drama will be produced entitled "American Born," in which there are, it is said, many thrilling effects accompanied by a volcanic eruption, and in this scenery William Porter is an expert, he having made a study of this specialty in all its phases in the Hawaiian Islands. The cast includes Miss Ada Ward, Miss Ada Gilman, and the old favorites of the theatre. The Gardens continue their programme to the delight of their countless visitors.

A most distressing accident occurred at the hippodrome in Paris recently. During the race of the Roman chariots the one that was leading came in contact with a post, and, overturning with violence, the charioteer, Mlle. Dupre, was thrown out and dragged along by her dress, which had become entangled. The material was on the point of yielding to the strain, when the next chariot, before its occupant, Mlle. Carre, could pull up, passed over the body of the unfortunate girl, who was thought to be dead when picked up. She was carried in a perfectly insensible condition to the infirmary attached to the building, where her wounds were dressed. Her collar-bone was broken, and she sustained internal injuries. She was subsequently removed to a hospital, and, it is said, the physicians have some hopes of saving her life.

The gentlemen interested in the J. H. Haverly Amusement Company, with a capital of \$300,000, which recently filed a certificate of incorporation, are J. H. Haverly, Henry Mann,

C. H. McConnell, A. Hayman, Edward Keyes, and E. G. Gilmore. Mr. Haverly's idea appears to be to bring good English attractions to this country and to send good American attractions to England. We like anything that is thoroughly and characteristically English, and English audiences liberally patronize everything which is really American, in the theatrical line. The company will control Mr. Haverly's theaters, which are the California Theatre, San Francisco; the Chestnut Street Theatre, Philadelphia; the Brooklyn Theatre; Haverly's Theatre, Chicago, and the Fourteenth Street Theatre here. It is said that the Olympic Theatre, in London, has been secured, and also a theatre in Manchester, and that other theaters are being negotiated for. Mr. Haverly is expected to return from Europe in the course of this month.

FEEDING EXPERIMENTS.

In considering the following scale it must be borne in mind that Canada has a vastly different climate to California, and that the day has not yet come in this State when manure is worth \$2 30 per ton at any distance from the large cities.

The superintendent of the model farm at Guelph, Canada, gives as below the results of some experiments made there in cattle-breeding:

1. A steady frosty winter is better than an open one in feeding cattle.
2. An average 2 or 3-year-old steer will eat its own weight of different materials in three weeks.
3. Two or 3-year-old cattle will add one-third of a pound more per day to their weight upon prepared hay and roots than upon the same materials unprepared.
4. It is 30 per cent. more profitable to premature and dispose of fattening cattle at two years old than to keep them up to three years.
5. There is no loss in feeding a cattle beast well upon a variety of materials for the sake of manure alone.
6. Farmyard manure from well-fed cattle, 3-year olds, is worth an average of \$2.30 per ton.
7. A 3-year-old cattle beast, well fed, will make at least one ton of manure every month of winter.
8. No cattle beast whatever will pay for the direct increase to its weight from the consumption of any kind or quantity of food.
9. On an average it costs twelve cents for every additional pound of flesh added to the weight of a 2 or 3-year-old fattening steer.
10. In Canada the market value of store cattle can be increased 36 per cent. during six months of finishing by good feeding.
11. In order to secure a safe profit, no store cattle beast, well done to, can be sold at less than 4½ cents per pound (live weight).
12. In the fattening of wethers, to finish as shearlings, the Cotswold and Leicester grades can be made up to 200 pounds, the Oxford-down 180 pounds, and the South-down (grade) 160 pounds each (live weight).
13. A cow wintered upon two tons and a half of hay will produce not far from five tons of manure, provided that she be well littered and none of the excrements be wasted.

THE HORSE IN AMERICA.

It has been generally believed that the horse was introduced in America by the Spanish. Professor Marsh, on the other hand, has found abundant remains of probable ancestors of the horse in our Western geological formations; so that, if there were no horses before the Spanish came, there must have occurred a failure of the race. Mr. E. L. Berthoud, of Golden, Colorado, believes that he has evidence that the Spaniards found horses in South America when they first visited it. Among the maps which he has recently received from Paris, in a collection of the fifteenth and sixteenth centuries, is one which Sebastian Cabot drew for the Emperor Charles V., representing his explorations of the La Plata and Parana rivers, and containing symbols of the animals and plants that he found. Among these symbols was that of the horse represented near the plains of the Grand Chaco, where the immense herds of that animal range to-day. He claims that this affords a fair presumption of the native origin of the race, for neither the Spaniards nor the Portuguese had then been long enough in the country (in 1527) for their horses to have escaped from Peru to the head of the Paraguay and Parana rivers and to have increased in numbers sufficiently to attract attention. —*Popular Science Monthly.*

Tom Tunstead has carefully laid out his hunting camp at Nicasio, Marin County, and will be ready for full operations when this journal makes its appearance. He has two fine fox hounds for sale; the particulars of which are to be found in our advertising columns.

THE VICTORIAN TROTTER CLUB.

We take pleasure in calling attention to the advertisement which appears in another part of the paper, and which informs our readers that the Victorian Trotting Club offers a prize of \$2,500 for the trotting to contend for on some day in January next. There is no country which is as much interested in trotting in Australia as California. There is a surplus of trotters here and the outlook for them is in that country. The purse of \$2,500 is certainly very liberal, and restricting it to few procreative animals is a move in the right direction. It is not only the winning the purse which should be an enticement, as it is sure that the stallion or mare lucky enough to win will sell for a round sum. Dr. Weir will furnish all the intelligence to those who are desirous of making entries.

FISH.

PRESERVATION OF FISH.

There are men in this city, ardent lovers of the rod and line, whose rods have hung in the covers, unused, for two or three years. And this, not from apathy or inability to get away, but simply from disgust with experiences in the coast streams, and the impossibility of getting a good day's sport without traveling a hundred miles or so to reach the spot.

There is no place in the world where there are better facilities in the way of streams than with us. There are trout streams, creeks and brooks in every direction. And such streams, too, as furnish good waters for the finny tribes.

But if those fond of the rod and creel are content to lay away their outfits, and give it up as a bad job, simply because a few vandals spoil their sport, then the vandals will have it all their own way.

On general principles, monopolies and combinations of all kinds are distasteful, but it is absolutely necessary that the fishermen among us must combine in a united effort to prevent a destruction of fish, and must take an active part in the measures which are adopted.

It will not do to get together and pass a lot of resolutions. A "whereas" and "resolved" may scare off a political candidate, but it will not in any degree intimidate the class of men who use Giant Powder to catch fish. As a general thing, they do not understand that kind of language.

But who is to take the first step towards a rigorous prosecution? Surely it must be the sportsmen, who are to reap its benefits. For \$5 a man can go to a stream and make his cast where he will get no fish. It costs him \$50 to get to one where his fly will be taken. Why not spend the \$45 in going for the fish killer, and then the \$5 trip can be taken with more satisfaction and some chance of success.

The men who hang up their rods and put away their reels, fly books and baskets, ought take them down again and make up their minds to cast them once more. They ought to make up their minds, too, to lend aid, countenance and practical help to whatever efforts are inaugurated to bring about a reform.

Trolling on Twin Lakes gives good rewards.

The trout on the San Lorenzo creek are pretty small.

There is said to be very good trout fishing in Donner Lake.

Fishing parties on Lake Lundy, Mono County, have good sport.

Fishing is good on Willow creek, near Jacksonville, Oregon.

The Weber Lake House, which has been closed during the winter, was opened on the first instant.

Bay fishing is reported as being good—large numbers of rock cod, sea trout and perch being caught.

There are said to be good trout streams in Indian Valley, Plumas county, and hotels convenient to the streams.

As to flies, every man thinks he knows the best ones for certain creeks. And probably he does if he knows the creek.

Edward Bosqui and party have gone to the Little Seor and adjoining streams in Monterey county.

A large party of railroad attaches spent the Fourth in fishing Donner creek and lake, and speak of the fishing being unusually good.

Excellent fishing is to be had this year in Independence Lake. Geo. Redding, and many other San Franciscans, being late visitors there.

If the Truckee Republican is not misinformed, S. T. Burton caught over 1400 Lake Tahoe trout two weeks ago, and shipped them to this city to the market.

A sturgeon weighing 457 pounds was caught at Red Bluff the other day. It measured eleven feet nine inches in length, and three feet six inches around the body.

At Catalina Island, in the Santa Barbara Channel, there is fine fishing. A party caught 885 barracouta, thirteen "yellow tails" weighing 40 pounds each, and a lot of rock cod, in ten days. The catch aggregated 4000 pounds.

A Chico editor went fishing the other day, and by accident fell into the river, but he was not at all alarmed, because he had his life insured; he said he "never had anything happen to him by which he could make any money."

Lundy Lake, Homer Mining District, Mono county, in this State, is said to abound in fish. Mill Creek, near by, is also good fishing ground. A new hotel was opened there recently, so there is now accommodation for anglers.

A large number of fish are being caught in Santa Cruz county streams. The Monday morning boats show a goodly number of excursionists returning from Sunday trips. A great many people are camping out about Felton, Glenwood, etc.

The Sonoma Index, of June 24th, says: "On Wednesday of last week a party of fishermen, consisting of Capt. N. Carriger, Geo. S. Tate and others, made a big catch of 245 catfish in the Laguna, near Mark West. They brought 75 to town alive. So George Tate informs us."

Geo. H. Maxwell has returned from a two weeks' vacation, spent in fishing the streams between Lakeport and Ukiah. He found good fishing in the streams, but the contrary at Blue Lakes, where a large number of San Francisco people are sojourning.

Messrs. J. H. W. Riley and Joseph Shain have returned from an angling trip of ten days. During this period they fished the Navarro, Garcia, Russian and Gualala rivers. They report the latter, from which they sent several boxes of trout to this city, as being much the best stream.

The Reno Gazette is responsible for the following: "A few days ago a man caught a 16-pound trout in Pyramid Lake. Inside the trout was a 4-pound sucker, and in the sucker was a half-pound chub. There was nothing inside the chub but worms. This is no fish story. It is an actual fact."

The Salt Lake Tribune says, "Trout fishing is good in all the mountain streams, and the size of the fish is gauged by the imagination of the city fisherman. The more exaggerated the imagination the bigger the fish, and now white whales are caught in the Cottonwoods while the air swims with white lies."

There are more ways than one of fishing, and this is the way the barbarians of Mono County do it, according to the Bodie Free Press: "The enthusiastic fisherman quietly slides into the hardware store and fills his pockets with giant-powder cartridges, and then takes to the streams. Once on the banks of a trout stream it is but the work of a moment for him to blow out a hundred or more trout. Satisfied with his splendid luck, he returns home and tells the boys all about his trip and how the fish took the hook with an eagerness that denoted enthusiasm."

Mr. Benjamin Burling, who was so severely injured in the sad accident in Santa Cruz county, is one of the most skilled anglers and shots on the Coast. He is an ardent sportsman, and has few equals in handling a rod, knowing all the streams and frequenting them often. With the shotgun he is an expert, and is well known as such to all the hunting fraternity. During the duck season, Mr. Burling is a constant shooter in the Suisun or Sherman Island marshes. His many friends anxiously hope for a speedy recovery.

CARP.—The biggest carp yield, by a large majority, is that of Wm. Gilson. William has a fine place on Date Creek, with abundance of water. About a year ago he procured eight carp, from which he now has 8,000 or 10,000 head, with more spawn to hear from. All this has occurred in Yavapai County waters. William says his carp are great feeders, as well as breeders; that they have great confidence in him, will almost take bread crumbs out of his hand, and never fail to come to the surface when he calls them.—Prescott (Arizona) Courier.

The Monterey Argus says: "W. W. James was out fishing in the Carmel River, above the head of the Laureles ditch. He had two hooks on his line, and while fishing in a big hole, hooked a trout sixteen inches in length, and while trying to land it, another one about the same size grabbed the other hook. He succeeded in safely landing the two of them. Carter Wadhams, who was an eye-witness, says it was better than a circus."

THE RIFLE.

[Continued.]

The story of Robin Hood and Little John, who could do effective work with the crossbow a measured mile, is a good one, and could I be credulous enough to believe this "Robin Hood Story," it would make me a truly happy man; but I am unkind enough to believe that historians sometimes "draw the long-bow" with such striking imagination that to take the whole dose would be as fatal as barbed shafts would be when sent from the cross-bow by the well-trained arm of the skillful and ancient archer. The almost tragical story of "William Tell" is a good one, too, which I used to read when a great deal younger than I am now, with eye-balls protruding from their sockets and hair standing on end "like quills upon the fretful porcupine," but as mature age came upon me I classed it as a twin brother of poor old Rip Van Winkle, whose sleep for twenty years has been deeply impressed upon the young of America, so that every schoolboy can repeat the sad ordeal that the old man passed through during his long and eventful sleep. For five hundred years after the battle of Hastings, which was fought on the 14th of October, 1066, the archers of England formed a national guard, whose constant practice made them so efficient that all of Europe recognized their power, and the most vigilant care was taken by the government to maintain the advantage they had gained. It was obligatory for every able-bodied man, between the ages of 19 and 60 years, under a severe penalty, to have a bow of his own length and a quantity of arrows, and to do a certain amount of practice each week in target shooting, but and targets being established by the Government in every parish at the distances regulated by law.

Holidays were always celebrated by prize shooting, under the supervision of government officials, and every effort was used to create a popular feeling in this national sport until it became the universal recreation on which the power and even the very existence and solidity of the nation depended.

England is indebted much to the cross-bow for the power that she possesses to-day among the nations of the earth, and I have often thought that the cross-bow would be a better and more appropriate national emblem, or insignia, than that of the snapping and roaring lion. But the lion in all ages has been considered the king brute of the jungle and the forest, while England for centuries, by her well-conducted commercial relations among the nations of the earth, has been regarded as the king of the seas.

In the life of Bruce, written by Barker, we are informed that guns were used by the English in the year 1327, at the battle of Merewater; but their clumsy and uncouth form made them little better than the sling and bow. Therefore the use of guns as implements of war only dates back some five hundred years.

And the antiquated specimens that are preserved among the English curators, with their drawings and designs, are preserved with the utmost care, and their examination, and comparison, with fire-arms of the present day, must convince any one that they were almost worthless, and one wonders how they could have been used to any advantage. The old English musqueteer was so burdened with paraphernalia and accoutrements, that it weighed him down, and made him an encumbered soldier. Besides being forced to pack or carry his cumbersome and unwieldy weapon, he had his can of coarse powder for loading his musket, his horn of fine powder for priming in a touch-box, his bullets in a leathern bag down deep in his pocket, which flaxen slings to draw to get to them, while in his hand was his ram-rod, his gun rest, and burning match; and getting on his knees to sight and level his piece, he would apply the torch made from tar or pitch, then rising to go through the same manipulation in reloading, not knowing what kind of execution, the spent bullet had done. It must have been unsatisfactory and discouraging at least to the fatigued soldier. Hence it was a long time, in deciding the superiority of the musket, over the natives' favorite weapon, the cross-bow.

But slowly the change took place, and only as improvement after improvement of the firearm was accomplished, did its unwieldy proportions gave place to a more symmet-

rical and easily manipulated piece. But even then it took a great display of oratory upon the rostrum, and annual exhibitions of the musket, by the best practical mechanics of the time, to get the disciples of the cross-bow to admit the superiority of the musket over their long-cherished and long-admired bow; and it required two centuries of hard work for the devotees of the musket before it became universally acknowledged as a more destructive engine of war; and for four hundred years the quivers of Cloth-yard shafts have been supplanted by bright bristling bayonets, festooned, as it were, upon the muzzles of the muskets.

Many splendid exhibitions of mechanical ingenuity have been left us to study and ponder over, consisting of rational and complex ideas, from which much of our present and improved firearms took their origin. We find in many instances the laws of mechanism closely observed, and even scientific principles are manifest in many of the early productions, that now govern the laws that regulate and perfect our present system of gunnery. A more perfect knowledge of what has been done by our predecessors would prove a great boon to our race, and, especially, our generation. European nations, more especially France, have made ample provisions for this by their museums of antiquated arts—the like of which we want—a museum of progression, an epitome of the great mechanical minds of the present age, handed down from generation to generation, so that no man would be assigned the laborious task of pulling, by night and by day, on an endless rope. Thanks to those men who have deemed the science and laws of gunnery of sufficient importance to warrant them to engage in the laborious undertaking of compiling facts and data; and I will say, the greatest benefactor in this important matter will be he who will have the ability to blow away the cobwebs of mystery, rendering each improvement to him who is entitled to it.

Nothing now remains of the once beautiful machinery of the old flintlock—the tens of thousands that were used by our Fathers in the Revolutionary war; not one can be seen. In its day it was a great improvement, and the whole world looked upon it as the *ne plus ultra* of a lock. The fancy cock and hammers have given place to a "Simple" hammer striking on a little thimble containing fulminates seated in the butt of the breech-loading cartridge.

(To be Continued.)

MARKET REPORT.

WHEAT—On Thursday the first consignment of the new crop came to hand. The same was grown near Stockton, was fair in quality and sold for \$1 67.

Harvesting is now being pushed forward in nearly all sections of the State, and before the close of the month the deliveries at tide-water will be of considerable importance. As to the yield, there is a great diversity of opinion, but it is probable that we will have a fair average crop, though in the southern farming districts the product will certainly show a material decrease as compared with the two preceding harvests. During the year ended June 30th we dispatched 559 vessels loaded with wheat and flour, carrying 890,850 bbls of flour and 22,279,000 ctls of wheat, valued at \$40,707,250. In no previous years were the shipments so large or the value so great. The local market has been steady for a month past, the variation in prices having been only fractional. At present there is little disposition to purchase for forward delivery, and both exporters and millers are other than anxious bidders for parcels for immediate use. The market on Thursday showed a rather better feeling, consequent upon more favorable advices for English and Continental markets. At the close shippers would pay \$1 70 for desirable parcels, and the choicest milling could not be had for less than about \$1 72 1/2 per ctl.

BARLEY—Under continued free arrivals of new feed, the market is weak at \$1 16 1/2 for No. 1, and \$1 14 for No. 2 feed. Old brewing is scarce and wanted at \$2 per ctl for choice. Chevalier is neglected, yet there is some inquiry for future delivery of choice—presumably for export—but prices offered are considerably below growers' views.

OATS—Samples of the new crop have been exhibited on Change, and consignments are expected from the Salinas Valley before the close of the week. Buyers are shy, and sellers are liberal in their offerings, and so persistent that the market has a weak and declining tendency. No. 1 are quotable at \$1 55 1/2 to \$1 57 1/2, and extra choice could not be placed above \$1 67 1/2 per ctl.

CORN—There is an active speculative demand for No. 2 large yellow, for October delivery, at \$1 60 1/2 to \$1 62 1/2, but sellers are scarce, as no considerable consignments of the new crop are expected previous to about the middle of November. Choice large yellow, immediate delivery, is quotable at \$1 80 1/2 to \$1 85. Small parcels of No. 1 Nebraska are offered at \$1 72 1/2 per ctl. Reports from the southern counties indicate that the yield will be fairly up to an average—but the accuracy of such information is questioned by the speculative element, and consequently there is no active bidding for future deliveries.

RYE—Stocks are known to be exceedingly light, and as there is no demand, trade is at a standstill. For parcels of choice, for immediate delivery, \$1 95 per ctl is the asking price.

BUCKWHEAT—Offerings are fair, but, in the absence of demand, the market is entirely nominal at \$1 35 1/2 to 50 per ctl.

BRAN—Consumers show no disposition to purchase more than enough to meet immediate wants, and there is an entire absence of any speculative demand. Spot lots are held at \$13 25, with \$13 10 per ton bid.

FEED—The jobbing prices from the mills are as follows: Shorts, \$20 1/2 to \$21; Middlings, \$25 1/2 to \$26; Ground Barley, \$28 1/2 to \$30 for new, \$34 1/2 to \$36 for old; Oil Cake Meal, \$27 50; Cornmeal, \$39 per ton.

SEEDS—Mustard is scarce and in demand at 4 1/2 to 5 for brown, and 2 1/2 to 3 for yellow; Canary, 5 1/2; Alfalfa, 13 1/2 to 14 per lb.

POTATOES—Receipts by trains are increasing. The market is steady at 75c to \$1 20 per cwt for choice in boxes and sacks respectively.

ONIONS—Reds sell slowly at 50c, while Silverskins of good quality command 75c per cwt.

BUTTER—With lessened receipts, stocks are being rapidly worked off and there is a better tone to the market. Fair to choice ranch, 23 1/2 to 24 1/2; mixed lots from country stores, 22 1/2 to 23 1/2; firkin, 23 1/2 to 24 1/2 per lb.

CHEESE—There is a good demand for California manufacture at 12 1/2 to 13 1/2 c per lb.

EGGS—Choice ranch readily sell for 26 1/2 to 28c, while fair to good are quotable at 24 1/2 to 25c; Farallone sell in a jobbing way at 30c per doz.

GAME—Arrivals of venison are free, but the demand is active and prices are firm at 10 1/2 to 15c, as to condition. Doves are a drug in the market and difficult of sale at 50c to 75c per doz. Hares and rabbits are scarce; the former sell for \$2 1/2 to 25, and the latter for \$1 1/2 to 25 per doz.

POULTRY—Arrivals are light and high prices rule. Live turkeys, 15 to 19c per lb; geese, \$1 1/2 to 1 75 per pair for young and old; ducks, \$4 1/2 to 5 1/2; broilers, \$3 1/2 to 4; young roosters, \$2 1/2 to 3; old, \$5 1/2 to 6 per doz.

HONEY—Reports from the southern counties are not favorable for an excessive yield, but the quality is expected to be unusually good. Comb, 17 1/2 to 18c; light extracted, 8 1/2 to 9c per lb.

PROVISIONS—The local packers are taxed to about their utmost limit of manufacture of hog products. The demand is good and market firm. California hams, 14 1/2 to 15c; Eastern sugar-cured, 16 1/2 to 17c; bacon, 15 1/2 to 16c for heavy and medium, and 16 1/2 to 17c for light and extra light; Lard, in tierces, 14 1/2 to 15c per lb; extra prime pork, \$21 1/2 to 22; extra clear do, \$23 1/2 to 24 per bbl.

TALLOW—Demand is active and market strong. Rendered, 7 1/2 to 8c per lb.

WOOL—Oregon is sending liberal consignments of her spring clip, nearly 1,600 bales having come to hand by the steamer Oregon. There being no buyers, trade is at a standstill, and the outlook is other than favorable for an increased activity in business or an enhancement in values. Quotations are more or less nominal. Northern, 23 1/2 to 24c; Southern, 15c to 22c; foothill, 22 1/2 to 24c per lb.

FRUITS—Nearly all kinds of seasonable fruits are in abundant supply. Figs, 75c to \$1 per box; peaches, 35c to 50c per bskt; apples, 50c to 60c per bskt, and 75c to \$1 25 per box; pears, \$1 1/2 to 25 per box; cherries, \$8 to 12 per chest; raspberries, \$7 to 8 per chest; blackberries, \$9 to 10 per chest; strawberries, \$8 to 12 per chest; currants, \$2 50 to \$3 50 per chest; plums, 3 1/2 to 5 per lb; apricots, 75c to \$1 per box or basket.

VEGETABLES—The market is liberally supplied. Summer squash, 25c to 75c; tomatoes, 50c to 60c; cucumbers, 50c to \$1 25; asparagus, \$1; rhubarb, 75c to \$1 per box; green corn, 8 1/2 to 15c per doz; string beans, 2 1/2 to 4c; okra, 20c to 25c; egg plant, 5c; green peppers, 8c to 12c per lb.

BAGS—Standard Calcutta, 9 1/2c; local wheat bags, 8 1/2c; wool bags, 44c to 50c; potato gunnies, 18 to 19c.

ROWING NOTES.

Talking about Hanlon reminds us of the champion's sickness, which is evidently genuine. The doctor's certificate has been produced to show that the invincible Canadian is suffering from typhoid fever. It would seem that, under the circumstances, Ross would have relinquished his claims in the champion's purse and consented to a postponement of the race. The Brunswickers prefer, however, to hold the Toronto man to the strict letter of the articles, and has wired him that he will claim forfeit and the championship unless the invalid leaves his sick bed to run. This is a very ungraceful proceeding for Mr. Ross, and the indignation which his action has aroused in Toronto will be generally shared by all honest, manly admirers of aquatic sport. The Brunswickers threaten that he will claim the championship does not appear to trouble Hanlon much. "Let him take it," said the prostrate champion; "when I get well I'll beat him." And beat him he will. It ought to be no trick to beat a man who would seek to make glory by dragging a fever patient out of his bed to run. Besides, there is nothing in Mr. Ross' record to show that he can keep within hailing distance of Hanlon over a full championship course. He has been beaten twice by the champion. It is said that since then Ross has improved. Any one who thinks that while Ross has been making this improvement Hanlon has stood still, or fallen off, will make a grievous mistake. The best judges of rowing think that he is to-day incomparably superior to what he was when he defeated Courtney at Lachine.

The fact that Ross beat Hanlon on the Hop Bitters Regatta proves nothing. The defect of a professional oarsman in a race where he has not a cent staked and has not spent a dollar in training is of no importance. It is far more significant that in each match with Ross the champion has won easily. One would think that the result of the recent race between Hanlon and Trickett would have discouraged the supporters of Ross. The Australian rowed the Brunswickers two very hard races, and will at any time extend him, whereas in his races with Hanlon, Trickett each time brought up the rear of a very uninteresting procession. Another point which is generally overlooked is the fact that in the regatta in which Ross astonished the rowing world and himself by heading Hanlon, he did not show such tremendous pace at the start. Both Boyd and Hanlon led the Brunswickers for a distance, and it was not until the race between the Englishman and the Canadian was over, that Ross forged up and went ahead. Many Eastern oarsmen think that the interest taken in Ross by Davis and Kennedy shows that the Brunswickers must have been doing some terrific private trials. Perhaps he has, but who knows what the private trials of Hanlon have been like?

Moreover, even the ingenious Mr. Davis is liable to be mistaken. He had for a long time and perhaps even yet cherished the belief that he could have beaten Courtney in his best and most popular days—but he never did it.

THE HILLSDALE CREW.—The London Sportsman says: It is difficult to believe that the Hillsdales are the best amateur crew America can produce. In rowing under favorable circumstances, on Wednesday last, they got a pace on the boat, but the time of the oars was lost and irregular, and the work was left entirely to the arms.

[New York Spirit of the Times.]

Meanderings in the Metropolis.

With the departure of Winter, and the return of the longed-for days of Spring, there will come, no doubt, unwonted activity in the market for fine animals. This, at least, is the general impression, based upon the large and profitable business done in every line during the past year, and the consequent tendency on the part of gentlemen of taste to gratify their ideas and fancy by investing in horse-flesh. With these impressions upon his mind, the writer sauntered into the commodious New York Club Stables, 15 and 17 East Twenty-eighth street, between Fifth and Madison avenues, owned and managed by Mr. Calvin M. Priest, whose genial manners and finely stocked stalls have attracted to him a valued and appreciative constituency. The fact that his rare experience with horse-flesh gave him charge of Mr. Robert Bonner's stock years ago is sufficient guaranty of his responsibility. During this time we had gone the round of the stable, and turning we came upon a fancy cupboard, pointing to which the writer asked its purpose. "Oh!" said Mr. Priest, "that contains something of especial value to us horsemen; no doubt you've heard of it, but you shall see it." And opening the door, what should greet our sight but an ample supply of St. Jacobs Oil. "Do you have much faith in that?" we asked of Mr. Priest. With a look that signified

much more than his words, he deliberately said: "We keep our stables constantly supplied with St. Jacobs Oil, buying a case at a time; and it gives us pleasure to bear testimony to its marvelous healing and pain-relieving properties. In rheumatic affections, cuts, bruises and similar painful ailments, so frequently occurring among horses and human beings, we have yet to find anything equal to the 'Great German Remedy.'" Thanking Mr. Priest, the writer withdrew, and walking a few steps, came to the popular Empire Stables, 4 and 6 East Twenty-eighth street, kept by Mr. S. H. Mason, at whose mammoth establishment are to be found the finest carriages in New York. Speaking with Mr. Mason upon the matter, still in our mind from the conversation with Mr. Priest, Mr. M. freely and strongly endorsed all that Mr. Priest had said regarding the Great German Remedy. Pointing to a fine looking animal, Mr. Mason observed: "There stands a good illustration of the efficacy of St. Jacobs Oil. He was cut severely a few days ago, and by daily application of the Oil he has recovered, without a scar, and we will work him to-morrow. Calling at the Sturtevant House to see a friend whom should we meet there (how strange the coincidence of names!) but Mr. W. H. Sturtevant, of Newport, Vt., who is sojourning in the metropolis at present. Knowing the interest Mr. Sturtevant took in fine stock, we naturally drifted into that subject, and as naturally touched upon the ailments of the horse. After expatiating upon the numerous means and remedies employed at various times and under various conditions, Mr. S. added: "Having owned a large number of trotting horses, as well as carriage and driving horses in great numbers, (such valuable stock as Vermont Boy, Junot, Kit Carson, black gelding General, Thunderbolt, and many others) it gives me pleasure to testify to the curative qualities of St. Jacobs Oil for all the afflictions that man or horse is heir to, and to state that, in all my experience among horses with the Great German Remedy, I have never yet seen its equal." Continuing at some length, Mr. Sturtevant cited case after case where the St. Jacobs Oil had certainly effected remarkable results in diseases of, and accidents to horses. Mr. L. H. Durr, of Milwaukee, Wis., who was also stopping at the Sturtevant House, and who happened to join us during the above narration of Mr. S., volunteered the experience that he had used St. Jacobs Oil for a very stubborn case of rheumatism in his family at home with eminent satisfaction, and had seen it used on one of the largest stock farms in Wisconsin, with most gratifying success. The writer had learned all that he started out to discover, and vastly more beside, and could not, with the abundance of evidence before his eyes, feel otherwise than impressed with the surpassing value of a substance whose virtue and record could boast such endorsers as those who were testifying, the country over, to the magical efficacy of the article above referred to.

Cobb, Bovee & Co.,

Real Estate and General Auctioneers

OFFICE AND SALESROOM

No. 321 Montgomery Street,
ODD FELLOWS' BUILDING.

Real Estate Sale Day, Thursday.

Sales at Public or Private Sale of Real Estate, Estate Sales, Receivers', Assignees', Trust and Administrators' Sales, Merchandise, Furniture, Stock and outdoor Sale of all description solicited and carefully attended to. REVISED SPEED PROGRAMME
FOR 1882.

FOURTH ANNUAL MEETING

OF THE

SONOMA COUNTY

Agricultural Park Association,
AT SANTA ROSA.

FIRST DAY—Tuesday, Aug. 22, 1882.

No. 1—TROTTLING RACE. Free for all two-year-olds owned in the District. Mile heats, 2 best in 3; purse, \$200. First horse, \$120; second, \$60; third, \$20. Commencing on the first day of May with the following entries:
E. B. Conway names ch. c. Ideal, by Abbottsford.
J. E. Foster names s. m. Clara Patterson, by Grey McClellan.
G. C. Fountain names blk. f. May Day, by Eugene Casarley.
P. J. Shafter names g. h. Greyson, by brother to Rustic. Steve Crandall names b. f. no name, sire unknown.
No. 2—TROTTLING RACE. Free for all horses that never beat 2:35; purse, \$400. First horse, \$240; second, \$120; third, \$40.

SECOND DAY—Wednesday, Aug. 23.

No. 3—RUNNING RACE. Half mile heats; 3 best in 5, free to all; purse, \$250. First horse, \$150; second, \$75; third, \$25.
No. 4—PACING RACE. Free to all horses that never beat 2:25; purse, \$300. First horse, \$200; second, \$75; third, \$25.

THIRD DAY—Thursday, Aug. 24.

No. 5—TROTTLING RACE. Free for all three-year-olds owned in the District; purse, \$300. First horse, \$180; second, \$90; third, \$30. Closed May 1st, with the following entries:
C. Stingell names b. f. Debby Mott, by Grey McClellan.
W. J. Starr names blk. f. Starr, by Naubuck.
E. B. Conley names h. c. Magnet, by Brigadier.
J. E. Foster names br. s. Buck Foster, by Gen'l Dana.
W. M. Wood names h. c. Nod, by Overland.
L. H. Boggs names h. c. Warwick, by Milton Medinn.
No. 6—TROTTLING RACE. Free for all that never beat 2:25; purse, \$500. First horse, \$300; second, \$150; third, \$50.

FOURTH DAY—Friday, Aug. 25.

No. 7—TROTTLING RACE. Free to all horses that never beat 2:40; purse, \$500. First horse, \$300; second, \$150; third, \$50.
No. 8—RUNNING RACE. Free for all; single dash; one mile; purse, \$200. First horse, \$120; second, \$60; third, \$20.
No. 9—TROTTLING RACE. Free for all horses that never beat 2:30; purse, \$300. First horse, \$30; second, \$150; third, \$50.

FIFTH DAY—Saturday, Aug. 26.

No. 10—RUNNING RACE. Free for all three-year-olds one mile and repeat; purse, \$200. First horse, \$120; second, \$60; third, \$20.
No. 11—TROTTLING RACE. Free to all that never beat 2:21; purse, \$700. First horse, \$400; second, \$200; third, \$100.

ENTRIES.

1. Entries must be made in writing and dated, and give sex, color and marks of horse; also name and residence of owner.
2. State number of the race in which you wish to enter.
3. State name of sire and dam of horse entered if known; if unknown, state the fact.
4. State name and postoffice address of party entering the horse.
5. If name of horse has been changed, state former name.
6. Send entrance fee to all nominations.

CONDITIONS.

1. Entries to all races, except Nos. 1 and 5, to close with the Secretary at 12 o'clock on Monday, the first day of August, 1882.
2. Entrance fee to the above races will be 10 per cent. of the purse, and must accompany the nomination.
3. In all races five to enter and three to start. Any horse distanced or not starting will forfeit his entrance fee. No money will be paid for a walk over.
4. Rules of the Pacific Blood Horse Association to govern running races, and of the National Trotting Association to govern trotting.
5. No horse entered in a purse can be withdrawn except by consent of the Judges.
6. All trotting and pacing races, except No. 1, will be mile heats, 3 best in 5.

J. P. CLARK, President.

CHARLES HOFFER, Secretary.

Pacific Breeders' Association.

Embryo Trotting Stakes, 1882.

Sweepstakes for foals, 1882, \$100 each; \$25 forfeit; \$10 declaration; \$5 nomination fee.

There are three stakes under the denomination of Embryo for 1882, viz., for yearling, two-year-olds, and three-year-olds. The nominator chooses whether he will name in one or all of them. The yearling distance is a dash of a mile; two-year-olds, heats of a mile, (2 in 3); three-year-olds, 3 in 5—all in harness. Five dollars must accompany the nomination; the declaration, \$10; on or before the 1st of September of the year the race is to be trotted; the forfeit, \$25, on or before the day, which is ten days previous to the date fixed for the race. If the declaration or forfeit is not paid at the specified time, the subscriber will be held for the full amount of the stake. Pedigree, color, marks, and date of foaling must be given, and the following will be the form for making the nomination:

Seey Pacific Breeders' Association. I name In Embryo Stake of 1882, the — colt (or filly), foaled —, 1882, by —, dam —, by —, in the Stakes of 1883, 1884, 1885, if the nominator desires to enter in all of the Stakes. If he desires to name in one or more, specify which years. The \$5 fee covers the first expense if the colt is named in one or all of the races; payment of the declaration \$10 absolves from further payments. The race to be trotted on the first Saturday of November of each year, if good day and track, and on the track named by the officers of the Association. If the day or track is not good, on the first good day and track following the date. The winner shall receive six-ninths of the whole sum, stakes, forfeits, and other sources of revenue; the second, two-ninths; the third, one-ninth. National Trotting Association Rules of 1882 to govern. Nominations to be made to J. H. CARR, SECRETARY, office of BREKIDEN AND SPORTSMAN, 508 Montgomery Street, San Francisco. JAMES MCM. SHAFER, President. A. P. WHITNEY, Vice-President. N. T. SMITH, Treasurer. J. H. CARR, Secretary pro tem.

SPEED PROGRAMME FOR 1882

\$10,000

IN

Stakes and Prizes

FIRST DAY—MONDAY, SEPT. 4, 1882.

No. 1—RUNNING—GOLDEN GATE STAKE.—For all two-year-olds; three-quarter mile dash; \$500 entrance; \$15 forfeit; \$150 added; second colt to save stake; winners 5 pounds extra.

No. 2—SAME DAY—RUNNING.—ALAMEDA STAKE.—For three-year-olds; one and one-half mile dash; \$75 entrance; \$25 forfeit; \$175 added; second to save stake.

No. 3—SAME DAY—RUNNING.—PARDEE STAKE.—Free for all; one mile and repeat; \$75 entrance; \$25 forfeit; \$50 added; second to save stake.

No. 4—SAME DAY—TROTTING.—2:40 Class; purse, \$300; first horse, \$300; second, \$150; third, \$50.

No. 5—SAME DAY—SPECIAL TROT AGAINST TIME.—\$1500 in plate will be awarded any stallion that beats Santa Claus' time (2:17).

SECOND DAY—TUESDAY, SEPT. 5.

No. 6—TROTTING.—2:30 Class; purse, \$300; first horse, \$450; second, \$240; third, \$80.

No. 7—SAME DAY—PACING.—Purse, \$300; first horse, \$300; second, \$150; third, \$50.

Washington and Johnny Wiegler, to wagon.

THIRD DAY—WEDNESDAY, SEPT. 6.

No. 8—RUNNING.—Free for all; 2-mile dash; \$100 entrance; \$25 forfeit; \$250 added; second horse to save stake.

No. 9—SAME DAY—TROTTING.—Free for all three-year-olds; purse, \$300; first horse, \$300; second, \$150; third, \$50.

No. 10—SAME DAY—TROTTING.—2:22 Class; purse, \$300; first horse, \$450; second, \$240; third, \$80.

FOURTH DAY—THURSDAY, SEPT. 7.

No. 11—TROTTING.—Free for all two-year-olds; one mile and repeat; purse, \$400; first horse, \$240; second, \$120; third, \$40.

No. 12—SAME DAY—TROTTING.—For all four-year-olds; purse, \$300; first horse, \$300; second, \$180; third, \$60.

No. 13—SAME DAY—RUNNING.—SELLING RACE.—Purse, \$250; free for all; 1-mile dash; second horse to receive \$75; horses entered to be sold for \$1,000, to carry entitled weight; 2 pounds off for each \$100 under fixed valuation.

FIFTH DAY—FRIDAY, SEPT. 8.

No. 14—RUNNING.—CONSOLATION PURSE.—\$250 for beaten horses; mile-and-a-quarter dash; second horse to receive \$75; 10 per cent. entrance.

No. 15—SAME DAY—LADIES' RIDING TOURNAMENT.—There will be several very choice and elegant prizes to be competed for, contributed by the merchants and citizens of Oakland and San Francisco; the lady winning first prize to have first choice, the second, second choice, and so on until all the prizes are distributed. Ladies wishing to compete for premiums will send their names to the President or Secretary on or before the first day of September, 1882, indorsed by at least two gentlemen of the Society. Conditions will be published in the daily papers.

No. 16—SAME DAY—TROTTING.—2:25 Class.—Purse, \$300; first horse, \$480; second, \$240; third, \$80.

No. 17—SAME DAY—SPECIAL TROT AGAINST TIME.—A purse of \$50 will be given the yearling making the best time; a full mile to harness; no entrance fee.

SIXTH DAY—SATURDAY, SEPT. 9.

No. 18—COMPETITIVE CADET DRILL.—PRIZE, \$100 Gold Medal. Competition open to all educational institutions in the State.

No. 19—SAME DAY—COMPETITIVE MILITARY DRILL.—A prize of the value of \$250 will be offered by the Association to the best drilled Military Company in the State of California. Rules and conditions to be published hereafter. It is the intent of the Directors to have the first competing companies determine what the prize or trophy shall be, and to have the same annually competed for, until it shall have been won three times by the same company, when it shall become the absolute property of the winning company.

No. 20—SAME DAY—GRAND BICYCLE TOURNAMENT, for the Association's Gold Medal to first, Silver Medal to second, and Bronze Medal to third; 1-mile dash; open to all bicyclists.

No. 21—SAME DAY—TROTTING.—Free for all; purse, \$500; first horse, \$480; second, \$240; third, \$80.

No. 22—SAME DAY—A SET OF HAIRNESS, of the value of \$125, will be offered for gentlemen's roadsters; best two in three; owners to drive.

By a "gentleman's roadster," is meant any animal owned and driven on the road by any gentleman for his own private pleasure.

CONDITIONS.

Entries to all running stakes, trotting and pacing races, to be made to Secretary Walker, on or before August 1, 1882. Forfeits in running stakes, and the entrance fee of 10 per cent. on the trotting and pacing races, should in all cases accompany the nominations and entries.

All the trotting and pacing races are the best three in five. In all, five to enter, and three to start.

Entrance fee, ten per cent. on purse.

When there are eight or more starters in a trotting race, 150 yards to be a distance.

National Trotting Association rules to govern trotting, but the Board reserves the right to trot heats with any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

All offers in trotting races are confined to horses on the Pacific Coast, May 22, 1882.

In running races, three or more entries required to fill. Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous. No added money will be paid for a walk-over.

Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood Horse Association to govern running races, except as above specially provided.

All entries to be made in writing, to give sex, color and marks of horses; also, name and residence of owner; and in running races colors to be worn by the rider. And in all, any other particulars that will enable the spectators to distinguish the horses in the race.

Write "Entries to Races" on outside of envelope.

L. WALKER,

Secretary.

A. C. DIETZ,

First Clerk.

No. 11—RUNNING.—SELLING RACE.—Purse, \$250; one and one-eighth miles; second horse, \$100; entrance, five per cent. to third horse. Horses entered to be sold for \$1,000, to carry entitled weight. Two pounds off for each \$100 under fixed valuation.

No. 12—TROTTING.—2:30 class; purse, \$1,200.

FOURTH DAY—THURSDAY, SEPT. 14.

No. 13—TROTTING.—2:22 class; purse, \$1,200.

No. 14—PACING.—2:25 class; purse, \$500.

No. 15—TROTTING.—Two miles and repeat; 2:40 horses; purse, \$800.

FIFTH DAY—FRIDAY, SEPT. 15.

No. 16—RUNNING.—COLT AND FILLY STAKE.—For two year olds; dash of one mile; \$50 entrance, \$15 forfeit, \$200 added; second horse, \$50; third, \$25.

No. 17—RUNNING.—SELLING RACE.—Purse, \$300; for all ages; dash of one and a quarter miles; \$100 to second horse; entrance, five per cent. to third; horses entered to be sold for \$1,500 carry full weight; for \$1,200, three pounds off; for \$1,000, five pounds off; for \$750, seven pounds off; for \$500, ten pounds off.

No. 18—RUNNING.—POST STAKE.—Dash of three miles; free for all; \$100 entrance; \$500 added; weight 100 pounds; three-year-olds, 90 pounds; second horse to receive \$150; third, \$100. Starters to be named to the Secretary Wednesday evening, at or before 5 o'clock P. M.

No. 19—RUNNING.—CONSOLATION PURSE.—\$250 for beaten horses; one mile and repeat; entrance free; second horse to receive \$50.

SIXTH DAY—SATURDAY, SEPT. 16.

No. 20—TROTTING.—2:15 class; purse, \$1,200.

No. 21—TROTTING.—Purse, \$800; for double teams of 2-30 horses.

No. 22—TROTTING.—OCCIDENT STAKE FOR 1882, closed in 1881 with twelve nominations.

No. 23—SPECIAL TROT AGAINST TIME.—\$250 in plate will be awarded to any stallion that beats Santa Claus' time (2:17).

Entries for the following events for 1883-4 were ordered to be closed with the above races:

No. 1—RUNNING.—CALIFORNIA DERBY STAKE, for foals of 1880, to be run at the State Fair of 1883. One and one-half miles dash; \$50 entrance, p. p.; \$300 added; second horse, \$100; third, \$50.

No. 2—SAME STAKE, at or before 1881, to be run at State Fair of 1884. Same conditions.

No. 3—RUNNING.—MATURITY STAKE.—Three-mile dash, for four-year-olds, in 1883; \$100 entrance; \$25 forfeit; \$500 added; second horse, \$150; third horse, \$100. To be run at the State Fair of 1883.

No. 4—RUNNING.—CALIFORNIA ANNUAL STAKE.—For two-year-olds, foals of 1881. Dash of one mile; \$100 entrance; \$25 forfeit; \$250 added; second horse, \$100; third, \$50. To be run at the Fair of 1883.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year-old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.

Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous, by twelve o'clock M. This rule is obvious, and must be strictly adhered to.

No added money paid for a walk-over.

Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries to be made in writing, giving name, sex, color, and marks of horses; also, name and residence of owner. In running races, full colors to be worn by rider; and drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers. This is necessary to enable spectators to distinguish the horses in the race.

Entries to all the above races to close with the Secretary on Tuesday, August 1, 1882.

Write "Entries to Races" on outside of envelope.

THURSDAY, SEPT. 21ST.

No. 8—PACIFIC COAST RUNNING.—Mile and repeat; purse \$500, and if 1:43 is beaten, the horse making the low record will receive \$200 additional. Four moneys.

No. 9—DISTRICT—TROT.—For two-year-olds; purse \$800. Closed with ten entries.

Ladies' Equestrianism.

Four Prizes in Gold Coin. \$40, \$30, \$20, \$10.

No. 10—DISTRICT—TROT.—2:38 Class; purse \$800; 7 to enter, 4 to start. Four moneys.

FRIDAY, SEPT. 22D.

No. 11—PACIFIC COAST—RUNNING.—Free for all; two miles and repeat; purse \$800, and \$200 added if more than ten entries. Four moneys.

No. 12—DISTRICT—RUNNING.—For three-year-olds and over; purse \$500; best two in three; 7 to enter, 4 to start. Four moneys.

No. 13—PACIFIC COAST TROT.—For horses owned on the Pacific Coast, July 1st, 1882; 2:22 Class; purse \$1,500, and \$500 added if more than ten subscribers. The nominator not required to name his horse, but simply send his cash (\$150) with his own name, August 1, 1882. He has then earned the right to start any horse eligible that he may fully control, provided the horse be started by the Secretary, September 1, 1882. Four moneys.

SATURDAY, SEPT. 23D.

No. 14—PACIFIC COAST TROT.—2:28 Class; purse \$1,000, and \$200 added if more than ten entries. Four moneys.

No. 15—PACIFIC COAST PACING.—2:25 Class; purse \$400, and \$200 added if more than ten entries. Four moneys.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.

In all these Races (Pacific Coast Novelty Race excepted) four moneys, 50, 25, 15 and 10 per cent. of purse. Entrance fee, 10 per cent. on purse, and must accompany the nomination. District Races will close with the Secretary at 5 o'clock P. M. of July 15, 1882. Pacific Coast Races to close with the Secretary August 1, 1882.

When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.

As the National Trotting Association to govern trotting, except as above specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.

All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above, otherwise, old weights to govern.

For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.

Horses entered in purses can only be drawn by consent of the Judges.

The Board reserves the right to change the day and hour of any race, if they deem it necessary.

Unless otherwise ordered by the Board, no horse shall be qualified to enter in any District Race that has not been owned in the District six (6) months prior to the day of the race; and any entry by any person of any horse so disqualified shall be held liable for the entrance fee so contracted without any right to compete, and the same shall be held liable to penalties prescribed by the Rules of the National Trotting Association and expulsion from this Association.

Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as especially provided.

In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.

In all the Coast Races noted above, SIX ENTRIES are required to fill, and three horses to start; but the Board RESERVE THE RIGHT TO CLOSE ANY RACE WITH A LESS NUMBER.

Races to commence each day at 1 o'clock P. M. sharp.

The track is first-class, having been improved. Stables, hay and straw free to competitors.

ENTRIES.

1st. Entries must be made in writing and dated.

2nd. State number of the race in which you wish to enter.

3rd. State color of horse, and marks if necessary.

4th. State whether the horse is a STALLION, MARE or GELDING.

5th. State NAME OF SIRE AND DAM if known; if unknown, state the fact in the entry.

6th. State NAME AND P. O. ADDRESS of the owner of the horse entered.

7th. Sign with P. O. address of the party entering the horse.

8th. If the name has been changed, give former name.

9th. Repeat by mail, all entries made by telegraph.

Agricultural District No. 2, California, comprises the Counties of San Joaquin, Calaveras, Tuolumne, Stanislaus, Mariposa, Merced, Fresno, Tulare, and Kern.

L. U. SHIPPEE, President.

BREEDER AND SPORTSMAN

VOL. I.—No. 3
No. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, JULY 15, 1882.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

NOTABLE HORSES OF CALIFORNIA.

BELLE ECHO.

There is a pleasure in writing histories of horses, when the scribe feels that each is entitled to be ranked among the "notable horses of California." This gives them a rank which even the hypercritical will have to acknowledge; and when the portrait is on the first page of the BREEDER AND SPORTSMAN, it is well known that there is merit behind that which will not be questioned. There may be explanations needed of the Duchess of Norfolk, as the placing in the Illinois Derby did not warrant the predictions so confidently made. Still, there is the utmost confidence among her admirers that she will yet do something to merit the place given her, and that the future will show that she was entitled to the place awarded. But no one will question the right of Romero to a place, standing as he does in the foremost rank of four-year-old stallions; and when Belle Echo succeeds him in the list of the notables, it would be a super-hypercritical mind which denied her the place.

The portraiture is done with the fidelity which marks our artist's sketches. It is not an ideal horse which he repre-

sents, but the actual, tangible equine which he so skillfully portrays. The Belle of California stands on the page life-like, a drawing of what she is, not a fanciful representation, the life and blood fac-simile of the horse. There are points, however, which the pencil does not do justice to. Standing handsomely out on the page, even the casual observer would notice that the outlines marked a beautiful animal, and that the black and white lines had all the curves which Hogarth claimed to be the marks of grace and beauty. With all this, there is the necessity for more accurate portrayal. It is not enough to point to the page and say "there is a true representation." Every one who ever saw Belle Echo, and paid enough attention to her to remember her salient features, would recognize the picture. After all, there is a good deal to say. For instance, she is now nearly sixteen hands in height, the handsomest shade of bay conceivable, with just white enough to relieve the monotony of the whole color. From nose to heel she is beautiful—scarcely a point which could be found fault with by one who is a competent

judge of the form of a horse. But better still than form are performances, and Belle can show a grand record from the time she was first brought on the track. Her first race was at Sacramento, September 21, 1881, when, then a three-year-old, she won a stake in 2:48 $\frac{1}{4}$, 2:48 $\frac{1}{2}$, 2:49 $\frac{3}{4}$. At the same meeting, and the next day, she was beaten, Alexander Button getting the first money, Annie Laurie the second. She made a great race at San Jose, and, though defeated, showed that she was worthy of the place she has been given in these annals. She won the first heat in 2:28 $\frac{3}{4}$, the fastest time made by a three-year-old during that year, and she showed a capacity far within the recorded time, by going some parts of the route so much faster that it was evident that there was a reserve of force which would be sure to tell when the actual warfare came on.

It is needless to reiterate that the race at San Jose, fast as the mile was, showed that she was one of the notable horses. So sick that a competent veterinarian gave the opinion that one more heat would be likely to destroy her,

the owner took the chances in his determination to give those who supported her the best he could do for their money. She nearly died the night after the race, and there were grave doubts whether she would ever be the mare she gave the promise of. In her four-year-old form, however, she more than came up to the expectations of her friends.

The first race she trotted in 1881 was at the Golden Gate Fair, Romero, Alex. Button, Honesty and Annie Laurie being her competitors; and in the race she gained the record of 2:23 $\frac{1}{4}$, which is now to her credit. It is scarcely necessary to recapitulate the races between her and Romero. There were five heats in the race at Oakland, Belle winning the second and third heats, Romero the others; time 2:27, 2:23 $\frac{1}{4}$, 2:26, 2:22 $\frac{1}{2}$, 2:24 $\frac{1}{2}$. This race alone gives a value beyond the mere presentation of minutes and seconds, when it is compared with others in which colts of the same age contended. When Trinket trotted at Louisville, Kentucky, in 1879, a mile in 2:19 $\frac{1}{4}$, it was held by many to be as good a performance, reckoning of course on the age, and though a California two-year-old and a three-year-old bred in Kentucky have come within 1 $\frac{1}{4}$ seconds of trotting as fast, it has yet the first place. But the time of the five heats in the Oakland race has never been equaled by colts of that age, and this was followed by her winning in three straight heats at Sacramento, the time 2:27 $\frac{1}{4}$, 2:25 $\frac{1}{4}$, 2:25. Honesty, Alex. Button, and Annie Laurie were her competitors, and a short time afterwards she beat Romero on the Bay District Course, the colt winning the first heat in 2:24 $\frac{1}{4}$, the slowest of the four being 2:26. Romero reversed the decree a few days after, though she was close on him at the finish of every heat, and the three were made in 2:22 $\frac{1}{2}$, 2:25 $\frac{1}{2}$, 2:24, and then at San Jose she was again only beaten by a trifle by the grey, in 2:25 $\frac{1}{2}$, 2:23, 2:22 $\frac{1}{4}$. To lose in such fast time as every heat showed when she was beaten, was no discredit, and it could scarcely be held that Romero was greatly her superior, if even he had been the victor in a majority of the races in which they met. It is not necessary, however, to award a decided preference between the two cracks, numbers two and three of the notable horses of our coast. Her pedigree is a capital one by Echo, who is also the sire of Gibraltar, Echora, Bullet, Joe Hamilton and others; her dam by Belmont, the thoroughbred which has done so much for the stock of California.

OAKLAND LETTER.

OAKLAND, July 14, 1882.

BREEDER AND SPORTSMAN: To say that we in Oakland, whom you so accurately described in your Salutatory, are pleased with the new candidate for popular favor, THE BREEDER AND SPORTSMAN, would be to state it very mildly indeed. It does every man good once and again to hold the mirror up to himself to see what manner of man he is; and so we will read your "Greeting" once more: "To those who prefer the sunny side of life, who appreciate the many enjoyments the Great Creator has placed within our reach, who are not held in bondage by fanaticism to see merit in gloom, and to consider all diversion frivolous, if not absolutely wicked; to those who can discover the golden edging of the blackest cloud, and who have faith that there is always a silver lining within the shadow; to those who seek to make the bright days brighter, and who are earnest in their endeavors to increase the happiness of all, our greeting is presented." That's us, Mr. Editor! Upon that platform we will plant our feet boldly for all the future, and hide our victory over asceticism and gloom with patience and joy. Thank you much that you aim from the start to create and develop a love for the higher and purer pleasures that Mother Nature can give her loving children, and invite such a noble following, when you send special greeting to all "who are earnest in their endeavors to increase the happiness of all."

All hail, most royal missionary, upon whom the Great Father of all has set His seal!

Man's happiness is the final end and aim of all God's plans in all religions in all worlds, and just so far as you call man to true happiness, you are in harmony with the Divine plan of human development. And your paper shall be more potent than all pulpits, if you can plant an everlasting hunger in the hearts of your thousands of subscribers, to leave the deadly lowlands of the great cities' slums and sloughs, and flee with glad cries to the verdure of fields inviting the weary to rest, and to the still waters whispering of hope and peace to the despairing.

When you have withdrawn a man from muck-raking after gold, and led him to bathe in the fountains of "glad waters, where the spray is sparkling in the sunshine," and made him to rejoice over every pleasant and glad thing that the good God has planted along every step of life's highways, that man is being "born again;" and although some men may take a good deal of "horning," yet you have got him in the right path, and he may finally be saved if he is not too big an idiot.

I should be more than glad to know that your paper was a regular visitant to the counting-room of every business man, and was weekly welcomed on every minister's study table, for I think he would be the better for the reading of it, as I am sure his hearers would be the better for listening to a preacher large-minded and broad enough to read its lessons aright.

Let him but catch the fragrance of the fields in its columns, his sermons would fall on his world-weary listeners like the breath of new mown hay, and they would depart refreshed as from a glad communion.

Need I apologize to you, Mr. Editor, for writing this? I confess that when I began I didn't intend it, but I glanced

at your cheerful "Greeting," and my pen took the bits in its teeth and started off after you, so you are really responsible for the bolt. Well, I have pulled up my Pegasus at last, perhaps to the relief of some, who thought they sighted a sermon, and prepared to break themselves.

I do not know that I have much that is really new since my last letter. There are several new roadsters on our Oakland thoroughfares, and I had it in my mind to describe a few of them and their genial owners, who sit behind them and look as happy as if they held the reins of all power, as they speed along apparently oblivious of hard times and broken banks, but I'm afraid the pleasant task must be postponed until "a more convenient season." But I must be allowed to say that there are two men in our city who greatly delight men when they tackle each other on the road and struggle for the mastery, and the one begins his name with Dr. E. H. Pardee, and the initials of the other's name are Francis Blake. These two are numbered among our solid and representative business men, and while they cannot be called "fast" they are by no means *slow* when they start up their family horses for an airing. Mr. Blake is the happy owner of several good ones, but I judge his prime favorite, when business is on hand, is old Stockton well known to horsemen, while the Doctor rejoices in the ownership of a ranger chestnut gelding, yet in his youth, a son of Billy Hayward, and a good one, and whenever these good men meet, there is a very pretty rivalry for a front seat in the orchestra. They don't intend to try to beat each other. O, bless you, no; they are too good friends for that; but it always happens, when they kinder meet by chance on a good road, you know, one has a business engagement, which he is in a tremendous hurry to keep, and calls on old Stockton who winks his off eye, and says, "Here goes;" and then the Doctor suddenly remembers that he has got to meet a friend, and is a little late already, and the chestnut gets a hint to quicken his speed, and these good business horses just paw the dust for a few minutes, and sometimes one sees his friend before the other can keep his engagement, and then the other will be prompt on time, before the other can catch sight of his friend. They are both capital business horses, but the Doctor told me on the sly that he could see his friend oftener than Blake could keep his engagements; and when I asked the latter gentleman about it, he smiled and said that he had kept his business engagements more times than Blake had seen his friend. Well, gentlemen, to reconcile these little discrepancies, you had better take the Secretary along next time to record the minutes.

Your correspondent jogged out to Oakland Park, last Saturday morning, to see some of the horses take their work, and although he arrived a little late, he felt well repaid. As we landed on the steps of the hotel, Titus was just driving out Belle Echo, and Jimmy Duane was behind Albert W., both going in company for the second mile trial. They were looking remarkably well, and moving with elastic, limber motion, denoting fine condition. They both jogged up the stretch and, turning, came down and passed under the wire well together, and both going very fast, while several watches were started to catch the time. It was a very pretty sight, and both drivers were going faster than they thought, for when the quarter was reached, the watches marked 35 seconds, a 2:20 gait. Evidently Titus was a little surprised that he didn't shake off the colt, for he said afterwards that he knew he was driving Belle pretty sharply, but from this on, Albert W. slowed his gait, and Belle took the lead, both going very steadily and apparently within themselves. The mare made the half mile in 1:10 $\frac{1}{2}$, and the mile in 2:24, with all ease, while Albert W. was not far behind, making the mile in 2:26 $\frac{1}{4}$ —Pretty good for a 4-year old.

And now here are two more appearing to drive in company for a little fast work. One is the big brown gelding Bateman, piloted by his owner, Mr. Salisbury, and the other the bay mare Sweetness, owned by the same gentleman, and driven by her trainer, John Goldsmith. As Sweetness is a new mare to us, we take a good look at her as she moves along. She does not impress one at first as an animal of exceptional speed. She has great substance, and not the slightest sign of nervousness or flightiness as she jogs along, carrying her head rather low than otherwise. She shows in harness great depth at the girth, with grand propelling powers, and is thoroughly good all over, but still looking to our eyes more like a real fair business mare than a speedy trotter. But all this time they are moving up the stretch, and presently they turn and come down for the start, Sweetness well in hand and Bateman gathering himself for fast work; and as they pass us at about a three-minute gate, we can see that Sweetness's way of going is perfection itself—not a hitch nor a waver, but legs playing as true as pistou-roads in perfect line, and going with a most resolute gait, straight as an arrow from a bow. And now the strides quicken, and Bateman begins to tiptoe, and finally goes overboard as he rounds the first turn; but Salisbury sends him right on, the mare going as steady as clock-work. Goldsmith slows up a little, however, and Bateman regains his trot; and away they go again, down the back stretch, until the pace gets too hot, and Bateman is on the run again, with not a falter or a wobble on the part of the rightly named mare. And so, with Bateman sometimes running and sometimes trotting, they passed under the wire, and the watches mark 2:27 $\frac{1}{4}$.

Salisbury says in his quaint way that the boys are not going to play any more slow horses on him, when he drives, but must give him something that will enable him to keep in speaking distance. If Sweetness stands training she will make a record that is low down, or I am unable to read the signs aright. Before the buzz about the fine mare dies away, there appears a big slashing stallion, and I recognize Alonzo Hayward, driven by A. L. Hinds. He has just been taken up, and looks big and off form; but for all that I remember some of his performances, and I know that he is a right good one, and dead game in a race, as are all the family of Haywards; and it occurs to me here that as there are a good many of this family of horses on the track and in the hauds of gentlemen as roadsters, it may be as well to say a word about their origin, for the information of those who own good ones and are not quite familiar with their history. The sire of them all is the grey stallion Billy Hayward, bred and owned by H. A. Mayhew, of East Oakland, and a well-known grain broker of San Francisco. His sire was Geo. M. Patchen, Jr., commonly known in this State as old Patchen, and sometimes as California Patchen, and as everybody is familiar with his pedigree and performances, nothing further need be said by way of description. A few words, however, about Billy Hayward's dam may not be uninteresting. She was a grey mare brought to California from Janesville, Ill., in 1863, by a man of the name of Frost, and at that time called Grey Lize, but was afterwards

known as Peanuts. Her true breeding is a little obscure, and although a good many enquiries have been made, it is more than probable that it never will be positively known. It is claimed by some that she was by a Messenger Horse, that Frost brought from Baltimore, and others are just as positive that she was by the Morse Horse. In any event she was a very remarkable mare, and showed a great deal of breeding, and for invincible gameness has never had a superior. She both trotted and ran races, and was speedy in either way of going. She trotted one 20 mile race, but in what time we have no information. She was the mother of Young Peanuts, the dam of Sweet Brier. Billy Hayward himself has been a remarkably enduring horse, as well as a horse of great speed. With all due deference to his owner, I think, and always have thought, that the horse has never had the opportunities on the turf, or at the stud, that his true merits entitled him to. He has not always been in the best of hands, and has been used too many times with an eye to what could be captured, rather than to his highest development as a trotter.

He has stood more bruising races, coming out unscathed, than any horse we know. He was always a very dangerous horse in a hard race, when the heats were broken, for that was his opportunity, as he could trot all day, and the next day following. He won a great majority of the races in which he was entered, and has a record to his credit of 2:31 and a two-mile record of 5:13. His colts all trot, and many of them are very fast. Poscora Hayward, now the property of Hammond, is about the speediest, trotting a fourth heat as a four-year-old in 2:30, and the fifth heat in 2:31, and he is still a-comeing.

All this time Hinds has been driving Alonzo, only jogging him, however, as he is hardly far enough along to set going. His best record is 2:30, and he has all the gameness of his family, trotting a fifth heat in 2:32 $\frac{1}{2}$. He trotted a race of three-mile heats, in 1879, against Red Cross and Bullet, trotting the first two miles in the first heat in 5:06. He ought to be a good horse this season in his class. I intended following Hinds into his stable, and to give you readers a pen-picture of two or three that deserve special notice, particularly a beautiful bay three-year-old Nutwood filly, the property of Mr. Requa, of Piedmont, but this letter has lengthened to such proportions that I fear to provoke your editorial frown. There are several animals in Mart Rollins' stable that I purposed noticing a little more in detail, and many other good ones, but I must bid them wait until another time. W.

DEER SHOOTING.

HIGHLAND SPRINGS CAMP, July 4th, 1882.

EDITOR BREEDER AND SPORTSMAN: After patiently waiting for the season to come around, and being fully prepared for the opening deer hunt of the season, four of us in the party, were well mounted on experienced mountain horses, that can keep a trail the darkest night or pack a "buck" and ride over the roughest country where the deer is found in Lake county, and with hounds fresh and eager for the chase. We left camp at 3 o'clock P. M. on the 1st instant, and took a trail that leads directly west from our camp-ground, and followed over a rough range of mountains, well covered with chaparral, the gulches being timbered with oak, madrone, laurel and black alder. After keeping the trail for fully one mile, I concluded to follow a gulch leading to a bluff to our left, and instructed the balance of the party to keep the trail and meet me about a half mile distant on the top of a high ridge. The hounds had now become divided, the two oldest following in my direction, and by their actions indicated that there had been deer passing in the direction I was taking. The gulch soon became so steep that it was with the greatest effort that I could master my task. But, dismounting and taking the lead, my pony, with his usual experience, struggled till the top was reached. It never occurs, however, with the hunter to say "back" when every moment anticipating the starting of a deer. I had no sooner got there when I espied the Captain coming directly towards me in double-quick time, the balance of the party remaining behind about one hundred yards distant. The full pack of hounds had now come together and was moving through the chaparral in a rapid and anxious manner, indicating without a doubt that they meant business. We now left our horses and made for positions, as it was quite evident from the actions of the hounds that there was a deer close at hand. We had just gained positions when the old hound, "Rough," gave tongue, and the balance of the pack quickly joined in the music. The deer, it was now evident, had left his hiding place and was making up a very dense point, and could not be seen, owing to the thick growth of brush. The music was up now to a high key, every hound doing his level best, and making the mountains ring with that heavenly music which the hunter so much enjoys. Now the chase was excitement in the extreme. The dry twigs were cracking and the boughs yielding at every bound of the deer, the hounds apparently close up and running rapidly. All was excitement, and every eye watched with an anxious look for the first glimpse of the deer, the horses seemingly enjoying the chase as well as the hunters and hounds. Their heads were elevated and ears extended, and they were anxiously looking in the direct course. The deer changed his course, for, instead of running to the top of the ridge where we could have plainly seen him, he kept the brush and was making for the gulch. Now our only chance left for a shot was that he would cross the cañon, as there was an opening on the other side. Crack went a rifle. One of the party had got a snap shot as he was darting through the brush. He missed the mark, as onward flew the deer. This stimulated the hounds still more, for they gave extra tongue, and each one could be distinctly heard. The deer's quick bounds soon gained him the opposite side, and within fifty yards of where the Captain stood, but, owing to the deer being down the hill, he could not get to see him. I soon got a glimpse of him as he was rising up the ridge in double-quick time. I drew up my rifle, and with steady aim, fired. The deer dropped, but no sooner had I announced the fact than up he jumps, and with apparently new vigor, changing his course and running directly back for the gulch. Two more shots were fired, but without effect, as he soon gained the thicket. He was evidently wounded badly and could not run very far, as the hounds were close up and running very fast. He kept the gulch

and out of sight, crossing the lower spur of the ridge and through a dense thicket, and was evidently making for Donovan Creek, which was fully half a mile distant, and almost an impossibility for man to reach. The dogs soon came to a stop, and all was quiet.

While viewing the situation and studying how to get through the thicket, the dogs returned, well fagged out, and apparently content that the chase was ended. It was now evident that the deer was caught, but not one of us dare venture to find him. It was finally decided to continue the hunt, although we much regretted to leave the deer behind. After a short rest, we started for a glen on the opposite ridge, and with much difficulty it was gained. The hounds hunted well, but could not raise a deer, and they soon returned. We followed down to a point where there had been a burn, and near at hand a thicket of scrub oaks. As soon as the point was reached, the hounds led forward, indicating the scent of a deer which was near at hand. Each hunter runs for a position, the hounds immediately giving tongue, and starting, but their course was directly down the gulch. There was an opening, however, at the bottom, and the deer would have to cross, which would bring him in full view. All were anxiously looking at this point, and expecting every moment to see the deer cross, but, much to our disappointment, he had crossed before we got in a position to see. The chase was now a hot one, and evidently the deer would make his run well out of our reach. The hounds ran well, and for a short time were quite out of hearing, but the deer had made a turn towards us. We could now hear the hounds distinctly. We now directed our attention to the top of the ridge to our right, when the deer made his appearance in full view. It was a fine large buck. Now commenced the fire, and fully ten shots were made, at a distance of about two hundred and fifty yards. Two of the party were inexperienced, and they were more anxious than discreet, for many shots fell wide of the mark. Soon the deer was out of sight in the thicket. The hounds in their run had evidently started the second deer, as one came in full view, and from a different point from where the first one was last seen. The same fire was now opened on him, and it sounded as though a company of soldiers was having a skirmish, as the shooting was so rapid. I said, "Boys, go slow, you are wasting ammunition." The deer now began to stagger, and from a rapid run had settled down to a walk. He soon reached a clump of brush, and was out of sight, and the fire ceased; but for a moment only, for up starts the third deer, and was making for a gulch. Again the fire commenced, but his run in open ground was short, as he was soon out of sight. The dogs had evidently gone astray and got divided, but most of them were still after the first deer seen, which was running directly from us, and out of sight and hearing, the wounded deer still remaining in the thicket. After a consultation, I concluded to cross the gulch, while the balance remained in their positions, and I went to see whether he was dead. After considerable effort, I reached the other side of the gulch, but was somewhat winded, as it was much steeper and rougher than I expected. Before I could get in position, one of the hounds that came across with me scented the deer and in he went. The deer made a break and intended to reach the gulch below, but unfortunately for him he ran in my sight, and was now only about fifty yards distant from me. It was now dollars to cents that he was my deer. At the report of my rifle he fell dead. He had made a brave run for his life, but fate was against him. The balance of the party soon reached where the deer lay, and it was found that several balls had hit him. After preparing him for the pack, he was carried to the top of the ridge, where he could be put upon a horse. He was a fine young buck, and very fat. When the top of the ridge was reached, we all sat down in the shade of a projecting cliff, and the first syllable spoken was, "Pass around the vial, and we will drink to the first hunt of the season."

WHETSTONE.

WHITE SULPHUR SPRINGS.

In old times this fashionable resort was frequented by the high political aspirants of the country. The F. F. V.'s of the Old Dominion were reinforced by the men in the whole country (the whole country of old days) who were looking for political preferment, and many an election was settled on the broad veranda of the hotel long before the votes were placed in the ballot-boxes. It was an ultra-aristocratic resort. The blue bloods held the sway, and it was sure that any person who was recognized at the social gathering had something more than a big bank account to recommend him. It was a quiet place withal, and to introduce the excitements of Broad Rock, Tree Hill and other places where the thoroughbreds figure, would have been thought derogatory. Not derogatory in the usual sense, as the Virginians and their visitors thought highly of the thoroughbred, but their ideal was a quieter place than where the blood-horse came in to startle the pulse from its regular beats; and politics in the day time, and a quiet game of loo or brag at night, was thought to be all that was necessary. Of course there were flirtations among the younger, and gay riding parties and picnics under the grand old oaks in the lee of the mountains. "Race week" and the "race ball," however, were held to belong to busier worlds, and no one thought that there was any necessity for them at the White Sulphur. Now, in the march of events, it has become evident that these accessories to a fashionable watering place shall be incorporated, and from the following account, which we copy from the New York Herald of the 3d instant, the great desideratum has been accomplished. The writer is evidently a little rusty in matters pertaining to the turf, and makes a few blunders which do not detract from the interest of the description. But the point from which others can gain knowledge which will be advantageous is that every watering place at the present day, which makes any pretensions to cosmopolitan attractions, must have a race track. Saratoga, Long Branch (even Cape May has races on the beach) show a congregation of thoroughbreds, and there are no other features which are so powerful in attracting visitors:

The season of '82 is destined to be one of the most memorable in the annals of the White Sulphur. It will supply the long needed attraction of a beautiful race course, and to the natural charms of this famous watering place will be added that of a lovely artificial lake, covering an area of some twenty-five or thirty acres. These two features have been talked about and craved by the visitors for years and years, but owing to the peculiar legal embarrassments of the property, their construction never could be attempted until the present company obtained complete control and began its series of extensive improvements. Virginians are noted for their sporting proclivities. They are fond of "old sledge" and "draw poker," and they even gambol with the animal on the green; but what they most glory in is a horse race. In ante-bellum times they boasted of having some of the finest blooded stock in the country, and the Virginia turf laid claim to some of the greatest exhibitions of power, endurance and speed by Virginia horses of the day. But though the war well nigh swept away the stock, as well as the means for keeping it up, the passion for horse racing remains all the same. Nor are Virginia turfmen extinct. The names of McDaniel and Doswell are well known in sporting circles to-day and their stables sustain the ancient prowess of old Virginia racers. To those devotees of the turf represented here every season must be added the steady and increasing influx of their more vigorous progeny from Kentucky and the West. Then throw in a very fair admixture of English gentlemen who have settled here and throughout the Old Dominion and you have all the elements conducive to the formation of a first-class enthusiastic racing association. It was to the clamor—I may almost say demands—of this class that the Springs company promptly responded in building a race track, and their fondest anticipations are at last about to be realized.

Every visitor to the Springs will recollect the lovely patch of meadow, about one hundred acres in extent, lying over in the valley just beyond Howard's Creek, and the old laundry buildings on the west side of the Spring grounds. It is the most charming spot that could have been selected for a race course. The meadow is oblong in shape, so will be the track. On the east it is bounded by the limpid waters of the creek, on the west by the Greenbrier range of mountains. Directly back of the creek, on the Spring side, are the overhanging bluffs of "Lovers' Leap," the windows of the Bath House and the wide verandas of the new club building, from all of which there can be an unobstructed view of the entire course, from the start to the finish. The races will invariably take place late in the afternoon, when the course is hidden from the rays of the declining sun by the deep and lengthened shade of Greenbrier Mountain. The track is one mile in length. The curves are north and south, the stretches east and west. About midway on the west side of the track is a beautiful little knoll at the base of the mountain, on which will be erected the grand stand, and which of itself commands a view of the whole course. Stabling for the accommodation of 100 racers will be built in the sugar grove under "Lovers' Leap," and not far from the old laundry on the bank of the creek, where exercising ground is protected by the shade, both in the morning and afternoon.

The building of a race track involves a great deal more time and expense than one would at first suppose. It has to be graded, then spread over by a fine mould, then sodded to make it springy, and then moulded again and rolled. The grading, which is of itself a heavy job, is now nearly finished, and by the latter part of August, when it is proposed to hold the first meeting, the track, buildings and all the necessary appointments will be complete and in the most thorough working order. It is now understood that the course and racing will be under the supervision of Major J. B. Ferguson, of Baltimore, who has charge also of the Pimlico course at that city. A programme of five days' racing, on alternate days, has been arranged, commencing on August 29th and ending on September 7th. Several turfmen have expressed their willingness to bring their stables to the "White" this fall for the purpose of inaugurating the races, and others have liberally offered to contribute to purses and cups. During the season it is proposed to form and incorporate the White Sulphur Racing Association, under the auspices of such prominent gentlemen as W. W. Corcoran, of Washington; Governor Mathews, of West Virginia; Major Thomas W. Doswell, of Virginia; Senator Camden, of West Virginia; Senators Hampton and Butler, of South Carolina; W. A. Quainer, of West Virginia; Senator Vest, of Missouri; and Lewis Baker, of Wheeling, W. Va. The latter gentleman offers a handsome purse on his own responsibility. In addition to the regular fall meetings at the "White," there will be numerous flat and hurdle contests between gentlemen during the spring season, which will be sources of amusement to the visitors.

JOHN NO SABBEY MELICAN WAYS.—One night recently the electric lights at the Collender billiard hall were a little late in starting, and the proprietor notified his Chinaman to go up and start them. After getting a step-ladder and finding that he could not reach the lamp, to the surprise of all present the Chinaman disappeared and in a short time appeared again upon the top of the beam to which the lamp is attached, with a gas-lighter in his hand. John had made his way to the back yard and climbed to the roof of the building. Then he opened one of the side windows of the skylight and crept inside. When discovered he was crawling cautiously along one of the beams. Stopping in the middle he struck a match and lit the taper and then reached down to the electric light and tried to "touch it off." After fumbling about the apparatus for a minute or more he gave up the job in despair and retired by the same route he came. Presently he appeared in the billiard hall again, and with an expression of disgust and baffled ingenuity on his face, approached the proprietor and said: "No can lightee 'lectee; no gassee; no can catchee." The proprietor kindly endeavored to explain to the Chinaman the difference between gaslight and electricity, and after a half hour's tedious lesson gave up the task, almost prostrate with nervous exhaustion.—Denver Tribune.

HORSE SALE.

We call attention to the advertisement of a large sale of trotting, business and work horses that will take place by order of Dan McCarty, at the corner of Taylor and Eddy streets, to-day (Saturday) at 10:30 A. M. The catalogue comprises some very useful and valuable stock, as also a lot of sulkies, skeleton wagons, harness, boots, etc., which merit the attention of buyers.

THE TURF.

RACING IN CANADA.

ANNUAL SPRING MEETING.

TORONTO, July 3, 1882.

EDITOR BREEDER AND SPORTSMAN: I send you a report of the annual spring meeting, held under the auspices of the newly formed Ontario Jockey Club, over the beautiful course known as the Woodbine, on Saturday, July 1st, and Monday, the 3d. This track is situated about three miles from the city, over a good road, and for natural facilities cannot be excelled in any country. The races should have commenced on Friday, but the inexorable clerk of the weather willed it otherwise, as there was a constant downpour of rain, making it absolutely impossible for a horse to stay on his feet. On Saturday, however, we had a beneficent change, and the weather was lovely, although the track was necessarily slow; but the sport that was offered thoroughly pleased everybody. Not without good reason, as every event on the programme was carried out without a single failure, to the perfect satisfaction of the general public—a thing that can seldom be said nowadays.

The programme was as follows:

The First Stakes, \$150, for all ages, of which \$25 went to second horse. Maiden allowed: if 3 years old, 5 pounds; 4 years old, 10 pounds; 5 years and upwards, 14 pounds; foreign-bred horses, 7 pounds extra. Distance, three-quarters of a mile.

Abingdon's Disturbance, 6 years.....	1
Pringle's Broderick, 6 years.....	2
Dawes' Chipola, 3 years.....	3
Ward's Victoria, 3 years.....	0
Time: 1:10.	

Book-betting: Disturbance 5 to 15; 20 to 5 against Chipola; 25 to 5 against Broderick.

THE ONTARIO DERBY.—\$200 for 3 year olds added to a sweepstake of \$20 each. Half forfeit for foals of 1879, bred, raised, owned and trained in the province of Ontario or Quebec. \$150 to first horse; \$50 to second, 1 1/4 miles. Colts 118 pounds each; fillies and geldings 115 pounds each.

Burges' b. f. Easter, 3 years.....	1
D. W. Campbell's br. c. Marquis, 3 years.....	2
Smith's b. r. Bonnie Vic.....	3
Time: 2:34.	

Betting: 5 to 10 on Easter; 20 to 5 against Marquis; 5 to 1 against Bonnie Vic 3d. BREWERS' PLATE.—\$300, open free. Handicap. Divided, \$200, \$75 and \$25. 1 1/4 miles.

Johnston's Tullamore, 5 years.....	1
Abingdon's Long Taw, aged.....	2
Dr. Smith's Vici, 4 years.....	3
Dawes' Kincaid.....	0
Forbes' Bonnie Bird.....	0
Sheppard Bar, Labelle.....	0
Ward's Dan.....	0
Time: 2:54.	

Betting: 25 to 5 against Tullamore; 25 to 10 against Kincaid; 25 to 10 against Long Taw; 20 to 5 against Bonnie Bird; 40 to 5 against Vici; 5 to 5 against Labelle; 100 to 5 against Dan.

THE WOODBINE STEEPLE CHASE.—\$275 divided; \$200, \$75, \$50. Distance about 3 miles.

Dawes' ch. m. Rose, 6 years, 155 pounds.....	1
Gordon's b. m. Flora, 6 years, 138 pounds.....	2
Miligan's Alarm, 5 years, 139 pounds.....	3
H. D. Grand's Lady Reveller, 5 years old, 138 pounds.....	0
Campbell's b. g. William, 4 years, 138 pounds.....	0
Betting: 25 to 10 on Rose; 20 to 10 against Lady Reveller; 25 to 5 against William; 35 to 5 against Alarm.	
Time: 8:18.	

5th. Railway Purse.—\$250—For Dominion bred horses; \$175 to first; \$50 to second; and \$25 to third.

Abingdon's Disturbance.....	1
Dr. Smith's Lady D'Arcy.....	2
Sheppard Boy, Labelle.....	3
Second Day—Purse for all ages—\$150; \$125 to first; \$25 to second; three-quarters of a mile.	
Abingdon's Disturbance, 6 years, 120 pounds.....	1
Dr. Smith's Vici, 4 years, 125 pounds.....	2
Dawes' Chipola, 3 years, 103 lbs.....	3
Johnston's Tullamore, 5 years, 103 pounds.....	0
Time: 1:48.	

Betting: Disturbance favorite. The Hotel Stakes—\$400—\$300 to first; \$100 to second. Mile heats. Dawes' Kincaid, 5 years, 120 pounds..... 1 Abingdon's Long Taw, aged, 120 pounds..... 2 Dr. Smith's Lady Darcy..... 0 Kincaid won two straight heats.

Time: 1:48 1/2.

Steeple Chase Handicap—\$250—\$200 to first; \$50 to second. Top weights 168 pounds. Distance 2 1/2 miles.

H. D. Grand's Lady Reveller.....	1
Dawes' ch. m. Rose.....	2
Gordon's Flora.....	3
Betting: 5 to 25 on Rose; 25 to 5 on Lady Reveller; 30 to 5 on Flora.	
Time: 6:6.	

The Cash Handicap—\$250—For Dominion-bred horses; \$175; \$50; and \$25 Distance 1 1/4 miles.

Abingdon's Disturbance, 132 pounds.....	1
Campbell's William, 106 pounds.....	2
Forbes' Easter, 98 pounds.....	3
Betting: Little or none, Disturbance being a hot favorite, notwithstanding the weights.	
Time: 2m. 3/8.	

The Welter Cup—\$100 to winner. Entrance \$5, two-thirds of which went to second horse. Distance 1 1/4 miles.

H. D. Grand's Lady Reveller, 168 pounds.....	1
Miligan's Alarm, 175 pounds.....	2
Gordon's Flora, 168 pounds.....	3
Grand's Sarah B., 163 pounds.....	4
Beady's Costello, 168 pounds.....	5
Ward's Dan, 163 pounds.....	6

Betting in this race was very even; it was very exciting and keenly contested but was won very handily by Lady Reveller.

The Selling Stakes, \$120, for beaten horses, \$25 to second horse, brought out Vici, Labelle and Dan; and after a sharp run, was won handily by Vici, and brought the meeting to a satisfactory conclusion. JAMES LENG.

THE MONMOUTH PARK RACES.

Again is there a change of venue, and after many a well fought contest the horses have left Sheepshead Bay and Jerome Park, their numbers being about equally divided between those two delightful watering places, Long Island and Saratoga. These are about the best race tracks in the country, as they are safe, fast and of sufficient width to accommodate the large fields of horses that are now to be found on every race course where special inducements are offered. There is one drawback to Monmouth Park, and that is the four-mile drive to the track, and the scarcity of hacks and the rapacity of their drivers, but the railroad runs special trains to the gate, and a short walk brings the visitor to the spacious stands and inclosures, while further on, past the winning post, is the Club House, one of the most delightful boxes in the country.

On the first of July the inaugural race of the very liberal programme was a mile dash for all ages, with penalties and allowances, that was won by Jim Farrell, in 1:47 1/2, against five competitors. The second was the Hopeful Stakes, for two-year-olds, which has been a favorite race since it was first inaugurated some ten years ago. For the last four years the famous blue and orange of that staunch sportsman George Lorillard was always in the van, but this year the prize was carried off by George Kenney, belonging to the Dwyer Brothers, after a most beautiful finish with Heel-and-Toe and Jacobus, the latter carrying 5 pounds extra, as will in future be the case with all important races. We append the summary:

Hopeful Stakes, for two-year-olds, at \$100 each, half forfeit; only \$20 if declared by January 1, 1882, and \$30 if declared by June 25, 1882, with \$1,000 added; the second to receive \$250 out of the stakes; winners of a stake (handicaps excepted) of the value of \$1,000, to carry 5 lb.; of two such stakes, 7 lb.; and three such stakes, 12 lb. extra; closed with 59 subscribers; five furlongs.

Dwyer Bros.' b. c. George Kenney, by Bonnie Scotland, dam Kathleen, 10 lb. 1
Mr. Keene's b. c. Heel-and-Toe, by Glenelg, dam La Polka, 107 lb. (Evans). 2
J. E. Kelly's br. c. Jacobus, by Ill-Used, dam Nellie James, 115 lb., including 5 lb. penalty. (Hughes) 3
G. L. Lorillard's ch. c. Trafalgar, 110 lb., carried 112 lb. (Costello) 0
G. L. Lorillard's br. f. Swift, 107 lb. (Ural) 0
P. Lorillard's b. c. Pizarro, 110 lb. (Peakes) 0
D. D. Withers' br. c. Buckstone, 110 lb. (Sparling) 0
D. J. Bannatyne's b. c. Little Minch, 110 lb. (Gallagher) 0

Time—1:06 3/4.

Pools.—George Kenney, \$60; G. L. Lorillard's pair, \$30; Pizarro, \$25; Heel-and-Toe, \$20; Jacobus, \$20; the field, \$20.

The third race was the Ocean Stakes, for all ages, a mile and a furlong, in which Runnymede, the three-year-old crack, was made a hot favorite at \$300 against \$100 for the field, composed of Barrett and the Stonehenge-Julietta three-year-old colt, both fast and strong runners. Barrett made a sad example of the other two, and won by a hundred yards, in 2:02.

The fourth race was the Long Branch Handicap, a mile and a quarter, which was taken by that excellent weight carrier Monitor, belonging to G. L. Lorillard, beating Glidelia and three others in 2:20 3/4, this being another overturn for the talent, as the mare was a great favorite.

The fifth race was a Selling Purse, of a mile, which was won handsomely by G. Lorillard's Itaska, with Clarence second and Blenheim third, in 1:49. The winner was entered to be sold for \$600, and was bought in by his owner at \$960, leaving \$240 and \$120 to the second and third horses.

The final race was the Steeplechase over the short course, which ended in favor of Bertha at the last stride, Ohio Boy second, leading Frank Short by a length at the winning post. This exciting race brought the programme to a conclusion.

It being evident that most of the New Yorkers would make a holiday of the day preceding the 4th, the Association resolved to give an extra day's racing, when with fine weather and a better track there was an increased attendance and more attractive sport. The first race, a dash of five furlongs for \$500, with allowances, G. L. Lorillard's Black Gal won in 1:04, with Fairfield second and Marie Armstrong third; Adalgisa, the favorite, getting a very bad start. The next was a handicap of a mile for three-year-olds, \$25 each with \$500 added, and was taken by P. Lorillard's Amazon, 100 lbs., in 1:46 1/2, with Blenheim, 106 lbs., second, and Bouncer, 96 lbs., third. The third race was also a handicap, \$25 each with \$500 added, a mile and a furlong. The starters were Warfield and Victim, at 114 lbs., Wyoming and Sweethome, 105 lbs. each, and Duplex, 100 lbs. The race was so close that many spectators thought it was a dead heat between the three leading horses, but the judges placed Sweethome first, Warfield second, and Duplex third. Time 1:58. The next was also a handicap, on the same conditions, but at a mile and three-fourths, in which old Parole carried 123 lbs., and was a great favorite, and he won handily in 2:26 1/4; Hilarity, 100 lbs., second, and Francesca, 98 lbs., third. The latter is a three-year-old sister to Iroquois, and appears to possess none of the traits of her illustrious brother, making no show whatever in her races. But from her breeding she ought to make a fine brood mare. The next was a selling race of \$500, at seven furlongs, and was won by Little Phil, the favorite, by a short head, he carrying 111 lbs., Sir Hugh, 88 lbs., being second, and Clarence, 97 lbs., third, with some others unplaced. The time, 1:28 3/4, is fully a second and a quarter faster than the record, which was 1:30, made at Brighton Beach last year, the first time by Reporter, carrying 94 lbs., and subsequently by Brambleta, carrying 92 lbs. In the hurdle race, \$500, a mile and a quarter, Frank Short was first in 2:21 3/4, with Bernardine second and Ohio Boy third. Altogether, it was a good day's sport.

On the national holiday there was the largest attendance ever seen at the track, with the exception of the day on which the great contest between Harry Barrett and Longfellow took place in the Westchester cup. Unfortunately the weather was not propitious, as it rained all day, but the sport was so good that but few of the spectators were driven away by the storm. There were six races on the card, the first being a purse of \$500 for three year olds and upwards, a mile and a furlong, with penalties and allowances, and was captured by Barrett, the favorite, with 118 lbs.; Greenland, 113 lbs. second; Dan K., 114 lbs. third; and Fatinitza, 108 lbs. fourth. Time 1:56 1/4. The second was a purse of \$500 for two year olds, with penalties and allowances, five furlongs, and was also won by the favorite, P. Lorillard's Pizarro, 107 lbs.; Clonmel, 107 lbs. second; Fairwater, 104 lbs. third; and Ulsie, Black Gal and Cheerful unplaced. The next race was the event of the day, in which Runnymede and Forester met again to test their supremacy as the Champion of the three year olds. The betting was pretty even between them, with the former the choice at \$115, \$100 for Forester, and \$35 for the two other starters, the Stonehenge-Julietta colt and Hilarity. It was the finest struggle ever seen on the track so celebrated for so many a close finish. There were many variations in the lead for the first mile but at three furlongs from home, the two favorites came, the fore with Forester half a length ahead, and he continued to hold this same advantage, until within an eighth of a mile from home.

But here Runnymede closed up, and then began a most exciting head to head finish, the two horses, under whip and spur, changing apparently their positions of advantage at every stride, and Runnymede won at the wire by the shortest of necks, amid a scene of the wildest enthusiasm and excitement. Following is the summary:

The Lorillard Stakes for three-year-olds, at \$250 each, half forfeit, only \$25 if declared by August 1, 1881, and \$50 if declared by June 30, 1882, with \$2,500, the gift of Mr. P. Lorillard, the association adding \$1,000 for the second, closed with 97 subscribers; mile and a half.

Dwyer Bros.' br. c. Runnymede, by Billet, dam Mercedes, 118 lbs. (J. McLaughlin) 1
Appleby & Johnson's ch. c. Forester, by Ill-Used, dam Woodbine, 118 lbs. (C. Holloway) 2
Spellman & Co.'s b. c. Hilarity, by Bonnie Scotland, dam Beulah, 118 lbs. (J. Spellman) 3
D. D. Withers' ch. c. —, by Stonehenge, dam Julietta, 118 lbs. (Sparling) 0

Time—2:40.

The fourth race was the Shrewsbury handicap for all ages, \$100 each, h. f. with \$750 added, a mile and three-quarters. Glenmore, 117 lbs. and Girofle with like weight, were even

favorites at \$100, and the former won in 3:03 3/4, with Glidelia, 112 lbs. second, and Girofle third, while Aelia, 103 lbs. and Monitor, 122 lbs., including 15 lbs. extra, ran unplaced.

The next event was a dash of a mile and three-eighths, for a purse of \$500, in which Mary Anderson, 85 lbs., to be sold at \$500, and Strathspey, 100 lbs., to be sold at \$1,000, were the only stallions. The race was won by the latter in 2:26 1/4 and he was bought in for \$1,455, and as the surplus over the \$1,000 went to the second horse, she got \$455, while the winner outside the bets was only \$45 to the good for his race.

The fifth was a Welter Cup for gentlemen riders, three-quarters of a mile, that was won by Corsair, with Mr. Holmes in the saddle, Arsenic second, with Mr. Ward, and Traveler third, ridden by Mr. Sharkey, with Ilspodar, Mr. Parry, Knightly King, Mr. Hunter and Mrs. Chubbs, Mr. Easton, were unplaced. The finish was close and the time 1:19 3/4.

The proceedings closed with a handicap steeple chase over the field course that was won by Frank Short, with Bernardino second, and Bertha third. The day's sport was excellent, and the Lorillard Stakes and Shrewsbury Handicap of 1882 will be long remembered by those who saw those races.

THE RACES AT SALT LAKE.

The Utah Jockey Club opened their inaugural meeting at Salt Lake City on June 24th, under favorable auspices, a good many from San Francisco going on to back Maria F. and the Duke of Monday, the latter being looked upon as one of the best horses in this State. Considering it was their initial attempt, the Executive Officers made a very successful bid for popular favor, and the result shows that the Summer meeting at Salt Lake may be looked upon as one of our permanent fixtures.

On the first day the races were Club Stakes, running, for three-year-olds, \$25 entrance, \$500 added, one mile—Won by Maria F. Time, 1:49 1/4. Purse \$500, one mile and a half—Won by Longstride; Chantilla second, Duke of Monday third. Time, 2:47. Purse \$200, half a mile and repeat—Won by Euchre, Ben Anderson taking second heat. Time, 0:52 1/4, 0:50, 0:51 1/2. Trotting, \$700, class 2:30—Won by Ewing; Teazer (won first heat) second, Bicksford third. Time, 2:31 1/2, 2:37 1/2, 2:32, 2:34 1/2. Purse \$300, one mile—Won by Chantilla; Euchre second, Ben Anderson third. Time, 1:47 1/4. Juvenile Stakes, two-year-olds, \$25 entrance, \$200 added, six furlongs—Won by P. Lorillard; Miss Trump second. Time, 1:21 3/4. Purse \$400, a mile and an eighth—Won by Red Boy; Norton second, Belle of the West third. Time, 1:59. Trotting, \$700, class 2:35—Won by Ewing; Milo G. second, Mary Emery third. Time, 2:43, 2:41 1/2, 2:37. Novelty race, horse leading at half mile to receive \$100, one mile, \$150, and mile and a half, \$250. Half mile purse won by Ben Anderson in 0:51, mile by Maria T. in 1:47, and mile and a half by Longstride in 2:47 1/2. Purse \$250, six furlongs—Won by Duke of Monday; P. Lorillard second, Sisterly third. Time, 1:18 1/2. Trotting, \$400, class 2:40—Won by Milo G.; Maggie C. (won first and second heats) second. Time, 2:44 1/4, 2:37 1/4, 2:39 1/4, 2:40 1/2, 2:40 1/4.

On July 6th was decided the great match race between Wildmoor and Euchre, mile heats, 3 in 5, for a purse of \$2,000, which was won by Wildmoor. Time, 1:46, 1:48 1/4, 1:49 1/4. The running race, mile heats, two in three, Norton won the first heat in 1:46 1/2, and Chantilla the next two in 1:47 1/2 and 1:50. This closed the Spring meeting of the Utah Jockey Club. Wildmoor is matched against Red Boy in a race for \$5,000 a side, mile heats, three in five, to be run on the Salt Lake track August 16th.

THE CONEY ISLAND RACES.—Owing to the political excitement, the Press dispatches of the races at the East during the past week have been of a meagre character, but following are curt details of two days' races at this track. On July 7th, in the three-quarter-mile race, Mary Warner won. Time, 1:17 1/2. The one-mile race Ida B. won in 1:46. The five-eighths-of-a-mile race Brambleta won in 1:03 1/4. The Coney Island Stakes for three-year-olds, 1 1/4 miles, Barney Lyon won in 2:15. The Hurdle Race, 1 1/4 miles, five hurdles, King Duchman won in 2:23. On the 11th, in the Palace Hotel Stakes, for two-year-olds, three-quarters of a mile, Baron, the favorite, won. Time, 1:20 1/4. The three-quarters of a mile race Bedouin won in 1:16 1/4. The seven-furlongs race for three-year-olds Bonheur won in 1:32. The mile and a half race Joe Murray won in 2:36 1/4. The Hurdle Race, one mile and a quarter, Gillie Monson won in 2:20 1/4.

In England, the Summer Cup at Newmarket was won by Isabel after a magnificent finish with Mr. Keene's Golden Gate, with Credo third. The Chesterfield, one of the important two-year-old stakes, was won by Gaillard, with Export a good second. The next principal meeting will be at Goodwood, when Foxhall will probably appear, as well as Iroquois, if the latter can be got into good racing trim by the third week of this month.

Another very important race at the July meeting, at Newmarket, was the Exeter Stakes, over the new T. Y. C. (5 furlongs, 136 yards). Out of the twenty-seven subscribers, seven started, including Mr. Pierre Lorillard's bay colt Comanche, by Virgil or Gleulyon. He was not placed, Lord Ellesmere's Highland Chief, by Hampton, winning, with Lell Falmouth's Britomartis, by Wild Oats, second, and Mr. Lefevre's Bon Jour, by Rosicrucian, third. Highland Chief was bred by Ellesmere, and made his debut in the race for the Stnd Produce Stakes, at the Newmarket First Spring Meeting, when he was second, being beaten a length by Prince Solykoff's Songless, by Balfe.

Tristan promises to become in England one of the four-year-old "cracks" of the year. He has already won the Queen's Plates at Northampton and Chester, the Epsom Stakes at Epsom in May, and the Epsom Gold Cup at the same meeting. At Ascot, after winning the Queen's Vase on the first day, he took the New Biennial Stakes on the third, and the Hardwick Stakes on the fourth day, and last week he won the July Cup at Newmarket. There will be great interest if Tristan and Foxhall come together on even terms at Goodwood.

The famous French breeding stable that was backed by the late Emperor of the French in so liberal a financial manner is to be dispersed under the hammer. Count La Grange, who has managed the confederacy in so striking a manner in by-gone years, announces the sale at Tattersall's, in London, during the first week of September, and the catalogue

will comprise 45 foals, 29 yearlings, 77 mares and 11 stallions. This is sending a heavy cargo of French coals to Newcastle.

Despite the very unfavorable weather, we are pleased to see that the Chicago Association have a balance of from \$6,000 to \$7,000, arising from their recent race meeting. There were in all forty-five events on the programme of the eight days' racing; the pool selling averaged \$50,000 a day, and the attendance was uniformly good, and we wish the Association a far more successful showing in their next venture.

Mr. R. W. Caniron, of New York, who has made by far the largest importation of thoroughbreds to this country, including Lemington and Warminster, has recently sold a sister to Foxhall to Mr. Finley, in the Colony of Victoria. Before being shipped to her destination, she will probably be bred to one of Lemington's famous sons.

The English mare Lady Audley, by Macaroni, out of Secret, the dam of Pilgrimage, Pellegrino, St. Louis, etc., recently met with an accident at the Chamant Stud, and had to be destroyed. She was foaled in 1867, and last September was purchased by M. Lefevre for £1,200.

Luke Blackburn, "The Little Giant," and but two years since the champion racer of the country, has been sold to General W. F. Harding, and will in future be one of the main supports of the Belle Meade farm. He is admirably bred, being by Bonnie Scotland from Nevada, and combines the great Queen Mary blood with that of our grand horses Glencoe and Lexington. He ought to be a great success at the stud.

THE TRACK.

FIXED EVENTS.

Portland, Or. Summer meeting, July 18th.
Santa Cruz County Fair Association. First annual meeting at Santa Cruz, Aug 15th, 16th, 17th and 18th.
Sonoma County Park Association, at Santa Rosa, Aug. 22d, 23d, 24th, 25th and 26th.
Sonoma and Marin Agricultural Societies. Annual Fair at Petaluma, Aug 29th and four following days.
Golden Gate Fair to be held at Oakland from September 4th to the 9th inclusive.
California State Fair. Annual meeting at Sacramento from Monday, September 11th to the 16th inclusive.
The San Joaquin Valley Association Fair at Stockton, from September 19th to the 23d inclusive.
Oregon State Fair at Salem, from September 18th and during the week.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose September 25th to the 30th inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.

FAIRS AT THE EAST.

Kentucky State Fair at Lexington, August 9th to September 2d inclusive.
Minnesota State Fair at Farmington, August 31st to September 8th inclusive.
Iowa State Fair at Fairfield, September 1st to the 8th inclusive.
Minnesota Agricultural Association, at Minneapolis, September 4th to the 9th inclusive.
Nebraska State Fair, at Omaha, September 11th until the 16th inclusive.
Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.
Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 18th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 18th to the 23d inclusive.
New Jersey State Fair, at Monroe, September 18th to the 23d inclusive.
West Virginia Central Fair, at Clarksburg, September 19th to the 21st inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

THE GENTLEMEN'S DRIVING ASSOCIATION.

This club represents the wealthiest patrons of trotting interest in the United States. Their track is the old Fleetwood race course, about half a mile from McComb's bridge and close to Jerome avenue, along which, every fine day, may be seen the finest trotters owned by amateurs in the country. The association gave an entertainment to the members and their friends on the 29th July, of which the following account is from the N. Y. World:

"Every effort was made by the committee to make the day a success. In the first place, a day was fixed when there were no counter attractions in the way of racing, either trotting or running, elsewhere than at Brighton Beach, and, in the second place, the conditions were made as to bring about two races—one, the slow class, to be driven by gentlemen drivers to road wagons, and the other, for fast horses, to be driven by professionals to sulkies, or, in other words, in harness. The prizes for both classes were elegant silver punch bowls. Unfortunately, neither race obtained more than three entries. That for members to drive was limited to horses that had never beaten 2:40, and the entries were A. De Cordova's bay mare Julia D., Mr. David Bonner's chestnut gelding Banjo, and Mr. C. A. Willis's brown horse Wellington. Mr. De Cordova's Julia D. was withdrawn early in the day, which left the race apparently an easy task for Banjo. He won the first heat in 2:42 1/2, so easily that many thought that if Mr. Bonner had tried he could have distanced Wellington; but as the race was between gentlemen there was no necessity for any such exhibition. The second heat, however, completely ended Mr. Bonner's chances. The word was given with Banjo scarcely well settled down. He broke badly on the turn, and from that time out a series of most annoying accidents followed. First, the left trace became unhitched, so that for safety Mr. Bonner had to lean over the dash-board and temporarily fasten it. Next, the boot on the horse's left fore leg became unfastened and at every step flapped down so that the horse stepped on it. The final result was that Banjo was distanced. Wellington winning the heat and race in the very excellent time of 2:38 1/4.

The second trot was for horses that had never beaten 2:22; members to drive their own horses or to allow professionals to do so. The three entries were Mr. J. W. Shaw's bay gelding Charley Champlin, Mr. J. Collinfield's chestnut mare Helene and Mr. W. B. Rideboeck's bay gelding Dan Smith, and as Dan Mace appeared as the driver of Dan Smith, his brother, Ben Mace, as the driver of Charley Champlin and John Murphy as the driver of Helene, not a few expected to see a close and well-contested race. But Helene was in so much better condition and trotted so much steadier than either of the others that she won the punch bowl for her owner, in three straight heats, without any special exertion. The first heat was trotted in 2:21, the second in 2:23 1/4 and the third in 2:21 1/4. Dan Smith secured second honors by

finishing second in the second and third heats. Additional attractions were given by Mr. Vanderbilt driving Bay Dick and Lysander Boy and Mr. Frank Work driving Dick Swiveller and Edward. Several other exhibitions took place by horses of less repute, while, to make the afternoon's entertainment as a whole enjoyable, Grafulla's band, with Francis X. Duler as director, filled in the time with a programme of well-selected music.

TROTting AT ISLAND PARK ALBANY.—This track is becoming very popular in the extreme Eastern States, and at the recent meeting the entries were large and the contests on the average were fairly contested. On July 3d, in the purse of \$1,000, Clemmie G. was a great favorite, and won without being extended to her utmost, in three straight heats in 2:24, 2:23½ and 2:25. The second money was taken by Mars, the third by R. P. and the fourth by King Almont. The second race was the Nola Stakes for a purse of \$1500 for the 2:23 class, which was won by Ealy Rose, she taking the first, third and fourth heats, Naiad Queen gaining second money in the second heat, Unolala and Buzz Medium figuring in the third and fourth positions. Time 2:24½, 2:21, 2:24½ and 2:24.

On July 4th, there was the Clay Stakes of \$3,000 for the three-minute class, in which there were fourteen starters, of which six appeared on the track. Young Fullerton was the favorite, and although to Walnut was given the first heat—Guess Not being placed last for running—Fullerton won the three successive heats, Guess-Not being third in the full summary, Cornelia fourth, Bertha Clay fifth, and Lulu sixth in their positions. Time 2:27, 2:20¼, 2:27¼ and 2:30. The pacing purse of \$500 was taken by Estella, with the second, third and fifth heats, Jim Jewell taking the second money, and Felix the third, while Hawk was credited with barren honors. On the 7th, Driver won the 2:20 class. Best time 2:21, in the fourth heat. Douglass won the 2:34 class. Best time 2:26¼. The attendance would have been far greater with favorable weather.

ADDITIONS TO PALO ALTO.—There is nothing like going away from home for news. Ex-Governor Stanford returned a few days since from the East, and while there we learn from *The Turf, Field and Farm* that "he strengthened the Palo Alto stud by a select purchase from Mr. Joseph Harker, of New York. Lulu is by Alexander's Norman, out of Kate Crockett, by imp. Hooton. She trotted a trial at Rochester in 2:14½, and has a record of 2:15. The produce sold with her were a filly one year old by Governor Sprague, and a filly by George Wilkes dropped last Spring. Gazelle is by Rysdyk's Hambletonian, out of Hatie Wood, by Harry Clay, and her record is 2:21. Two of her daughters go with her—a four-year-old by Hambletonian Prince, and a suckling by Governor Sprague. Brunette is by Rysdyk's Hambletonian, out of Major Morton's famous Kate, and she was a great pole mare. Mattie is by Rysdyk's Hambletonian, out of Lucy Almack, by Young Engineer, and her record is 2:22¼. A few days ago she trotted at the Gentlemen's Driving Park a half mile in harness, in 1:07¼, and Charley Green will handle her this Summer with the view of lowering her record. Mr. Harker will ship the above-named mares and fillies to California in the Fall, and they will be bred in due season to Electioneer and Piedmont. There can be no mistake in breeding to blood as thoroughly tried on the track as that in the veins of Gazelle, Lulu, Mattie, Brunette, George Wilkes and Governor Sprague. Mr. Harker has retained May Queen, a yearling colt out of her, and colts out of Gazelle and Brunette.

RACING IN MICHIGAN.—The June races of the Michigan, Ohio and Kentucky Circuit began at Grand Rapids, Michigan, June 27, and continued three days. Results: Class 2:40, \$700 purse, won by H. M. Strong in three straight heats; time, 2:31, 2:30½, 2:32¼. Class 2:30, purse \$700, won by Mattie Graham; time 2:23, 2:29¼, 2:27. Class 2:20, won by Annie W.; William H. second, Sweetzer third; time 2:23½, 2:23¼, 2:24. The Ladies' Ten-mile Race, between Miss Lizzie Williams, of Topeka, Kansas, and Miss Nellie Burke, of Omaha, Nebraska, was won by the latter in 21:15, Miss Williams arriving at the wire 45 seconds later. Class 2:26, \$700, won by Jerome Eddy; Aldine second, Sue Grundy third, Largest fourth; time 2:25¼, 2:24¼, 2:27¼. Class 2:30, purse \$700, won by Dr. Norman; Mattie Graham second, King William third; time 2:26¼, 2:25½, 2:26¼. Pacing race, 2:23 class; High Jack and Joe Bowers each won a heat, but when the third was called, Jack failed to respond. His owner reported that the horse was very sick, and that he believed it had been poisoned. All bets and pools were declared off, and the race was left unfinished. Much dissatisfaction was expressed over the occurrence.

The Board of Stewards of the National Trotting Association have offered a special purse for the Cleveland, Buffalo and Rochester races of \$4,000, open to all; \$1,000 if St. Julien and Trinket enter and start, and open to all other horses; \$1,200 is to go to the first; \$800 to the second; \$500 extra to the fastest horse trotting in 2:14 or better; \$500 additional extra to the horse trotting in 2:12 or better; \$1,000 additional to the horse trotting in 2:10 or better. No entrance is required or added to the money. In the mean time the Chicago Driving Park Association have offered a special purse of \$2,500 for a match between St. Julien and Trinket, to be trotted on Thursday, July 20th, during the regular meeting. The conditions so far as arranged are mile heats—three in five, both to go to sulky. Secretary Hall will handicap the horses; it is understood, however, that St. Julien is not to exceed twenty-five pounds more than Trinket.

BRIGHTON BEACH RACES.—There was a goodly assemblage at this track on Monday, July 3d, when the events resulted as follows: Purse \$200, for non-winners during 1882, catch-weights, seven furlongs—Irving and Co.'s Maize first, in 1:34¼; Mary Warren second, by a neck; Belle of the North third, by a length. Purse \$200, selling allowances, six furlongs—R. Bradley's Prosper first in 1:16¼ Ida B. second, by a length; Monk third, by a like distance. Purse \$200, one mile—W. C. Daly's Vanguard first, in 1:45¼. Bonheur second, by a head; L. B. Sprague a bad third—Purse \$200, burdle race, welter-weights, a mile and a quar; er—W. C. Daly's Gift first, in 2:24½; Delaware second, by our lengths; Dailgians third, by eight lengths.

Miss Myrtle Peck, of Michigan, aged 14, rode on the Rochester Driving Park, July 8th, twenty miles in 43 minutes 24½ seconds, beating the best recorded time by two minutes. She rode seven horses, none of them considered fast, and two or three considered slow. The time was taken by reliable parties.

THE CHICAGO TROTting MEETING.—In regard to the races that are to be decided to-day at the City by the Lake, *The Turf, Field and Farm* makes the following remarks:

"Nevada and Second Love have been declared out of the three-year-old stake at Chicago. This leaves five to start, Garfield, Butterfly, Ernest Maltravers, Code and Eva. The great fight, doubtless, will be between the California filly and the Kentucky colt. Code is fashionably bred, being by Dictator, out of Crop, by Pilot, Jr., and he is a ripper. Eva as a two-year-old gained a record of 2:26, and the stable thinks well of her. In fact we heard an offer of \$5,000 made that she would win the race, which is to be trotted on Saturday, July 15th. In the four-year-old stake, to be decided the same day, only Belle of Coldwater and First Love have declined to make the second payment, due June 1st. This leaves nine in, Farce, Jayeyesee, Adelaide, Ottawa Chief, Waiting, Bronze, Jim Booman, Code and Sauveur. Farce, by Princess, out of Roma, has trotted a trial in 2:23½, and Jayeyesee, by Dictator, out of Midnight (dam by Nootide), by Pilot, Jr.; second dam Midnight, by Lexington, is reported very fast. Sauveur is moving well, and Ed Geers was rapid in his three-year-old form. Code has the disadvantage of a year, but his owner has great confidence in his ability. We know little of the others, but presume they must be good ones. Farce, very likely, will start the favorite, but favorites do not always win. The horses which have drawn out of the open to all station race, to be trotted Monday, July 17th, are Robert McGregor, who is lame, Alexander, who is doing stud duty in Kentucky, and Santa Claus, who is at Philadelphia and out of training. This leaves for starters Von Arnim, Voltaire, Monroe Chief, and J. B. Thomas. If Monroe Chief is as good a horse as he was two years ago, first money will go to him, but as he was a failure last year, he may not develop winning form in July. Next to him J. B. Thomas is the dangerous horse, albeit Von Arnim is speedy and Voltaire a stayer. The Summer trotting meeting at Chicago will attract visitors from all parts of the country."

According to the last dispatches the meeting will last for seven days, \$52,000 in premiums and purses being offered. The list of entries includes all the best horses in the country. Among the most interesting events will be the attempt of the pacer Little Brown Jug to beat Maud S's trotting record on Saturday. The sensational event of Monday is a race open to all stallions, with Von Arnim, Voltaire, Monroe Chief and K. B. Thomas as the probable starters. On Tuesday there will be a race open to all pacers, for which there are eight entries. On Wednesday there will be a special handicap race between St. Julien and Trinket, St. Julien to draw 150 pounds to Trinket's 135 pounds. The purse is \$5,000. Thursday has a 2:19-class race, with seven entries, and Friday has a 2:17-class race, with four entries, and purse race, open to all four-year-olds and under. This is intended for Sweetheart and Phil Thompson.

A LARGE IMPORTATION OF PERCHERONS.—The steamer France, of the National line, which arrived in New York July 2d, brought 197 French Percheron horses consigned to Mr. Dunham, of Chicago, Mr. Cook, of Charleston, Ia., and others. This is said to be the largest consignment of horses ever imported by one vessel at New York. An officer of the vessel said that the animals, which are of very large frame and great strength, were imported for breeding purposes. A large number of this importation will be transported several hundred miles beyond Chicago. They were kept in separate stalls and arrived in good condition.

Com. N. W. Kittson, of St. Paul, Minnesota, has invested some \$200,000 in horseflesh, among the most noted of which are Revenue (formerly Pilgrim), by Smuggler, dam by Daniel Lambert, for which he paid \$13,000; Von Arnim (2:22), by Sentinel, dam by Blood's Black Hawk, \$10,000; Lady Rolfe (2:22), by Tom Rolfe, dam a pacer, \$10,000; So So (2:17¼), \$10,000; Fanny Witherspoon (2:19¼), \$8,000; and many others ranging from \$200 to \$5,000. Mr. Kittson's stables have been fitted up at a cost of \$50,000, while his residence cost in the neighborhood of \$100,000.

There are eighty-four entries for the Cleveland Club July races. They show a greater number and faster horses than were ever before collected at a meeting here. The only California horse entered is Overman, in the 2:29 class. The other trotters entered in this class are Kate, Taylor, Rollo, Dick Ergon, Largess, Willis Wood, Big Ike, Valiant, London and Strero. In a special race, Clingstone, Edwin Thorn, J. B. Thomas, So So and Alley will contest. Little Brown Jug will pace to beat his record—2:11½.

The Grand Central Trotting Circuit opened at Pittsburg, Pennsylvania, on the 11th of July, and continued till the 14th. The Chicago meeting opens on the 15th July. Then comes Cleveland, O., July 25th to 28th, inclusive; Buffalo, N. Y., August 1st to 4th; Rochester, N. Y., August 8th to 11th; Utica, N. Y., August 15th to 18th; Poughkeepsie, N. Y., August 22d to 25th, and closes at Hartford, Conn., August 29th to September 1st.

The enormous value of first-class trotting stock is almost beyond belief. Thus it is estimated that the produce of Miss Russell, dam of Mand S., consisting of nine sons and daughter, would readily command upwards of \$160,000 cash if offered for sale in open market. Her daughter, Cora Belmont, gained a record of 2:24½ at Hartford recently, and it is said she can beat 2:20.

The races that were held at Galt, Sacramento county, on the Fourth of July, passed off very successfully. The first was a trot between two district horses, Bird and Senator—Bird won the first heat, and Senator the two final heats and race. Best time, 2:58 and 3:01. A half-mile dash was then arranged between Mary Ellen and Eittle George, which was won by the latter in 56 seconds.

LUCKY B.'S DAY.

It was very unchristian-like in the Chicago *Times* to remark that "the track and all the surroundings (on the 30th of June) were afloat. A life preserver was almost a necessity for the unfortunates who were compelled to ride on a West Division street car, as the water was little less than neck-deep in the ditch between the landing and the gate. After that seaport had been reached, eleven policemen, part of them belonging to Pinkerton, and the remainder, perhaps, to the city, inspected the ticket or badge, and then the journey to the grand stand or club house began. For some portion of the distance the planks had not floated away, but as the approach to the grand stand was made the footing was very uncertain. Large sections of the walk were floating hither and yon, and a misguided step would cause the mix-

ture of rain and mud to fly between the crevices and all over the horseman's raiment. Then, as a matter of necessity, profanity prevailed, and when the entire crowd, if crowd it could be called, was finally mustered, it is doubtful whether a careful census would have brought the number of noses up to one thousand. There was a solitary single carriage in the field, the occupants of which cared little about the pool-box, but the majority of the spectators were composed of professional sports and gentlemen from Senegambia.

A reporter for the *Times* asked a well-known Chicago gentleman, who is a great admirer of horses and the owner of several good ones, why it was that the people of the Northern States—the business men—could not be induced to take an interest in running horses; and why Chicago people would not drive to the race track to see the flyers, despite the weather.

"My friend," was the response, "the answer is very easy. North of the old imaginary Mason and Dixon's line the people are thoroughly practical. They want something they can use when they invest their money, and do not propose to pay something for nothing. Now, why, they argue, should we take an interest in a running horse? Blood is good enough, in its way, but a running horse is of no account only on the track. He is a vicious, unmanageable, treacherous brute, requiring constant attention, and, when the season is over, can you tell me what he amounts to? On the other hand, the trotter is always good. He may be broken down as a purse winner, but after that he can be used as a family horse, and then, perhaps, he may be attached to a delivery wagon; but until he goes the way of all horseflesh, a trotting horse can always pay his feed. That is why, I think, the practical Northern sense does not take kindly to an animal that can be beaten by a greyhound or a jack-rabbit, that is always vicious, and takes 'two niggers' to hold it, one to ride it, and three to groom it."

After listening to this oracular exposition of the reasons why only a thousand people were present to witness four good races, the reporter wended around and looked at the pool buyers. The Chicago man is not as numerous as he was. Only two days ago he drove out tandem and placed his money on Punster. Yesterday he was more mild-mannered, and came along in a plain hack, without a liveried driver, and wagered the bulk of his remaining wealth on Ascender. Ascender won the other day. He did not yesterday. To-day, if these same reports come out, any one of the private carriages of Superintendent Lake, of the West Division Railway, will be good enough. Unprejudiced people will always have a fear, however, that Ascender was a straight winner, though he was ridden very carelessly on the home-stretch, and even then it was head and head. From the reporters' outlook over the wire, he was a square head in front, but the good judges thought otherwise. The California colt, undoubtedly one of the finest horses on the turf, made a wonderful burst of speed on the home run, but the decision was far from satisfactory, nevertheless. In the pools, Ascender brought \$100 and field \$30.

ANSWERS TO CORRESPONDENTS.

EDITOR BREEDER: Will you please state in your paper the amount of Area to be given for worms, and what it should be mixed with, and oblige
A. READER.

Ans.—The dose for a young dog should be 3 grains of the freshly powdered nut for each 12 pounds of the dog's weight. The best plan is to put the powder in some savory broth and give at once. If left to stand the bitter taste of the nut impregnates the broth and the dog will refuse to touch it. In case your dog will not take broth, place the powder in the center of a thin piece of meat. Roll it up in the form of a small ball and allow the dog to bolt it about two hours. After giving the nut give an average dose of castor oil. This is a sure cure for all small worms.

A bets B that Ross will get more votes in the Democratic Convention than Sharpstein, for the position of Judges of the Supreme Court:

	First Ballot.	Second.	Third.
Ross.....	154	176	233
Sharpstein,.....	154	187	211

On the 4th ballot, Sharpstein, 247.

229 will elect.

B wins.

SACRAMENTO, June 26, 1882.

EDITOR BREEDER AND SPORTSMAN: The last paragraph of Rule 52, Page 47, P. C. B. H. Rules, is somewhat ambiguous. Supposing my horse has the best of it for second money up to the last heat, thus:

A—3....1....1
B—1....2....dist.
C—2....3....2

The above summary relates to second and third place. Must distance be waived in this case, or only when they are equal up to the last heat? Who is entitled to second money in above summary? Yours,
E. F. S.

B is entitled to second money.

Mr. Seth Green, the famous fish culturist, asserts that an acre of water can be made to pay as much as an acre of land.—*City and Country*.

We should smile! A milkman, for instance, would make \$44,935.27 out of an acre of water without making any visible inroad upon the supply, while a cock-tail contractor could discount him and run a saw-mill besides.—*Columbus Sunday Capital*.

Many of the interior clubs are taking to the clay pigeons instead of the bird itself, as the imitation gives as much excitement to the shooter and the spectators without entailing an extra expense and the mutilation of the birds. The demand has been so large that the supply is not equal to the occasion, but the agents, Messrs. Pierce & Co., of Oakland, now expect a consignment that will enable them to meet all orders.

At the Alameda County Sportsman's Club at Littlefield on Saturday last, there was a series of clay pigeon matches that ended only with the giving out of the birds. In the first shoot there were fourteen entries, fifteen birds each, fifteen yards rise. Mr. Crellin won first money, Messrs. Tuttle and Schnable tying on thirteen birds each, divided second and third, and Mr. Adams broke twelve birds and secured fourth money.

ROWING.

In professional rowing this week the noticeable event was the Whitehall (double scull) race on Sunday last between Peter Burns and J. Desmond and Fred Smith and Sam Watkins, for \$100 a side. The course was from the Oakland ferry slips, around Goat Island and return. No stiffer pull could be desired, as the ebb tide was running strong and the water in the stream was choppy. Burns and Desmond, being professional boatmen who have been pulling Whitehall boats all their lives, it was regarded by the watermen as a foregone conclusion that the South End boys would be disgraced. It was not even taken into account that Smith and his mate had had a very light and fast boat made for the occasion. A week before the race two to one was freely offered on the watermen, but the betting dropped to more rational figures before the morning of the race, and was even when the men took their places for the start. John F. Sullivan, of the Pioneer Club, acted as Referee. The start was fair. In the first 100 yards Smith and Watkins drew away half a length from their opponents, but the watermen, by a spurt, caught and passed them. They never got clear water between the boats, however, and at the end of the first quarter began to fall back again. The rowing of the South End boys was incomparably superior to that of their opponents, who indulged in that peculiar method of feathering their sculls so dear to the hearts of professional Whitehall boatmen. The race was a fine illustration of the well-known fact that a man may be all his life on the water and know very little about racing. Instead of steering southeast so as to weather the Island, toward which the tide was running with great force, Burns and his mate kept directly east, and the result was that off the Island they had to stem the full force of the current. Smith and mate allowed for the tide and made a fine turn, the current just carrying them past the rocks and giving them such an advantage that the remainder of the affair was a procession. On the last half mile Smith stood up in his boat several times, but whether for the purpose of making his opponents ridiculous or merely to stretch his legs, he did not state on landing. The Whitehall men were beaten a full hundred yards. After the race there was some talk of changing boats and making another match, but so far nothing has come of it. A change in the style of rowing would be more essential to the success of the watermen than a change in their boat, though they evidently were not as well boated as their opponents.

Mr. Yale, who kindly acted as Referee in the city's regatta on the 4th of July, defends himself against the criticism on his decision which appeared in these columns last week. Mr. Yale's card will be read with interest by all rowing men, as his decision has caused a good deal of discussion, and the question is still far from being settled. The Rowing Editor of the BREEDER AND SPORTSMAN has no hesitation in repeating his criticism of Mr. Yale's action, which comment only went to the moderate degree of condemning the decision as "very severe and hardly fair." It was very severe, because had the race been a regular professional match for the championship of the world, Mr. Yale's interpretation of the rules could not have been more rigid. It was "hardly fair" for several reasons. In the first place, the South End crew, which was the one fouled, not only neglected while in their boat to lodge a complaint against the Pioneer crew, but actually, in the hearing of the writer, stated that they did not wish to urge any objections against the Pioneers. A majority of the judges, if not the whole number, were in favor of giving the race to the Pioneers, and under these circumstances Mr. Yale's decision could not have been regarded as anything else than "hardly fair." The reasons might be multiplied, however, in support of the mild criticism to which the Referee objects. Mr. Yale will not deny that the object of the regatta was not to give any crew a prize by the virtue of technical objections. The affair was intended to be a popular pastime, and it was the wish of the citizens connected with it that the best crews should carry off the trophies. That the Pioneers proved themselves the best crew in the disputed race, could not have been doubted for a moment. The yacht Ariel lay right across the course and the Pioneers had the outside section in the full face of the wind when it was blowing with sufficient force to make the outside station a heavy handicap. To have gone outside the yacht would have been equivalent to throwing away the race, and the bowman accordingly allowed the two rival boats to shoot ahead and then steered inshore for the smooth water. The stroke side of the Pioneers' boat being stronger than the bow side, the boat ran up into the strong wind, and went straight towards the South End men, who, instead of avoiding a collision, pulled straight across the course, so as to cut off the Pioneers. A collision was thus rendered unavoidable and the boats came together. After the disentanglement the Pioneers, who were a hundred yards behind the Ariel boat, rowed strongly to the stakeboat, turned it ahead of the Ariels, and came home in the lead. Once more the yacht Ariel obstructed them, and nearly brought the race to a sudden and disastrous end for the Pioneers. The bowman just managed to clear the yacht, but in doing so his crew lost so much time that the Ariels once more shot to the front a clear length. Again the unlucky Pioneers gave chase, and after a desperate race crossed the line winners by a few feet. There was considerable money wagered that the Pioneers would beat the Ariels, for it was conceded by all oarsmen that the South Enders were out of the race. That the Pioneers did beat the Ariels, and beat them under extraordinary disadvantages, there could be no question, and when Mr. Yale, after seeing the race, disqualified the Pioneers, though not solicited to do so by the South Enders, he did an injustice to a plucky crew, and to a lot of people who put their money on a square contest without any consideration of technicalities. Mr. Yale says that he visited the South End boat house after the race, and examined the injured boat before giving his decision. It is difficult to see why he should have taken that trouble after the crew in their injured boat had rowed up to the Judge's launch, and plainly announced that they had no charge to lodge against the winning crew. The fact of any member of the crew holding up his hand at the moment of the collision does not outweigh what the whole crew stated after it had been called up by the Referee, and asked whether it wished to claim another race. It is hard to see how, under a strict construction of the rules, Mr. Yale can defend his

decision, which was in antagonism to that of a majority of the Judges. It does not seem to be required by the rules that a Referee shall follow up a crew, and almost insist on their preferring a claim of "foul" against a rival crew, when they voluntarily decline to take that advantage. The great hardship, however, lies in the fact that the race was judged as if it had been a well-conducted match race, when, in fact, it was only a helter-skelter affair. None of the boats started on strictly even terms. Without anchored skiffs to hold the sterns of the racing crafts, it was impossible to give them a fair send-off in the strong wind and tide. When they were sent off, they had to work their way around a vessel lying straight in their path, and to hold a crew to strict account for a plainly accidental foul under such circumstances is certainly, in the opinion of the Rowing Editor of the BREEDER AND SPORTSMAN, "very severe and hardly fair."

Hanlan is again able to walk about. His confidence in himself has evidently not been much shaken by his fit, for he issues the following challenge:

"I will row any five men in the world two miles straight away, or two miles and turn from \$1,000 to \$2,000 aside. I will row these five men after lapse of forty-eight hours (two full days) of each other on any suitable water on the continent of America. The challenge is open to the whole world." Hanlan further adds, if he could get on these matches in America, he would forego for the present his intended visit to Australia.

The London Sportsman of the 28th ult. says it is difficult to believe that the Hillsdales are the best amateur crew America can produce. In a row under favorable circumstances yesterday, they got no place on the boat, the time of the oars was most irregular, and the work was left entirely to the arms. Notwithstanding the peculiarities which offend the critical British eye, the various regatta committees continue to bar the Hillsdales.

LONDON, July 8.—The Sportsman says of the preceding: "We are utterly astonished at the action of the Committee of the Amateur Rowing Association in passing a resolution touching the status of the Hillsdale crew. It feels with pain almost the degradation of the Association in not affording simple justice to the visitors. The entries of the Hillsdales in one or two regattas have been duly accepted, and now they find themselves thrown out of the entire category of amateurs, though they have held the proud position of amateur champions of America for four successive years. It would be surprising if the resolution should debar them from rowing in regattas for which they are entered. If so, the framers of the resolution will incur a heavy odium and reproach. The Sportsman specially appeals to amateur oarsmen generally to decline to share the shame."

At the Marlow regatta the Hillsdale crew beat the Marlow crew by a clear length. Directly after the start the Hillsdales fouled the Marlows badly. The latter, however, did not claim a foul. The Hillsdales went rapidly ahead, and after leading at one time by a hundred yards, won easily by a length and a half. The Referee did not insist on the foul being preferred.

"It is pretty safe to predict that the new Yale stroke will not cause the promised revolution in boating," remarks the New Haven Palladium; "for a graduate of sixteen years' standing writes: 'Tell the boys it served 'em right for taking up that old, exploded, short-clipping stroke. The moral of Harvard's victory is simply that Yale tried an experiment and failed. She deserves credit for her pluck, but the less said of her discretion the better. She had the skill, muscle and endurance requisite to success, but her powers were misapplied. It was a pretty race, nevertheless.'" According to the Hartford Times, "Yale, notwithstanding its supposed superiority in weight and muscle, was beaten in the race this year by the better stroke of the Harvard crew."

THE DECISION ON THE SHELL RACE.

ROWING EDITOR BREEDER AND SPORTSMAN: In accordance with the usual custom in rowing circles, I see you consider it necessary to criticize the referee in the late race as well as the contestants. It accords with my former experience in this direction that those against whom a decision rests are those who complain or feel aggrieved, so it is scarcely worth while to enter into an argument on every occasion. The referee interprets the rules to the best of his ability in as fair a manner as he can, and in this instance, as in others, I have endeavored to do strict justice to all.

As the criticism this time comes from an oarsman and writer, I should be pleased to have him give his interpretation of the rules which would admit of a decision being given in any other way than it was in the case of the four-oared shell race on the 4th.

I have not the slightest objection to giving my reasons for ruling as I did. Three boats started; Pioneers outside, Ariels in middle, South Ends inside.

Rule 5 of the laws of boat racing says: "Each boat shall keep its own water throughout the race, and any boat departing from its own water will do so at its peril."

Rule 6 says: "A boat's own water is its straight course parallel with those of the other contesting boats from the station assigned to it at the starting to the finish."

According to these rules all departure of a competitor from his own water and proper course is at the peril of instant disqualification if touched while out of his true course.

When the Pioneers came in collision, they had rowed diagonally out of their line—gone past (astern) of the Ariels and rowed into the water of the South Ends, who had inside station, while the Pioneers belonged outside. Therefore, no matter what the other circumstances of the collision, according to Rules 5 and 6, which contains the vital principles of the improved code of boat racing, the Pioneers were at fault.

Rule 8 says: No fouling whatever shall be allowed; the boat committing a foul shall be disqualified.

Now, the foul was unmistakable and the boat committing the foul was unmistakable. A man in the South End boat threw up his hand as the usual signal that a foul was claimed. The boats went on, the Pioneers came in first, Ariels a few feet behind, and South Ends far behind. I decide that the Pioneers are disqualified for the foul, and that the Ariels and South Ends row over at a future day to decide the race. You think the Pioneers ought to have had it, because the foul "did not interfere with the Ariels, who were beaten on their merits, and in any event the South Ends could not have won."

You say the South Enders waived all claim to the money and declined to enter a protest. You are mistaken. They protested when their Captain threw up his hand at the moment of collision. They stopped and asked me if there was second money in the race when they came in. I said no, and they rowed off. The Ariels protested and claimed first money on the ground that the Pioneers rounded the wrong stake. This the rules allow them to do, so that claim was disallowed.

As I understand your criticism, I was wrong because no formal claim of foul was made by the South Ends before they left their boats. They held up their hands at the collision; they asked if there was a second prize. But I maintain no claim is necessary where there is unmistakable evidence of a foul where it influences the race. Rule 8, above quoted, makes it imperative on the umpire to disqualify the fouling boat.

At first I thought the race belonged to the Ariels, the Pioneers being out, but I reserved my decision in order to look at the South End boat. After all the races were over I did look at the boat. Her rail-heading was broken, the cloth cover torn and the boat bruised. A hole was in her bottom on the other side. The crew claimed this was done by the collision; that the after compartment had filled with water; that the steering wire had caught in the broken moulding, and that the boat would not steer.

I had seen the collision, which was evident to all. I saw the marks on the boat, and I saw water poured out of the hole where she was struck. The hole in the bottom on the other side may have been made by the Pioneers' boat, or may not; but that in the canvas was, without doubt.

Now, there is no doubt the race was influenced by this collision. The South Ends boat was made to leak and their steering gear disarranged through no fault of their own. Therefore they did not row with equal chances with the Ariels. As to the ability of the men to row the other crews, that's none of my business—the result decides those questions. Nor have I a right to say the leak would not let in water or the mouldings would not catch the wire. The fact remains that the boat sprang a leak after the collision.

In view of all these facts, I ruled that the Pioneers had committed a foul and were disqualified. The South Ends had been wronged, and should have a right to a fair contest. That the foul was accidental, is admitted, but it was none the less a foul. You think "considering the manner in which the regatta was conducted, the interpretation of the rules was very severe and hardly fair."

I do not know what you mean by the first part of that sentence. The regatta was conducted, as far as I know, under rowing rules. As to delays and all that, I express no opinion, but with interpretation of the rules I should decide the same were the prize the McKinley cup or a \$5 purse.

I do not make any pretense of being infallible, and am perfectly willing to be fairly criticized. If my decision is unjust, please point out where it is so. All rowing men are interested in a fair discussion of such subjects as this, for their elucidation serves as precedent. Had I given the Pioneers the race because they came in first, it would have been unjust to the South Ends, whose boat had been damaged so as to leak by the first boat in. Had I given it to the Ariels, it would have been unjust to the South Ends, who had been interfered with by the Pioneers. I could not give it to the South Ends because of the collision, because that would have been unjust to the Ariels and contrary to rule. I could not let the Pioneers join in the second race, because Section B of Rule 13 says: "To order the boats engaged in the race, other than the boat committing the foul, to row once again on the same or another day."

You may maintain that I should not decide a foul unless appealed to. But I say an appeal may be by either signal or word of mouth, and signal was made. Again, read Rule 8, given above, and tell me, for my own instruction and the benefit of others, what else could have been done, all the circumstances being considered. I am willing to rest under an accusation of error of judgment, but not one of unfairness, for I considered this question from all its bearings, and decided according to the arguments I give herewith.

Respectfully,

CHAS. G. YALE.

YACHTING.

The Lively is once more in commission.

Mr. Blakiston was out in the Virgin last Sunday.

The sloop Nellie has been brought back from up river.

No more races announced just now.

There is a Yale Yacht Club now at New Haven.

The Sunnyside is a new Yacht Club of Winthrop, Mass.

Two of our fleet are still "outside." The Casco and Nellie are both south yet on a cruise.

A. B. Spreckels, of the Bohemian Yacht Club, has gone to the Sandwich Islands.

Mr. H. B. Underhill, Jr., of the S. F. Y. C., has gone to Puget Sound on a trip for his health.

The Aggie made the trip up from Monterey in twenty-four hours.

The Solita is back from up river. Captain Chittenden is the most enthusiastic sailor among the yachtsmen.

The Frolic got becalmed Sunday, an unusual thing at this season of the year.

The New York Yacht Club Schooner Intrepid is coming back from Europe, on account of ill health of the owner.

The famous schooner Dauntless has changed hands, and her new owner will go to Europe on her.

Between sunset and colors yachts should carry a night pennant.

When yachts pass each other the juniors should salute first.

When squadrons of different clubs meet on a cruise salutes should be exchanged only by the commanding officers.

The American cat boat Gleam was beaten by the Britisher on British waters.

A 35 ft. keel and 45 ft. over all cutter being built in Boston, is to have 23,000 pounds of lead on her keel.

Ingalls' new plunger, built by Stone, has the historic name of Restless. She is a fine boat.

The Ariel has not been put in proper trim yet. Captain Turner is very busy.

The Whitewing came out with a new set of sails on Sunday.

There, we knew it was coming! A South Carolina man has named his yacht "Oscar Wilde." She ought to have a lead keel to stand up well under such a name.

The yawl Fleetwing has been carried on a ship's deck to New Tacoma, Puget Sound, where her owner, Mr. Cook, now resides.

Berry's Elia will be all right again pretty soon. Jack Caswell, her builder, is at work on her. The cushions, mattresses, etc., were saved without being injured.

Yachts in commission should hoist their colors at 8 A. M., and haul them down at sunset, taking time from the senior officer present.

The famous old sloop Julia never took kindly to a schooner rig. She sailed better when swinging a 64 ft. boom and a jib 40 ft. on the foot.

A cutter being built East is described as being as deep in the hold as an artesian well. Yes, and she will draw almost as much water.

Instead of large schooner yachts being built now-a-days, the tendency is to steam yachts. With small yachts however, sailing yachts will always remain the favorites.

The Larchmont Yacht Club has taken in more new members this season than any of the Eastern clubs. She has a large membership and fine headquarters on Long Island Sound.

During the yacht races East they are in danger of thunder squalls, something we never think of here. We have down-right good strong breezes, but no provoking thunder squalls in which to douse everything and scud under bare poles.

In order to add an iron keel of 4280 pounds to the sloop yacht Guadelupe, a full set of new floor timber was put in to strengthen the boat. We have heard of lots of lead added lately in this way, but have heard of no new floor timber. Indeed we have heard of numerous leaks.

At the Ladies' Day Regatta of the Atlantic Yacht Club a prize was awarded to the winning yacht in each class, the prizes being all alike. They consisted of neat gold lace pins, with the flag of the club attached in enamel, and were presented to the favorite lady in each winning yacht.

It is not generally understood, but it is a fact, that the American cup when won does not belong to the owners of the vessel winning it, but to the club she represents, and the condition of keeping it open to be sailed for by all organized yacht clubs, of all foreign countries, is forever attached to it, thus making it perpetually a challenge cup for friendly competition between foreign countries.

One of the handsomest boats ever built in this city has just been completed to order of Mr. I. Gutte by Burns & Kneass, the Mission street boat builders. She is for a custom house boat for a new Mexican custom house on the Gulf of Tehuantepec—Tonala. She is 30 feet long, 8 feet beam, and is coppered. She has two masts and sails. She is copper fastened, has a brass keel-board half-inch thick, and has knees, rowlocks, yoke, etc. She is to be propelled by six oars. She looks like a regular little dandy yacht, and is the best built craft we have seen for many a day.

The match between the Glean and the Mocking Bird was decided on the Solent on the 3d inst., and resulted in the success of the English boat. The Glean is a center-board Rhode Island cat-boat, 25 feet 6 inches long and 11 feet 2 inches beam. The Mocking Bird is a new boat, built almost on purpose to race with the Glean, by Stockham & Prickett, of Southampton. She is 30 feet long, with a beam 10 feet 6 inches, is a keel boat, with a large spread of canvas. If the above match was sailed without time allowance the extra length of the English boat gave her a decided advantage.

The one gun start has been tried by the Atlantic Club, but according to the *Spirit of the Times*, does not seem to have been satisfactory. It says:

"The advocates of the 'one-gun start' will be delighted to know that the gentleman in charge of the race, Mr. H. C. Winttingham, adopted it on this occasion in order, as he said, to avoid the trouble of timing the yachts as they started, and possibly for the purpose of seeing how it would work; but they will not be as well pleased to learn that the result showed, as it always will show, its extreme unfairness. Of the seven yachts in the first four classes who were sent off at 3.39, only five had got across when, at 3.44, the signal for the rest to go was given, and of the nineteen which were included in the four last classes, but six got over inside of five minutes."

A CLOSE FINISH.—The Seawanhaka Yacht Club, of New York, is naturally a Corinthian club, and has set a good example to the other clubs of the United States in the matter of amateur racing. Its Corinthian regatta came off on the 7th ult. We have not space for details, but the following were the results:

SCHOONERS.					
Name.	Start.	Finish.	Elapsed Time.	Corrected Time.	
	H. M. S.	H. M. S.	H. M. S.	H. M. S.	
Albatross	11 35 00	4 55 13	5 20 13	
Clytie	11 35 00	4 33 40	4 58 40	
Louise	11 35 00	Not timed.			
FIRST CLASS SLOOPS.					
Gracie	11 35 00	4 16 15	4 41 15	4 41 15	
Fanny	11 35 00	4 24 12	4 49 12	4 47 08	
SECOND CLASS SLOOPS.					
Eclipse	11 35 00	4 32 10	4 57 10	
Oriva	11 33 57	4 39 45	5 05 48	5 05 48	
Valkyr	11 35 00	4 49 57	5 14 57	
Vixen	11 35 00	4 41 15	5 06 15	
THIRD CLASS SLOOPS.					
Wave	11 32 42	4 05 17	4 32 35	
Schemer	11 33 22	4 05 44	4 32 22	
Volante	11 33 22	4 24 09	4 50 47	
FOURTH CLASS SLOOPS.					
Gael	11 22 30	3 20 50	3 48 20	
Amazon	11 35 00	3 31 40	3 56 40	
Vivien	11 35 00	3 36 20	4 01 20	

The winners are the Clytie, Eclipse, Schemer, Gael and the Gracie. A protest was filed against the Gracie for carrying a balloon jib contrary to rules. A feature was the close contest between the well known Wave and Schemer, for under a fresh breeze the Wave crossed the finish line 27 seconds in advance of the other, but the elapsed time put the Schemer at the front by 13 seconds.

THE GUN.

AMENDMENTS TO THE GAME LAWS.—The Secretary of the California State Sportsman's Association has had printed the proposed amendments to section 628 of the Penal Code, which will be enclosed to the Supervisors of every county in the State. The amendments are designed to rectify an oversight of the Legislature in failing to pass a law for the protection of female deer and does, and reads as follows:

Section 1. Every person who shall, after the passage of this ordinance, pursue, hunt, take, kill or destroy any female deer or doe, shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by fine of not less than \$50, nor more than \$300, or imprisonment in the County Jail for not less than thirty days, nor more than six months, or by both such fine and imprisonment.

Sec. 2. Every deer in possession, exposed or offered for sale shall show conclusive evidence of its sex, and proof of failure to comply with the provisions of this section shall be prima facie evidence in any prosecution for a violation of Section 1 of this ordinance, that such deer in possession, exposed or offered for sale was a female deer or doe.

Sec. 3. Sections 1 and 2 of the ordinance shall not have the effect to repeal any of the provisions of Chapter 1, of Title 15 of the Penal Code of the State of California, which provisions were in force at the date of the passage of this ordinance.

VERY QUESTIONABLE "SPORT."—Dove shooting is all the go at this time, and everybody that owns or can borrow a gun is out on some pass or other. The birds are very numerous in some places, and bags of from 75 to 150 a day to the gun have been made since the 1st. One party of four young men went up beyond Folsom on Sunday and killed 380 birds, which rotted in their pockets and had to be thrown away. We hear of other parties killing quite as many, and do not doubt it, as one may shoot from daylight till dark on a good dove pass, almost without cessation. On both Saturday and Sunday last there were not less than seventy-five men and boys banging away at the birds along the roads and in the grain fields between this city and Alder Creek. A desire to hunt is very natural and proper, but the exertion that some make to kill game they cannot use, is certainly reprehensible. It is about equivalent to granting a stranger the privilege of picking a hatful of fruit from your orchard and then for him to cut down the tree or scatter its load upon the ground to decay. Or for the traveler—after having slaked his thirst—to empty the well and turn the water to waste. One of these days this class of shooters will be compelled to hunt sparrows, if at all, for they will have nothing else to kill. We trust they may live long enough to realize how senseless, to use a mild term, had been their course.

"Mr. Peter Reid, of Pauquier county, says that a few days ago as he was talking to a friend, he noticed a little snake, about a foot long, and before killing it he turned it over with the muzzle of his gun. To his surprise the snake ran up the gun-barrel, and he could not get it to come out, so he let it remain. As he was going home he saw a hawk flying overhead and raised his gun and fired at it. The hawk was not hurt, but seeing the snake in the air, started toward it and caught it on the fly. Mr. Peter Reid is a brother of a magistrate and a church member." The above, taken from a Virginia City paper, suggests the inquiry as to whether Sam Davis, Esq., is not on a visit to his former haunts. The story is well worthy of his imaginative pen.

A FUNNY POINTER'S JOKE.—The dog had pointed at snakes without ever once making a mistake for three years, when one day last September he accompanied his master on a walk through a particularly stony field, where snakes were known to be plentiful. Suddenly the dog, who was walking just in front of the huntsman, stopped and pointed so earnestly that it was evident he had almost stepped on a snake. The huntsman sprang back with immense celerity—for he was a very nervous man—and in so doing tripped and fell with a tremendous crash. The dog, merely glancing around to see what was the matter, resumed his point until his master had picked himself up, calmed his mind, and resolved to kill the snake. Advancing with that direful purpose, he discovered, not a snake, but a cast-off snake's skin at which the dog had pointed. The moment the man discovered the trick the dog threw himself on his back, rolled over and over in an uncontrollable fit of laughter, and finally sitting down on his haunches, laughed till the tears rolled down his cheeks. He knew a snake's skin from a live snake perfectly well, and his purpose in pointing at the snake was simply to give his master a good fright.

The picturesque mountain peak above Santa Rosa is a favorite haunt of the grizzly, and in their incursions from St. Helena into Knight's Valley they have played such havoc with the lambs and sheep, that the ranchmen have organized a regular hunt for pelts and bears' grease.

From the *Photographic News* we learn that M. Marey presented recently to the Royal Academy of Sciences at Paris, some pictures of birds on the wing, secured in the camera with an exposure, it is said, of 1-700 of a second. Mr. Muybridge's "Animals in Motion" includes birds on the wing, and he shows, what we believe has never before been depicted, a bird in the air with its wings below its body. We have not seen M. Marey's apparatus, but it is cleverly constructed like a rifle, so as to be capable of being raised to the eye to take aim and expose. It is on the principle of M. Jaussen's revolver, which makes a series of rapid exposures one after the other, and with this M. Marey is able to secure the bird in various positions. A chronograph regulates the periods of exposure, which may be as brief as 1-1,500 of a second. M. Marey proposes to combine a series of the photographs thus taken, after the manner of Muybridge, and in this way to analyze a bird's movements and demonstrate it in motion, as the American photographer has done with his galloping horse.

Messrs. Robert Liddle, J. M. Bassford and F. J. Bassford, in two hours' shooting, near Vacaville, on Saturday last and part of the succeeding day, succeeded in bagging 232 doves.

The Cosmopolitan Club will indulge in pigeon-shooting, at San Bruno, on Sunday next.

J. D. Lucas, of St. Louis, Missouri, and who is a crack wing shot, is on a visit to this city.

H. A. Hahn and J. F. Simms, in hunting at Pleasanton, Sunday last, found doves very scarce.

THE RIFLE.

SNAP SHOOTING AT MONTEREY.

A number of gentlemen, who spend their Saturdays and Sundays at Hotel Del Monte, have taken up snap shooting with 22-caliber rifles, and under the direction and encouragement of Col. Fletcher are making rapid progress in the art of hitting. Carey Friedlander, Austin Tubbs, Alfred Tubbs, Will Tubbs, Capt. R. C. Hooker, Dick Hammond, Major Hammond, J. W. Brown, and others are among the number, with the greatest amount of enthusiasm centered in Friedlander, Austin Tubbs, Hammond and Brown. More than fifty per cent. of hits have been attained, and all the gentlemen are infatuated with the facility of aim which the practice gives them. Pistol practice also is in favor, and any of the gentlemen named would be dangerous antagonists to open fire on with the revolver. Numbers of the ladies also find pleasant recreation in both rifle and revolver practice, and healthful, invigorating exercise combined with it. As we propose to make snap shooting a feature of this paper, we again invite correspondence on the subject from gentlemen who are interested in it.

THE HUNT.

Frank Cooper killed a large panther or California lion in Bear Valley, Mariposa county, about a week since. Cooper had gone out one morning on a hunt, taking a valuable hunting dog with him. The lion jumped from the limb of a tree onto the dog's back, and after a short tussel with the canine demolished him. Cooper then killed the lion with a shot from his rifle. The beast measured nine feet and a half from the nose to the tip of its tail. The skin is of a light-brown color.

ANOTHER PANTHER STORY.—Last week we made note of the fact that Henry Meckel passed three panthers—or California lions—on Rush Creek, and that the animals seemed quite tame and made no attempt to get out of the way. The following regarding one of this species of animals is certainly a most remarkable occurrence and is vouched for by Supervisor F. Bates, an authority which no one will doubt: Recently in the vicinity of Minersville, Trinity county, California, some neighboring Chinese called at the cabin of Jonathan Smith and wanted to borrow a rifle to shoot a dog, which they said had been killing their chickens. Mr. Smith had no gun, and so informed them. Next day the Chinese again visited Smith's cabin and wanted him to "come quick; look see, dog eattee chickee!" Mr. Smith went with them and to his surprise found a large panther in the brush devouring a chicken and which refused to leave its dainty meal. Smith grabbed the panther by the tail and wanted the Chinamen to hit it over the head with a shovel, but they either did not understand or were too cowardly to tackle the beast. Mr. Smith let go his tail-hold with one hand, still gripping firmly with the other, stooped and picked up a rock with which he succeeded in breaking the animal's back. It was a daring deed and one which deserves to go on record. The apparent harmlessness of the panthers at this time is accounted for on the supposition that the animals are nearly starved.—*Trinity Journal*.

SOMETHING ALWAYS HAPPENED.

I recently met an old friend, and we were relating bygone reminiscences to each other, when he said:

"Did I ever tell you my snake story?"

"No."

"Well, then, I will tell it now. You are aware that I am a great sufferer from asthma, and to obtain relief from it I have been everywhere that I was advised to go, except to heaven. Amongst other places, the lower part of the State of Georgia, out in the 'pine country', was recommended to me, so thither I went. I always kept a few hounds about me, and at that time had a bitch, and two puppies, about twelve months old, that were beauties. My new neighbors praised their looks, and said: 'Maybe you can kill three old bucks that have been in this section for twenty years, have been run at least ten thousand times, but something always happens to facilitate their escape.'

"After much boasting of the good qualities of my dogs and my prowess as a hunter, and a promise to furnish them some venison from the aforesaid bucks, I decided to try my luck the first leisure moment. This occurred in a short time, and I found a good trail, jumping my deer in a short time. Putting spurs to my horse, I made for a stand, but in crossing a flat my horse stepped in an old stump hole and threw me about forty feet. This was 'something always happened,' number one.

"However, I had found exactly where they ran, and said to myself, I would be sure of them next time. I did not wait long for the next trial, just long enough for them to come back, when I started after them again. I put the dogs in at the same place, and they soon struck the trail, while I made for the stand, a few minutes after reaching which, the dogs passed me, but no deer. Upon examining the trail, I discovered the deer had slipped out as soon as they heard the dogs. 'Something always happened,' number two.

"It was a week before I got the chance to go again. I determined to put the dogs in, say not a word, and skip out for the stand. There was a little gall berry flat, near the middle of which the path run, and close by this path was a high bunch, near to a clay root. I got there in a hurry, jumped into the gall berries, and squatted. Listening intently, I thought I heard the hounds, and parting the gall berry bushes, I looked steadily up the path. As I did so, I felt something move under me, but thought it the movement of the bushes. About this time I heard the dogs, and saw the deer coming down the path. I got my gun all ready, and moved cautiously forward, when I felt a peculiar and unmistakable movement under me, and shouting: 'Snakes, by thunder!' I leaped out. I looked over my shoulder as I went, and Mr. B., as I hope for heaven, I had been sitting upon a half bushel of the largest rattlesnakes in the state."

"Well, how about the deer?"

"The deer! Oh, yes. Well, as soon as I could hold my gun on that pile of snakes, I emptied both barrels into it, and left, having come to the conclusion that 'something always happened,' and I never went back after those deer any more."—[C. A. B. in the American Field.

SAN FRANCISCO, - - SATURDAY, JULY 15, 1882

THE RACE TRACK AT MONTEREY.

When the Hotel Del Monte was built at Monterey, it was officially promulgated that a race course was to be one of the improvements. This was welcome intelligence, not merely to the devotees of the turf, as the people who frequent a Summer resort are more especially interested in the sport than those who have a more intimate connection with it.

There never was a finer natural location than is in the immediate vicinity of the hotel. The plateau, which extends from the northern front of the house, is admirably adapted for a course of a mile in circuit. In fact, the course could be made to rival that in Goodwood Park, and the famous ducal grounds are not a whit more attractive than those at Monterey can be made for racing.

The characteristics of an English course could be preserved, and, in place of the stereotyped American track, with the brown surface of plowed and harrowed earth, there could be a variety of courses. One by the side of the creek, which has worn a channel deep below the general lay of the ground, the banks umbrageous with shrubbery, and decked with a wealth of flowers such as Southern California can only show, would be just the thing for a two-year-old course. Straight running for three-quarters of a mile, with just enough of it hidden to add to the excitement when the sprinters were in sight. Then, afar off on the eastern side, there could be a Cup course marked, the horses vanishing from view under the pine and cypress trees, coming into sight in the vistas between the oaks, hidden for a time among the manzanitas, and then rushing into the stretch, and ending the race in plain sight of veranda and balcony.

There is a park-like picture in the foreground of the Hotel Del Monte. Lawns and parterres in the immediate vicinity of the house, wildness and repose only a short distance beyond. With training grounds such as could be marked out there, the morning gallops would be actually more interesting than the races of the evening. There would be flitting pictures in the early dawn which would entice the laziest from the couch. Even those who think that the night was made for something besides sleep would be compelled to await the morning gallops before retiring, and there would be an eager assemblage looking at the exhilarating brushes.

The grandest training ground in the world could be made on the plain which extends from the lawn in front of the hotel, between the creek which is on the west and the rivulet on the east. It could be marked into different courses, and without much outlay there could always be turf to gallop upon. And yet there is a question whether turf or harrowed ground is the best for horses to work over. The green, elastic turf compels the belief that it must be the best, and the differences of opinion will gain a score of supporters, but there are good reasons why the harrowed earth should not be so severe as the harder sod, and, with all due deference to the original ideas, we must give our preference for the disintegrated soil. Cut down to a depth which takes the jar off from the limbs, there is the least chance for concussion, and the only argument in favor of the other is that there is less sinking, and, consequently, less strain on the tendons. This can be obviated by harrowing to a

less depth, and, with the requirements of a better foothold, there can be little question of the benefits following. In either case, there can be courses made at Monterey which will meet the fancies of all parties, and either turf or track made suitable. But the whole cannot be bettered, and whether there is ground or turf to gallop over, there is a certainty that either will be good. Still more sure it is that there is not a place from Maine to Oregon which shows better facilities for a race course than Monterey, and the carrying out of the idea to build one there will conduce to the attractions. There is a grand chance in any event. The location could not be excelled. So far, the natural advantages have been improved, and with a race course such as will be built whenever it is determined to construct it, it will be the attraction of this famous watering place.

THE STATE'S FAIRS.

The annual State and County Fairs which flourish so well in California are institutions modelled on the best features of the European and Eastern holiday gatherings, and are yet something entirely different from any gatherings for profit and pleasure that take place at stated periods in the older settled parts of the world. In England the old fairs are rapidly dying out, their places being filled by the grand expositions constantly taking place, and the great metropolitan and provincial cattle shows. The old English fair was either a horse fair, or a sheep fair, or a cattle fair, or a cheese fair, or an opium fair, or a miserable collection of gypsy wagons, roundabouts, "Old Aunt Sally," and all the other games by which the sharpers depleted the yokels' pockets of the spare cash earned at harvesting. One of the great horse fairs was held at Barnett, near London, and usually gathered together from eight to ten thousand head of horses of all grades, from the lordly Clydesdale and Shire horses to the miserable Shetland and Welsh ponies, not eleven hands high. The great sheep fair was held at Arnhem, near Salisbury, and there it was no uncommon sight to see well filled sheep pens covering in all, not less than one hundred acres of ground. These fairs were not so much for exhibition and competition as for sale and exchange of cattle, sheep and other farm produce. They were not enlivened by horse races or athletic games, unless the impromptu trials of skill between rival herders can be dignified with the name of sport. The boxing and wrestling booths, run by some enterprising pugilist, afforded the people all the fun they wanted, and it was by putting on the gloves against all comers at county fairs that Jem Mace gained the skill and endurance that made him the foremost boxer in the world. Bartering all day and drinking all night were the rigidly adhered to programmes of English country fairs. It is a good job that they are things of the past. On the continent of Europe, the lace fairs, the glove fairs, the servants' hiring fairs, were all, as their names imply, gatherings for specific business, and not for sport or competitive exhibition. Here in California is where the county fairs flourish above all other places. The homes of the farmers are far apart, and the interchange of social pleasures consequently difficult. At the county fairs, people who have not seen each other for months meet and talk upon the subjects nearest to the farmer's heart. There they engage in friendly rivalry as to whose cattle, or sheep, or horses, or crops are the best, and there they learn much that is of great value in their business. There they see the newest inventions in labor-saving machinery, and keep level with the inventive genius of the entire world. Better than all this, they and their families have a pleasant period of rest and recreation. The horse races amuse and instruct the farmer, while his wife and daughters find pleasure in the pavilion, inspecting the handiwork of their friends and neighbors. The California county fair is an epitome of all that is purest and best in the lives of the people, and is the most admirable institution for business recreation and instruction that this country has ever seen. It is the direct result of the needs of the people,

and so well it fills those needs that we question if it will ever be superseded. It will enlarge and improve and extend its influence for good as the State becomes more thickly settled, and will ever be found in the van of popular thought and knowledge.

THE CLOSING OF ENTRIES.

The first of August is not far off, and those who have horses to engage must soon make up their minds where they will place them. The trouble will be in the great number of classes to select among, where the trotters are to be provided for, and in the numerous stakes for the youngsters, racers and trotters, there can be little difficulty in finding a suitable place. It is rather a difficult thing at times to tell where the best places are, and whenever there is likely to be a bother on this score, our advice will be to stick them in every place there is an opening. The most acute turfmen are apt to make mistakes in selecting the classes for their horses to figure in, and it is nearly certain that those which are thought to be the hardest places prove the easier. It is not very rare for the slower classes to turn out faster than the others which are marked by several seconds difference, and the "2:40" to be filled by a gang which could more easily win in the races gauged by a dozen seconds of increased speed. Not unfrequently the "three-minute" proves a rare exhibition of speed, and the "2:30" about the slowest on the bill. Under all of these considerations, it appears to be the safest plan to make as many entries as there are places to engage, and to give every Fair in the circuit a trial. In the California programmes there are a variety of purses and classes. Racing, trotting and pacing are all provided for, and it must be rather bad luck if expenses cannot be got out of the trip. There is one thing which all will acknowledge, that there is no chance to win if entries are not made, and therefore the first step towards success is to make engagements.

"DISTANCE WAIVED."

As will be seen from the query in another column, there is a question concerning the meaning of one of the rules in the Code of the Pacific Coast Blood-Horse Association. There can not be a doubt, however, as the waiving of distance in a final heat means that the distance-flag has no part to play in the last heat of a race. The wisdom of that provision will be evident when the question is given a little consideration. There can be nothing gained by the horse which distances the others in a final heat, excepting that there might be money depending upon it which he would not get under the present rule; and often it would deprive a horse of the benefits which should follow a meritorious performance. The case cited presents a forcible illustration of the justness of the rule. "B" makes a valiant struggle to win, and scores the first heat to his credit, and then runs second to "A," which wins the next. It might be that "C" had never made an effort in the first and second heats, coming in with the ease which the extra number of yards afford.

From the comparative freshness which this gives him he is able to push "A" fast enough to "shut out" the winner of one heat and the "runner up" in another, and under the old schedule this would give him a better place. It would be equally as defensible to have a distance in a dash race as in the final heat of a repeating race, and if there is any difference it would be in favor of making it the former. According to the Eastern rules, "C" could not have started in a third heat under the same circumstances, and would have been sent to the stable, leaving "A" and "B" to continue the race by themselves. This is even more effective than the waiving of distance in a final heat, inasmuch as there is a chance for "C" to win the race when he has the opportunity to contend in a third heat.

We write this explanatory of the justice of the rule, as there cannot be a question under it of "B" being entitled to the second money.

The summary sent is defective, as the placing in the last heat should have been, "A, 1; C, 2; B, 3." This does not make any difference, however, as there cannot be "dist." in such a situation.

LEAVE THE SMALL ONES.

It is by no means sportsmanlike to fill a creel with fingerlings simply to "make count," but neither is it a rare thing for even experienced anglers to do. In fact, "old hands" are not much better than new ones in this respect. A man likes to come from a stream and catch 100 to 150 fish—or say he did—rather than to say he only caught half a dozen. Even if he brings back the fingerlings he can call them "pan fish," and eke out with them the camp fare, whatever it may be.

But if the true sportsman is sincere in his belief, he will throw back into the stream all the small unfortunates he may hook, leaving them to grow up, mayhap, for others. It takes courage to do this, of course, especially when several men are at a stream together, and comparative counts are made at the evening camp fire. But if, when men start out in company, they will agree among themselves to "bar" all below a certain specified size, there will be no inducement to basket the little fellows that ought to be allowed to attain size sufficient to give sport to some one.

There are streams which have become entirely depopulated by the conscienceless fishing they have undergone. If anglers will only keep the fish that are of respectable size, and return to freedom those they take which are too small for sport, the stream will furnish amusement for others in time to come. We have no patience with the man who will talk wisely of laws to preserve the fish, and make a boast at the same time of having caught from 150 to 300 fish a day in a brook, for it is evident the quarter and half pounders are rare in such cases. A little forbearance on the part of individual anglers will help the whole fraternity. If these words serve to remind only a few, they will have served a purpose.

OUR HUNTING GROUNDS.

As regards facilities for wild fowl shooting, the city of San Francisco is happily located. Both north and south from it extend wide expanses of marsh land, intersected in every direction by navigable creeks and sloughs. On both sides of the bay for thirty-five or forty miles south are marshes from one to two miles wide, where there is not a single habitation of any sort and where the land is as wild as if there was no city of two or three hundred thousand inhabitants within hundreds of miles. On the inner edge of the marsh on this side of the bay a railroad passes, and on the opposite shore two lines of rail give opportunity for the sportsmen to come and go readily.

In the midst of these marshes are streams and ponds where the aquatic birds swarm in their season. When the tide runs out these birds follow the water down and are way out a mile or more from the edge of the marsh, on the edge of the mud. When the "flights" begin, numerous flocks fly overland, and then the sport begins.

Then, going north, the great Petaluma and Sonoma marshes present good fields, though game is not now as abundant there as formerly.

But passing through Carquinez Straits, one comes to the great Suisun bay and marshes and to the tule islands, where is a sportsman's paradise.

The Suisun marsh is a salt one, but the ponds are fresh in winter. Through the waters of this marsh a railroad passes, with but one small station—Teal—and that for sportsmen alone. There is not a better place in the country for shooting, but this is preserved.

The Montezuma marshes, with the long Montezuma creek passing through them from Suisun bay into the Sacramento river, are also good sporting grounds, but they are little used because there is no way to get at them except by boat, and there are no hotels to stop at.

Then comes Sherman Island, an immense tract of land abounding in ponds, and half flooded, the tules forming shelter for millions of wild fowl in the season. Bouldin Island, Brannan Island, Union Island, and dozens more to be named, all are good places for shooting. Mayberry Slough, Potato Slough, Iron Horse Slough, and fifty more, make good places to resort for wild fowl shooting.

When it is remembered that all these grounds are within one to two and a half hours' travel from the city, it will be seen that San Francisco is well situated for lovers of the gun.

Of course the nearer places are soon "laid waste" by hunters who have a Sunday's trip every week during the season. The better places "up river" are to an extent preserved, but there are such ranges of marsh and tule land where very little shooting is done, all within a radius of say 50 miles of San Francisco. Sportsmen here have no cause of complaint that there is not territory enough, for the marshes are extensive and widespread, and as a general thing, during winter, all of them bear more or less game.

CORRESPONDENTS OF THE BREEDER AND SPORTSMAN.

There is not a particle of necessity for calling attention editorially to the correspondents of this paper, otherwise than to present our acknowledgments for their valued contributions, as the most stolid can scarcely fail to give them a careful perusal. We claim with the fullest confidence in establishing the position, that there never was a paper devoted to the same pursuits which could show a more brilliant array. And when we take this ground, it is also with the fullest knowledge that this class of journals has always been favored in respect to contributors.

From the days when the *Spirit of the Times* first made its appearance, over fifty years ago, until the present, the turf, breeding, shooting, fishing, and other kindred topics have brought out a succession of powerful writers, and the galaxy which gave such a cordial support to the "Tall Son of York" has had successors well worthy of wearing the mantles of the pioneers in this branch of American literature. It may be that only a few now remember the "Old Spirit Guard," or, at least, those which first came to the support of that paper. "Observer," "An Old Turfman," "N., of Arkansas," "Egus," "A Young Turfman," a host of others of equal celebrity, gave a tone to this species of writing which has fortunately been retained. It would be difficult to find a more vigorous style, happier powers of description, keener humor, and a better argumentative display than the "old-timers" presented, and this has been the standard accepted by those of later days.

The three numbers of this paper now published present the most conclusive testimony that there is no falling off, and we may be permitted to say that those who have favored the BREEDER AND SPORTSMAN will rank with the best of any period. Strong as was our faith from before the start that this would be one of the most valued departments of the paper, the result has exceeded our most sanguine expectations. It would take pages to pass upon their merits, and, as we have heretofore written, there is not a single contributor who will fail to attract the attention of our readers.

THE HAPPY HUNTING GROUNDS.

The Pacific Coast is surely the hunter's paradise. In the long stretch of shore line, the valleys covering an area equal to a European kingdom, and, above all, the mountains and the cañons between them, there are opportunities such as no other country presents. Some of our friends are now camping in Lake County, and there are a constant succession of eventful days and repose at night which is denied to the denizens of the city. There are pleasant interludes to the pursuit of game, and the mountain streams afford libations of pure water, but, according to a correspondent, it presents the best effects when mixed ever so little, however, with double-distilled. All of the campers are enthusiastic over the climate of that

Much as one would like to share in the delights of camp life, we are very partial to the cooler air region, and express a condolence for those who have to endure the fogs and trade-winds of the Bay, which is met on our diurnal transit on the ferry boat. The hunting must be a deferred pleasure, and the kind invitations we will be forced to decline. There are hopes, however, for the future, and 1883 may be more propitious.

HORSES IN TRAINING.

There are probably double the number of trotting horses in training in California over what there were two years ago. There are so many at work on private tracks that the fact is only apparent to those who are familiar with the changes which have been made in the last few years. From the letters which have already appeared it is evident that there are lively times on the public tracks, and that as a rule the horses are doing well. To those who have paid much attention to the training of trotters it is palpable that casualties are not nearly so frequent. Trainers have acquired more skill, and the bootmaker has had a good deal to do with the immunity from injury. Then there have been changes in shoeing, though to note even the most prominent will require columns. To give anything like a fair account of the progress which has been made in the past decade will occupy a great deal of space. This space can be well afforded, and after the very busy season is over our readers shall have no reason to complain of any lack.

MARKET REPORT.

We are pleased to present such complete reports of the market. These are prepared expressly for the BREEDER AND SPORTSMAN by a gentleman who has unusual opportunities for making them perfect, not a single sale of any magnitude with which he is not acquainted. There is not a point of information wanting, and the column must be appreciated by a large majority of our readers.

ACROSTIC.

COLUMBIA TO HER HEROES.

Dauntless they died where the ice King dwells;
Eternal the fame their Valor won;
Loudly my song of sorrow swells,
Over the graves of my daring sons:
Nations and kings may fade away—
Glory like theirs cannot decay.

THE BULL'S HEAD BREAKFAST.

Last Sunday at San Rafael that jovial organization known as the Bull's Head Club of San Francisco, gave their regular monthly feast. To give the names of all who were present would simply be to give the names of all the prime good fellows in San Francisco who were honored with invitations and could spare the time for a day's enjoyment. Colonel William P. Barnes presided over the festivities, while Senator T. McCarty fairly outvied himself, and added an extra lustre to his already brilliant reputation by the manner in which he presided over the culinary department. William T. Coleman was there, beaming smiles and genial nature on all, and especially devoting himself to explaining the mysteries of a Bull's Head feast to a number of Eastern tourists who were his guests. The grave and dignified Mr. Cheeseborough filled the responsible post of head waiter with considerable éclat, and literally brought down the house by the manner in which he hauded refreshments to the hungry guests. It was a blending of anxiety to please, a desire to live up to the light of his exalted office, and a good-natured attempt to fill six orders at once, to which the pen of a Dickens or the pencil of Dore are alone competent to do justice. Frank Murphy, the genial Secretary of the Club, was, of course, on hand, and performed the arduous duties of his office with his usual aplomb. The *piece de resistance* was a bull's head, cooked in its natural covering, and baked in a trench dug in the ground, in the old fashion first introduced into America by the Spanish bravos who accompanied Cortez on his swash-buckler expedition against the Incas. Good eating deserves good drinking, and as soon as the cloth was removed, Colonel Barnes announced that the literary exercises of the day were in order. Then the jinks commenced. Senator McCarty told a story, and so did William T. Coleman, and Colonel Barnes, and nearly all of the other gentlemen present. To pay due honor to the day, all the stories were of a deeply moral character, and highly edified the listeners. The punch circulated freely. As Senator McCarty put it, "the cup was filled to overflowing, and even the saucer had as much as it could hold." There was no singing, as singing seldom goes well after a hearty meal. The pleasures of the day may be summed up by saying that it was the happiest, jolliest, nicest time the Bull's Head Club ever had, and if any one fancies that the Bull's Head Club does not know how to make the time pass pleasantly, he don't know enough to wear a solemn face at a funeral. That's all.

THE KENNEL.

FIXTURES.

National American Kennel Club's trials on quails, Grand Junction, Tenn., December 4. D. Bryson, Memphis, Tenn., secretary.

Louisiana Field Trials near New Orleans, La., beginning Dec. 11, under the management of the New Orleans Gun Club.

BENCH SHOWS.—Western Pennsylvania Society's English Setter Bench Show Derby, Pittsburgh, Pa., for English setter puppies whelped on or after March 1, 1882. Entries closed December 1, 1882. I. R. Stayton, Allegheny City, Pa., secretary.

FIELD TRIALS.—National American Kennel Club's trials on prairie chickens, Fairmount, Minn., September 4. Entries to American Field Derby closed July 1; to All-Age Stake, September 4. Joseph H. Dew, Columbia, Tenn., special secretary for these trials.

Gilroy Rod and Gun Club's trials on quails, near Gilroy, Cal., October 28. Open to dogs owned in California, Oregon, Nevada and Arizona. E. Leavessley, secretary, Gilroy, Cal.

Eastern Field Trials Club's trials on quails, near High Point, N. C., November 17. Entries to Derby close July 1; to All-Age and Members' Stake, November 1. Fred. N. Hall, secretary, P. O. Box 884, New York.

JUDGING BY MEASURE.

EDITOR BREEDER AND SPORTSMAN: I noticed in your last issue a communication from a gentleman who desired the adoption of a regular system of measuring prize dogs, for the purpose of creating a reliable standard for the determination of excellence on the show bench. I think the plan is a good one in many respects, but is open to the objection that it is liable to result in the adoption of an arbitrary and fictitious standard, which cannot possibly provide for the due consideration of some of the most important points of excellence in a dog. The principal of these points is what is often termed by fanciers "quality," and can only be defined by the French expression, "the tout ensemble."

The nearest definition in English that occurs to me is "general appearance," and as every fancier knows the general appearance of the animal is the strongest point in its favor or against it. A dog may measure exactly what the best authorities agree is the correct amount in every part of its body, it may have exactly the right shade of color and the proper length of coat, and yet its general appearance may be wretched. In a human being this general appearance is called bearing, and if a man or woman's bearing or carriage is good, it covers up a multitude of bad points. The points which go to make up perfect bearing or general appearance are so minute, and undefinable, that it is impossible to introduce them into any schedule of excellence. Like the electric current, the effects are seen and felt, but no one can state exactly what they are. They fill the eye in an instant, and while it is hard to find a man who can pick out the best of twenty dogs by a separate examination, the merest tyro can select with ease the finest looking when all the batch are together. I have occupied the unfortunate position of judge at bench shows several times, and like every other judge have had my decisions soundly condemned.

When exhibitors have come to me to demand why I placed A.'s dog above B.'s, I have invariably asked them to examine both animals side by side and in a general way, without regard to special points—of course presuming that neither dog had any serious blemish. The result has always been that the exhibitors, upon such inspection, became satisfied with the judgment, unless, as in one or two cases, they were so blinded by prejudice as to be unable to find even the approach to excellence in any dog except their own. "Quality," as I first called it, is the most apparent and at the same time the most indescribable of all things. It sways the opinions of all judges largely, and, as I believe, correctly, and is apparent alike to the expert and the uninitiated. Dog judgment is not and can never be an exact science, and any attempt to make it one will result in a failure.

The distribution of awards at a dog show calls for exactly the same qualifications as the awarding of prizes for an exhibition of pictures, and has exactly the same results. Before awards are made, the judges are honest, expert gentlemen, and every one expresses himself as willing to accept their decision as final. After the awards, the judges are accused of dishonesty or incompetency, simply because the decisions they made did not satisfy the expectations of all the exhibitors. Nothing would please judges better than to have an arbitrary scale by which they could judge and of which the results would admit of positive demonstration; but all judges know that this is impossible for the reason above stated, and submit to the abuse showered upon them as a testimony to the ignorance of the abusers.

I met with a good instance of this in a bench show at San Francisco last year. An estimable gentleman had a fine looking St. Bernard dog, which he had entered as a Newfoundland. In passing through the show I noticed the mistake, and though I was not the judge of that class, I took the liberty to call the exhibitor's attention to the error. After he had consulted several others, he became convinced that he had classed his dog wrong, and that the animal he had for months regarded as a Newfoundland was really a St. Bernard. He was loth to confess his ignorance, but at last had his dog, reclassified and put where it belonged, in the St. Bernards. The judge passed over his dog when awarding prizes, simply because there were better animals present. One would imagine that the man who did not even know the breed of his dog would accept the decision in silence at least. This gentleman did not do that, and next day I heard him tell a circle of friends that the judge of St. Bernards was a scoundrel or a fool for passing over his dog.

He bragged of his knowledge and experience of St. Bernards, and abused the judges so badly that I ventured to remind him that he had originally entered his dog as a Newfoundland.

Turning on me a look full of surprise, shame, hate and indignation, he blurted out, "Oh, that's what I expected."

All you judges stand in with each other." Having discharged this shot he marched proudly away, leaving his friends with the impression that he was a wonderful judge of a dog, and that I was a perjured villain.

When he had cooled off I got him to compare his dog, side by side, with the winner, and then he acknowledged that the judge was right, and much to my surprise pointed out several points of superiority in the other dog.

It is this opportunity for intelligent comparison of "quality" that in my opinion makes bench shows valuable in a town like San Francisco, where a majority of the people speak of spaniels, setters, pointers and hounds as "hunting dogs," and do not know the distinction between the various breeds. Measurement is well enough in its way, but judging dogs, like judging pictures, has to be done by "the rule of thumb."

EDWIN.

GET UP DOG CLUBS.

It is a matter of surprise to eastern sportsmen who visit this State that there are no dog clubs here, except the coursing clubs, composed exclusively of lovers of the greyhound. There is no better way to carry out any desired aim than organization and co-operation, and those persons interested in the breeding and training of any particular species of dogs will find that individual effort, though good in its way, entails a greater cost of time and money than any one man can afford. It must be admitted by all candid sportsmen, that while Californians boast the possession of many superb specimens of the canine race, the average of dogs in this State is very low. For every thoroughbred dog owned in this State there are twenty nondescript animals, whose owners, for want of knowledge, regard them as the most valuable. They are not to blame for this ignorance, and should by no means be ridiculed. They have not had the opportunity to learn what constitutes a first class dog, and readily accept the statement of the person from whom they obtain their canine curios, that they are thoroughbred. Again, the really good judges of dogs here are not very plentiful, and many of them are so prejudiced in favor of a certain class, or breed, as to be unable to give an unbiased opinion of the merits of other and perhaps better strains of blood. A man who has any article to sell is a bad adviser as to the merits of the different kinds of that particular article, whatever it may be. The gentleman who breeds Laveracks thinks they are far the best kind of setter, while the one who rears Llewellyns is sure that the crossed dog is the superior of the more inbred strain. The best way for gentlemen who take an especial interest in any breed, to improve their stock, and at the same time improve their knowledge of the breed, is to form clubs, having for their object the improvement of the breed and the dissemination of information in regard to it. Say, for instance, that the setter men—if such an expression may be used towards those who are interested in that noble breed—form a club. A small entrance fee could be charged and laid away for club use. Monthly meetings could be held at which papers might be read by members giving their views upon particular strains and the best way to rear and break them. At stated periods the members of the club could engage their dogs in a trial on quail, and judge for themselves how their precept was backed up by practice. No expenditure of money would be needed for these trials, for which a simple medal, or diploma, would constitute the prize. When the funds of the club justified such a procedure, the club could import some extra fine specimen of the strain acknowledged to be the best suited to the wants of its members, and place it in the stud for the use of members, and as many outsiders as might feel disposed to pay an agreed fee. Of course the club would refuse the use of the dog to any bitches not of a pure strain. This idea might be followed out by the fox and deer-hound men, the pointer men, the spaniel men, and so on to the very fanciers of the various toy breeds.

THE FIRST COURSING CLUB.

The publication of certain articles in the BREEDER AND SPORTSMAN has given rise to an animated discussion among the prominent members of San Francisco Coursing Clubs, as to who was really the first to introduce the sport of Coursing into America. So far as can be ascertained from parole evidence, Dr. Sharkey and James Adams slipped a pair of dogs for a course in this State as far back as 1856. Subsequent to that, many lovers of the dog were wont to take their animals up to John Scarlett's place, at Dublin, or to Pacheco, Benicia, Newark and other convenient spots, and give them a run after any game that turned up. These affairs were entirely impromptu, and were not run according to the rules of Coursing. In February, 1867, the Pioneer Coursing Club was formed, and Mr. Clement Dixon thereupon drew up from memory a very good set of rules to govern the sport as nearly as he could recollect the same as those in use in Great Britain. Those were the first rules ever used in this State. He then sent to England for a copy of the Waterloo rules, and in September, 1867, the first regular coursing match ever held in America took place on the plains of Santa Clara. The winner belonged to James Adams, and Clem Dixon owned the "runner-up." A gentleman familiarly spoken of as Whiskey Kelly was the judge. The next match was held on December 30th, at Pacheco, and was again won by Mr. Adams' dog, Mr. Dixon owning the runner-up. This match was the first reported at length in the daily papers of the State, and was specially telegraphed to the *Morning Call*. It was also reported in *Bell's Life*. This subject will furnish food for future articles.

The second volume of the N. A. K. C. Stud Book is in press, and will be issued at an early date. As previously announced, the work is in the hands of Dr. N. Rowe ("Mohawk"), Chicago, Ill.

The setter breeders of America will regret to learn of the death of the well known blue belton dog, Prince Taxis, by Aldershot—Kate the II. Mr. Cooper writes: "Prince Taxis died on June 12, of distemper, contracted at the Westminster Kennel Club Show."

After the close of the National Trials, at Grand Junction, Tenn., the Louisiana Field Trials will take place, beginning December 11, near New Orleans, La., under the management of the New Orleans Gun Club. The events will be the New Orleans Gun Club Stakes, for a solid silver cup, open only to members; the Opelousas Derby, for dogs whelped on or after April 1, 1881; first prize, \$150; second, \$100; third, \$50; and the Free-for-All: first prize, \$200; second, \$150; third, \$75. The last two stakes are open to the world. The entrance fee is \$5, and must be made on or before Dec. 10. The Secretary is Mr. J. K. Renand, New Orleans.

THE HERD.

BREEDING MERINO SHEEP.

From the *Rocky Mountain Husbandman* we take the following letter in regard to this important subject in the ranch, as the proper condition of the fleece is a matter of serious interest when placed on the market in competition with other growths. It would be pleasant to have the opinion of some of our sheep breeders on this matter:

Many breeders of thoroughbred Merino sheep insist upon producing sheep that will yield wool containing the greatest possible quality of oil or yolk, and they stoutly assert that it is for the interest of wool-growers in the Territories to breed of such sheep. Here in Montana we have all learned that very greasy sheep cannot stand our winters; that not only is there no warmth in oil or yolk, but that it is a great source of weakness. As this oil or yolk has no commercial value, the question arises where is the advantage of greasy sheep? The breeding of such sheep arose, and has been perpetuated in the United States from a desire to palm off upon the buyer or manufacturer this yolk or worthless material for wool. Had our woolen manufacturers always adopted the test of the scoured weight in buying wool, the excess of oil or yolk would have been unknown even in Vermont flocks. To such an extent have our manufacturers lost from heavy shrinking wools that they are now almost universally adopting the clean or scoured found as a basis for wool buying. Every well regulated woolen mill now keeps an exact record of the shrinkage of all wools they purchase, and upon this record is based, to a full extent, the relative of the wools of the country. The agent of one of the leading cassimere mills of New England, writes me as follows: "It is very important that the wool-growers of your country understand that wool must be sold here at a price based upon the scoured fleece. It is possible for wool-growers to cultivate only the thick growth, and long stapled, fine wool without the grease, as we have abundant evidence in this country, and will instance among others the efforts of Mr. Campbell, of Westminster, in this State, as being a grower worthy of imitation. The Australian wool-growers, who now produce more than four hundred million pounds annually, are constantly improving wool in this respect, and any one who follows the course of the market will see that unwashed Australian is sold the present season freely in Boston, from 40 to 47 cents per pound, showing that the buyers do appreciate wool that is free from grease. To-day we are buying beautiful stapled wool in this State (Vermont) at from 15 to 23 cents unwashed, simply because it contains so large a per cent. of grease."

At the East the prejudice against greasy wool is rapidly increasing. On a dull market it is always the last to sell, and it is difficult now to obtain its actual value. Can we, here in Montana, afford to grow such wool? Shall we not make greater gains by breeding our flocks to Merinos, more like those used by the English colonies in Australia?

THE CROSSES IN SWINE.

It has only been a few years, comparatively, since swine of the improved breeds have been brought to this country in any considerable numbers, and so far as crossing upon our common stock is concerned, there was a hardy stock to build upon, and the upward grade has been ascended with becoming speed. The result of all this is, that an enormous quantity of well-bred, shapely hogs are shipped forward each winter; and it is rare that any other than good ones are seen in market, either East or West. This is a most desirable state of things, and is quite sure to continue, because the foundation, resting upon the old-time brood sow is not yet run down to a low state of vitality by in-and-in breeding.

The timber lots of the country are still prolific in the hardy white oak sort, by crossing upon which the farmer of ancient views may keep close to his first love. As we have before taken occasion to say, for what is commonly understood to be the rough-and-tumble life of the hog upon the farm, kept for breeding feeding stock, a roomy grade sow, of good quality is better than an inbred thoroughbred. She is likely to bring more pigs at a litter, and to suckle them better.

But while care is needed to maintain a profitable feeding stock, there is more critical care required that degeneracy in vigor of constitution may not make too rapid progress in our herds. Hogs stand some in-and-in breeding, but it should be borne in mind that this has been indulged in at the fountain head, upon the other side of the water, and we can hardly indulge in it here with any degree of safety. What may be supposed to be out-crosses, probably contain full as much consanguinity of blood as they do of that which is distinct; hence too much care cannot be taken when searching for new blood.

Breeders of the best of high-bred swine quite commonly adopt a source of supply to which they adhere, and in this way it is quite easy to drift into a stock that has been largely inbred. There are so many advocates and apologists for close breeding, that men resort to it many times against their own judgment; partly, perhaps, as a matter of convenience, having the stock at hand in their own herds, and partly because breeders are liable to become wedded to their own stock, that which they themselves have bred and reared. This, with swine, is dangerous practice, because the ratio of increase is rapid; and while with cattle we approach the practicability of inbreeding very slowly, with swine we have new opportunities every few months. In fact, it requires the utmost vigilance to prevent the coupling of animals close of kin.

Amateur breeders, not generally very deeply versed in the art, are not competent to give due weight to the principles necessary to be observed, hence venture to mix blood which is not sufficiently distinct. It is much the wiser plan to seek a new source of supply, so far as it is possible to do this, even though it be remote. It has been so often proved that new blood gives a new lease of life, as it were, imparting vigor and a tendency to long life, that the benefits likely to accrue will be ample remuneration for the necessary outlay of time and cash.—[National Live Stock Journal.]

A. C. Dietz and family, accompanied by Capt. E. W. Travers, are camping at the old camp ground near the Highland Springs, Lake County, Cal. Al. Stillwell, of Oakland, intends joining them for a few days, for the purpose of a deer hunt in the mountains.

FOX-HUNTING IN AMERICA.

The following interesting account of early fox-hunts is from the Riding's correspondence of the *Turf, Field and Farm*:

From the little conversation I this day held with an English gentleman now engaged in extensive travel here, who said from his travels in this country he had reason to believe that America was not suited to fox-hunting, consequently that fox-hunting is not one of the prevailing pastimes of its people. Still we would remind him of the fact that it was one of the favorite pursuits of the father of the nation—the great General George Washington, whose doings in the field and chase are thus technically described in records kept at Mount Vernon and at the time the then President presided over the hunt of the St. George Club of 1783:

"The time which General Washington could spare from his other avocations between the years 1759 and 1791, was considerably—or as far as possible devoted to the chase. His kennel was situated about one hundred yards south of the family vault, in which now repose his venerated remains. The building was a rude structure, but afforded comfortable quarters for the hounds, with a large enclosure paved in, having in the midst of it a spring of running water. The pack was very choice and numerous—Colonel (i. e. General Washington) visiting and inspecting his kennel and its select dogs morning and evening, after the same manner as he did his stables. It was his pride, and a proof of his skill in hunting, to have his pack so critically drafted, as to speed and bottom, that in running if one leading dog should lose the scent, another was at hand immediately to recover it; and thus when in full cry, to use a sporting phrase, you might cover the pack with a blanket.

"During the hunting season Mount Vernon had many sporting guests from the North, the kennel neighborhood, Maryland, Delaware and elsewhere. The gentlemen's visits were not of days, but weeks, and they were entertained in the good old style of Virginia's ancient hospitality.

"Washington, always superbly mounted in true sporting costume of blue coat, scarlet waistcoat, leather breeches, top-boots, velvet cap and whip with long thong, took the field at day dawn with his huntsman, Will Lee, his friends and neighbors; and none rode more gallantly the chase from end to end, nor with voice more cheerily awakened echo in the moorland, than he who was afterwards destined, by voice and example, to cheer his fellow countrymen in their glorious struggle for independence and empire, commemorated this day.

"The custom was to hunt three times a week, weather permitting. Breakfast was served in these mornings by candle light, the General always breaking his fast with an Indian-corn cake and a bowl of milk; and ere the cock had done saluting the morn, the whole cavalcade would often have left the house, and a fox frequently unkenneled before sunrise.

"The vicious propensities of horses were of no moment to this skillful and daring rider." He always said that he required but one good quality in a horse, "to go along," and ridiculed the idea of its being even possible that he should be unhorsed, provided the animal kept on his legs. Indeed, the perfect and sinewy frame of this admirable man gave him such a surpassing grip with his knees, that a horse might as soon disencumber itself of the saddle as of such a rider.

"The General usually rode in the chase a horse called Blueskin, of a dark iron-gray color, approaching a blue. This was a fine but fiery animal, and of great endurance in a long run.

"Will Lee, the huntsman, better known in revolutionary lore as 'Billy,' rode a horse called Chinkling, a surprising leaper, and made very much like his rider—low but sturdy, and of great bone and muscle.

"Will had but one order, which was to keep with the hounds; and mounting the animal with his spur in his flank, this fearless horseman would rush at full speed through the break or tangled wood, in a style at which modern huntsmen would stand agast.

"There were roads cut through the woods in various directions, by which aged and timid hunters and ladies could enjoy the exhilarating cry without risk of life or limb; but Washington rode gaily up to his hounds through all the difficulties and dangers of the grounds on which he hunted, nor spared he his generous steed, as the distended nostrils of Blueskin often would show; always in at the death, and yielding to no man in the honor of the brush.

"The foxes hunted in those days were gray foxes, with one exception; this was a famous black fox, which, differing from his brethren of 'order gray' would flourish his brush, set his pursuers at defiance, and go from ten to twenty miles and end, distancing both dogs and man; and what was truly remarkable, would return to his place of starting the same night, so as always to be found there the ensuing morning.

"After seven or eight severe runs, Billy recommended that the black Reynard should be left alone, giving it as his opinion that he was very near akin to another sable character inhabiting a lower region, and as remarkable for his wiles.

"The advice was adopted from necessity: and ever thereafter, in throwing off the hounds, care was taken to avoid the haunt of the unconquerable black fox.

"The chase ended, the party would return to the mansion house, where, at the well-spread board, and with cheerful glass, the feats of the leading dogs, the most gallant horses, or boldest rider, together with the prowess of the famous black fox, were all discussed; while Washington, never permitting even his pleasures to infringe upon the order and regularity of his habits, would, after a few glasses of Madeira, retire to his supperless bed at nine o'clock."

Our doubting traveled English friend may take the above substantial facts with him on his intended visit to Mount Vernon and the South, where many of our Southern hunting friends will be most happy to convince him of the errors of his convictions.

We would likewise inform our distinguished English traveler that he will find in the States upward of an hundred organized Fox Hunt clubs, with an average membership of fifty each.

In his able account of fox hunting the New York writer unintentionally omitted to speak of the great fox hunting clubs of Virginia City and Reno, Nevada, and the daring deeds of Jim Orndorf, "Kettle-belly" Brown and the mighty heroes of the Comstock. Neither did he refer to Bill Henderson and Ike Brannan, the great hunters of Alum Rock, or to Sheriff Meauvey and Tom Tunstead, who once ran down and lassoed a fox on the Merced plains. We shall endeavor to supply these deficiencies in a future number.

THE STAGE.

Never in the history of San Francisco has there been such a dearth of dramatic novelty as is the case at the present time. During the past week there was but one theatre by which the drama was represented—the others being devoted to the minstrels, to burlesque and to opera. In such a state of affairs it is a difficult matter to entertain our readers with the details of the week's business without wearying them with a repetition of platitudes, the changes of which have been rung without ceasing for the two last years. With the establishment of the Tivoli and other places of light amusement, as also with the rage for private theatricals, the patronage of the higher priced theatres has gradually diminished, and now it is a very risky business to bring any combination to this city, on account of the heavy expenses, that include not only the fares but also the salaries of the people while on their way from, and back to, the East. There is only one way in which the dramatic taste could apparently be revived, and that is by the engagement of a company of some ten excellent artists, such as do not aspire to be stars, and who would devote their attention and talents to the service of the public in the presentation of modern dramas and comedies and such original pieces as would be likely to attract attention and patronage. With a talented company who would strive to please by the production of novelties, such a theatre as the Baldwin, at popular prices, ought to prove to be a most successful venture; and it would indeed be pleasant to record the fact that Gus Frohman and his associates had secured that pretty theatre for the next season, and we should then be sure of having at least one temple devoted to the dramatic art.

The novelties last week were the re-appearance of Haverly's Mastodon Minstrels at the California, and the production of a drama originally entitled "British Born," at the Baldwin. The Minstrels have been greeted by large and enthusiastic audiences, showing conclusively the hold they have obtained in the popular favor. It may be safely said that never has there been such a combination of vocal merit, musical ability and mirth-provoking talent in any minstrel troupe that has visited this Coast, and they well deserve the patronage so liberally bestowed upon them.

The drama "American Born," produced on Monday last, at the Baldwin, was produced in such a perfect manner, both as regards the cast and scenic effects, as to merit the encomiums so liberally bestowed upon it. The plot is interesting and the characters in the hands of such good artists as Miss Ada Ward, Miss Ada Gilman, John Dillon, Jennings, Bradley, Osbourne, Kennedy and Grismer were delineated in a manner that showed both study and ability. It is to be hoped that such a company of artists will not be entirely dispersed, and we should be pleased to see them, with the addition of Mr. Wheatleigh, produce some of those sterling old comedies and farces in which the latter gentleman and Mr. Dillon have achieved such remarkable successes. If the Bush St. Theatre could be obtained, we feel convinced that such an entertainment, at popular prices, would meet with public favor.

For the coming week the Hanlons appear at the Baldwin in their far-famed musical acrobatic absurdity called "*Le Voyage en Suisse*," which, according to impartial reports, is unique in character, mirthful in incident and sensational in effects. We should not be surprised to see it at once achieve a success, and that the very favorable encomiums of the Eastern press will be ratified in this city. At the California the minstrels will continue to attract crowded and delighted audiences, and at the Standard the very pleasing musical satire "H. M. S. Pinafore" will hold the boards. At the Winter Garden the spectacular opera of "Aeolia" will court the public patronage, and the Tivoli will probably announce "Standing room only," the attraction being "Der Freischutz," produced in a style that merits ample approval. So that even in the absence of dramatic presentations there is plenty of amusement to be found in the city.

"The Wreck of the Pinafore" an operetta by Luscombe Searle, the libretto by William Horace Lingard, was recently produced in London and achieved an instantaneous failure that the author and composer attribute to a conspiracy among the London critics. We have heard this same complaint before made by John Raymond and others who have taken their wares to an English market. The same grievance exists among our own aspiring dramatic authors in regard to the New York critics, it being claimed that criticism in that city is ruled by a prejudiced clique. It may be so, but in either city they cannot form, but can only sway public opinion, and we thoroughly believe that "The Wreck of the Pinafore" was wrecked on its own demerits. Was there not an operetta by the same name that was originally produced here at the Tivoli Gardens? But if so the libretto and music were said to be the work of a lady, and surely William Horace was not gulling us with one of his choice travesties. In that case the word would take on a new and expressive meaning.

A strike of a most unique and perplexing nature was recently organized in Paris that threatened at one time to surpass in interest the crisis on the Eastern question. At the Chatelet the reigning success has been a spectacular extravaganza entitled "The Thousand and One Nights," in which some 250 dauseuses and figurantes appear in the dances, evolutions and processions. According to his agreement the manager announced a reduction in their salary during the three summer months, when there was a strike organized on such a grand scale as recalled the battles of the Amazons. Relying on their arms, clad in dazzling armor and marching in serried phalanx, they took possession of the stage, and guarding all the approaches they summoned the recreant chief before their august tribunal, as it were, only that the outbreak occurred in June. The manager appeared and would naturally have been intimidated by the aspect of 250 pretty menacing arms, flashing eyes and heaving bosoms, but when doubled in number as they were on this

occasion, he realized the force of the expression, "woc to the vanquished." Guided by prudence, he demanded a parley, accompanied by the offer of re-enforcing their military supplies with sundry boxes of cakes and kegs of foaming beer. The peace offering was received with acclamation, the ranks were broken and when an hour afterwards he impressed on their memory the risks of a summer season, and that he was merely making a sealing reduction that but little affected the poorer employees, the strike was at an end and happily for Paris "The Thousand and One Nights" resumed its brilliant career.

WHEN CRITICS DISAGREE.—As it is as the beauty rather than as the actress that Mrs. Langtry has succeeded and is likely to succeed, it may not be amiss to collate some of the descriptions of her. Mr. G. W. Smalley—who, however, always goes into hysterical descriptive whenever a foreign star like Neilson or Bernhardt is about to dawn on America—raves about her "delicate ripe splendor," and her "peach-colored cheek," and vows that no actress of modern days is able to hold a candle to her in the matter of locks. "The purity of her complexion," he says, in his coldly critical way, "has not been matched anywhere, nor perhaps the soft fullness of her violet eyes, which can only be described by the epithet which Homer bestowed on the Queen of the Gods—ox-eyed. The setting of the eye and the moulding of the temples, over which the dark brown hair falls far, are equally fine; the lines of that part of the head are pure Greek, passing into a more modern type below. The profile is a little irregular, the mouth and jaw strongly shaped, the teeth perfect, the head elegantly set on the shoulders, which are possibly high, but rounded and full, as is the bust and the whole figure." "She possesses wonderful eyes of a limpid, transparent blue, which always wear a winning expression," says another correspondent. "I don't think her pretty," says a third, "her hair is dark, and her eyes are blue—an unusual combination, which is effective. Her lips are thick, denoting, they say, kindness and 'love of life.'" Says still another, "She is of medium size, regular features, rosebud mouth, large blue eyes, low forehead, nice creamy complexion, dark-brown hair, squared shoulders, flat bust, and long, classical arms." Says still another—an American actress, by the way: "She is not strictly beautiful, but has a fair skin and large round dark eyes, which she uses very expressively and with a great deal of art in conversation. The natural color of her hair is chestnut, but she is as often seen with very light or reddish frizzes, which enhance the effect of her really handsome eyes." Finally, a more critical observer describes her as "quiet-looking, somewhat pallid, large-eyed, high-shouldered and wasp-waisted," and a friend of mine—who adds that you could pick out a dozen handsomer women on the streets of Chicago or New York of a Summer day—says she has very large, wistful, liquid eyes, and a soft creamy complexion, and makes a body think of a Jersey—heifer!

When Bernhardt made her re-appearance in Paris it was for the benefit of Madame Cheret, the wife of a celebrated scenic artist. The play was "Camille," and the receipts were upwards of frs. 70,000. In claiming his author's rights of ten per cent., Alexander Dumas has aroused public indignation to such a point as to cause an aspiring journal to start a public subscription to avert this inroad on the widow's mite. It is a cheap and impudent bid for notoriety, as there was no justice in demanding that the author should contribute a hundred fold more to the fund than the countless magnates of the Bourse who were present on the occasion. And had he consented, he knew perfectly well that at every benefit he would be importuned for the gratuitous use of his dramas that represent as much his stock in trade as do the tiaras of diamonds so lavishly displayed by the jewellers of the Boulevards and of the Palais Royal.

A somewhat similar incident occurred in this city on the occasion of a benefit that was arranged for some charitable institution. The advertising in a leading daily journal amounted to about fifty dollars, and the most persistent efforts were made to induce one of the proprietors to make a reduction. This proposition met with no response and the money was paid with little grace, that was changed to gladness when he pulled from his pocket a hundred dollar bill and remarked, "I never allow my charitable feelings to interfere with my business, but as I really think the cause you advocate is a very deserving one, allow me to contribute this offering."

In a letter to a friend in this city, the popular comedian, C. B. Bishop, states that he had intended to pay a visit to San Francisco this season, but that he is so busy in making his arrangements for the next campaign, that he is obliged to abandon the idea. He has a new play by A. C. Gunther, entitled "Strictly Business," and he writes that "it is now finished and reads remarkably well; in fact, if one can judge of how a piece will go with the public by the way it reads, I should say that I have a very strong melo-dramatic comedy, and one that is sure to be a big success; but—and alas for those butts—I have seen so many failures that I am afraid to build any castles, fearing that they will be on aerial foundations. Let us wait and see how it will go." The genial Doctor also states that "La Belle Russe" was a very great hit at Wallack's, "and only yielded to extremo hot weather. It saved the season and could have run for three months longer but for the extreme temperature. Master Dave has scored a great triumph." Mr. Bishop has a host of friends in San Francisco who take an interest in his career and his future success.

Samuel of Posen has returned to the East, and has given a glowing description of his success in this city. In this case he must be borrowing some of the imperturbable cheek of Samuel of Posen, or be drawing strongly on his imagination. The piece was a failure here, being received as a gross exaggeration in artistic effects, and his was the last combination that completed their engagement, previous to the closing of the Bush Street Theater.

And, by the way, what funny stories the Eastern dramatic papers concoct about this same city of "Frisco," as they delight to call it. Thus we find it announced seriously that E. J. Baldwin is a General, and that his hotel and theater cover an entire block on Market street. If it were true, we should have much pleasure in congratulating the gentleman on this grand accession to his rank and riches.

At a recent trial at Paris, Mme. Judic, who appeared as a witness, gave her age as "almost thirty-two." Once upon a time Mlle. Mars made her appearance before the court at Ronen as a witness, and was asked the customary questions: "Ahemy years!" mumbled the star. "She says fifty," remarked the judge to the clerk. "Forty!" "Put it down forty!" screamed the actress, with no hesitation or whispering this time.

ATHLETICS.

MYERS AGAIN BEATS THE RECORD.

The fifth annual summer games of the American Athletic Club were held July 2d, at the Polo Grounds, near New York. The games opened with a dash of 100-yards handicap, for which there were thirty-eight entries. It was divided into eight heats, the winners of which and those coming in second were allowed to compete in a second trial heat, and the winners in the second heat were allowed in the final heat. The winner of the dash was A. Doremus, who made the 100 yards in 10½ seconds, with F. G. Abbott, of the Manhattan Athletic Club, second, and S. A. Safford, of the American Athletic Club, third. There were twenty-nine entries and twenty-one starters in a half-mile handicap run. H. Jacquelin, of the American Club, won the race in 2 minutes, with J. J. Hoff, of the Staten Island Athletic Club, second, and T. J. Murphy, of the Park Athletic Club, third. For a one-mile handicap walk for persons who have beaten the record of 7 minutes 45 seconds there were ten entries. J. J. Raynes, of the Pastime Athletic Club, who had been given twenty-five seconds, won the race in 7 minutes 15½ seconds, W. S. Hart, of the Williamsburg Athletic Club, was second, and W. H. Perry, of the same club, who was scratched, third. A handicap hurdle race of 220 yards was won by S. A. Safford, of the American Athletic Club, in 27½ seconds. A handicap run of a mile, in which thirty persons had entered, was won by T. F. Delany, of the Gramercy Athletic Club, in 4 minutes 40½ seconds. C. L. Jacquelin, of the Manhattan Athletic Club, distanced fifteen competitors in a 300-yard handicap run. His time was 33 seconds. The event of the day was a 600-yard run, in which L. E. Myers, the amateur champion, had entered for the purpose of attempting to beat the best previous record at this distance, which was 1 minute 14½ seconds. He ran away completely from the six others in the race, and lowered the record to 1 minute 11 2-5 seconds. G. D. Baird, of the Y. M. C. A., won a two-mile walk in 15 minutes 45 2-5 seconds. In a handicap race of two miles on bicycles, E. A. Thompson, of the Lenox Bicycle Club, beat four others. He covered the first mile in 3 minutes 22 seconds, and the whole distance in 7 minutes 3½ seconds.

THE SCHUHL-TOPLITZ MATCH.

The relative merits of R. L. Toplit and M. Schuhl, in a five mile match for a \$20 medal, was decided at the O. A. C. grounds a few days since, to the mutual satisfaction of both gentlemen and their friends and admirers. Mr. Toplit kicks the beam at something over 200 pounds when in fine condition for the distance, and his opponent was probably about forty pounds lighter when he toed the mark for the start. They started on their long journey by the word, and neither of the contestants spurted for the lead. Toplit, however, was unable to restrain his ardor, and before the first turn was made had taken the lead and set the pace with an advantage of about five yards. In two laps he had bettered it by about 20 more, and not hearing anything of his rival, ventured to look around to see what had become of him, and he found that he had time to take a good look, too. Schuhl, attired in a pair of heavy, high-heeled shoes, white loose-fitting tights, dark trunks, flaming red shirt, and a white handkerchief in lieu of a cap, with feet well forward, shoulders back and head erect, had settled down to a six-day, go-as-you-please gait, expecting Toplit to break down at three miles. Having been trained for the event by his friend McIntyre, Toplit was highly amused at the spectacle, smiling audibly to his friends and slackening his pace for company. For a couple more laps the positions of the two men were unchanged; but tiring of this jog, Toplit let out a link, and at two miles passed Schuhl, having gained a lap without exerting himself in the least. Schuhl soon after hung out signals of distress, and tried square heel and toe for relief. Soon reviving, he put on a flat-footed spurt, but Toplit easily kept the lead, which he had meanwhile increased by another half of a lap. After a couple more laps, Schuhl remarked that as the day was remarkably warm he would postpone his interest in the event to some day later in the season; and to prevent ill feeling, order a handsome medal for his tireless opponent. Toplit, however, was not satisfied with so hollow a victory, and for the sake of a little exercise kept on and finished the full distance, running the last seventy-five yards at a hundred yards gait, with an ambitious, would-be sprinter. The time was not taken with a stop-watch, and what the winner can do at the distance is still a problem to all but himself and his trainer. Schuhl realizes his mistake in underrating his opponent and starting out of condition, and is reported to have expressed a determination to redeem his laurels at an early day.

THE THREE-HUNDRED-YARD RECORD LOWERED.

At the Ninth Annual Summer Meeting of the Mosely Harriers, held at Birmingham, England, on June 10th, there was some good running, although in a damp, disagreeable day. C. S. Johnstone lowered the 300-yard record, of which we have the following account:
Three-hundred-yard Handicap Run (Members).—C. S. Johnstone, scratch, 3 1-5; S. Ingerthorp, 5 yards, 2, by half a yard; L. Ball, 8 yards, 3, by 1 yard; E. Cumming, 9 yards, 0; J. S. Doughty, 13 yards, 0; Herbert Reeve, 14 yards, 0; George H. Ryall, 16 yards, 0; W. E. Breakwell, 18 yards, 0; J. L. Jones, 22 yards, 0; W. J. Gregory, 22 yards, 0; W. R. Davis, 22 yards, 0. This beats the best previous performance, which was 31½ seconds. These are the same grounds on which, July 16, 1881, Myers made the fastest amateur quarter-mile record in the world, and Johnstone was beaten by Myers the same day, in the first trial heat of the 100-yard run. The course is hardly a fair one for short distance races, as the final 250 yards is down hill.

A SAD SHOWING.—M. C. Geary, a local sprint runner, has been arrested, the affair being an outgrowth of the recent athletic meeting at the Half-mile Track, in which Geary was matched to run 100 yards against John Larkey. Geary's statement is to the effect that when he entered the race South offered to back him as the loser, provided that Geary would consent to throw the race, in which event he was to receive one-half the winnings. Geary also claims to have consented to the agreement, but, subsequently learning that South proposed to fleece his friends, he resolved to win the race, which he did, thereby causing South to lose considerable money. This gives a good idea of the style of matches the public are expected to encourage with their money and presence. Jobs are the rule in almost all professional

events, and in a genuine match, the contestants have to labor under the suspicion of its being conducted under the same system of despicable trickery.

THE SWIM FOR THE CHAMPIONSHIP.—Captain Mathew Webb, the champion swimmer of England, and George H. Wade, of Brooklyn, who has heretofore claimed to be the champion ocean swimmer of America, swam a match on July 1st for the championship of America and \$1000 in money, starting from Brighton Beach, near Coney Island, New York Bay. The course was one mile out to sea from the bathing pavilion and return. John Y. Fitchett acted as referee, G. H. Richey as stakeholder and Frank Ogden and William Smart as umpires. At 6:10 A. M. Webb and Wade dropped into the water, Wade immediately taking the lead. At the turning point, which was designated by a row-boat, Wade was fully 200 yards in advance, but showed plainly that he was fast losing his breath by repeated efforts to swim with one arm. After turning the boat Webb rapidly reduced the lead of Wade and succeeded in completely closing the gap when within half a mile from the shore. For nearly a quarter of a mile the two swimmers were side by side, but Webb gradually forged ahead, winning by about fifty feet. Webb's time was 1 h. 7 m. for the two miles, with Wade about 30 seconds behind him. Both swimmers claim that in all they covered four miles, being carried out of their course by the tide.

SWIMMING WITH HANDS AND FEET TIED.—Upon the third attempt Marquis Bibbero recently succeeded in swimming across the East River with his feet tied together and his hands pinioned behind him. Two men took him up and pitched him into the water. The swimmer started off with a wriggling motion. He gave two or three violent kicks with both legs together, and at intervals of about once in half a minute the swimmer's head would appear above water. He spouted like a whale and continued to kick with his feet. In response to signals, tugboats and ferryboats kept out of the way and gave the swimmer a chance. Bibbero was thrown into the water at 11:10 A. M. At 11:20 he was exactly under the middle of the Brooklyn Bridge. Eight minutes later the pneuclenual swimmer was in danger of bumping his head against the spiles of the Roosevelt street ferry, when his attendants, who were following him in a rowboat, reached out and pulled him in. He had been in the water but twenty minutes. Bibbero has issued a challenge to any professional swimmer in the world.

A large crowd of spectators were present at Yonkers, on July 3d, to witness the annual athletic games held under the auspices of the Yonkers Caledonian Society. The principal event of the day was the contest between Donald Dennie, of Scotland, the champion of the world, and Duncan C. Ross, of Louisville, Ky. Ross defeated the champion in the two principal contests of the day, as follows: Putting the heavy stone—Ross, 44 feet 9½ inches; Dennie, 43 feet 7½ inches. Throwing the heavy hammer—Ross, 102 feet 10½ inches; Dennie, 101 feet 7 inches.

Wm. M. Sime leaves us for the mountains in a few days, and does not expect to return in time to take part in any of the coming events of this season. Business duties will deprive Horace Hawes of the pleasure of throwing dirt in the eyes of the majority of our athletes. E. S. Emmons, however, has been caught running wild on the track, and will bear watching. Mr. Sime will be on hand in the next handicap, and is liable to finish stronger than ever. R. S. Haley is also in active training again, and flatters himself that he will show the limit man a splendid lot of spikes on the finish.

Richard K. Fox has arranged a six-day go-as-you-please match to begin at Boston on July 31st. Entrance fee, \$100, all to go to the winner, with the international championship, and a special prize for lowering the record. After the expenses are divided from the gate money, the remainder is to be divided among those covering 500 miles.

BASE BALL.

THE HAVERLY AND NANTICS.

It cannot be claimed that the Nantics and Haverlys are evenly matched, but when not at a disadvantage through accidents they can both turn out a nine that may be relied on to make the game interesting to the spectators. Thus in the Recreation grounds on Sunday last there was a full and appreciative attendance, and as, through the unavoidable absence of two or three of the usual Haverly team, the contest was of a most spirited and equal character, until the ninth innings, when the theater boys made some fair batting to a poor defence, and scored a victory of eight to six. A few such interesting games like this would revive the public interest in the Diamond field. Following is the score:

HAVERLY.										
	T.B.	R.	1B.	P.O.	A.	E.				
Meegan, 3d b.....	4	1	1	2	3	1				
Levy, 1. f. & c. f.....	4	1	1	1	0	0				
McDonald, 1st b.....	4	1	3	5	1	0				
Carroll, p.....	4	0	0	1	10	0				
Lawton, c.....	4	1	1	10	1	0				
Gagus, 2d b.....	4	0	0	3	2	0				
McCord, s. s.....	4	1	1	2	0	4				
Pope, r. f.....	4	2	0	0	0	0				
Moran, 1. f. & c. f.....	4	1	0	3	0	1				
Totals.....	36	8	7	27	17	6				
NANTICS.										
	T.B.	R.	1B.	P.O.	A.	K.				
Emerson, s. s.....	4	2	2	0	2	1				
Sweeney, p.....	4	0	0	0	9	0				
Finn, c.....	4	1	1	11	1	1				
Eagan, 1st b.....	4	0	0	12	0	0				
Sullivan, 1. f.....	4	1	0	0	0	2				
Arnold, r. f.....	4	1	0	0	0	1				
McElroy, 3d b.....	4	1	0	0	0	2				
Fogarty, 2d b.....	3	0	0	2	3	0				
Totals.....	35	6	3	25	14	7				
Innings.....	1	2	3	4	5	6				
Haverly.....	1	0	0	2	1	0				
Nantic.....	0	0	4	1	0	0				
Earned runs, Emerson 1, McCord 1—Home runs, Emerson, McCord and Moran—Three base hits, Finn—First on balls, Haverly 4, Nantic 4—Left on bases, Haverly 0, Nantic 2—Struck out, Haverly 6, Nantics 5—Passed balls, Lawton 1—Wild pitches, Carroll 2.										
Swanton, of the Renos, officiated as umpire.										

And now it is claimed that the Mastodon Minstrels can turn out a team that can beat any of the old League Clubs, and it is in order that the Haverlys should represent our

local interests. It is stated, however, that the minstrels were so fatigued with the effects of their promenade and flattering reception on Monday last, that they will be unable to take the field at least for some period of time.

THE LEAGUE CHAMPIONSHIP.

The appended table gives the relative standing of the League Clubs in their struggle for championship honors to July 4, inclusive:

CLUBS.	Boston.	Buffalo.	Chicago.	Cleveland.	Detroit.	Providence.	Troy.	Worcester.	Games Won.....	Games Played.....	Games to Play..
Boston.....	4	2	4	3	2	2	4	21	41	19
Buffalo.....	2	4	3	1	3	2	4	19	39	21
Chicago.....	4	1	4	4	4	3	4	24	39	21
Cleveland.....	2	3	1	1	2	4	6	9	30	30
Detroit.....	2	4	2	5	2	4	6	25	40	20
Providence.....	4	3	2	3	2	4	4	24	40	20
Troy.....	4	4	2	2	2	2	4	19	41	19
Worcester.....	2	1	2	0	0	1	3	9	30	30
Games Lost.....	20	20	15	21	15	16	22	21	160	300	180

THE AMERICAN CHAMPIONSHIP.

There is a hard tussle for supremacy in this series of games, but the Cincinnati Club has reconquered its position, but is closely followed by the Athletics and St. Louis Browns. Following is the record to July 3d, inclusive.

CLUBS.	Allegheny.....	Athletic.....	Baltimore.....	Cincinnati.....	Eclipse.....	St. Louis.....	Woon.....
Allegheny.....	1	0	5	1	4	11
Athletic.....	3	3	3	5	4	13
Baltimore.....	0	1	1	0	1	3
Cincinnati.....	7	5	9	1	0	22
Eclipse.....	4	3	4	1	3	15
St. Louis.....	2	4	9	0	6	21
Lost.....	16	14	25	10	13	12	90

THE AMERICAN COLLEGE ASSOCIATION.

The final game was played at New Haven, on July 3d, with the Yale against Princeton, the New Haven boys winning by a score of 9 to 5, Yale thus taking the pennant after a series of remarkably well played games, all the contesting clubs showing up in splendid form. The following is the record:

CLUBS.	Yale.....	Princeton.....	Harvard.....	Brown.....	Amherst.....	Dartmouth.....	Games Won.....	Games Played.....
Yale.....	2	1	1	2	3	8	11
Princeton.....	1	1	1	1	1	5	11
Harvard.....	1	0	2	0	0	5	10
Brown.....	1	1	0	0	2	4	10
Amherst.....	0	1	0	2	1	4	10
Dartmouth.....	0	0	2	0	1	3	10
Games lost.....	3	4	5	6	6	7	31	..

Haverly's Mastodon Minstrels and the Reno base-ball clubs will play a match game of base-ball at the Recreation Grounds next Sunday. The minstrels will play the following nine: Dan Thompson, Andy Piercy, Pete Mack, Tom Sadler, Frank Cushman, Joseph Garland, John Gasman, Lew Dockstader and George Gorman.

A game was arranged last Sunday at the Olympic Athletic Grounds at Oakland, between a picked nine from the players of the old League Clubs, and the team of the Olympic Club, which resulted in a victory for the Olympics by a score of 15 to 4, showing a lack of unity in the fielding of the other team.

THE ARCHERY TOURNAMENT.

In the Chicago archery tournament the competition for the National Championship medals was completed on July 12th. The National round for the ladies' championship was won by Mrs. Gibbs of Newark, N. J., with 101 hits, the value of the score being 449. Miss Morrison of Cincinnati, was second with 94 hits, value 374. The York round for gentlemen was won by H. S. Taylor of Highland Park with 168 hits, value 678. D. A. Nash of Brooklyn, N. Y., was second with 197 hits, value 713. John P. Wilkinson shot the longest flight, 213 yards. Mrs. Frye of Brooklyn shot the longest ladies' flight, 172 yards. At the meeting at night Colonel S. A. Whitfield of Dayton was chosen President; Major O. G. Constable of New York, Mr. Frye of Lycoming, Pa., and J. P. Allen of San Francisco, Vice Presidents; C. R. Wild of Cincinnati, Secretary; K. W. Pyle of Cincinnati, Corresponding Secretary. The next annual tournament will be held at Cincinnati on the first Monday in July, 1883.

An immense rattle snake, measuring four feet and ten inches, was killed by Chas. L. Dietz, near the Highland Springs Hotel, Lake County, Cal., while out dove shooting. When first seen he was in a coil ready to strike, when he shot his head entirely off. He measured seven inches in circumference, and had thirteen rattles and a button. His skin has been prepared, ready for exhibition. When brought to camp every male adult partook of a liberal dose of the antidote as a precautionary measure.

SUCCESSFUL DOG SHOW.—The Alexandra Palace Dog Show turned out a grand affair, having no less than 1,241 exhibits on its benches. Mr. E. S. Spratt, for the first time, undertaking the benching as well as the feeding of the dogs, using Spratt's patent polished wood in the place of bare boards. These benches all fit in together and can be taken up and down with the greatest ease. The hoops and rings are all arranged so as to be adjusted without the slightest trouble. This plan should be tried here.

Mr. Jesse D. Carr, the President of Salinas City Bank, and one who is well known as one of the most enterprising breeders of stock in the State, is now on a visit to this city.

MARKET REPORT.

WHEAT—So far only two consignments of the new crop have been received here, but free deliveries are reported at Vallejo and Port Costa. It is not expected that growers will be over-anxious to market their grain at an early date, as present indications are favorable for higher prices in the near future. During the past week the English and Continental markets have shown a material appreciation in values, and in Chicago and New York prices are higher—this owing to an improvement in European markets. Here the speculative element has been free bidders, but holders have shown little disposition to dispose of their grain, so legitimate transactions are unimportant, though speculative transactions on call show a fair aggregate—settlements to be made on the basis of current quotations at the time of supposed delivery. For spot lots of No. 1 White \$1 75 is bid, both for local and Port Costa delivery. It is not probable that really choice milling could be had for less than \$1 77 1/2 per cbl.

BARLEY—In our last report we noted free arrivals of the new crop, and a consequent depressed feeling in the market, but during the week under review the deliveries have been meagre, and speculators have caused quite an advance in rates. Many well informed operators assert that the probable yield of this season's harvest will be materially less than was anticipated at the beginning of the current month, and back their assertion by being liberal purchasers of parcels for future delivery. Considerable sales of No. 1 Feed were made at the close at \$1 24 1/2 per spot or July delivery; No. 2, \$1 17 1/2 per cbl. Transactions in New Brewing are unworthy of note, but the local brewers and maltsters are ready purchasers of choice old at, say, \$1 90 1/2 per cbl.

OATS—As yet no consignments of the new crop have been received, though it was expected that such would have been received from the Salinas Valley before the close of last week. Under light receipts, the market shows more strength, and holders are confident that higher prices will rule. For No. 1 \$1 85 is the asking price for spot lots. For No. 2 \$1 39 1/2 per cbl was paid at the close, seller 1882.

CORN—There has been no movement worthy of note. Holders of spot lots are firm in their demands for full figures, say \$1 70 per cbl for No. 1 Large Yellow. The bids and offerings in open call show that buyers and sellers are weak in their propositions.

RYE—No definite information is in possession of dealers as to the amount of old on hand, and reports of the new crop are meagre. A sale of a small parcel of No. 1 was made at \$2 per cbl.

BUCKWHEAT—No transactions have recently been recorded. Quotable at \$1 40 1/2 to \$1 50 per cbl.

BRAN—For spot lots \$13 35 1/2 to \$13 50 is a fair range. Speculators show less interest in the trade, and consequently, the market is quiet.

FEED—Shorts, \$16 1/2 to \$17; Middlings, \$25 1/2 to \$26; Oil Cake Meal, \$12 50; Ground Barley, \$25 1/2 to \$26 for new, \$22 1/2 to \$23 for mixed, and \$26 1/2 to \$27 for old; Feed Corn meal, \$9 per ton; Oatmeal, 5c; Buckwheat Flour, 4c; Cracked Wheat, 3 1/2 per lb.

HAY—Receipts of choice kinds are very light, and the same command higher prices than was expected at the opening of the harvest. Wheat Hay is, as a general thing, very coarse, or short, and strictly choice. Cargoes would command fancy figures. Alfalfa is in more liberal supply. For all kinds the range is \$11 1/2 to \$15 per ton.

STRAW—Recent arrivals have been free, and prices have declined; quotable at 60 1/2 to 70c per bale, as to quality and condition.

SEEDS—There is an active demand for Mustard at 4 1/2c for Brown, and 2 1/2c for Yellow.

BEANS—The market is dull and quotations nominal. Pea and Small White, \$4 25; Butter \$3 75 to \$4 25; Bayos \$3 25 to \$4 25; Lima \$4 50; Pink and Red, \$2 50 to \$3 per cbl.

ONIONS—Receipts are free and the market weak. Silverskins, 75 1/2c; Reds, 37 1/2c to 50c per cbl.

POTATOES—Arrivals are free, but the demand is sufficient to cause prices to be steady. Quotable at \$1 00 to \$1 25.

POULTRY—Arrivals are light and the market is firm. So far during the current year prices have been higher than for several years past, and consignees are encouraged to further extend their product. Turkeys, 16 1/2 to 20c; ducks, \$5 1/2 to \$6 50; hens \$7 1/2 to \$8; geese, \$1 1/2 to \$1 75 for old and young respectively; young roosters, \$7 50 to \$10; old, \$6 1/2 to \$7; broilers, \$3 1/2 to \$6.

GAME—Venison is in free supply and the market is overloaded with doves. We quote: Doves 50 1/2 to 75c per doz; venison, 10 1/2 to 12 1/2c per lb; hare, \$2 1/2 to \$2 25; rabbits, \$1 1/2 to \$1 25 per doz.

EGGS—Strictly choice ranch meet with ready sale at 30c, while fair to good are quoted at 28 1/2 to 29c per doz.

CHEESE—Stocks are moderate and with a good demand; prices are firm. California product sells for 12 1/2 to 14c per lb.

BUTTER—Choice fresh ranch roll is scarce at 31c; fair to good, 27 1/2 to 30c per lb.

HONEY—The market is steady at 8 1/2 to 9c for extracted and 17 1/2 to 18c for comb, as to kind and quality.

HOPS—Petty consignments are received from Oregon and Washington Territory. The market is firm, but quotations are nominal at 25 1/2 to 30c per lb.

PROVISIONS—The demand is active; market strong, and prices show an advancing tendency, especially for bacon. We quote breakfast bacon 13 1/2 to 14c for East-rn, and 13 1/2 to 14c for California, for heavy to medium; for light and extra light 13 1/2 to 14c is the ruling price; sides, 15 1/2 to 16c. Hams—Eastern, 17 1/2 to 18c; California, 14 1/2 to 15c. Clear pork, \$24 50 to \$25; extra clear, \$26 1/2 to \$27; extra prime, \$21 50 to \$22; mess, \$24 1/2 to \$25 per bbl. Smoked beef, 14 1/2 to 15c per lb. Lard, 14 1/2 to 15c per lb, as to kind and packages.

TALLOW—The demand is active at 7 1/2 to 8c per lb for rendered.

HIDES—Market quiet. Dry calf, 20c; kips, 19c; sheepskins, 25c 1/2 to \$1; long wool, \$1 1/2 to \$1 50; salted steers, 90 1/2c.

WOOL—Stocks are unusually heavy and trade is unimportant, yet the inquiry shows an improvement. Calaveras and foot-hill, 25 1/2 to 26c; northern, 23 1/2 to 24c; southern coast, 15 1/2 to 22c; San Joaquin, 16 1/2 to 20c; Oregon, 22 1/2 to 27c per lb. Receipts of the Oregon spring clip continue free.

BAGS—The market shows an improvement. Calcutta, \$9 27 1/2 for spot lots, and \$9 35 bid, buyer July. For Dundee \$5 75 is bid.

FRUIT—Supplies of all seasonal varieties are large and prices rule low. Peaches, 35c 1/2 to 50c in baskets, and 40c 1/2 to 50c in boxes; Apples, 30 1/2 to 35c in boxes and 30c 1/2 to 40c in baskets; Pears, in boxes \$1, baskets 25c 1/2 to 30c; Cherries, \$12; Strawberries, \$10 1/2 to \$13; Blackberries, 9c 1/2 to 10c per chest; Figs, 50c 1/2 to \$1 per box; Watermelons, \$3 1/2 to \$5; Cantaloupes, \$3 1/2 to \$5 per doz; Grapes, 50c 1/2 to \$1 per box; Apricots, 37 1/2 to 50c per box.

VEGETABLES—Supplies are free. Squash, 25c 1/2 to 50c; Asparagus, \$1; Tomatoes, 40c 1/2 to 50c; Cucumbers, 35c 1/2 to 50c per box; Peppers, 5c 1/2 to 6c; Okra, 12c 1/2 to 15c; Egg Plant, 5c 1/2 to 6c per pound; Green corn, 4c 1/2 to 5c per doz; Beans, 2c 1/2 to 3c; Green Peas, 1 1/2 to 2c per lb.

MEATS—Beef is firm at 4 1/2 to 5c; Veal, 6 1/2 to 8c; Lambs, 7 1/2 to 8c; Mutton, 3 1/2 to 4c; Pork, 7 1/2 to 8c for hard, and 7 1/2 to 7c for soft, and 10c per pound for dressed.

"BEAR AND FORBEAR." An amusing anecdote in the spirited brochure entitled "Summer on the Shores of Lake Superior," gives a new application to the well-known phrase above quoted, thus: We had heard that bear had been found on the rocky ridges, and Mr. Kellogg, whose instinct prompted him to win renown as a mighty hunter, went forth to see and conquer. In a dense thicket he was startled by the apparition of a large black form which, on Mr. K's approach, instantly rushed out. Firing both barrels of his gun, charged with buckshot, the sportsman fled, nor paused to look back until he arrived among his companions, battered and torn from contact with bush and briar. His story, interspersed with convulsive gaspings for breath, was told, and soon the whole party made for the scene of conflict, to find—what? A huge black porker well ridged with buckshot! This porcine venture cost poor Kellogg \$10, which went to appease the righteous indignation of the provoked big proprietor. To this day our staid friend likes not to hear of bear hunting. His invariable response to all halter on the subject is a shake of his head and the dissyllabic warning—pregnant with meaning—"For-bear."

THE NEW YORK STATE FISH COMMISSION, under the supervision of Seth Green, has done the following excellent work:

Shad hatched from 1870 to 1881, 53,609,000.
Salmon trout from 1870 to 1881, 10,000,000.
White fish from 1870 to 1880, 2,438,000.
Brook trout from 1870 to 1881, 5,375,000.
California trout from 1870 to 1881, 1,288,700.
California Salmon from 1873 to 1879, 678,000.
Kennebec salmon 82,000; land-locked salmon 21,000.
Mature bass, including black bass, rock bass, Oswego bass and strawberry bass, from 1871 to 1880, 32,319.
Mature yellow pike from 1871 to 1880, 2,882.
Mature bullheads from 1871 to 1880, 5,750.
Mature yellow perch from 1871 to 1880, 2,341.
There have also been distributed at different times 93,000 eels, 900,000 frost fish, 780,000 fresh water shrimps, 155,500 sturgeon, 610 carp and 18,000 crawfish.

PROGRAMME.

FIXED EVENTS--SPRING & FALL MEETINGS

1883 and 1884.

BALDWIN STAKE FOR 1882

SPRING MEETING.

FIRST DAY.

WINTERS' STAKE—For three-year-olds, to be run the first day of the Spring Meeting; dash of one-and-a-half miles; \$100 each, \$25 forfeit, \$300 added; second to have \$150, third to save stake. Nominations in above to be made for 1884.

SAME DAY—CALIFORNIA STAKE—For two-year-olds, \$50 each, \$25 forfeit, \$250 added; to be run on the first day of the Spring Meeting; second to save stake; dash of half a mile. Nominations in above to be made for 1883.

SECOND DAY.

PACIFIC CUP—Handicap of \$100 each, \$50 forfeit, \$20 declaration, \$600 added; second to receive \$300, third to save stake; two and-a-quarter miles; to be run on the second day of the Spring Meeting. Will close the list of March, 1883.

THIRD DAY.

"SPIRIT OF THE TIMES" STAKE—Dash of one-and-three-quarters miles for all three-year-olds; \$100 each, \$25 forfeit, \$300 added; \$150 to second, third to save stake. Nominations in above to be made for 1884.

SAME DAY—GANO STAKE—Dash of three-quarters of a mile for two-year-olds; \$50 each, \$25 forfeit, \$250 added; second horse to save stake. When any California two-year-old heats the time of Gano, 1:15 for three-quarters of a mile, the Stake to be named after the colt which heats it. Nominations to be made for 1883.

FALL MEETING.

FIRST DAY.

LADIES' STAKE—For two-year-old fillies; \$50 entrance, \$25 forfeit, \$200 added; three-quarters of a mile; second to save entrance. Nominations to be made for 1883.

SAME DAY—THE VESTAL STAKE—For three-year-old fillies, one-and-a-quarter miles; \$25 p. p.; \$300 added; second to receive \$100, third to save stake. Nominations to be made for 1884.

SECOND DAY.

STALLION STAKE—Conditions—Only those three-year-olds are eligible which are the get of stallions owned in this State. The stallions have to subscribe the amount charged for their services to the fund; private stallions at the price of their last season, and those which have not made a public season, to pay \$50, that sum being the minimum price. The owner of the get of a stallion is competent to name. The stake for the colts shall be \$100 each, \$25 forfeit; plate or money added at the discretion of the Committee; distance, 1 1/2 miles. To close for 1882 on the 1st of August next, at which time both stallions and colts (progeny) must be named.

THIRD DAY.

THE BALDWIN STAKE—Post stake for all ages; dash of four miles; \$250 each, p. p.; \$1,000 added; second, \$400, third to save stake. Will close on the 1st of August, 1882, for that year.

SAME DAY—FINIGAN STAKE—For two-year-olds; dash of a mile; \$50 each, \$25 forfeit; \$250 added; second to save stake. Nominations to be made for 1883.

SAME DAY—FAME STAKE—For three-year-olds; dash of two miles; \$100 each, \$25 forfeit; \$500 added; second to have \$150, third to save stake. Nominations to be made for 1883.

All of these Stakes close on the first day of August next, the colts rating now as yearlings, foals of 1881. Nominations to be made to C. M. Chase, Assistant Secretary, P. O. box 1,961, S. F., P. O. B. H. A. To be valid they must be plainly postmarked on that day, 1st of August.

THO. WINTERS, President.
JOS. CAIRN SIMPSON, Secretary.
C. M. CHASE, Asst. Secy.

SPEED PROGRAMME

FOR THE

First Annual Meeting

OF THE

SANTA CRUZ COUNTY

Agricultural Fair Association,

At SANTA CRUZ,

Commencing - Tuesday, August 15th.

\$3,500 IN PURSES!

FIRST DAY--TUESDAY, AUG. 15, 1882.

No. 1—TROTTING RACE—Purse \$250 for horses that have never beaten 2:40. Owned in the District.
No. 2—TROTTING RACE—Purse, \$500. For horses that have never beaten 2:30.

SECOND DAY--WEDNESDAY, AUG. 16.

No. 3—RUNNING STAKE—For two-year-olds; \$50 entrance; \$10 forfeit; \$150 added. Second to save entrance, Dash of three-quarters of a mile.
No. 4—RUNNING STAKE—Free for all; \$50 entrance; \$10 forfeit; \$100 added. Second to have entrance. Dash of a mile.
No. 5—TROTTING RACE—Purse \$100. For double team owned in the District by one man.

THIRD DAY--THURSDAY, AUG. 17.

No. 6—TROTTING RACE—Purse \$400. For horses that have never beaten 2:40.
No. 7—TROTTING RACE—Purse \$100. For horses that have never beaten three minutes. Owned in the District.

FOURTH DAY--FRIDAY, AUG. 18.

No. 8—RUNNING RACE—Selling Purse, \$200; \$50 to

second horse; entrance 5 per cent. to third horse. One mile and repeat. Horses entered to be sold for \$1,000 to carry their entitled weight. Two pounds added for each \$100 under fixed valuation. Winner can be claimed by any one.

No. 9—RUNNING STAKE—Free for all; \$25 entrance; \$10 forfeit; \$75 added. Second to save entrance. Half-mile and repeat.
No. 10—TROTTING RACE—Purse, \$500. For horses that have never beaten 2:30.

FIFTH DAY--SATURDAY, AUG. 19.

No. 11—TROTTING RACE—Purse, \$600. Free for all.
No. 12—TROTTING RACE—Purse, \$400. Free for all two-year-olds. Mile and repeat.

Remarks and Conditions.

All trotting races are the best three in five, except the two-year-old trot; five to enter and three to start. Entrance fee 10 per cent. on purse, to accompany nomination. Purse divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes, alternately, if necessary to finish a day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.

Those who have nominations in stakes must name to the Secretary, IN WRITING, the horses they will start on Wednesday, on the Monday previous, and on Friday the Wednesday previous, by twelve o'clock M. This rule is obvious, and must be strictly adhered to.

No added money paid for a walk over.

Horses entered in purses can only be drawn by consent of Judges.

Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.

Special trains will be run by the Southern Pacific Railroad and South Pacific Coast Railroad, and excursion tickets sold by both companies from all points on their lines, good from August 14th to August 20th, inclusive.

J. D. CHACE, President.

JAMES O. WANZER, Secretary.

SPEED PROGRAMME

OF THE

Mount Shasta Agricultural Association,

TO BE HELD IN

YREKA, SISKIYOU CO.,

— ON —

Wednesday, - - October 4th, 1882.

For racing purposes this District shall comprise Siskiyou, Shasta, Trinity, and Modoc Counties, Cal., and Jackson and Lake Counties, Oregon.

No horse shall be eligible to any of the following District Races unless owned in the District prior to October, 1881.

FIRST DAY--WEDNESDAY, OCT. 4.

No. 1—TROTTING—Free for all; 3 in 5; purse, \$500. First horse receives \$400; second horse, \$100. Entrance 10 per cent. of purse; 5 to enter, 3 to start. Entries close September 1st.

No. 2—RUNNING—Dash of a mile and a half, free for all horses owned in the District; purse, \$100; entrance \$5, added.

SECOND DAY--THURSDAY, OCT. 5.

No. 3—TROTTING—Free for all untried horses owned in the District; 2 in 3; purse, \$75; entrance \$5, added.

No. 4—RUNNING—Half mile and repeat; free for all horses owned in the District; purse, \$75; entrance \$5, added.

No. 5—TROTTING—Free for all three-year-olds and under, owned in the District; 2 in 3; purse, \$75; entrance \$5, added.

THIRD DAY--FRIDAY, OCT. 6.

Grand parade of Stock.

No. 6—TROTTING—Free for all in the District; 3 in 5; purse, \$100; entrance \$5, added.

No. 7—FOOT RACE—75 yards and repeat; purse, \$50; entrance \$5.

No. 8—RUNNING—Free for all three-year-olds and under owned in the District; dash of three-quarters of a mile; purse, \$75; entrance \$5, added.

FOURTH DAY--SATURDAY, OCT. 7.

No. 9—RUNNING—Free for all; 2 in 3; purse, \$500. First horse receives \$400; second horse, \$100; entrance 10 per cent. of purse; 5 to enter, 3 to start. Entries close Sept. 1st.

No. 10—TROTTING—Free for all horses in the District that have never beaten three minutes; 3 in 5; purse, \$100; entrance \$5, added.

Rules and Regulations.

1st. The above purses will be given without discount.

2d. In all District Races the second horse to save entrance.

3d. Entries to be placed in the entry box, kept for that purpose at the Pavilion, prior to 9 o'clock P. M. on the day prior to race.

4th. Entries must give name, pedigree, and description of horse entered as far as known.

5th. In all District Races two or more entries make a field.

6th. All trotting races must be in harness.

7th. National Trotting Association Rules to govern trotting races.

8th. Pacific Coast Blood-Horse Association Rules to govern running races.

9th. Free for all in races 1 and 9, means just what it says, and all entries to these races must be made with the Secretary on or before September 1st.

L. SWAIN, President.

J. H. MAGOFFEY, Secretary.

SIXTH DAY—SATURDAY, SEPT. 9.

No. 18.—COMPETITIVE CADET DRILL.—PRIZE, \$150 Gold Medal. Competition open to all educational institutions in the State.
No. 19.—SAME DAY.—COMPETITIVE MILITARY DRILL.—A prize of the value of \$150 will be offered by the Association to the best drilled Military Company in the State of California. Rules and conditions to be published hereafter. It is the intent of the Directors to have the first competing companies determine what the prize or trophy shall be, and to have the same annually competed for, until it shall have been won three times by the same company, when it shall become the absolute property of the winning company.
No. 20.—SAME DAY.—GRAND BICYCLE TOURNAMENT, for the Association's Gold Medal to first, Silver Medal to second, and Bronze Medal to third; 1-mile dash; open to all bicyclists.
No. 21.—SAME DAY.—TROTting.—Free for all; purse, \$800; first horse, \$400; second, \$240; third, \$80.
No. 22.—SAME DAY.—A SET OF HARNESS, of the value of \$125, will be offered for gentlemen's roadsters; best two in three; owners to drive.
By a "gentleman's roadster," is meant any animal owned and driven on the road by any gentleman for his own private pleasure.

CONDITIONS.

Entries to all running stakes, trotting and pacing races, to be made to Secretary Walker, on or before August 1, 1882. Forfeits in running stakes, and the entrance fee of 10 per cent. on the trotting and pacing races, should in all cases accompany the nominations and entries.
All the trotting and pacing races are the best three in five. In all, five to enter, and three to start.
Entrance fee, ten per cent. on purse.
When there are eight or more starters in a trotting race, 150 yards to be a distance.
National Trotting Association rules to govern trotting, but the Board reserves the right to trot heats with any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
All offers in trotting races are confined to horses on the Pacific Coast, May 22, 1882.
In running races, three or more entries required to fill. Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous. No added money will be paid for a walk-over.
Horses entered in purses can only be drawn by consent of the judges.
Rules of the Pacific Coast Blood Horse Association to govern running races, except as above specially provided.
All entries to be made in writing, to give sex, color and marks of horse; also, name and residence of owner; and in running races colors to be worn by the rider. And in all, any other particulars that will enable the spectators to distinguish the horses in the race.
Write "Entries to races" on outside of envelope.
L. WALKER, Secretary. A. C. DIETZ, President.

\$12,500 In Purses and Staks.

No. 19.—RUNNING.—CONSOLATION PURSE.—\$250 for beaten horses; one mile and repeat; entrance free; second horse to receive \$50.

SIXTH DAY—SATURDAY, SEPT. 16.

No. 20.—TROTting.—2:19 class; purse, \$1,200.
No. 21.—TROTting.—Purse, \$800; for double teams of 2:30 horses.
No. 22.—TROTting.—OCCIDENT STAKE FOR 1882, closed in 1881 with twelve nominations.
No. 23.—SPECIAL TROT AGAINST TIME.—\$250 in plate will be awarded to any stallion that beats Santa Claus' time (2:17).

Entries for the following events for 1883-4 were ordered to be closed with the above races:
No. 1.—RUNNING.—CALIFORNIA DERBY STAKE, for foals of 1880, to be run at the State Fair of 1883. One and one-half miles dash; \$50 entrance, p. p.; \$300 added; second horse, \$100; third, \$50.
No. 2.—SAME STAKE, for foals of 1881, to be run at State Fair of 1884. Same conditions.
No. 3.—RUNNING.—MATURITY STAKE.—Three-mile dash, for four-year-olds, in 1883; \$100 entrance; \$25 forfeit; \$500 added; second horse, \$150; third horse, \$100. To be run at the State Fair of 1883.
No. 4.—RUNNING.—CALIFORNIA ANNUAL STAKE.—For two-year-olds; foals of 1881. Dash of one mile; \$100 entrance; \$25 forfeit; \$250 added; second horse, \$100; third, \$50. To be run at the Fair of 1883.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two year old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.
National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
To fill running races, three or more subscribers are necessary.
All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.
All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.
Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous, by twelve o'clock m. This rule is obvious, and must be strictly adhered to.
No added money paid for a walk-over.
Horses entered in purses can only be drawn by consent of the judges.
Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.
All entries to be made in writing, giving name, sex, color, and marks of horses; also, name and residence of owner. And drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers. This is necessary to enable spectators to distinguish the horses in the race.
Entries to all the above races to close with the Secretary on Tuesday, August 1, 1882.
Write "Entries to Races" on outside of envelope.
EDWIN F. SMITH, Secretary. HUGH M. LARUE, President.

SPEED PROGRAMME.

The nominator not required to name his horse, but simply send his cash (\$150) with his own name, August 1, 1882. He has then earned the right to start any horse eligible that he may fully control, provided the horse he starts be named to the Secretary, September 1, 1882. Four moneys.

SATURDAY, SEPT. 23D.

No. 14.—PACIFIC COAST TROTting.—2:28 Class; purse \$1,000, and \$200 added if more than ten entries. Four moneys.
No. 15.—PACIFIC COAST PACING.—2:25 Class; purse \$400, and \$200 added if more than ten entries. Four moneys.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.
In all these Races (Pacific Coast Novelty Race excepted) four moneys, 50 25, 15 and 10 per cent. of purse. Entrance fee, 10 per cent. of purse, and must accompany the nomination. District Races will close with the Secretary at 5 o'clock p. m. of July 15, 1882. Pacific Coast Races to close with the Secretary August 1, 1882.
When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.
Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserves the right to trot heats of any two classes alternately, or to start a special race between heats.
All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.
All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above, otherwise, old weights to govern.
For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.
Horses entered in purses can only be drawn by consent of the judges.
The Board reserves the right to change the day and hour of any race, if they deem it necessary.
In all races, the right to trot heats of any two classes alternately, or to start a special race between heats, shall be reserved to the Board, no horse shall be qualified to enter in any District Race that has not been owned in the District six (6) months prior to the day of the race; and any entry by any person of any horse so disqualified shall be held liable for the entrance fee so contracted without any right to compete, and the same shall be held liable to penalties prescribed by the Rules of the National Trotting Association and expulsion from this Association.
Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as specially provided.
In all Running Races colors to be worn by riders, and in all other races any other particulars that will enable spectators to distinguish the horses in the race.
In all the Races noted above, SIX ENTRIES are required to fill, and three horses to start; but the Board reserves the right to close any race with a LESS NUMBER.
Races to commence each day at 1 o'clock p. m. sharp.
The track is first-class, having been improved. Stables, hay and straw free to competitors.

ENTRIES.

1st. Entries must be made in writing and dated.
2nd. State number of the race in which you wish to enter.
3rd. State color of horse, and marks, if necessary.
4th. State whether the horse is a STALLION, MARE or GELDING.
5th. State NAME OF MARE AND DAM if known; if unknown, state the fact in the entry.
6th. State NAME AND P. O. ADDRESS of the owner of the horse entered.
7th. Sign with P. O. address of the party entering the horse.
8th. If the name has been changed, give former name.
9th. Repeat by mail, all entries made by telegraph.
Agricultural District, No. 2, California, comprises the Counties of San Joaquin, Calaveras, Tuolumne, Stanislaus, Mariposa, Merced, Fresno, Tulare, and Kern.
L. U. SHIPLEE, President.
J. L. PHELPS, Secretary.
P. O. Box 133, Stockton, Cal.

FOURTH DAY—Thursday, Sept. 28th.

No. 8. RUNNING.—Three-year-olds, 1½ mile dash; \$50 entrance; \$15 forfeit; \$175 added. Second horse to receive his entrance and one-third of added money.
No. 9. SAME DAY PACING.—Free for all. Purse \$300.
No. 10. SAME DAY—TROTting.—For four-year-olds. Purse \$400.

FIFTH DAY—Friday, Sept. 29th.

No. 11. RUNNING.—1½ mile dash. Free for all; \$50 entrance; \$15 forfeit; \$200 added. Second horse to receive his entrance and one-third of added money.
No. 12. SAME DAY—TROTting—2:27 class. Purse \$400.
No. 13. SAME DAY—TROTting.—For two-year-olds. Purse \$400.

SIXTH DAY—Saturday, Sept. 30th.

No. 14. TROTting—2:22 class. Purse \$750.
No. 15. SAME DAY—TROTting—2:30 class. Two miles and repeat. Purse \$500.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year-old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second and ten per cent. to third.
National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
To fill running races, three or more subscribers are necessary.
All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.
All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.
Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Tuesday, on the Monday previous; and on Thursday the Tuesday previous; and on Friday, the Wednesday previous, by twelve o'clock m. This rule is obvious, and must be strictly adhered to.
No added money paid for a walk-over.
Horses entered in purses can only be drawn by consent of the judges.
Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.
All entries to be made in writing, giving name, sex, color, and marks of horses; also, name and residence of owner. In running races full colors to be worn by rider; and drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers.
Entries to all the above races to close with the Secretary on Tuesday, August 1st, 1882.
Write "Entries to Races" on outside of envelope.
T. S. MONTGOMERY, Secretary. A. KING, President.

FIVE DOLLARS A YEAR.

NOTABLE HORSES OF CALIFORNIA.

ELECTIONEER.

No one who has the smallest knowledge of the great horses of the time will question the right of Electioneer to a prominent niche in the Temple of Hippic Fame, if he does not figure in the list of winners. That he is still more eminently entitled to be ranked among the "Notable Horses of California," if not born or raised in this State, is undeniable. Like many of the greatest names in the human race, his fame rests on what has been accomplished in the land of adoption, and after coming here comparatively unknown, a short five years has given him a place among trotting sires of the highest grade. In one respect he takes precedence of all, and can show a succession of young prodigies, any one of which would be a measure of glory to a progenitor. The remarkable "prepotency," as writers are now so partial to calling the power of transmitting qualities he has shown would scarcely have been credited before he gained the distinction he enjoys. A few years ago the prophet

who ventured the prediction that any stallion would show in one season a yearling with a record of 2:36½, a two-year-old with 2:21 to her credit, another two-year-old with 2:24¼, and several more of the latter age which gave a public exhibition of speed much below a 2:30 gait, would have been held demented. Even after Fred Crocker trotted in 2:25½ the most acute observers held that it was a phenomenal performance which, in all probability, would not be reached in years. Had it not been that Sweetheart was so near the same point, there would have been still greater doubt, though as it was, the likelihood of still more marvellous feats speedily following, there was general incredulity.

Though Electioneer has never trotted in public, he gave evidence of possessing his share of the well known speed of the family, and it was only the "worst run of bad luck" imaginable which prevented him from leading the noted progeny of Green Mountain Maid, great as the feats of

Prospero, Dame Trot, Elaine, etc., have been. Probabilities, however, are not required, and the glory which Electioneer has obtained through his progeny is far beyond what individual capacity would merit, though that capacity were of the highest class. Individual merit in horses ends with the active life of the performer. He who has the faculty of perpetuating the desired qualities lives in future generations, and in the case of the horse under consideration there are already so many of his sons and daughters which are endowed, that it is sure he will take the place of a founder of a family, and the Electioneers be known through several generations by this distinctive appellation. Even when broken up into several branches the "head of the clan" will be remembered as the founder of the dynasty, and the banner emblazoned with the colors of the chieftain. As has been stated, there was a succession of prodigies to his credit after the fruits of his first season in California

came upon the track. Though he had made some seasons in the East, he was so completely overshadowed, in the estimation of his former owner, by his stable companion, Messenger Duroc, that he occupied an inferior position. Not so humiliating as the Godolphin Arab occupied at Gog Magog, but restricted in his opportunities and his colts given no chance.

When Governor Stanford visited Stony Ford and the stallions were paraded for his inspection, his companions were enthusiastic over the fancy of the owner. Messenger Duroc was the only horse in the world, and to show another after he had been on the stage was like displaying the daubs of a village potthouse in juxtaposition to a gallery of the grand masters of the art. He was not to be misled, however, by the acclamations. First he saw that the form of Electioneer was superior—much superior, according to his idea,—and then the next thing to consider was the breeding. Both were by the same sire. Messenger Duroc's dam Satinet by Roe's Abdallah Chief, and the dam of Electioneer was Green Mountain Maid by Harry Clay.

Messenger Duroc, at that time, owed all of his celebrity to Prospero and Dame Trot, both from the dam of Electioneer, and to Hogarth, the dam of which was also by Harry Clay. To a man who had a knowledge of breeding, in the habit of forming his opinions from his own knowledge, and not easily influenced by the enthusiastic notions of others, there could be little question when a choice had to be made, and though the "big horse" was priced at a figure at least four times as much as the other, the more highly formed and better bred was taken. Price had nothing to do with the choice. The intention was to buy the best regardless of cost, and fortunately for the breeding interests of California the son of Green Mountain Maid was the selection. It is not the intention to make this series of articles a dissertation on breeding. The plan is to accompany the picture with a short sketch of the animal portrayed; but this must, of course, depend on circumstances. When the title of "notable" depends on the progeny, then the ancestry also comes in for a share of the notice. It is supererogatory to say anything of the sire of Electioneer, Rysdyk's Hambletonian. His fame is so great, and so deservedly great, that it cannot be questioned with any logical argument to support the questioner. His dam, Green Mountain Maid, stands so nearly at the head of the list of trotting broodmares that Miss Russell is the only one which can dispute the claim that she should be the premier. Prospero 2:20, Elaine 2:20, and Dame Trot 2:22, are a trio of jewels of which the highest might be proud. There are assuredly "speed lines" enough here to suit the most fastidious sticklers for this essential part of a pedigree, and to add still greater force we find that the second generation is likely, and we believe sure, to better the showing. We have not the least doubt that there will be grandsons and granddaughters of Green Mountain Maid which will show far faster, and of this sort not a few.

For the proof, a brief recapitulation of what has already been done will be all that is necessary, and that we will rest the case: On the Bay District Course November 13, 1880, Fred Crocker was matched against 2:30. He then was a two-year-old, and had trotted a race in Sacramento, when he was beaten by Sweetheart in 2:31½-2:32¼. This he won very handsily in 2:28½. One week afterwards he was again asked to beat his own time, and he accomplished it with a margin of ¾ seconds, placing 2:25¼ on the blackboard. Sweetheart had trotted in 2:26½, and the performances by two California-bred two-year-olds set the Eastern world ablaze. The fastest time for years, and it still ranks the fastest for that section, was 2:31, and to have it lowered so much was scarcely to be credited. There were chapters upon chapters in the Eastern papers. Some questioned the accuracy of the timing, others the length of the track, and never before was there such a hubbub unless, perhaps, when Goldsmith Maid trotted in 2:17 at Milwaukee. Anno Domini 1881, increased the surprise, or rather so completely established the superiority of the California colts that the Eastern breeders were in dismay. At a meeting of an association, composed of the prominent breeders of the East, it was gravely debated whether the Occidentals should be barred, handicapped, or some other plan adopted which would save from impending danger. A resolution was offered that the distance should be increased to 220 yards in colt races, and then an amendment was offered that it should be 150 yards. The cause for all of this tribulation was the trotting of another lot of two-year-olds, and was as follows: At the State Fair at Sacramento there was a stake for two-year-olds, the starters' Wildflower by Electioneer, and Eva by Sultan. The latter was a sister to Fred Crocker, both of their dams being by St. Clair. Eva won the first heat in 2:33½, Wildflower the second and third in 2:33-2:37. This was good, if not up to the standard of the preceding year, but the owners were well aware that it was well within the rate of the two fillies, and means were taken to put it to a test. The race at Sacramento was on September 22d, and on the Bay District Course, on October 22d, there were two prizes given for two-year-olds to beat the once celebrated time of So-So, 2:31. The track was in good order and the day fair. The attendance was good, a large number of those who take delight in the sports of the track, but who are prone to verify the time of the judges with their own watches. Wildflower came out first. She moved up and down the stretch

a few times to "warm up," going so smoothly and easily that it was evident that 2:31 was nowhere, and some were sanguine enough to predict that the time of Fred Crocker might be equalled.

She started with the daisy-cutting stride for which she is noted, and the very best judge of speed, with his eye merely to guide, would have thought that a "forty gait" was about the measure. Thirty-five and a quarter seconds was the tale told by the watches when the quarter pole was made, and there were many of those who held timing watches who doubted the accuracy of the report and thought that their "old reliables" had failed them at a critical moment. Acting as Clerk of the course, which gave the best opportunity to see every portion of the track, and the position of the fractional posts being such that there is no difficulty in "catching the time" correctly, with as good a split-second watch as ever came from the hands of the best maker, we were prepared to be accurate, and from our coin of advantage were prepared to verify the official time. Each of the judges had a watch, and the figures of the regular timers, stationed immediately opposite the judges' stand, agreed with ours as to the fractions, and there was a remarkable unanimity in officials and "outsiders" regarding the time. But this break in the description is very different from the trotting of Wildflower. She swept down the backstretch at such a flight of speed that the galloper which accompanied her was put to a racing stride, and at the half mile 1:09 was the record. This was surely far too fast, and any animal not yet forty months old could not withstand the strain. There was a slight slackening of the speed around the further turn, whether owing to tiring, which appeared inevitable, or strategy on the part of the driver in order to enable her to come home, was, of course, unknown to the spectators. With all the evident slowing, she reached the three-quarters in 1:44½, and yet there was not the rush which marked her progress in the backstretch. Mr. Covey ran up the track shouting and signalling her driver to come on. He did not understand the mandate until nearly opposite the 150 yard mark, when for the first time she was touched with the whip. The response was such an acceleration of the rate that the "teaser" was forced to extend herself for the rest of the journey, and she swept under the wire in 2:21. The explanation of the slackening on the upper turn and down the stretch was this: Frank Covey drove the galloper, carrying a chronograph in his hand. When he saw that the half mile was made in 1:09 he was startled, and fearful that a break might render all that had been done of no avail. He was satisfied that any previous three-year-old time would be beaten easily if there was no mishap, and very judiciously he directed McGregor to "take a pull." It is unnecessary to speculate what would have resulted from a different course, and it is sufficient that the best time of the East had been beaten ten seconds, and when that time was "hung out" there was a shout which might have been heard in the city. There are few men who would have started another filly after such an exhibition of speed, but Mr. Rose, with the feeling of a true sportsman, determined that Eva should fulfill her part of the programme, and a grand effort she made, accomplishing the mile in 2:26. On the 5th day of November there was another wonderful exhibition of speed by the youngsters. There were special prizes for yearlings, and after what the two-year-olds had shown, some were sanguine enough to predict that the time of Memento would be beaten. This grand record for a yearling was held to be so superlatively good that our old and esteemed friend "H. B.," of the *Turf, Field and Farm* wrote "that it would be a long time before we saw such a wonderful baby trotter." Doctor Hicks' bay filly Pride, by Buccaneer, made the first essay, and left the Kentucky time 12¼ seconds behind, trotting in 2:44½. This was a "hard stent," and as in the preceding day it took some nerve to make a trial after such a "breaking of the record." Mr. Covey, however, was not easily discouraged, and Hinda Rose, by Electioneer, her dam Beautiful Belle by The Moor, was selected to battle for Palo Alto. She proved victorious by the small margin of a second, 2:43½ being the mark. This disposed of the question that Electioneer could only get trotters from St. Clair mares, and when Azol, another yearling by him, with a still different cross in the dam, trotted a quarter in 41¼ seconds, the "prepotency" of the sire was established.

On the same day there was a further exhibition of the quality of the stock of Sunny Slope and Palo Alto. Eva trotted a mile in 2:26½, and her two-year-old sister, Sweetheart, a mile in 2:22, only one second below that of the champion, Phil Thompson. We venture to say, quoting our old friend again, that it will be a long time before we will see sisters two and three years old which will show such time on the same day, or for that matter in the same season.

Five of the Palo Alto two-year-olds made an exhibition of a quarter of a mile. Three by Electioneer, two by General Berton. The two Berton, Bonnie and Bertha, each made the quarter in 36 seconds, and the Electioneers as follows: Eros, 37 seconds; Bonita, 32¼ seconds; Wildflower, 32 seconds.

It is not surprising that the Eastern people doubted the length of the track, the accuracy of the watches, the age of the colts. The wonder is that they did not set the whole thing down as a fiction, a moon hoax story, akin to the traveling stories of Gulliver, and that all Californians were in a conspiracy to humbug with stories which underate the common sense of any one who would give them credit for truth.

But on the 24th day of November was accomplished, in our opinion, the greatest feat of them all. Two medals were offered, the first being for a yearling that would beat 2:43½, the second for a two-year-old to rub out any record for that age, save that of Wildflower. The figures are the most eloquent commentary. The yearling, Hinda Rose, went to the quarter in 40½ seconds, to the half-mile pole in 1:18¼, and made the mile in 2:36½. She made a break on the home stretch and the "middle half" was trotted in 1:15½. That a filly taking rank as a yearling, lacking several months of being two years old, should show so much speed and endurance, the speed especially, is the most marvellous illustration of the improvement of the American trotter which has ever been shown.

It seemed a fitting tribute to the two prominent breeding farms of California, and that the union of the forces was irresistible. Bonita took the second place in the record by making the mile in 2:24½. Electioneer, St. Clair, Fred Crocker, Wildflower, Bonita. One of the earliest strains of California and one among the latest, it is certainly a great "tick." There are not many Electioneer's outside of Palo Alto, but the few there are show the family characteristics. Albert W., by Electioneer, his dam a sister to Aurora, promises to conquer a place in the gallery of notables before long. Last year as a three-year-old he was very successful. He won a stake for three-year-olds at the Golden Gate Fair. At the State Fair he walked over for a stake, and won another, trotting the second, third and fourth heats in 2:38½, 2:36¼, 2:39; Flight winning the first in 2:42¼. At Stockton he and Flight again met. He won the first heat in 2:37; she the second in 2:35; he the third in 2:35 and the fourth in 2:32½. This was a very good showing for a colt of his age with as little training as has been given him. Antero, by Electioneer from Columine by A. W. Richmond, won the Embryo stakes of 1880 and 1881, when he was a yearling and two-year-old.

Making actual performances the text, we will not add the "trials" of the Electioneers, though these would add to his renown. Not private trials but performances made as much in public as when the money is "hung up" and judges in the stand. It may be added, however, that an Electioneer which cannot trot would be considered an anomaly, and every one that has had any training can trot fast.

Our engraving is such an admirable picture of Electioneer that written description is almost unnecessary. We never saw a more faithful likeness of a horse, and if the color was added it would be as perfect as an artist could draw, if he took a year to perfect his work. Some who have seen the "proof" say, "Why that is a tremendously powerful horse." That is one of his main features. Quarters and loins are immensely so, and the gaskins are very full. The shoulders are well clothed and the neck very strong. With all this power there is a finish, more quality than is usually seen in the sons of Hambletonian, and a majority of his colts, particularly those from highly bred mares, are still finer. There are several at Palo Alto which it would be difficult to tell from thoroughbreds. His color is very fine, a deep, rich bay, with white hind feet.

A REPLY TO EDWIN.

EDITOR BREEDER AND SPORTSMAN—DEAR SIR: I was much pleased to see "Edwin's" article on "Judging by Measure" in your issue of July 15th, and would add, by way of parenthesis, that if all who differ in opinion would treat their opponents with equal courtesy, acrimony would be expunged from our sporting papers, more harmony exist in our Clubs, and far more good ensue to our fraternity. "Edwin" has had more practical experience in the matter of judging than I have, and your correspondent defers much to his assertions; but having thought seriously upon the above subject, and seen and read of the wide divergence of one judge from another on the same dog, within the same month, and the dog in the same condition, I feel as if there was something radically wrong in the base upon which our judges work. There was no reason to impugn the opinion of either judge as to their fitness for the office, or their action as gentlemen. We all know how many different schools of art there are, and how tenacious of opinion is the advocate of one over the opinions of another as to their relative merits; therefore, in many instances, the widespread dissatisfaction among the artists over each exhibition; and for that reason alone, I do not think the citation carries strength sufficient to convince me that my proposition is untenable.

A dog is a tangible object, and can be got at from all sides; an object that has size and body; a picture is not, but is the offspring of one's imagination, and its degree of merit depends upon the artist's technique.

You may take a yacht—each line is drawn upon a true scale and mathematically correct; each curve, from rail to keelson, and stem to stern, proportioned exactly. Science has taught us that certain shapes increase the speed, others the carrying capacity, from which the craftsman knows how to plan for pleasure or business. So upon the subject of "judging my measure." In the earlier stages of Bench Shows, judging by the "rule of thumb" was the only method, and each judge did the best he knew how. The first advance and only forward move, up to date, was the standard points, as alluded to in my article of July 8th, and laid down as follows:

We will take for illustration the one hundred points given by Stonehenge for the Irish Setter. Each point is lucidly described in his work: Skull, value, 10; nose, 10; ears, lips and eyes, 4; neck, 6; shoulders and chest, 15; back, quarters and stifles, 15; legs, elbows and hocks, 12; feet, 8;

size, 5; symmetry and quality, 5; texture of coat and feather, 5; color, 5.

Now, out of those 100 points I am firmly of the opinion that, with proper care in the selection of measurement of prize winners, and patience, an average can be arrived at that will arbitrarily fix a standard size under the proper weight of dog for the skull, nose, ears and lips, neck, shoulders and chest, back, quarters and stifles, legs, elbows and hocks, feet, thus compiling a standard for symmetry.

Eyes, flag, texture of coat and feather, and color, quality, or *tout ensemble*, must be judged by "rule of thumb," the same as paintings.

I should very much like to have brother sportsmen offer their views, and if my position is untenable I will gracefully and cheerfully—although I would think it rough on the dog—step down and out. It is only by a pleasant, serious, and friendly interchange of ideas that reforms are brought about—that causes pleasure to the "accomplisher" and leaves no sting to the "extinguished."

The 100-point system has by custom become established, and although Stonehenge advocates the judging by "positive and negative marks," which is an excellent arrangement, yet usage has so firmly rooted the 100 points I would not now try to break it up in favor of the positive and negative system, but would suggest that some sporting house get up a hook that would carry the advertisement of said house and contain the printed points of each class of dogs, and have them for sale, or gratuitously distribute to each Judge of each Bench Show, and request said Judge to fill up the same for publication, in the BREEDER AND SPORTSMAN, *Forest and Stream*, or *American Field*. SUDS.

INTERESTING HISTORY OF ROMERO'S COLTHOOD.

ELA HILLS, Los Angeles County, July 5, 1882.

EDITOR BREEDER AND SPORTSMAN—DEAR SIR: Your letter dated May 31st received, and as your paper is to be exclusively for stockmen, with no politics in it, I will take pleasure at all times in adding my mite. Please find \$5 enclosed, my subscription for one year.

Romero's history, up to the time of his sale to M. Salisbury, is about as follows: In 1876 I bought Gretchen, by Mambrino Pilot, dam Kitty Kirkman, from L. J. Rose, Esq., of Sunny Slope, bred her to A. W. Richmond February 28, 1877; she foaled the grey colt Jo Romero, since called Romero for short. Mr. M. S. Patrick, from whom I purchased Richmond, wanted a Richmond colt, and as I only had five colts I would not sell him any, but agreed to give him a half interest in one that he should select, on condition that he should pay for training and trotting him in all two and three-year-old purses; he was also to keep him entire and not change his name. Mr. Patrick failed in his engagement, as he left the colt for me to take care of until he was 18 months old, when I insisted upon his taking the colt, as he was hothering the mares. Mr. Patrick then gave the colt to Charles Thomas to break and to take care of. Mr. Patrick died shortly afterwards, and I told Thomas to keep the colt on the same conditions, which he agreed to. I made no points with him about the conditions not having been complied with in his two year old form, as Len Rose, the colt I kept, had done more than well, but insisted upon something being done to prepare him for his three-year-old races. Thomas' ranch is 130 miles from here in the San Jacinto Mountains, and he made first one excuse then another for not bringing the colt in for all that fall; said the colt was sick, and so on. I was informed, however, that the colt was running with a lot of mares on the Temecula Mountains all the fall and winter of 1879, and I am told has left several colts in those parts. Finally, in the spring, about the last of May, 1880, Thomas sent the colt to Los Angeles, and he looked as though he might have wintered almost anywhere, as his hair looked dead and long and he was very poor. Thomas gave the colt to Durfee to work and train for three months, but when we hitched him up it was evident that he had never looked through a collar. As we had been told the colt was broken to harness, we took no precautions to prevent him from injuring himself, and he came very near battering his brains out in the stall before the harness could be removed. This was about June 1, 1880. July 4th, 1880, we gave our horses a trial, and Romero trotted his mile in 2:41, and could brush Len Rose down the stretch, who had trotted in 2:32½ at that time. Before the entries closed at Sacramento, Romero showed that he was as fast as Len, but as he had no seasoning work and was soft, I was afraid of injuring him, and concluded to let him rest and feed him some grain until the next spring; besides I thought Len Rose would be fast enough. At this time Charles Thomas sold Charles Durfee his half interest in Romero for \$220, I think. Before I sent my horses to Sacramento, Romero showed a 2:32 gait, but pulled up a little lame, having stepped in a hole; so his shoes were pulled off and he was turned out. He was not driven again until towards winter, when he was hitched up and speeded half a mile for John Mackey's entertainment, when he trotted in 1:17 or 1:17½, I forget which. We thought it wonderful, as the horse had been kept in a box stall with no exercise for three or four months. Mackey thought him a wonderful colt, and we were much amused by his remarking that "the colt made him know that he wanted a car-load of Mambrino Pilot mares," and he intended to get them to breed to Echo. I told him that if Haggin bought them he had best buy Richmond to go with them, if he wanted to breed colts like Romero.

In December, 1880, I offered my stock to Mr. Salisbury, and as Mr. Titus had told him about Romero, he came to look at him; he wanted me to set a separate price upon Romero, and I did, putting him at \$2,500, which he thought too much. I then offered to let him buy Durfee out, and leave me my half. He refused, and I then told him that I was anxious to sell the stock, and I had already had two trades broken by Romero, so, in order to get him out of the way, I would make him a present of my half and he could buy Durfee out; he would not have it so, and left. Next day Mr. McKibben offered Durfee \$1,100 for the colt, and I told Durfee to consult his own necessities and feelings upon the subject—that anything would satisfy me. Durfee went away, saying that he did not want to do it, but was very much in need of money, and finally went to McKibben and took the money. I wanted him to give us a contingent \$2,000 more upon condition of his beating 2.25 within the year, but could not get him to agree upon it. Mr. Salisbury bought Romero solely upon Mr. Titus' representations, and we did not even lead the colt for him to see his action, although we offered to work him next day for him. Mr. Ti-

tus told me long before Mr. Salisbury bought the colt, and after Button had beaten us all around the circuit, that though he was positive that Belle Echo could heat Alex Button, he felt nervous about that green fellow of mine, meaning Romero, and time has proven that Mr. Titus is not so blinded by his preference for his own stock as not to recognize a good horse wherever he sees him.

I have been trying to make this a short story, but find it impossible to leave out the story of my trying to do right by this colt and failing. The whole thing in a nutshell is, that Romero was allowed to raise himself, just like a \$30 mustang, and ran with mares and was allowed to serve them, and never ate a sack of grain altogether, I venture to say, up to the spring he was three years old. If my partners had trotted him with Len Rose when two years old and again when three, I am sure it would have made a difference of \$50,000 to me. As long as I was in funds to train and work colts I never asked odds of any one as to bars, and I believe I was the first man in this State to show yearlings in harness. I took first prize for Josie Coles and Bessie Bell, one by The Moor the other by Overland. There was no race, but I showed a four-minute gait with them in front of the grand stand at S. D. A. S., at the fall meeting of 1873 or 1874, I forget which. I am not in favor of harring, that is, punishing a stallion for having the best get; we are all striving for excellence and not for second best, all the time having an ideal in our mind to breed to. I am of the opinion that all the older breeders of trotters in California, with two or three exceptions, are too poor to afford to train eight or ten colts at a time, and don't consider the fight equal when they have to select one mare's produce and stick to it on account of the entries having been made, though he may have better ones in the herd, the poor breeders preferring to wait and select before risking much money. But I say to the rich ones who have already trotters, go ahead; we enjoy and glory in your records, and we will give you a racket at three and four years old. But there are Hearst, Haggin, Valensin, and other new breeders of trotters, who all have some young fast ones, if we only give them a little time, and it would not be fair to give them a reserved seat among us second-class fellows until they have a shy at the best. Nobody ever heard of Lexington's, or Boston's, or Bonnie Scotland's, or King Alfonso's, or Hambletonian's get being barred on account of their parentage, although their lists of winners are legion. No; I say double and triple the purses even, if the get of one stallion rakes in the pile every time. No man should be rewarded for producing the worst article. Yours truly, H. M. JOHNSTON.

PADDOCK.

HORSES BELONGING TO COLONEL McNASSER.

Colonel James McNasser, of the Golden Eagle Hotel, has lately imported from his former home in Colorado some very valuable horses. Our correspondent "Mile-and-a-Quarter," gave a sketch of them in his letter published in the number of the 8th of July, and also the information that the Kleinhaus place, containing 650 acres, had been purchased for a breeding farm. Sixteen mares were brought and two stallions, the following being a partial list:

Probably the premiership in the stallions should be awarded to Ensign Goldust, golden chestnut stallion, bred by L. L. Dorsey, Jefferson county, Kentucky, foaled 1872; by Goldust. 1st dam by Vermont Black Hawk. 2d dam a thoroughbred mare. It is almost unnecessary to say that Dorsey's Goldust was one of the most successful trotting sires, having got Lucillo Goldust, record 2:16½; Fleety Goldust, 2:20; Rolla Goldust, 2:25, and Saddle, 2:21, and others of celebrity. He was by Vermont Morgan, his dam by the imported Arabian horse Zileadi, and his grandam by imported Barefoot. The near Vermont Black Hawk cross in Ensign Goldust is valuable, as there are very many of the fast trotters of the present day which have one or more strains of the blood. The other stallion, Silver Cliff, is also a golden chestnut. He was bred by J. W. Hornsby, of Eminence, Kentucky; foaled 1872; by Lexington Goldust. 1st dam Clara Bell by Wide Awake, Lexington Goldust was a very highly bred horse. He was by Dorsey's Goldust, his dam the thoroughbred mare Eugenia by Lexington. 2d dam Attala by Ruffin, and his 3d dam the celebrated Duchess of Marlboro by Sir Archy. There has been very little of the Goldust blood in California, and the son and grandson are valuable acquisitions. Among the mares are Belle Watts by Dorrell's Blue Bull, and she has a yearling filly and horse foal by Ensign Goldust. She was bred in Indiana. Silver Spray is a dark chestnut, 15½ hands, foaled in 1868, bred by A. J. Reed, of Fayette county, Kentucky; by Mambrino Columbus (son of Mambrino Chief), her dam by Blood's Black Hawk. This mare's suckling by Ensign Goldust is a very fine one.

Maud Furney, chestnut, bred by Phil. Warren, of Springfield, Ill., by Harry Bluff, her dam by the Arabian Fyzaul, imported by A. Keene Richards, and her grandam Argente by Bertrand. Her foal by Ensign Goldust is large and shows a great deal of quality.

Susie, bay, foaled 1870; by Blanco, the sire of Smuggler, her dam by Ethan Allen. Her foal by Ensign Goldust is also fine.

Mollie A., bay, foaled in 1871; by American Eagle (son of Cassius M. Clay), her dam Mollie by Weasel. She has a foal at her side by Ensign Goldust, and her yearling filly by the same horse is an extra one.

Lady Jackson, mahogany bay, by Stonewall Jackson (son of Iron Duke) his dam of Woodpecker blood.

Moroza, bay, foaled in 1868, bred by C. S. Dole, of Chicago, Ill.; by Autocrat, her dam Idlewild by Peck's Idol, a son of Mambrino Chief.

Little Belle, bay, bred by John T. Magman, Montgomery county, Ky., foaled 1872; by Belmont, the sire of Nutwood, her dam by imported Trustee.

Nanette by Peck's Idol, her dam Nancy.

Lady Estabrook by Flying Morrill, dam by Signal, grandam the Benney mare.

Julia B., bred by J. T. Hea, of Freeport, Illinois, by the Beaumont Horse (the sire of Molford Zena and others) dam a fast pacing mare of Canadian origin.

Dora by Young General Buford, her dam by Rysdyke. Besides these are the broodmares Lucy Hartman, Bell Phillips and Messenger, and many very fine yearlings and two-year-olds.

Those who are conversant with pedigrees will not require to be told that the blood of most of these animals is a high class, and as we have written before cannot fail to be of vast service in improving the trotting stock of this coast.

THE TURF.

CLOSING OF ENTRIES.

On the first day of August next the stakes of the Pacific Coast Blood-Horse Association, the Embryo Stakes and the Purses and Stakes at the California Fairs will close.

The advertisements in this paper will give the particulars. Do not forget the date—TUESDAY, AUGUST 1st, 1882.

MONMOUTH PARK RACES.

The concluding days of the summer meeting by the sea were very enjoyable, as the weather was delightful and the sport good, the only drawback being the heavy state of the track arising from the storm that went over Long Branch on the fourth and continued during the following day. In the first race, a handicap for all ages, \$25 each with \$500 added, a mile and a furlong, the imported mare Sweet Home by Knight of St. Patrick, from Bittern, was looked on as the winner, being 4 years old with 107 lbs., her two contestants being Priam, 4 years, 103 lbs., and Fatinitza, 4 years, 105 lbs. In the deep mud the favorite was all at sea, and finished last, Priam winning in 2:06¼. The second race was the important July stake for two-year-olds, a dash of three-quarters of a mile, in which nine of the entries came to the post, and owing to George Kenney carrying extra weight, the Kelso pair brought \$125, Kenney \$55, Clonmel \$50, the Marshal \$40, P. Lorillard's pair \$40, and the field \$25. There was some delay at the post, and it was only at the sixth attempt that they got way, Fairfield and Inconstant first showing in the front, but at the turn into the home stretch, where the leaders were running wide, George Kenney came up, and although from sheer distress he swerved to the right, he was skilfully got in hand and won by two lengths.

The July Stakes, for two-year-olds, at \$100 each, half forfeit, only \$20 if declared by January 1, 1882, and \$30 if declared by June 25, 1882, with \$1,000 added, the second to receive \$250 out of the stakes; winners of a stake (handicaps excepted) of the value of \$1,000, to carry 5 lbs.; two such stakes, 7 lbs., and three such stakes 12 lbs extra; closed with 58 subscribers; three-quarters of a mile.

Dwyer Bros.' b. c. George Kenney, by Bonnie Scotland, dam Kathleen; 115 lbs., including 5 lbs. penalty. (J. McLaughlin)	1
Mr. Kelso's ch. c. Fairfield, by Bullion, dam Alumina; 105 lbs. (O'Hara)	2
G. L. Lorillard's b. c. The Marshal, by Pat Malloy, dam Magenta; 105 lbs. (Holloway)	3
P. Lorillard's b. f. Inconstant; 102 lbs. (Shauer)	0
D. J. Bannatyne's br. f. Winna Ding; 102 lbs. (Gallagher)	0
J. E. Kelly's b. c. Clonmel; 105 lbs. (Hughes)	0
Mr. Kelso's b. f. Heel-and-Toe; 107 lbs. (Evans)	0
P. Lorillard's b. c. Nimrod; 105 lbs. (W. Donohue)	0
D. D. Withers' br. c. Buckstone; 105 lbs. (Sparling)	0

Time—1:22.

In the next race, the Monmouth Oaks, P. Lorillard's pair, Amazon and Hiawasse, were held at \$160; Rica \$150, and the field \$30; and as Rica has apparently lost entirely her fine two-year-old form, it proved to be an easy victory for the Rancocas Stable.

The Monmouth Oaks, a sweepstakes for three-year-old fillies, at \$100 each, half forfeit, only \$10 if declared by August 1, 1881, \$20 if declared January 1, 1882, and \$30 if declared by June 1, 1882, with \$1,000 added, the second to receive \$300 out of the stakes; closed with 62 subscribers; mile and a quarter.

P. Lorillard's br. f. Hiawasse, by Saxon, dam Vandalite; 113 lbs. (Peakes)	1
P. Lorillard's b. f. Amazon, by Moccasin, dam Aspasia; 113 lbs. (Shauer)	2
C. H. Raymond's b. f. Bonella; 113 lbs. (Holloway)	3
Mr. Kelso's b. f. Rica; 113 lbs. (Evans)	0
Dwyer Bros.' b. f. Francesca; 113 lbs. (J. McLaughlin)	0

Time—2:23.

The fourth was a selling race, with penalties and allowances, three-quarters of a mile, that was won by a two-year-old, Battledore by Glenlyon, belonging to P. Lorillard, beating Sir Hugh and five others. The time was 1:19, weight 69 lbs., and the winner was not claimed at \$1,000. The last was a hurdle race of a mile and a half, and was won by Felix in 3:07, three others figuring in the field.

The first Summer Meeting was brought to a close on the Saturday, when there were eight races on the card that would have given general satisfaction, save that in the two-year-old race the start was delayed for three quarters of an hour through the usual cause, and that is, not taking advantage of a fair send off at the first attempt, and then getting the youngsters and their jockeys in a tremor of anxiety and excitement through a long succession of false starts. The first was a sweepstake handicap of \$600, a dash of a mile and a half, in which Captain Conner's Glidelia showed she had in some measure recovered the favor that at one time forfeited a most prominent position on the American turf. As a five-year-old, Glidelia carried 115 pounds, but equal in the betting with her was Fair Count, an aged horse with 116 pounds; Ballast and Blumen, each four-year-olds, carrying respectively 110 and 88 pounds. The result was simply a walk over for Glidelia in 2:41½. The second was a match for \$1,000 a side, one mile, gentlemen riders, which was regarded as a kind of international affair. Mr. Holmes, an Englishman on Corsair, giving two stone, or twenty-eight pounds, to Hospador, ridden by one of the best amateur jockeys, Mr. Hunter. The latter was an immense favorite for the talent, but made too strong a play for the first three quarters of a mile, and was beaten out easily at the finish in 1:46¾. The third was a purse for two-year-olds, which shows great talent in the way of bringing together a number of entries on even terms. It was, however, a somewhat one-sided affair, Woodflower, the favorite, winning easily and scoring another victory for her sire, the Ill-Used the Second, Carlyle being also by the same sire. Fortune does not appear to favor the colors of James E. Kelly, who with a fine stable is unfortunate enough to have to content himself with second or third honors.

Purse \$500, for two-year-olds; entrance, 5 per cent of the purse (\$25 each); to the second; winners of any stake of the value of \$1,000 to carry 7 lbs.; of two or more stakes of any value, 10 lbs. extra; winners of \$500, selling races and handicaps not counting, to carry 3 lbs. extra; the winner of the two-year-old purse on the second day, if not then a maiden, to carry 5 lbs. more than he then carried; maidens not having run second for a stake of the value of \$1,000 allowed 3 lbs.; 10 entries; five furlongs.

A. Belmont's ch. f. Woodflower, by Ill-Used, dam Woodbine; 107 lbs. (Barbee)	1
J. E. Kelly's b. c. Carlyle, by Ill-Used, dam Caroline; 107 lbs. (Hughes)	2
P. Lorillard's b. f. Battledore; 107 lbs. (Shauer)	3
G. L. Lorillard's ch. f. Gift; 104 lbs. (Ural)	0
Preakness Stables' b. f. Vintage; 104 lbs. (Holloway)	0
H. T. Howard's ch. f. Fairwater; 104 lbs. (J. Donohue)	0
T. M. Fleming's ch. c. Ganymede; 104 lbs. (Blaylock)	0
L. A. Ehler's ch. c. Circassian; 107 lbs. (Sparling)	0
E. V. Snediker's b. f. Touch-Me-Not; 104 lbs. (W. Donohue)	0

Time—1:34½.

The fourth race was a handicap sweepstake of \$500, a mile and a half for three-year-olds, which was won by W. Jennings' Infanta, 100 lbs., Duplox, 100 lbs., being second, Bouncer, 90 lbs., being third, with Macbeth, 115, and Buxom, 87 lbs., unplaced. Time, 2:01. The next was the famous Moumouth Cup, in which there have been recorded such brilliant performances, and among them the first and great struggle for supremacy between Longfellow and Bassett. This year, owing to the multiplicity of their engagements, a great many were declared out of this important race, and in the absence of such cracks as Thora and Hindoo, Eole was spotted by the talent as the winner, they paying \$600 for him against \$300 for Girofle and \$105 for Monitor. The race was pretty evenly contested until within a furlong of the wire, but Eole stayed the longest and won in 4:07½, which is slow time, Monitor winning the same race last year in 4:06½.

The Moumouth Cup, a sweepstake for all ages, at \$50 each, play or pay, with \$1,000 added, the second to receive \$300 out of the stakes; the winner of the Baltimore, Westchester or Coney Island Cup in 1882 to carry 3 lb. extra; of two of them, 5 lb.; of three of them, 7 lb. extra; 16 subscribers; two miles and a quarter.

F. Gehlhard's b. c. Eole, 4, by Eolus, dam War Song, 118 lb. (Barbee) 1
E. V. Snediker & Co.'s Girofle, 5, by Leanington, dam Katan, 117 lb. (W. Donohue) 2
G. L. Lorillard's ch. g. Monitor, 6, by Glenelg, dam Minx, 129 lb. (Costello) 3
Time—4:07½.

The next was a selling purse of \$500, one mile, that was captured cleverly by Marathon, 4 years, 104 lbs., beating Jim Farrell, 3 years, 95 lbs., second; Constantina, 4 years, 94 lbs., third, and Strathspey, 4 years, 107 lbs., and Krupp Gun, aged, 106 lbs. The time was 1:45½, and there was no bid for the winner. Then came the Corinthian Stakes for gentlemen riders, \$25 each, p. p., with \$300 added, a dash of a mile, which was won by Arsenic in 1:48½, who being the first choice in the betting as a four-year-old, with 158 lbs., and ridden by Mr. Hunter, beating Bonnie Oaks, 5 years, 145 lbs., and Baby, 6 years, 140 lbs., piloted by Mr. Holmes and Mr. Ward. The last was a steeplechase, over the full course, in which the talent got a facer. Felix, an extreme outsider, beat Kittio Clark, Ohio Boy, Bertha, Joe Hunt, Bethune, Victim and Coinage. A fine field and a good race, and a grand finale to those who scratch up the remnants, the mutual pools paying \$70 to each \$5 investment. This brought the Summer meeting to a close.

Between the first and second Summer meetings it was solved to have some extra racing each Wednesday and Saturday. On the 15th, in the inaugural race of a mile and a quarter, Sunday, a three-year-old representative of the Baldwin stable, could only gain the second position—the race being won by that famous old reliable horse, Parole; time, 2:15. The mile and five-eighths was won by Forester, Macbeth second, Volnsca third; time, 2:54. In the three-quarter mile Parthenia won, Inconstant second; time, 1:16½. In the mile and three-eighths Prima won, Monitor second; time, 2:25. In the mile dash Hospodar won, Babcock second; time, 1:43¾. In the three-quarter mile Corsair won, Godiva second; time, 1:19¾. In the steeplechase Ohio Boy won, Felix second; time, 3:18¾.

On Wednesday, the 19th, in the first dash of a mile, Jack of Hearts was the victor, while Constantine and Yorkshire ran a dead heat for second place; time, 1:43½. For the Red Bank stake, three-quarters of a mile, Pizarro and Inconstant ran a dead heat, Renegade third; time, 1:16½. In the mile-and-a-half race Monitor was first, Eole second, Baton Ronze third; time, 2:42. The seven-eighths-of-a-mile race Strathspey won, Constantine second, Hospodar third; time, 1:20¾. The steeplechase over the full course Felix won, Ike Bonham second, Joe Hunt third; time, 3:17.

From the above telegraphic dispatches it would appear as if the California horses were being held in reserve for the second Summer meeting.

On Wednesday, the 12th, the first day of the intervening season, there was a pretty match race, a mile and three furlongs, for a purse of \$500, for all ages, in which Parole, with 112 pounds, beat Aelia with 101 pounds, in 2:26. The next was the Atlantic stakes for two-year-olds, a dash of three-quarters of a mile, that was won in 1:18½ by Pizarro, Renegade second, and a field of nine others. Then came the Raritan stakes, a mile and three furlongs, that was taken by Turco in 2:29, with Macbeth second, Duplex third, and three in the field. The fourth was a handicap of a mile and a quarter, in which Monitor was to the fore, with Jack of Hearts second, and Fair Count third, and six unplaced. The fifth race, a mile and a furlong, for all ages, was won by Dan K. in 1:57, with Strathspey second, Babcock third, and four others, and the hurdle race went to Kitty Clark, with Ohio Boy and Frank Short, second and third.

THE SARATOGA RACES.

Of all the watering places in this country and in Europe, Saratoga holds pre-eminence in the way of racing. The track is beautifully laid out, and within easy access from the Springs. The buildings, although somewhat old fashioned, are large and commodious, and the liberal purses offered attract a large number of horses, principally from the West and South. A few years since the Saratoga meeting was recognized as the most important of the season, all the cracks of the country meeting there in friendly rivalry, and many are the well fought battles that have been seen on its classic grounds; but from the desire to extend the programme from two weeks to two months, thus clashing with the second meeting at Monmouth Park, there has been lately a terrible falling off in the entries, as, from appearances, such patrons of the turf as the Lorillard Brothers, Mr. Belmont, Mr. Withers, and other prominent members of the American Jockey Club, have thrown their influence in favor of the Long Branch track, rather than of that of the queen of watering places. Thus, in the vicinity of New York there are three places where races are held through the two Summer months continuously, Saratoga, Monmouth Park and Brighton Beach, and as to the latter, it would appear as if the meeting lasts from early Spring until late in the Fall. It is not surprising, therefore, that the attendance at Saratoga was light at the opening of the meeting, and the unavoidable absence of some of the best horses made the proceedings somewhat tame in comparison with previous years.

The first race on the opening day, July 11th, was a scramble of five furlongs, for all ages, for a purse of \$400, entrance free, in which there were nine entries, with Fellowship and Bounce great favorites, but Saunterer, a fine

four-year-old son of Leamington and Lemonade, took first honors in 1:06¾.

Then came the most important race of the meeting, the Travers Stake, that in years gone by brought together the best three-year-olds in the country, but the race was shorn of its attractions this season when it became known that both Forester and Runnymede would be forced absentees, on account of the punishing race they had run together the previous week at Long Branch, and at a late hour the Western horse, Apollo, who had beaten Runnymede, was also scratched, leaving a beggarly quartet only to fight out for one of the most valuable stakes in the East. These were Carley B., a great favorite in the betting, Tom Plunkett, Mandamus and Boatman, and the race was a hollow victory for Carley B.

Travers Stakes, for three-year-olds, at \$100 each, half forfeit, with \$1,000 added by the association and \$500 in plate by W. R. Travers; the second to receive \$300 out of the stakes; closed with 56 subscribers, of which 5 were rendered void by the death of H. P. McGrath and E. A. Clabaugh.

Mile and three-quarters.
A. Burnham's blk. g. Carley B., by Virgil, dam Ladylike, 115 lb. (Quantrell) 1
W. L. Cassidy's ch. c. Tom Plunkett, by Glenelg, dam Kate Mattingly, 118 lb. (Murphy) 3
C. Reed's br. c. Mandamus, by John Morgan, dam Duet, 118 lb. (Brophy) 3
M. Young's b. g. Boatman, by Bonnie Scotland, dam Valerian, 115 lb. (Walker) 0
Time—3:28¾.

The Excelsior Sweepstakes came next, a dash of a mile and a quarter, \$50 each, play or pay, with \$1,000 added, that attracted a fine batch of twenty-two entries, but the redoubtable Thora frightened a great many away, and as it was, the betting was limited as to who should get the \$250 that was given to the second horse, Bend Or selling for \$150 against \$110 for Crickmore. The race was altogether between Crickmore and the favorite, but after a pretty close contest down the home-stretch Thora came away and won easily by two lengths in 2:20. The last race was one of those popular selling races, in which owners are allowed to handicap their own horses by placing on them a certain valuation, and it was won by Warfield, an aged horse, entered to be sold for \$1,000, and he came an easy winner in 1:53, only two horses, Explorer and Mattie Rapture, being pitted against him. There was no bid for the winner, and a very tame day's sport was brought to its conclusion.

Following are the telegraph records of the past week:

On July 17th, in the first race, one mile, Ada Glenn was first, Bootjack second, Jennie V. third. Time, 1:12. In the second race, one mile, 500 yards, Warfield was first, Fellowship second, Granger third. Time, 2:13¾. In the third race, five furlongs, Ascender was first, Pearl Thorn second, Blue Grass Belle third. Time, 1:03¾. In the fourth race, three-quarters of a mile, Wapakonette was first, Lute String second, Morgan Spy third. Time, 1:17.

On the 18th, in the first race, one and one-eighth mile, Good Night won, Pinafore second. Time, 1:55¾. In the second race, five furlongs, Miss Woodford won, Tarantella second. Time, 1:03¾. In the third race, one mile, Ben d'Or won, Monogram second. Time, 1:45. In the fourth race, one mile and a half, Boatman won, Mamie Fields second. Time, 2:37¾.

On the 19th, in the first race, five furlongs, Bounce won, Brambleta second. Time, 1:06¾, 1:05¾. In the second race, one and three-fourths miles, Glendelia won, Spark second. Time, 3:12¾.

RACING IN ENGLAND.

From the following cablegram to the *Evening Telegram* of July 8th, it seems that the American two-year-olds are not likely to make any very brilliant running this season. The running of Golden Gate is another proof that the American horses show better over a distance of ground than in the shorter races. Golden Gate won one race last year, the Granby stakes, and ran well in others. He is by King Alfonso from Mollie Ward by Lexington, and was doubtless christened by Mr. Keene from recollections of California life.

LONDON, July 8th.—The Newmarket July meeting was productive of brilliant racing, several of the principal contests having quite an international character. The two-year-old racing was very interesting, the July Stakes and the Chesterfield Plate being won respectively by two of the best youngsters seen out this season—Macheath and Galliard—who both won in a gallant fashion.

Great disappointment was caused by the absence of any worthy American representative for these important races, one of which—the Chesterfield Plate—Iroquois won so cleverly and overshadowed his memorable Derby triumph. Lorillard's two-year-olds are a very moderate lot, I am afraid, and washy looking. The chestnut filly, Touch-me-not, is fast for half a mile only, and the same may be said of Wenonah. Paragraph, Comanche and Massasoit do not make the improvement anticipated, the last named having been withdrawn from the Princess of Wales Cup on Friday because his chances were hopeless even against the moderate lot entered for the race.

We do not hear good accounts of the racing ability of Mr. Keene's two-year-olds. Day, the veteran trainer, advised that none of them should run at all at the July meeting. With a little extra time they may be found in better trim.

Golden Gate ran well for the Summer Cup—one of the longest distance races in England, being over three miles and a half.

The contest was one of the most interesting of the week, and many thousands of pounds were bet on it, Isabel having a slight call over Golden Gate. Fordham and Canuon vied with each other in magnificent riding to literally the last stride. Isabel won by a short head. The enthusiasm was intense.

Clark, the judge, said it was the grandest finish he had ever witnessed. Golden Gate ran so gamely that his chances for the Goodwood Stakes are considerably enhanced, teus being taken freely. His stable companion, General Scott, is engaged in the race at 82 lbs., but is not yet mentioned in the betting.

On the 17th inst. there was an extra day's racing at the track of the Utah Jockey Club of Salt Lake City, the first race being a single dash of a mile for a purse of \$1,500, which was won by Euchre, Belle of the West second. Time—1:45. The second race, a dash of a mile and a quarter, between Pearl Jennings and Maria F., for \$5,000 a side, was won by Pearl Jennings. Time—2:13.

From Portland we learn that the Northwestern District Agricultural Association races at City View Park began on the 19th inst. Lou Spencer won the running race, five-eighths of a mile, for two-year-olds, in 1:05¾, beating Nevella and Rosa A. Blackhawk won the trotting race for three-year-olds, beating Edna J., Charles Albert and Zephone. Best time, 2:59¾.

THE TRACK.

CLOSING OF STAKES AND PURSES.

On the first day of August next, the Stakes of the Pacific Coast Blood-Horse Association, the Embryo Stakes and the purses and stakes at the California Fairs will close.

The advertisements in this paper will give the particulars. Do not forget the date, TUESDAY, AUGUST 1, 1882.

FIXED EVENTS.

Santa Cruz County Fair Association. First annual meeting at Santa Cruz, Aug 15th, 16th, 17th and 18th.
Sonoma County Park Association, at Santa Rosa, Aug. 22d, 23d, 24th, 25th and 26th.
Sonoma and Marin Agricultural Societies. Annual Fair at Petaluma, Aug 29th and four following days.
Golden Gate Fair, to be held at Oakland, from September 4th to the 9th inclusive.
Butte District Fair at Chico, from September 5th to September 8th, inclusive.
El Dorado District Fair at Placerville, from September 5th to September 8th, inclusive.
California State Fair. Annual meeting at Sacramento, from Monday, September 11th to the 16th inclusive.
The San Joaquin Valley Association Fair at Stockton, from September 19th to the 23d inclusive.
Oregon State Fair at Salem, from September 18th and during the week.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 25th to the 30th inclusive.
Humboldt and Mendocino District Fair at Etnoville, September 19th to September 22d, inclusive.
Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th, inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th, inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.

FAIRS AT THE EAST.

Kentucky State Fair at Lexington, August 9th to September 2d inclusive.
Minnesota State Fair at Farmington, August 31st to September 8th inclusive.
Iowa State Fair at Fairfield, September 1st to the 8th inclusive.
Minnesota Agricultural Association, at Minneapolis, September 4th to the 9th inclusive.
Nebraska State Fair, at Omaha, September 11th until the 16th inclusive.
Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.
Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 18th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 18th to the 22d inclusive.
New Jersey State Fair, at Monro, September 18th to the 22d inclusive.
West Virginia Central Fair, at Clarksburg, September 19th to the 21st inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

THE WASHINGTON COUNTY FAIR.

For some time past great preparations have been made at Hillsboro, Or., for the County Fair that opened there on the 3d inst. Although a large number of new stalls had been built, the accommodations were scarcely equal to the demand. So numerous were the number of entries, the purses and stakes were arranged on a very liberal basis. The weather was bright and warm and the attendance large and enthusiastic, all being pleased with the pleasant surroundings and the sport that was offered in the programme. Promptly at 1 o'clock the four following horses were called up for the 2:50 class: James Misner's b. g. Stranger, James Mohr's ch. g. Hector, Henry Smiley's ch. h. General Crook, and the b. m. Maggie Arnold, entered by Jay Beach. The mare was a great favorite, but seemingly was not allowed to show her best paces at first, as Stranger and Crook fought out the two initial heats, with the former a victim on each occasion. The mare then went in and won the race in three successive heats:

Purse \$600, for 2:50 class, mile heats, 3 in 5, in harness.

Jay Beach's b. m. Maggie Arnold	4	4	1	1
J. Misner's b. g. Stranger	1	1	3	4
P. J. Martin's ch. h. Gen. Crook	2	2	2	2
H. P. Isaac's ch. g. Hector	3	3	4	3

Time—2:39½, 2:39½, 2:37, 2:39, 2:40.

The second was a running race of three quarters of a mile, in which the big horse Jim Renwick was the first chosen, owing to his having made this distance in 1:15 at the Bay District this spring, with 112 pounds up, but his owner was not very confident that he would repeat the trick. The entries were Jim Merritt, by Langford from Sweetwater; Joe Howell, by Bonnie Scotland, and Jim Renwick by Joe Hooker. Jim Merritt got the best of the start, but at the turn they were all bunched, and then the leader maintaining his position won a fine race by a neck, amid much excitement:

Purse \$300, \$100 to the second; three-quarters of a mile.

W. G. Scoggin's b. h. Jim Merritt, 5 years, 114 lbs.	1	1	1
C. Mulkey's b. g. Joe Howe, aged, 115 lbs.	1	1	3
A. G. Wood's ch. g. Jim Renwick, 4 years, 104 lbs.	2	2	2

Time—1:17.

On the National holiday the weather was again very propitious, but the track was hard for the running horses, the result again showing the advisability of giving the outer part of the circle a better harrowing, so that advantage might be taken of it by horses who are not quite sound on their pins. The first race was for the 2:30 class, and there were but two entries, Dexter and Milton Merion, the former being a great favorite at almost \$20 to \$10; and he won handsomely in three straight heats.

Purse \$700, for 2:30 class, mile heats, 3 in 5.

Jas. Misner's b. h. Dexter, by Bellfounder	1	1	1
H. Smiley's br. h. Milton Merion	2	2	2

Time—2:30, 2:29½, 2:26½.

The next race was the Novelty Stake for all ages, to run a single dash of a mile, with the purse of \$900 subdivided into three equal parts: \$300 to the first horse ahead at the half-mile, \$300 to the head horse at the three-quarters pole, and \$300 to the first horse under the wire. The entries were the Idaho mare Premium, Fred Collier and Jim Renwick. Premium was first choice for the half mile, Renwick for the three-quarters, and Fred Collier for the mile; so that there was a great diversity of interest in the race. Premium made the running for the half, with Renwick close up; but the mare scored the first honors by a length, and then again put the three-quarters to her credit, when Collier, who had been waiting a little too long, came up with a rush and made a desperate effort for victory, but in vain, the mare winning by a neck, Jim Renwick a poor third.

Novelty Race, running. Purse \$900, \$300 to first at ½, \$300 to first at ¾, \$300 to first at mile.

Mulkey & Marsh's ch. m. Premium, 111 lbs. by Custer, dam Flying Cloud	1
Foster Bros.' h. Connor, 114 lbs. by Norfolk, dam Ada C.	2
Stenlar & Ayers's s. g. Jim Renwick, 105 lbs. by Hooker, dam Big Gun, by Old George	3

Time—1:50 sec.; 1:17; mile, 1:47.

The last race was for two-year-olds, in which Lou Spencer, from the Winters' stable, was a hot favorite, and she took the lead and won cleverly.

Purse \$300, for two-year-olds. Half a mile.		
I. A. Stenlar's b. f. Lou Spencer.....	1	
R. E. Byxbee's ch. f. Ney Allen.....	2	
Foster Brothers' ch. f. Gold Wire.....	3	
Time, 52s.		

On the third day the weather was delightful and the track, roads and grounds were in finer order through a good shower that had fallen during the previous night. The first race was for the 2:35 class, in which were entered Tempest, Pedro and Maggie Arnold, the latter being first choice in the pools at \$20, Tempest bringing \$10 and Pedro \$5. In the first heat Maggie trailed until well into the straight, when she passed Pedro and won cleverly. In the succeeding heat Pedro trotted very steadily and soon had the mare in trouble, for when she found herself out-speeded she broke and thus lost all chance for the race, Pedro winning in three successive heats, Tempest being last on each occasion.

Purse \$300 for the 2:38 class. Mile heats, 3 in 5.		
L. B. Lindsay's blk. g. Pedro.....	2	1
Jay Beach's b. m. Maggie Arnold.....	1	2
H. S. Hogoboom's ch. g. Tempest.....	3	3
Time—2:37½, 2:35, 2:33½, 2:33½.		

The last race of the day was a dash of a mile and a quarter, in which were entered Fred Collier, Joe Howell and Trade Dollar, and in the result there was a great deal of speculation, each one being first choice and favorite in the pools. Howell and Trade Dollar raced together until they had gone three-quarters of a mile, when the latter had shot his bolt, and Fred Collier, who had been making a wasting race of it, moved up and challenging Howell at the distance, beat him out after a fine finish by a short length.

Purse \$400, for all ages. One mile and a quarter.		
W. M. Ayers' ch. g. Fred. Collier, by Joe Hooker—Puss by Norfolk, 4 yrs.....	1	
Cy. Mulkey's b. g. Bowers, by Bonnie Scotland—Etta Shipper by Sovereign, aged.....	2	
Jerome Porter's ch. m. Trade Dollar, by Norfolk—Eva Ashton, 6 yrs.....	3	
Time, 2:13½.		

Fred Collier was looked upon here as one of our best racers last year, and at one time was first favorite in the Pacific Cup, but getting badly beaten at the same distance in the Coutts' Stake, won by Atalanta in 2:11, on the first day of the Spring meeting in this city, he did not start again, and his trainer, A. J. Stenlar, deserves credit for getting him again in condition at so short an interval. This fine race concluded the day's programme.

On the fourth day the weather was pleasant and the attendance good, exceeding in numbers that of the previous day. The first race was a trot for three-year-olds, which resulted in an easy victory for Edna J., Sheriff being the only other starter of the four entries that remained to the end. The time was slow, but this was easily accounted for by the fact that it was late in the season before the horses went into training. Before the campaign is over they will make a better account of themselves.

Trotting race for three-year-olds, 3 in 5, to harness; purse \$300—\$200, \$70, \$30.		
E. J. Jeffrey's br. f. Edna J., by Kisher, dam Fly-by-Night.....	1	2
Jos. Buchtel's b. c. Sheriff, by Kisher, dam by Red Buck.....	2	1
L. B. Lindsay's br. f. Jane L., by Hambletonian, Mambrino, dam Mollie Welch.....	dist.	
John Pender's b. f. May Wintler, by Rockwood, dam by St. Louis.....	dist.	
Time—3:05, 3:14, 3:11, 3:12.		

The second race was a half mile dash, in which Lulu Riggs was a great favorite, and she won quite easily.

Running race, free for all Oregon, Washington and Idaho bred horses—purse \$300—a half-mile dash.		
Foster Bros.' ch. m. Lulu Riggs, by Humboldt.....	1	
W. Heffer's b. g. Honest John, by Dr. Lindsay.....	2	
Matt White's s. g. Tabago.....	3	
R. S. Perkins' b. m. Mayflower, by Luther.....	4	
Glenger & Son's g. g., by son of Old Dan.....	5	
Time—51½.		

On the concluding day the principal event was a mile and repeat race, in which were entered Joe Howell, Connor and Trade Dollar; the former selling for \$20 against \$15 for the others combined. The two heats were very similar, Joe Howell running well within himself and winning handily on each occasion.

Running mile and repeat, free for all; purse \$300—\$250, \$50.		
Mulkey & Marsh's b. g. Joe Howell, aged, by Imp. Bonnie Scotland.....	1	1
Foster Bros.' ch. h. Connor, 5, by Norfolk.....	2	2
J. A. Porter's ch. m. Trade Dollar, aged, by Norfolk.....	3	3
Time—1:45½, 1:46½.		

The consolation purse did not fill, and the officers offered a special purse of \$200, so as to eke out the day's amusement. The entries were Tempest, Nellie Russell, Hector and Oleander. The latter was found to be lame and was withdrawn, and Nellie Russell being distanced in the first heat, the contest was restricted to the two horses, which was won by the favorite, Tempest.

Special purse, trotting, 3 in 5, purse \$200—\$150, \$50.		
H. S. Hogoboom's h. g. Tempest, aged, by Bellefounder.....	1	2
J. W. Morh's ch. g. Hector, aged, by Billy Wilson.....	2	1
Mr. Crow's b. m. Nellie Russell, 5, by Bellefounder.....	dist.	
Time—2:45, 2:45 2:39, 2:39½.		

There was a fine display of stock, to which we will refer more fully in a later issue, and a Ladies' Riding Tournament, in which Mrs. J. W. Scroggin won the first, Miss Jane Imbrie the second, and Miss Laura Fowler the third purse. Barring a heavy shower, the proceedings of the Washington County Fair were brought to a satisfactory conclusion, the financial result showing a balance of about \$1,000 to the good side of the ledger. This fact may safely be attributed to the skill and energy shown by the Executive Officers of the Washington County Agricultural Society.

THE CHICAGO TROTTING MEETING.

This meeting has created great interest in turf circles from the fine purses given, as also for the special inducements offered for a fine display of speed by such noted horses as St. Julien, Trinket, Little Brown Jug and Phil Thompson, while it was well known that in the several classes there were certain horses of the dark division who, at their first appearance, would earn a most enviable repute. On July 15th, the opening day, the weather was warm, but cloudy, the track was in good condition, and the attendance fair in numbers. The first on the card was the three-year-old colt race of \$1,500, in which, of the original seven entries, there were but four that put in an appearance—Garfield, Butterfly, Code and Eva. The latter, the own sister to Sweetheart, was made a favorite on the faith of some telling private trials, but unfortunately she came into an unavoidable collision with Code in the first heat that entirely destroyed her chances in the race, for although the judges, under the rules, placed her on the outside when she was beyond the flag, the filly is of so excitable a disposition, that afterwards, despite Orrin Hickock's efforts, she could not make her undoubted speed tell in the final result. Code won in three straight heats, in 2:31½, 2:33 and 2:31, which, in the way of time, is no great showing for the winner, who

has been cracked up as the fleetest youngster of his age at the East. Eva took the second money, Butterfly third, and Garfield was distanced. In the next race, for \$1,500, four-year-olds and under, there were twelve entries and five starters, and some very good trotting and exceedingly close finishes. The race resulted in favor of Waiting, Bronze second, Jayeye-See third, Jim Bowman fourth, and Adelaide fifth. The time was 2:28¼, 2:25½, 2:25½, 2:26½, 2:22¼, 2:23½ and 2:30, showing among them a speed and endurance that stamp the leading horses as fit aspirants of the free-for-all class when their powers are more fully matured. The pacing wonder, Little Brown Jug, then tried to beat 2:11¼ for a special purse of \$2,000, with \$500 extra if he reduced his record to 2:10¼. He made the first heat in 2:15, the second in 2:22, with a bad break at the five-furlong pole, and repeated 2:15 in the third. The season is as yet too early for these wonderful exhibitions of speed.

The meeting was continued on Monday with the 2:23 class, for a purse of \$2,500, in which there were originally ten entries. Buzz Medium was the favorite, but he was nowhere in the race, as it was won in an easy manner by Minnie R., who would have gained the prize in three straight heats but that in the second she broke badly and only gained third position, Tariff winning that heat and second money, Unalala third and Buzz Medium fourth. Time—2:18, 2:20¼, 2:19½, 2:20. The second race was open to all stallions, for a purse of \$5,000, with \$1,000 extra to beat 2:15¼. Von Arnim, the favorite, won in straight heats, though Monroe Chief trotted to a head in the first and third, and was only beaten a length in the second, J. B. Thomas being third and Voltaire last on each occasion. Summary: Von Arnim, 1, 1, 1; Monroe Chief, 2, 2, 2; J. B. Thomas, 3, 3, 3; Voltaire, 4, 4, 4. Time—2:30, 2:20¼, 2:20. Distance was waived in this race. The last race was the 2:35 class, in which there were originally thirty entries. It was admirably contested, Walnut taking the two first heats, Clara Cleveland the third and Hardcastle the fourth, when proceedings were postponed by darkness, and on the succeeding day there were three more heats trotted before Clara was declared the victor, Hardwood second, Rigolette, King Wilkens, Mand T. and Defender ruled out for not winning one heat in five, and Walnut distanced. Time—2:23¼, 2:24¼, 2:27, 2:27¼, 2:23¼, 2:24¼, 2:23.

On Tuesday the first race on the programme was the 2:25 class, for a purse of \$2,000, with \$500 extra to beat 2:22. Rosa Wilkes was the winner in three straight heats; Forest Queen second, Early Rose third, Big Soap fourth money. Time—2:20¼, 2:18¾, 2:20¼. The third race was open to all pacers; purse \$2,500, with \$500 extra to beat 2:11¼. There were six heats, and Bay Billy won the last three; Buffalo Girl second, Mattie Hunter third. Time—2:14¼, 2:14½, 2:15¾, 2:18, 2:20½, 2:21¼. The fourth race was the 2:30 class, for a purse of \$2,000, with \$500 extra to beat 2:22. Mattie Graham took the first, second and fourth heats, Bliss second, Mag third, Red Cross fourth. Time—2:21½, 2:21¼, 2:21½, 2:23½.

On July 12th, at Sioux City, Iowa, there was a large attendance at the track to witness the match between R. T. Krebs's b. s. Elthwood Chief and John T. Fisher's b. m. Hampton Girl. The match was two-mile heats, best three in five, for a purse of \$2,000. The Chief won easily in three straight heats. Time, 5:32½, 5:28½, 5:32. Great interest was felt in the race, and probably \$10,000 changed hands on the result. The Girl disappointed her friends, while the Chief fully retrieved himself from the suspicion that he was not a stayer.

On the Wednesday day was cloudy and cool and the track fast. The first race was the 2:27 class, for a purse of \$2,000, with \$500 extra to beat 2:21. It was won easily by Jerome Eddy, who had greater speed than any of the others, and only lost the first heat because of a bad break. Mattie Graham took second money; Aldene third; Largesse fourth; Catchfly and Naad Queen distanced. Time, 2:21¼, 2:22, 2:21, 2:23¼. There was to have been a special handicap race between St. Julien and Trinket for a purse of \$5,000, but unfortunately the King of the Turf has of late been slightly off, and during his stay at Point Breeze he was only indulged with slight exercise. It is now reported that his ailment is of a more serious character, and that he will not be able to make an appearance before some weeks have elapsed. This is a serious loss as special large purses had been arranged for these pair, all through the circuit. In his absence a special purse of \$1,000 was offered to Phil Thompson, in three trials, \$500 extra to beat 2:19¼, and \$500 additional to beat 2:17¼. The colt was evidently out of form. At the first trial he broke at the first turn and did not go around. At the second attempt he broke again and did the time in 2:36¼. In the third trial he trotted, without breaking, but could do no better than 2:23½. C. H. Raymond of New York, his owner, who was present to see him trot, stated that on the previous Thursday he showed a mile in 2:13. The third race was the 2:21 class, for a purse of \$2,500, with \$500 to beat 2:17¼. It was a struggle throughout between Black Cloud, William H., Unalala and Scott's Thomas, all the heats being finely contested and the finishing close and exciting. Summary—Black Cloud 1, William H. 2, Scott's Thomas 3, Unalala 4, Pilot R. 5, Annie Robinson 6. Time—2:20½, 2:18½, 2:19¼, 2:21½.

PITTSBURGH RACES.

The Summer meeting of the Pittsburgh Driving Park commenced on July 11th. The attendance was fair, the weather fine, and the track good. The first race was for a purse of \$1,500, with the following result:

King Wilkes.....	1	5	1
Rutie Neville.....	2	2	5
Fannie Irwin.....	3	3	3
Hotspur Chief.....	4	1	dis.
Mattie H.....	5	4	4
Time—2:26½, 2:29, 2:26½, 2:28½.			

The second race, 2:23 class, was for a purse of \$2,000:

Buzz Medium.....	1	1	1
Unalala.....	2	2	2
Mattie Graham.....	3	5	4
Abdallah Boy.....	4	4	3
J. Witt.....	5	5	5
Bliss.....	6	6	6
Time—2:20½, 2:20½, 2:22.			

Th esecond day, on the 12th, the attendance was fair, the weather fine, and the track in first-class condition. The first race was for the 2:29 class; purse, \$1,500:

Young Fullerton.....	3	1	1
Largesse.....	1	2	4
Dick Organ.....	2	4	3
Mercutio.....	4	3	5
Effie G.....	5	5	2
Walter.....	6	6	7
Kate Taylor.....	7	7	5
Time—2:25, 2:23, 2:25, 2:24.			

Second race, free-for-all, pacing; purse, \$1,500:

Lucy.....	4	2	1	3	1
Mattie Hunter.....	2	1	4	2	1
Ben Hamilton.....	1	4	3	3	2
Charley H.....	3	3	2	4	4
Time—2:13, 2:15½, 2:17½, 2:15½, 2:13½, 2:20.					

A SUNDAY MORNING AT FLEETWOOD.

[N. Y. Herald, July 10th.]

Yesterday morning was one of unusual interest at the grounds of the Gentlemen's Driving Association. A large number of gentlemen who enjoy a Summer morning's drive and take an interest in trotting matters assembled and were well repaid for their trouble in witnessing the numerous and very creditable performances which took place. Among the number we noticed Messrs. S. Kuapp, Phyfe, Bailey, Barron, Stillings, I. Cohufeld, Lange, Lichtenstein, Humphreyville, Ridabock, Riley, Waite, Parker, Madden, Barnett, Jones, Chandler, Brown and many others.

It was a lovely morning, and a southerly breeze swept the broad piazza of the club house and tempered the somewhat too ardent sun. The first to appear, with John Murphy behind him, was Mr. S. Lichtenstein's bay gelding, by Waldo, a son of Messenger Duroc, dam Effie Deans. This horse has no record, but left a mile behind him in grand style in 2:25¼.

Mr. Nathan Stranss drove the Boston horse Joe Ripley (record 2:25) a half mile in 1:09½, and another half later in 1:12¼.

Mr. Isidor Cohnfeld drove his bay road team a half in 1:17, and a repeat in 1:18¼. That is a very improving team, and are matched to trot a mile within a week in 2:39.

John Murphy drove Gabe Case's horse Big Fellow (record 2:26) a mile in 2:29, and, keeping right on, another half in 1:10¼.

Then the same driver appeared behind the chestnut mare Helene—Mr. Cohnfeld's late purchase—and going down to the half-mile pole in 1:07½, to the three-quarters in 1:43, finished the mile in 2:19½ in an easy and creditable manner, with her long, daisy cutting stroke playing like the piston rod of a locomotive. This performance elicited hearty applause and caused the ordering and drinking of several bottles in hearty congratulation to Helene's owner.

Still Murphy came again, this time behind a black mare and running mate. Watches held on them, and they made the mile in 2:21¼.

Mr. J. D. Brown's bay mare Lady Allen, by a son of old Ethan, driven by Cleveland, a very clever driver, trotted a half mile in 1:11¼.

Murphy then put his runner beside Mr. Matthew Riley's bay mare Silver, and they made the half mile in 1:12¼ and the mile in 2:26¼. A very nice performance for a horse off the road and made without a skip on the part of the mare.

The figures 2:23 hung out on the blackboard of the judge's stand for Mr. Frank Work's performance of Saturday, when he drove his team in that time. It was done to an open road wagon.

Mr. Madden brought out a green mare from Northampton county, Pa., a few days ago, and she trotted a mile in 2:25, the half in 1:10, driven by a country lad to fame unknown.

Rowdy Boy, the pacer—record 2:13¼—showed some fast work through the stretches.

The stallion Clara Bassett appeared on the track, and Jimmy Stewart drove Palma and several others, who showed well.

Mr. A. R. Phyfe drove his Startle gelding, dam Jessie Kirk, which can trot in about 2:30.

John Rogers, John Moore and Cleveland showed up some fast stock which they have in training.

Mr. Strant drove his black mare Lady Emma, one of the best road horses in New York, and can trot in 2:25 when called on.

The final was a race of great interest, being the slowest ever trotted over Fleetwood Park. Mr. G. C. Barnett drove the black mare K. P., a half mile to top wagon in 2:04 for a bottle of wine. This performance provoked another wager of the same nature, and Mr. George Jones getting behind the mare drove her without a break a half mile in 1:57¼. This was conceded to be the performance of the day, as it was supposed by those interested and looking on that the mare came to a dead stop several times, she went so slowly. The track was in good condition.

The veteran Judge Fullerton seemed in good fettle; also the great two-mile gray gelding Steve Maxwell, who is as fine as silk and faster than he ever was.

All present left the track highly pleased with the impromptu performances they had witnessed.

REPLY TO THE CHALLENGE OF M. W. HICKS.

EDITOR BREEDER AND SPORTSMAN: I notice in your issue of the 8th instant Mr. M. W. Hicks' challenge to trot a yearling, a two-year-old, a three-year-old, and a mature horse of his breeding, against like classes bred under my charge. In reply, I would like to accept his challenge, but have no stock to meet the requirement. Mr. Haggins has not been breeding trotting stock until within the last year. Echo was purchased by him in the fall of 1880, and placed under my charge at Rancho del Paso. His colts are therefore only sucklings. Algona was purchased this spring for Rancho del Paso, and his colts have not yet come. But if Mr. Hicks wants to compete with any of this stock he will find plenty of the get of Echo already on the track, belonging to other parties, and he can no doubt get plenty of races against them. Algona, too, has a few that are entered at Stockton and elsewhere, and competition with them is doubtless open to him. He will have full opportunity of proving whether his stock are all *duffers* or not, and when he does prove it I shall be as ready as any one to acknowledge it. JOHN MACKAY.

Rancho del Paso, July 11, 1882.

H. D. McKinney, of Janesville, Wis., has bought the Messenger filly Bronze, which won the third and fourth heats in the four-year-old race on the first day of the Chicago meeting, for \$7,500. It is stated that Robert Bonner was negotiating for her by telegraph, offering \$15,000. Horsemen pronounce her the best four-year-old of the year, but she has yet to meet such horses as Sweetheart and Phil Thompson.

CLINGSTONE.—At the conclusion of his race in the 2:19 class at Chicago, on Thursday last, which he won in three heats in 2:17, 2:18 and 2:20, his owner, Mr. Gordon, offered to match him against any horse in the world for \$5,000 a side. This is a rare chance for our princes of the turf.

ATHLETICS.

THE OLYMPIC CLUB GAMES.

The Olympic Athletic Club games, which take place at their grounds in Oakland to-day, promise a good afternoon's entertainment to all lovers of out-door sports. The entries for the events are not restricted to members of the Club, and include several outsiders of much promise. All the events being handicaps, the wise ones are unable to pick the winners, and close, well contested finishes will probably be the order of the day. R. S. Haley, the most prominent sprinter of the O. A. C., is entered in the 100 and 440 yards events. Having been out of training since last November, he is not up to his best form, and will need to put his best foot forward to maintain his past reputation. He undoubtedly has speed, but has been in poor health for some time, has had little preparation for the events, and lacks strength for a hard finish. Haley is anxious to compete with H. S. Brooks, who defeated Myers, the American amateur champion, at the championship meeting last month, but will need to take good care of himself if he expects to defeat Brooks before the end of his vacation. A match between the two would be the most interesting event of the season, and Haley's friends are confident that three or four more weeks' training will enable him to represent the Club against all comers. Much improvement is noticed in several other members, and before the season is over the Club will probably develop more than one 10 $\frac{1}{4}$ second sprinter. Since Thursday the grounds have been closed for the purpose of putting the track in first-class condition, and if the day is pleasant, the events will be well worth the attendance of all lovers of athletics. The bicycle events, of which there are several, are also handicaps, and will excite the enthusiasm of all who witness the two-mile contest, in which the best wheelmen of the coast are entered. Games will be called promptly at 2:45 p. m., and from the Grand Stand an unobstructed view will be obtained of all events, as the officers make it a point to keep the inner grounds clear of a crowd. The admittance at the gate is a nominal sum of twenty-five cents for gentlemen, for the purpose of defraying the expenses of the meeting, and no charge will be made for ladies. To witness the first event, it will be necessary to take the 2 p. m. Oakland boat, and all the events will be finished in time to take an early return boat for dinner in the city.

The following is the order of events, with list of entries and handicaps: 1.—One mile handicap and bicycle race—1. J. C. Quinn, scratch; 2. J. H. Spring, 40 yards; 3. C. Burkhalter, 70 yards; 4. W. C. Lowden, 82 yards. 2.—100 yards handicap run; trial heats; first trial heat—5. R. S. Haley, scratch; 6. D. Eisenman, 10 yards; 7. Arthur Harris, 11 yards; 8. Joseph Green, 11 yards. 3.—Second trial heat—9. E. S. Emmons, 6 yards; 10. W. C. Brown, 7 yards; 11. D. B. M. Woolley, 9 yards; 12. J. H. Anderson, 11. 4.—880 yards handicap bicycle race—13. C. L. Leonard, scratch; 2. J. H. Spring, scratch; 15. R. F. Verrinder, 40 yards. 5.—100 yards handicap run; final heat. 6.—Two-mile handicap bicycle race—16. H. C. Finkler, scratch; 1. J. C. Quinn, 140 yards; 17. G. L. King, 180 yards; 4. W. H. Lowden, 310 yards; 3. C. Burkhalter, 310 yards. 7.—440 yards handicap run—5. R. S. Haley, scratch; 10. W. C. Brown, 22 yards; 7. Arthur Harris, 40 yards; 6. D. Eisenman, 37 yards; 11. D. B. M. Woolley, 37 yards; 18. Harry Germain, 45 yards; 12. J. H. Anderson, 55 yards.

QUEER TIMING.—The London *Athletic Review* states: "We are continually being questioned, both verbally and by letter, as to the time made by George at the intermediate distances in his great mile performance. As what is now printed in athletic and sporting papers will, in future times, be consulted as authoritative statements, it is well to have everything as clearly set out as possible. The official time-keeper was Jack White, whom every one knows as a man who, on all occasions, conscientiously does his best, whatever the capacity he is called upon to fill. The representatives of the press within the enclosure, who also timed the race, were three in number. Watch 1 marks eighths, and is stopped and started by an arrangement in which we, speaking with some knowledge of horological mechanism, have not a very strong faith, and we do not here quote it. The two other watches mark fifths, and we believe are, in themselves, quite trustworthy. The holder of watch 2 is a man who has, probably, as much practice at foot-race timing as any man in England, and we would as soon trust him as anybody. The official watch we know nothing about, except that it was borrowed for the occasion—a circumstance in no way very likely to strengthen confidence in its rate of going. This watch was only used for timing the full distance. The quarter mile was not taken, but the first lap was registered by watch No. 2 as 1m. 17 $\frac{1}{2}$ s., and by watch No. 3 as 1m. 17s., the time being read off the dial. The position of the half mile starting post cannot be accurately seen from the finish, some 150 yards distant, so that the times (watch No. 2, 2m. 4 $\frac{1}{2}$ s., watch No. 3, 2m. 3 $\frac{2}{5}$ s.) are only valuable as showing that half the distance was run inside 2m. 5s. The second lap (two-thirds of a mile) was given by watch No. 2 as 2m. 45 $\frac{1}{2}$ s., and by watch No. 3 as 2m. 45s.

"The watch-holders were a hundred yards or so away from the quarter-mile post, so the three-quarters was not taken with any greater accuracy than was the half. This was given by watch No. 2 as 3m. 8 $\frac{1}{2}$ s., and by the same allowance as with the half, and say that it was done in about 3m. 9s. As this three-quarter mile time is so astonishingly in advance of anything else that has ever been done previously, it should command our serious attention and investigation. As it happens, the more we go into figures the more we become convinced that the watches were only a little out. Up to the conclusion of the second lap George had been traveling at the rate of 7 yards (7 yards and 4 inches, to be correct) per second. The difference between two-thirds of a mile and three-quarters is 146 yards 2 feet, and this distance, at 7 yards per second, George would have covered in an inappreciable shade inside 21s., which taking the longest time given for two laps, 2m. 45 $\frac{1}{2}$ s., would make his three-quarter mile time 3m. 6 $\frac{1}{2}$ s. The watches show that he was actually some two seconds longer, which is exactly in accordance with the natural slackening of pace that would occur after two such laps. We must also remember that everything we add on to the time of the three-quarter we have to deduct from the last quarter. Taking it at 8m. 9s., we only allow the faded runner 70 4-5s. for his last race, 440 yards; and all who saw the performance know in which half of the race the pace was made. We, ourselves, unhesitatingly say that the half was done inside

2m. 5s., and the three-quarters inside 3m. 9s.; but we think no one will have the temerity to say, to a fifth of a second, what the exact time was. As regards the full time of the mile, we feel inclined to accept that given by watch No. 2, viz, 4m. 19 4-5c."

ROWING.

BREEDER AND SPORTSMAN'S ROWING CUP.

Although within the past year a number of races between the various Rowing Clubs have taken place, it is still an open question which Club is entitled to consider itself the holder of the Championship. The Pioneer Club, by its victories, under the rules of the Pacific Amateur Rowing Association, and its possession of the McKinley Cup, is undoubtedly the holder of the Amateur Championship. With the dissolution of the Amateur Association, however, the title which the Pioneer Club can justly claim has lost much of its value. All the important races rowed during the past year were professional contests for money. None of them, however, could be considered as deciding the Championship, and were, in fact, nothing more than ordinary match races in specified classes of boats. The Golden Gate Club, for example, beat the South End Club, but the contest took place in barges, and it was stipulated that only that class of boat should be used in the competition. The arrangements have been similar in other races. There have been lapstreak contests, barge races, etc., but no genuine competition in best boats for the Championship of the Pacific Coast. Under these circumstances any club can lay claims to superiority, and several of them do with some show of justice. Desiring to settle the matter in the only formal manner, the BREEDER AND SPORTSMAN will offer a valuable trophy, to be known as the BREEDER AND SPORTSMAN CUP, and the possession of which will carry with it the championship of the Pacific Coast. The contest for the cup shall take place in best boats, and the trophy must be won twice before it can become the property of any club. The first competition shall take place on Thanksgiving Day, and the only stipulation made by the donor of the trophy is that at least three clubs shall be represented. Out of the large number of rowing clubs on the Bay, as well as in the State, three entries for a really valuable cup would not be large. On this score, however, there is not any probability of trouble, as at least four clubs profess anxiety to settle the question of superiority, and need only the opportunity to decide it. Between this date and Thanksgiving Day there will be ample time for all clubs to prepare crews and boats for the contest, which should prove close and exciting.

The desire of the donor of the trophy is that the victorious Club may earn its laurels only after a stubborn contest, and that the best crew may be to the front at the finish. Having no other interest than the promotion of a manly sport and the furtherance of fair play, the BREEDER AND SPORTSMAN shall take pains to make the race such a fair competition that the result must be accepted by oarsmen as an evidence of true merit. The length of the course and the appointment of officials are matters for future discussion. All that is necessary at present is to announce that the BREEDER AND SPORTSMAN CUP will be the most valuable trophy ever offered for an out-door sport in San Francisco, and the donor has no fears that the contest will do credit to the competitors.

THE FLYNN-STEVENSON MATCH.

The race between Leander Stevenson of the Ariel Club and Thomas Flynn of the Pioneer Club took place Sunday morning, over the Long Bridge course, and contrary to expectation ended very tamely. The race was to have been rowed at an early hour on smooth water, but the usual delay in placing stakeboats occurred, and the breeze was blowing freshly across the course before the men got into position. Stevenson won the choice of stations and of course took the inside. After a few attempts the men were sent off, Flynn catching the water first. There was little change in the positions of the men until the first quarter had been covered, when Flynn began to draw away from his opponent and soon had a length the advantage. Immediately after, however, the Pioneer man got into serious difficulties in the rough water and fell a length behind. Leaving the stakeboats, the men were again on about even terms, but again misfortune attended the Pioneer man whose boat instead of being forty yards from the other as prescribed by the articles was fully eighty yards out in the stream. Stevenson made a good turn and shot inshore into the smooth water at once, while his opponent turned widely and rowing with the full force of the flood tide, which was running like a millrace, lost at every stroke. Coming back again through the stretch of rough water below the Rolling Mills, Flynn got into difficulties once more, and was beaten with great ease. The time for the race, 17 min. 43 $\frac{1}{2}$ sec., was slow enough to have been made in wherries. Flynn's friends attribute his defeat to the position of his stakeboat. Nearly every man who gets the inside station on the Long Bridge course wins with comparative ease, and so often has this been demonstrated that scullers who know the eccentricities of the course are opposed to racing over it for money. It is likely, however, that Flynn's failure was due as much to his lack of preparation as to the position of his stakeboat. He had been very careless in his training, while his opponent attended strictly to his preparation for some weeks. The result was that the Pioneer was after making the pace for a mile did not have enough left to combat with any disadvantages of rough water, and had to give way.

A CONTRAST OF STYLES.—The late race between Harvard and Yale was remarkable for more than the fast time of 20 min. 47 $\frac{1}{2}$ sec. in which the four miles were made. The styles of the crews and the rig of the boats afforded a strong contrast. Yale used a Spanish cedar boat ten feet longer than the Harvard craft. Her dimensions were 66 feet long, 23 $\frac{1}{4}$ inches beam, 9 inches depth. The crew were seated in pairs, the bow oar being well up toward the stern of the craft, and the diminutive coxswain seated near the stern. The Harvard men were distributed in the old fashioned way. Both boats were fitted with swivel rowlocks. Harvard used 12-foot oars with 6 $\frac{1}{2}$ -inch blades, and Yale 11-foot 6-inch oars, with crooked blades 7 inches wide. The difference between the strokes of the crews was also marked. Harvard adopted a long, steady swing, dipping its

oars deep into the water with almost monotonous regularity, using legs, arms and backs in about equal proportion—in fact, bringing into play nearly every set of muscles, and sending its frail craft dancing along like a fairy by the side of its more bulky antagonist. Yale, sitting almost bolt upright at each recovery from the rapid rush forward, dishing out the water with its broad oar blades, dipping the latter so frequently that it was difficult to count the strokes with exactitude; using legs and arms for all the power that could be got out of them, letting backs take care of themselves. Yale led for the first mile, when the crew got in difficulties and Harvard forged past and gained a commanding lead of 100 yards on the second mile. Yale then worked its way out of the slack water into the strong current, and gradually closing the gap, finished within three seconds of the remarkable time of the Harvard boat.

THE PERENNIAL PLAISTED.—Plaisted, formerly of San Francisco, and lately the factotum of Hunlon, has a very poor opinion of Wm. Elliott, the ex-champion of England, who was beaten so badly by the Toronto sculler. In a recent talk with the *Boston Herald* aquatic writer, Plaisted gave vent to the following: "What is Elliott shooting himself off about? He comes over here from England and challenges Johnson, Hosmer and Riley, and they don't say anything to him. What's the matter with them? Elliott has no license with them. Why, I don't call myself as good as Hosmer or Jim, but I'll row Elliott. He comes over here and gives us all bluff; but I think he can be beaten by a 'duffer.' That's what they call me at Creve Coeur Lake, where Trickett beat me. Now, Elliott challenges Riley and Hosmer, but he doesn't say anything to me, and although they say I'm a duffer, I'll row Elliott for \$500 or \$1,000 a side, and I'll give him expenses to row at Toronto, or I'll take expenses to row at New York. The idea of challenging poor, sick Frenchy. I'll give Elliott all the racing he wants, and I'll put up dollar for dollar with him."

ENGLISH SNOBBISHNESS REBUCKED.—The London *Sportsman*, the *Athletic News*, the London *Referee*, and other independent sporting journals, condemn in unqualified terms the action of the Henley, Steward and other regatta committees that have debarred the Hillsdale crew from competition. The *Athletic News* says: "The Hillsdales are represented as young men of irreproachable character and antecedents, the *bona fides* of whose amateurship is unimpeachable; why, therefore, should they be deprived of the privilege for which they are prepared to sacrifice so much of their time, money and convenience? The answer that will be given to this question, both in England and America, is likely to be that these blue-blooded young gentlemen of the Thames are afraid of their Transatlantic rivals. Time was when Englishmen liked nothing better than to meet and overcome all foreign rivalry in everything relating to manly sports and exercises; but that appears to be fast becoming nothing more than a legend among the supercilious snobs who now represent the country which erstwhile claimed to be the nursing mother of heroes."

HANLON'S MOVEMENTS.—It is impossible to judge from the various newspaper reports what the champion sculler of the world intends to do professionally this year. The telegraph describes him issuing challenges to row any five men in the world, and Ross accepting the bait and modestly announcing his willingness to take the entire contract himself. It is not likely, however, that Hanlon will row any races before next year. Ross will soon go to Europe, and the champion is likely to come to California and proceed to Australia for the benefit of his health. Hanlon was taken sick while returning from New York to Toronto after his European trip. On his arrival in Toronto he was taken to his home in a feverish condition, and then for the first time learned that his young daughter was dead. Immediately after his arrival home, Dr. McFarland was sent for and an examination was made, when it was found that he was suffering from typhoid fever. During sickness he was reduced to 132 pounds, having lost 46 pounds. At times he was delirious, and nurses were in constant attendance.

THE PACIFIC COAST CHAMPIONSHIP.—The Fourth of July Regatta at Long Bridge having demonstrated the superior powers of young Peterson as an oarsman, his friends are now talking of a match with Austin Stevenson, the present holder of the Pacific Coast Championship. It is not likely that Stevenson will throw any obstacles in the way of a match, as he has been for some time looking for a race with Cotford of British Columbia. Peterson is as yet untried over a long course, but he possesses great strength and good pace, and should be a formidable competitor at any distance. His friends would rather try him at two miles, but when it comes to putting up the money it is not likely that they will let the match fall through for the sake of an additional mile to the course. Peterson is rather young, being not yet 19 years of age, while Stevenson is 26, and has the experience which only hard races can bring.

BOYD'S DEFEAT.—The scullers' match arranged some time ago between Elias C. Laycock, of Sydney, N. S. W., and Robert W. Boyd of Middlesbrough, England, for one thousand dollars a side, was decided over a course of three miles and a half, straightaway, on the Tees, England, on Monday, July 3d. Several thousand persons arrived in town by excursion trains to witness the race. The weather was fine and the water in good condition. The betting before the race was six to four on Boyd. After the first two hundred yards it became manifest that Laycock would be the winner. At half the distance he was leading by six lengths, and he finished twelve lengths ahead. The winner was thirty-six years of age last May, stands 6 feet 2 inches in height, and his weight in condition is about 177 pounds. Boyd was born September 20, 1854.

GRIFFIN AND WATKINS.—These scullers are determined to settle the dispute as to superiority which in the opinion of their friends was left undecided by the Fourth of July regatta. The course on that occasion was short, and no doubt Griffin profited much by the inside station. The race home between the men was close and gamely contested, and it seemed as if Griffin displayed the best staying powers. He certainly showed the best form. Watkins had the advantage in boats and was in good fix. When the men meet under the more even conditions of a match race they may be expected to give an interesting exhibition. The race will be for \$500 a side and will take place at Saucelle. Griffin will use the new paper boat which White procured from Waters & Co. of New York, and which seems to suit him admirably.

WILLAMETTE ANNUAL BOAT RACE.—Friday, July 7th, being the date for the annual regatta of the Willamette

Rowing Club, quite a crowd visited the starting point, while a number of boats were in the river filled with spectators. About 7:30 the Vida struck out with a regular and slow stroke; 2 minutes and 20 seconds later the Cressid slid out, the crew pulling in fine style; 40 seconds later the Willamette glided away at a rapid and quick stroke, which paid well on the start, but counted against the paper shell on the outcome. The barge Vida led all the way, and any and all attempts to pass her were fruitless. The time occupied in going the two miles was as follows: Vida, 16:3; Cressid, 13:58; Willamette, 14:28. T. N. Dunbar won the single scull race by half a length, defeating J. S. Dunbar and J. Hart; time 7:59.—*Rural Spirit, Portland, Or.*

THE BOSTON REGATTA.—The Professional Scullers' Race on the Charles River, Boston, July 4, ended in the defeat of some old favorites. George W. Lee, of Newark, New Jersey, was the winner of the first prize, \$150, and A. Hamm, of Halifax, won the second prize of \$75. The other starters were: James H. Riley, of Saratoga; Fred A. Plaisted, of Toronto; George H. Hosmer, of Boston; and P. H. Conley, of Halifax. The Halifax Rowing Association preferred to win with Hamm, and Conley understood that he was not to force the pace, but was to hold for the double-scull race. Lee won in 20 min. 48 sec.; Hamm second, in 21 min. 17 sec.; Conley third, in 22 min. 23 sec.; Plaisted and Riley even for fourth position, and Hosmer sixth.

COLUMBIA'S EASY VICTORY.—Referee R. C. Watson has decided that the Harvard crew, by refusing to row the Columbia crew on July 3d, at New London, lost the match. Mr. Watson, in a letter to the Captain of the Columbia crew, says: "The original agreement was that the race should be rowed upon a fair ebb tide—that is, when the tide has run out for at least two hours. The tide was high July 3d at noon, and in requesting Harvard to row at 2 P. M. you were simply asking to have the agreement carried out. Moreover, the challenge sent by you and accepted by Harvard stipulated that the time of the race should be 'mutually agreed' upon, and neither party had any right to insist upon any particular hour, and, in refusing to compromise, Harvard assumed a position which was not in accordance with the agreement."

Elliott declines to row Courtney, for he says: "The American people consider Courtney as good as Hanlon, and the latter gentleman outrowed me easily. But I will row any of the following men four miles, for \$500 a side, six weeks from date of first deposit, viz.: George Hosmer, Ten Eyck, J. Riley, E. Morris, Warren Smith, Frenchy Johnson, Lee (of North River), or any of the Ward Brothers."

YACHTING.

NO CAPSIZES IN CALIFORNIA.

To San Francisco yachtsmen it sounds somewhat strange to hear of the numerous capsize of yachts during regattas in the Eastern States. There this is an accident that happens quite frequently; here there never has been an instance of the kind. Yet in San Francisco bay we have strong and puffy winds, sharp seas, swift currents, and many of our races are sailed in breezes which Eastern men confess they could not start their boats in. This is of course due to our rig and model. We build and spar our boats for strong breezes and lumpy water; they are intended to carry full sail in winds that blow from 25 to 30 miles an hour. These winds are not stormy, but regular daily visitors in Summer. As we have to sail in them or not at all, our boats must comply to the requirements. We therefore model our yachts with a view to great sail carrying power; for here the boat that carries sail best is the one that wins.

On some other occasion we shall discuss the question of type more fully, as it is a matter of interest to all lovers of aquatic sports. Now we simply refer to the subject to say, we never have capsize here, and it is not because we are afraid to carry sail, or because we do not go out in strong breezes. The capsizing of two yachts in one race in New York waters the other day—one a broad, beamy, shallow, skimming deck sloop; the other a deep, lead keel cutter—has been the subject of considerable talk among yachtsmen. The deep boat, even with the lead keel, capsized and sank; the other one spilled out her sand bags and floated. This shows that lead keel yachts, if not properly handled, have some elements of danger as well as the other type.

The men who sail yachts here are used to sailing with rails awash and with plenty of wind. They are accustomed to handling their vessels in all sorts of circumstances. The boats they have faith in, because they know what they will do on a sea way; and danger of capsize never enters their minds. As we have before stated, no yacht can capsize in this harbor during a race; and no regular yacht can capsize here at any time. Our boats are as good as there are in the world for the work they have to do.

The Frolic has been at Saucelito all the week.

The Fawn was on the beach at Oakland this week.

The Emerald lies in Oakland Creek during the week.

Mr. Boone sailed the Nellie up from Monterey himself.

There were more yachts out last Sunday than for a long time.

Ingals' new boat, the Restless, is the largest plunger in the bay.

The new sails of the yacht Whitewing seem to shove her ahead faster.

The Salt Lake yacht fleet has gone into a decline like Uncle Sam's Navy.

The Chispa and Clara were in company in Hospital Cove last Saturday night.

All the ocean cruising yachts are back again in yellow water once more.

That big Lillie seems to get through the water pretty lively for a boat of her size.

The la Viva has come into service once more, and is now "wrecking" the Escambia.

Mr. Berry will soon have the Elia in commission again. There is not so very much to do on her now.

The Ariel has been on the ways this week. She is to have a bigger jib, and 5,000 pounds of lead on her keel.

The Fleur de Lis has had her masts shortened very recently. They ought to have been shorter during the race with the Nellie.

Last Sunday was an exceedingly fine day for sailing, and a small fleet of yachts kept company for an hour or more out in the channel.

The Rambler is out on the ways being painted and generally overhauled. She will go up river before very long. The boys intend going as far as Stockton in her.

If we had not promised to say nothing about the Lolita losing her jib-boom while caressing Jackson street wharf, we would have made a good item of the occurrence.

Bill Stone, the builder of the yachts Peerless, Startled Fawn, Lolita, Magic, Thetis, Rambler, Whitewing and others, hurt his hand the other day in launching the Restless, and has had to knock off work. He is going to take an enforced rest for a while, and will go up river. Stone builds good boats, and is always kept pretty busy.

Collins, the Long Bridge boat builder, has just turned out a very handsome boat like a man-of-war's gig. She is 25 feet long, 5 foot beam, has fancy gratings, and is very finely finished. She is for Mazatlan, for a custom house boat. She is built of cedar and eastern oak, with black walnut gratings, and there is a good deal of brass work on her. She has cushions, awnings, and everything complete. She is the "dandiest" boat turned out here for some time.

LIVE START.—Concerning the start from an anchor revived by the Boston Y. C. in their great match June 17th, the Boston Herald has this to say: "The start was made in a new and novel manner, entirely out of the general rule, the yachts being required to start from an anchor with all sails down, thus giving an excellent exhibition of the efficiency of the crews in making sail. When the word was given a most exciting scene was witnessed, each crew naturally vying with the others to 'masthead' their sails and gain whatever supremacy they might by their celerity. In some cases the halliards were led through snatch blocks, and a 'walk away' was made with the slack, running the sails up with almost lightning rapidity."

MISS MARY ANDERSON'S YACHT.—Miss Anderson, when not galloping over the country roads on her big black Kentucky horse, is on the water, and her fondness for out-door life is attested by her very brown complexion. She has been looking forward anxiously for the completion of her boat, and yesterday made a trial trip in it. The boat is a very handsome one, 52 feet long, 10 feet 10 inches wide, and draws 3 feet of water. It is furnished with all modern improvements. It has two cabins, one fore and the other aft of the engine-room. The after cabin, measuring 12 feet by 7 feet, is furnished in hard woods, and leading from it is a retiring room and lavatory. The forward cabin is finished in white ash and black walnut. Next to the engine-room, which contains a Harthorn engine, there is a cook's galley and pantry. There is ample room on the deck for a party of twelve or fifteen persons.

While Dr. Merritt, of Oakland, was at Santa Barbara last week, he gave a sail on his fine yacht Casco to a number of the guests at the Arlington. Mr. Dixey Thompson, the proprietor of the hotel, is an old salt, and a jolly one, and he and all hands enjoyed themselves greatly. The trip brought out the following suggestion by the Santa Barbara Press: "The pleasure excursion of the yacht Casco, yesterday, caused a revival of the oft repeated question, why does not Santa Barbara have a yacht club. Never was a sea more inviting to sailing parties, than is the channel. The wind is steady, gentle, and can be relied upon almost every day of the year. There are many wealthy residents who could well afford to keep private yachts, but if this were not thought desirable, a few could club together and support a fine yacht in elegant style. Nothing could contribute more to the attractions of our city as a tourist resort, than occasional excursions along the coast, or toward the islands. The cost of keeping the vessel in order would be merely nominal, and the return, in the way of sport, and healthful recreation, would be full compensation. We have a number of wealthy gentlemen in our city, who were formerly interested in ocean vessels, as captains and owners, and it would seem as though they would enter heartily into any plan for the organization of a yacht club. Mr. J. Doulton's Dashaway has proven an entire success, and should stimulate others to follow his example, and own private yachts, but in any event clubs should be formed, and at least one large first-class yacht should be placed on the channel."

HIGH SPEED STEAM YACHT.—The Herreshoffs have delivered the Siesta, a new high speed steam yacht to her owner, H. H. Warner, of Rochester, N. Y. Like all their handiwork, the Siesta presents numerous features original with the Bristol builders. In point of model she is totally different from the usual run of overgrown lanchettes still built, about New York in the clumsy fashions of our forefathers. The Siesta is sharp as a knife, with U frames throughout, and moderate hollow to her lines. Her speed is derived from a very light displacement and small wet surface, owing to the use of composite construction and the Herreshoff coil boiler and their light weight engines. She is lightly built but of selected material, well-fastened, and therefore tough and able to withstand far rougher usage than the heavier boats with the old style oak frame, yellow pine plank and iron spike fastening. She is 98 feet long over all, 17 feet beam, and 9 feet deep. Her great beam is mainly across deck, her sides have considerable flare. These proportions were determined upon by Mr. Nathaniel Herreshoff after extended experiments made a year ago. The boiler is of the circular coil pattern, already fully described in this journal, and occupies but 6 feet 8 inches, measured from out to out of casing. The engine is compound condensing, with cylinders 10½ and 18 inches diameter by 18 inches stroke, and develops 200 horsepower upon 350 pounds coal per hour, a performance which is highly satisfactory. The screw is 56 inches diameter with 96-inch pitch, four bladed.

The hull has an angle iron frame 2x3 inches, with reverse frames, and floor plates 3-16 inch thick. She is planked with oak and pine, screwbolted to the frame. Rudder, screw and skag are of bronze. Rigged as a pole schooner, has a gig, dingy and a 20x1½ foot steam cutter at davits, the latter capable of making nine miles an hour. As the Siesta is designed for the St. Lawrence river, she has been given ample head room and ventilation below by a deck house fore and aft with a pilot house and dining saloon at the forward end, the saloon being 9x12 feet, with the kitchen beneath, and a pantry, fore-castle, etc., forward of

the latter. The main saloon is reached by a companion from aft and is 18x11 feet, finished in very stylish and tasty design in birdseye maple and cherry trimmings. Two large and two small staterooms lead off from the saloon, fitted with numerous small devices for comfort and convenience, all characterized by that peculiar and pleasing originality for which the Herreshoffs have become famous. The same builders have just finished a sister ship, called the Orient, and both are sure to maintain the credit of America as progressive, even in the darkest hours of prostration which have overcome our nautical interests.—*Forest and Stream.*

BASE BALL.

THE RENOS AND THE MINSTRELS.

The first appearance of the Haverly Minstrels on the diamond field, in a friendly game with the Renos, attracted a very good attendance last Sunday at the Recreation Grounds, and considering that the home team are now in good working trim, the visitors gave them a pretty hard tussle, and the game would have been still closer if the Minstrels had been in better practice in their fielding. On some future occasion they will give a better account of themselves.

THE LEAGUE CHAMPIONSHIP.

There has been a notable change in the records of the League games. The Chicago teams having assumed the lead, with Detroit and Providence almost tying them, it is still an open question as to naming the first and second in the series, as may be seen from the following record up to July 11th:

CLUBS.	Boston.....	Buffalo.....	Chicago.....	Cleveland.....	Detroit.....	Providence.....	Troy.....	Worcester.....	Games Won.....	Games Played.....	Games to Play.....
Boston.....	4	2	4	4	2	2	5	23	43	17	17
Buffalo.....	2	4	3	1	3	2	5	20	41	19	19
Chicago.....	2	4	4	5	4	4	4	21	42	18	18
Cleveland.....	2	4	1	3	4	6	25	42	18	18	18
Detroit.....	4	3	2	5	4	5	4	25	42	18	18
Providence.....	4	3	2	3	4	5	4	25	42	18	18
Troy.....	4	4	2	2	2	3	19	43	17	17	17
Worcester.....	2	1	2	0	0	1	3	9	42	18	18
Games Lost.....	20	21	15	21	17	24	33	163	336	144	144

A most remarkable game was played at Providence, R. I., on last Wednesday, which was won by the home team—the Boston Club having to content themselves with a duck's egg.

SHOOTING NOTES.

The California and Cosmopolitan Clubs will shoot a match at San Bruno, on Sunday, the 30th inst., for the Diamond Medal. The Cosmopolitans have won it twice and the Californians once. Should the Cosmopolitans again succeed in winning it on Sunday week, the trophy will be theirs.

One of the chief attractions to our pigeon matches lies in the fact that after the regular club shooting is finished, pool shooting is inaugurated, in which outsiders indulge.

A private pigeon shooting match will be held to-day, Saturday, at Bird's Point, Alameda.

Dove shooting is little indulged in by our wing shots at present.

To-morrow, Sunday, the California Club will shoot at San Bruno.

JOSEPH CAIRN SIMPSON, - - - EDITOR

SAN FRANCISCO, - - SATURDAY, JULY 22, 1882

SUNDAY MORNING AT THE OAKLAND TROTTING PARK.

In another part of the paper is a description of Sunday morning at the Gentlemen's Driving Park (formerly Fleetwood), in the vicinity of New York, and it is nearly a perfect transcript of what was formerly the practice here. There is a change now at the Oakland Trotting Park. In place of the bustle, the merry spins, the brushes, the verandah and stands crowded with spectators, a hundred timing watches in view, the track lively, on every turn there is quiet. In place of taking that day as the especial one to move the trotters and breeze the racehorses, it is a day of rest. The shouts of the drivers and the cadence of the footfalls of the flying steeds are wanting, and beyond some sheeted animals, lazily walking about under the charge of the grooms, there is nothing to remind of the tumult of the Sabbaths of the past, nothing which the most ultra pro-Sunday-law advocate could take exception to.

Last Sunday we strolled from the house to the track, the morning as lovely as could be. A light breeze, so light that, though it could scarcely be felt, there was enough to carry northward the smoke from the chimneys of the ferry steamers, and give a tremor to the flags on the pavilion at Shell Mound. The sun shone with a subdued radiance, warm without brightness, adding softness to the atmosphere.

What a grand morning to "scrape out," we mentally ejaculated, or to give any sort of judicious work, with as little danger of "soreness" following as is possible. Looking over the fence of the track the surface was smooth, but a glance showed that it was not prepared for an extra day. When there is a general desire to give fast exercise, great care is taken in the preparation. It is nicely sprinkled in the evening, so that the water may not be evaporated, and early in the morning the light harrow mellow the surface to just the right depth to take off the jar, without making it so deep as to be laborious for the horses. Inside of the track, all over the oval, the haycocks were thick, and in some portions it looked as though the yellow mounds covered the whole of the ground.

The Easterner, when for the first time he sees a California hayfield, is astonished that these straw-colored heaps are called hay. His recollections are of the green timothy and sweetly scented clover, and he imagines that it is a "guy" when told that it is the best forage for horses in training, and that the whole of the field will average four tons, at least, to the acre.

It lends a rural appearance to the scene, and were it not that the high fence, the stands, and the long rows of stables dispel the illusion, it would be mistaken for a "ranch." Two or three men are sitting on the veranda listlessly smoking, and the only occupant of the bar-room is the one waiting for customers, which are not likely to come. The rattle of the Berkeley train is heard, and as this is the one which leaves San Francisco at eight o'clock, in the olden time there would have been a throng of passengers. There are three arrivals. A gentleman from Virginia City, fond of trotters, and expecting to see a host of them at speed. He had learned that an unusual number were domiciled at the track, and, of

course, so near the opening of the circuit, there would be lively work. A friend accompanied him, and the third was a trainer from Vallejo, who had made the journey with the same fond anticipations. There is a blank look, a sort of puzzled stare at the small group and the silent course. "What's the matter?" says the Virginian. "Where are the horses?" inquires the trainer, almost at the same instant. "Oh! the boys all work out Saturday now," was the answer. That it was not a satisfactory one was evident, and even the visit to the bar did not appear to revive their spirits. In place of the fizzing champagne which followed the performance of Helene at the Gentlemen's Driving Park, a light cocktail or two was imbibed, fresh cigars lighted, and almost disconsolately the seats were resumed on the veranda. There was the usual horse talk, of course, but not the vivacious speeches of the days of yore. The trainers joined the group at intervals, every one of them arrayed in his best clothes, and with cleanly shaven faces and freshly polished boots. In the stalls the horses were "bedded down," and in some of the larger there were congregations of "rubbers" putting the time in with reading the morning and sporting papers.

There is no necessity for elaborating further to show the contrast between the scene which the *Herald* describes, or that which was witnessed on the same ground a couple of years ago, and the picture presented. There will be a difference of opinion which is the best, and arguments on both sides. For the old plan the advocates will say that many men who have trotters trained cannot afford to leave their business on week days, and the pleasure they take in seeing their horses exercised is the only thing which induces them to keep them. Leaving out of the discussion the morality of the question, and the advantage of gaining the good opinion of those who do not approve of any breach of the Sabbath, there are other things that have a bearing, not the least of which is, that generally it gives the trainer a better opportunity of getting the horses in order. The "Sunday Matinees" draw a large assemblage. At many of them the concourse would be as great as at an ordinary race. The owners of the class alluded to are always anxious to have their horses make a good showing, and there were contests after contests of horse against the watch, the latter invariably getting the best of the fight if the battle was a long one. Stimulated by applause when the animal made a good mile, there was a desire to beat it, and if it did not work up to expectations it must be kept going until it did. In lieu of waiting for the races to come, there would be races every Sunday, and these given long before the animal was in condition to endure the rigor of the many trials.

Beaten, as they inevitably must be after this course of treatment, the blame was laid on the trainer, and he was declared utterly incompetent, when the failure arose from the owner being desirous to entertain his friends by a display of his horse's capacity. The larger the gathering, the greater the excitement, the more imminent the danger. If this view be correct, and we are confident that it is, the abrogation of fast work on Sunday is an advantage to all who are concerned in the horses, and though it drops one of the exciting episodes, there are enough left to give plenty of animation and life to the race course.

OUR ILLUSTRATIONS.

The pictures of the "Notable Horses of California" which have appeared on the title page of this paper are the very best which we have seen; that is, they are portraits, not the fanciful idea of the artist, but representations of the animal, exact and admirable. As a general thing, the horses which artists draw are ideal, or rather an erroneous conception of what they should be. It does not appear to vary the case a great deal whether the animal is at rest or in motion, save that in the latter case the absurdity is heightened. Our artist has divested himself of the notions of the schools,

and, studying from nature, has acquired the capacity to depict a horse truthfully. Let these pictures be carefully and closely scrutinized, and the verdict must be that they are faithful portrayals of the animals, and without the usual discrepancies and divergences from nature.

A VALUABLE REINFORCEMENT—THE BREEDING FARM OF COLONEL McNASSER.

We heartily welcome Colonel James McNasser to the ranks of California breeders. It is an accession which will be of vast benefit, as the stock he has added to the home strains is of the right stamp. In some of them there are new elements, the blood being different from any previously owned in this State; and individually they are highly praised by men who are good judges. Very judiciously has Colonel McNasser located his breeding farm, and this is another consideration in arriving at success. The proprietorship of the Golden Eagle Hotel made Sacramento his home again, as in the early days of California he was a resident, and though he transferred his domicile to Deuver for a time, the old hankering for the banks of the Sacramento came over him, and he was not fully satisfied until he returned. The hotel alone would not do, as he had a number of horses in Colorado, and he had a love for fine horses which must be gratified. A pair to drive, a carriage team, and an extra saddle-horse was not enough; the greater fascination of breeding must be added; and to accomplish this, a farm must be purchased.

The east side of the Sacramento contiguous to the city is one of the fairest spots in California. There is a rich soil, undulating enough to give dry pasture land, which is so essential in the breeding of fine horses, and plenty of pure water. It is conceded that the finest drive on the Pacific Coast is that which extends from Sacramento to Riverside—a wide boulevard following the bank of the river, and shaded with grand old oaks, which would be the glory of an English park. The roadway is kept in as good order as a trotting track, and from the start to the finish there is "brushing ground." Six miles straight out there is a chance for the exhibition of bottom as well as speed, and on these glorious Summer evenings it is thronged with the fleet roadsters of the Capital City. Such a drive in the vicinity of San Francisco would double the value of every trotter in the State; and old residents of Sacramento whose business compels them to live in the metropolis are constantly bewailing being deprived first of the climate and next of their favorite drive. Any one who is acquainted with the Colonel could easily have foretold that his farm would not be far off from this famous boulevard, as he dearly enjoys a friendly contest on the road, and, then, it is so handy to the hotel. The farm is located within a mile of the terminus. Our correspondent, "Mile-and-a-quarter," gave a sketch of it two weeks ago, but we must insist on a rechristening, and that "Kleinhaus place" be replaced with something more euphonious. Nevertheless, any name will not interfere with a drive between lunch and dinner, and leave an hour or two to look at the horses and colts. With his son John to leave in charge of the hotel, it is more than an even bet that the Colonel will spend most of his time among the horses, and very many of the guests of the Golden Eagle will participate in the enjoyments of a jaunt to the farm.

We have written of a trip between lunch and dinner, but the intention is to time our visit to Sacramento when the harvest moon is showing its full orb above the Sierras, soon after the sun is sinking behind the browu summits of the Coast Range; and then the hotel dinner, good as it always is, will not entice us. Our friends know that we fully appreciate the good things of this world, and without claiming the distinction of being called a gourmet, will pass for a good feeder. But with a moonlight drive in the balance—well, we will take the chance of there being something left in the larder, and prolong the stay among the weanlings, yearlings, etc., until Luna is well up in the firmament.

A partial list of the stock of Colonel McNasser will be found on another page, and what we have said about the value of the blood will be concurred in by those who are acquainted with the strains. Morosa is an old acquaintance. She was bred by C. S. Dole, of Chicago, and when owned by S. Lasher, of Elgin, Illinois, gave us a drubbing in a three-year-old race. She was a slashing, square-gaited, big filly, and the "Governor" was in great glee that he had taken us into camp.

THE EARLY DAYS OF ROMERO.

There is a spice of romance in the young days of Romero, and the history which his breeder gives is proof that he is a "borned trotter," as the Kentucky darkies say. We know that his sire was of that class, and his dam, having also the honor of producing Inca, Del Sur and Zeluska, no one can question her title to being one of the noble matrons of the track. Those who argue, however, that good feeding and good care are, if anything, detrimental to the horse, must not lay too much stress on the example, but rather ascribe the size and activity of Romero to a vigorous constitution that neglect could not shatter. Again, California is a wonderland in the respect of providing sustenance, when to the eye there is nothing but a barren waste, and in the sections where the native grasses have not been obliterated by overstocking, there is an abundance of rich food, excepting in the season of the year when the old crop is rotting and the new too watery to afford much nourishment.

But that a colt should overcome the drawbacks which fell to the lot of Romero, is one of the remarkable instances so rarely met. And who can say, authoritatively, that the ill treatment did not affect him? With care and proper training from youth, without ailments, the 2:22½ at four years old might have been lowered several seconds.

The history which our correspondent so kindly has furnished finishes the history, and makes it complete until he makes his next appearance in public. That he will continue his victorious career we have the utmost confidence. That Mr. Johnston may have other "Richmonds in the field" which will make amends for the disappointments we sincerely hope, and we have full faith in that too. With two such colts as Len Rose and Romero from a season which was limited to five to choose from, is an exemplification which is a safe guide for the prediction, though the prophecy is not based on that alone. Richmond only got a few colts in the East, and not one of them which had not a good share of the fast-trotting inheritance.

THE HERD.

There is an immense field to explore, over the gateway of which are the two little words which form the caption to this article and stand at the head of one of the departments of the BREEDER AND SPORTSMAN. Shorthorns, Herefords, Devons, Jerseys, Guernseys, Ayreshires, Holsteins, Polled Angus, Kerry cattle, the little black fellows from the Highlands of Scotland, Grades, Natives, Brahmins, the French breeds, the names of which we dare not attempt to spell without a reference for every letter, are all roaming in it, and not one of them which has not some characteristic which is worthy of notice. Each, too, has some valuable quality, as the Hindoo has oddity of appearance as well as the reverence of millions of people to fall back upon, and the Natives can be made good use of to cross with the more valuable. It would have been a grand oversight to omit the Spanish, as they not only contributed to the amusement of aristocratic and plebeian spectators, as their long legs and lithe bodies enabled them to make the journey on foot from Texas to the North before the days of railroads, and brought beef within the reach of the masses, who otherwise would have rarely tasted the knightly roast, the juicy steak, maybe not even the porter-house cut from close behind the ears.

Colonel W. P. B. assures us that since the long-horns have become so nearly extinct, the bull's head, cooked after the old-time fashion,

has lost some of its flavor, though this may arise from our friend not being so young as he was twenty-five years ago, as he also swears that there is no such nectar to wash down the monthly breakfasts of the club as regaled the palates of the Argonauts. We should not be surprised if he were to aver that Tamalpais had lost a thousand feet or so of its height, and that the trees which have shaded their camping-ground ever since the club was formed were not so umbrageous.

The first drove of Texas cattle which came to Chicago attracted more attention than a score of Jumbos would now, and the comments of farmers and stock-buyers were strangely discordant. With all due deference to the gastronomic taste of the Colonel, we must acknowledge a preference for a prime cut from some of the breeds which do not carry such magnificent antlers; and never yet having enjoyed the pleasure of tasting the covering of the cianium of Taurus, cooked in the manner described in the B. and S. two weeks ago, either in the old days or new, we can not demur from his conclusions.

But we have wandered from the track, the intention being to inform our readers that we have the promise of communications from practical men as soon as the busy season is over. These articles will be of great value, embodying the views of men who are intimately acquainted with the various breeds and their adaptability to the Pacific Coast. In this wide extent of territory, with such a dissimilarity of topography, soil and climate, it is evident that there is room for, and need for, more than one race.

THE RIFLE.

In tracing the progress of arms which propel projectiles, especially those which use an explosive force to effect the object, is an interesting topic to those who have an interest in gunnery; and the essays of Dr. E. H. Pardee will give a clearer insight of the subject than any save those who have made it an especial study possess. To the rifle-shooter the lessons will be of the greatest importance, as ultimately the Doctor will impart lessons his long practice so eminently fit him to give. In this practice he has not only aimed to make a good score, but to investigate all the theories, and select those which he found correct.

CLOSING OF STAKES AND PRIZES.

On the first day of August next, the stakes of the Pacific Coast Blood-Horse Association, the Embryo Stakes and the Purses and Stakes at the California Fairs will close.

The advertisements in this paper will give full particulars. Do not forget the date, TUESDAY, AUGUST 1st, 1882.

THE ALMONTS ON THE PACIFIC COAST.

There are several fine Almonts on the Coast. It could scarcely be otherwise when the well-deserved reputation of the strain is taken into consideration, and being so highly prized, it is equally certain that our liberal breeders would determine not to be without the blood. Writing from memory some may be overlooked, but among the sires, there are the following: Jay Beach, at Linkville, Oregon, has Altoona, J. B. Haggin, at the Rancho de Paso, has Algona, J. J. Gosper, of Prescott, Arizona, has Gosper's Almont, formerly Exemplar, and at Palo Alto is Piedmont. Some years ago, a very fine Almont yearling, from a mare by Prophet, was taken to Santa Barbara, but we have not heard from him lately. Mr. Beach has several fine Almont mares, and there are a number of them among the matrons of the Palo Alto stud. We have oftentimes claimed that California was as well supplied with trotting strains as any state in the Union, and now the impression is strong that she will take precedence of any of her sister states. To substantiate the claim, measures will be taken to obtain the necessary information, and when that is in, there will be a good show to establish the proposition. The Almonts are a potent factor in the calculation, as every one mentioned is from the right sort of a dam, and this is as essential as the male side of the parentage.

PURCHASE OF BRONZE.

This great filly, which made so good a showing in the race for four-year-olds at Chicago, trotting seven heats, the third and fourth in 2:25½ and 2:26½, was purchased after the race by H. D. McKinney, of Janesville, in consideration for \$7,500. That it was a judicious investment is proven by the offer of Robert Bonner of \$15,000, though the telegraph does not give the information whether the offer was accepted or not.

We are not violating confidence in stating that Mr. McKinney is one of our corp of correspondents over the signature of "Mambrino," as he has written over that *nom de plume* for so long a time and made it so popular, that there are few readers of the Eastern papers who are not aware of the fact. Mr. McKinney is not only a graceful and forcible writer, but a first-rate judge of a horse, and as he has given us a half promise to write for the BREEDER AND SPORTSMAN "My Experience in Buying Horses for Friends," and should he do so, we can promise our readers an entertainment which will please the most exacting.

The experience of "Mambrino" extends over a longer period than any one would imagine from reading his communications, and although in this respect we may "give away" his age, he has seen all the famous trotting horses from the days of the old-time celebrities, we will not say which—to the present time. Better still, he has owned many, can drive them as well as the old professors of the art, and has done more to educate trainers in the proper use of the toe-weight than any ten men in the country.

The consideration of those useful adjuncts in training the trotter will come more appropriately when the racing and trotting season is at an end. In the meantime, we congratulate Mambrino on his purchase.

BEEF AND MUTTON.

Butchers' bills are a dreaded portion of the household expenses, though the good fortune is that when these are heavy the bills of the doctors are correspondingly light. Light or heavy, all of our readers are interested. To guard these interests, arrangements have been made to secure reliable reports of the Live Stock Market on this Coast, and in another part of this paper will be found the first of the series. It rests with stock-breeders to assist us in making this complete, and this they can do by sending reports of all sales with which they are acquainted. By joint effort all of the sales of any magnitude will be reported, and it does not require a great deal of argument to show the advantages which will result.

WONDERFUL STORIES.

As the time approaches for the closing of entries, there are always wonderful stories of what the horses are doing.

In some cases the trainers are a party hoping to reduce the fields by promulgating big stories of what their horses are doing, and in other cases it is only necessary to start the ball in motion, when the natural accumulations will give it sufficient size.

Our advice is: If you have a good horse for the classes he is eligible to make the entry, and the chances are that when the races come off, some of the swans will lose their plumage.

TYPOGRAPHICAL ERRORS.

It is not astonishing that proof readers who are not versed in the technical terms of the turf and track should make blunders. Some of them appear so senseless to any except the initiated, that there appears to be an absolute necessity for a change. Thus: "Nick" is changed into "trick," and "forehand" into "forehead." The use of the dash in denoting the combination of blood is troublesome, and "Electioneer—St. Clair" is so ambiguous, that a comma takes the place of the mark intended. Until compositors and proof readers are "well up" in the phraseology, there is no help for it, and sometimes we think fewer mistakes are made than could be expected.

THE KENNEL.

FIXTURES.

National American Kennel Club's trial on quails, Grand Junction, Tenn., December 4th. D. Bryson, Memphis, Tenn., Secretary.

Louisiana Field Trials near New Orleans, La., beginning Dec. 11, under the management of the New Orleans Gun Club.

BENCH SHOWS. Western Pennsylvania Society's English Setter Bench Show Derby, Pittsburgh, Pa., for English setter puppies whelped on or after March 1, 1882. Entries closed December 1, 1882. I. R. Stayton, Allegheny City, Pa., Secretary.

FIELD TRIALS.—National American Kennel Club's trials on prairie chickens, Fairmont, Minn., September 4th. Entries to American Field Derby closed July 1st, to All-Age Stake, September 4th. Joseph H. Dew, Columbia, Tenn., Special Sec'y for these trials.

Gilroy Rod and Gun Club's trials on quails near Gilroy, Cal., October 23th. Open to dogs owned in California, Oregon, Nevada and Arizona. E. Leavessy, Secretary, Gilroy, Cal.

Eastern Field Trials Club's trials on quails, near High Point, N. C., November 17th. Entrance to Derby close July 1st; to All-Age and Members' Stake, November 1st. Fred. N. Hall, Secretary, P. O. Box 864, New York.

ANSWERS TO CORRESPONDENTS.

Under this head will be found replies to all questions that may be asked of the Kennel Editor in relation to breeding, breaking, or entering dogs, feeding or curing them of any ordinary disease. Correspondents must state plainly what are the peculiar symptoms of the malady for which they need advice, and in all cases, especially when desiring to know the best way to correct a dog of a fault, must be careful to state the age and sex. No answers will be sent by mail, and all questions must be marked Kennel Editor WEEKLY BREEDER AND SPORTSMAN, San Francisco, Cal.

H. BROWN, ALAMEDA.—The best way to keep kennels free from fleas and lice is to sprinkle a little coal oil around and rub a little in the dog's hair occasionally. A more trace is all that is needed. The widely advertised Persian insect powder is a specific.

J. A. W. STUBBS.—The symptoms you describe are those of bronchitis. Rub spirits of turpentine into the chest once a day and give a table-spoon full of the following mixture three times a day: Syrup of tolu, 2 oz.; syrup of squills, 3 drams; tincture of aconite, 15 drops; water, 3 oz.

STILL HUNTING.

A correspondent, who neglects the customary courtesy of signing his name to his letter, writes to the Kennel Editor, requesting him to denounce what the anonymous correspondent is pleased to designate as the "cowardly and non-sportsmanlike practice of running deer with hounds." The writer referred in complimentary terms to the stand taken by the BREEDER AND SPORTSMAN on the hare killing brutality a few weeks since, and suggests that buck running is a far more brutal sport. As this question has often been raised before, the Kennel Editor feels justified in speaking of the matter, though the communication hardly deserves notice. As an individual he has often followed a pack of hounds chasing a deer, and considers the sport the finest and fairest that this glorious sportsman's paradise affords. In his opinion it is as far above the pot hunter's practice of killing deer at a pond by moonlight as quail shooting is above rat killing; therefore he cannot denounce it as cowardly and cruel and laud still-hunting to the skies. In this as in all other matters, there appears to be a decided difference of opinion, and as the columns of the BREEDER AND SPORTSMAN are always open to gentlemen not afraid to sign their names (as a guarantee of good faith only and not necessarily for publication, correspondence on the subject is respectfully invited. Experience is of more value than theory, and it is to be hoped that some gentlemen who have had some experience in either style of deer hunting will favor this paper with its results.

A BOLD CHALLENGE.

Judge Mee has allowed it to be stated in various newspapers that he is willing to match a seven-months-old pup against any greyhound of similar age in the State of California. The statement leaves the impression that the Judge is willing to waive all his rights as to the time, place, and other conditions in favor of the acceptor. The pup that the Judge will run in case his challenge is taken up is by California Boy, a dog which as yet has not made any special mark in the stud, and who when in the field was the worst in and out runner ever seen. Tom Tunstead, who if not the first owner of California Boy, was the first person to run him in a public match, always had a great faith in his speed and pluck, and in spite of repeated defeats ran him in match after match until he finally divided a first prize in the Pioneer Club with another of Tunstead's entries. On that occasion it was generally thought that the bad luck of Murphy's black dog, Warsick, who was one of the fleetest hounds that ever went out of slips, helped California Boy to his victory; but leaving that question on one side there is no doubt but that the white dog showed marvelous form and was quite a surprise to all except Tunstead, who from the first said he was sure to win. California Boy was once owned by J. C. Murphy, who in disgust at his being badly beaten by a fourth-rate dog, either gave him away or sold him for a nominal sum. He was afterwards raffled and fell into the possession of Dougherty, who on account of lack of kennel room sold him for a mere song. The price paid (\$25) was thought at the time to be fully as much as he was worth. If he has bred a world-beater for Judge Mee, those who had the refusal of him at that price will doubtless feel sorry they did not snap up the offer. If, however, his pups are as unreliable runners as their father, the Judge will perhaps regret his purchase. Judged by a breeder's standard, there should be many pups able to beat the produce of California Boy, no matter how fine they may look, unless they inherit some special merit from the dam. Under favorable conditions, the get of Gentleman Jones seem to develop earlier than those of most other dogs. At ten months Paul Jones and his brother, Master Jones, said to be out of Branch, by Jones, were as well grown as many fourteen months old pups and were excellent runners. Too much loose coursing around Point of Tubers made them objects of suspicion, but judicious handling later corrected any tendency to lurch. Coronoway, by Jones and Lady Amanda, was as fine a young dog as this State has ever seen. The get of Speculation from well selected bitches also show remarkable form when young. Monarch, Warsick, Chinchilla and many others are evidences of that fact. The get of all the Cartwright stock develop early, and then seem to die away until they are quite old. In fact, as a general rule, all greyhounds in this State show better form when young than those raised in England, perhaps owing to climatic influences. Seven months is rather too young to run a dog, especially in the heat of summer; but if the progeny of California Boy are equal to the task, there should be no lack of opponents able to give them a race, and doubtless Judge Mee will soon be accommodated with a match.

THE COCKER SPANIEL.

The full standard of points for a Cocker Spaniel, as defined by the Cocker Spaniel Club of America, is as follows:

A cocker spaniel must not weigh more than 28 pounds nor less than 18 pounds.

GENERAL APPEARANCE, SYMMETRY, etc. (value 10).—A cocker spaniel should be eminently a well built, graceful and active dog, and should show strength without heaviness or clumsiness. Any of the spariel colors is allowable, but beauty of color and marking must be taken into consideration.

HEAD (value 15) should be of fair length, muzzle cut off square, tapering off gradually from the eye, but not snipy. Skull rising in a graceful curve from the top, and with the same outline at the occiput, the curve line being flatter but still curving at the middle of the skull. The head should be narrowed at the eyes and broadest at the set-on of ears, and, viewed from the front, the outline between the ears should be a nearly perfect segment of a circle. The stop is marked and a groove runs up the skull, gradually becoming less apparent, till lost about half way to the occiput. This prevents the domed King Charles skull, and there should not be the heaviness of the large field spaniel, but a light, graceful, well-balanced head. Jaws level, neither undershot nor pig-jawed, teeth strong, regular and free from canker.

EYES (value 5) round and moderately full. They should correspond in color with the coat.

EARS (value 10) lobular, set on low, leather fine, and not extending beyond the nose, well clothed with long silky hair, which must be straight or wavy—no positive curls or ringlets.

NECK AND SHOULDERS (value 10). Neck should be sufficiently long to allow the nose to reach the ground easily; muscular, and running into well-shaped sloping shoulders.

BODY (value 15). Ribs should be well sprung; chest of fair width and depth; body well ribbed back, short in the coupling, flank free from any tucked up appearance, loin strong.

LENGTH (value 5). From tip of nose to root of tail, should be about twice the height at shoulder, rather more than less.

LEGS AND FEET (value 15). The fore legs should be short, strong in bone and muscle; straight, neither bent in nor out at the elbows; pasterns straight, short and strong; elbows well let down; the hind legs should be strong, with well-bent stifles; hocks straight, looked at from behind, and near the ground. Feet should be of good size, round, turning neither in or out, toes not too spreading; the soles should be furnished with hard, horny pads, and there should be plenty of hair between the toes.

COAT (value 10) should be abundant, soft and silky, straight or wavy, but without curl; chest, legs and tail well feathered. There should be no top-knot or curly hair on top of head.

TAIL (value 5) usually docked, carried nearly level with the back. At work it is carried lower, with a quick nervous action which is characteristic of the breed.

SCALE OF POINTS.—General appearance, 10; head, 15; eyes, 5; ears, 10; neck and shoulders, 10; body, 15; length, 5; legs and feet, 15; coat, 10; tail, 5. Total, 100.

SAN FRANCISCO DOG SHOW.

During the past two weeks several members of the old Kennel Club have been canvassing the possibility of arranging for a bench show, to take place in this city on or about September 5th. The BREEDER AND SPORTSMAN would welcome such an exhibition in as hearty a manner as it knows, and beg to extend every assurance of aid and comfort to the projectors. It is generally understood that a well known coursing man who was connected with the last bench show held in this city will be at the head of affairs inside the hall. His name will be such a guarantee of care and skill in the charge of the animals exhibited as would induce the most timid to send their pets to the show. Last year the Kennel Club, under whose auspices the show was held, selected all the judges for the various classes, and the plan was found to work far better than the plan once adopted here of allowing the exhibitors in each class to select their own judges. Experience unfortunately teaches that when exhibitors elect judges, it often happens that the strain that has the most friends gets all the prizes, simply because a majority select a man who is known to have a preference for such a strain. Prizes have been given to abortions such as double-nosed setters, because an elected judge imagined that this deformity was the apex of canine grace. The Kennel Club is still in existence, though not very active, and would doubtless be pleased to take the judging in hand.

AMERICAN FIELD DERBY.—The American Field Derby, open to all setters and pointers from and after March, 1881, closed with 44 entries, of which 40 are setters and 4 are pointers.

DEER HUNTING.

HIGHLAND SPRINGS CAMP.

EDITOR BREEDER AND SPORTSMAN: Since my last letter to you we have had several enjoyable as well as successful deer hunts. The hounds are now well seasoned, and sure to make no false starts. The weather, however, has been extremely warm, and much to our disadvantage, the thermometer marking ninety-five degrees in the shade, and when placed in the sun the instrument was not long enough to indicate the heat. Early dawn or one hour before sunset is about the only time that a good run can be had. Water is not very plentiful in the mountains, and only occasionally to be found. There is water in the gulches, but it is very difficult to reach. The bucks, at this season of the year, owing to their horns being in the velvet, are well up on the tops of the high ridges, and away from timber or underbrush. They will soon seek the thickets, and commence rubbing their horns to clear them of the velvet. When this takes place they are hard to drive from the brush, and it requires extra work to get a sight or shot at them. A very amusing occurrence, as well as a remarkable one, happened in one of our chases the other day, which afforded a variety of scenes. We all started out at daylight on horseback, with the hounds, for a hunt, and when about three miles from camp and well on the summit, a deer was started, and, it being quite early and cool, the hounds ran very steadily and rapidly. The deer was cunning enough to keep well out of our reach, and could be seen only at a distance, and then only at such times as he was crossing

the point of some high ridge. We were well divided, and had stationed ourselves at several different prominent points, but for no purpose, as the deer kept well out of bounds. The hounds ran steadily and sure, and the deer had no time to rest. The hounds' notes gradually grew fainter and fainter, and finally were entirely out of hearing. We patiently waited in our positions, and then gathered in a group in the shadow of a high, projecting cliff. We regaled ourselves with a sociable smoke, and discussed the prospects of our day's hunt. One hour and a half was spent quietly and patiently waiting for the return of the hounds, but not a sound could be heard; all was quiet, with the exception of the morning song of the birds and the trowing of the mountain quail perched on a rock and keeping guard over his mate that was quietly feeding with their young. Our situation was most certainly not without pleasure, as the scenery was grand in the extreme. Clear Lake, with its smooth, clear, reflecting waters, lay beneath us; the rising sun gilding the purple peaks of the mountains; the several valleys indicating their culture and vines in miniature beauty; the morning's fragrant air, pure and exhilarating; every care left behind us; saddle-bags well filled with fried venison and biscuits divided with layers of sweet butter; our pocket flasks yet untouched, full of glowing delight; the horses quietly feeding from the sweet, tender grasses that grew around the rocks and ferns. With all this we were happy, but not contented, our anticipations in doubt, knowing by sad experience that the hounds were running the deer in the direction of our camp, and should they become tired they would not again climb the steep mountains, and at the distance of several miles to again reach us. Hours had passed and no signs of the hounds returning, it was dollars to cents that they had gone to camp, and that the day's hunt had ended. It had by this time grown so warm that we had concluded to abandon the day's hunt and return to camp. We could easily see our camp in the distance, but it was far beneath us; but by the old trail it would be a long, tedious ride in the hot, burning sun; so we located a more direct and apparently pleasant course. We started on our new projected journey, but before we reached the camp we concluded that the longest way around was generally the nearest way home. Our camp was finally reached, but we were not specially pleased or in love with the new route. On our arrival we were greeted with much excitement by the colored cook. He had much to tell us—all of which was corroborated by our legal friend whom we had left in camp and who intended, that morning, to have taken the stage on his homeward mission. The facts were, summed up, that the hounds had run the young buck into camp, creating great excitement. The cook armed himself with a huge carving knife, our legal friend with a broom, and then a fierce attack was made; the buck had run so far that he was completely fagged out; the hounds were close up, but so tired that their services were of little account. The excitement was now intense and more than the members in camp expected to realize. Such dodging, striking, running, tumbling, rolling, yelling, never was heard before in a mountain camp. The buck seemed to gain new life over the change of scene and the noise, for, rallying, he made a break for the brush and creek, which he crossed, closely pursued by lawyer, cook and hounds, the broom and carving knife flourishing above their heads. The chase was desperate and for dear life and blood, the scent universal; up the grade they went, giving tongue at every jump. The buck now gaining, darted for the brush, and was out of sight; the lawyer quits—all broke up and surrendered the case to the cook, who had now lost sight of the deer, but continued the chase with ardor. The hounds coming up took the scent of the cook, and fresh music filled the air. The cook rallied, but no use; the up grade was telling on him, and the hounds close at his heels. Realizing their mistake and his situation he breaks down the hill, yelling, "sic him, sic him;" but no use, they were closing on him. The situation was growing still more serious, and his only salvation was to climb. Fortunately a tree was near at hand, and at one bound he was securely hanging in the branches of a scrub oak. The hounds' mistake was soon discovered, for the cook's familiar voice pacified them, and by their actions signaled him to come down. This he was well pleased to do, though he swore a huge and heartfelt oath. He will never give chase to any more deer. The hounds being much demoralized gave up the chase, and walked quietly with the cook to the camp.

WHEATSTONE.

THE HERD.

A REMARKABLE HEIFER.—Wm. Corbitt, Esq., is the owner of an Ayrshire heifer, 13 months old on the 23d of this month, who is the mother of a fine healthy calf, now three weeks old. Can any of your breeders give us an example of earlier maturity?

JERSEY, GUERNSEY AND ALDERNEY.

The Channel Islands, from which originally came and still come the Jersey and other cattle known by their respective names, are but little known to the farmers of this country; hence a brief description of them, their people and products may not be uninteresting to our readers. Of the different routes from England to all the Channel Islands, the popular one is via Southampton, from which port no fewer than 12,881 passengers traveled to Jersey in the summer months of 1881.

Jersey is the most important island of the group, and it is the farthest from England, being 132 miles distant from Southampton. Agriculture is the chief pursuit followed by the inhabitants, and a good portion of the guide, as a matter of course, devoted to a description of the neat little farm houses which are so numerous in the country, and to the modes of life of the people. The land is generally speaking, of good quality; it does not seem to require liming, but it is regularly manured; and the crops enjoy a comparative immunity from insect pests. The farmers are, however, something more than mere agriculturists; they are also mark-t gardeners, florists, and drymen, and by their frugality and industry—which is a marked characteristic of this Norman race—they can on a small patch of ground live comfortably and save money. In the Island of Jersey, there are 2,600 farmers. Out of 18,717 acres, there are 19,436 and crops of various kind; 4,392 acres being potatoes, 2,774 wheat, and 1,548 being turnips. Cattle are not reared for fletting, and sheep being also few, the inhabitants are chiefly dependent on France and Spain for their supply of beef and mutton. Potatoes are the farmers' most important crop, and early varieties in a good spring are said in some cases to realize no less than £50 a ton, while £25 is a common figure. But it is to the fruit crop the farmer generally looks as his safest source of income, the harvest being most prolific, and the fruit of the best quality. Horses in the Channel Islands are poor even for "screws," being almost entirely cast off animals from France and England. The good milking qualities of the Jersey cows, and the richness of

their butter, are well-known, but of late years the distinctive points of the breed have been greatly improved, an agricultural society having been formed with this object. Previously severe penalties were imposed for the importation of foreign animals for breeding purposes, and great care was exercised, by branding on the horn and the granting of certificates by magistrates, to guarantee the purity of the breed, but the Jersey Herd Book is now intended to give every security necessary in this respect. The cows are petted and hand-fed, and when the pasturage in the orchard gets bare, the animals receive extra feeding, in the shape of mangolds and cabbages, under which treatment they yield a bountiful return, from 10 to 12 pounds of butter in the week being not unusual, and this is sold at from 1s 4d to 1s 8d per pound. The quantity of milk from each cow ranges from 5 to 7 gallons a day, but it would appear that the adulteration of milk and butter is not altogether unknown there. From the stalks of the tall Jersey cabbages which are grown in every cottage garden, and which will shoot up to a great height, handsome walking sticks are made and sold at good prices, while the leaves serve as valuable feeding for pigs and cows. Something similar to a peasant proprietary is established in Jersey, the land being either in the actual possession of the occupier, or there is a security of tenure which prevents expulsion or raising of rents.

In Guernsey, the land, although very rich, is not so much so as in Jersey, but the system of husbandry pursued is the same, potatoes being the mainstay of the farmer; fruit, however, being also an important crop. Rents for the land are as high there as in Jersey, but there is a greater proportion of second rate land. £8 to £12 per acre is paid for good land, but most of the farms are occupied by the owners, and when a sale takes place, from £100 to £200 an acre is obtained for the land, and in the town of St. Peter's Port it brings from £250 to even £400 an acre. In Alderney a much larger breadth of land lies in permanent pasture than in either Jersey or Guernsey, and potatoes are extensively grown.

THE MARKET PROSPECTS FOR CATTLE.

The present high price of beef in the East, and on the Pacific Coast promises a profitable year to the cattle raiser. The price of beef has been gradually increasing for the last two years, until at last it has become the cause of alarm in the East. This has been brought about partially by bad seasons, the high price of corn and other fattening products, and principally by the large shipments of cattle to Europe, which were bound to have their effect on the country at large.

The cattle exported to foreign countries were prime, large heaves, so for every ten head sent away we may reasonably state that it will take from fourteen to fifteen of our ordinary ones to replace them. Thus it will be seen that although we may have only sent a half a million the effect on this country is equal to at least seven hundred thousand. This extra deficiency, most likely, was not counted upon during the last feeding season in the Western States, for we find during last Winter Eastern men coming to Winnemucca and Reno, Nevada, after beef cattle for Denver and other Eastern cities—in fact only a week or so ago parties were negotiating with Oakland butchers for a large drove of beef cattle on the San Joaquin, to be delivered in Chicago at we may say a fancy price. But the liability of loss from the extreme hot weather on the line of the railroad prevented the consummation of the sale. Our butchers on this coast will undoubtedly have all they can do to keep up a supply for the local consumption during the coming Fall and Winter. Thus far the season has been a very late one and a large number of cattle have been killed that were only half fat, and the coast counties have been called upon to such an extent that in many of them they will not have retained enough for local demands. We have then only the San Joaquin and Nevada to look to. On the San Joaquin the cattle are mostly all held by Miller & Lux, and other large dealers, who have no necessity to crowd the market, knowing that before the year is out the surplus will be entirely consumed by the coast and neighboring towns, at even or better prices than can be obtained in this city.

In Nevada the past Winter was a disastrous one to the cows and young stock, many ranches losing fully fifty per cent., and some as high as seventy per cent. The present high price of cattle in Oregon, as parties who went there to buy on speculation and returned empty handed will testify to, will prevent the importation of the usual number. This, coupled with the chance that this Winter, as last, they may be called upon to send a few to the East, will most likely keep the price firm in the sage brush State.

We intend to devote a part of each number of this paper to the cattle and stock raisers' interests, and shall furnish reports not only of the weekly slaughterhouse prices but of all large sales of which we can receive information. It will be to their advantage and we will be obliged to all stock raisers in California, Oregon or Nevada, to send us a reliable report of any large sale made in their neighborhood.

In our next issue we will present a view of the "sheep and hog" market. We here give the present market prices from the wholesalers to the retailers:

BEEF—Firm at quotations. Steers, extra prime, 8½¢; prime, 8¢; fair, 6½¢@7½¢. Cows, prime, 7@7½¢; fair, 6@7¢.

VEAL—Choice, small, 8@9¢; large, 6½¢@7½¢.

MUTTON—Weathers, choice, 5¢; fair, 4½¢. Ewes, 4@4½¢.

LAMB—6½¢@7¢.

PORK—Scarce and firm. Hogs, dressed, prime hard, 10½¢@11¢; do. do. soft, 9¼¢@10¼¢; live, prime hard, 7¼¢@8¼¢; do. do. soft, 7@7½¢.

VARIETIES OF POULTRY.

BRIGHTON, SACRAMENTO CO.,
July 17th, 1882.

EDITOR BREEDER AND SPORTSMAN: I am pleased to see that among the other questions to be dealt with in your columns the raising and proper handling of poultry is not to be neglected. For my part I think that the barnyard is one of the most profitable accessories of a farm, when conducted in a liberal and intelligent manner, and I receive many letters in regard to the subject, the majority asking my opinion as to the best variety of chickens to keep. My experience prompts me to answer that for egg-producing, for size and for quality, the white Leghorn is to be preferred. I have made lengthy and expensive trials both with the white and brown Leghorn, as also with the silver-spang-

led Hamburgs, and I find the latter very good layers, with the disadvantage that the eggs are rather small. For the table, my choice is the Plymouth Rock, and as they run very high in weight, some of them going to eleven pounds, the hens about two pounds less, I am going to give this variety a fair trial, and have imported from Charles Matthews, of Rhode Island, some of his finest stock, and in time I will inform you of the result.

In regard to feeding, it depends largely on the climate, and as you are well aware this is very varied and changeable throughout the Pacific coast. For the warm temperature of the interior I recommend bran and sour milk noon and night, with wheat in the morning. For winter feed, scraps of meat and wheat are excellent, and a mess of scalded bran will keep the poultry in fine condition. A little corn is good for laying hens, but not too much, even in winter. A careful examination of the stock now and then will aid greatly in these experiments, but when judiciously handled, I am convinced that nothing on a farm pays better than a hundred thoroughbred Leghorns or Hamburgs. Some sound the praises of the pig in this respect, but my experience with the Berkshire and other strains proves that the poultry are the most profitable. Some get discouraged on account of sickness among the young growing chickens. In that case, first carefully examine the food, water and chicken house, seeing that everything is of a character to stimulate growth and health. That failing to make an improvement, there is some inherent fault in the breed, which may have been kept too far in the same family. Change your male birds, choosing the very best blood. Two five-dollar cockerels will pay a good percentage on the outlay, not only in the healthy condition of your fowls, but also as regards the egg-producing capacity. Some maintain that the white Leghorns are difficult to raise. So, indeed, is every variety, unless some means are taken to see that the mother is in a normal state of health. During the incubation, and while the young ones seek the warmth of the parent's breast, lice are the great enemies that have to be contended with. Go to your drug store and get twenty-five cents' worth of carbolic powder and sprinkle your hens and their nests with it freely, and be careful to keep your hen house in a cleanly condition. Then with the slight precaution necessary in wet or damp weather, you can raise every variety with but a trifling loss. A few words as to setting will bring my letter to a conclusion. From careful observation, I am convinced that the Spanish speckled and white and brown Leghorns of pure blood are non-setters, as I have never had a hen of either variety that would set on the nest over night. Therefore, to those who purpose starting in to keep a few fowls, I would recommend Leghorns and Plymouth Rocks, using the large birds of the latter variety for hatching purposes. The Plymouth Rocks are good winter layers, and with that good quality combine the still better one, as some think, of excellence for table use.

THOMAS WAITE,
Brighton Poultry Yard.

THE BLACK LANGSHAN.—Of this splendid variety there are but few to be found in the State, and indeed Mrs. Raynor, of this city, claims that she alone possesses the true Croad strains, imported by her from England at great expense, the other specimens exhibited here showing more or less a cross of the black Cochins. They are certainly of beautiful appearance, and Mrs. Raynor possesses a curiosity in an egg from one of these birds measuring seven inches by nine, and weighing originally six ounces, and within the outer shell is another egg of the ordinary pullet size. These Langshans, if exhibited at the fairs, will doubtless create a favorable impression.

FISH.

W. W. Lapham has left for Truckee.

Hon. W. W. Taylor has returned from Weber Lake.

Messrs. Frank Whittier and party leave for McCloud river next week.

Anglers lately returned from McCloud river report trout-fishing exceedingly good there.

A lady caught a number of tom-cod in Hospital cove, Angel Island, last Sunday.

The black bass are being removed from Crystal Springs Lake to San Andreas, where good fishing is looked for.

This year the trout in Lake Tahoe appear to be ravenously hungry, and anyone can haul them in by the dozen.

A thirteen pound trout was caught near Tahoe, the other day; also another weighing eight and three-quarter pounds.

Black bass fishing at Temescal Lake is good, although the fish are small as yet. The Sportsman's Club control the fishing in this preserve.

Quite a number of persons from this city and Sacramento have gone up to Bowman's dam, on the Yuba river, sixteen miles from Emigrant Gap.

Tom-cod fishing is very lively along the Saucelito wharves in the shoaler water and on Richardson's bay. People are catching them there by the hundreds.

Fishing on north fork of the American river, near Alta, is reported good. The stream is rather high for this time of year, but in August it will be in fine shape for fishing.

Reports from the Sacramento river are that catfish are so numerous as to be a positive nuisance. With mouth agape they lay in wait for every hook that is dropped. No other fish has a chance.

Tom cods are plentiful all over the bay, but abound particularly in the neighborhood of Union-street bulkhead, Mission street new wharf and foot of Second street. They are also numerous at Saucelito.

The French Government is making experiments with the electric light as a means of luring fish into nets. The light is placed inside of a glass globe and sunk to the desired depth. The fish flock to that part of the sea thus brilliantly illuminated.

Washoe Lake is said to be now well filled with fish, native and planted. The catfish planted in the lake are said to have multiplied at a wonderful rate, and the California perch are also becoming plentiful. The natives are suckers and what is called white fish, both very small and rather soft.

Lake fishing within convenient distance of San Francisco is now exceedingly poor, where but a couple of years ago they afforded royal sport and recreation. Pillaritos, San Andreas, Merced, Chabot's and Coleman's are now hardly worth visiting.

We see by the *Mountain Messenger* (Downieville, Sierra county) that Andy Steele brings into town a fine lot of river trout nearly every evening. The boys, too, during school vacation, are now trying their hand with the rod, but they have not stocked the market, as Andy finds ready sale so far for all he can catch.

BIG FISH.—John Burns, who has been at work at the Four Hills, came to town this week, says the *Mountain Messenger*, bringing some of the largest trout we have seen in this section, one weighing 3½ pounds, and 20½ inches in length, caught out of upper Spencer Lake. He says there is but little snow at the Hills, and that is fast disappearing.

Miss Jean Parker, principal of one of the public schools, is to be credited with and complimented for having caught and landed without assistance, a *Dolly Varden* trout, weighing four and one-half pounds. The fish was caught in the McCloud river while the lady was enjoying her vacation a couple of weeks ago.

Bishop Bissell, here on a visit from the Eastern States, and a veteran fly fisher, has just returned from a trip to the McCloud river. He is enthusiastic in his praises of the *Red Banded trout* of those waters, considering them far superior to the *salmo iridea*, or *Dolly Varden*. The *Red Banded trout* is a gamey fish, and runs from one-half to four pounds in weight.

The big bed of hard clams recently discovered in Long Island Sound, off the mouth of Hempstead Harbor, N. Y., is apparently inexhaustible. More than one hundred vessels from Long Island, New Jersey, and Connecticut are constantly working the bed, making on an average \$150 per day per boat. It is estimated that over 300,000 bushels of clams have already been taken from the bed.

ROCK COD.—A party residing on Alcatraz Island discovered on Wednesday last a fine fishing ground about two hundred yards from the island and in a line between the Alcatraz fog bell and Selby's lead works. The fishing was done between tides and in about one hundred and twenty feet of water. He caught a large number of rock cods, some of them running as high as three pounds in weight. At suitable tide good cod-fishing is found at Saucelito.

The steward of Dietz Camp, Lake County, has changed his vocation, much to the surprise of the campers, stealing an opportunity, when not manipulating venison chops and dove pies, to angle for the spotted thoroughbred. He returned to camp with forty good-sized terrapin. The campers and epicures have since smiled each day at seven P. M. over his success, as it was a welcome addition to their fare.

At Lake Ann, near Fort Bidwell, Henry Woodson has started a fishery. He commenced operations three years ago with 2000 common brook trout. Now he has realized so handsomely from them that he has sold 30,600 and 12,000 spawn have been sent to Germany. The trout attained a weight of seven pounds in thirty-one months, which is remarkable rapid growing. He supplies the whole Bidwell country with fresh fish. The lake is forty-five acres in extent. He has also a small lake of six acres stocked with catfish. Mr. Woodson has made it a profitable business, and every year adds to his wealth.

Through some unaccountable source the waters of Schuylkill have become impregnated with a poisonous substance that has played a tremendous havoc with the funny tribe in that stream. At first it was attributed to an overflow from land where Paris green had been used in large quantities, but now the general theory is that the water is heavily charged with sulphur from the mine water of the Schuylkill Company, and that this coming in contact with the limestone causes the strange color. The reason of so many fish dying is that a white substance lodges in the gills, which smothers them. What forms this substance has not as yet been fully demonstrated.

James McClatchy, of the *Sacramento Bee*, is of a happy disposition, and at the best of times is unmindful of the severe castigation he now and then receives from the hands of his contemporaries. In answer to a recent tirade addressed against his chief, the editor retorts that as Mr. McClatchy "is and has been for some time fishing beneath the shadow of Shasta and returning to camp every evening with a suspiciously large string of fish and a suspiciously small amount of pocket money, these little love-taps are wasted upon the vacant air. Buried in the bosom of Nature, he is blissfully unconscious of our esteemed contemporary's effort to castrate him."

The *Reno Journal* states that at Lake Ann, near Fort Bidwell, Henry Woodson has started a fishery. He commenced operations three years ago with 2,000 common brook trout. Now he has realized so handsomely from them that he has sold 30,600, and 12,000 spawn have been sent to Germany. The trout attained a weight of seven pounds in thirty-one months, which is remarkably rapid growing. He supplies the whole Bidwell country with fresh fish. The lake is forty-five acres in extent. He has also a small lake of six acres stocked with catfish. Mr. Woodson has made it a profitable business, and every year adds to his wealth.

At Gloucester, Maine, there is considerable excitement among the fishery owners and fishermen, caused by a threatened innovation in mackerel catching. Preparations are making to put a steamer into the business, the fish to be manufactured into oil and guano, and diverted from their use as food. There are now one hundred menhaden steamers, and if the experiment is successful they will engage in mackerel catching. The employment of these steamers has undoubtedly driven off the menhaden, and the same effect will be produced on the mackerel. There is a general feeling that stringent laws should be at once enacted for the protection of the mackerel fishery, which gives employment to thousands, and is an important food industry.

BILLIARD TOURNAMENT.—The first of a series of contests is announced to take place in the billiard rooms of the Union Hotel at Sacramento, commencing on the 20th, and W. O. Bowman expects to see a large number of entries, as there are a goodly array of amateurs in the capital city. The conditions are the old four ball American game for a purse of \$100, one half to the first and the remainder to be divided between the next two.

BICYCLING.

The joint exhibition of the Olympic Athletic Club and Pacific Wheelmen takes place at their new grounds, corner of Fourteenth and Centre streets, Oakland, Saturday, July 22d, commencing at 2:45 sharp. Not the least interesting of the events will be the bicycle races, of which there are three—a half-mile, one-mile and a two-mile race. The entries for these events embrace the best racing talent of both the San Francisco and Oakland clubs, including some new men, and if the finishes are as close as they were at the former meeting, it will be a treat which no one should miss seeing.

In order to pay expenses, the small charge of twenty-five cents will be made for gentlemen. Ladies free.

We append the racing rules as adopted by the League of American Wheelmen, May 30th, 1882:

L. A. W. RACING RULES.

AS AMENDED AND ADOPTED AT THE ANNUAL MEETING HELD 30 MAY, 1882.

1. Entries and awards will be confined strictly to amateurs; and persons entering for these races, who are not members of bicycle or other athletic clubs whose rules of membership exclude professionals, must satisfy the judges that they are not professionals, either by their own statements in writing, or otherwise. Any wheelman competing in races other than those held under the auspices of the League, or of a League club in good standing, or of an organization whose games have not received the written sanction and endorsement of the League racing committee, will be disqualified from competition in future League races, unless this disqualification shall be subsequently removed by the board of officers of the League.
2. (a) An amateur is a person who has never competed in an open competition, (b) or for a stake, (c) or for public money, (d) or for gate money, (e) or under a false name, (f) or with a professional for a prize, (g) or with a professional where gate money is charged, (h) nor has ever personally taught or pursued bicycling or any other athletic exercise as a means of livelihood. —L. A. W. Rule 25.
3. Any competitor making a false entry will be disqualified.
4. Choice of change of machine, and choice of costume, are not limited.
5. Each competitor will receive from the judges, before the start, a card bearing a number, which must be worn during the race.
6. The position in each race will be drawn by the games committee and printed in the programme of entries.
7. All starts will be from a standstill, and the machines are to be held in position until the signal is given by the starters. Any contestant starting before the word is given shall be placed one yard behind the starting line, and an additional yard for each repeated false start.
8. Riders must pass on the outside (unless the man passed be dismounted), and must be at least a clear length of the bicycle in front before taking the inside; the inside man must allow room for his competitor to pass on the outside.
9. Any competitor guilty of foul riding will be disqualified.
10. Any protest against a competitor respecting his qualification as an amateur must be lodged with the judges before the start is effected; and any protest respecting foul riding or breach of rules must be made to the judges immediately after the heat is finished.
11. Competitors may dismount during a race at their pleasure, and may run with their bicycles if they wish to; but they must keep to the extreme outside of the path whenever dismounted.
12. The right is reserved to the judges of refusing or cancelling any entry, if necessary, before the start, of adjudicating any questionable entry, of deciding any other point not provided for, and of making any alteration in the programme that they may deem necessary.
13. The decision of the judges and referee will in all cases be final.
14. All championship races shall be held under the immediate supervision of the League or its constituent clubs. No trotting, athletic or other non-League organization shall be allowed to hold State or other bicycle championships in which League members shall compete.
15. Championship races shall be run in one heat, or should the number of starters be too large, in trial heats, and a final in which the winners and seconds in trials shall compete.
16. In handicap races the handicaps must be drawn up by a League member or committee of the same, and written reports of the handicaps and results must be sent to the racing committee L. A. W. for reference. No handicap races shall be run in heats.
17. No League member will be permitted to race under trotting rules; and no prize won or time made with a flying start will receive the sanction of the League.
18. The rules of the National Association of Amateur Athletes shall be sanctioned by the League, and no League member competing in the games of the Association or of its associate clubs, shall be barred from competition in the League races or from enjoyment of any of its privileges.
19. The racing committee L. A. W. shall be empowered to appoint at its discretion a League handicapper, who shall, for a stated remuneration, frame the handicaps of the League and of such of its associate clubs as shall desire his services.

E. C. HODGERS, Boston, Mass.,
A. A. HATHAWAY, Milwaukee, Wis.,
CLYMER WHITE, Baltimore Md.,
Racing Committee L. A. W.

WELL-MATCHED WHEELMEN.—A bicycle race for the twenty-five-mile champion belt took place June 17, at Leicester, Eng., the contestants being F. Wood and R. James, who in a previous race for the trophy, May 27 (John Keen, G. W. Waller and C. R. Garrard also competing), made a dead heat. It was expected that the race of the 17th ult. would have settled the question between them, but, to the surprise of the spectators, the result was another dead heat. The finish is thus described in *The Sporting Life*: "Just before entering the last lap, James made his effort with a well-timed spurt, which evidently took Wood by surprise, for in less than a twinkling the Birmingham man was soon six yards ahead (the greatest distance that ever separated them), and, holding this lead to the top of the hill, the race appeared a foregone conclusion for him. At about three hundred yards from home, however, Wood, spurring pluckily, began to gain inch by inch, and finally making the turn into the straight he was not more than three yards behind. Keeping up the spurt, he still gained, and ten yards from home their wheels overlapped, and by a desperate effort Wood just managed to draw up dead level on the post, amidst great excitement. Thus for the second time the two finished a dead heat, a thing unprecedented in the annals of long-distance racing. The friends of both were disappointed at the result, and each claimed the victory, but the judges' verdict was received without a murmur from the spectators, and gave general satisfaction. After the race it transpired that both of them were a little 'off' in condition, hence neither cared to force the pace from start to finish."

The difficulty of propelling tricycles up-hill, which formerly militated against their general adoption, is now fairly overcome. It was long ago seen that it would be most desirable for hill-climbing purposes to be able to substitute power for speed when ascending inclines, and several clumsy attempts to accomplish this were made; but the heavy, cumbersome differential gear applied was too complicated and too easily disarranged to meet with much favor among wheelmen, and moreover the great cost of the machines prevented their general adoption. Now, however, there are two or three ingenious arrangements by which a turn of the wrist will change speed for power, and vice versa. All the best tricycles are now fitted with the latest bicycle improvements, such as ball bearings to all wheels, etc.; and when I mention that I have seen a tricycle driven at the rate of fifteen miles per hour, it will be seen that the modern tricycle is no mean competitor of the bicycle, while its greater safety and baggage-carrying capabilities mark it out as the favorite travelling vehicle. Last year the Prince of Wales made tricycling very popular by purchasing a Salvo for his own use; and the Duke of Teck and other members of the royal family having copied his example, a regular rage for three-wheelers has set in. There

are about sixty distinct makes now to be had, and the number is increasing daily. "Sociable" machines to carry two, three, four, and even more riders are to be had. The government has recognized the utility of the tricycle by supplying machines to many country mail-carriers; and in short, the three-wheeled machine bids fair to eclipse its two-wheeled rival in popularity. Nearly twenty-five per cent. of the riders are ladies.

It appears to be pretty difficult this season to win a twenty-five-mile professional champion bicycle race in England, each of the last two attempts we have heard of to date having resulted in a dead heat in 1h. 26m. 15s. and 1h. 29m. 31s., respectively.

One of the things to be remarked on the streets of London is the numerous bicycles. They are quite the fashion, not to say the rage, just now. One meets them everywhere. Many of them are elegant and costly. Their right to the street is recognized, as well and as much as that of any other vehicle. In the evening they carry a blue light. The manner of riding them has evidently been made a study, for the riders sit gracefully, and seem to drive them with great ease. There was an exhibition of bicycles and bicycle riding this week at 11 Unipon Court, and a procession was formed numbering 2,350 bicycles with their riders. The procession was five miles long, two abreast. You can perhaps imagine the fine sight presented by such a procession, all the men experienced riders, all the bicycles of the most elegant kind, and all the riders in uniform. Then there was a great race, over a course of one hundred miles, the course being from London to Bath. Twenty-four men entered the race, and of these fourteen made the distance of one hundred miles in nine hours, and two made the distance in seven and one-half hours. It has become with the young men a favorite mode of travel, and tours are being made by them to every part of England every week. What the donkey is in Egypt the bicycle is becoming to England.

The President of the Fairfield County Agricultural Society (Conn.) wants to put a fast trotting horse against J. S. Prince, the American pro-champion bicyclist, twenty miles run, for a purse of \$300 or \$500. Prince has expressed his willingness to make the race.

THE LARGEST BICYCLE MANUFACTORY.

The enquiry came from Sacramento: "Which is the largest manufactory of bicycles in America, and also the largest in England?"

Answer: The largest manufacturing establishment of bicycles in the United States is at the Wheel Sewing Machine Co.'s Works, Hartford, Conn. It manufactures partly from home stock, but imports the most important parts from England. They claim to have facilities for turning out upwards of fifty per day if the demand requires it. These machines are made for the Pope Manufacturing Co. of Boston, and are called Columbias. There are a few other makers in a small way, but this is the only large factory.

There are upwards of 200 considerable makers in England, but the largest establishments are at Coventry, Birmingham, Nottingham, Leeds and London.

The oldest establishment is at Coventry, and probably the largest is the Excelsior Works of Bayliss & Thomas, who in addition to a large home and foreign demand are the manufacturers of the Harvard, made solely for the American market, and the most popular machine in the United States. This factory turns out upwards of fifty complete machines per day during the season, and filled one single order this year from the United States agents for 250 machines.

THE CHAMPION TEAM.

There has long existed a great rivalry among our rich amateurs of trotters to possess the best double team in the country. Until the recent performance of Dick Swiveller and Edward, it was generally conceded that a steady 2:18 gait might be expected this season, and among the candidates for first honors were named W. H. Vanderbilt's Small Hopes and Lysander, that had already shown 2:20; T. C. Eastman's Glendale and Captain Jack, 2:24; W. J. Gordon's Clingstone and William H.; and I. Cohnfeld's Helene and mate. But it is probable that the performance of Frank Worth's team, 2:16½, at the Gentlemen's Driving Park, New York, on July 14, will remain the top notch of the season. The contest was against time, and was of an impromptu character. Shepherd F. Knapp offered to wager Frank Worth \$1,000 that the team could not trot in 2:20. Mr. Worth accepted the wager, and put John Murphy behind the team, in a road wagon. The judges were Messrs. Bush, Morgan and Alley, and over one hundred gentlemen prepared to time the trot. The horses were in tiptop condition, and everything was favorable for fast time, but few were willing to bet that the teams would trot in 2:20. When everything was in readiness Murphy let them out, and they whizzed by the wire at a rattling pace. Murphy carried 153½ pounds, which was overweight. The first quarter was made in 33½; the half in 1:05; the three-quarters in 1:40; and the full mile in 2:16½—by long odds the fastest in the world by a team. Great excitement prevailed among the spectators, many of them insisting that the team did better than 2:16½. Dick Swiveller is by Walkell Chief, from Madam Swiveller by Sayre's Harry Clay, with a record of 2:18, and Edward is by Fisk's Hambletonian Starr, dam by Magna Charta, and his best time 2:19. On the very day that this trot was made, Mr. Cohnfeld, in order to promote gentlemanly sport between road teams, challenged with Helene and mate to trot any team in the country for \$1,000 a side, the match to take place at the track of the Gentlemen's Driving Park, and this may perhaps lead to an exciting contest for the championship of the double teams.

ANSWERS TO CORRESPONDENTS.

SAN FRANCISCO, July 18th, 1882.

EDITOR BREKDER AND SPORTSMAN: Is it possible to have one card in hand which will count three with the starter, according to cribbage count? If so, explain. ANSWER—Jack in hand; starter, five of the same suit.

SAN FRANCISCO, July, 1882.

EDITOR BREKDER AND SPORTSMAN: During a game of crib a dispute arose between the players regarding the number of points contained in a hand consisting of three trays and two nines. The result was a wager, with an agreement to abide by the decision of your paper. Respectfully, B. B. ANSWER—Twenty.

DOVE SHOOTING.—There is an enquiry from an Eastern Sportsman where to find a day's dove shooting, the main consideration being within such a distance of San Francisco as will not compel staying away over night. Fair shooting can be had in the neighborhood of Mountain View, and from San Mateo South, and West of the railway there may be a chance for some sport.

THE STAGE.

Very pleasing and attractive were the entertainments offered at the Baldwin and the California theatres last week, and their bright and mirthful incidents artistically portrayed leave but little regret for the drama that has now almost definitely fizzled out at the pretty Market street theatre.

One might as well try to analyze an omelette soufflé in a scientific manner as to render a strict description of the ever-varying scenes and startling charges that are to be seen in *Le Voyage en Suisse*. It is really a pantomime of the olden time cleverly adapted to these latter days. There is the same story of the thwarted loves of Harlequin and Columbine, owing to the persecutions of aged Pantaloon, but by the aid of the Clown and his friend the Sprite, the lovers, in the end, are united and nothing is wanting but the transformation scene of the Realm of Bliss, a sort of glorious United State to which our youths and maidens so ardently aspire. The Hanlons are not only excellent acrobats, but possess mimic powers that are very telling in such a piece as this, and through their agility, nerve and humor, aided by many good artists in their specialties and by a series of mechanical *mises-en-scene*, they give an entertainment that has already taken a firm hold in the minds of theatre-goers. And yet it must be owned that in the old pantomime there was always some relief from the rattling sensational scenes in which both Clown and Pantaloon were hotheaded out of their wits by the power of Harlequin's magic wand, there was a little *pas de deux* between Harlequin and Columbine, and the scene-shifters and stage-carpenters were hurrying like a pack of demons to prepare the next tableau. Now, this relief to a pleased and excited brain is wanting in the *Voyage en Suisse*. It is all bustle, movement and surprise, and it would be a good thing for the Hanlons to take a lesson from "The Purveyor of Sausages to H. M., the Queen of England," who was called as an expert in a case recently decided in England, where he testified that in the best sausages the meat had to be mixed with bread crumbs, or otherwise they were too rich for the table. This "*Sausage en Suisse*" is too meaty for the average digestion.

The Mastodon Minstrels continue their successful career, varying and adding to their programme every week. The principal artists get almost all the praise, but the songs are wonderfully well backed up in their execution by the many agreeable voices that have not as yet been deemed of sufficient timbre and compass to promote to solo importance. The groupings, too, are very well done and show the hand of a skillful stage manager, but the sketches could be improved upon by the outlay of a small sum of money among the writers who devote themselves to this eccentric style, and it would be but a drop in the bucket of these mastadonic expenses.

The gardens continue to draw immense crowds, and such is the growing interest taken in these well conducted establishments that it must lead to a great competition for this valuable patronage, and we shall not be surprised to see within a short time the Grand Opera changed into halls of dazzling light where light opera and ballet will be produced on a scale as yet unequalled on the Pacific Coast.

Henry Labouchere, of *Truth*, almost always likes to side with the minority, and as the London critics are very unanimous in their condemnation of the new drama, "The Roman Rye," he alludes in his notice to "certain doubtless very earnest gentlemen, who are beating their breasts and tearing their hair because Mr. Sims' play is not what it never professed to be. When these critical gentlemen talk of intellect, and taste and art, and ennobling influences, the higher purpose of the drama, and so on," says Henry, "let them remember what honest John Ryder said the other day about blank verse—the public do not want it." In the meantime the drama continues to draw large and enthusiastic audiences.

On Monday last there was a tempest in a teapot among the theatrical critics, owing to the fact that the strictest orders were issued that no one should be admitted to the Baldwin unless furnished with a ticket. These orders of admission, according to the idea of Colonel Brown, had been sent in sufficient quantities to the different leading journals, and the critics, as usual, had distributed them without regard to self. Their surprise was great, therefore, and on a par somewhat with the pantomime that was going on inside, when they found the portals closed against them, and themselves, in a figurative point of view, all agog on the sidewalk. The remarks on the play in the journals on the succeeding morning were of the tersest description, and as the doyen of our critics mentions, "the prospect is for a bon voyage, but much depends on the man at the helm."

Londoners are still indebted to foreign players for the only dramatic productions calling for comment. Adeline Ristori at Drury Lane and Celine Chaumont at the Gaiety, are struggling against the cheerless climatic influences and delighting large audiences in "Macbeth" and "Divorçons" respectively, Ristori being in addition burdened with a strange language. Her impersonation of Lady Macbeth has created a deep impression, notwithstanding the feebleness of the support. Mr. Rignold's career as Macbeth has been brought to a sudden end by Mr. Barnes as Macduff, who accidentally gave the Thane of Fife half an inch of cold steel full in the chest.

The author of the play entitled "The Two Brothers," recently produced at Chicago with James O'Neill in the principal character, has sued Mr. Gardiner for damages, inasmuch as that gentleman, as the manager of the company, allowed the drama to be put on the stage in an inefficient manner. This is quite a novel point, and if the plea holds good, it will not conduce to the production of new plays, it being already a peculiar task to get a manager even to enroll a manuscript.

Octave Feuillet is to read, August 15th, to the company of the Gymnase, Paris, his new play, "Un Roman Parisien," with which the season at that theatre is to be re-opened the latter part of that month. This author is well known in this country, by his delightful drama, "The Romance of a Poor Young Man," and if this is as good a play, it will prove to be a relief to the trashy melodramas with which we are seemingly to be plagued and pestered during the next season.

MARKET REPORT.

FLOUR—The market is unsettled, and quotations are more or less nominal at \$5 50@5 62½ for city extras, and \$4 50@5 25 per bbl for the product of the interior mills.

WHEAT—European advices are less favorable, and prices here show a downward tendency. The report of the San Francisco Produce Exchange shows that on July 1st we had on hand 2,822,903 cts of old crop wheat, against 12,414,278 cts for the corresponding time in 1881. Current quotations for spot lots of No. 1 range in the neighborhood of \$1 72½; and for future deliveries of the same, \$1 73½ is about the obtainable figure. For parcels for immediate delivery the market is quiet, but for future months there is more inquiry. The first full cargo of the new crop is now on board of ship and will be dispatched during the current week.

BARLEY—New crop brewing is little inquired for, but choice old is in active demand. Chevalier is inquired for at \$1 40 for present and future months, but at such figures holders and growers are not sellers. The first consignment of the season of the new crop of Chevalier came to hand during the past week, and was sold, at price withheld, for export to New York, per steamer. There continues to be quite a speculative demand for feed, and on "call," \$1 25 is freely offered for July delivery, and \$1 23 is offered for August and September, and \$1 25 for October and November. Trade in futures on the Produce Exchange call is active, and the future of the market is a question of serious importance to both buyers and sellers.

OATS—The speculative demand for lots for future delivery continues quite active, but the difference in sellers' and buyers' views is such that trade is restricted. Contracts already made on call are of considerable magnitude and there seems to be a disposition on the part of sellers to hedge. No. 1 is in demand at \$1 72½ for spot lots, and extra choice would, probably, command \$1 90 per ctn. Consignments of the new crop have already been received, and further arrivals are expected within the current week.

CORN—There is a decided disinclination on the part of would-be buyers to become purchasers at present asking prices, and, as a consequence, the market is inactive. For choice large Yellow \$1 70 is asked for spot lots, and \$1 60 per ctn is bid for the same.

RYE—It is well known that the stock of old is unusually light, but information in reference to the new crop is meagre; as a consequence trade is light. For choice old \$2 is asked, while for the same grade, seller 1882, \$1 65 per ctn is the top price bid.

BRAN—There is considerable speculative inquiry on call, but transactions are light. For spot lots \$14 50@ \$14 75 per ton is a fair quotable range.

FEED AND MILLSTUFFS—Shorts, \$17@18; Middlings, \$22@25; Ground Barley, \$31 for new, \$34 for mixed, and \$36 for old; Oil Cake Meal, \$32 50; Cracked Corn, \$39; Cornmeal, \$39 per ton.

HAY—Receipts continue large, but an active demand causes steady prices. For all kinds the range is \$10@ \$15 per ton.

STRAW—Recent receipts have been free and the market is weak at 70@75c per bale.

SEEDS—Mustard is scarce at 2@2½c for Yellow, and 4@4½c for Brown; Alfalfa, nominal; Canary, 5½c per lb. Supplies of the latter are light, and holders are firm for full figures.

BEANS—The market is quiet, and quotations more or less nominal. Pea and Small White, \$4 25; Butters \$3 25@4 25 for small and large; Bayos, \$3@3 25; Pink and Red, \$2 50@3 00; Limas, \$1@4 50 per ctn.

ONIONS—Receipts are free, and market dull so weak at 60@75c for silverskins, and 35@40c per ctn for Reds.

POTATOES—The demand is active, but receipts are of sufficient magnitude to cause a weakening in prices. Quotable at 75@81 12½ per ctn, as to kind and condition.

HONEY—Comb is quotable at 15@17c, while Extracted sells for 8@9c per lb.

EGGS—Choice fresh ranch are in demand at 30@32½c per doz.

CHEESE—Though supplies are free, the market is steady at 12½@14c per lb for California manufacture.

BUTTER—The market is very firm and has an advancing tendency. Choice fresh ranch roll is scarce and waited at 32½c; while good sells for 30c; fair, 28@29; California fl. kin, 27½@30c per lb.

GAME—The market is poorly supplied with Venison, and quotations for the same range from 12½@15c per lb. Hares, \$1 75@2 00; Rabbits, \$1@1 25; Doves, 50@75c per doz.

Poultry—Turkeys are scarce at 18@20c per lb; Hens, \$6 50@8 00; Young Roosters, \$7@9 00; Old do, \$8@10 00; Broilers, \$6@8 00; Ducks, \$1@5 00 per doz; Young Geese, \$1 50@1 75; Old do, \$1@1 25 per pair.

HIDE S—The market is steady. Dry, 19@20c; Sheepskins, 25@30c for shaggy; 11@50c for short wool; 60c @81 for medium and \$1@1 50 for long hair; Deerskins, 20@50c; Silted skins, 5@11c per lb.

TALLOW—There is a good demand for desirable parcels at 7½c per lb.

PROVISIONS—There is considerable excitement in the market and prices are on the ascending scale. California bacon, 16@17½c for smoked; Sides, 16½@17c; California hams, 15@17½c; Eastern do, 17½@18½c; California lard, 14½@15½c per lb, according to packages; Clear pork \$28; Extra prime, \$21 50@22; Extra clear, \$23@28 50; Mess, \$25@26; Mess beef, \$13@13 50; Extra do, \$14@15 50 per bbl; Smoked beef, 14½@15c per lb.

Hops—Spot quotations are largely nominal. For future delivery the bids are 25@27c for Oregon and Washington Territory, and 26@28c per lb for good to choice California.

WOOL—There is an improved inquiry, and the market is in a more acceptable condition for choice grades of Northern, Humboldt, Sonoma and Mendocino, which sell at 24@27c; San Joaquin, 1@20c; Coast, 15@20c; Oregon, 20@27c per lb. Recent receipts from Mendocino and Sonoma Counties have been of considerable importance.

FRUITS—The market is fully supplied with all seasonable kinds. Peaches, 50c@81 per bskt; Apples, 75c @81 25; Pears, 75c@81; Bartlett's, \$1 70@1 75 per bx; Figs, 50c@81; Grapes, 75c@81 25 per bx; Cantaloupes, \$3@3 50; Watermelons, \$2@3 per doz; Currants, \$3 50@

4 50; Strawberries, \$9@13; Blackberries, \$3@4; Raspberries, \$10@11 per ctn; Plums, 2@4c per lb.

VEGETABLES—Marrowfat Squash, \$15@20 per ton; Summer Squash, 37½@42½ per bx; Pease, 2½@6c; String Beans, 2c per lb; Cucumbers, 35@50c; Tomatoes, 75c@1 50 per bx; Green Corn, 10@15c per doz; Rhubarb, 50@75c; Okra, 10@12½c; Egg Plant, 5@6c per lb; Green Peppers, 75c@1 per bx.

MEAT—Beef, 5@8c; Mutton, 4@5c; Lambs, 6½@7c; Veal, 6½@9c; Dressed Pork, 11@11½c; Live do, 6@8½c per lb.

The Delta has received a copy of the BREEDER AND SPORTSMAN, published at 508 Montgomery street, S.F. It announces itself to be the turf and sporting authority of the State. Joseph Cairn Simpson is the editor. The very name of this gentleman is sufficient to guarantee a paper pre-eminently devoted to the interests of thorough breeding in stock, and the impartial dissemination of sporting events. It is sixteen pages, and can be had for five dollars a year, in advance.—[The Mussel Slough Delta, July 14.]

CALIFORNIA'S EXPOSITION.

THE 29th ANNUAL

STATE FAIR

— BEGINS AT —

SACRAMENTO, CAL.,

ON THE 11th AND CLOSES ON THE 16th OF SEPTEMBER.

The Premium List embraces liberal awards for all kinds of Live Stock, Machinery, Implements, etc., Textile Fabrics, Mechanical, Agricultural and Horticultural Products, Fine Arts, etc.

Any further information may be had upon application to the Secretary, from whom Premium Lists may be procured.

REVISED SPEED PROGRAMME FOR 1882.

FOURTH ANNUAL MEETING OF THE

SONOMA COUNTY

Agricultural Park Association, AT SANTA ROSA.

FIRST DAY—Tuesday, Aug. 22, 1882.

No. 1—TROTTER RACE.—Free for all two-year-olds owned in the District. Mile heat, 2 best in 3; purse, \$200. First horse, \$120; second, \$60; third, \$20. Closed on the first day of May with the following entries:
E. B. Conway names ch. c. Ideal, by Abbottford.
J. E. Foster names a. m. Clara Patterson, by Grey McChell.
G. C. Fountain names blk. f. May Day, by Eugene Cassey.
P. J. Shafter names g. b. Greyson, by brother to Rustie.
Steve Crandall names b. f. no name, sire unknown.

No. 2—TROTTER RACE.—Free for all horses that never beat 2:35; purse, \$400. First horse, \$240; second, \$120; third, \$40.

SECOND DAY—Wednesday, Aug. 23.

No. 3—RUNNING RACE.—Half mile heats; 3 best in 5, free to all; purse, \$250. First horse, \$150; second, \$75; third, \$25.

No. 4—PACING RACE.—Free to all horses that never beat 2:25; purse, \$300. First horse, \$200; second, \$75; third, \$25.

THIRD DAY—Thursday, Aug. 24.

No. 5—TROTTER RACE.—Free for all three-year-olds owned in the District; purse, \$300. First horse, \$180; second, \$90; third, \$30. Closed May 1st, with the following entries:

C. Stingle names b. f. Dobby Mott, by Grey McClellan.
W. J. Starr names blk. f. Starr, by Naubuck.
E. B. Conley names b. c. Magnet, by Brigadier.
J. E. Foster names br. s. Buck Foster, by Genl Dana.
W. M. Wood names b. c. Ned, by Overland.
L. H. Boggs names b. c. Warwick, by Milton Medium.

No. 6—TROTTER RACE.—Free for all that never beat 2:25; purse, \$500. First horse, \$300; second, \$150; third, \$50.

FOURTH DAY—Friday, Aug. 25.

No. 7—TROTTER RACE.—Free to all horses that never beat 2:40; purse, \$500. First horse, \$300; second, \$150; third, \$50.

No. 8—RUNNING RACE.—Free for all; single dash; one mile; purse, \$200. First horse, \$120; second, \$60; third, \$20.

No. 9—TROTTER RACE.—Free for all horses that never beat 2:30; purse, \$500. First horse, \$300; second, \$150; third, \$50.

FIFTH DAY—Saturday, Aug. 26.

No. 10—RUNNING RACE.—Free for all three-year-olds one mile and repeat; purse, \$200. First horse, \$120; second, \$60; third, \$20.

No. 11—TROTTER RACE.—Free to all that never beat 2:21; purse, \$700. First horse, \$400; second, \$200; third, \$100.

ENTRIES.

1. Entries must be made in writing and dated, and give sex, color and marks of horse; also name and residence of owner.
2. State number of the race in which you wish to enter.
3. State name of sire and dam of horse entered if known; if unknown, state the fact.
4. State name and postoffice address of party entering the horse.
5. If name of horse has been changed, state former name.
6. Send entrance fee to all nominations.

CONDITIONS.

1. Entries to all races, except Nos. 1 and 5, to close with the Secretary at 12 o'clock on Monday, the first day of August, 1882.
2. Entrance fee to the above races will be 10 per cent. of the purse, and must accompany the nomination.
3. In all races five to enter and three to start. Any horse distanced or not starting will forfeit his entrance fee. No money will be paid for a walk over.
4. Rules of the Pacific Blood Horse Association to govern running races, and of the National Trotting Association to govern trotting.
5. No horse entered in a purse can be withdrawn except by consent of the Judges.
6. All trotting and pacing races, except No. 1, will be mile heats, 3 best in 5.

J. P. LARK, President.

CHARLES HOFFER, Secretary.

Pacific Breeders' Association. Embryo Trotting Stakes, 1882.

Sweepstakes for foals, 1882, \$100 each; \$25 forfeit; \$10 declaration; \$3 nomination fee.

There are three stakes under the denomination of Embryo for 1882, viz., for yearlings, two-year-olds, and three-year-olds. The nominator chooses whether he will name in one or all of them. The yearling's distance is a dash of a mile; two-year-olds, heats of a mile, 2 in 3; three-year-olds, 3 in 5—all in harness. Five dollars must accompany the nomination; the declaration, \$10; on or before the 1st of September of the year the race is to be trotted, the forfeit, \$25, on or before the day, which is ten days previous to the date fixed for the race. If the declaration or forfeit is not paid at the specified time, the subscriber will be held for the full amount of the stake. Pedigree, color, marks, and date of foaling must be given, and the following will be the formula for making the nomination:

Secy Pacific Breeders' Association. I name in Embryo Stake of 1882, the — — — colt (or filly), foaled —, 1882, by —, dam —, by —, in the Stakes of 1883, 1884, 1885, if the nominator desires to enter in all of the Stakes. If he desires to name in one or more, specify which years. The \$5 fee covers the first expense if the colt is named in one or all of the races; payment of the declaration \$10 absolves from further payments. The race to be trotted on the first Saturday of November of each year, if good day and track, and on the track named by the officers of the Association. If the day or track is of good, on the first good day and track following the date. The winner shall receive six-ninths of the whole sum, stakes, forfeits, and other sources of revenue; the second, two-ninths; the third, one-ninth. National Trotting Association Rules of 1882 to govern. Nominations to be made to JOS. CAIRN SIMPSON, Secretary pro tem. of Pacific Breeders' Association, office of BREEDER AND SPORTSMAN, 508 Montgomery Street, San Francisco.

JAMES M. M. SHAFER, President.

A. P. WHITNEY, Vice-President.

N. T. SMITH, Treasurer.

No. 12—SAME DAY—TROT—For all four-year-olds; purse, \$500; first horse, \$300; second, \$180; third, \$60.
No. 13—SAME DAY—RUNNING—SELLING RACE.—Purse, \$250; free for all; 1 mile dash; second horse to receive \$75; horses entered to be sold for \$1,000, to carry entitled weight; 2 pounds off for each \$100 under fixed valuation.

FIFTH DAY—FRIDAY, SEPT. 8.

No. 14—RUNNING—CONSOLATION PURSE.—\$250 for beaten horses; mile-and-a-quarter dash; second horse to receive \$75; 10 per cent. entrance.
No. 15—SAME DAY—LADIES' RIDING TOURNAMENT.—There will be several very choice and elegant prizes to be competed for, contributed by the merchants and citizens of Oakland and San Francisco; the lady winning first prize to have first choice, the second, second choice, and so on until all the prizes are distributed. Ladies wishing to compete for premiums will send their names to the President or Secretary on or before the first day of September, 1882, indorsed by at least two gentlemen of the Society. Conditions will be published in the daily papers.
No. 16—SAME DAY—TROT—2:25 Class.—Purse, \$500; first horse, \$480; second, \$240; third, \$80.
No. 17—SAME DAY—SPECIAL TROT AGAINST TIME.—A purse of \$50 will be given the yearling making the best time; a full mile to harness; no entrance fee.

SIXTH DAY—SATURDAY, SEPT. 9.

No. 18—COMPETITIVE CADET DRILL PRIZE.—\$150 Gold Medal. Competition open to all educational institutions in the State.
No. 19—SAME DAY—COMPETITIVE MILITARY DRILL.—A prize of the value of \$250 will be offered by the Association to the best drilled Military Company in the State of California. Rules and conditions to be published hereafter. It is the intent of the Directors to have the first competing companies determine what the prize or trophy shall be, and to have the same annually competed for, until it shall have been won three times by the same company, when it shall become the absolute property of the winning company.
No. 20—SAME DAY—GRAND BICYCLE TOURNAMENT.—For the Association's Gold Medal to first, Silver Medal to second, and Bronze Medal to third; 1 mile dash; open to all bicyclists.
No. 21—SAME DAY—TROT—Free for all; purse, \$500; first horse, \$480; second, \$240; third, \$80.
No. 22—SAME DAY—A SET OF HARNESS, of the value of \$125, will be offered for gentlemen's roadsters; best two in three; owners to drive.
By a "gentleman's roadster," is meant any animal owned and driven on the road by any gentleman for his own private pleasure.

CONDITIONS.

Entries to all running stakes, trotting and pacing races, to be made to Secretary Walker, on or before August 1, 1882. Forfeits in running stakes, and the entrance fee of 10 per cent. on the trotting and pacing races, should in all cases accompany the nominations and entries.
All the trotting and pacing races are the best three in five. In all, five to enter, and three to start.
Entrance fee, ten per cent. on purse.
When there are eight or more starters in a trotting race, 150 yards to be a distance.
National Trotting Association rules to govern trotting, but the Board reserves the right to trot heats with any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
All offers in trotting races are confined to horses on the Pacific Coast May 22, 1882.
In running races, three or more entries required to fill.
Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous. No added money will be paid for a walk-over.
Horses entered in purses can only be drawn by consent of the judges.
Rules of the Pacific Coast Blood Horse Association to govern running races, except as above specially provided.
All entries to be made in writing, to give sex, color and marks of horse; also, name and residence of owner; and in running races colors to be worn by the rider. And in all, any other particulars that will enable the spectators to distinguish the horses in the race.
Write "Entries to races" on outside of envelope.

L. WALKER,
Secretary.

A. C. DITZ,
President.

\$12,500 In Purses and Stakes.

No. 19—RUNNING—CONSOLATION PURSE.—\$250 for beaten horses; one mile and repeat; entrance free; second horse to receive \$50.

SIXTH DAY—SATURDAY, SEPT. 16.

No. 20—TROT—2:19 class; purse, \$1,200.
No. 21—TROT—Purse, \$800; for double teams of 2:30 horses.
No. 22—TROT—OCCIDENT STAKE FOR 1882, closed in 1881 with twelve nominations.
No. 23—SPECIAL TROT AGAINST TIME.—\$250 in plate will be awarded to any stallion that beats Santa Claus' time (2:17).

Entries for the following events for 1883-4 were ordered to be closed with the above races:
No. 1—RUNNING—CALIFORNIA DERBY STAKE.—For foals of 1880, to be run at the State Fair of 1883. One and one-half miles dash; \$50 entrance, p. p.; \$300 added; second horse, \$100; third, \$50.
No. 2—Same stake, for foals of 1881, to be run at State Fair of 1884. Same conditions.
No. 3—RUNNING—POST STAKE.—Three mile dash, for four-year-olds, in 1883; \$100 entrance; \$25 forfeit; \$500 added; second horse, \$150; third horse, \$100. To be run at the State Fair of 1883.
No. 4—RUNNING—CALIFORNIA ANNUAL STAKE.—For two-year-olds, foals of 1881. Dash of one mile; \$100 entrance; \$25 forfeit; \$250 added; second horse, \$100; third, \$50. To be run at the Fair of 1883.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.
National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
To fill running races, three or more subscribers are necessary.
All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.
All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.
Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday the Monday previous; and on Friday the Wednesday previous, by twelve o'clock A. M. This rule is obvious, and must be strictly adhered to.
No added money paid for a walk-over.
Horses entered in purses can only be drawn by consent of the judges.
Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.
All entries to be made in writing, giving name, sex, color, and marks of horse; also, name and residence of owner. In running races, full colors to be worn by rider; and drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers. This is necessary to enable spectators to distinguish the horses in the race.
Entries to all the above races to close with the Secretary on Tuesday, August 1, 1882.
Write "Entries to Races" on outside of envelope.

EDWIN F. SMITH,
Secretary.

HUGH M. LARUE,
President.

SPEED PROGRAMME.

The nominator not required to name his horse, but simply send his cash (\$150) with his own name, August 1, 1882. He has then earned the right to start any horse eligible that he may fully control, provided the horse he starts be named to the Secretary, September 1, 1882. Four moneys.
SATURDAY, SEPT. 23D.
No. 14—PACIFIC COAST TROT—2:28 Class; purse \$1,000, and \$200 added if more than ten entries. Four moneys.
No. 15—PACIFIC COAST PACING—2:25 Class; purse \$500, and \$200 added if more than ten entries. Four moneys.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.
In all these Races (Pacific Coast Novelty Race excepted) four moneys, \$25, 15 and 10 per cent. of purse. Entrance fee, 10 per cent. of purse, and \$1.87 accompany the nomination. District Races will close with the Secretary at 5 o'clock P. M. of July 15, 1882. Pacific Coast Races to close with the Secretary August 1, 1882.
When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.
Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.
All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.
All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above, otherwise, old weights to govern.
For a walk-over in any race a horse shall only be entitled to his own entrance fee and one-quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.
Horses entered in purses can only be drawn by consent of the judges.
The Board reserves the right to change the day and hour of any race, if they deem it necessary.
Unless otherwise ordered by the Board, no horse shall be qualified to enter in any District Race that has not been owned in the District six (6) months prior to the day of the race; and any entry by any person of any horse so disqualified shall be held liable for the entrance fee so contracted without any right to compete, and the same shall be held liable to penalties prescribed by the Rules of the National Trotting Association and expulsion from this Association.
Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as especially provided.
In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.
In all the Coast Races noted above, SIX ENTRIES are required to fill and three horses to start; but the Board RESERVE THE RIGHT TO CLOSE ANY RACE WITH A LESS NUMBER.
Races to commence each day at 1 o'clock P. M. sharp.
The track is first-class, having been improved. Stables, hay and straw free to competitors.

ENTRIES.

1st. Entries must be made in writing and dated.
2nd. State number of the race in which you wish to enter.
3rd. State color of horse, and marks if necessary.
4th. State whether the horse is a STALLION, MARE or GELDING.
5th. State NAME OF SIRE AND DAM if known; if unknown, state the fact in the entry.
6th. State NAME AND P. O. ADDRESS of the owner of the horse entered.
7th. Sign with P. O. address of the party entering the horse.
8th. If the name has been changed, give former name.
9th. Repeat by mail, all entries made by telegraph.
Agricultural District No. 2, California, comprises the Counties of San Joaquin, Calaveras, Tuolumne, Stanislaus, Mariposa, Merced, Fresno, Tulare, and Kern.

FIVE DOLLARS A YEAR.

NOTABLE HORSES OF CALIFORNIA

ECHO.

In taking stallions which have become notable through the performances of their offspring for illustration, it necessarily extends the history to several in place of one. This spreading, as it may be termed, of the good qualities, is manifestly superior to concentration, and the victorious blood disseminated to the advantage of breeders. There have been many striking examples of the benefits following the use in the breeding stud of one animal, and it is not necessary to go outside of this country to prove the truth of the position. Sir Archy has been termed the "patriarch of the American turf," and certainly there never has been another American sire which has shown so many celebrities in near and remote descendants. Messenger has been awarded the same prominence as a trotting progenitor, though the difference was that Sir Archy got race horses while Messenger cannot show fast trotters in his immediate progeny. The main cause for the lack was that in his day fast trotters were not valued,

and, consequently, no pains were taken to produce them. His son, Mambrino, has the honor of founding two of the great lines, the Hambletonians and Mambrino Chiefs. A son of Mambrino, Abdallah, acquired some distinction as the sire of trotters, and his son Rysdyk's Hambletonian wears the undisputed title of the greatest of trotting sires. It would be far beyond the limit of these sketches to give reasons why there was a regular progression in the generations, but there is one feature which is ever present, and that is the influence which a certain combination of blood possesses in fixing the standard. Thus the Hambletonian and Clay has proved a "happy nick;" but before that was found to be so good, the potency of the Hambletonian and American Star was fully acknowledged. From this combination came Dexter, Jay Gould, Aberdeen and many others, and the subject of this paper is further proof of the efficacy of the cross. The blood of Echo was the main inducement

for his purchase by Mr. Titus, and that his judgment was correct, and the wisdom of the selections has been established by the performances of the colts.

Echo was bred by Jesse T. Seely, Warwick, Orange county, New York; foaled, 1866. His sire Rysdyk's Hambletonian, his dam Fanny Felter, by Magnolia, a son of Seely's American Star, second dam by Webber's Kentucky Whip, third dam by Shakespeare, a son of Duroc. He was purchased of Jesse T. Seely, in the fall of 1870, by L. H. Titus, of Dewdrop Farm, Los Angeles county, California, and brought here the January following. His stud services have been limited, the first season being restricted to nine mares, two of which were taken away, and Mr. Titus could never learn anything about them or their produce. Of the seven remaining five had foals, and every one of them could trot inside of 2:40, Gibraltar and Echora being among them. Before his importation to California he served a few mares,

bnt, as he was only a three-year-old when bought, his opportunities were necessarily limited. If ever he had been awarded a full share of mares, he would be regarded as one of the very successful sires, and, as in these sketches we do not intend to base reputation on hypothetical conditions, it will be very seldom that surmises will come into consideration. Echo himself was a good performer, trotting a mile in 2:35, and winning a race of heats of two miles against such strong competitors as The Moor and Vaughn. The first of his get to appear on the track was Echora, and this was in a stake for three-year-olds trotted at Sacramento at the State Fair of 1875. It was a short race, as she distanced both of her competitors, Arabia and Beautiful Bells, in the first heat; time, 2:42, the fastest ever made up to that date by a three-year-old in California. This was her only appearance in 1875. In 1877 she won a very good race in which were Rustic, Nemo, Gladstone and Amanda Murray. Rustic won the second and third heats in 2:30½, 2:33; Echora the first, fourth and fifth in 2:32¼, 2:33, 2:31. The time of the fifth heat proved that she could stay, and this capacity she has exhibited in every race she has been in. It is unnecessary to follow Echora through the many races she has trotted, and a few more instances will suffice to show that she is worthy of a good place in the records. In 1880 she won at Oakland, beating Gus (who won the first heat), Volunteer, Startle, and Captain Jenks—the time, 2:26¾, 2:26¾, 2:27¾, 2:28¾; and last season she trotted six races, of which she won four, one of them at heats of two miles, and reducing her record to 2:25. This was in a race with Crown Point and Del Sur, and a very hot one it was. She won the first heat in 2:25½, the second Del Sur got in 2:26. The third was to Echora's credit in 2:25, and then Crown Point got a heat in 2:28, when the mare scored another victory. There was nothing to start against her in the two mile heat race at the Bay District Course, and previous to that she had stubbornly contested a race at Sacramento, one of the hardest fought battles ever seen on a track. There were eight heats; Echora won the first in 2:25, Del Sur the second in 2:24, then Crown Point the third and fourth in 2:26, 2:26¾; Ashley came in first on the fifth in 2:29, and then Echora got the sixth in 2:30; the seventh Ashley won in 2:25½, when on account of the Garfield obsequies the concluding heat was postponed from Saturday until Tuesday. The heat was in doubt even after the horses passed the winning score, and whether it would be given to Ashley or Echora a matter of question until the judges rendered their decision in favor of Ashley; the time, 2:26¾. In 1877 there was another very promising Echo came out—one of those unfortunate horses which appear to have been foaled under the influence of some malign star, and though possessed of a world of speed and unquestionable endurance, casualty followed casualty, and the "brackets" are still in reserve for him. This was Jo Hamilton, his dam a thoroughbred mare by Belmont, and his best effort in public was at Chico, when he forced Brigadier to trot a third heat in 2:30 to beat him, both at that time being four years old.

One of our especial favorites among the trotters of California is Gibraltar, by Echo, his dam at one time claimed to be by Owen Dale, and his breeder, Mr. Tiffany, of Los Angeles, had a good deal of faith in that being correct. It may be so, though the only reliable information is that she was a large mare taken from Sonoma county to Los Angeles. Gibraltar is rather coarser than any other Echo we ever saw, but he has the thoroughbred characteristic of "gameness," and will finish up a heat and a race with as much determination as need be. He will keep trotting under punishment as severe as the driver can administer, and, like Monsieur Tonson, will "come again" and keep coming. One of his notable races was in 1878, September 12th. The contestants were Abbottsford, Echora, Alice, Barney, Bickford, Prophet and Hayward Chief. Abbottsford won the first heat in 2:25—Gibraltar the second, third and fourth, in the capital time of 2:26, 2:27, 2:24½. 1879 was rather a blank year for him, and in 1880 he only trotted two races, second to Elaine in Sacramento, and a winner at Stockton. He had then been bought by Mr. Salisbury, and last year he lowered his record to 2:22½, and made a performance which, under the circumstances, was more creditable than even the fast time shown. It was at the Golden Gate Fair—the starters Ashley, Echora, Del Sur, Tommy Dodd and Crown Point. Gibraltar had a bad leg, and what is worse in a trotter, it was a hind leg was ailing. The ankle was much enlarged, the swelling extending half way to the hock, and though the lameness was slight at the time, the following week it was so bad as to stop him trotting at Sacramento. He won in straight heats, the time 2:24, 2:23½, 2:22½. Owing to the bad leg, he was unable to fulfill his other engagements, and that was the only race he participated in during the year.

In 1880 Echo showed two of the best three-year-olds of the year. Belle Echo made the fastest time for the age during the season, and Annie Laurie equaled the best Eastern record. Belle Echo has been awarded a place among the notabilities, and the capital likeness which appeared in the BREEDER AND SPORTSMAN of the 15th instant will convey a good idea of her form; but the grace and rapidity of her movements are beyond the pencil of artist to depict. Although her owner, Mr. Titus, is enthusiastic over the stock of the horse in the aggregate, we are of the opinion that he regards Belle as the bright particular star of the family, and

there cannot be a question that she is entitled to rank with the stars of whatever tribe. Annie Laurie also exhibited a great deal of promise in her three-year-old form. The race between her and Alex. Button, at the State Fair, was a hot contest from end to end. Button won the first heat in 2:34½, Annie Laurie the second in 2:30, Button the third in 2:29. The fourth heat was a "dead" one between the two in 2:30¾, Button winning the fifth, which decided the race. Belle Echo, Len Rose, Honesty and Glucora also trotted, Belle being evidently "off," and in all probability suffering from the complaint, in its incipient stages, which affected her at San Jose.

While not entirely beyond the scope of these articles to include performances which do not constitute a technical record, public deeds are rightfully entitled to the first place. It is manifest, however, that a horse may be a stock-getter of undoubted superiority without a single one of his get appearing in public. Horses show so much speed and endurance on the road that they are highly valued, would sell for a large amount of money, and that without ever having the benefit of regular track training. It is important then that all performances be considered, and while giving the appropriate weight to actual records, it is also a legitimate subject of inquiry what else there is to give value to the stock? In a "gentleman's road-horse" there must be other qualities beside speed—soundness, form, good temper and good looks being important factors in the composition. The faculty of "going the route" is imperatively demanded. To our eye one of the finest types of a road-horse in the country is Exile, a son of Echo, and a "full brother" (as horsemen term colts from the same parents) to Jo Hamilton. While Belle Echo is very nearly a model, this horse, of three-quarters the same blood, has rather more finish. He can show a rate a good deal inside of 2:30, and at times a flight of speed which would keep Belle moving. Both are bright bays with black points, and the horse especially, with flowing manes and tails which our correspondent "Index" not inaptly compared to the standard of a Pasha.

As in the other illustrations the engraving is a capital likeness of the horse, and it is only necessary to add that like a majority of his colts he is a bright bay, and there is a further similarity in all of them being of the best disposition. He was sold by Mr. Titus the Fall of 1880 to J. B. Haggin, and is now at the head of the trotting department of the Rancho del Paso stud.

THE EMBRYO STAKE.

Owing to the novel features of the Embryo Stake, the conditions appear to be puzzling, and in answer to many inquiries the following explanation is given:

It is a stake for foals of 1882; that is, any colt or filly foaled on or since January first of this year. There are three different races in the stake, viz: for yearlings, two-year-olds and three-year-olds. The subscriber elects whether he will name in one, two, or all of them, and his purpose must be declared at the time of making the nomination. The race for yearlings is a mile, for two-year-olds heats of a mile, best 2 in 3, and for three-year-olds, heats of a mile, best 3 in 5. Five dollars must accompany the nomination, and this is the first payment to be made, whether one or all the stakes are entered in. It may be clearer to illustrate with an example. In the first place, the nomination should be made something in this form:

SAN FRANCISCO, August 1, 1882.

JOS. CAIRN SIMPSON, Secretary pro tem. Pacific Breeders' Association:

I name in Embryo Stake of 1882, my colt Ajax; bay, white hind feet, star in forehead, no other marks; foaled April 5th, by Ajax, his dam Flora by Signal, in all three of the stakes. Enclosed find \$5.

JOHN SMITH.

Should the subscriber, John Smith, desire to declare him out of the yearling race on the first day of September, 1883, he notifies the Secretary and pays \$10. If he does not declare out at that time he is liable for a forfeit of \$25, and if this is not paid ten days before the day fixed for the race he is then held liable for the whole amount of the stake, \$100. In this respect the two and three-year-old races are the same as the yearling. The whole liability incurred if a subscriber names in them all is \$35. If he names in two \$25; and if in one, \$15. The object of the declaration of \$10 was to make the liability as light as possible, so that if the foal turned out poorly the expense would be small. Should it be satisfactory on the 1st of September, there is nearly two months more to continue the training before determining whether to pay the forfeit of twenty-five dollars or risk the whole amount of the stake. The nominating fee of \$5.00 is credited to the races in which the colt is named. If, as in the example, it is named in all three, \$1.66 will go to the credit of each; if in two stakes, \$2.50; if in one, that race will be credited with the whole amount. Should the subscriber desire to name in the races to be trotted when the colts are two and three years old, the entry will be made in races of 1884 and 1885; if in the three-year-old alone, in the race of 1885. In order to prevent confusion, the stakes are named after the year the foals came. Thus, in the Embryo of 1879, the yearling and two-year-old have been decided, and the three-year-old is to be trotted on the first Saturday in November of this year. The Embryo of 1880, the yearling race, has been scored, and the two-year-old of that year will be decided on the same day. That of 1881, the yearling, will come off, and from this time out, should there be no lapse in the stake, there will be three races on the same day. On the first Saturday in November, 1882, the programme will be: Embryo Stake 1879, three-year-old race; Embryo Stake 1880, two-year-old race; Embryo Stake 1881, yearling race.

From the above explanation a proper understanding will be obtained; bearing in mind that there are three races em-

braced in the stake, and that one nominating fee is all that is required, and that there is a chance to "draw out" on the first of September of the year the race is to be trotted for \$10; ten days before the day fixed for trotting a forfeit of \$25 will absolve, and these conditions apply to each one of the races. To make it still plainer, we will carry the case of the imaginary entry of Ajax through the several stages. His owner concludes on the first of September, 1883, that he will not trot Ajax in that year. He notifies the Secretary as follows:

SAN FRANCISCO, Sept. 1, 1883.

SECRETARY PACIFIC BREEDERS' ASSOCIATION: I declare out of the yearling race, Embryo 1882, my bay colt Ajax. Enclosed find \$10.

JOHN SMITH.

Should he have thoughts of trotting him on Sept. 1st, but something goes wrong, or he does not come up to expectations, and he desires to pay forfeit, the notice will be:

SAN FRANCISCO, October —, 1883.

SECRETARY PACIFIC BREEDERS' ASSOCIATION: Enclosed find \$25 forfeit on my bay colt Ajax, which I declare out of yearling race, Embryo 1882.

JOHN SMITH.

If he resolves to trot, no notice is necessary, paying the stake, \$100, the Friday before the race is to come off. The same formula, of course, applies through all the races.

DANVILLE, July 25, 1882.

EDITOR BREEDER AND SPORTSMAN—DEAR SIR: I received three numbers of your new paper, and am pleased to learn that you are engaged in this enterprise, for it is what is really needed on this Coast very much. As long as I can get five dollars a year you can count on me as a subscriber. I am delighted with it, indeed, and inclose subscription for one year, and then I shall have all the sporting papers. You have my best wishes for your new enterprise.

I noticed in your issue of July 1st a letter from Sunny Slope, saying that the Embryo has had its day, and that it is Mr. Rose's opinion, with Palo Alto and Sunny Slope in the field, it would stop others from entering in stakes with them. I doubt that either of these two named places has shown enough in any one race to prevent or frighten others from entering to trot against their nominations in a three-year-old stake. Let the associations give a large three-year-old stake two years from this Fall, and I think you will see five entries, and that three will start. It is not the speedy horse or colt that always wins the race, and the fast colt is not always at himself, and even then he may see a bird on the fence. The Thompson started last in a race, and trotted third heat in 2:21, and as a four-year-old went for a fast mile, and could only make 2:32. You can't always tell. Don't bar anybody's colt, how great his rep'te, for it is not right, and I maintain that there are five persons on this Coast that are raising colts that will enter against Palo Alto or Sunny Slope. If they think that no one will enter with them, let the associations make the distance 150 yards. We will enter with them in the three-year-old faru, and the distance may be 100 yards. George Wilks sired a faster horse than he was himself; Governor Spragne the same, Echo the same, Sultan the same, Electioneer the same; and if Steinway sires one as fast as I have seen him trot, I will be certain to enter and start one of his colts, and I know that there are others on this Coast that think the same way. Now, dear Editor, I have spoken my piece, and want it published, for I am Steinway's beau. Truly yours,

SAM'L GAMBLE,

Supt. Cook Farm, Danville.

MILITARY MARKSMEN.—Orders have been issued from general headquarters at the Presidio directing each post commander in the Department of California to ascertain by a competitive trial, on or before August 12th, the most suitable marksmen of each company, troop or battery, and one from each non-commissioned staff or band at his post, and report their names to Department Headquarters, with the scores made during the contest and on the four previous practice days. The marksmen thus reported will be ordered to the Presidio August 16th, to compete on August 24th, 25th and 26th, for the honor of a place in the Department Team of 12. Two alternates will be added to the team. The several Department Teams will assemble at the Presidio of San Francisco, Cal., about August 26th, to compete on the 7th, 8th and 9th of September, for the honor of places upon the Division Team of 12, and for the twelve prizes awarded by the War Department. The four best marksmen on the Division Team will represent the Military Division of the Pacific in the Army Team, and will proceed to Fort Leavenworth October 9th, to prepare for the competition which is to take place at that post October 25th, this year.

SPORTSMAN'S PARADISE.—If the young man of the Chico Record, who produced the following, had only added a bison or so to the game quadrupeds that abound in his "sportsman's elysium," and now and then thrown in an albatross with his water-fowl and woodcock and wild turkey, he'd been fairly entitled to the prize jack-knife. Hear him: "Big Meadow can be called the sportsman's elysium of California, at least of the northern part. The vast forests in its neighborhood, which as yet have never been fully explored, abound with black bear, deer, wild turkey, ruffed grouse or pheasants, rabbits, squirrels, quails and all the infinite variety of water-fowl that hatch their brood amid its numerous beautiful lakes. Snipe and woodcock are found in countless numbers, and occasionally in the deep shades of the pine woods a lordly elk is seen. All the streams swarm with the finny tribe—trout, salmon, bass, pickerel, pike and perch, which are caught mostly by the Indians, but a white angler sometimes finds his way into this paradise."—Exchange.

BREEDER AND SPORTSMAN.—Such is the title of a new journal published in San Francisco, the first issue of which appeared July 1st. The object of the BREEDER AND SPORTSMAN will be "to advance the breeding interests of the Pacific Coast, and to elevate and popularize out-door sports." The editor is Mr. Joseph Cairn Simpson, for so many years connected with the sporting press, and recognized as one of the ablest writers of the day on turf subjects. Mr. Simpson has always been independent and bold in expressing his opinions, and has not hesitated to expose fraud whenever and wherever he found it. With an editor so thoroughly competent, and possessed of so many friends, the success of the BREEDER AND SPORTSMAN may be considered assured. It is sixteen pages, neatly gotten up, published weekly, and the subscription is five dollars a year.—[The American Field.

ROWING.

GRiffin AND WATKINS.—On Sunday last the backers of D. Griffin and Sam Watkins met at Long Bridge to arrange for a sculling match between their men. Boh Goble, on behalf of Watkins, insisted that the race should take place over the Long Bridge Course. Griffin's friends were equally positive in their wish to have the match decided at Saucelito, and the result of the difference was that the negotiations were suspended. The *Call*, in commenting on the affair, last Monday, stated that Watkins was so anxious for the match that he was willing to concede the choice of position to Griffin, if the latter would but agree to have the race take place at Long Bridge. Such a concession would be very liberal, as the outside station on the Long Bridge Course is a heavy handicap at certain stages of the tide, and especially when the wind is blowing freshly. Griffin is not, however, desirous of accepting any concessions from Watkins, and professes and seems to be as anxious for a match as his rival's magnanimity would seem to indicate. The intimation conveyed by the *Call's* article is that Watkins will be compelled to force Griffin into a match. This we think will be shown to be erroneous. The Golden Gate man is perfectly right in holding out for any course most agreeable to him, but when he finds that he cannot draw his opponent to Saucelito, he will consent to a match over the Long Bridge Course. The three-mile course at Long Bridge is not so unfavorable as the two-mile course, for there is a long stretch of smooth water at the start and finish, so that the choice of stations is not as important as in the shorter distance, where the whole race is over an exposed sheet of water and through strong currents. Considerable interest is taken in the proposed match, as the men are believed to be nearly equal in speed, and both are undeniably game. A good deal of money will be bet on the result.

INSULT TO INJURY.

It looks as if the Hillsdale crew is doomed to bring back from England nothing but the evidence of innumerable snubs. The American oarsmen have been reviled and rejected until they ought to be heartily sick of their trip and eager to return to the right side of the Atlantic. The last gratuitous slur on the Hillsdale four, of which we have official notice, came in the shape of a resolution proposed by Captain Hornton of the London Rowing Club, seconded by President Lambert of the Cambridge University, and unanimously adopted at a meeting of the Amateur Rowing Association, presided over by Rev. Mr. Lisley, of the Oxford Boat Club. The dispatch says that the captains of the Thames and Kingston Rowing Clubs and well known members of other amateur clubs were present. This insult is as follows: "Taking into consideration the vagueness of description of several members of the Hillsdale crew, the committee would not be justified in recognizing the crew as amateurs in accordance with the English definition of the term, and cannot, without further evidence, advise the acceptance of their challenge." The Hillsdale crew has been given unmistakable evidence that its presence on English waters is not desired, and if it has as much dignity as it is supposed to have speed it ought to pack up its oars and come home. For our part we are not particularly aggrieved that the Hillsdale crew has had such poor luck, for its experience will be valuable to all other ambitious American crews that may seek fame in English waters. The Hillsdale four have chiefly themselves to blame for the slurs and snubs so freely administered. They ought to have profited by the experience of the Cornell crew, and if their common sense was commensurate with their aquatic prowess they would have taken the valuable lesson to heart. The English oarsmen showed, by their action toward the Cornell crew, that they had a prejudice against American amateur crews and would lose no opportunity to display their unfriendly feelings. Knowing this, the Hillsdales acted in a most precipitate, unbusiness-like and senseless manner. They rushed off to England without having arranged a programme and gave the adverse parties an opportunity to exhibit their hostility by stupid mistakes in the entries. The proper course for the Hillsdale crew to have pursued and the one which would have suggested itself to any but a committee of hot-headed amateurs was to have arranged for a race or a series of races with representative English crews. When the arrangements were completed and there was no possibility of any slips or excuse for slurs the American even could have crossed the ocean to practice in confidence and row with credit. By such a proceeding the Hillsdale crew would have shown itself a dignified and able representative of American amateur oarsmanship, whereas by hanging round the edges of small regattas and fighting for a chance to carry off pewter pots and tin medals it has placed itself in the humiliating position in which insults can be administered with impunity.

ROWING ON PAPER.—Hanlan and Ross are doing so much rowing through the columns of the sporting press that some good judges think they will never row against one another anywhere else. Ross, in reply to Hanlan's challenge to row any five men in the world, has aroused the indignation of Ross, who publishes a card, in which he says: "As Hanlan has distinctly named me as one of those he is ready to meet, I am willing to row him five races on five consecutive days, each race for \$1,000 a side; distance to be from three to five miles; the races to begin on a Monday and end on a Friday, and no postponement to be permitted on account of the weather. As Hanlan is the originator of this idea of five races, I hope he will not now attempt to back out. Let him name his date in September, and let the races take place at Winnipeg, whose people went to great expense, in anticipation of the race to have been rowed there on June 20th, only to be disappointed owing to Hanlan's absence. "One thing I wish Hanlan and the public to understand and that is that he ran away to England without rowing me last Winter, putting up only a check to bind a race. If he ever intended to row he did not prepare himself for it, and was not fit to row within three weeks of his Atlantic voyage. He is not now to be allowed to skip off to Australia, going there as champion of the world, unless he shows that he is willing to row for that title. When Hanlan puts up \$500 in cash, not a check, in the hands of some responsible party, I will cover it to bind a race, which Mr. Hanlan seems to desire, and which a great many people would be glad to see rowed."

Hanlan has signified his willingness to give Ross the race he so much desires, and there is a faint possibility that the men may come together next year. The *Boston Herald*, which is a great authority on boating, announces that if the men do not row very soon, the public will have some justification for believing that the postponements and delays are agreeable to both parties, and that neither is ready to row

a match race for the world's championship. If Hanlan has a desire to row a boat race with Ross, and will make a deposit of \$500 in good hands to bind a match, he can have a race any time this Fall for \$1,000 a side, over a four-mile course, to be mutually agreed upon. This statement is made authoritatively.

THE HILLSDALE CREW CRITICISED.—The *London Sportsman* says of the Hillsdale crew and a recent practice pull of the Michigan oarsmen: We "gassed" them carefully all the way from the Soap house to the creek, and their style was as irregular and defective as the subsequent row up. The row up home commenced from the aqueduct, 46 being tried the first minute, to be increased to 48 directly after. Without diminishing the latter rate of striking the crew rowed the between-bridges course, Putney and Hammer-smith, but got no pace out of their boat, it taking them 1m. 58s. to reach the Creek. Admitted that the tide was sluggish, the time occupied in covering the ground was bad and could have been done by several of our scullers. The time of the oars was most irregular, and that of the men's bodies not at all in accord, the bow man appearing to work on his own account. Body swing is ignored altogether, and the pulling is left entirely to the arms, an ugly, jerky action, with no beginning or finish, the blades "catching" at right angles with the riggers, while the water displacement is very trivial. We are inclined to think that the Hillsdales themselves have seen better style with our own amateurs now practicing for Henley than they anticipated.

The aquatic editor of *Bell's Life in London* says the oarsmen of the Hillsdale crew slide indifferently, do most of their work with their arms, and, rowing 46 to 48 strokes a minute, only get pace enough on their boat (having been timed from Putney to the Creek in 1m. 58s.) to keep level with a good sculler.

HANLAN'S RESPONSE.—To a correspondent of the *New York Herald* Hanlan stated on the 18th inst. that his challenge had been misinterpreted. He was not in condition to row now, nor would he be this year. He had not been in a shell since his sickness. He said: "My challenge to row any five men in the world still holds good, as I only want to arrange my programme for next Summer. I will row Wallace Ross anywhere between here and New York any time next year for \$5,000 a side. I don't see why Ross wants to row five races. It is ridiculous. I will row him from one to five miles, and if he beats me I will row him a second race. Ross talks about my putting up money this time and not of checks. I wonder how he got on in Boston with his checks? He did not act squarely down there and dare not go back there now. I can't say if I will go to Australia before I arrange with Ross. He says I want to run there with the championship. If he is a better man he may have it. Next year I will leave my favorite element and row no more at all. He may take the forfeit money and welcome this time if I don't row. I don't know my future movements further than my trip to Detroit on the 9th of August and to Montreal same month. I will put up \$500 forfeit any day to row next season, only let him arrange to row before next September. I am tired holding the trophy. You see there is a great deal of bother consequent on being champion oarsman of the world."

A FRIEND IN NEED.—One sporting journal has been found which can say a kind and complimentary word for Plaisted. The journal is the *New York Sportsman*, and in commenting on Plaisted's acceptance of Wm. Elliott's challenge it says: "Plaisted's races with Hanlan show that he is a good man, possessed of both speed and gameness, and he is one of the very few who can boast of having defeated the champion of the world in a rowing contest. This fact has been pointed out, as many people may think, that Plaisted is not of important class enough to justify matching him against the sculling pitman of Newcastle, but the American's record shows that he is good enough to row anybody, and, furthermore, that he has a reasonable chance of proving victorious when he meets the only Englishman who was able to give Hanlan any kind of a race at all." Plaisted is in training at Massahesic Lake, near Manchester, N. H., with George Hosmer of Boston. Both men take from 10 to 15 miles of walking and rowing every day, and vary the monotony of their training by cutting grass.

ENGLISH CONSERVATISM.—Regarding the defeats of English athletes in England, and the newspaper comments thereon, the *London Sportsman* says: "Judging by the tone of the majority of effusions, the prevailing sentiment seems to be that our overweening confidence and exceptional pride in our own ability has largely contributed to our downfall. Now, we are not prepared to say that our critics are altogether unjustified in their accusations. Our oarsmen, we fear, for years neglected to keep such a sharp eye on the doings of rivals in other countries as might profitably have been the case. Some heard of improvements being effected in the construction of racing skiffs, and of new styles of boat propulsion being adopted. They evidently regarded these matters, however, as new-fangled notions, quite unworthy of attention, and it was not until they received a severe reminder or two that they began to imagine that their own mode of procedure might be open to a little alteration."

ROSS AND LAYCOCK.—By this time Laycock ought to be on his way to the antipodes. Some days before his intended departure was announced an interesting newspaper correspondence occurred between him and William Spencer, the latter representing Wallace Ross, and Spencer had by far the best of the argument. Laycock declined to row Ross in England, but invited the New Brunswicker to the antipodes. He wrote: "As I have to row there about the end of September for a prize of £500, it would not pay me to stop, even were Ross or his backers to make me a present of £200. In conclusion, I beg to state that, if Ross likes to pay Australia a visit, it will afford me great pleasure to give him a spin over the championship course on the Parramatta river for from £200 to £500 a side. At the same time he can row for the £500 prize given by Mr. Punch, which would be killing two birds with one stone, and if he can win the two, the trip ought to pay."

ELLIOTT AND KENNEDY.—John A. Kennedy, of Portland, has challenged William Elliott, ex-champion oarsman of England, at present living in New York, to a scullers' race, distance two or three miles, for \$1,000. Elliott has replied that he will row Kennedy a four-mile race on Flushing Bay, and allow Kennedy expenses. To this proposition Kennedy answers that he will accept, provided \$200 be allowed him for expenses; or he will allow Elliott \$250 expenses to row in the East. The Portland sculler is now only waiting to hear from Elliott to close the match.

NAVAL OARSMEN.—A race has been arranged between the gigs of the Ranger and Alert, for the sum of \$300, to come off to-day, weather permitting, at the Navy Yard, Mare Island.

SMITH ACCEPTS.—Warren Smith of Halifax, N. S., has accepted the challenge issued by William Elliott, with the understanding that the race shall be one of three miles, for \$500 a side, the time and place of rowing to be hereafter agreed upon. He has deposited \$200 forfeit with W. L. Lowell & Co., bankers, of Halifax.

The entry of the Hillsdale crew for the Barnes and Mortlake regatta has been accepted. The Thames and London clubs are also entered.

Wallace Ross says English scullers, in preparation for their races, drink too much beer.

The champion Hanlan began his 28th year Wednesday.

BASE BALL.

THE OLYMPICS AND REDINGTONS.

These Clubs played a good game last Sunday at the grounds of the Olympic Club, at Oakland, and it looked at one time a certain victory for the Redingtons, they scoring seven to one at the conclusion of the fifth innings, but the Olympics batted very effectively towards the close, and won easily at last. Leman at first and Lewis at left were a valuable acquisition to the Redingtons, while with the exception of substituting Leonard for Boswell, the Olympics played their regular nine.

THE MASQUERADE GAME.—On Sunday last, at the Recreation Grounds, there was a masquerade game between teams chosen from the Minstrels and the local clubs, and the affair drew out a large attendance. The costumes were neither very humorous or expensive, but the public was evidently amused, as but few people left before the end of the game, which was won by the Cushman side, according to the following score:

THE LEAGUE CHAMPIONSHIP.

The games of Saturday, July 19th, ended the third week's play of the League Clubs in July and the first week's work of the Eastern and Western Clubs in their home games together. The Providence team has done the best at home in the East, and the Cleverlands in the West, as each won three games out of the four played. The Troy team lost all three of the games it played. Detroit was the least successful in the West, losing three out of the four games. Thus far in the July games the Cleveland and Chicago teams head the League Clubs with six victories each out of eight games. Buffalo is third, with six out of nine, and Providence fourth, with five out of nine, all the rest losing more games than they have won, Troy being last on the list, with only one victory out of seven games. Thirty-three games have been played up to July 16th, of which the four Western Clubs won twenty-one and the four Eastern Clubs but twelve. In the pennant race to date Chicago heads the list by having the best percentage of victories, as the team has won twenty-seven games and lost seventeen, while Providence has won twenty-seven and lost eighteen, Detroit being third, with twenty-six victories and nineteen defeats. The defeat of the Chicago champions by the Detroit and Buffalo teams will help Providence, provided Providence can keep its own end up in the East.

CLUBS.	Chicago	Providence	Detroit	Boston	Cleveland	Buffalo	Troy	Worcester	Games Won
Chicago	6	4	4	4	1	4	4	4	27
Providence	5	4	4	3	3	7	4	4	27
Detroit	3	2	2	2	5	4	4	6	26
Boston	3	4	4	4	4	2	5	2	24
Cleveland	1	3	2	2	5	4	6	2	23
Buffalo	5	3	1	2	4	2	5	2	22

Worcester	2	1	0	4	0	1	3	...	11
Games Lost	17	18	19	22	22	22	26	33	179

There are now four strong co-operative teams in New York and its vicinity, in the nines of the Atlantics of Brooklyn, the Alaskas of New York, the Domestics of Newark, and the Olympics of Paterson. A series of championship matches is shortly to be arranged between them, to be played alternately on each other's grounds, two games each.

THE TURF.

CLOSING OF STAKES AND PRIZES.

On the first day of August next, the stakes of the Pacific Coast Blood-Horse Association, the Embryo Stakes and the Purses and Stakes at the California Fairs will close.

The advertisements in this paper will give full particulars. Do not forget the date, **TUESDAY, AUGUST 1st, 1883.**

SARATOGA RACES.

On Thursday, July 13th, at Saratoga, were decided two races that in days gone by attracted a great deal of attention, but that drew this year but a small attendance, and these were the Flash and the Alabama Stakes. The Flash Stake has been noted for the thirteen years it has been established, for the excellence of its entries and the fast time made, and among the winners were such flyers as Remorseless in 49 $\frac{1}{4}$ secs., Tom Bowling and Regardless in 50 $\frac{1}{4}$ secs., the speedy Otilipa, who made the half mile in 47 $\frac{1}{4}$ secs., the best record; then came Faithless, Zoo Zoo, in successive years owned by P. Lorillard, and followed on the list by the Duke of Magenta, Harold and Sensation, all belonging to George Lorillard, who again took it last year with Memento. Owing to the conflicting elements existing between Saratoga and Long Branch, the popular colors of these gentlemen are absent this season from the Springs, and the interest in the racing is thereby greatly diminished. Thus, in the Flash Stake there were but six who faced the starters, and the betting was all between George Kenney and Henlopen, the filly being the first choice in the pools, but she was not evidently at herself, and George Kenney won a very easy race, thus adding this stake to the Hopeful and July he had already carried off at Monmouth Park.

The Flash Stakes, for two-year-olds, at \$100 each, half forfeit, with \$300 added, the second to save its stake; 36 subscribers; half a mile. Dwyer Bros.' b. c. George Kenney, by Bonnie Scotland, dam Kathleen, 110 lb., carried 112 lb. (J. McLaughlin) 1
O. Bowie's br. f. Empress, by Narragansett, dam Maudine, 107 lb. (Brown) 2
Bowen & Co.'s br. f. Miss Woodford, by Billet, dam Fancy Jane, 107 lb. (Stovall) 3
C. Reed's ch. f. Henlopen, 107 lb., carried 109 lb. (Brophy) 0
A. Burnam's b. c. Tocsin, 110 lb. (Quantrell) 0
J. A. Grinstead's ch. f. —, by War Dance, dam Tarentella, 107 lbs. (Hovey) 0
Time—0:53.

Pools—Henlopen, \$200; George Kenney, \$150; Miss Woodford, \$150; field, \$75.

The Alabama Stake, for three-year-old fillies, has also been very celebrated in the annals of our turf, and among the winners may be counted Regardless, Otilipa, Merciless, Susquehanna, Ferida, Glidelia and Thora, the latter winning last year. Bonella was made a great favorite on account of her good showing in the Monmouth Oaks, won by Hiawassa; but the Dwyer Brothers sent their second string, Francesca, to make the running with Bonella, and when they were both pumped out the Belle of Runnymede came up and won easily.

The Alabama Stakes, for three-year-old fillies, at \$100 each, half forfeit, with \$300 added, the second to receive \$300 out of the stakes; 51 subscribers; mile and a furlong. Bowen & Co.'s b. f. Belle of Runnymede, by Billet, dam Fancy Jane, 113 lb. (Stovall) 1
C. H. Raymond's b. f. Bonella, by Bonnie Scotland, dam Dora, 113 lb. (Brophy) 2
G. B. Bryson's b. f. Olivia, by Ill-Used, dam Otilipa, 113 lb. (Walker) 3
Dwyer Bros.' b. f. Francesca, 113 lb. (J. McLaughlin) 0
O. Bowie's br. f. Wildfire, 113 lb. (Brown) 0
R. H. Owens' ch. f. Issie, 113 lb., carried 115 lb. (Murphy) 0
Time—2:03 $\frac{1}{2}$.

Pools—Bonella, \$350; Belle of Runnymede, \$320; Issie, \$180; Wildfire, \$120; Olivia, \$75; Francesca, \$30.

The next race was a purse of \$600, a handicap for all ages, a mile and five hundred yards, that was won by the favorite, Belle of the Highlands, 4 yrs., 105 pds., in 2:25 $\frac{1}{4}$, beating Oakleaf, 4 yrs., 94 pds., second; Mamie Fields, 6 yrs., 100 pds., Nellie Peyton, 3 yrs., 85 pds., and Bounce, 5 yrs., 105 pds.

The last race was a steeplechase handicap over the short course, in which Turfman beat Judge Burnett, his only antagonist.

Friday, the 14th, was the first extra day, and although the weather was fair and the programme attractive, there was again but a poor attendance. The proceedings opening with a \$350 purse for all ages, 1 mile, in which Ada Glen, 6 yrs., 103 pds., was almost equal favorite with Perplex, 3 yrs., 102 pds., the former winning in 1:50, with Lutestring, 3 yrs., 92 pds., second, and Navarro, 4 yrs., 111 pds., Wanculla, 3 yrs., 100 pds., and Morgan Spy, 3 yrs., 92 pds., all unplaced. The favorites had been winning quite steadily for some time, but the next race was one that, in turf parlance, is called a facer to the talent. It was a purse of \$600 for all ages, with penalties and allowances, a mile and five furlongs, and John Davis, on the strength of his Western performances, including the winning of the Garden City cup, was made a hot favorite at \$180, although as a six-year-old he carried the steady weight of 122 pds.; Creosote, 4 yrs., with 113 pds., Nettie, 3 yrs., 95 pds., Lizzie McWhorter, 3 yrs., 81 pds., Granger, 4 yrs., 103 pds., and Ella Warfield, 5 yrs., \$60 each, with \$30 for Glenarm, 3 yrs., and 95 pds.; Ella Worfield cut out the running and won easily in 3:01, with Nettie second and Lizzie third. The mutual pools paid \$61.70 on each five dollars invested. The next was a purse for all ages, three quarters of a mile, that was taken in 1:18 $\frac{1}{4}$ by Saunterer, 4 yrs., 115 pds., with Square Dance, 3 yrs., 97 pds., second; Antrim, 2 yrs., 80 pds., third, and Buccaneer, 3 yrs., 102 pds., Pearl Thorne, 2 yrs., 81 pds., Northland, 3 yrs., 102 pds., and Minnie D., 4 yrs., 106 pds., unplaced. The last was a selling purse of \$350, a mile and a furlong, in which again the favorite won. Boatman, 3 yrs., entered to be sold at \$1,500, with 97 pds., being first; Mamie Fields, \$800, 6 yrs., 101 pds., second; Sam Ecker, \$800, 6 yrs., 103 pds., third; Mandamus, \$500, 3 yrs., 85 pds., Rochester, \$1,000, 6 yrs., 107 pds., Linchpin, \$300, 6 yrs., 93 pds., and Explorer, \$500, 4 yrs., 95 pds., were unplaced. There was no bid for the winner.

Saturday, July 15th, was the famous Cup Day at Saratoga, but this year that classic event was shorn of all its interest, as it was a mere walk over for Thora. The weather was fine, but the attendance only moderate. First on the cards was a dash of six furlongs for \$400, in which Saunterer, 115 pounds, proved himself to be the best horse, in 1:16 $\frac{1}{4}$, with Maggie Ayer, 108 pds., second, and Fellowplay, with 115 pds., third, with Pearl Thorne, Good Night, Apollo, Bonnie Lizzie, Fairview and Wapakoneta, unplaced. The cup, a dash of two miles and a quarter, was won easily by Thora in 4:05 $\frac{1}{4}$, with Carley B. second, Alta

B. third. In the selling race, a mile and a furlong, for \$500, Warfield, 112 pds., was first, in 1:59 $\frac{1}{4}$, Churchill, 103 pds., second, Morgan Spy, 77 pds., third, Major Hughes, 91 pds., and Blinnin, 93 pds., last. The hurdle handicap, a mile and a quarter, for \$500, was won by Judge Burnett, with Turfman second, Glasgow third, with Strychnine that did not go the course.

On the 17th, there was a good day and fine track, and a large attendance. The programme of races included thirty-six entries, a large number for an extra day. For the first purse, \$350, mile dash, Bootjack and Saunterer were the favorites. There was a close contest, won by Ada Glenn (115 pds.) by a head, Bootjack (115 pds.) second, four lengths in front of Jennie V. (88 pds.), third; the order of the others being: Saunterer, Minnie D., Martinique, Nellie Peyton, and Wild Fire; time, 1:12; mutuals paid \$36.60. The second race, purse \$500, mile and five hundred yards; had seven starters, and was won with hands down by the favorite, Warfield (117 pds.), in 2:13 $\frac{1}{4}$, three lengths better than Fellowplay (115 pds.), second, a length in front of Granger (108 pds.), third, followed by Square Dance, Lizzie C., McWhiter, Metropolis, and Strychnine; mutuals paid \$10.80. The third race, purse \$300, for 2-year-olds, five furlongs; had nine starters. Ascender (107 pds.), the favorite, won handily by three lengths, in 1:03 $\frac{1}{4}$; Pearl Thorn (102 pds.), second, and a length better than Blue Grass Belle (97 pds.), third; the order of the others being: Standiford Keller, Hattie M., Baritone, Olivette, Patrick Dennis, and Talleyrand; time, 1:03 $\frac{1}{4}$; mutuals paid \$7.90. The fourth and last race of the day, purse \$300, three-quarters of a mile; had twelve starters, with Bancroft the favorite at the start. It was a close and exciting race, won by Wapakoneta (99 pds.) by two lengths, Lutestring (100 pds.) second, and a length in front of Morgan Spy (82 pds.), third, followed home by Bancroft, Blenheim, Antrim, Mattie Rapture, Maj. Hughes, Bell Boy, Intrinsic, Explorer, and Buccancer; time, 1:17; mutuals paid \$1,078.20, the largest dividend ever declared on this track, the odds being more than two hundred to one against the winner.

In the first race on July 25th, one mile, Wedding Day was first, Maggie Ayer second, and Bruno third; time, 1:4 $\frac{1}{2}$. In the second race, three quarters of a mile, Barnes won, Kenny second; time, 1:15. In the third race, one mile and 500 yards, Ben D'Or won, Ida Glenn second; time, 2:10 $\frac{1}{4}$. In the fourth race (hurdle), one and one-eighth miles, Raven won, Judge Burnett second; time, 2:06.

On the 18th, the first race was \$500, for all ages, with penalties and allowances, a mile and a furlong, which was won by Goodnight (120 pds.) in 1:55 $\frac{1}{4}$, Pinafore (93 pds.), Maggie Ayer (106 pds.) third, with Crickmore, Oakleaf and Crissima, unplaced. The second was the Spinaway stake for two-year-olds, a dash of five furlongs, that closed with 27 subscribers, at \$100 each, \$800 added, that was won by the favorite, Miss Woodford (103 pounds), in 1:03 $\frac{1}{4}$ by a head from the filly by War Dance from Tarentella (95 pounds), Empress (100 pds.) third, and Fairwood, Tea Rose and Hollywood, unplaced. The next was a Welter sweepstakes, \$25 each (p. p.) with \$500 added, in which Ben Or (149 pds.) was first in 1:45, Monogram (130 pds.) second, Navarro (146 pds.) third, with Spark, Tocsin and Liatnuah, unplaced. This was a firm and stubbornly contested race, the conditions being for gentlemen riders; but, as usual, they backed out and professionals had to ride, taking up three pounds extra. The last race was a selling race, \$500, a mile and a half, which was taken by Boatman (103 pds.), in 2:37 $\frac{1}{4}$, with Mamie Fields (97 pds.), second, Katie Creel (108 pds.), third, Helen Wallace, Rochester, Churchill, Sam Ecker and Explorer, unplaced. Boatman was the favorite, and he won in fast and good style.

On the 19th the card was very meagre and afforded but poor amusement to a slight attendance. The first was a race of five furlongs and repeat for a purse of \$500, which resulted in the victory of Bonice (113 pds.) in two straight heats in 1:06 $\frac{1}{4}$ and 1:05 $\frac{1}{4}$. Brambletta (113 pds.), a great favorite in the pools, being second on each occasion, Northland (104 pds.), being third, with Navarro, Jim Nelson, Reardon and Intrinsic in the order mentioned. The second was a purse of \$500, for all ages, a mile and three-quarters, in which Glidelia (116 pds.) was first, Spark (103 pds.) second, Compensation (105 pds.), third, and Warfield (114 pds.), last. Time, 3:12 $\frac{1}{2}$. Then came a selling purse of \$350, for all ages, one mile, which was taken by Blenheim, valued at \$700 (83 pds.), in 1:47; Perplex, \$1,100 (91 pds.), the favorite being second; Buccaneer, \$1,000 (92 pds.), third, and Balance Wheel, \$500, fourth. The last was a handicap steeplechase for \$400, about a mile and a half, which resulted in a very easy victory for the favorite Turfman, with Lighthorse second, and Edison a poor last.

On July 20th, in the first race, one mile, Francis B was first, Bootjack second, and John Davis third. Time, 1:44 $\frac{1}{4}$. In the third race, a mile and five hundred yards, Pinafore won, Laura second. Time, 2:11 $\frac{1}{4}$. In the race for three-quarters of a mile George Kenney won, Barnes second. Time, 1:16 $\frac{1}{4}$. In the fourth race, a steeplechase, Trouble won, Judge Burnett second. Time, 3:02 $\frac{1}{2}$.

On July 21st, in the first race, a mile and a furlong, Jennie V. won, and Springfield was second; time 1:57. In the dash of five furlongs Ascender won, Exeter second, Faurot third; time 1:03 $\frac{1}{4}$. The three-quarter mile was won by Bancroft, Mamie Field second, Lutestring third; time 1:16.

On July 22d, in the first race, five furlongs, Blue Grass Belle won, Baricarian second, Carlisle third; time 1:04. In the second race, one and one-half miles, Bootjack was first, Boatman second; time 1:54 $\frac{1}{4}$. In the third race, mile and five furlongs, Thora won, Frankie B. second, Sullivan third; time 1:51. In the fourth race, three-quarters of a mile, Iota won, Autumn second; time 1:16.

On July 24th, the first race, three-quarters of a mile, Square Dance won, Buccaneer second; time 1:16 $\frac{1}{4}$. In the second race, for a mile and 500 yards, Ada Glen won, Compensation second; time 2:11. In the third race, one mile, Rochester won, Blenheim second; time 1:43. The fourth race, steeplechase, one and a half miles, Rose won, Turfman second; time 2:52.

In the first race, on July 25th, one mile, Wedding Day was first, Maggie Ayer second and Bruno third. Time, 1:41 $\frac{1}{2}$. In the second race, three-quarters of a mile, Barnes won, George Kenny second. Time, 1:15. In the third race, one mile and five hundred yards, Ben d'Or won, Ada Glenn second. Time, 2:10 $\frac{1}{4}$. In the fourth race, hurdle, one and one-eighth miles, Raven won, Judge Burnett second. Time, 2:06.

On the 26th, in the first race for five furlongs, Stander Nord was first, Charley Johnston second. Time, 1:03. In the second race, one mile, Warfield won, Little Phil second.

Time, 1:41. In the third race, three-quarter mile, Wildfire won, Mandamus second. Time, 1:16 $\frac{1}{4}$. In the fourth race, a steeplechase, about 2 $\frac{1}{4}$ miles, Rose won, Postguard second. Time, 4:26 $\frac{1}{4}$.

THE PORTLAND RACES.

The second annual meeting of the Northwestern District Association commenced on the 19th inst. at the City View Driving Park, which is very favorably situated about three miles up the Willamette river, near Portland, Oregon. The weather was very favorable, the attendance was good, and the races gave general satisfaction. The first race was a dash of five furlongs for two-year-olds, in which Lou Spencer was a hot favorite, although she had to carry seven pounds extra, and she won very easily from Nev. Ella, Rosa May being a bad third.

City View Driving Park, July 19th.—Juvenile Stakes.—Five furlongs for two-year-olds; \$400 added to a sweepstakes of \$30 each; colts to carry 100 pounds, fillies 97 pounds; non-thoroughbreds allowed 10 pounds; colts and fillies brought from the East and from California since February 1, 1882, to carry 7 pounds extra.

Theodore Winters' b. f. Lou Spencer, by Norfolk, dam Ballerina..... 1
R. E. Bybee's b. f. Nev. Ella, by California dam Laura Barnes, 97 lbs..... 2
W. G. Seegins' ch. f. Rosa May, by Napa, dam Rosa Rogers, 87 lbs..... 3
Time—1:05 $\frac{1}{2}$.

The next race created a great deal of interest, as it was a contest between the get of noted Oregon stallions, and again the favorite won easily, this time in two straight heats, the trot for second money being well fought out.

Same Day.—The Kishar Stakes for three-year-olds raised in Oregon or the Territories of Washington or Idaho; two in three; purse, \$750; \$500 to first, \$250 to second.

L. P. W. Quimby's Blackhawk, by Rockwood, dam Nelly..... 1
E. J. Jeffery's br. f. Edna J., by Kisher, dam Fly-by-Night and Morgan..... 2
S. S. Cook's bl. g. Charles Albert, by Ben Franklin, dam Kitty Brimus and Stranger..... 3
Jay Beach's h. c. Zilophone, by Altamont, dam Nellie Price, by Doble..... dis.
Time—2:59 $\frac{1}{2}$, 3:00.

On the 20th there were three races on the card. The first for the 2:40 class eliciting a good deal of unfavorable comment, not solely on account that the favorite, Maggie Arnold, was beaten, but there was some curious driving, Misner being fined \$25 for foul driving, and Stranger being set back for running.

City View Driving Park, July 21st.—Trotting.—2:40 class; purse, \$400; \$150 to second horse.

H. S. Hogboom's br. m. Walla Walla Maid, 5, by Millman's B-I-I-founder, dam Grey Eagle..... 2 2 1 1 1
Jay Beach's br. m. Maggie Arnold, aged, by Almot Manhrino, dam Alice Drake..... 3 1 2 0 2
Misner Bros.' b. g. Stranger, aged, by Signal, dam by George M. Patchen..... 1 3 3 0 3
Time—2:40, 2:38, 2:39, 2:39, 2:39 $\frac{1}{2}$.

The next race was a dash of a mile and a quarter, in which Fred Collier and Joe Howell at \$60 and \$40, with \$20 for the other two horses combined. At about these prices there was a great deal of betting, the Oregonians backing their flyers, while large amounts were placed on the California horses. Fred was in fine condition and scored an easy victory over his opponents.

Same Day.—Running.—Mile and a quarter. Purses, \$400; \$100 to second horse.

Stenlar & Ayres' ch. g. Collier, 4, by Joe Hooker, dam Puss..... 1
Mulkey & Marsh's b. g. Joe Howell, 9, by Bonnie Scotland, dam Etta Shippin..... 2
W. G. Seegins' br. h. Jim Merritt, 5, by Langford, dam Sweetwater, by Volcan..... 3
J. A. Porter's br. m. Caddie R., 7, by Bayswater, dam Sally Wallace..... 4
Time—2:12.

The last race was a half-mile handicap, in which Jim Renwick, the favorite, showed that he had lost none of his speed, for he won after a grand rush with the two mares.

Same Day.—Half Mile Handicap. Purses, \$300; \$90 to second horse. Stenlar & Ayres' ch. g. Jim Renwick, by Hooker, dam Big Gun, by Old George, 4, 109 lbs..... 1
Judge Hamilton's br. m. Blue Mountain Belle, 7, by Napa, 104 lbs..... 2
Mulkey & Marsh's s. m. Premium, aged, by Caster, dam Flying Cloud, 115 lbs..... 3
Foster Bros.' s. m. Lulu Riggs, by Humboldt, dam the mother of Crooked River, 106 lbs..... 4
W. Hefner's b. g. Honest John, aged, by Dr. Lindsey, dam Dasher..... 5
W. R. Johnson's ch. g. Talago, aged, by a son of Dr. Lindsey..... 6
Time—0:48 $\frac{1}{2}$.

On the 21st there was not so large a crowd present as might have been expected, although the withdrawal of Stranger from the trot, and the certainty almost that Maggie Arnold would win, might easily account for the diminished attendance. The first race was very well contested until the finish, and was certainly the most exciting one of the meeting, the mare losing the deciding heat through leaving her feet at a critical moment.

City View Park, July 21.—Purse \$400, for 2:50 class. P. J. Martin's ch. h. Gen. Crook..... 2 1 1 2 1
J. Beach's br. f. Maggie Arnold..... 1 2 2 1 2
Time—2:41, 2:33, 2:41 $\frac{1}{2}$, 2:42 $\frac{1}{2}$, 2:40 $\frac{1}{2}$.

The second race was a dash of two miles, that appeared almost as a walk over for Fred Collier, who looked in the finest fettle.

Same Day.—Purse \$600; a dash of two miles. Wm. Ayer's ch. g. Fred Collier, by Hooker, dam by Norfolk, 4 yrs. 1
C. Mulkey's b. g. Joe Howell, aged..... 2
G. R. Buchanan's ch. m. Trade Dollar, aged..... 3

THE PORTLAND RACES.—At the City View Park races, July 25th, the trotting race of the 2:30 class was won by Milton Medium, in three straight heats, Dexter second, Derigo distanced; time 2:29 $\frac{1}{4}$, 2:27, 2:25 $\frac{1}{4}$. The last heat was the fastest ever trotted in Oregon. The mile and repeat was won by Joe Howell, Fred Collier second, Cadlie R. third; time 1:46 $\frac{1}{4}$, 1:45 $\frac{1}{4}$. The three-quarter dash was won by Jim Renwick, Premium second; time 1:16 $\frac{1}{4}$. These races closed the meeting, which was in every way successful.

MONMOUTH PARK RACES.

The intervening season was continued on July 20th, with the following results: The first race, three-quarter mile, Bedouin won; time, 1:16 $\frac{1}{4}$. In the three-quarter mile for two-year-olds, Maiden Bell was first, Fan Fan, colt, second, Magnate, third; time, 1:17 $\frac{1}{4}$. In the one-mile dash Mary Anderson was first, Corsair second, Sweet Home third; time, 1:44. The Mutuals paid \$96. In the mile and a quarter, Adla was first, Girofla second, Hilarity third; time, 2:13 $\frac{1}{4}$. In the mile and a furlong Hospodar and Marathon started, and the former won; time, 1:58. In the hurdle race, one mile and a half, Felix was first, Kitty Clark second, Bernardine third; time, 2:51 $\frac{1}{4}$.

On the 22d the first race, a mile, Parole won; Clara D. second; time, 1:43 $\frac{1}{4}$. In the second race, three-quarters

of a mile, Bella won; Woodblower second, La Petit Duc third; time, 1:16 $\frac{1}{4}$. In the third race, one and one-quarter miles, Jack-of-Hearts won, Griddle second, Alaska third; time, 2:11. In the fourth race, three-quarters of a mile, Fair Count won; Monitor second, Mall third; time, 3:06 $\frac{1}{2}$. In the fifth race, three-fourths of a mile, Constantine won; Sir Hugh second, Memento third; time, 1:16. In the sixth race, seven-eighths of a mile, Hospadore won; Vampire second, Victory third; time, 1:33. In the seventh race, a hurdle race, one and one-fourth miles, Kittie Clark won; Frank Short second, Joe Hunt third; time, 2:22 $\frac{1}{4}$.

On the 26th, the optional stakes, three-quarters of a mile, Disdain won; time, 1:16. The mile-and-a-quarter race Girofle won; Bye-and-Bye second, Clare D third; time, 2:11 $\frac{1}{4}$. The Neversink handicap, one mile and a half, Monitor won, Eole second; time, 2:37 $\frac{1}{2}$. The mile-and-an-eighth race, Marathon won; time, 1:57 $\frac{1}{2}$. The steeple-chase over the short course, Ingomar won; time, 3:12 $\frac{1}{2}$. At the conclusion of the races James E. Kelly, bookmaker, made a complaint that Walton, "the plunger," had caused the pulling of Marathon in the Hospodar-Marathon race on Wednesday. Walton indignantly denied the charge. The matter will be investigated. The rider of Marathon denies that any improper means were used to cause the defeat of Marathon.

A dispatch from Saratoga states that Runnymede broke down hopelessly, having broken a tendon in the hind leg. Runnymede is by Billet, from Mercedes, and was the most promising three-year-old of the season. Unfortunately, he had a great many engagements in all the principal races, and meeting many with whom he was pretty evenly matched, finally he was run off his legs, and the turf loses an excellent horse.

At the Woodbine Park, Toronto, a match was run on the 14th inst. for \$200 a side, between Mr. Wilson's b. g. Jonathan Scott, by Harry Bassett, from Adeline Carter, and Sheppard Brother's b. m. La Belle, by Reveller, dam unknown, and the former won by a length in 1:47 $\frac{1}{4}$.

THE TRACK.

CLOSING OF STAKES AND PURSES.

On the first day of August next, the Stakes of the Pacific Coast Blood-Horse Association, the Embryo Stakes and the purses and stakes at the California Fairs will close.

The advertisements in this paper will give the particulars. Do not forget the date, TUESDAY, AUGUST 1st, 1882.

FIXED EVENTS.

Santa Cruz County Fair Association. First annual meeting at Santa Cruz, Aug. 15th, 16th, 17th and 18th.
Sonoma County Park Association, at Santa Rosa, Aug. 22d, 23d, 24th, 25th and 26th.
Sonoma and Marin Agricultural Societies. Annual Fair at Petaluma, Aug. 29th and four following days.
Golden Gate Fair, to be held at Oakland, from September 4th to the 9th inclusive.
Butte District Fair at Chico, from September 5th to September 8th, inclusive.
El Dorado District Fair at Placerville, from September 5th to September 8th, inclusive.
California State Fair. Annual meeting at Sacramento, from Monday, September 11th to the 16th inclusive.
The San Joaquin Valley Association Fair at Stockton, from September 19th to the 23d inclusive.
Oregon State Fair at Salem, from September 18th and during the week.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 25th to the 30th inclusive.
Humboldt and Mendocino District Fair at Rhonerville, September 19th to September 22d, inclusive.
Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th, inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th, inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.
Eastern Oregon Fine Stock Association at Union, from October 9th to the 14th inclusive.

FAIRS AT THE EAST.

Kentucky State Fair at Lexington, August 9th to September 2d inclusive.
Minnesota State Fair at Farmington, August 31st to September 8th inclusive.
Iowa State Fair at Fairfield, September 1st to the 8th inclusive.
Minnesota Agricultural Association, at Minneapolis, September 4th to the 9th inclusive.
Nebraska State Fair, at Omaha, September 11th until the 16th inclusive.
Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.
Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 18th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 18th to the 23d inclusive.
New Jersey State Fair, at Monroeville, September 18th to the 22d inclusive.
West Virginia Central Fair, at Clarksburg, September 19th to the 21st inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

CHICAGO TROTTING MEETING.

Thursday, July 20th, was the fifth day of the meeting. The weather was cloudy and cool and the track fast. The first race was the 2:25 pacing class, for a purse of \$2,000, with \$500 extra to beat 2:15. Flora Bell, the favorite, won without difficulty. Flora Bell 1, Winder 2, Princess 3, Joe Bowers 4, Keno distanced, Wonderful distanced. Time, 2:19 $\frac{1}{4}$ —2:18—2:22—2:18 $\frac{1}{4}$. The second race was the 2:19 class, for a purse of \$2,500, with \$500 extra to beat 2:16. Clingstone was the hot favorite, and won without urging, the general opinion being that he could have beaten 2:16 if driven for it. Fanny Witherspoon was a good second in every heat, and in the first lapped Clingstone out to the shoulders. Clingstone 1, Fanny Witherspoon 2, Driver 3, Annie 4, J. B. Thomas 5. Time, 2:17—2:18—2:20. The third race was the 2:40 class, for a purse of \$2,000, with \$500 extra to beat 2:25. Neta Medium was the favorite, but owing to rumors as to the speed of Golden Rule and Douglas, the judges suspected that they were not being driven to win, so after the second heat a new driver was put up behind Golden Rule and Douglas' driver was cautioned. It was a very close race throughout, none of the finishes being more than a length. In the third heat the five horses came under the wire so close together that not more than a length separated the first and the last. Neta Medium 1, Lilian 2, Golden Rule 3, Douglas 4, Florence M 5, Logan B distanced. Time, 2:22 $\frac{1}{2}$ —2:22 $\frac{1}{2}$ —2:26 $\frac{1}{4}$.

On the sixth day of the meeting the weather was clear and warm with a light breeze blowing across the quarter stretch. The track was fast. There were only two events and both were won in straight heats with great ease. The first race

was the 2:25 class, stallions, purse \$2,500, with \$500 extra to beat 2:20. Fred Douglas won, Corbin's Bassaw second, Little Billy third, Abdallah Boy fourth, Red Cross fifth. Time, 2:20 $\frac{1}{4}$ —2:23—2:21 $\frac{1}{4}$. The second race was the 2:17 class, for a purse of \$2,500, with \$500 extra to beat 2:14. So So was the favorite before the race was started, but Edwin Thorne was never headed in either heat, Kate Sprague second, So So third. Time, 2:16 $\frac{1}{2}$ —2:20—2:21.

Saturday was an extra day that brought the meeting to a close. The weather was bright and warm, with no wind. The track was fast and the attendance good. The first race, sweepstakes \$250 each, with \$1,000 added by the Association, was won by Croxie with ease. Croxie 1, Overman 2, Abe Downing 3, King William 4. Time, 2:28—2:22 $\frac{1}{4}$ —2:25.

Second race, Stallion sweepstakes, \$250 each, with \$1,000 added by the Association. Monroe Chief was the favorite, Scott's Thomas being second choice. The race was short and sharp. Black Cloud showed himself a very speedy horse, getting a record surpassed by but one stallion in the country. In the last heat Monroe Chief was lapped on the winner, showing he had lost none of his speed, for he certainly beat his record of 2:18 $\frac{1}{4}$. In point of sustained speed for three heats it was one of the best stallion races in the history of the trotting turf. Black Cloud 1, Monroe Chief 2, Scott's Thomas 3. Time, 2:19—2:18 $\frac{1}{4}$ —2:17 $\frac{1}{4}$.

Third race, three minute class, purse of \$1,000, Jim Bowman 1, 1; Reel, 3, 4, 2; Billy R, 5, 2, 3; The Sheppard, 2, 5, 5; Henderson, 4, 3, 4. Time, 2:30 $\frac{1}{2}$ —2:30 $\frac{1}{4}$ —2:29 $\frac{1}{2}$. Jim Bowman was bought during the race by Budd Doble for \$3,000.

PITTSBURG RACES.

Continuing from our last issue we find that on the 13th there was a couple of very interesting races that elicited much enthusiasm among the crowd of spectators who were attracted to the grounds.

Homewood Park—Purse \$1,500, for the 2:23 class.
H. G. Gonover's b. m. Adele Gould.....3 2 1 1 1
Robt. Steel's b. m. Neta Medium.....1 1 3 2 2
W. P. Maxwell's gr. g. Big Ike.....4 2 3 2
A. Goldsmith's b. g. Barrett, by Chester Chf. 2 5 4 5
H. P. Wade's b. h. Reveille.....5 3 6 6
H. Daws' b. h. Lookout, jr.....7 7 5 4
G. W. Saunders' b. g. Tom B.....6 6 5 7 7
Time—2:25 $\frac{1}{2}$, 2:23 $\frac{1}{2}$, 2:21, 2:23 $\frac{1}{2}$, 2:24.

Same Day.—Purse \$1,500, for the 2:26 class.
R. P. Stetson's b. g. R. P.....1 1 4 2 1
W. A. Forth's blk. g. Dick Organ.....3 4 1 1 2
H. Daws' ch. m. Clara J.....2 2 2 5 3
John Call's b. m. Mollie Kistler.....6 3 3 3 4
John Splan's ch. m. Belle of Lexington.....5 6 4 5
C. H. Stille's gr. m. Tola.....4 5 5 6 dr.
D. F. Bowman's br. m. Sue Granly.....7 7 dr.
Time—2:23 $\frac{1}{2}$, 2:24 $\frac{1}{2}$, 2:25 $\frac{1}{4}$, 2:26, 2:25.

On July 14th the last day of the summer meeting at the Homewood Driving Park attracted a good crowd. The weather was variable, rain falling a portion of the time, which made the track heavy. In the first race there was nothing especially interesting, but the pacing race was hotly contested and very exciting.

The first race, 2:20, was for a purse of \$2,000, as follows:

Early Rose.....1 1 1
Driver.....2 2 3
William H.....3 3 2
Leontine.....4 4 4
Time—2:21 $\frac{1}{2}$, 2:23 $\frac{1}{2}$, 2:22.

Early Rose is one of the sensations of the season. She is by Almont, and is owned by J. Elliott, a vegetable dealer in Philadelphia, and was bought by him near Lexington, Kentucky, in 1879, as a four-year-old, for \$400. In 1880 she trotted in 2:35, last season her time was 2:25, and now she can cut under 2:20 with ease. She is valued at \$20,000.

The second race, 2:35 class (pacing), was for a purse of \$1,000, as follows:

Bay Jim.....3 4 2 1 1
Princess.....4 1 1 3 2
Felix.....1 2 7 3 3
Eddie D.....2 3 6 7 r. o.
Rostover.....5 7 4 5 r. o.
Capt. Jack.....6 5 4 4 r. o.
Estella.....7 5 3 6 dr.
Time—2:24 $\frac{1}{2}$, 2:25 $\frac{1}{2}$, 2:20 $\frac{1}{2}$, 2:21 $\frac{1}{2}$, 2:20.

CLEVELAND RACES.

The twelfth annual meeting of the Cleveland Club began July 25th. It was bright and warm, an excellent track, and there was a good attendance. In the 2:38 trot, purse of \$1,500, Wilson won, Rockton second, May Thorne third. Time, 2:22 $\frac{1}{2}$, 2:24 $\frac{1}{2}$, 2:25 $\frac{1}{2}$. In the 2:23 trot, purse of \$2,000, Jerome Eddy won, Mattie Graham second, Unolala third, Minnie K. fourth. Time, 2:19, 2:18, 2:19.

On the second day there was a large attendance, a fast track and fair weather, varied with slight showers. In the 2:25, pacers' purse, for \$1,000, Warrior and Mattie Bond were favorites. Joe Bowers won; Fuller second. Warrior, Princess, Reno, Estella and Mattie Bond also paced and gained positions in the order named. Time, 2:17 $\frac{1}{2}$, 2:18, 2:19 $\frac{1}{4}$, 2:20 $\frac{1}{4}$. In the 2:29 trotting purse for \$1,500, Big Ike and Owen Hickok's Overman were favorites. Six heats were trotted, London winning the first, second and last; Overman the fourth and fifth, and Kate Taylor the third, Willis Wood, Big Ike and Dick Organ were ruled out, and Lagress was drawn. Time, 2:20 $\frac{1}{2}$, 2:21 $\frac{1}{2}$, 2:23 $\frac{1}{2}$, 2:24 $\frac{1}{2}$, 2:25, 2:27 $\frac{1}{2}$. The free-for-all pacing purse was unfinished. Buffalo Girl was the favorite before the start. Mattie Hunter took the first and second and the third heats. Time, 2:18 $\frac{1}{2}$, 2:17, 2:20 $\frac{1}{4}$.

As a sequel to the big poker game at Newburg, N. Y., in which Mr. Weed lost \$150,000, Judge Fullerton of New York, and Mr. Trude of Chicago, on the 19th inst., acting for Mr. Weed, attached the stable of M. M. Hedges, who won the money from Weed. The stable consists of the horses J. B. Thomas, St. Remo, Bay Billy and Novelty, and is valued at \$15,000. A bond was furnished by friends at the Driving Park. Scott, Hedges' partner in the game, was also taken into custody, although sick at the Briggs House.

Harvard University has established a professorship of veterinary medicine, in connection with the medical school. An animal hospital will soon be established. Two veterinary schools exist in New York and two in Canada, and are well patronized. The college has been influenced in part to take this new course by the fact of the great increase of the number of horses used both for laboring and pleasure purposes, and by the fact that so large a portion of the country's export consists of cattle and meats.

At the Rochester (N. Y.) Driving Park on the 17th inst., W. H. Brown drove Colonel Pearson's team, St. Cloud and Valley Chief, one mile in 2:22 $\frac{1}{4}$. The trial was timed by the watches of five prominent horsemen.

We are sorry to hear from Chicago that St. Julien has a bad leg and is under the care of a veterinary surgeon, who has caused him to be thrown out of training, but it is to be hoped that he will yet be able to trot this Fall, and thus recoup in a small degree for the heavy loss made through his non-appearance in the grand circuit. It appears now an open question between Clingstone, Trinkett, Edwin Thorne and Black Cloud for supremacy on the turf.

After the team rivalry come naturally the four-in-hand tests, and last Tuesday, at Cleveland, Ohio, W. J. Gordon's team trotted against the best record, 2:56 $\frac{1}{4}$, and in the first heat made 2:56, and in the second 2:48. The English will not feel jealous of this performance, as with their stage coaches the coachman prefers a good three-mile gallop to vary the monotony of the drive.

THE PADDOCK.

Property of James Mee, of San Francisco:

Jan. 10th, 1882.—Mischief, chestnut filly, by Thad. Stevens, from Katy Pease, by Plauet.

March 11th, 1882.—Mistake, chestnut filly, by Thad. Stevens, from Mistletoe, she by Wild-Idle, from Katy Pease.

Both these mares have been bred to Wheatley this season.

A DEER HUNT.

EDITOR BREEDER AND SPORTSMAN—DEAR SIR: A few weeks ago I received an invitation from an old friend to spend a few days at his home in Marin county. As I needed a little recreation, it did not take me long to make the few preparations necessary for a trip to the country. Saturday afternoon found me, with my gun and gamebag, on the San Rafael ferry boat skimming over the muddy waters of the bay toward the blue hills that loom up against the western sky back of the town of San Rafael. As I stepped off the boat I was greeted with the outstretched hand and hearty welcome of my friend, Frank DeLong, who, knowing my love for hunting, promised me, even before we reached the wagon, all the fun I could wish for in that line. In a few hours' easy travel we arrived at the house, and after supper we sat down and talked of old times as well as the topics of the day. My friend's place is known as the Novato Ranch. This ranch is well watered and contains several hundred acres. It is situated about thirteen miles from the town of San Rafael. Mr. DeLong showed his good taste in selecting this place for a home.

Of course a deer hunt was the first thing on the programme, so early next morning, with my rifle on my shoulder and high hopes of pleasure and sport, I started out, accompanied by a young gentleman named DeFreege, who, by the way, is a fine huntsman. As Mr. DeLong was harvesting, we did not have the pleasure of his company. We struck across the hills to a spring, about three miles from the house, where my companion said that deer were in the habit of coming to water. On arriving at the spring, as we could find no fresh deer tracks, we concluded that the deer had not come to drink yet; so we secreted ourselves in a clump of bushes, about forty yards from the stream. We had not waited more than a quarter of an hour before the breaking of a dry twig on the other side of the spring caught our ears, and which, I acknowledge, made my heart beat faster. We waited a minute longer when the noise was repeated; and presently a large buck—a perfect beauty—pushed his way through the brush that grew on the edge of the opening around the water. Cautiously we raised our rifles, took a "dead center" sight at his head, and waited for him to come closer. Hardly had he advanced five steps toward us when a doe and her pretty young fawn joined him, and together they came to drink. "Shoot only at the buck," whispered DeFreege. I nodded. "Ready?" "Yes." Two sharp rifle reports rang out as one. The doe and fawn sprang across the opening and bounded away to the hills, 'tut the buck lay at the water's edge pierced by our two fincaden messengers of death." He was a big fellow, and in fine condition.

The rest of the day I amused myself by driving several game poachers off from the Novato tract. These poachers insist not only on breaking the State Game Laws by killing doe and fawns, but also in infringing on the personal rights of the land-owners who have forbidden them to hunt on their premises.

The next morning we shot and crippled a buck, that gave us a merry chase over rocky hills and brushy cañons before we succeeded in bringing him down. In the evening I killed a plump little buck, which made the second; and on the final day of my visit, the eve of the first of July, when the Game Law regarding the killing of bucks goes into effect, I resolved to have one more hunt.

Mr. DeLong, DeFreege and myself tramped over the ranch for several hours without getting a shot, for, though we saw half a dozen or more, we could not get within distance of them. The wildness of these animals was owing, no doubt, to the fact that the trespassers before alluded to had hunted many of them down with hounds. Late in the afternoon I brought down a fine buck, and considered myself fortunate in doing so, as he was at a greater distance than any I had shot at before while on this expedition. This made the fourth deer that I had shot in three days.

The second of July, with a good supply of deer meat for my friends in the city, I bade "good bye" to my friend and host, and returned once more to Frisco, in time to take part in the dusty 4th of July procession. I shall retain the memory of the pleasure I had on Frank DeLong's ranch for many a day. Yours, respectfully, H. H.

The Tuolumne Independent states that a monster grizzly bear was shot last week, at Jo. Lord's place, above Lake Elnor, by his son, Wm. J. The bear was not captured, as he ran down a steep, rocky cañon, where it was impolitic for the hunter to follow. The old fellow must have been shot through and through the body, as every jump he made down the declivity the blood spurted out on either side. Lord said he was as big as a mule—and the Lord is above prevarication. Two cinnamon or brown bears have also been killed by the same party this Spring.

THE HORSES IN TRAINING AT SACRAMENTO.

SACRAMENTO, July 26th, 1882.

EDITOR BREEDER AND SPORTSMAN: Having just returned from a delightful drive down the Riverside road, I feel somewhat imbued with a desire to write you a few lines respecting the horses in training here and their condition. No one but a Sacramentan, who has enjoyed a drive on the Riverside at times when it was enjoyable, can imagine the pleasure it is after dinner to light a fine cigar and jog down behind an animal that has a record of 2:35. Such was my privilege this evening. One of Sacramento's redeeming features are her evenings; no matter if the mercury has touched 95 degrees during the day, the delightful trade wind up the valley from the South is almost sure to be felt after old Sol has disappeared under the western horizon—then one can "cool out" as nicely as though he was "rubbed" and "walked." It is the custom among gentlemen here who have roadsters—and they are quite plentiful—to drive about six, then a pleasant jog down to Nick Doles at the end of the road—a game or two of shuffle-board beneath the sweet-scented locust trees, with a cool breeze sighing through them—refreshes one abundantly; by the time the games are ended, the moon is well up; then comes the "brush" home. I know of no one who can enjoy such pleasure better than your humble servant, unless it is you. Were you here, I would willingly relinquish my place when invited to you, and you would have a chance to guess the best one on a home brush. Should any of your friends express a desire to bring a roadster along this Fall for the purpose of speeding, be sure to advise them to come with their best, as it will require one that can pull a buggy in .40 to beat either Hamilton, Caswell, Wachhorst, Locke, Arnold, McNasser, Wilson, or Taylor home. Well, we have enjoyed our ride; now to business. I know your readers will be more interested in the following than that which has preceded.

At the Park everything looks well; the track is in the best condition—so expressed by those who, I might say, almost live upon it. The number of runners at work is thirty-four, and I can assure you one requires assistance if he wishes to "catch" all of them. Their cooling-out places are stationed at almost every eighth post, and the scene from 4 o'clock until ten is a busy one. Theo. Winters has returned and brought out a new trainer, Dudley Allen of Lexington, Kentucky. He is a colored one, of the new school, and seems to understand his business.

We noticed him at work with the two year olds and observed that he did not run them "against the watch," but gave them such preparatory work as will not injure their muscles, but still at the same time harden their flesh. He was engaged by Mr. Winters at Chicago. Having just left the employ of Mr. Robt. Johnson of Lexington, he is highly recommended by such men as Jno. Clay of Kentucky, in whose service he was five years. He expresses himself well pleased with our country and says he has come here to stay. He is agreeably surprised at our race horses, which he thinks are "as good as any body's horses," and the track is pronounced by him to be the "best in America." He is well satisfied with Mr. Winters' stable, and thinks after having felt of them he will land one or two at the front. The following is a list of the race horses that are receiving their work here.

JIM DOUGLASS—Bay stallion, by Wild Idle, dam full sister to Tom Atchison, owned by Densdale and Howson; in the stable of Geo. Howson. In his past performances he has achieved success, as will be seen by the following record: In his two year old form he ran two races winning one. In his three year old form he ran sixteen races winning eleven. Thus it will be seen that during his short career he has run eighteen races winning twelve. He is now four years old, sixteen hands and one-quarter in height, and weighs about 1,100. The past season was his first in the stud; the number of mares served was 24, and he came out apparently none the worse for it. His best performance, notwithstanding his many good ones, George thinks was his one and one-eighth mile run in San Francisco in his three year old form, with 104 pounds up, which he ran in 1:55½. He is looking fine and taking his work well.

AUGUSTA E.—Brown filly, by Monday, dam same as Jim Douglass—owned and trained by Geo. Howson. She is only two years old. Her maiden race was run during the meeting of the Capital Turf Club this Spring, at Sacramento, in which she defeated Clara W., one-half mile, in .51½ and five-eighths in 1:07. She is about 15-3, weighs about 950, and is a very promising filly.

JUDGE MCKINSTRY—Beautiful bay, by Thad Stevens or Grinstead. We might as well state right here that there is no doubt in our mind but that his sire is Grinstead. His form, color and head show Grinstead plainly. His dam is the speedy little queen Katie Pease, this being her third colt, and the first one that has ever been trained. Her first colt was by Joe Daniels, and being injured while a suckling it was found necessary to destroy it. Her second colt was by Wild Idle, a filly, and for some reason was never trained. Her last colt, at present by her side, is by Thad Stevens, whom it favors in form, and in color the mare. Judge McKinstry, as well as his dam and colts mentioned is the property of Judge Mee, and is being handled by Mr. Matthew Storns. He is a powerful built horse, three years old, stands about 15-2, will weigh 950. He is deceiving in that respect as he is "low on the ground." We have seen him in his work and he resembles old Grinstead in every particular. He is entered in the Breeders' Stake, to be run at the State Fair of 1882, which stake amounts to \$1,250, with such horses as the Duchess, Maria F., Frank Rhoads, Duke of Monday and Idler. Mr. Storns takes great pride in showing him, and thinks he will be able to start a race horse this Fall. The Judge's stable companion is the small Scotch terrier "Aleck," who curls up and goes to sleep as comfortably on the Judge's back as in his kennel.

MARION—Bright bay filly, by Hubbard, dam Electra, she being full sister to Warwick and half sister to Winnifred—owned by J. B. Chase of San Francisco. She is a very handsome two-year-old, and, as will be observed, is bred for a runner. She will probably run her maiden race this Fall.

LADY CLARE—A ch. filly, by Joe Daniela, dam by Owen Dole, g. d. Bonnie Bell, by Belmont—owned by J. B. Chase of San Francisco. She is three years old, 15½ hands high, will weigh 900 lbs. In form she resembles her sire, in color her dam. She is a strong, compact built filly, and if she

does not show speed when turned loose we will be deceived. She is entered in the Winters Stake, to be run this Fall.

LADY—Ch. filly, by Shannon, dam Folly, by Plauet—owned by J. B. Chase. She is a handsome two-year-old. Her maiden race was run this Spring over the Bay District with Gauo, Lucky B., and eleven others. Although last to get off, she finished well up in the bunch. It is said she has shown a half better than 50 seconds. She will be started with a few fast ones this Fall, when we will be able to witness her performance.

EBONY—Black gelding, by Shannon, dam Velvetene, by Lodi—owned by Dr. Taliferro. He is four years old, ran second in the Gentleman's race this Spring. The above are trained by Mat. Storn.

FRANK RHODS—Bay stallion, by Leinster, dam Addie A.—owned by W. L. Pritchard, trained by Willis Hull. He is four years old, a short, pony-built horse, will weigh about 900; has run two races, one in his two-year and one in his three-year old form. He, with the others belonging to Mr. Pritchard, wintered in Nevada, and when brought over last May was very high in flesh. Mr. Hull is steadily working on them, and hopes to be among the winners this Fall.

CAPT. KIDD—Bay stallion, by Leinster, dam Tibbie Duabar, by Bonnie Scotland. He is also owned by Mr. Pritchard and worked by Mr. Hull. He is three years old, and will start in the Breeders' Stake this Fall, which is 1½ miles, and just about his distance.

LIZZIE P.—By filly, full sister to Rhoads—owned by Mr. Pritchard; in the stable of Mr. Hull. She is built exactly opposite in form to Rhoads, being longer and more rangy. She is three years old, ran at Oakland in 1881, in her two-year-old form, beating Maria F., Winnifred, Rosemary and Belle S. She will probably meet some of them again this Fall. She is in fine form and taking her work with ease.

CY MCKLEY—Bay stallion, by Leinster, dam Irene Harding—owned by W. L. Pritchard, being trained by Mr. Hull. He is three years old; a very promising colt; will run his first race this Fall; well bred, and should make a racehorse.

VILA RANDELT—Gray filly, by Waterford, dam Little Sophie—owned by Pritchard, worked by Hull. She is four years old, has run one race at Oakland, in which she failed to get a place. She will probably show some good ones her heels this Fall.

SORREL FILLY—By Leinster, dam Lotta Lee—owned and worked by same parties. She is a fine, large, good guited filly, shows considerable speed, and will be entered through the circuit. Mr. Hull has also in training two two-year-olds that he says will not be slow.

JIM BROWN—Ch. stallion, by Foster, dam Flush, by Hiawatha—owned by Geo. Hearst, in the stable of Mr. Thos. Delaney, who has just returned from Salt Lake. He tells many funny stories about his exploits there, but is perfectly willing to return, as he believes there is no place like California. Jim Brown is four years old, has run nine races, winning five. His best race was at Sacramento last Fall, when he beat Fred Collier 1½ miles, with 110 up, in 2:36½. Delaney says he will fetch him up all right, and that he will be as good if not better than ever he was.

NUBIA—Brown filly, by Leinster, dam Addie A., by Asteroid—owned by J. B. Haggin; being worked by Thos. Delaney. She is two years old, ran her maiden race this Spring.

IRENE—Chestnut filly, by Leinster, dam Irene Harding—owned by J. B. Haggin; in charge of Mr. Delaney. Two years old. Will run her first race this Fall.

YOUNG FLUSH—Dark chestnut, by Leinster, dam Flush—owned by J. B. Haggin; trained by Thomas Delaney. Two years old. Has never run. She is a handsome filly. Is bred right, and should be a fast one.

SOPHIE—Light chestnut filly, by Bazaar, dam Sophie Jennison—owned by J. B. Haggin, worked by Delaney. She is two years old. Ran her first race this Spring. Unplaced.

MR LOVE—Brown yearling filly, by Virgil, dam Lightfoot, by Lexington. This is one of the yearlings purchased by Mr. Haggin at the Swigert sale this Spring. Also, a bay colt, by imported Billet, grand dam Leon. These are being carefully handled by Mr. Delaney. We would say that Maria F., Red Boy, Pearl Jennings, Wildmood, and a couple of fast two-year-olds, are expected to arrive soon. They have engaged stalls at the Park, and will prove quite an addition to the turf of California. They are at present quartered at Salt Lake City, where they have had engagements during the last meeting there.

MAX D.—Chestnut filly, by Shauon, dam Jessie R.—owned by Put Robson; in the stable of Frank De Peyster, who is doing well with her. She is but two years old, and showed up very fine at the Spring meeting.

SISTER TO LOTTERY—Bay, by Mouday, dam Virginia—owned by Henry Schwartz, of San Francisco; in the stable of Frank De Peyster. She is three years old, and is doing nicely.

LADY PARTISAN—Bay filly, by imported Partisan, dam Jule, by Nena Sahib—owned and trained by A. Miller. She is three years old. Never ran, but is bred and has the action of a runner.

In Mr. Winters' stable, under the care of Dudley Allen, is found Duke of Norfolk, Atlanta and Clara W., all of whom are well known. They are in fine order, and will be entered throughout the circuit. The Mattie A., two-year old, is a very promising filly, and will surprise some this year. She is doing well.

The trotters are gathering at the Park, and as a general thing are doing well. Buccaneer is a dark brown stallion, by Iowa Chief, by Green's Bashaw, dam Tinsley Maid, by Flaxtail, supposed to be by Blue Bull—owned by G. Valensin of Hicksville, and in the stable of Wm. Donathan. Buccaneer is 15-3, will weigh over 1,100 in stud shape. During the past season he has covered 19 mares and passed through his season well. In reference to his progeny we would say that Buccaneer has proven himself to be a model stock horse; as to size and speed he excels many of our finer and closer bred horses. The only two colts of his that have ever been shown up and handled for trotters are Flight and Pride. The former in her three-year-old form, without being in condition, got a record of 2:35, and was well up in .32½. As to Pride much has been written, suffice it to say that she trotted as a yearling in 2:41½, being beaten by the renowned Hinda Rose by one second only—the last half she trotted in 1:13. Buccaneer has been handled this year with the intention of trotting him clear through the circuit. But owing to a mishap which required him to be severely blistered, it is now not known whether or not he will be able to go the route. He will at all events be entered. Six of his colts will be in the Embryo Stakes this Fall. Crown Point and Flight are worked in the same stable. The former, with a record of 2:24½, will be entered in the 22 and 25 classes.

The latter is doing nicely, having shown a mile in 2:28½, the last half in 1:12 and last quarter in .35½.

TEMP WINSTON (formerly Kent)—Ch. gelding, by Primus, dam Lady Dow—owned by the Winston estate, in the stable of Elijah Downer. He is nine years old, 15½ hands, weight 930. He has trotted six races, winning four. His record is 2:33. He is in fine form and doing better than ever. He has shown Mr. Downer 26½ this year. He will go through the circuit.

NED FORREST—Chestnut gelding, by Blackbird, dam by Jno. Morgan, g. d. by Glencoe—owned by D. M. Reavis; in the stable of Jno. McIntyre. He is six years old, has never trotted in public. He has proven himself a very handy horse to Mack, who will send him clear through.

WILLIAM D.—Iron grey stallion, by Blackbird, dam Flora, said to be by Taylor—owned by D. M. Reavis. She is but two years old, has shown 2:55, and will, under McIntyre's schooling, lower that considerable, it is thought.

JAMES DUANE—Dark brown gelding by Blackbird, dam by Signal—owned by D. M. Reavis; in the stable of McIntyre. He is four years old, a green one that will bear working up.

Mr. Wilbur Smith has charge of Mr. E. H. Miller's stable, in which are quartered the well known horses:

Claremount, Adalia, Berlin, Adair, Hamil and Adina, being the get of Fred Low and Electoueer principally. They are all doing splendidly under Wilbur's tuition. Adina is entered in the Embryo Stakes for '82-3-4, in all her forms up to that age. She is now a yearling, a beautiful bay, by Electoueer, dam Addie Lee.

COMO—Dark chestnut stallion, flax mane and tail, by Elmo, dam Juno, by Pat Mulloy—owned by C. D. Hastings of Suisun; in the stable of Worth Ober. This colt is 4 years old; trotted two races in 3-year-old form. Has no record.

GOOD BYE—Dark iron grey gelding, dam a thoroughbred mare—owned by Jos. Beake of Suisun; in the stable of Worth Ober. He is 3-years old—a green one.

SULTAN FILLY—Bay, by Sultan, dam Katy Did, by Fireman. She is two years old, a beautiful filly; resembles Eva very much in her form and action. She is owned and trained by Worth Ober.

I WONDER—Brown gelding, by Young's Henry Belmont, dam a Blackhawk mare—owned by C. H. Merrill of Willows, Colusa Co.; in the stable of W. R. Merrill. He has never trotted yet; is a handsome guited horse, and will be entered through the circuit in both the 40 and 30 classes.

BOXER—Ch. g., by Young's Henry Belmont, dam a thoroughbred mare—owned and worked by W. R. Merrill. He is five years old; has never trotted. The same gentleman has a roadster pacer, which he claims is not very slow. He calls him "Finnigan."

GREENVILLE—Brown gelding, by the Tyler hose, dam a thoroughbred mare. He is owned by A. G. Bechtel, of Greenville; in the stable of Chas. Shear. Will be entered in the 30 and 40 classes through the circuit.

BILLY LYLE—Bay stallion, by Roach's American Star, dam by McCracken's Blackhawk—owned by M. Ryan of San Francisco; in the stable of Chas. Shear. He will be in the two mile race.

Youra, etc.,

MILE-AND-A-QUARTER.

NATIONAL ASSOCIATION OF TROTTING-HORSE BREEDERS.

Sixth Annual Meeting, Gentlemen's Driving Park, New York, Oct. 3, 4 and 5, 1882.

The following are the payments and nominations made, as per condition annexed, in stakes, July 1:

2. *Third Renewal of the Annual Nursery (Declaration Stakes)* for foals of 1879, to be trotted (when three years old) at the Fall meeting of 1882; \$50 entrance, payable as follows: \$10 to accompany the nomination, May 1, 1880; \$15 additional July 1, 1882, and the remainder twenty days before the meeting, after which the whole becomes play or pay. Closed May 1, 1880, the final payment of \$25 forfeit will be due on Sept. 13, 1882.

W. H. Taylor's b. f. Lizzie Taylor, by Abdallah Duroc, dam by King's Champion.

W. H. Wilson's blk. f. Martha W., by Arnold—Edna.

C. Stanford's br. f., by Knox—Laura Keene.

C. Stanford's br. c., by Victor Mohawk—Lady Clay.

J. D. Willis' b. c. Rosewood, by Norwood—Rosemary.

C. S. Burr's b. c. Comac, by Kentucky Prince—Atlanta, by Messenger Duroc.

C. S. Burr's b. c. Condict, by Messenger Duroc—Madeline.

C. Backman's ch. c. Chestnut, by Messenger Duroc—Romance.

G. K. Sistare's b. f. Thalia, by Messenger Duroc—Lady Bryant.

B. F. Tracy's b. c. Alroy, by Peacemaker—Monson Girl, by Arabian Girl.

4. *Atlantic Stakes*, for foals of 1877; \$250 entrance; payable in the following forfeits: \$50 to accompany nomination, May 1, 1882; \$50 additional July 1, 1882, and the remainder (\$150) Sept. 13, 1882, twenty days before the meeting of 1882.

J. D. Willis' b. g. Jupiter Norwood, by Norwood—Rosemary, by Jupiter.

A. Goldsmith's b. h. Barrett, by Chester Chief, dam by Houston's Clay.

This stake re-opened to name and close July 1, received the following additional nominations:

B. J. Treacy's b. g. McLeod, by Hemphill's Patchen, dam by John Dillard.

J. L. Russell's b. m. Lotta, by Florida—Kate Foster, by Daniel Lambert.

5. *Pacific Stakes*, for foals of 1878; like condition.

R. Steel's b. f. First Love, by Happy Medium—Mary A. Whitney, by Volunteer.

R. Steel's b. f. Souvenir, by Happy Medium—Lydia Montague, by Tippeco Bashaw.

W. H. Wilson's gr. g. De Soto, by Administrator—Silver Foil, by Jackson's Flying Cloud.

6. *Initiation Stakes*, for stallions that have never beaten 2:30; like condition.

J. O'Rourke's b. h. Daniel O'Rourke, by Dr. Syntax—Erina, by Volunteer.

E. Buck's b. h. Red Cross, by Brigand—Fanny, by Dole's Magna Charta.

A. C. Green's b. h. Gen. Greene, by Ajax—Lady Sheehan, by American Star.

S. Condit's b. h. Patrician, by Thos. Jefferson—Sylph, by Duuharton.

S. C. Well's b. h. St. Gothard, by Geo. Wilkes—Nora, by American Clay.

The Diamond Medal Trophy will be competed for by the Cosmopolitan and California Clubs at San Bruno on Sunday next. It will be a twelve-bird match, and each team comprise fifteen men.

JOSEPH CAIRN SIMPSON, - - - EDITOR

SAN FRANCISCO, - - SATURDAY, JULY 29, 1882

CLOSING OF ENTRIES.

On the first day of August next the stakes of the Pacific Coast Blood-Horse Association, the Embryo Stakes and the Purse and Stakes at the California Fairs will close.

The advertisements in this paper will give the particulars. Do not forget the date---TUESDAY, AUGUST 1st, 1882.

A GRAND DRIVE FOR SAN FRANCISCO.

There is a report current that there is a chance for the construction of a drive in San Francisco which will be a great boon to the citizens of the metropolis, and which will be a benefit to the breeders of road-horses and trotters in every portion of the State. The good results will not be confined to owners, sellers and buyers of horses; the advantages will be general, and the city an equal shareholder in return for the investment. This without cost to the corporation, as it is contemplated to build it with individual subscriptions. There are other things required than commercial advantages to make a great city. It must have the elements of pleasure as well as adaptability for business to attract; and when there is a combination of pleasure and exercise conducing to mental and physical health, the two great essentials of life are joined. From mid-life to old age there is a greater necessity for exercise than youth or early manhood demands. The buoyant spirits compel exertion. The blood is mercurial, and that which causes colts to gambol and run in the pasture-field drives the young man to athletic sports of some kind to work off the superabundant energy. Business cares do not engross the faculties. The work accomplished, and it is banished from the mind. The older are debarred from the same relief. If the inclinations are bent in the same direction, they dare not follow them. Dignity, propriety, all the senseless shams of social and business life, forbid the indulgence. Were a man of fifty years or upwards to engage in a rowing match, a foot race, or bestride a bicycle in a contest with others, his business and social standing would be in serious jeopardy. There are few, however, of that age who have the least desire to engage in these active sports. The truly American recreation of road-driving comes to their aid. In the whole range of exercises suitable for men of business in the cities and large towns, there is none other which is so well adapted to counteract the wear of sedentary and exciting pursuits. There is a counter excitement, turning the thoughts into other channels, relieving the mind from a strain which is destructive if not overcome, and with sufficient exercise to restore the physical functions. Any one who has been in the habit of road-driving, and who is immersed in the cares of business, will acknowledge how great the relief is. From the moment the horses are "set going," especially if the speed is called out by a contest with others, the weariness is gone. There is a magical influence in the swift motion and the struggle for victory. The driver is intent on winning, and the thoughts which tormented him vanish like a dream. Debarred from the favorite pastime, and he will tell you that he is entirely out of sorts. The close of business hours finds him gloomy and despondent, and he goes to bed still under the shadow. He is languid when he arises in the morning, tired when he commences the labor of the day.

But in order to obtain the benefits, there must be an opportunity. With such drives as there are

in the vicinity of San Francisco at present, there is no chance for the exhilarating amusement. Since the Cliff House road has been rendered unfit for fast driving, there is no place suitable, and it is a well known fact that road-horses have depreciated fully fifty per cent. on account of there being no suitable drive. The plan which is now proposed is to construct a driveway skirting Golden Gate Park. The former Superintendent, Mr. Hennessy, had a survey made on the north side of the Park, and he estimated that a mile in length, two hundred feet in width, with fifty feet of the center macadamized, could be built for \$25,000. The grade would only be thirty feet in the mile, which would be little if any impediment. With seventy-five feet on each side of the macadamized portion, there would be ample room for the fast work, and less danger from collisions than if there was a narrower dirt road and no macadam. Without the broken stone in the center, and a dirt roadway of one hundred or one hundred and twenty feet, the probable cost would not be over \$15,000. Either of these amounts can certainly be raised by subscription, if the Park Commissioners decide to take it in hand; and there may be other locations than the one surveyed which will offer equal advantages. Now that the trees have grown to a guarding height, there is protection from the wind, and in a few years more the barrier will be complete. Where previously the sand drifted, piling up in huge heaps, there is no trouble from that source now, and, every year adds to the efficacy of the living guard. There are no serious obstacles to overcome, and we hope to announce ere many weeks have passed that the preliminary steps have been taken.

THE EMBRYO STAKE.

Owing to the somewhat complicated conditions, the Embryo Stake is not easily understood by those who intend making nominations. In "The Track" department will be found an explanation which we hope will be a sufficient information to guide those making entries.

The wonderful performances of the Palo Alto and Sunny Slope youngsters have caused such a trepidation among some of the breeders, that there is a disposition to "stay out," but we think that if the faint-hearted will take a good look at it they will come to the conclusion that such a course is not the proper one. In the first place, it is a direct admission of inferiority, for no matter how plausible the excuses offered, there will be a general verdict that the owners have no confidence in the animals they are rearing. Any person who is engaged in breeding trotting horses cannot afford to lie under this imputation, and there are certainly limited numbers who are enabled to give a few the same chances which the many are granted on the big breeding farms. The amount is so small to risk that no one can claim it is beyond their means, and for this small sum there is a chance for a large gain.

Apart from the question of dollars and cents, dependent on winning the stake, there are interests of far greater moment.

It is important to show that California has advantages for breeding and rearing fast trotters outside of the farms which are so largely stocked, and that a man with a single mare of the right stamp can cope with the owner of scores of them.

There are the same climatic advantages, the same natural aids for development, and though some of the adjuncts for the education of a large number are lacking, this is not an essential when only a few have to go through the course. The Embryo Stake gives the small breeder an opportunity which he should not neglect. The bugbear of injury arising from the early training of colts is no longer dreaded, and that old-time prejudice is fast giving way to a more enlightened knowledge. We hope to receive enough nominations to convince the Eastern people that there are breeders in California who do not share in the belief that the colts on one or two farms are all that there are here, and that even the wonderful deeds of the past have not demoralized them.

BROOKS VS. MYERS.

From a private letter which the editor received from a friend in New York there was a likelihood that Mr. Myers, the "Champion of the World," would visit California, provided he could get the opportunity to have another bout with his conqueror. It is needless to state that his coming would have awakened a vast deal of interest on this Coast, and the enthusiasm which a contest between the two would excite greater than anything else in pedestrianism. We laid the matter before Mr. Brooks, and the following letter was his reply:

SAN FRANCISCO, July 24, 1882.

EDITOR BREEDER AND SPORTSMAN—DEAR SIR: This morning I received your favor, having just come in from the country. I would have answered it before if I had received it sooner, and must beg your pardon for the seeming delay.

In regard to running: I am not going to run out here, for various reasons. I have gone out of training, and I explained to Mr. Myers (and to his satisfaction) that I could not run until late in the Fall. I am here on a vacation, and am enjoying it as such, which I could not if I had to train. Therefore, I shall not run while I am here with any one.

Thanking you for your courtesy towards me,

I am, yours, HENRY S. BROOKS, JR.

This is a straightforward, manly reply, and much as the people here would like to see the two come together, the reasons on the part of Mr. Brooks for declining are sufficient, and will be considered an excuse which is valid, and which should free him from the annoyance of further challenges. Were he to run anyone he would be in duty bound to give Mr. Myers the first opportunity; and if the meeting were to take place here, there would be widespread desire to see it.

THE MEETING ON THE BAY DISTRICT COURSE.

As will be seen by the advertisement, the initial meeting of the series will be held on the Bay District Course on the 5th and 12th proximo, and it must not be forgotten that the entries to the purses close on Monday, July 31st. It was necessary to close them as soon as then in order to do away with the risk of delay in the mails. Under the new Trotting Rules an entry legibly post-marked on the day of closing is valid, and hence, as in some cases, the better part of a week is taken in bringing postal missives from Oakland, it was necessary to look out for this rapid transit through Uncle Sam's agents. The entries should be numerous.

The week intervening between the two days will give the horses ample time to recover, and those which participate in the 2:40 class can have another "sling for fame and fortune" in the 2:30 the Saturday following. The 2:25 and the 2:22 present the same good features. By engaging in and trotting in these purses, the finishing touches will be put on for the circuit, and then for Santa Cruz, etc. There is a misapprehension with some in regard to the 2:40 races at Santa Cruz. There are two of this class, the first on August 15th, for district horses, the second on the 17th, the open race. The 2:25 open race at Santa Cruz is on the 15th, and the 2:30 on August 18th.

Every horse eligible in this section of the country should be named in the Bay District races. A good showing at this meeting will ensure that which it is contemplated to hold in October. We have not the least doubt of there being a hearty response.

PACIFIC COAST BLOOD-HORSE ASSOCIATION--- FIXED EVENTS.

There can scarcely be a question of the stakes of the Pacific Coast Blood-Horse Association showing a large increase in the nominations over those of previous years, and though last year there were thirty in some of these, we expect to see this large number exceeded. Men who are breeding thoroughbred colts "cannot afford" to leave them out. Should the desire be to sell, the colts will bring double the amount, and if retained there is the chance to win a large sum from a small investment. The stakes are well arranged, offering a variety of races in the two and the two and three-year-old form. Do not overlook the time of closing, Tuesday next, August 1st. Direct nominations to C. M. Chase, P. O. box 1961, S. F. See advertisement for particulars.

THE ROWING CHAMPIONSHIP.

Of all out-door sports, in California, rowing has within the past two years most rapidly advanced in popularity. There are now in San Francisco bay half a dozen clubs capable of putting forward representative crews on a first-class regatta, while in various parts of the State rowing associations have sprung into vigorous existence. It is to be regretted that the rowing clubs of interior cities are not more animated by a desire to compete with the San Francisco organizations. Nothing would so rapidly or effectually increase the interest in this healthiest of all sports than competitions of the clubs of one part of the State with those of another. In times past Sacramento and Vallejo were accustomed to dispute the laurels with the oarsmen of the Bay, but of late years the athletes of the Capital and the naval headquarters have been conspicuous by their absence from our harbor. One reason of this retirement of the clubs of the interior has been the lack of attractions on our bay. The regattas held here have not been sufficiently rich in trophies to tempt a crew at Sacramento or Vallejo to undergo the discomforts and expense of training, and submit itself to the possibility of defeat. It is not an inviting prospect for a crew to travel from a distant part of the State to compete for a cheap medal representing nothing but its small intrinsic value. Where there are no rewards for athletic prowess there will be very little of it displayed, and to this fact may be ascribed the termination of the rivalry between the oarsmen of the metropolis and those of interior cities and towns.

The BREEDER AND SPORTSMAN hopes that by the offer of its challenge cup the old spirit of emulation will be revived, and that at the regatta on Thanksgiving Day we shall see once more on home waters the representatives of the country clubs which formerly boasted some of the best athletes in the State. There is nothing in the air of the metropolis or the water of our bay to invest the oarsmen of San Francisco with superior ability. On the contrary they achieve excellence in the art of rowing under grave disadvantages, which are entirely unknown to the rowing men of Vallejo, Stockton and Sacramento. Training in our harbor is made a veritable hardship by the winds, fogs and tides, while on the waters of the interior it is a pleasant and healthful undertaking. It may be argued that owing to the number of oarsmen on the bay, the chances of a strange crew carrying off the championship are too remote to be pleasant. This does not follow. The competition for the BREEDER AND SPORTSMAN'S cup will be club contest. Entries will be limited to established clubs, and no combination of picked oarsmen will be permitted to swoop down and appropriate the prize and the championship.

A club in Stockton having as many members as the Golden Gate or Pioneer or Ariel clubs of San Francisco should stand an equal chance with these organizations. The number of actual rowing men in each of the San Francisco clubs named is not large and should certainly not be formidable enough to discourage any strange club from aspiring to the championship. The BREEDER AND SPORTSMAN'S cup will be the handsomest and most valuable trophy ever offered on the Pacific Coast. As the contest for the cup will decide the championship of the Pacific Coast, there will be no limitation as to boats. The competitors can row whatever suits them and will naturally seek the best boats. So much rowing has been done here in heavy-working boats that some of the most powerful clubs have no four-oar racing shells, but the time which will elapse before the first race for the cup will enable all competitors to equip themselves properly for the competition. So far the indications are that four first-class metropolitan crews will meet to decide the vexed question of superiority. This will insure a grand race, and if only a few entries from the country could be obtained the match would assume a degree of importance never before reached by a regatta on the Pacific Coast.

A RACING CAMPAIGN.

Theodore Winters has returned from the Eastern trip, and in a conversation with him a few days ago he outlined a campaign for California horses at home and in the East, which appears to us to have many points to recommend its adoption. The plan is for the Pacific Coast Blood-Horse Association to hold the Spring meeting in April, a little earlier, perhaps, than that of this season; follow that with a meeting at Sacramento, and then at Salt Lake. From there horses could be taken to any Eastern point desired, or return home. The advantages of such a course will be apparent when consideration is given. In the first place, it is evident that our horses taking part in the Eastern meetings will increase the interest taken in them at home. In order to make the breeding of racehorses properly remunerative in California, it is absolutely essential that there should be outside fields for them to display their powers, outside markets to sell. With all the encouragement possible at home, there must be a surplus from the breeding farms now established, and when this supply is augmented by the natural produce the trouble will be increased.

The impetus to breeding which an Eastern outlet will give is of the greatest importance to the well-doing of turf sports at home. There will be large fields to contend for the home stakes and purses, as the owners will be desirous of making the best selections, which can only be done through public trials, emphatic trials, which actual races alone afford, and the people will have an additional incentive to attend, knowing that there is more at issue than the mere winning of so much money. There will be an anxiety to see the contention which is to decide which are the most worthy to represent California in the far-off courses, and this anxiety will largely increase the gate receipts.

The oldest race course in the United States is at Lexington, Kentucky. That is the oldest, where there has only been one slight break in the meetings for upwards of half a century. The purses and stakes are comparatively small, and yet there is always a good attendance and a large number of starters. This arose from it being the home trial, the touchstone which was to determine the character, the crucible which would separate the gold from the dross, for it has long been an axiom that the colt which wins his stakes there need not be apprehensive of defeat in any company.

The meeting of the Pacific Coast Blood-Horse Association, held as early in April as is thought advisable, followed by one at Sacramento, with a week to intervene, will give plenty of time for a gathering at Salt Lake; and this is just the point which will come in best on the way East. It will break the long journey, making it one of two stages in place of a long stretch without interruption. Mr. Winters informs us that the Jockey Club at Salt Lake will co-operate heartily in this plan, and arrange the meeting so that it will be satisfactory. The first thing to do is for the Capital Turf Club to open stakes similar to those of the Pacific Coast Blood-Horse Association, and have them close at the time of the State Fair. There is scarcely a question that there will be as many nominations as those of the older association when the time of running will not interfere with an Eastern campaign, and a successful meeting result. At all events, we cannot see any objections to giving it a trial. It may be claimed that by having the Spring meetings earlier than usual that trainers cannot get the horses in order, and that there is more risk to run of unfavorable weather during the meeting. Racehorses can be got in condition at any time of the year in California, if the trainers will follow the system which is compulsory in the East; and if not afraid of a gallop through the mud, there is rarely a day when proper exercise cannot be given. There was better weather last year than at any of the previous Spring meetings, though it was held two weeks earlier; and another good feature, it anticipates the picnic season.

RUNNING IN THE MUD.

There is scarcely a doubt that the main cause for the defeat of the California horses at Chicago was the heavy track—not what our folks would call a heavy track, but such a one as never was seen in California. "Imagine," says Mr. Winters, "a black adobe soil of six inches, and beneath that a stratum of yellow clay. Let it rain two-thirds of the time, and have two or three hundred horses galloping on it, mixing the black and the yellow, and then, when it is partially dry—not enough to keep them from sinking, but sticky and holding—run the race." Horses accommodate their action, in a measure, to the ground they are accustomed to run upon. Thus a majority of the horses here have a low, easy, "daisy cutting" style, induced by the courses being adapted for that kind of action; and when first called upon to run on such a track as there was at Chicago during the late race meeting, they necessarily must become tired. Round, even high, action is the sort of progression which comes into play, and the "good mud horse" beats the crack capable of giving him twenty pounds when the conditions are favorable for the one which does not labor so much. It does not depend on strength or size so much as the "way of going;" and as a general rule, the very fast animals have not the right method of handling their limbs for the contingency.

BARRING FROM COLT STAKES.

From all we can learn there is a general concurrence in the opinion that there should be nothing like a bar in colt stakes. If one or two breeders are fortunate enough to rear the winners for years in succession, the only thing to do is to try still harder to reverse the decision of superiority. In all the conversations we have had with men who are engaged in breeding trotters, there are few who desire any bar being incorporated in colt stakes. They are not willing to admit a superiority based on the result of a couple of years, and desire further opportunities of testing the question before acknowledging defeat. This is exactly our view; but to convince people that they are sincere in the desire to do battle they must make entries. We can scarcely credit a man with sincerity when his actions do not "back up" his word, and should he decline to enter in the stakes, the declination will carry more weight than a volume of statements. When there is so little to risk as there is in the Embryo or any of the California, excepting the Stanford stake, it cannot be truthfully said that the amounts are too large. Show your faith, gentlemen, by making engagements, take the best care of your colts, train them early and thoroughly, and the chances are you will make a good showing.

THE ENTRIES FOR THE FAIRS.

As the advertisements give all the necessary information, the only thing to be done is to call attention to the closing of the entries on the 1st of August, so that every one interested will be aware of the fact. It is manifestly a waste of space to urge owners to enter into engagements which are so much to their own interest, but it may be as well to reiterate that little attention must be given to the reports of the wonderful performances on tracks at a distance. These stories are always rife about the time of closing of entries, and some are promulgated with an intention to deceive, others from the universal tendency to increase from repetition. Thus a colt trots on the Oakland track in 2:38, at Petaluma in 2:33, at Sacramento 2:28, and probably at Chico fifteen seconds have been subtracted and 2:23 given. Then, a horse under the most favorable circumstances on a track which is "as fast as chain-lightning" trots in 2:22, and people are sure that he will mark 2:17 in a race. Our advice is, if you have a good horse for the classes in which he is eligible enter him regardless of what you hear. Study the programmes and you will find plenty of places where you can have a chance.

STAKES OF THE NATIONAL TROTTING HORSE BREEDERS' ASSOCIATION.

Elsewhere the stakes for the Fall meeting of the Trotting Horse Breeders' Association will be found, with those who have made the payment which was due July 1st. It will be seen that California figures largely in them, and in one of the twenty-five making the second payment, ten are from Palo Alto, and J. W. Mackay's filly, by Sultan. There is not a doubt of California figuring prominently hereafter in the Eastern events. There will be others who will join in entering into Eastern engagements, and as has been shown in relation to the racing, to the great advantage of homesport.

YACHTING.

SHARPIES.

During last Summer there was considerable interest manifested here on the subject of sharpies. It was the intention of several gentlemen to build a fifty-foot sharpie, but one after another backed out until only one was left, and he could not afford the expense alone. Then a sharpie was built in Oakland, and, as usual, experiments were made to "improve" the experience of others, and the results were not satisfactory. She was given lead ballast instead of bricks; an iron centre-board instead of wood; had a skag and deadwood put on aft, contrary to custom, and had a keel put on also. Then she was rigged with heavy, stiff spars instead of the pliable "sliding-gunter" rig experience has proven the best. The boat was, therefore, not a success. This was unfortunate, since it prevented other people from trying the type of boat, which is, no doubt, well suited to our upper bays and rivers, and for hunting purposes cannot be excelled.

The whole subject of sharpies was pretty well disowned before the San Francisco Yacht Club last year, and Mr. Thomas Clapham, of Roslyn, Long Island, contributed a paper describing their peculiar qualities.

It will interest many, therefore, to give the experience of a New York Yachtsman with one of these boats, and we take from *Forest and Stream* a letter of Mr. Robert B. Roosevelt, describing his sharpie and what he did with her:

About a year ago I wrote a letter to *Forest and Stream* to inquire about the true qualities of the sharpie, a boat about which I had heard much from my youth up, and which had been equally praised and dispraised with unstinted enthusiasm. The replies then furnished were a continuation of my previous experience, one writer contending that perfection alone was to be found where another could discover nothing but faults and shortcomings. Interspersed with this information was a mass of valuable advice concerning Barnegat sneak boxes, Newport pleasure boats, Long Island gunning skiffs, and the regulation catboats, till I felt at the end of my efforts as though I knew almost everything in the nautical way—except just what I wanted to know; so I announced my intention of finding out for myself what no two other persons seemed to be able to agree upon, and this I have fairly accomplished and now will lay before your readers.

I wanted a roomy, comfortable, safe boat for shoal waters, something with a cabin of which the earlins would not be at perpetual war with my skull, a private hotel, with spring beds, and a chance to turn over in sleep without getting jammed between the timbers; a big table for visitors and unlimited lockers for stores; a good fore-castle and a coal stove; and all this adapted for the Great South Bay of Long Island, where the bottom for the most is only two or three feet below the top of the water. In other words, I wanted a yachting canal-boat with a sail in it. I did not ask for speed, intending to take Mr. Seth Green along with me and devote the entire summer to studying the piscatorial capacities of our salt-water inlets and bays. I engaged Mr. Clapham to build me a "Nonpareil" sharpie, 58 ft. long over all and 15 ft. extreme beam, with 6 ft. head room in the cabin and about 4 ft. 6 in. under the deck. As my correspondence had, as I have explained, failed to produce a very clear comprehension of such vessels, I worried the builder somewhat with numerous suggestions, but in the end produced the boat which I am about to describe.

The first item to consider was, naturally, the cost, for I take it that a great deal depends upon how much boat you get for your money. Twenty-five hundred dollars covered that, including anchors, sails, patent blocks, and everything of the best, the cabin and staterooms being tastefully finished inside with hard woods.

On the south side of Long Island we have a beautiful insect, or small bird, as it might almost be called from the delicacy of its song note. This comes to us in great abundance at times, and makes the air fairly rejoice with its hum. It is called, popularly, the mosquito, and to prevent its getting lost in the intricacies of the cabin, the windows, which were large, were made double, half glass and half of mosquito netting, while there were a pair of swinging mosquito net doors in the companionway. There are five berths in the main cabin, each on spring slats, and all under the deck, so that they cannot be sat upon during the day and reduced to the consistency of flint. Sleeping on them is a luxury, and instead of turning out at 5 A. M., as we have always done heretofore, we sleep till 10. Curtains on rods in front of them shut them out of sight during the day.

But if these are luxuries, what will he thought of those in the two staterooms where they are still wider and deeper and softer, and will at a pinch almost accommodate two. In one of these staterooms is a w. c., without which no yacht, large or small, is suitable for the use of ladies. There are then seven berths, besides two in the fore-castle for the men; and the centerboard table will seat twelve on chairs having backs and arms to them, not on bunks which are subsequently to belie beds. There is no door between the cabin and fore-castle, only a sliding panel large enough to pass dishes; and under the berths are shelves and boxes for clothes, and so forth. The fore-castle is roomy, except in

matter of height. Under the cockpit are two water-casks, one of which connects with a coil of pipe in the ice chest with a faucet in the cabin, so that ice-water can always be had without the waste of a cooler. Further aft there is much room for boxes, spare rigging, and the thousand and one things which make up a ya-h't's furniture. In fact, as one visitor remarked, "she is all boat," every inch of space being utilized. In the way of comfort, she is perfection; and she only draws twenty inches of water.

When she was finished and launched, we—myself and my seafaring friends, some of whom had become converts to the cutter theory—tried her sailing qualities with many doubts and misgivings. None of us knew anything of the handling of such a craft with a bottom like a bridge turned upside down, and no keel or skag to keep her on her course, and a rudder with a nose to it. But to our pleasurable disappointment she worked as easy as a catboat, never missed stays, and seemed to get to the windward somehow, at least as well as the merchant vessels we met. The sails were small, the mainsail had a twenty-eight foot boom, and thirty-five feet in the hoist, the foresail was only twenty feet on the foot, and the jib about twenty-six. One man could hoist them all without too much exertion. There were no topsails and no flying jib. She was a handsome craft, dashing and rakish looking, with the one fault of a had stern, and made to appear almost like a man-of-war with her lozenge-shaped windows for ports. We took her around to Fire Island Inlet after a severe storm. The Montauk made her trial trip the following day, and monster as she is by comparison, came in reporting a very heavy sea. We noticed the old ground swell, but minded it so little that we had our dinner in perfect comfort while under way. We had all sorts of wind, from half a gale to a dead calm, close hauled and dead aft, and we ran out of sight astern every working vessel that went out when we did, and we overhauled vessels that were out of sight ahead when we started. These were working vessels only, big and little, schooners, sloops and catboats, but then the sharpie was not built for speed.

We have beaten every working vessel (and some of these are quite fast) we have yet met. Since then I have had her in the South Bay. Mr. Seth Green has run her into one pound net and on to three sand flats, but when she grounds she grounds astern, so that we have only to push her head around, and she goes off as she came on. We have carried all sail through all the heavy weather of this Summer, except when we had ladies aboard, and have rarely had her gunwale under, and there is no sea that ever gets up in the South Bay that troubles her at all. She is most remarkable in this particular when lying at anchor, for when other vessels around her were scooping up the seas with their noses, she was so quiet the carpenters could fit up the inside joiner work.

As to single-handed cruising, I was left alone on her by the sickness of my man, and ran her by myself, without aid of any kind for several days. It was under these circumstances that I met the Orion, a sloop five tons larger. She beat me; but I had no one to help me start sheet or trim in, or handle the board, and I got out of the channel. She had a topsail set and a fair topsail breeze, whereas my boat needed more wind. Still, probably the Orion can beat me. You know her record; and my yacht was not built for speed.

In United States patents it is the custom to wind up with what is claimed as new and valuable, and so will I do. I claim therefore that the sharpie is the cheapest boat built and probably the strongest, for a veritable canal boat loaded with coal, drew in alongside of my boat, and as the tide fell leaned against her and crushed her against the dock. When the tide rose again three men were very busy pumping away at that canal boat, while the Heartsease only needed a new fender strip. I claim further that the sharpie is without comparison the roomiest and most comfortable vessel and next in point of safety to the cutter. That she will work like a top, stand any sea and will prove fairly fast when sparred for that object without losing her wonderful stability. I claim the berths in the wings and wholly under deck as a public boon, the swinging mosquito net doors as an original invention, the coil in the ice chest and water barrels as a decided improvement, the mosquito net windows as a capital arrangement, and the sharpie yacht for all inside work as an unqualified success.

The Virgin is very little used now-a-days.

Loggins' new plunger, Restless, sails well.

The sloop Lillie has gone up river for a week.

The Chiquita is kept at Sausalito now during the week.

The Lively, though her sails are bent, is very little used.

The Magic is off up river, with Wm. Stone and family aboard.

Bob Goble has taken his family off on a cruise up the bay.

Tho' Clara and Annie both lie at Sausalito during the week.

Mission Bay is so shoal that it is a poor place to lay a boat up in.

The Caseo is going up to the Puget Sound waters before very long.

The sloop Bessie comes out of Oakland creek for a short sail occasionally.

Commodore Harrison has been cruising for a week up river in the Frolic.

Vice-Commodore Oliver is cruising up river in the Emerald in company with the Frolic.

A good many yachts are cruising now-a-days. This makes better yachtsmen than racing does.

The improved sailing of the Ariel caused the Chispa to be put on the ways for cleaning.

The old yacht Mermaid is in commission yet, lying at Sausalito. She is old as the hills, but is a good boat yet.

The Whitewing had her full new suit of sails on last Sunday and looks well. What is more to the purpose, she sails well.

The yacht Turner is to build for the Spreckels boys will be 80 feet long, 21 feet beam, 9 feet draught, and will have a 20,000-pound lead keel.

Lots of boat sailing going on in Lake Merritt now-a-days. It is a good place to practice on, as the water is so shallow one can wade ashore if upset.

To-day the Rambler starts for a two weeks' cruise, her first port being Stockton. She will return down river and go up Napa creek a few days before coming home.

Vice-Commodore Floyd's Ariel is very much improved since lead was put on her keel and she was overhauled. She now swings a big single jib instead of three of them.

The Chispa and Clara, flying the Bohemian Yacht Club flag, went up to Commodore Eckley's place on Carquinez straits last Saturday. They went up to Martinez also, where the party attended a concert.

Charley Kellogg is blossoming out into an ocean sailor, piloting the Lolita out through the Golden Gate and across the bar. If they all had this gentleman's love of sailing what a fine lot of yachtsmen there would be here in this bay.

Because one of the dailies complimented the yacht Clara on her fine appearance some of the boat-keepers of other yachts feel jealous. This is as it should be. Anything which will make them jealous is good, as it will arouse a spirit of emulation and all the yacht-owners will be benefited by seeing their yachts in better order. As a general thing the men on the yachts get pretty lazy after a month or so in service, and something is needed to stir them up in order to keep them at their duty properly.

FISH.

BLACK BASS.

Of all the varieties of fish that inhabit the waters of this and the Eastern States, there is none that deserves our notice more than the black bass. The first scientific notice taken of this fish was by a French naturalist, about the year 1800. The native waters of black bass are the St. Lawrence and Mississippi rivers, with their lakes and tributaries, but then they readily adapt themselves to any water or climate. Some that were placed in the lakes and rivers in England have increased wonderfully, so that in a few years they will be considered as one of England's principal food and game fish. There are two varieties of the species, the small mouth and the large mouth bass. The former inhabit the Northern lakes and rivers, and are smaller than their large mouth brothers that hark in the stagnant pools and shallow marshes of the sunny South. As may be supposed from their names, they differ greatly in the size of the mouth, as well as in habits and size. The small mouth bass of the North, when full grown, weighs on an average five pounds. Their meat is perfectly white, and is of a very fine grain and flavor. Their body, too, is not quite so bulky, and as they inhabit the clear, swift-running streams, their movements are more lively, greatly resembling those of the trout. The large mouth bass spend most of their time in the shade of logs or among the submerged roots of trees that grow on the water's edge. In the warm waters of the South, which preserve a more equal temperature than those of the Northern States, the black bass grow to be very large, weighing as high as twelve and fourteen pounds.

Black Bass will thrive and multiply where many other fish would die. They are hardy, not easily affected by change of climate, and have an appetite like an ostrich. They subsist largely on other fish, and when hungry will devour the smaller ones of their own kind. Frogs and snakes stand a poor chance around water inhabited by these fish. They multiply faster than many other fish, as they lay their eggs on the under side of logs or on the pebbles at the bottom of a deep pool, and there the parents remain, fighting away other fish, until the eggs are hatched and the young able to swim; then the young ones must look out for themselves, as they are liable to be devoured by their own parents; whereas many other kinds of fish deposit their spawn in shallow streams, where the young fall easy victims to ravenous watersnakes and birds. The mouth of an ordinary Black Bass is so large that it can easily devour a fish two-thirds of their own size. As a game fish, they are unequalled. If the angler is not very expert with his rod the fish will get away from him, as the tricks that he will resort to to free himself from the hook are astonishing. He will dart hither and thither with the rapidity of lightning, and if there is a root, log or rock near by, he will entangle the line every time. Another trick of the fish is, when he is hooked, to spring out of the water and strike the line with his tail close to his mouth. This cunning movement will, nine times out of ten, free the funny rascal from the hook. The best snare one can use in fishing for this kind is live bait of most any sort—minnows, shrimp, small trout and small frogs.

Before the State Fish Commissioners interested themselves in black bass, there were none of the kind west of the Rocky Mountains, although there is a kind that somewhat resembles them that is caught in the vicinity of Monterey and Tomales. About twelve years ago the Commissioners brought from the East a lot of sixty or seventy small-mouth black bass, which they placed in the waters of the Napa and Alameda creeks. As very little has been heard of this lot, it is supposed they were caught shortly after being placed there. Since then the Commissioners have brought out other lots which they placed in the Spring Valley Water Company's lakes; these fish have multiplied so fast that they are being placed in other lakes and rivers, that they may stock as much of our water as possible. The Sportsman's Club of California have interested themselves in this fish and have taken great pains to bring them from the East and introduce them to the waters of Russian and American rivers. Three years ago they brought out one hundred black bass that averaged about ten inches in length, which they placed in Lake Temescal, back of Oakland. Now the lake is over-stocked and the club are making arrangements to stock Santa Rosa, Vallejo creeks, John K. Orr's lake and many private lakes and ponds with the surplus stock of Lake Temescal. It is the opinion of several sportsmen that black bass will do well in the brackish water of Lake Merced and several lakes that lie close to the ocean. If their ideas are correct and the fish will thrive in brackish water, we see no difficulty in the propagation of this valuable fish.

J. G. Woodbury, the agent of the California Fish Commissioners, arrived in this city on last Monday night, bringing with him, in twelve transportation cans, a select lot of three hundred young striped bass. They were taken from the Shrewsbury River, at Red Banks, N. J., on Monday, the 17th instant. Over four hundred were secured in all. A few died before leaving, and over seventy-five were lost at Council Bluffs, owing to the discourtesy of a railway

official. On the road the fish required the constant attention of Mr. Woodbury and one assistant, an agent of Seth Green, the Superintendent of the New York Fish Commissioners. It was necessary to change the water every few hours and add the requisite amount of salt. The fish were fed several times a day. Crossing the plains good water was obtained from artesian wells at Fremont, Laramie, Antelope and Humboldt. In size these fish average about seven inches in length. They were taken to Benicia the night of arrival and set loose in the Carquinez Straits, at Army Point. Here the water is nearly the same as that to which they have been accustomed in their Eastern homes in the waters of the Atlantic Ocean and tributaries. This lot cost the Commissioners about \$3 50 each, and when placed in the water the fish were in splendid condition; and if they can on y succeed in escaping the close nets placed by the Chinese in the neighborhood of Pinole Point, and thus reach salt water, we may confidently look forward to some splendid salt water fishing in future years. But one importation of striped bass has been made before this. It was four years ago last June, when one hundred and seventy-five were brought across the continent, and put in the water near Martinez. Only two adult fish of this lot have been taken so far as known. One in this bay, the first season after being put in the water, weighing one and a half pounds, and the other was captured at sea, off Bolinas, the succeeding year, weighing four pounds.

The striped bass is one of the best known and most appreciated of all Eastern salt-water fish. They are eagerly sought after by enthusiastic anglers, and are an excellent food fish. Every summer sportsmen from the Eastern cities flock to the New England coast. Here among the many islands and about the mouths of the rivers striped bass are abundant. They are extremely cautious and wary, and the angler is often discouraged before his prize is finally secured. The striped bass is a native of salt water. It is found in all stages of growth, from the size of a smelt to seventy pounds weight. In form they are something similar to the salmon, but the head is larger and the body fuller. In color the bass is a bluish-brown above and white below. From the head to the tail, on a well-developed fish, are from seven to nine narrow dark stripes, which give to this variety its name. In the Spring they run far up the fresh water rivers after smaller fish. In the Autumn they spawn, and in the Winter are found in muddy salt water bays or about the mouths of rivers.

Congress not having, up to the present time, made any appropriation for the United States Fish Commission, no action has been taken by Professor Baird to put the hatchery on the McCloud River in order for this season's work. Ever since the establishment of this hatchery—a period of about ten years—from seven to ten millions of salmon eggs have been taken yearly, of which one-half to two and a half millions have each year been hatched out and placed in the McCloud River. By this means the supply of salmon in the Sacramento River for canning purposes has steadily increased—one hundred and thirty-seven thousand cans having been produced last year. If this supply is not kept up artificially, it is probable that the run of fish in the Sacramento will not be equal to the demand, and one of the great industries of the State thereby crippled. It has been suggested that in the absence of any action by the United States Fish Commission, the Fish Commissioners of this State obtain the use of the hatchery buildings on the McCloud River, and take and hatch out the salmon spawn on their own account. This will have to be done quickly, as all the arrangements will have to be made by August 15th to be of use.

The close season for salmon commences August 1st and terminates September 1st, during which time it is unlawful to take or have a salmon in one's possession. It is to be hoped that the close season will be religiously kept, as the supply of salmon during this month in the upper waters of the Sacramento and McCloud rivers is not one-tenth that of former years. The necessity is so urgent that it is expected that the Fish Commissioners will take extra measures to protect the salmon in their run.

Bay fishing during the past week has been good. Rock Cod have been especially plenty, and unusually large. A party of three fishing in the steam launch Wilson, off Lime Point, on Saturday last, caught sixty-three in a couple of hours—the largest weighing five pounds. Equally large catches are reported in Raccoon Straits and neighborhood. Tomcods and smelts can be caught in all parts of the bay.

Near Colnsa is Butte Slough, a lake about two miles long, and from 75 to 60 yards wide, which is well stocked with fish, particularly catfish. Any one who knows how to handle a hook and line properly can catch several hundred in a day. Some of the catfish weigh two pounds apiece, but there is not much pleasure in the sport. Pike, perch and chub are also taken there.

Of the twenty-one lobsters brought here four years ago and placed in the sea off Point Bonita, no authentic information has been received. They were all full of spawn, but being brought all the way from New York in the same water they started in, it is surmised that the spawn must have lost its vitality while on the way.

Serious complaints are made of a dam on the Moke-lumne river near Laucha Plana which prevents the fish from ascending the stream. The river swarms there with catfish and salmon to such an extent that catching them is not attended with very great sport.

Black bass and catfish are now to be found in the mountain streams above Butte creek. The catfish are beginning to be looked upon as a nuisance, as they increase so rapidly in numbers that they will almost exterminate the other species in the same stream.

The fishing is reported as very good this season at Santa Monica and the sea-wharves are crowded daily with the devotees of the gentel art, who are generally rewarded with good catches of fish, with mackerel among the number.

There has been a very heavy mortality among the fish lately at Donner Lake, large number of chub being washed ashore dead. It is attributed to some dynamite fiend, who ought to be prosecuted to the full extent of the law.

The Reno Gazette is informed that W. B. Todhunter has sent to market this season over 6,000 head of beeves. He is said to be the largest stock raiser in the country. There are others who send more cattle to the market, but they buy them instead of raising them. He has over 20,000 head of stock cattle on 100,000 acres of land.

THE HERD.

THE ART OF BREEDING.

Farmers are prone to breed in a haphazard, careless sort of way. It is not given to everyone to be a Bates or a Booth, an L'Anson or an Ellesmere. To excel in the art of breeding the closest observation is needful. Darwin put it thus: "Not one man in a thousand has accuracy of eye and judgment sufficient to become an eminent breeder. If gifted with these qualities, and he studies the subjects for years, and devotes his lifetime to it with indomitable perseverance, he will succeed and make great improvements, and if he wants any of these qualities he will assuredly fail." Breeding is an inborn art, an inspiration, as much as statesmanship, generalship, painting, poetry, music, mechanics. The germ must be there, *ab initio*. In such splendid specimens as are to be seen in our show-yards and sale-rings, the student has presented to him models which, aided by a close and discriminating study of our stud and herd books, can teach and develop the great principles and lines of breeding, so far as they have been disclosed to ns. All are not destined to shine, but one and all have the command laid on them to make goodly use of even the one talent entrusted to their care. Do not, therefore, because you are not possessed of large capital, or, doubtless, your ability to create a Blair Athol or a Young Duchess, shirk and venture. Strive to learn from the often dear-bought experience of others; take up their results, and though you may never carry off the blue rosette, you may effect many improvements in your time and generation, and more than pay your way. Life is rarely long enough for a man to make his mark as the founder of a new and distinctive breed, and to see success in his own days, although he may effect vast improvements in existing breeds, and add many rungs to the ladder placed to climb the summit of perfection. Remember that over a century has sped away since Sir William St. Quinton (write his honored name in letters of gold), of Scampson-in-Holderness, and Mr. Michael Dobinson, of Durham, imported the Hollanders, to which breed our Short-horns owe their origin.

Some of the breeders' greatest successes have sprung from modest beginnings. The matron of the Duchess tribe of world-wide fame cost but 183 guineas. The dam of Crucifix with her peerless filly-foal at foot, changed hands for forty sovereigns. Pocahontas, till she bore the Emperor of Stallions and his four distinguished brethren, was in obscurity. Queen Mary would have ranked as a common plater but for her pale-faced son Blair Athol. Lanna, too, was of little repute in her own country till the elegant Petrarch showed his quality, and Phaeton, the grandsire of imp. Foxhall—the sensational horse of his year—was picked up at Tattersall's for an old song. *Per contra*, some of the best, as reproducers, have turned out heart-breaking failures. The plums are within the reach of all.

Gentle manners and quiet patient ways mark the successful breeder and his men. The fascinating ascendancy women obtain over the secondary animals is because of the tenderness and winningness of their approach. A rough master may upset all the virtues of generations.—*Live Stock Journal*.

Mr. A. B. Darling's three-year old cow Bomba, 10,330, by Duke of Darlington, 2,460, out of Beauty of Darlington, 5,736, tested for the week ending July 15th, at his farm in New Jersey, gave 21 pounds 1 ounce of butter, which is the largest recorded week for a cow milking with her second calf. She came in June 16th, and is to be tested for a year if she persists at a rate that promises to reach 600 pounds or over. She is a grand-daughter of Eurotas, 2,454, that in her prime made the highest test yet recorded of an in-calf cow, viz., 778 pounds in a year.

THE STAGE.

There is nothing in the way of novelty to announce, either in the past or during the present week that merits mention, save the phenomenal success of the Hanlons in *Le Voyage en Suisse* and the production of a comic romantic opera, entitled *Simona*, at the Winter Garden, that will be noticed more fully in our next issue.

It is generally understood that William Emerson will shortly take charge of the Bush-street Theatre, and with his tact, liberality and enterprise, he is bound to make a brilliant season in this pretty and popular establishment. The only difficulty at the present moment appears to be in the evaluation of the improvements made by Mr. Locke during his lesseeship.

At the Tivoli, the opera of "Der Freischutz" continues on its successful career; but other novelties are in active preparation. Save as regards a series of benefits, in which the acting is of a very secondary consideration, the drama appears in a comatose state; but with the advent of the Union Square Theatre in about a fortnight, we hope to chronicle a most successful season at the California Theatre.

The Baldwin Company, with the exception of Messrs. Jennings, Grismer and Bradley, and Miss Phoebe Davies, proceeded on Thursday last to Denver, to play an engagement of two weeks during the Exhibition there. The company will be under the management of Mr. Gus Frohman, and will doubtless meet with a good reception. At the conclusion of this engagement, a majority of the artists will go on to the East in search of pastures new, and we shall be glad to hear of their success, for such artists as Miss Ada Ward, Mr. Wheatleigh and Mr. John Dillon will be most valuable artists in any company in which they may be engaged.

The Haverly Minstrels, by a judicious change of programme, continue to draw large audiences, and from present appearances they will make this time as brilliant a season as they had on their previous visit. There is a hum of busy preparation at the Baldwin with the production of a spectacular piece that will partake more of the pantomime order than does the present attraction. Our theatre goers who remember the glories of *The Red Gnome*, with its spectacular scenes, bright incidents and clever acrobatic feats, will gladly welcome a piece of that kind to our boards, especially as the Hanlon Brothers strive in all they do to impart an originality to their tricks that excites both astonishment and approval.

Two sons of Harry Irving played Charles and Joseph Surface in the screen scene of "The School for Scandal" at a Liliputian Fair in London June 30 and July 1.

THE MARKET PROSPECTS FOR LIVE STOCK.

Last week we gave a short article on the beef prospect of the Pacific Coast. From what we have learned during the past few days, we have no reason to change our opinion as to the steady price of beef during the coming month. The Coast feeders have sent us all they could spare, and the chances are that this Winter they will have to call on us for some of them back, as elated by the high price received during the Spring months, they have not reserved enough for home consumption. Nevada now comes to hand with a few; and by the middle of August that will be our main supply. But, judging by the price which butchers have been paying for large droves, the rates are firm, and no disposition is shown to let go of any short of paying prices.

From all accounts it would appear as if the cattle men of the Pacific slope have seen their worst days, as regards the price of beef. The greatest drawback in the past to beef has been the abundance of sheep, which have been thrown upon the market regardless of price. This was necessary, as should the herders hold them the ranges would soon be overstocked; but the last Winter was a hard one on sheep in California. Thousands upon thousands died from want of feed, and almost the entire increase had to be killed in order to keep the ewes alive. This, combined with the Eastern demand which at present exists for ewes for Montana and Texas, has kept the price steady all Spring, and will continue to do so during the Fall, as the Texas men are ready and willing to buy all that are offered them at less than the present market value. From this and various other reasons, some of which we have mentioned previously, it will be seen that both cattle and sheep men have cause to be jubilant.

Pork is very scarce, and packers have great difficulty in keeping up a supply; and at the present it looks as if it will be still harder before the year is out. Wars, and rumors of wars, have always been a point as to the holding of grain and corn for better prices, and in some of the Western States the corn crop is reported at about a 'one-half crop.' If such should be the case, it would prevent any crowding of our markets by Eastern packers. The latest intelligence is that the hog cholera has broken out in a virulent form at Bloomington, Ill., and that will also have an effect on California markets. Even should these changes not have their immediate effect on pork, as we look at it, there will be no great change in price during August. We give with our weekly slaughter-house report the price of wool, as taken from an exchange: Beef firm at quotations; steers, extra prime, 8½¢; steers, prime, 8¢; steers, fair, 6½¢@7½¢; cows, extra prime, 7½¢@8¢; cows, extra fair, 6 to 7¢; veal, small 8 to 10¢, large 7 to 8¢; mutton, wethers, choice, 5¢; fair, 4½¢; ewes, choice, 4½¢; fair, 4¢; lamb, 6¼ to 7¢; pork, very scarce; prime hard, 10½ to 11½¢; prime soft, 9½ to 10½¢; live hogs, hard, 7½ to 8½¢; live hogs, soft, 7 to 7½¢. Wool, sales limited: Humboldt and Mendocino, 25 to 26¢ per pound; Sonoma, 25 to 26¢; Southern Sacramento Valley, 20 to 24¢; Siskiyou and Modoc, 20 to 24¢; Calaveras and foothills, 20 to 24¢; San Joaquin, free, 18 to 20¢; San Joaquin, defective, 15 to 18¢; Southern Coast, burly and seedy, 15 to 18¢; Eastern Oregon, choice, 24 to 26¢; Eastern Oregon, poor to fair, 20 to 23¢; Valley Oregon, fine, 25 to 27¢; Valley Oregon, coarse, 22 to 24¢.

MARKET REPORT.

FLOUR—There is an active demand from local consumers, but the export inquiry is light. The best city extras sell for \$5 50@5 75 ¢ bbl for jobbing lots.

WHEAT—During the past week there has been a material shading off in prices quoted in the Eastern and foreign markets, and here buyers are shy. Considerable purchases of the new crop are reported to have been made in the interior by shippers, for forward delivery, principally for Port Costa, Benicia or Vallejo, and prices so paid are said to be relatively higher than buyers offer in this market. Spot lots of extra choice milling cannot be had for less than \$1 73¢@1 75 for No. 1 white, \$1 70 is freely offered for August or September delivery at Port Costa, with \$1 71¢@1 72 asked; No. 2, white, is quotable at \$1 63¢@1 65 per cwt for August delivery at Port Costa.

BARLEY—Owing to the lack of facilities for transportation, the arrivals are comparatively light, but it is expected will be largely increased in the near future. For feed there is an active speculative demand for future deliveries, and transactions on Call at the Produce Exchange have averaged about 1,300 tons per day. Early in the week the market was strong, but at the close holders are far from confident. Choice old bay brewing is scarce, and sales have been made at \$1 95¢@2. For choice Chevalier for future months \$1 45 is bid. Feed, spot, \$1 25¢@1 30 for No. 1, and \$1 18¢@1 20 per cwt for No. 2.

OATS—Consignments of the new crop are increasing, and the market has a less firm tendency. Quotable at \$1 65¢@1 85 per cental, as to kind and quality.

FEED—Jobbing lots from the city mills are quotable as follows: Ground Barley, new, \$31; old, 30; mixed, \$34; Oil cake Meal, \$32.50; Middlings, \$26¢@27.50; Shorts, \$16¢@17; Cornmeal, \$38 per ton.

HAY—Receipts are large, but the market continues steady. Wheat, \$14¢@15; Wild Oat, \$13¢@14; Stable and stock, \$11¢@12 per ton.

STRAW—Supplies are liberal and market weak at 70¢@75¢ per bale.

BEANS—Quotations are largely nominal. Limas, \$4¢@4.50; Pea and small white, \$4¢@4.25; Bayos, \$3¢@3.50; Butter, \$3 75¢@4 25; Pink and Red, \$2 50¢@3 per cwt.

ONIONS—Arrivals are less free, but low prices rule; Reds, 40¢@50¢; Silverskins, 60¢@70¢ per cwt.

POTATOES—New crop sweeters are now coming forward, but have a silvery taste, selling for 3¢@3½¢; Garnet Chile, 75¢@85¢; Early Rose, 60¢@75¢ per cwt.

POULTRY—Live Turkeys, 16¢@19 per lb; Hens, \$3 50¢@7 50; Ducks, \$4¢@5; Roosters, old, \$5¢@5.50; young, \$6¢@7.50; Broilers, \$3¢@4 per doz; Geese, \$1¢@1.75 per pair.

GAME—Venison is in more plentiful supply at 11¢@14¢ per lb; Doves slow of sale at 50¢@75¢; Hare, \$1 75¢@2; Rabbits, \$1¢@1.25 per doz.

EGGS—The demand is active and market firm at 30¢@32¢ per doz for good to choice fresh ranch.

HONEY—Market is dull at 7½¢@8¢ for extracted, and 17¢@18¢ ¢ lb for comb.

BUTTER—Strictly choice fresh ranch roll is scarce at 31¢@32¢; common, 29¢@30¢; mixed lots 22¢@27¢; firkin, 29¢@30¢ ¢ lb.

CHEESE—Steady at 12¢@14¢ ¢ lb for California.

HIDES—Kips and calf, 19¢@20¢; steers, 9¢@11¢; sheepskins, long wool, \$1 00¢@1 50; medium, 60¢@1 00; short, 30¢@50¢; shearings, 25¢@30¢ each.

TALLOW—The demand is active and market well cleaned up. Rendered, 7½¢@8½¢; refined, 11¢@11½¢ ¢ lb.

WOOL—Receipts are light, and nearly all the spring clip has been forwarded to market. Choice Sonoma, Siskiyou, Humboldt and Mendocino product is quotable at 24¢@27¢, as to condition; Coast 17¢@22¢; San Joaquin, free, 18¢@20¢; dirty, 14¢@17¢; Calaveras and Foothill, 22¢@24¢ ¢ lb.

FRUITS—Arrivals of all seasonal kinds are free and consignments meet with ready sales, for all kinds except plums, which are a drag in the market, at 20¢@25¢; German Prunes, 60¢@75¢ ¢ bskt; Pears, common, 30¢@45¢ ¢ bskt, and 60¢@75¢ per box; Bartlett's, 60¢@65¢ ¢ bskt and \$1 50¢@1 75 ¢ box; Figs, white, 50¢@75¢; black, \$1 00¢@1 25 ¢ box; Peaches, 40¢@75¢ ¢ bskt; Crabapples, 50¢ per box and bskt; Apples, 75¢@81 ¢ 50; Grapes, 75¢@81 ¢ 00 ¢ box; Watermelons, \$10 @12.50 per 100; Cantaloupes, \$1 75¢@2 50 ¢ crate; Apricots, 50¢@75¢ ¢ box; Blackberries, \$4 00¢@5 00; Currants, \$4 00¢@5 00; Raspberries, \$8 00¢@10 00; Strawberries, \$3 00¢@12 00 ¢ chest.

VEGETABLES—Marrofat Squash, \$10 00 ¢ ton; Egg Plant, \$1 00¢@1 25 ¢ box; Okra, 10¢ ¢ lb; Green Corn, 15¢@20¢ ¢ doz; Green Peas, 2¢@2½¢; String Beans, 1¢@2¢ ¢ lb; Tomatoes, Vacaville, 25¢@40¢, River, 50¢@75¢; Cucumbers, 30¢@40¢ ¢ box; Peppers, 50¢ ¢ sk and 75¢@81 ¢ 25 ¢ box; Asparagus, \$1 ¢ ¢ box.

PROVISIONS—Eastern Hams, 17¢@18½¢, California, 16¢@17½¢; Smoked Beef, 14½¢@15¢ ¢ lb; Clear Pork \$28, Extra Clear \$28.50, Prime 21 50¢@22 00; Mutton, \$15 00¢@16 50 ¢ bbl; California Bacon, 16¢@17¢ ¢ lb.

MEAT—Beef, 1st quality 7½¢@8½¢, 2d, 6¢@7½¢, 3d, 6¢; Mutton, wethers, 4¢@5¢, Ewes 4¢; Lambs, 6½¢@7¢; Veal, 7¢@9¢; Pork, live, 9¢@10½¢; Dressed, 11¢@11½¢ ¢ lb.

THE KENNEL.

FIXTURES.

National American Kennel Club's trial on quails, Grand Junction, Tenn., December 4th. D. Bryson, Memphis, Tenn., Secretary.

Louisiana Field Trials near New Orleans, La., beginning Dec. 11, under the management of the New Orleans Gun Club.

BENCH SHOWS.—Western Pennsylvania Society's English Setter Bench Show Derby, Pittsburgh, Pa., for English setter puppies whelped on or after March 1, 1892. Entries closed December 1, 1892. I. R. Stayton, Allegheny City, Pa., Secretary.

FIELD TRIALS.—National American Kennel Club's trials on prairie chickens, Fairmont, Minn., September 4th. Entries to American Field Derby closed July 1st; to All-Age Stake, September 4th. Joseph H. Dew, Columbia, Tenn., Special Score for these trials.

Gilroy Rod and Gun Club's trials on quails near Gilroy, Cal., October 28th. Open to dogs owned in California, Oregon, Nevada and Arizona. E. Leavesley, Secretary, Gilroy, Cal.

Eastern Field Trials Club's trials on quails, near High Point, N. C., November 15th. Entrance to Derby close July 1st; to All-Age and Members' Stake November 1st. Fred N. Hall, Secretary, P. O. Box 864, New York.

ANSWERS TO CORRESPONDENTS.

Under this head will be found replies to all questions that may be asked of the Kennel Editor in relation to breeding, breaking, or entering dogs, feeding or curing them of any ordinary disease. Correspondents must state plainly what are the peculiar symptoms of the malady for which they need advice, and in all cases, especially when desiring to know the best way to correct a dog of a fault, must be careful to state the age and sex. No answers will be sent by mail, and all questions must be marked Kennel Editor WEEKLY BREEDER AND SPORTSMAN, San Francisco, Cal.

J. L. MARYSVILLE.—We will shortly publish an article on breeding dogs to retrieve, which will give you all the information you need. Space will not permit of a full answer this week.

L. JONES, TURLOCK.—An injection of warm water and soap is frequently found to be a valuable remedy for cases of mechanical constipation, such as you speak of.

T. C. SAN FRANCISCO.—We do not know of an Irish water spaniel pup for sale. If any of our readers have one and will forward the particulars to this office, we will advise you.

MISS M., SAN FRANCISCO.—Japanese pug dogs are utterly useless except as pets. They are very scarce in Japan and China now, and a well-bred one, possessing all the special marks of the breed, will command a good price. In England and the East they are rarer than in San Francisco, and often bring as much as \$200. Any of the officers of the Chinese steamers would doubtless be able to procure one for you from Yokohama.

P. S., SACRAMENTO.—Ergot of rye given in three-grain doses, at intervals of two hours, will generally be found a great aid in cases of difficult parturition.

NEW COURSING GROUNDS.

One of the principal reasons that the glorious sport of coursing has not yet taken its proper place at the head of the field sports of California is, that to enjoy a first-class run one has to go a greater distance from the principal cities than can well be accomplished within the limited time at the command of gentlemen engaged in business. When one looks around for a suitable place, well stocked with hares, in which to enjoy a day's coursing he calls to mind the plains near Lodi, Point of Timbers near Mount Diablo, Merced, Whitcomb's Ranch near Sacramento, the Santa Clara Valley, San Jose, and other places still farther afield, but can hardly name a spot any closer to home. Of all these places Point of Timbers is the only one that can be visited in one day, and then the time for sport is not sufficient to pay for the trouble and expense of making the trip. Under these circumstances it cannot be doubted that lovers of the leash will hail with delight a scheme to furnish coursing grounds at Newark on the line of the S. P. C. R. R., less than one hour's journey from the city and which can be reached at a merely nominal expense.

Mr. John Dugan is the projector of this splendid place, and has already matured it so far that ere the cool weather makes coursing practicable the coursing grounds at Newark will be complete, and ready for all who have dogs to run and love to see them in chase of an active jack rabbit. The land Mr. Dugan has set apart and laid out for the sport is but a hundred rods from the railway station at Newark. It is about a quarter of a mile square, and will soon be increased by the addition of nearly a quarter of a mile more. On the land there are about 35 acres of trees and underbrush, which will form a fit and natural home for the hares to breed. Beets, lettuce and turnip food, of which hares are inordinately fond, will be planted in spots widely apart to insure the game taking plenty of natural exercise in their search for food. In fact, we use the words of that ardent courser, Clem Dixon, "it is the best natural spot for coursing and for breeding hares that I have seen in all my travels."

There are already a few hares on the land. Years ago they swarmed there, but the constant practice of the persistent pot hunter has thinned them out, and to fill up, Mr. Dugan has made arrangements for the capture and shipment of a large number from the San Joaquin plains. As soon as they arrive they will be turned loose within this spacious inclosure to breed and enjoy life as they please, free and unmolested, until the greyhounds are brought up in the Fall to see how fast they can run. When all Mr. Dugan's plans are complete, and they soon will be, for he has the liberal aid and help of the South Pacific Coast Railroad in his scheme, a new era will dawn for coursing in this State. Gentlemen in San Francisco who, for the reasons above stated, have held aloof from the sport, will commence to keep and breed greyhounds. Those who have dogs already will increase their kennels when they find that they can always get a run at a few hours' notice. Private matches will be arranged. Ladies will take an interest in the sport when they find they can witness it without a three day's trip to Merced or Stockton. Dogs being in greater demand will increase in value and importations will be more frequent than at present.

Perhaps the new grounds for a time will be found inadequate to run off the great Spring matches, but they certainly will be all that is needed for the club meetings, as there will be an unlimited number of hares. The increased interest in coursing will add largely to the number of dogs run at the open meetings, so that there will be no loss to Merced, and the day is not far distant when as in England it will be esteemed a valuable favor to secure a nomination in an open meeting.

Mr. Dugan owns some fine dogs himself, and is fully alive to the requirements of a coursing ground. Teams will hardly be needed at his place, but he will doubtless always be able to supply as many good sound horses as the judges need. His

hotel at Newark furnishes excellent accommodations, and altogether, when complete, it will be no exaggeration to speak of Newark as the courser's paradise. The grounds are far larger than the Plimpton grounds or the far-famed flats at "Altcar," and as the hares will be in a wild and natural state the sport will be not a jot less exciting than on the almost boundless plains of Merced. The proprietor will find no lack of patronage from the start, and the only trouble he will have is to keep away the murderous pot-hunter and his little gun. His plans are entirely practicable. They have been found successful in several instances in England, and here, where the supply of hare is unlimited, they cannot fail of being a grand success.

One of the greatest advantages they will afford is that they will enable gentlemen to properly train and test their dogs before a big match.

Time and again the owners of dogs have lost valuable prizes simply because the dogs have not been trained to work in slips. This can only be properly taught by actual practice, which heretofore could not be given in the city. It is also necessary to success to give a dog an occasional chase after a hare, that it may learn to watch its game for a "turn," and not run blindly and give the spectators the idea that it needs more ground in which to get around than a forty acre field affords. A little coursing is necessary, though too much on the same ground always makes a dog "lurch" and ruins him for a match. The grounds will also serve to educate judges, and that good judges are somewhat needed here no one will deny. A judge who only sees a course twice a year is apt to lose confidence in his riding, also in his judgment, and as judging is, to a great extent, a matter of a quick eye and good nerves, practice is indispensable. It is also well for slippers to take a little practice other than what they get in the actual performance of their duties in a match. Practice makes perfect all around, and the new grounds will give to all a splendid chance to practice.

The following table may be found of interest to the gentlemen who are commencing to found a standard of measurement to guide judges at bench shows. The measurements are taken from celebrated dogs that have won distinction at bench shows:

	Gordon Heavy Weight.	Light weight dog.	Light weight bitch.	Light weight bitch.
Height.....	22 inches.	22 3/4 inches.	21 1/2 inches.	21 inches.
Length of head.....	9 1/2 "	8 1/2 "	8 1/2 "	6 3/4 "
Girth of chest.....	27 1/2 "	27 "	25 1/2 "	24 1/4 "
Round cranium.....	16 "	15 1/2 "	15 "	15 "
Round forearm.....	14 "	12 "	10 "	10 1/2 "
Length of tail.....	15 "	16 "	15 "	13 1/2 "
Nose to end of stern.....	48 "	39 1/2 "	37 1/2 "	38 1/2 "
Lower corner of eye to end of nose.....	4 1/2 "	4 1/2 "	4 "	4 "
Weight in condition for work.....	60 pounds.	50 pounds.	47 pounds.	45 pounds.

THE GORDON SETTER.

The following letter to the *American Field* from the pen of Harry Malcolm is well worthy of careful perusal by all persons interested in that most beautiful of all sporting dogs, the "Gordon," or black-and-tan setter:

EDITOR AMERICAN FIELD: I wish to lay before the breeders of this grand field dog, the Gordon setter, a standard by which I think they should be judged at future shows, as my experience in hunting these dogs for many years has proved to me conclusively that the present standard by which they are judged is an abortion. Stonehenge evidently selected the largest dogs ever seen in the Gordon setter family, and while they may have looked well upon the bench, they are of very little service in the field, either in America or Europe, for I have always seen them succumb, after a day or two's work, to those of lighter frames, the latter made dog lasting for as many weeks, and enduring just as much hardship as dogs of any other strain. The Gordon setter of former days was evidently of a light, racy frame; was a merry worker and good stayer, which we find to be the case to-day. Stonehenge, in making his standard from the large, heavy dog, has been mainly responsible for the present misconception about him, and we at present are suffering from that error. The original Gordon setter was anything but heavy or clumsy.

I initiated this change of standard several years ago, and was in hopes some person would get up a new one. After having waited in vain, I now take upon myself the task, and will request the breeders of these field beauties, if this standard meets with their approval, that they endorse the same through the *American Field*, and at the same time request the officers of the different shows to adopt it. If the breeders of the black-and-tan setters wish to have a separate class for their dogs, they have the same right as the Laverack or Llewellyn setter, but by no means should a breeder of Gordon setters allow the two classes to be mixed as they are now at our bench shows; allow no dogs to win in the Gordon setter class unless they can show by pedigree on side of sire and dam that they trace back to Gordon setter dogs of undoubted purity. Now the following is what I suggest as a scale of points by which these dogs should be judged:

Skull.....	10
Nose.....	10
Ears, lips and eyes.....	4
Neck.....	6
Shoulders and chest.....	15
Back, quarters and stifles.....	15
Legs, elbows and hocks.....	11
Feet.....	9
Stern.....	4
Flag.....	4
Symmetry and quality.....	4
Texture of coat and feather.....	4
Color.....	4
Total.....	100

The skull should be very nearly like the English setter, with the exception that the Gordon setter's head should be a shade heavier and wider; the heavy heads they have now must be gotten rid of. The nose should be moderately long and wide, no fullness allowed under their eyes; from corner of eye to end of nose should be from four to four and one-half inches; there should be a slight depression between the eyes; the nostrils should be a shade wider than in the English setter, and a shade larger in the openings; the nose should be moist and cool, and the end of the nose should be of a black color. The jaws should be perfectly even in length; a "swine nose" or "pig jaw" is a decided blemish. With regard to ears they should be a trifle longer than the English setter, but in other respects they must resemble them, and must be thin in leather; they should be set low, and should be closely to the cheeks without showing any of the inside; they should be well covered with hair with as little wave as possible. The lips should be like the English setter, and must not be so full and pendulous as the present type. The eyes must be full of animation, of medium size, and of a rich color, between brown and gold, or like the ovary of the Italian bee. The neck must be like the English setter, it must not be throaty, but must be clean and racy; it should show well back into the shoulders. The chest, and herein lies one of the great faults of many of our present show Gordon setters, must be gotten rid of at once; I mean his wide bull-dog chest, and heavily loaded fore shoulder. On the contrary, he should have a narrow, deep chest, a nice racy front. What would one think of seeing a thoroughbred racer coming on the track with a Percheron horse's chest? Many of our present Gordon setters look to me just as ridiculous as the racer would look thus bred. He must have well sprung ribs behind the shoulders, a straight back, and a good depth of back ribs. The shoulders should have plenty of liberty, with sloping deep shoulder blades, the elbows well let down and a moderately arched loin. Beware of stooping hindquarters, they show weakness and want of pace. The hind-quarters should be well guarded; they must be as strong or stronger than the front. The tail should be well put on, and carried in very nearly a straight line, and be string-like at the end; a crooked tail at the end, or better known as a "tea-pot" tail, is a decided blemish, and though many Gordon setters are seen with it, it must be gotten rid of. The thighs must be long from hip to hock; the hocks must be straight, and the stifles moderately well bent, and set wide apart to allow the hind legs to be well brought forward, which will allow ease in his movements. See that the loins are not slack, for if they are, endurance in the setter is lost. The elbows and toes should be set straight, for otherwise you will confine the dog

in his movements by their close attachments to the ribs. The feet should be well looked after, for without good feet any setter is useless. Many differ as to how the foot should be formed. My preference is always for a "cat foot;" it looks better, is handled by its possessor with more ease and grace, and when well filled in with hair between the pads, you will not require a stronger or stouter foot, nor one with more endurance than such a foot possesses, either to hunt on the hills or prairies. Any foot, either cat or hare shaped, bare of hair between the toes, is almost useless to the dog possessing it. Symmetry and quality in character the Gordon setter should display an amount of, or, in other words, the general outline must be good and at a glance taking to the eye of a sportsman. The coat should be softer, flatter and closer. A number of Gordon setters have wavy or curly coats; the curly coat is an abomination, and should be bred out; the wavy coat should be treated in the same manner, but it is the lesser evil of the two. The coat should be straight and flat, and should not be as long as the English setter's. The back and ribs should be well coated with softer, flatter and straighter hair than the present Gordon setter; it should be very glossy looking, and in color be of a rich plum black. The Gordon setter should only show setter coat on his profile, legs and tail; the latter should be shorter than the English setter's, and of graceful form, being bare of hair two inches from root of tail, with flag flat and scanty, tapering to nothing at the end. The tan markings should be of deep, sienna color, and should show on lips, cheeks, throat, spot over eyes, under side of ear, but not to show except faintly in upper corner edges nearly at skull, to show nearly to elbows, hind legs up to stifles, and on the under side of flag but not running into its long hair. A Gordon setter with a white frill or a white toe or two should not be cast aside as has too often been done in the past, but always aim to breed them with as little white as possible.

The Gordon setter should not weigh less than fifty nor more than fifty-five pounds, and should not stand at shoulder higher than twenty-four nor more than twenty-four and a half inches. This will give a nice-sized dog; he will look well, will not look by any means squatly, but stand well up, with nice straight legs and they must not be too short or too long.

If the above is followed you will see Gordon setters worth looking at on the bench, and a pride and glory to their masters in the field.

HARRY MALCOLM.

THE RIFLE.

THE INTERNATIONAL MATCH.—Among the twenty-three gentlemen selected to participate in the final competition for places in the team to go to America are the following well known shots: Caldwell, of Renfrew; Gibbs, of Gloucester; Goodyear, of the Sixth Lancashire; Goodsell, of the Second Bucks; Major Humphreys, of the Cambridge University Regiment, who was second among the competitors for the Albert jewel; Corporal Mullineux, of the Sixth Lancashire; Mr. Vatie, of Dumfries; Major Parsee, of Devon, former winner of the Queen's prize, and Colonel Woodrow, of Devon. The team will sail for New York in the steamer Alaska on the 26th of August. They will take up quarters at the Garden City Hotel, Long Island. The scores so far made by the team are no criterion of their strength, as none of the men will use the Martini rifle, but most of them will shoot with the Metford rifle.

A NOVEL MATCH.

The Rod and Gun Club of Santa Barbara celebrated their organization by a club hunt on the 19th inst. A match was formed, sides chosen by the leaders, C. F. McGlashan and Chet F. Brown, each of whom was desirous his side should be victorious in the day's doings. O. Kaeding, L. A. Holmberg and James F. Barron were appointed judges to decide who are the victors getting the most points on the following basis:

Bear, 1,000; California lion, 500; wild boar, 500; lynx, 500; deer, 250; coyote, 100; wildcat, 100; eagle, 50; road-runner, 25; crane, 25; yellow-hammer, 15; hare, 15; magpie, 15; rabbit, 10; gopher, 10; bee-martin, 10; hawk, 10; crow, 10; dove, 5; trout, 5; lark, 5; squirrel, 5; curlew, 5; woodpecker, 5; linnet, 2; blackbird, 1; snipe, 1.

The following were the teams as chosen: C. F. McGlashan's—Israel Miller, Charles B. Greenwell, J. W. Ogad, Harry Stoddard, A. Silva, J. J. Elizalde, S. S. Fisk, L. D. Lilley, N. McCloskey, E. M. Hoit, J. H. Ogan, W. W. Hollister, Jr., John Spence, F. L. Birabent, Fred A. Moore, Manuel Garcia, C. W. Gorham, A. Goux, A. Hayman, E. C. Roeder, J. A. Maguire, John Reed, Thomas Nixon and Al. Crane. C. F. Brown's consist of—L. A. Holmberg, F. C. Foster, John Bullard, J. T. Barron, George A. Culbertson, E. C. Durfee, James P. Vance, Tracy L. Warn, Ed. Breck, A. C. Ryerson, C. Aug. Thompson, Ed. C. Tallant, J. M. Hunter, Thomas A. Cravens, G. A. Lloyd, J. M. Short, Otto Kaeding, A. M. Ruiz, S. C. Hicks, I. K. Fisher, John Longawa, P. L. Moore, H. F. Maguire and John T. Hope.

Each member was expected to strictly regard the game laws; he was allowed to start as early as possible, and to hunt when he pleased. The whole day was to be devoted to hunting, and every one was expected to be at the headquarters by sunset.

The result, as the Santa Barbara *Independent* remarks, was very one-sided, but in giving the score, as follows, that journal omits mention of the game killed.

"For Captain Brown's credit, let it be said, several of his best shots failed from some cause to put in an appearance, which, together with the fact that they selected unfortunate ground, reduced his showing by hundreds more than it should have been. For this reason Captain McGlashan and his men have not felt they could hoist the traditional rooster so common to party victories, especially as the probabilities are that the other side will win the belt at the next bout, and the boot will then be on the other leg.

"Those who arrived at the rendezvous at sundown, and whose scores were counted, were as follows: Chet Brown's side—J. R. Vance, 735 points; C. F. Brown and Tracy L. Warn, 527; Joseph Bates, 250; John Longawa, 212; John T. Hope, 149; I. K. Fisher, 56; total, 1,959. Their total number of points were 1,224; divided by six, the number of hunters, gave 204 as an average. McGlashan's side—Israel Miller, 884 points; C. F. McGlashan, 611; F. A. Moore, 593; S. S. Fiske, 461; Al. Crane, 420; John Spence, 397; A. Silva, 283; N. McCloskey, 283; R. F. Fullington and L. D. Lilley, 175; E. M. Hoit, 40; C. W. Gorham, 30; total, 4,182. The total number of points of these was 1,833; divided by eight, makes an average of 235 1/2. May there be many returns of the day."

It is said that bear, both cinnamon and grizzly, are plentiful this year in the mountains and that experienced hunters have been known to kill three within the week.

In Key West, Florida, sheep will lose their wool in the second year that they are on that island. No matter where they are brought from, they will become as woolless as goats. Lambs dropped there will retain wool just about the same length of time, when their woolly coats become nothing else but a soft, short hair, like in every respect to that of the goat. It is well known that there are woolless sheep, but it was doubtful whether an importation of any kind to a strictly tropic climate would result as above.

ATHLETICS.

OLYMPIC ATHLETIC CLUB HANDICAP MEETING.

This meeting, which took place at the grounds of the Club, in Oakland, last Saturday, deserves more than a passing notice. The Club is the most prominent one on the Coast. The grounds are excellent, and were well prepared for the occasion. The attendance for a handicap meeting in this part of the world was unusually large, numbering about three hundred, all very orderly, respectable and enthusiastic. Everything passed off smoothly and pleasantly. The inner grounds were kept clear of all intruders, and an unobstructed view was obtained of every event. The day was not bad, but still was not what could be called a favorable one for speed, as the wind was directly in the face of the competitors on the back-stretch. The atmosphere was moist, cold and heavy, and the sun, as usual at this season of the year, was obscured by heavy clouds. Still, these were slight drawbacks compared with the lack of competitors in the events. The Club boasts a membership of over seven hundred, almost all young and energetic, and many among them of much promise as athletes. These should have been represented by at least thirty members in the 100 yards, and almost as many in the 440 yards; instead of which, four only appeared during the day to uphold the reputation of the Club, and but two of the four were in condition to make an effort if hard pushed. As we predicted last week, R. S. Haley showed poor form. His trial heat was won by a fine burst of speed in the last twenty-five yards, when his friends had given up all hope of his winning a place in the final. His time from scratch was given as 10½, the slowest taken on the grounds. Harris was beaten about half a yard, and Eiseman, being out of condition, was third, a yard and a half behind. In the second trial heat Brown was awarded first, but it could not have been by more than three inches, and Emmons was only shut out by half the thickness of his breast, and every inch from the start to the finish was a bitter contest between the three contestants. The time, 10½ seconds, was a poor showing for Brown and Emmons, considering their handicaps, 7 and 6 yards respectively, but was good for Anderson, who won second and a place in the final.

Haley, Brown, Harris and Anderson were the starters in the final heat. Haley, even if not in the best of condition, can do a single dash of 100 yards in 10½. Harris and Anderson are not better than 11½ from scratch. Brown should have won first, but was left on his mark at the start, and made very little effort to win, seeing that his case was hopeless. Haley's want of preparation was very apparent in this heat. He weakened at seventy yards, and undoubtedly ran three yards slower than in his trial heat. The time given was 10 seconds. Harris ran a game race, and deserves the medal which he won, but that he could cover the distance in the time reported is too much to believe of him yet. In the 440 yards Brown, although in the best form, for some unknown reason made no effort whatever. Haley, realizing that he could not do the full distance, started from scratch at a 220 gait, and stopped as soon as he saw the dressing rooms. Eiseman, not having had any preparation, naturally failed in the last 100 yards, and ran a hopeless race. Anderson was liberally handicapped, as it was known that he never had ran before, and was never in danger at any point in the race, and won first by fully twelve yards. The struggle for second place between Harris and Germain was closely contested up to within fifteen yards of the finish, but Germain was done up, and Harris added a second medal to his maiden first in the 100 yards. The Club members failed to secure either a first or second medal in either event. It is to be hoped that some of them will make a more favorable showing at the next meeting.

The following is a summary of the events:

One Mile Handicap Bicycle Race.—W. H. Lowden, 82 yards, 1; C. Burkhalter, 70 yards, 2; J. H. Spring, 40 yards, 3. Time, 3:17½.
 One Hundred Yards Handicap Run.—First Trial Heat.—R. S. Haley, scratch, 1; Arthur Harris, 11 yards, 2; D. Eiseman, 10 yards, 3. Time, 10½.
 Second Trial Heat.—Wm. C. Brown, 7 yards, 1; J. H. Anderson, 11 yards (penalized 1 yard), 2; E. S. Emmons, 6 yards, 3. Time, 10½.
 Eight Hundred and Eighty yards Handicap Bicycle Race.—J. H. Spring, scratch, 1; C. L. Leonard, scratch, 2; R. F. Verrinder, 40 yards, 3. Time, 1:37.
 One Hundred Yards Handicap Run.—Final Heat.—Arthur Harris, 11 yards, 1; J. H. Anderson, 11 yards, 2; R. S. Haley, scratch, 3; Wm. C. Brown, 7 yards, 4. Time given, 10 sec.
 Two Mile Handicap Bicycle Race.—C. Burkhalter, 310 yards, 1; G. L. King, 180 yards, and W. H. Lowden, 310 yards, tie for second place; H. C. Finkler, scratch, 0. Time, 6:42.
 Four Hundred and Forty Yards Handicap Run.—J. H. Anderson, 55 yards, 1; Arthur Harris, 40 yards, 2; Harry Germain, 45 yards, 3; D. Eiseman, 37 yards, 4; R. S. Haley, scratch, 0; Wm. C. Brown, 22 yards, 0. In this event a penalty of 1 yard was inflicted on all but Germain. Time, 50 sec.

THE OLYMPIC ATHLETIC CLUB.

The members of the Olympic Athletic Club are anxious to have an important Fall meeting on their new grounds, open to all amateurs on the Coast. It is suggested, also, that special gold medals be offered for breaking club records. R. S. Haley would undoubtedly attempt to beat the 220 yards record, and possibly the 100 or 440 yards. Hawes, Emmons, O'Kane, Doolan and Searle of the Club, and Frick and Dwyer of the University, would make an interesting contest at 100 yards, all starting from scratch. The wheelmen would certainly do their part towards making the meeting one worth attending. The Golden Gate Athletic Club is praying for an opportunity to compete with the Olympics in a tug of war. Admission day will probably be a holiday, and at that time we are almost certain of being favored with the pleasantest weather of the season. The following are standard events, and, with perhaps three or four additional ones, would fill the programme for an entire afternoon's entertainment:

100 yards, handicap run, open; 100 yards, scratch run, open; 100 yards, handicap run, juvenile class; 220 yards, handicap run, juvenile class; 220 yards, handicap run, open; 440 yards, handicap run, open; one mile, scratch run, open; 220 yards by R. S. Haley, to beat club record; putting 16lb weight; running high jump; running wide jump; pole vaulting; 440 yards bicycle race, without hands; 880 yards bicycle race, handicap; one mile bicycle race, handicap; two mile bicycle race, handicap.

There is ample time to talk the matter up, enthuse the athletes, and make such a meeting a success.

HOW TO SAVE THE DROWNING.

It may be well just now to make some suggestions to residents at the seashore in regard to the proper course to be pursued in cases of danger by drowning, and, in the first place, to offer a few words of advice to those who may be called on to swim to the aid of persons struggling in the water. It is most important that the drowning person be assured in a cheery voice that he is safe, and urged to cease struggling, for the more he struggles the more water he swallows, and the more dangerous it is to attempt a rescue. It is sheer madness to seize a man struggling in the water, for he will blindly grasp his would-be rescuer and drag him down; but when he has become quiet, the swimmer should catch him by the hair of his head, turn him quickly on his back, giving him a sudden pull, which will cause him to float, and then start for the shore. Those who have tried this plan say that it is very easy of execution, and instances are on record where one man has swam ashore with four persons, whose hair he grasped and whom he then threw on their backs. In case of a strong outsetting tide the rescuer should, however, throw himself on his back and float until help arrives, for he will soon exhaust himself by battling against the current. And it may be said, in passing, that a lone swimmer, when caught by the undertow, will do far better to float than to wear himself out in uninterrupted struggling for the shore. When a body has sunk to the bottom, and bubbles indicate that life is not extinct, a person may dive in the direction indicated by the bubbles; but he should seize the hair with one hand only, using the other hand in conjunction with the feet in raising both himself and the drowning person to the surface. When the rescued person has been landed, the first thing in order is to arouse him by wiping his body dry, and by slapping smartly the stomach and chest. The jaws should be separated if they are clinched, and kept apart with a cork or small piece of wood. The person should be turned on his face, and the stomach kneaded as long as water flows from the mouth. Then the throat should be wiped with a rolled handkerchief, and the patient turned on his back, with the pit of the stomach elevated above the rest of the body. The waist should then be squeezed with great pressure, as if to force the contents of the chest into the mouth, and suddenly let go. This process, which is an imitation of natural breathing, should be repeated at momentary intervals, but with regularity, until the person's breath is restored; but if satisfactory results do not follow after three or four minutes, the patient should be again turned on his stomach, but in the opposite direction from before, for the purpose of expelling any water remaining in the air passages. Then the artificial respiration should be resumed, and continued until the patient revives or until death is beyond doubt. The process of drying and rubbing should be all the while continued, soon after the breath returns. These simple rules are old, but every one who reads them may this very Summer have cause to put them in practice.

Recent advices from London state that the English pedestrians are already preparing for the foot race which is to come off in New York next October. Rowell has been there for two weeks, with Peter Duryea. The pedestrian takes a run of ten miles every morning, just to keep his muscles flexible. In the afternoon he and Duryea drive a team of American trotters through Hyde Park. They are going to Paris for a week; after which Rowell will go into regular training for the race. He has a private track on his country place near Chesterton, of seven laps to the mile. Rowell promises to be in better condition than he was last Spring. He has an unknown pedestrian that will train him for the race. They will start for New York in the Alaska, August 26th. Hazael is training steadily at a quiet retreat a few miles out of London. He looks in excellent condition, and says that he will make the man who beats him go a long ways beyond six hundred miles. George also drives an American trotter. Weston is giving temperance lectures in England, and it is said he may start in the October race.

BICYCLING.

BICYCLING IN OAKLAND.

The weather on Saturday last was unusually pleasant and favorable for the athletic meeting at the Club Grounds in Oakland. The first race was a mile handicap, the contestants being J. H. Spring, 40 yds., 52-inch wheel; C. Burkhalter, 70 yds., 54-inch wheel; W. H. Lowden, 82 yds., 52-inch wheel. Spring went to work immediately to overtake the leaders, but it was not until the fourth lap that he succeeded in coming up with Burkhalter, who had also about closed the gap between himself and Lowden. In this manner the contestants crossed the line and commenced the last lap, in which all were closely lapped in their original order. Spring coming with a rush on the last turn would have crept into second place, but was pocketed between the two others and did not get out until too late, the line being crossed in the original order, Lowden leading by a length, and Spring lapping Burkhalter's wheel; time, 3m. 17s.

The next race was a half mile handicap, with three entries, as follows: C. L. Leonard, scratch, 50-inch wheel; J. H. Spring, scratch, 52-inch wheel; R. F. Verrinder, 40 yds., 46-inch wheel. Verrinder held his own splendidly for nearly a lap, when Leonard closed upon him and passed into the lead, finishing the lap well ahead. On the last lap Spring made his effort and passed into first place in spite of Leonard's efforts, winning the race by about eight yards in 1m. 37s.

The last race was two miles, and promised to be the most interesting of all, but the scratch man was so heavily handicapped that he lost heart and never attempted to overtake his man and the following were the starters: W. C. Franklin, scratch, 52-inch wheel; G. L. King, 180 yds., 54-inch wheel; W. H. Lowden, 310 yds., 52-inch wheel; C. Burkhalter, 310 yds., 54-inch wheel.

Burkhalter took the lead at once, and gradually increased it over Lowden to the finish. King set out at once to overhaul the leaders, and had cut down Lowden's lead in the third lap of the second mile, but Burkhalter was too far ahead to be caught, and King finished more leisurely in Lowden's company, making a dead heat with him. Finkler, after one lap, without much effort, increased his pace and began to cut down the leaders, but at the end of six laps, finding the task hopeless, gave it up and ran out at a slower pace. Time of race, 6:42.

THE TWENTY-FIVE MILES CHAMPIONSHIP.—F. Wood, of Leicester, and R. James, of Birmingham, met for the third time at the Leicestershire Cricket Ground, June 24th, to de-

cide who was to be the first twenty-five miles champion. It will be remembered that the same riders ran the same distance on the 17th, and after a splendid race the referee was unable to separate his men at the finish, and therefore wisely gave in for a dead heat. James, of course, remained in Leicester, in view of to-day's race, and during the week both men took the greatest care of themselves. Unfortunately, however, when Wood went for a spin on the Friday previous, his shoe came off, and, being thrown from his machine, he was severely shaken. Receiving every attention, the mishap did not interfere materially with his condition, and, upon appearing at the mark, both seemed in good fettle, and considerable interest was evinced in the issue. The weather was fine. There were over three thousand spectators present, and the utmost enthusiasm prevailed. At the start, at five minutes to seven, James went off with the lead, and made the running considerably faster than the previous race. The first five miles was recorded in 15 minutes 58 seconds, nearly three minutes better than the last race. Two laps later, James made a tremendous spurt, but Wood was fully equal to the occasion. James made another determined effort to get away in the twenty-second lap, but Wood objected. The ten miles was hoisted in 32 minutes 10 seconds, and great excitement prevailed when, four laps later, James made a determined effort to get away. Both were still proceeding at a capital pace, and the fifteen miles time was made in 48 minutes 12 seconds. In the forty-third lap another splendid spurt was made by the local man, who, for the first time, assumed the leadership. During the ensuing few laps Wood took his man along at a merry pace, and twenty miles was covered in 1 hour 3 minutes 48 seconds, the best on record. From this point to the finish the issue was stubbornly contested, and towards the finish the excitement grew intense. Amid loud cheering, Wood, just previous to entering the last lap, dashed away from his man, and, half a lap from home, six yards separated the pair. After this, however, James made his final effort, and, gradually drawing on his rival, got upon even terms a dozen yards from the tape, and secured the verdict by a length. Time, 1 hour 20 minutes 15 seconds, beating the previous best—1 hour 20 minutes 55 seconds, by J. Keen, on the Surbiton Grounds, August 23, 1880.

The Hon. I. Keith Falconer, formerly a noted racing man, whose time, 5:36 for two miles, still remains unbeaten, has recently made a notable journey from Lands End, England, to John O'Groats House, at the extreme northern point of Scotland, 994 miles, in a little less than thirteen days, making nearly 77 miles per day, although a great deal of wet weather and strong head winds were encountered.

Dick Turpin's famous ride from London to York has often been beaten by bicyclists. During the early part of July the distance, 196½ miles, was accomplished by H. R. Reynolds of the London Bicycle Club, in 21 hours 43 minutes. The same gentleman also won the annual road race from Bath to London, 100 miles, May 29th, in 7 hours and 26 minutes.

Tricycles have not as yet become common or frequent in the United States, but one has recently been ordered by a lady in a neighboring town for short trips about town, shopping, etc., and it will be found far more convenient than walking and less troublesome than a horse, where the roads are reasonably good.

The question is often asked whether tricycles are not slow. This is best answered by the time of a mile race which recently took place in England, where the full mile was made in 3:16, and three miles were ridden in 11 minutes.

GAME-BAG FILLED AT ONE SHOT.—H. J. Sheldon left his camp at Cooper City, on the Pecos, last Saturday afternoon in search of game. Saturday night he camped at the upper forks of the river, and Sunday, bright and early, was again on the march. About four o'clock in the afternoon the burro, which had wandered ahead, came running back, apparently in great terror, ears and tail erect, eyes glaring, making that peculiar mournful sound for which his species is noted, and refusing to be caught or comforted. Not being able to make out from the report of the confused burro just what had happened, Mr. S. cocked his gun and advanced slowly and cautiously on the unknown enemy. Crawling along on his hands and knees for about a quarter of a mile, he at length doubled a bend in the river, and there, standing in full view in the meadow, and not more than 150 yards away, he saw a huge grizzly bear with three cubs, and, just beyond the bear and in direct range with her, an animal that he at once recognized as the long-sought-for elk. Neither of the beasts was aware of his approach, so, quietly rising upon one knee and resting his rifle across the other, which is Mr. S.'s favorite position in shooting, he took deliberate aim. Bang went the gun, away sped the bullet and down fell two animals—in fact, three—the bear, the elk and Mr. S. himself. The bullet had cut the backbone of the bear completely in two, and, passing on through, had lodged in the heart of the elk; and the extraordinary task to which the rifle had been subjected produced such a violent recoil that the hunter himself was stretched flat upon the ground. Recovering himself speedily, Mr. S. advanced upon the prey, hunting knife in hand, but life was extinct in both animals. The little cubs on hearing the report of the gun, fled; but, being only a few weeks old, were speedily captured, tied in bags and fastened on the back of the horse.—*Santa Fe News*.

WORSE THAN FISHERMEN'S YARNS.—Sanders Hyatt, of Covington, some years ago shot the head off a rattlesnake which was coiled ready to spring. Noticing that the snake looked uncommonly large, Hyatt cut it open with his knife, and a fox squirrel jumped out and ran up a tree, where he shot it. His dog had chased the squirrel, which, running close to the snake, had been snapped up just before Hyatt arrived on the scene. An immense water moccasin was killed recently near Albany, Ga., having in its mouth a catfish eight inches long. The snake had seized the fish by the head, unfortunately for him. There are two big fins on the head of a catfish, and this fish stuck these fins into each jaw of the serpent, which was thus rendered powerless to either swallow or relinquish its prey.—*Atlanta (Ga.) Constitution*.

ANSWERS TO CORRESPONDENTS.

BREEDER AND SPORTSMAN.—Please inform me whether Bertrand and Cherokee were by Sir Archy? If they were not, inform me through the BREEDER AND SPORTSMAN what horse was their sire. W. O. HATCH.

ANSWER.—Bertrand, by Sir Archy, his dam, Eliza, by imported Bedford, rand-dam, imported Mambrina. Cherokee, by Sir Archy, his dam, Roxana, by Hephstion, grand-dam, Roxana, by imported Marplot.

SALINAS CITY, July 26, 1882.

J. O'KANE,

MANUFACTURER AND IMPORTER OF

Harness, Saddles, Whips,
Blankets, Boots, Etc.767.....MARKET STREET,.....767
SAN FRANCISCO, CAL.

Special attention given to the manufacture of "Boots" of all kinds for horses. Can refer to all the principal trainers and horsemen on the Pacific Coast.

N. B.—My acknowledged superiority in this branch of business is largely due to the careful observation and the valuable suggestions of the most skillful "turfmen" in the United States. The benefits of which revert to the public in the shape of a GENUINE WELL-FITTING ARTICLE. Sole agent for Dr. A. H. Dixon's Condition Powders and McKinney's patent "Eureka" and "Eclipse" Toe Weights. Repairing done with neatness and dispatch. Has always on hand the finest assortment of English Ladies' and Gentlemen's saddles, bridles, whips, spurs, bits, and 2-lb race saddles.

**TO SPORTSMEN
PLEASURE SEEKERS.****THE
SOUTHERN PACIFIC R. R. CO.**

RESPECTFULLY CALLS ATTENTION TO THE

Superior Facilities

AFFORDED BY THEIR LINE FOR REACHING A with speed and comfort, the best places in the State for

Sea Bathing, Shooting & Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR
MONTEREY,THE MOST CHARMING
Summer and Winter Resort of the
PACIFIC COAST.

With its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish-Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for Sportsmen.

**THE BATHING ESTABLISHMENT
OF THE****"HOTEL DEL MONTE,"**

IS UNSURPASSED.

A Spacious Swimming Tank

(150 x 50 feet)

FOR WARM SALT WATER PLUNGE AND SWIMMING BATHS.

ELEGANT ROOMS

For Individual Baths with DOUCHE and SHOWER facilities.

MAGNIFICENT BEACH

Of pure white sand for SURF BATHING, Etc., Etc., Etc.

THE FAVORITE ROUTE to those well-known Watering Places,

Aptos, Soquel and Santa Cruz,
IS VIATHE SOUTHERN PACIFIC RAILROAD,
(Broad Gauge), and the
SANTA CRUZ RAILROAD.

At PAJARO, the SANTA CRUZ R. R. connects daily with Trains of the S. P. R. R.

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese,
Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PILARCITOS, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE. These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets of and description issued by this Company, will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggagemen. Train Baggagemen are instructed to issue CHECKS for all Dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR and CHAIN. Guns and Fishing Tackle checked and carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

July 22d to August 1st.

The weights in races Nos. 4 and 9 as per Speed Programme will be announced August 10th.
J. H. KRAUSE,
Secretary.

Pacific Breeders' Association.

Embryo Trotting Stakes, 1882.

Sweepstakes for foals, 1882, \$100 each; \$25 forfeit; \$10 declaration; \$5 nomination fee.
There are three stakes under the denomination of Embryo for 1882, viz., for yearlings, two-year-olds, and three-year-olds. The nominator chooses whether he will name in one or all of them. The yearling stake is a dash of a mile; two-year-olds, heats of a mile, (2 in 3); three-year-olds, 3 in 5—all in harness. Five dollars must accompany the nomination; the declaration, \$10; on or before the 1st of September of the year the race is to be trotted; the forfeit, \$25, on or before the day, which is ten days previous to the date fixed for the race. If the declaration or forfeit is not paid at the specified time, the subscriber will be held for the full amount of the stake. Pedigree, color, marks, and date of foaling must be given, and the following will be the formula for making the nomination:
Sec'y Pacific Breeders' Association. I name in Embryo Stake of 1882, the ——— colt (or filly), foaled ———, 1882, by ———, dam ———, by ———, in the Stakes of 1883, 1884, 1885, if the nominator desires to enter in all of the Stakes. If he desires to name in one or more, specify which years. The \$5 fee covers the first expense if the colt is named in one or all of the races; payment of the declaration \$10 absolves from further payments. The race to be trotted on the first Saturday of November of each year, if good day and track, and on the day named by the officers of the Association. If the day or track is not good, on the first good day and track following the date. The winner shall receive six-ninths of the whole sum, stakes, forfeit, and other sources of revenue; the second, two-ninths; the third, one-ninth. National Trotting Association Rules of 1882 to govern. Nominations to be made to JOS. CAIRN SIMPSON, Secretary pro tem. of Pacific Breeders' Association, office of BREEDER AND SPORTSMAN, 508 Montgomery Street, San Francisco.
JAMES MCM. SHAFER, President.
A. P. WHITNEY, Vice-President.
N. T. SMITH, Treasurer.
JOS. CAIRN SIMPSON, Secretary pro tem.

PROGRAMME.

FIXED EVENTS--SPRING & FALL MEETINGS
1883 and 1884.

BALDWIN STAKE FOR 1882

SPRING MEETING.

FIRST DAY.

WINTERS' STAKE—For three-year-olds, to be run the first day of the Spring Meeting; dash of one-and-a-half miles; \$100 each, \$25 forfeit, \$250 added; second to have \$150, third to save stake. Nominations in above to be made for 1884.
SAME DAY—CALIFORNIA STAKE—For two-year-olds, \$50 each, \$25 forfeit, \$250 added; to be run on the first day of the Spring Meeting; second to save stake; dash of half a mile. Nominations in above to be made for 1883.

SECOND DAY.

PACIFIC CUP—Handicap of \$100 each, \$50 forfeit, \$20 declaration, \$600 added; second to receive \$300, third to save stake; two-and-a-quarter miles; to be run on the second day of the Spring Meeting. Will close the 1st of March, 1883.

THIRD DAY.

"SPIRIT OF THE TIMES" STAKE—Dash of one-and-three-quarter miles for all three-year-olds; \$100 each, \$25 forfeit, \$300 added; \$150 to second, third to save stake. Nominations in above to be made for 1884.
SAME DAY—GANO STAKE—Dash of three-quarters of a mile for two-year-olds; \$50 each, \$25 forfeit, \$25 added; second horse to save stake. When any California two-year-old beats the time of Gano, 1:15 for three-quarters of a mile, the Stake to be named after the colt which beats it. Nominations to be made for 1883.

FALL MEETING.

FIRST DAY.

LADIES' STAKE—For two-year-old fillies; \$50 entrance, \$25 forfeit, \$200 added; three-quarters of a mile; second to save entrance. Nominations to be made for 1883.
SAME DAY—THE VESTAL STAKE—For three-year-old fillies, one-and-a-quarter miles; \$25 p. p.; \$300 added; second to receive \$100, third to save stake. Nominations to be made for 1884.

SECOND DAY.

STALLION STAKE—Conditions—Only those three-year-olds are eligible which are the get of stallions owned in this State. The stallions have to subscribe the amount charged for their services to the fund; private stallions at the price of their last season, and those which have not made a public season, to pay \$50, that sum being the minimum price. The owner of the get of a stallion is competent to name. The stake for the colts shall be \$100 each, \$25 forfeit; plate or money added at the discretion of the Committee; distance, 1 1/2 miles. To close for 1882 on the 1st of August next, at which time both stallions and colts (progeny) must be named.

THIRD DAY.

THE BALDWIN STAKE—Post stake for all ages; dash of four miles; \$250 each, p. p.; \$1,000 added; second, \$400, third to save stake. Will close on the 1st of August, 1882 for that year.
SAME DAY—FINIGAN STAKE—For two-year-olds; dash of a mile; \$50 each, \$25 forfeit; \$250 added; second to save stake. Nominations to be made for 1883.
SAME DAY—FAME STAKE—For three-year-olds; dash of two miles; \$100 each, \$25 forfeit; \$500 added; second to have \$150; third to save stake. Nominations to be made for 1883.
All of these Stakes close on the first day of August next, the colts rating now as yearlings, foals of 1881. Nominations to be made to C. M. Chase, Assistant Secretary, P. O. box 1,961, S. F. P. C. B. H. A. To be valid they must be plainly postmarked on that day, 1st of August.
JOS. CAIRN SIMPSON, Secretary.
C. M. CHASE, Asst. Secty.

SPEED PROGRAMME

FOR THE

First Annual Meeting

OF THE

SANTA CRUZ COUNTY

Agricultural Fair Association,

At SANTA CRUZ.

Commencing - Tuesday, August 15th.

\$3,500 IN PURSES!

FIRST DAY--TUESDAY, AUG. 15, 1882.

No. 1—TROTTING RACE—Purse \$250 for horses that have never beaten 2:40. Owned in the District.
No. 2—TROTTING RACE—Purse, \$500. For horses that have never beaten 2:25.

SECOND DAY--WEDNESDAY, AUG. 16.

No. 3—RUNNING STAKE—For two-year-olds; \$50 entrance; \$10 forfeit; \$150 added. Second to save entrance, Dash of three-quarters of a mile.
No. 4—RUNNING STAKE—Free for all; \$50 entrance; \$10 forfeit; \$100 added. Second to have entrance. Dash of a mile.
No. 5—TROTTING RACE—Purse \$100. For double team owned in the District by one man.

THIRD DAY--THURSDAY, AUG. 17.

No. 6—TROTTING RACE—Purse \$400. For horses that have never beaten 2:40.
No. 7—TROTTING RACE—Purse \$100. For horses that have never beaten three minutes. Owned in the District.

FOURTH DAY--FRIDAY, AUG. 18.

No. 8—RUNNING RACE—Selling Purse, \$200; \$50 to

second horse; entrance 5 per cent. to third horse. One mile and repeat. Horses entered to be sold for \$1,000 to carry their entitled weight. Two pounds off for each \$100 under fixed valuation. Winner can be claimed by any one.
No. 9—RUNNING STAKE—Free for all; \$25 entrance; \$10 forfeit; \$75 added. Second to save entrance. Half-mile and repeat.
No. 10—TROTTING RACE—Purse, \$500. For horses that have never beaten 2:30.

FIFTH DAY--SATURDAY, AUG. 19.

No. 11—TROTTING RACE—Purse, \$600. Free for all.
No. 12—TROTTING RACE—Purse, \$400. Free for all two-year-olds. Mile and repeat.

Remarks and Conditions.

All trotting races are the best three in five, except the two-year-old trot; five to enter and three to start. Entrance fee 10 per cent. on purse, to accompany nomination. Purse divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes, alternately, if necessary to finish a day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.

Those who have nominations in stakes MUST name to the Secretary, IN WRITING, the horses they will start on Wednesday, on the Monday previous, and on Friday the Wednesday previous, by twelve o'clock M. This rule is obvious, and must be strictly adhered to.

No added money paid for a walk over.

Horses entered in purses can only be drawn by consent of Judges.

Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.

Special trains will be run by the Southern Pacific Railroad and South Pacific Coast Railroad, and excursion tickets sold by both companies from all points on their lines, good from August 14th to August 20th, inclusive.

J. D. CHACE, President.

JAMES O. WANZER, Secretary.

ENTRIES.

1. Entries must be made in writing and dated, and give sex, color and marks of horse; also name and residence of owner.

2. State number of the race in which you wish to enter.

3. State name of sire and dam of horse entered if known; if unknown, state the fact.

4. State name and postoffice address of party entering the horse.

5. If name of horse has been changed, state former name.

6. Send entrance fee to all nominations.

CONDITIONS.

1. Entries to all races, except Nos. 1 and 5, to close with the Secretary at 12 o'clock M. on Monday, the first day of August, 1882.

2. Entrance fee to the above races will be 10 per cent. of the purse, and must accompany the nomination.

3. In all races five to enter and three to start. Any horse distanced or not starting will forfeit his entrance fee. No money will be paid for a walk over.

4. Rules of the Pacific Blood Horse Association to govern running races, and of the National Trotting Association to govern trotting.

5. No horse entered in a purse can be withdrawn except by consent of the Judges.

6. All trotting and pacing races, except No. 1, will be mile heats, 3 best in 5.

J. P. CLARK, President.

CHARLES HOFFER, Secretary.

THIRD FAIR

OF THE

Ninth District Agricultural Ass'n

TO BE HELD ON

September 19, 20, 21 and 22, '82

AT

Rohnerville, Humboldt Co., Cal.

SPEED PROGRAMME.

FIRST DAY.

TUESDAY, SEPT. 19TH, at 1:30 o'clock, P. M.
RUNNING—No. 1. Purse of \$40. Free for all saddle horses that have never run for money. Catch weights. Half mile and repeat. First, \$30; second, \$10.

SECOND DAY.

WEDNESDAY, SEPT. 20TH, at 10 o'clock, A. M.
PARADE OF STOCK in front of the Grand Stand.
At 1:30 o'clock, P. M.—RUNNING—No. 2. Purse of \$100. Free for all. Half mile and repeat. First, \$75; second, \$25.

At 3 o'clock, P. M.—RUNNING—No. 3. Purse \$30. Mile Race. Half mile and repeat. Catch weights. First, \$20; second, \$10.

THIRD DAY.

THURSDAY, SEPT. 21ST, at 10 o'clock, A. M.
RUNNING—No. 4. Purse of \$150. Free for all. Mile heats, two in three. First, \$100; second, \$50.

At 1:30 o'clock, P. M.—TROTTING—No. 5. Purse of \$100. Free for all horses that have never beaten three minutes. Mile heats, two in three. First, \$75; second, \$25.

At 3 o'clock, P. M.—RUNNING—No. 6. Purse of \$40. Single dash of one mile. Free for all saddle horses that have never run for money. Catch weights. First, \$30; second, \$10.

FOURTH DAY.

FRIDAY, SEPT. 22D, at 10 o'clock, A. M.
LADIES' EQUESTRIANISM—First, \$15; second, \$10; third, \$5. The ladies will prepare themselves with horses for the exhibition, and no changing will be permitted.

No. 19.—SAME DAY.—COMPETITIVE MILITARY DRILL.—A prize of the value of \$250 will be offered by the Association to the best drilled Military Company in the State of California. Rules and conditions to be published hereafter. It is the intent of the Directors to have the first competing companies determine what the prize or trophy shall be, and to have the same annually competed for, until it shall have been won three times by the same company, when it shall become the absolute property of the winning company.

No. 20.—SAME DAY.—GRAND BICYCLE TOURNAMENT.—For the Association's Gold Medal to first, Silver Medal to second, and Bronze Medal to third; 1 mile dash; open to all bicyclists.

No. 21.—SAME DAY.—TROTTING.—Free for all; purse, \$500; first horse, \$480; second, \$240; third, \$80.

No. 22.—SAME DAY.—A SET OF HARNESS, of the value of \$125, will be offered for gentlemen's roadsters; best two in three; owners to drive.

By a "gentleman's roadster," is meant any animal owned and driven on the road by any gentleman for his own private pleasure.

CONDITIONS.

Entries to all running stakes, trotting and pacing races, to be made to Secretary Walker, on or before August 1, 1882. Forfeits in running stakes, and the entrance fee of 10 per cent. on the trotting and pacing races, should in all cases accompany the nominations and entries.

All the trotting and pacing races are the best three in five. In all, five to enter, and three to start.

Entrance fee, ten per cent. on purse.

When there are eight or more starters in a trotting race, 150 yards to be a distance.

National Trotting Association rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

All offers in trotting races are confined to horses on the Pacific Coast May 22, 1882.

In running races, three or more entries required to fill. Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous. No added money will be paid for a walk-over.

Horses entered in purses can only be drawn by consent of the judges.

Rules of the Pacific Coast Blood Horse Association to govern running races, except as above specially provided.

All entries to be made in writing, to give sex, color and marks of horse; also, name and residence of owner; and in running races colors to be worn by rider. And in all, any other particulars that will enable the spectators to distinguish the horses in the race.

Write "Entries to races" on outside of Envelope.

L. WALKER,

Secretary.

A. C. DIETZ,

President.

\$12,500
In Purses and Stakes.CALIFORNIA
STATE FAIR

No. 18.—RUNNING.—POST STAKE.—Dash of three miles; free for all; \$100 entrance; \$500 added; weight 100 pounds; three-year-olds, 90 pounds; second horse to receive \$150; third, \$50. Starters to be named to the Secretary Wednesday evening, at or before 8 o'clock p. m.

No. 19.—RUNNING.—CONSOLATION PURSE.—\$250 for beaten horses; on mile and repeat; entrance free; second horse to receive \$50.

SIXTH DAY—SATURDAY, SEPT. 16.

No. 20.—TROTTING.—2:19 class; purse, \$1,200.

No. 21.—TROTTING.—Purse, \$300; for double teams of 2:30 horses.

No. 22.—TROTTING.—OCCIDENT STAKE FOR 1882, closed in 1881 with twelve nominations.

No. 23.—SPECIAL TROT AGAINST TIME.—\$250 in plate will be awarded to any stallion that beats Santa Claus' time (2:17).

Entries for the following events for 1883-4 were ordered to be closed with the above races:

No. 1.—RUNNING.—CALIFORNIA DERBY STAKE, for foals of 1880, to be run at the State Fair of 1883. One and one-half miles dash; \$50 entrance, p. p.; \$300 added; second horse, \$100; third, \$50.

No. 2.—RUNNING.—FOALS OF 1881, to be run at State Fair of 1884. Same conditions.

No. 3.—RUNNING.—MATURITY STAKE.—Three-mile dash, for four-year-olds, in 1883; \$100 entrance; \$25 forfeit; \$500 added; second horse, \$150; third horse, \$100. To be run at the State Fair of 1883.

No. 4.—RUNNING.—CALIFORNIA ANNUAL STAKE.—For two-year-olds, foals of 1881. Dash of one mile; \$100 entrance; \$25 forfeit; \$250 added; second horse, \$100; third, \$50. To be run at the Fair of 1883.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two year old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.

Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous, by twelve o'clock m. This rule is obvious, and must be strictly adhered to.

No added money paid for a walk-over.

Horses entered in purses can only be drawn by consent of judges.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries to be made in writing, giving name, sex, color, and marks of horse; also, name and residence of owner. In running races, full colors to be worn by rider; and drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers. This is necessary to enable spectators to distinguish the horses in the race.

Entries to all the above races to close with the Secretary on Tuesday, August 1, 1882.

Write "Entries to Races" on outside of envelope.

EDWIN F. SMITH,

Secretary.

HUGH M. LARUE,

President.

SPEED PROGRAMME.

\$13,000 Gold Coin

The nominator not required to name his horse, but simply send his cash (\$150) with his own name, August 1, 1882. He has then earned the right to start any horse eligible that he may fully control, provided the horse he starts be named to the Secretary, September 1, 1882. Four moneys.

SATURDAY, SEPT. 23D.

No. 14.—PACIFIC COAST TROT—2:23 Class; purse \$1,000, and \$200 added if more than ten entries. Four moneys.

No. 15.—PACIFIC COAST PACING.—2:25 Class; purse \$100, and \$200 added if more than ten entries. Four moneys.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 3.

In all these Races (Pacific Coast Novelty Race excepted) four moneys, 50, 25, 15 and 10 per cent. of purse. Entrance fee, 10 per cent. of purse, and MUST accompany the nomination. District Races will close with the Secretary at 5 o'clock p. m. of July 15, 1882. Pacific Coast Races to close with the Secretary August 1, 1882.

When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.

Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.

All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above, otherwise, old weights to govern.

For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.

Horses entered in purses can only be drawn by consent of the Judges.

The Board reserves the right to change the day and hour of any race, if they deem it necessary.

Unless otherwise ordered by the Board, no horse shall be qualified to enter in any District Race that has not been owned in the District six (6) months prior to the day of the race; and any entry by any person of any horse so disqualified shall be held liable for the entrance fee so contracted without any right to compete, and the same shall be held liable to penalties prescribed by the Rules of the National Trotting Association and expulsion from this Association.

Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as especially provided.

In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.

In all the Coast Races noted above, SIX ENTRIES are required to fill, and three horses to start; but the Board RESERVE THE RIGHT TO CLOSE ANY RACE WITH A LESS NUMBER.

Races to commence each day at 1 o'clock p. m. sharp.

The track is first-class, having been improved. Stables, hay and straw free to competitors.

ENTRIES.

1st. Entries must be made in writing and dated.

2nd. State number of the race in which you wish to enter.

3rd. State color of horse, and marks if necessary.

4th. State whether the horse is a STALLION, MARE or GELDING.

5th. State NAME OF SIRE AND DAM if known; if unknown, state the fact.

6th. State NAME and P. O. ADDRESS of the owner of the horse entered.

7th. Sign with P. O. address of the party entering the horse.

8th. If the name has been changed, give former name.

9th. Repeat by telegraph.

Agricultural District No. 2, California, comprises the Counties of San Joaquin, Calaveras, Tuolumne, Stanislaus, Mariposa, Merced, Fresno, Tulare, and Kern.

L. U. SHIPPLE, President.

J. L. PHELPS, Secretary.

SECOND

ANNUAL EXHIBITION

OF THE

SAN MATEO AND SANTA
CLARA COUNTY

AGRICULTURAL ASSOCIATION

NO. 5,

TO BE HELD AT

SAN JOSE, CAL.,

.....FROM.....

Sept. 25th to 30th, '82, inclusive

SPEED PROGRAMME.

FIRST DAY—Monday, Sept. 25th, 1882.

No. 1. TROT—2:40 class. Purse, \$500.

No. 2. SAME DAY—TROT—2:25 class. Purse, \$750.

SECOND DAY—Tuesday, Sept. 26th.

No. 3. RUNNING.—For two year-olds; three-quarter mile dash; \$50 entrance; \$15 forfeit; \$150 added. Second horse to receive his entrance and one-third of added money.

No. 4. SAME DAY—RUNNING.—For all ages; mile dash; \$50 entrance; \$15 forfeit; \$125 added. Second horse to receive his entrance and one-third of added money.

No. 5. SAME DAY—RUNNING.—Selling Race.—Purse, \$200; mile and repeat. Second horse \$75. Entrance five per cent. to third horse. Horses entered to be sold for \$1,000 to carry entitled weight. Two pounds off for each \$100 under fixed valuation. Winner can be claimed by any one.

THIRD DAY—Wednesday, Sept. 27th.

No. 6. TROT—2:30 class. Purse, \$400.

No. 7. SAME DAY—BUGGY HORSE RACE.—For horses owned in the District to be driven by owner in buggy. Two mile heats. Purse to be hereafter offered.

SAME DAY—Ladies' Riding Tournament—Bicycle Race, etc.

FOURTH DAY—Thursday, Sept. 28th.

No. 8. RUNNING.—Three-year-olds, 1½ mile dash; \$50 entrance; \$15 forfeit; \$175 added. Second horse to receive his entrance and one-third of added money.

No. 9. SAME DAY PACING.—Free for all. Purse \$500.

No. 10. SAME DAY—TROT—For four-year-olds. Purse \$400.

FIFTH DAY—Friday, Sept. 29th.

No. 11. RUNNING—1½ mile dash. Free for all; \$50 entrance; \$15 forfeit; \$200 added. Second horse to receive his entrance and one-third of added money.

No. 12. SAME DAY—TROT—2:27 class. Purse \$400.

No. 13. SAME DAY—TROT—For two-year-olds. Purse \$400.

SIXTH DAY—Saturday, Sept. 30th.

No. 14. TROT—2:22 class. Purse \$750.

No. 15. SAME DAY—TROT—2:30 class. Two miles and repeat. Purse \$500.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year-old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.

Those who have nominations in stakes must name to the Secretary, in writing, the horse they will start on Tuesday, on the Monday previous; and on Thursday, the Tuesday previous; and on Friday, the Wednesday previous, by twelve o'clock m. This rule is obvious, and must be strictly adhered to.

No added money paid for a walk-over.

Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries to be made in writing, giving name, sex, color, and marks of horse; also, name and residence of owner. In running races full colors to be worn by rider; and drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers.

Entries to all the above races to close with the Secretary on Tuesday, August 1st, 1882.

Write "Entries to Races" on outside of envelope.

A. KING, President.

T. S. MONTGOMERY, Secretary.

BREEDER AND SPORTSMAN

VOL. 1—NO. 6
No. 508 MONTGOMERY STREET

SAN FRANCISCO, SATURDAY, AUGUST 5, 1882.

SUBSCRIPTION,
FIVE DOLLARS A YEAR.

NOTABLE HORSES OF CALIFORNIA.

ABBOTSFORD.

So far the illustrations of trotting horses have been confined to two families, Romero being a scion of the Simpson Blackbirds on the male side of the house, Belle Echo, Electioneer and Echo Hambletonians. The dam of Romero was of the Mambrino Chiefs following the sire; and this week we present a distinguished son of the same great clan. Though many years ago there were bitter controversies over the position which Mambrino Chief was entitled to fill in the trotting records, every man who is conversant with the subject, and not swayed by prejudice, must acknowledge the great merit of the descendants of this horse. The blood mixes kindly with others of the great families of trotters, and though we claim that every one of the trotting families are greatly benefited by a direct strain of thoroughbreds, few will question the advantage which has followed incorporating it with the Mambrinos. Thus the first which gave the highest celebrity was the great, truly great, mare Lady Thorn. Her dam was by Gano, a thoroughbred son of American

Eclipse, and her grandam by a son of Sir William, a thoroughbred horse by Sir Archy. Those who had the best knowledge of the capacity of Lady Thorn, men thoroughly posted in regard to the fast trotters of the past and present, rank her as being the peer of the best, and Dan Mace had the utmost confidence that the accident which disabled her was the sole reason she did not make a mark which would have been close to the best on record now. The Mambrino Chief stallions which have gained distinction have been from highly bred mares. The sire of Black Cloud, who made so capital a race at Chicago, is Ashland Chief, by Mambrino Chief, the dam of Ashland Chief being a mare by imported Yorkshire, and his grandam imported Flounce, by Mulatto. The sire of Abbotsford was Woodford Mambrino, by Mambrino Chief, and his dam Woodbine was by the thoroughbred horse Woodford. She was also the dam of Wedgewood—record 2:19; and this gives additional value to her offspring, showing that she had merit as the progenitress

of trotters in her own inheritance. Woodford Mambrino, though not trotted in public until he was fifteen years old, made a record of 2:21½; and his get make a fine showing in the calendar—Abbotsford 2:21½, Convoy 2:22½, Magenta 2:24½, etc.

Illustrations of the value of the Mambrino Chief blood could be multiplied until the space occupied would be far beyond the limit of these sketches. A few more will show the potency of it when coupled with many other strains: Croxie—record 2:19¼—was by a son of Mambrino, Clark Chief, and this horse was also the sire of Woodford Chief, 2:22¼; Blanch Armory 2:26; and several others in the 2:30 list. The dam of Proteine—2:18—was by Mambrino Chorister, a son of Mambrino Chief, and another son, Mambrino Patchen, has five, with records running from 2:23 to 2:30; and still has another son, Mambrino Pilot, a large number of fast ones to his credit, from Hannis, 2:17¼, and Mambrino Gift, 2:20, up. Santa Clans and Piedmont

have each two crosses of Mambrino Chief, so that the four stallions next to Smuggler, with records of 2:17½, 2:17¼, 2:17½, 2:17¼, are strongly imbued with the blood.

Mambrino Chief bears the same relationship to the thoroughbred Mambrino as Rysdyk's Hambletonian, both being grandsons, the sire of Mambrino Chief, Mambrino Paymaster, the dam of which was by imported Paymaster. Thus on the side of the sire, Abbotsford has many near kindred of the greatest distinction, and his dam Columbia, by Smith's Young Columbus, is also honored by a relationship to many of the celebrities of the tracks. Her sire also got Myron Perry, 2:24½, Sea Foam 2:24½, Commodore Vanderbilt 2:25, Harry Harley 2:25½, Phil Sheridan 2:26½, Ben Smith 2:27, Farmer Boy 2:28, Jim Ward 2:28½, and Fitzgerald 2:30. Columbia was also the dam of Dido, a very fast pacer and now in the Sunny Slope stud.

Abbotsford was foaled in 1872, bred by J. W. Knox, and sold by him to C. W. Smith of San Francisco, when five years old. His first race was trotted in Sacramento, August 14th, 1878, and we were very much amused at a conversation in which a Mr. — of San Jose, George Treat and William Hendrickson participated. It was during the journey to Sacramento, and the informer was anxious to impress them with the merit of a young brown horse which Mr. Knox was training. He was sure that he would win the race he was engaged in, but in response to the cross-questioning of Hendrickson he would not give any reasons for his belief, but at least fifty times between San Francisco and Sacramento he reiterated that the "brown colt would win sure." This was not satisfactory to Messrs. Treat and Hendrickson, and when they found that Harry was largely the favorite before the start, their investments went with those of the majority. The starters were Harry, Corisande, Tamarack, Granger, Lady Emmet and Abbotsford, and after Harry won the first heat in 2:29½, it was thought to be so great a certainty for him to win that in the pool sales he brought \$20 to \$5 on all the others. The second heat, however, turned the tables. Abbotsford trotted fast from the start, took the lead in a few strides, went to the half-mile in 1:12, and won the heat handily in 2:27. He won the other two with the greatest ease in 2:29, 2:29½. His next appearance was on the Oakland Trotting Park at the Fair of the Golden Gate Association, when he defeated Corisande (who won the third heat), Harry, Lady Emmet, Proctor and Goldfinder, the time 2:31¼, 2:29½, 2:27½, 2:27. This was on September 10th, 1878, and the next day he was called upon to try conclusions with Gibraltar, Echora, Alice, Barney, Bickford, Prophet, Hayward Chief and Harry, in the 2:31 class, and from the good showing he had made in his previous races he was the favorite in the betting, bringing more in the pools than all the others. He won the first heat in 2:25, but Gibraltar proved a far better horse than was anticipated, as he won the second, third and fourth, in 2:26, 2:27, 2:24½. In the last heat there was a grand struggle between Gibraltar and Abbotsford. One hundred yards from home Abbotsford led by a neck, "Old Gib," managing to get his nose to the score first.

At the State Fair, in the 2:40 class, it was held that Abbotsford "could not lose," and a compromise was effected whereby he got one-half of the purse, \$500, and left the other \$500 for the other entries to fight for.

His great race for this year was at San Jose, and a queer feature of it was the attempt of Mr. Knox to withdraw Abbotsford, claiming that he was lame. While it was evident that there was a trifle of "dodging" on one foot the judges did not consider it enough to interfere with his trotting, and the result proved that their estimate was correct. The other starters were Gibraltar and Monarch, Gibraltar the favorite in the betting, though quite a number gave Abbotsford strong support, and after the first heat, which Abbotsford won in 2:25½, the premiership was reversed and the odds changed to \$10, to \$8 in favor of Abbotsford. The second heat was a remarkably fine showing for so young a horse, especially in his first season on the track. The quarter-pole was reached in 35½ seconds, and the half-mile made in 1:10. There was a splendid race down the stretch, Gibraltar had drawn up when the straight work was entered, and all the way from the three-quarters to within one hundred yards of the score it was hard to say which had the best of it. Gibraltar broke at the critical time and Abbotsford won the heat in 2:21½. The third heat Abbotsford went to the half-mile in 1:10½, and had opened a gap of five lengths on Gibraltar, and it seemed as though the race was at an end; but on coming into the stretch something went wrong with him, as nearly we can remember a shoe or weight out of place, he broke, changed into a pace, broke again, Gibraltar winning in 2:27½. The fourth heat proved that there was something wrong in the third, as Abbotsford won in 2:24½. This race took place on October 2d, and on the 26th of the same month he won a \$2,000 match with Corisande, the mare getting the first heat in 2:26, Abbotsford the others in 2:30, 2:26½, 2:28. That this season's performances were a notable showing for a horse which was first put in training in April, few will deny. Owing to an injury which he received, 1879 and 1880 were almost blank years for him on the track. In 1880 we saw him trot a trial on the Oakland track in 2:20, and from the ease with which he made it the impression was general that two or three seconds could be subtracted whenever it was necessary. But the leg again was injured at Petaluma, and one race was all that he participated in. This was at Petaluma, on the

old half-mile track; he won the first heat in 2:27½, hurt himself in the second, which was won by Brigadier in 2:27½, and was then withdrawn. His first race in 1881 was at Santa Rosa, in a race won by Brigadier in 2:25, 2:25, 2:25½, Abbotsford and Bateman dividing the honors for second place. From what he had shown in his work both owner and trainer were disappointed, and the only explanation which seemed to cover the case was that the old injury still troubled him. There is no necessity for following him through the races which he participated in after the race at Santa Rosa. They gave rise to considerable feeling, and if anything more than a mere mention at all was made, it would involve questions which are now settled, and we hope satisfactorily. It is sufficient to say that he came within one quarter of a second of duplicating his fastest record, trotting at San Jose in 2:21½ in a second heat, after making the first in 2:22.

As to the form of Abbotsford the engraving is admitted to be one of the best likenesses ever published, and those who are intimately acquainted with his form pronounce it such. There may be a trifle of too much fineness given to the limbs from the knees and hocks down, as Abbotsford has more bone and greater width of leg than it is usual to see in a horse of his size. In size he is medium, and in color a rich, rosewood brown, and though it may be thought that the picture is an exaggeration as to the exuberance of mane and tail shown, it is exactly represented. He is a handsome, without being a "showy" horse, and those of his colts which we have seen are of very high form. Better than that, they show that they have inherited the fast-trotting step, and their owners are of the opinion that they will not be found wanting when the trial comes. Jasmine, by Abbotsford, her dam Sweetbriar, won the yearling Embryo last year, and as this is the first of his get which ever started, and we are under the impression that he has none which are older than two years, it is a good beginning. From his blood, his own performances, action, temper, etc., there is a strong guarantee that "notable" as he is, the future will show him still more worthy.

SOME OF THE ROADSTERS OF SACRAMENTO.

SACRAMENTO, August 2, 1882.

EDITOR BREEDER AND SPORTSMAN: I wish to devote a few lines of your space to a description of the beautiful Riverside drive of the Sacramentans, and of the fine gentlemen's roadsters which one can see almost daily there. There is probably no amusement that could be conceived of that is so conducive to health, that will so quickly and completely restore a man to his normal condition after the cares and perplexities of a hard day's work at the desk or behind the counter or in the shop, as a drive behind a fast trotter, especially if there are a number of good roadsters on the road all eager to have a brush. It braces a man up, sets his blood to circulating with fresh vigor, and removes the cares of business from his tired brain so effectually that it is impossible for it to return until the following day. There is probably not another drive in the country that is equal to the Riverside drive of Sacramento for this kind of amusement. Four miles out of road, made of as good material and kept in as perfect condition as any race-track in the world, gives them a chance which is unequalled for testing the speed and endurance of their nags. At the end of the road the genial Nick has ample facilities for refreshment of man and beast, and a game of shuffleboard. I would suggest the propriety of having other amusements—a bowling alley, for instance, and a croquet ground, so that the ladies could have a way of amusing themselves instead of sitting in the buggy while their escorts are having all the fun. Every night after business hours you may see them out here by the dozens, each one thinking he has the boss. This is hard to decide, as one gets the advantage one night and another the next, according to the condition of their horses or the position one gets in the crowd. But I will inform you of one fact: if any outsider comes here thinking he can get away with the laurels, he must bring something that can pull a buggy faster than a 2:40 gait.

I give a brief mention to some of the roadsters that are to be seen during the week in this beautiful drive: John T. Carey's matched pair of blacks, Forrest and Buck, half brothers, by St. Clair; W. R. S. Fay's matched pair, full brothers, by Challenge from a Morgan mare, and two single ones, Friday by Morgan, dam of Messenger blood, and Lady Grace by Signal, her dam Morgan; Dr. M. Gardner's roadster, bright bay, by Young Rattler, dam by Belmont; B. McCreery, of Sacramento Flouring Mills, large bay mare Madge, by Fred Low, from Fanny King by Rysdyk's Hambletonian, Jr.; C. H. Hubbard's matched pair of ponies, Lady and Buck, formerly owned by Mr. Tubbs of Oakland, can pull a phaeton in three minutes; Henry Gerber's bay mare Kitty, by Chieftain from a Kentucky Whip mare; Mr. Gilman, of the Red House, has the old and well known gray pacer Prince; Gus Hart, Attorney-General, fine bright bay roadster by Keokuk; Dr. N. A. Hughraa has a handsome pair of chestnut roadsters, Dick and Jo, Dick by Young David Hill, dam by Gold Dust, Jo by Young Kentucky Hunter; A. L. Frost, Internal Revenue Collector, black mare Fannie by Black Hawk; W. H. Govan's Danger, by Young Nelson, dam by St. Clair; C. H. Eldred, of the State House Hotel, pair of sorrel roadsters, both by Black Hawk, dam by Belmont; H. J. Kilgariff has a fine bay mare that but few of them can beat; E. L. Billing's Joker, by Black Ralph, from a St. Clair mare; S. H. Todhunter's brown mare, by Young Rattler out of Skaggs' mare, Lady Washington; Capt. J. D. Young's roadster, Colonel, by Bellfounder, dam by St. Clair; Ed. F. Taylor, of the U. S. Land Office, has a good one, a big gray; Mr. G. M. Locke, of the firm of Locke & Lavenson, bay mare Mollie, by Rattler, dam by Sir Harry; H. Wachhorst, jeweler, has a very fine speedy mare by Butterfield's St. Clair, dam by Geo. Moore; Samuel Jelly, jeweler, chestnut, Jim Nelson, by Old John Nelson; W. O'Brien's Splendor, gray mare, by Tecumseh, dam by Messenger Duroc, she and Wachhorst's mare are among the fastest on the road; Ed. R. Hamilton's bay gelding, Henry, by Mambrino Chief, from a thoroughbred mare; J. D. Smith has a fine roadster by Tecumseh; Wm. Beckman, of the People's Savings Bank, drives a good one, and Frank Mitchell, owner of the Golden Eagle carriages, gets out among the fast ones occasionally.

H. P. M.

TURF AND TRACK.

FIXED EVENTS.

Santa Cruz County Fair Association. First annual meeting at Santa Cruz, Aug. 15th, 16th, 17th and 18th.
Sonoma County Park Association, at Santa Rosa, Aug. 22d, 23d, 24th, 25th and 26th.
Sonoma and Marin Agricultural Societies. Annual Fair at Petaluma, Aug. 29th and four following days.
Golden Gate Fair, to be held at Oakland, from September 4th to the 9th inclusive.
Butte District Fair at Chico, from September 5th to September 8th, inclusive.
El Dorado District Fair at Placerville, from September 5th to September 8th, inclusive.
California State Fair. Annual meeting at Sacramento, from Monday, September 11th to the 16th inclusive.
The San Joaquin Valley Association Fair at Stockton, from September 10th to the 23d inclusive.
Oregon State Fair at Salem, from September 15th and during the week.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 25th to the 30th inclusive.
Humboldt and Mendocino District Fair at Rhonerville, September 19th to September 22d, inclusive.
Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th, inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th, inclusive.
Nevada State Fair, at Reno, from Monday, October 2d, to the 7th, inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.
Eastern Oregon Fine Stock Association at Union, from October 9th to the 14th inclusive.

FAIRS AT THE EAST.

Kentucky State Fair at Lexington, August 9th to September 2d inclusive.
Minnesota State Fair at Farmington, August 31st to September 8th inclusive.
Iowa State Fair at Fairfield, September 1st to the 8th inclusive.
Minnesota Agricultural Association, at Minneapolis, September 4th to the 9th inclusive.
Nebraska State Fair, at Omaha, September 11th until the 16th inclusive.
Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.
Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 18th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 18th to the 22d inclusive.
New Jersey State Fair, at Monroe, September 18th to the 23d inclusive.
West Virginia Central Fair, at Clarksburg, September 19th to the 21st inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

THE GREAT FOUR-YEAR-OLD TROT AT CHICAGO.

For this race six colts of the twelve nominations answered to the bell-call, and a remarkable lot they were—Jay Eye See, Adelaide, Waiting, Bronze, Jim Booman, and Ed. Geers. In the pools Bronze sold for \$50, Jay Eye See bringing \$45, Waiting \$42, and the field \$21.

First Heat.—On the fourth scoring an even send-off was effected, Waiting having the pole, Jim Booman second place, Adelaide third, Bronze fourth, Jay Eye See fifth, and Ed. Geers the outside. Waiting evidently had the speed of the party, as he shot to the front as soon as the word was given, going around the first turn a length in advance of Bronze, who led Jay Eye See a like distance. Before the quarter-pole was reached, however, the Racine colt had passed Bronze, Waiting constantly going away from the others. Down the backstretch the entire lot was well strung out, but at the half-mile pole, in 1:14, Adelaide had trotted into third place, and was rapidly overhauling Jay Eye See, Waiting being now ten lengths ahead of the black colt. Adelaide made a break soon after entering the homestretch, which enabled Jay Eye See to retain second place easily. Waiting was pulled to a jog at the distance-stand: and walked under the wire a length ahead of Jay Eye See, Adelaide a poor third, and the others as per summary.

Second Heat.—In spite of Waiting's easy victory, the pool-selling after the heat was livelier. Jay Eye See soon became prominent in the pools, and so rapidly did he advance that before the start for the second heat he was selling even against the field. The start was a good one, but before the turn was reached Jay Eye See broke and fell back to fourth place, Waiting leading Bronze a length to the quarter-pole, in 39 seconds. He maintained his advantage down the backstretch, Adelaide trotting into third place, with Jay Eye See a poor fourth, and the rest strung out. The Racine colt made another break near the half-mile pole, and a third at the lower turn, Waiting and Bronze being still in the lead. Waiting seemed to have the heat won at the distance stand, but from this point to the wire Bronze came very fast, being beaten a head only, in 2:25½, Jim Booman third, Jay Eye See fourth, Ed. Geers fifth, and Adelaide last.

At the conclusion of the second heat the crowd had become deeply interested in the race, and Bronze finishing so easily rather demoralized the pool-buyers, who, having received the "correct tip," had played their money freely on Jay Eye See. The Michigan delegation shifted the cut and backed Bronze heavily.

Third Heat.—Hickok was selected as their best man to pilot Bronze safely into port. The driver was removed from behind Bronze and Orrin took his place. In the meantime, Budd had been secured to drive Jay Eye See. As Jay Eye See had acted unsteady in the previous heat Budd, at the risk of losing the heat and race to Waiting, determined to go an easy heat and feel of his colt, the race being considered virtually lost to him, but "desperate case, desperate remedies." Bronze took the lead when the word was given, and was never headed, although Waiting got within a length of her in the homestretch. The filly won in 2:25½, Jay Eye See a good third, the others as per summary.

Fourth Heat.—The betting now ruled: Bronze, \$100; field, \$60. The scoring showed evidently that Budd now meant business, as he brought his horse up at every score. The word was given on the fifth score, when Bronze, lapped by Waiting, showed at the turn, Budd trailing Bronze closely. Midway of the turn Waiting made one of his grapevine breaks, ran in, and crowded Budd back. Then Budd tried to go around him on the outside, and the grapevine twist was still at it. Rounding into the backstretch Budd succeeded in getting by, after the sitting down process had caused him to lose ten open lengths. Bronze passed the quarter-pole in 37 seconds. Down the back side she was sent for blood, but the grand shout from the grand stand evidenced the fact that the Doble's black beauty was gradually closing on Orrin, who passed the half going smooth as a bird, 1:15½. Rounding the turn nearer and nearer drew the black phantom, rounding into the straight, every motion, every effort of man and horse was watched. Nearer they come; the crowd are silent. Will he catch her? Will he stand the pinching at the finish without breaking? If so, Budd has her beaten surely. At the distance-stand they are on even terms, and

both driver and horse strain every nerve; a rousing shout and yell. Budd has won! but in a flash, and the long cheer is hushed, and "Oh! Isn't that too bad," with the deep-sighing crowd. It was not only too bad, but painful—particularly to a fellow that had his money that way, you know—the rousing welcome to victory had frightened the little black beauty, and he bounded into the air like a frightened deer. The grand bay mare beats him for the heat in 2:26½, trotting home in 1:11, and Jay Eye See in 1:09; but for the enthusiasm of the crowd he would have won this heat sure, despite the unfair work of Waiting's driver. Bronze won, but the terrific finish is beginning to tell.

At the conclusion of this heat there was more dismay among pooling speculators, the manner in which Budd was bringing this colt nearer to the front each heat, and the colt showing no distress, made the Bronze party shaky; still they stuck to Bronze as favorite at long odds before the horses were rung up.

Fifth Heat.—Mr. Dow, the Judge, requested the crowd to please refrain from shouting at the finish, as it frightened the colts. When the word was given on the fourth scoring, the start was a good one to all. Hickok went away fast, but this time Budd lay up painfully close to him. Bronze led by a length at quarter-pole in 38 seconds, and position about same at half-mile. Rounding the turn Budd began to close on the mare, and as they shot past the three-quarter-pole at a 2:19 gait, a long, frenzied shout went up from the crowd, with wild exclamations, "Budd has him!" But Budd hasn't got him yet. At a terrific pace they come thundering up the stretch, nearer, closer. Budd is on even terms at the distance. A suppressed murmur, "Don't shout," passes along the line; all are silent; they are within ten yards of the wire; Budd is leading nearly a neck, and as the crowd witness the artistic manipulations of these two great horsemen, in this desperate struggle for the finish, they will control themselves no longer, and the old Goldsmith Maid-Smuggler shout goes rolling out from the thousands of throats as Budd fairly rolled, as well as lifted the grandest four-year-old in the world under the wire in the unprecedented time, for the fifth heat, of 2:22½, the wonderful mare beaten but a neck, the last half of this fifth mile, by two four-year-old colts in 1:09½. As Budd returns to weigh a rousing welcome is given him, and his friends rush around him to congratulate him as in the pleasant days of memory when Dexter, the uncle of this black colt, was king of the turf, as we may yet see this worthy representative of the family a ruler again.

Sixth Heat.—Pools were selling Jay Eye See even against the field, and many of the timid "boys," "shifted the cut" once more; but the friends of Jay Eye See stuck to him to the last, as Budd assured them he could not lose. Orrin, who had heretofore considered the race sure to him and his friends, began to look a little shaky. The word was given on the fourth, with Jay Eye See, who now had the pole and should have been protected, fully a length behind. Orrin was quick to take advantage of the favor, and rushed his mare at once to the pole, and, going on with a great burst of speed for a four-year-old in the sixth heat, he showed at the quarter in 36s., leading Budd not more than a length. The positions were maintained to the half-mile in 1:10½, the back quarter in 34½s., a 2:17 gait (if this would not stop a four-year-old in the sixth heat, every one of which had been a horse race, nothing but a club would). Rounding the turn the terrific pace began to tell on the mare, and perpetual motion—Jay Eye See—keeping up the clip, soon placed himself on even terms with Orrin, who, seeing that he was beaten, carried Doble so far out that it looked as though he headed for the gate out of the park. This proved a delusion, as they were soon discovered making for the home plate at a killing pace. Midway of the stretch, when Budd had the mare beaten, his horse left his feet, and a prolonged "Oh!" and "He's beaten" by the crowd. Budd in his skillful manner pulls him together, but finds himself ten lengths behind, and everybody concedes the race to Bronze. A less stont-hearted and inexperienced driver would have fainted right there; but not Budd. Gathering the little fellow well together he came with a wet sail, and right here gave the assembly one of the finest exhibitions of driving ever witnessed on a racetrack. The wonderful little gamecock, responding to his demands, came with a marvelous burst of speed, and, in spite of Orrin's best efforts, amid the rousing cheers of the crowd, won the heat by a neck in the wonderful time of 2:23½, for a sixth heat by two baby trotters, Waiting barely saving his distance, many claiming him shut out. At the conclusion of this heat the backers of Bronze were paralyzed, for the mare was quite tired, and, strangely enough, Jay Eye See as fresh as a daisy.

Seventh Heat.—Jay Eye See was a great favorite, and the race was all over but the announcement, but right here came the boulder that crushed the Jay Eye See party, showing once more the mutability of human affairs and the many contingencies arising to make racing quite "unsartin." The word was given, with Doble more than a length behind and tumbling all to pieces in a break. This caused many a face wreathed in smiles to change to a sort of funeral expression, and at least a hundred good fellows came near falling down dead. The horse was so tangled up before recovering that he was out of the race, and Bronze apparently the winner, as he went along at a merry clip, Waiting making his usual running break around the turn. When he did recover he trotted fast, but he was unsettled in his gait, hadn't got "his right foot forward," which in his case is literally true. Bronze continued her lead of several lengths from Waiting down the stretch, and passed the half-mile pole in 1:14½. Budd, in the meantime, had come so fast into the backstretch that he would have overhauled the mare before reaching the three-quarter pole, but he made a break midway of the stretch, and another at the head of the homestretch. When he struck his trot at the head of the stretch he was for the first time square and level, and came home with a handsome finish, in time to finish well up. Waiting finding a very tired mare, beat her out in 2:30, and the race went to a good horse, but he got in and won his race by "crawling under the canvas." Previous to the heat I understand he was begging the others not to distance him, as he would lose his third money. The start caused much unfavorable comment. It was certainly most unfortunate, beating a colt that had made the most gallant fight to win ever witnessed on a race-track; and then it burnt up the money of the grooms and their friends, who had so long concealed the possibilities of the handsome pet, that they might win a few dollars at Chicago.

This ended the best colt race ever witnessed, owing principally to the two great drivers having backed each his own horse to win, and, funny enough, both were drowned by a horse not considered in the race at all, but a great gelding

nevertheless. Before starting for the deciding heat a ticket on Waiting calling for \$178 was offered for \$2.

It must be remembered that the track to-day was by no means at its best. The three-year-olds were unable to beat 2:30, and Little Brown Jug, in the three trials, could pace no faster than 2:15. Had the track been velvet there would have been a pretty fast colt record to record. Jay Eye See finished the seventh heat showing no evidence of tiring. This was really wonderful, for it was the first time his head was ever turned to face a starting judge.

SAME DAY.—Stakes for four-year-olds and under, \$100 entrance, \$25 forfeit, with \$1,000 added, with \$500 additional to the winner of the fastest heat, if trotted better than 2:19½.

Barry & Fox's b. g. Waiting, by Lexington Chief, Jr.	1	2	6	3	3	1
J. N. Dickerson's b. f. Bronze, by Morgan Messenger	4	2	1	2	2	2
E. Bither's blk. g. Jay Eye See, by Dictator	2	4	3	2	1	3
Simons & Maxwell's b. g. Jim Bowman	6	3	4	4	4	r. o.
V. L. Shuler's b. f. Adelaide	3	6	5	3	5	r. o.
E. Geers' b. c. Ed. Geers	5	5	6	6	6	r. o.

Time—2:23½, 2:25½, 2:25½, 2:26½, 2:22¾, 2:23¾, 2:30.

The breeding and development of these colts presents many features of interest to the student of the great problem of breeding the American trotter. Space only forbids my writing fully upon this interesting topic. I will first introduce Jay Eye See, as all things considered, I believe him the grandest four-year-old on earth, and when at the finish of the sixth heat, I asked a prominent horseman, "What do you think of the black colt now?" he replied, "He can beat Phil Thompson for my money any race horse trot." This was placing possibly a too high estimate upon the colt. In judging of the wonderful qualities of this colt, one must follow him throughout all his heats and quarters, from the start to his wonderful finishes up the homestretch.

Jay Eye See was purchased in Kentucky, in April, 1880, from Col. Richard West, at Edge Hill Farm, where he was bred by Mr. J. I. Case, of Racine, along with five other two-year-olds, all sired by Dictator, the full brother of the mighty Dexter. He was the last colt selected, as he was considered rather small. Your special commissioner accompanied Mr. Case, and rather urged his purchase, as I think, without any exception, he was the fastest colt at the trot I ever saw in a paddock or small field. I had also seen his full sister, Noon-tide, in races, and this, with his natural action, gave me assurance of the coming trotter, and he was placed among the purchases. As before remarked, his sire was Dictator, dam by Pilot Jr. (Old Midnight), out of Twilight, by Lexington, out of Daylight, by Glencoe, out of a mare by Wagner, etc. Well, the thoroughbred lines come pretty direct here, certain. In Dictator we find the Hambletonian blood and the thorough blood of American Star. To say the least, all the blood lines indicate speed. He is now 15½ hands, black, and (what a pity) gelded. In his conformation he is level and even, about the same height forward as behind. He has a clean-cut, intelligent head, full eye, neatly-pointed ear, neck of fine proportions, a little longer than the average Hambletonian; his back straight, and smoothly coupled; a well-rounded barrel, slightly sloping rump; his quarters, stifles, and gaskins, remarkably developed, give him a blocky appearance; in fact, when in road form, he is in the form of the handsome Ethan Allen Morgan-Black Hawk. While he has powerful propelling powers, his almost brother in blood, Code, who is a much faster colt than he has shown, is rather of a light hamed horse.

Jay Eye See, in his jogs, has the nod of Maud S., Darby, Mazo-Maie, and many other celebrities, but he is as sound as a dollar, with the best of legs and feet, his tendons and muscles are cat-gut and case-hardened steel; in his disposition he is docile and tractable, and has always been a pet with Mr. Case and his family, as well as with his careful and painstaking driver, Mr. Bither. He wears no toe-weights, simply an eleven-ounce shoe forward and five-ounce behind, and has full free knee action. Code differing here again as he carries a six-ounce toe-weight. Mr. Wallace may become interested in Jay Eye See, as he will here find a double cross to the pacing Pilots, a cross to the pacing Hambletonians. "Explain?" I will sometime; and he must admit a strong infusion of the thoroughbred, and yet no toe-weights to make him trot, no toe-weights to make him overcome the lack of knee action, so claimed for the thoroughbred.

Jay Eye See was taken to Wisconsin after his purchase, was hardly broken in the fall, being a two-year-old, and run out until April, 1881; his breaking was then completed, and inside of six weeks he trotted a half mile in 1:18. Mr. Case, who has watched the development of this colt carefully, ordered him turned out to grass at once. "I am afraid you will hurt him," he would often remark to Mr. Bither. He was taken up Oct. 1; in the last of the month trotted a half mile in 1:14½, when Mr. Case requested "Ed." to stop his fast work and prepare him for his winter's jogging. He was jogged to the pole all winter beside Edwin B., went to the track May 23, and the first week in July trotted Mr. Case's half-mile track in 2:23, the last half in 1:06. No horse ever owned by Mr. Case, Gov. Sprague not excepted, had been able to equal this performance. We next find him here, and selling in pools: Bronze, \$50; Waiting, \$18; Jay Eye See, \$15; field, \$15. Of course those that knew did, and why not! And they would but for the judges' stand. So you see they did not, and I know how it is myself. Jay Eye See has been developed, and made a trotter by the careful watching and handling of Edward Bither, who has had excellent success in developing the colts of Mr. Case. "Ed." says, when he shows up Phallas, the five-year-old son of Dictator, and Betsy Trotwood, the people will begin to think that the Dictators are quite a trotting family. Phallas can beat 2:30 by several seconds at any time—has, in fact, recently. His favorites, however, are two colts by Gov. Sprague, that are "doing splendidly."

Well, I had better not enthuse over Bronze, for she is now the property of your commissioner. For her I paid \$7,500, and I think in a race with the crack four-year-olds of the country she would sell "even up." In the fifth heat, trotted in 2:22½, she was beaten a neck only. She is a beautiful bronze bay, 15½ hands high, very blood-like, and exquisitely formed. She is a Goldsmith Maid in type, only a size larger, and a little higher on the withers, giving a handsome finish. She went into this race sadly out of form, having lost a very easy race for her a week ago. Her gait is not high and showy, but she glides along with a well-measured pace, in a rapid, stealing manner that gets the best of a watch, instead of like too many high-actioned laboring horses that go much slower than the watch. She has magnificent legs and feet, not a puff nor a pimple, and is of the improving sort. She wears a 12-oz shoe forward, and 6-oz. behind. This will seem very remarkable when I state all I know of her breeding. She was bred at the cross-roads town of Pleasant Valley, Switzerland Co., Ind., near the Ohio River, by a Mr. Hart, in August, 1881. When three she was ridden into North Vernon, and paced a half

mile to saddle in 1:17. Buck Dickerson then purchased her for \$175. Shortly after she paced in a race in 2:37, and George N. Dickerson purchased her from his brother. In the Fall she seemed inclined to trot, and he trotted her to a road wagon at the fair in 2:47. She ran out all last Winter, and in February was placed in the hands of Thomas Dickerson, another brother, to be handled. She took at once kindly to trotting, and in May, at Maysville, Ky., could have won her race, and, if necessary, trotted in 2:23; she did show in the race in 2:27. From there she can be followed through her campaign to Chicago. She has not only been carefully trained by Thomas, but another brother, Scott, has acted as groom.

Her breeding? Well, she was by Morrison's Morgan Messenger, Jr., he by Curtis' Morgan Messenger, he by Green Mountain Morgan. Her dam will in time be fully traced, as well as the blood lines of sires. Her sire, now dead, was a fast pacer—record 2:27—and has left a speedy progeny behind him. Now we find here a mare by a pacing horse, her dam a trotting mare, a natural pacer for three years, changing her gait without any of the appliances now used—toc-weights, etc. In form she knocks all the anatomical structure theories into a "cooked hat," for she is as clean cut and handsomely turned as any model race or trotting horse. She will be heard from hereafter.

Waiting is a large-growthy gelding, considerably over 16 hands, and a trotter of merit, but greatly outclassed yesterday, although a winner by a most unfortunate scratch—fortunate to him, however. He will very likely improve in his speed, and may develop into a phenomenal horse, for his lines of breeding just suit me, having double lines to that royal blood for staying up the trotter, Lexington Chief, Jr., being by Fisk's Lexington Chief, he by Kentucky Clay, and Lexington Chief, Jr.'s dam by Fisk's Mambrino Chief; and the dam of Waiting was by the same horse. Waiting inherits the size, and plain but powerful frame, of the Mambrino Chief family. His driver handled him well for the interest of his owner, but the manner in which he "sat down" on Doble, rounding the turn in the fourth heat, was distressingly unpleasant to your commissioner, who saw these little irregularities with "jaundiced eyes."—N. Y. Spirit of the Times.

THE PORTLAND RACES.

The second annual meeting of the Northwestern District Association was brought to a close on Saturday, July 22d, and although the card was quite attractive, the attendance at the City View Park was not as large as might have been expected, especially when it is mentioned that every business house in Portland was closed to celebrate the day. It has been claimed by the local press that there was a lack of skill shown in the arrangement of the programme, inasmuch as on the opening day the card was not attractive enough to draw visitors from the country who would have stayed throughout the week, and also that the best people in Portland do not give the sport that patronage it so well merits. It is to be hoped that the financial result will show an increase on the receipts of the previous year, and that at the next meeting there will be greater care shown in getting up the programme, while the interest of the best society in Portland will be enlisted to aid the efforts of the Association.

There were three races on the card, the first being a purse of \$800, free for all, in which Dexter was the favorite at \$40 against \$35 for Milton Medium, and \$6 for Dirigo. The race was hotly contested by the two favorites, but Milton Medium was in the best form and won in three straight heats.

City View Park, Portland, July 22, 1882. First race—Trotting. Purse of \$800, free for all. Mile heats, three in five.

H. Smiley's b. h. Milton Medium	1	1	1
Jos. Mizner's b. h. Dexter	2	2	2
P. McMann's b. g. Dirigo	dist.		

Time—2:29½, 2:26¾, 2:25½.

The winner is a bay stallion, by Happy Medium, his dam by Hackett's Mambrino. He was brought to this coast and was trained for some time in Oakland, when it is said that in a private trial he made a mile in 2:26. He did not show in public in 1880, and last July, at the same meeting, Dexter won a purse, Milton Medium taking the first heat in 2:31½ and Dexter the remaining three, his time in the second heat being 2:30. It is evident that with these two fine horses Oregon will in the future have some staying and speedy stock.

The second race, a dash of three-quarters of a mile, between Jim Renwick and Premium, that was a fair race for half a mile, when the old man relinquished the contest.

Second race—Running race for purse of \$—, three-quarters of a mile.

Ab. Stenlar's ch. g. Jim Renwick, by Hooker, dam Big Gun	1
Cy. Munkey's ch. m. Premium, by Castor, from Flying Cloud	2

Time—1:16½.

The last race was a mile and repeat, in which Howell and Fred Collier met again, with Caddie R. as the third contestant. In consequence of Collier's victory on the previous Thursday he was made an immense favorite at \$50 against \$10, and \$8 for Howell and Caddie R. combined; but this was a very disagreeable wind up to the meeting for those who pinned their faith on the favorite, as after a finish in both instances of a fierce and punishing character, Joe Howell won the race in the best time ever made in Oregon with the usual weights for age.

Third race—Purse \$450, mile heats:

Cy. Mulkey's b. g. Joe Howell, by Bonnie Scotland, aged	1
Wm. Ayers' ch. g. Fred Collier, by Joe Hooker, 4 years	2
Jerome Porter's br. m. Caddie R., by Bayswater, aged	3

Time—1:46½, 1:45½.

THE SARATOGA RACES.

The intermittent season has continued to fair sport, but the attendance and the number of entries show a great falling off as compared with the previous seasons.

On Thursday, July 27th, the first race, three-quarters of a mile, was won by Bonnie Lizzie, Saunders second, Martinique third; time, 1:15. In the second race, one and three-quarter miles, Boatman won, Frankie B. second; time, 3:05½. The third race was a walk-over for Thora. In the fourth race, one mile, Blenheim won, Mattie Rapture second; time, 1:41½. In the fifth race, one mile and a half, Glidelia won, Monogram second, Tom Plunkett third; time, 2:36½.

On the 28th, in the first race, one mile, Springfield won, Patti second; time, 1:42½. In the second race, one mile and 500 yards, Spark won, Square Dance second; time, 2:14½. In the third race, three-quarter mile, Referee won, Lytton second; time, 1:17. In the fourth race, three-quarter mile, Little Phil won, Iola second; time, 1:15½.

On the 29th, in the first race, three-quarters of a mile, Teresin won, Ascender second; time, 1:15½. In the second

race, a mile and a half, Bend Or won, Theora second; time, 2:35. In the third race, one mile, Checkmate won, Tom Plunkett second; time, 1:43. In the fourth race, steeple chase, two and three-quarter miles, Post Guard won, Trouble second; time, 5:23.

On the 31st, in the first race, one mile, Buccaneer won, Lutestrating second; time, 1:42½. In the second race, one and one-quarter miles, Compensation won, Warfield second; time, 2:08½. Third race, three-quarter mile, Saunterer won, Bonnie Lizzie second, Little Phil third; time, 1:15. Fourth race, one and one-eighth miles, Jeunie V. won, Blenheim second; time, 1:36½.

On the 1st of August the first race, five furlongs, was a dead heat between Empress and Barbarian, the Farantella filly next; time, 1:04. The second race, one and a half miles, was won by Glidelia, General Monro second; time, 2:35½. In the third race, one mile, Bootjack won, Tom Plunkett second; time, 1:42½. In the fourth race, steeple-chase, two and three-quarter miles, Rose won, Echo second; time, 6:02.

On August 2d, in the first race, one mile, Morgan Spy was first, Elector second, Francisca third; time, 1:44½. In the second race, one mile and 500 yards, Warfield was first, Long Taw second; time, 2:12½. In the third race, five-eighths of a mile, Fairview won, Referee second; time, 1:02½. In the fourth race, three-quarters of a mile, Blenheim won, Little Phil second; time, 1:15½.

THE MONMOUTH PARK RACES.

The usual meetings on the Wednesday and Saturday were continued at Long Branch, and the racing on the 29th July was as follows: In the first race, one mile, Yorkshire won, Corsair second; time, 1:44. In the second race, three-quarters of a mile, Queen won, Marc Antony second, Foxglove third; time, 1:18½. In the third race, one mile, Wyoming won, Macbeth second, Freegold third; time, 1:45½. In the fourth race, one and one-eighth miles, Giroda won, Duplex second, Ella third; time, 1:59½. In the fifth race, one and five-eighths miles, Priam won, Faircourt second, Mary Anderson third; time, 2:58. In the sixth race, a mile and half a furlong, gentlemen riders, Sir Hugh won, Duke of Kent second, Late Fogle third; time, 1:55. In the steeple-chase, full course, Bonham won, Felix second, Bertha fell at the water jump; time, 1:52.

The California horses have not upheld their home reputation, which may be ascribed to the change of climate, but possibly also to the fact that they have to compete with a better class of horses than is to be found on this coast. Both Grismer and Lucky B. have run in their engagements, but have failed to get even a position. The first was the Red Bank Stakes in which Mr. Lorillard's pair were great favorites, the chances of Lucky being held at twenty to one. The California colt ran well for half a mile, but here the pace was too severe and the Lorillard pair achieved a handy victory.

Monmouth Park.—The Red Bank Stakes, a sweepstakes, for two-year-olds, of \$50 each for starters, with \$1,500 added, of which \$500 to second; a winner of a stake of the value of \$1,000 to carry 5 lbs.; twice, 7 lbs.; three, 12 lbs. extra; maidens allowed 7 lbs.; entrance, \$15 (the only liability), to go to the race fund; 60 nominations; value to winner, \$1,200; three-quarters of a mile.

P. Lorillard's imp. b. c. Pizarro, by Adventurer—Milliner, by Ratanaplan, 115 lbs. (including 5 lbs. penalty)..... (Feakes) 1
P. Lorillard's b. f. Inconstant, by Glenlyon—Lizzie Berry, 100 lbs. (including 5 lbs. penalty)..... (W. Donohue) 2
D. D. Withers' ch. c. Renegade, by King Ernest—Revolt, 103 lbs. (including 5 lbs. penalty)..... (J. Sparling) 3
G. L. Lorillard's ch. f. Gift, by Glenlyon—Hilda, 100 lbs. (Ural) 0
E. J. Baldwin's b. c. Lucky B., by Rutherford—Maggie Emerson, 115 lbs. (including 5 lbs. penalty)..... (Holloway) 0
Time—1:10½.

The race in which Grismer appeared was the Seabright Stakes, in which P. Lorillard's couple were again the favorites, and Grismer's chance was thought very lightly of in the betting.

Monmouth Park.—The Seabright Stakes, a sweepstakes, for two-year-olds, of \$50 each for starters, with \$1,500 added, of which \$500 to second; a winner of a stake of \$1,000 (handicaps and selling races excepted) to carry 3 lbs.; twice, 5 lbs.; three, 7 lbs. extra; those not having won more than \$500 when carrying weight for age or more allowed 3 lbs.; maidens allowed 7 lbs.; entrance, \$15 (the only liability), to go to the race fund; 60 nominations; value to winner, \$1,500; three-quarters of a mile.

P. Lorillard's b. f. Parthenia, by Alarm—Maiden, by Lexington, 110 lbs. (including 5 lbs. penalty)..... (Feakes) 1
P. Lorillard's b. f. Inconstant, by Glenlyon—Lizzie Berry, 100 lbs. (including 5 lbs. penalty)..... (Onley) 2
J. E. Cook's b. c. Le Petit Duc, by The Ill-Used—Countess, 103 lbs. (including 5 lbs. penalty)..... (Barbee) 3

The following ran unplaced: Renegade, Maid of Athol, Touch-me-not, Heel-and-Toe, Fau Fan colt, Bella Fairfield and Grismer, who was not persevered in as he was probably out of condition, and he came in last.

There was great interest shown in the mile and a furlong purse that was run on July 26th, in which that veteran racer Parole suffered one of his few defeats. He was the favorite at \$100 against \$30 for Jack of Hearts, and \$15 for the field. It was a fine contest between the two named horses, but the extra weight told on Parole, and although Clara D. made a fine finish, she could not reach Jack of Hearts, who won by a length.

Purse \$500, for three-year-olds and upwards; entrance, 5 per cent. of the purse (\$25 each), to the second; winning penalties and maidens allowed; the winner of the first race on the fourth day (P. Lorillard's Parole) to carry 7 lbs. more than he then carried; 4 entries; mile and a furlong.
Appleby & Johnson's b. c. Jack of Hearts, 4, by Ill-Used, dam Nellie James, 103 lbs. (including 5 lbs. penalty)..... (Evans) 1
E. J. Baldwin's b. m. Clara D., aged, by Glenelg, dam The Nun, 100 lbs. (including 5 lbs. penalty)..... (Carter) 2
P. Lorillard's br. g. Parole, aged, by Leamington, dam Maiden, 114 lbs. (including 5 lbs. penalty)..... (Feakes) 3
J. R. Graham's ch. g. Haledon, 5, by King Lear, dam Redowa, 102 lbs. (including 5 lbs. penalty)..... (Farley) 0
Time—1:56½.

It is probable that the stable will return at once so that those who are in condition may take part in the Fall races on this coast.

BUFFALO RACES.—On the 2d August Overman won the 2:24 class, Abe Downing second, St. Cloud third, Rolla fourth; time, 2:20½, 2:20½, 2:23½, 2:24½. The 2:25 class race Limber Jack won, Joe Bowers second, Fuller third, Warrior fourth; time, 2:18½, 2:19½, 2:21, 2:20½. The race free for all pacers, two heats, Gem won the first in 2:19, and Buffalo Girl the second in 2:27.

THE CLEVELAND RACES.

Continuing from the previous issue, we find that the third day of the Cleveland Club races was conspicuous by a large attendance, fair weather and fast track. The free-for-all pace purse, \$1,500, which was unfinished on the 26th, was first on the card, and following is a summary: Lucy first, Mattie Hunter second, Bay Billy third, Gem fourth, R. O. Ben Hamilton, Buffalo Girl, Sorrel Dan all ruled out for not winning one heat in five. Soto Lucy was awarded the first and fourth moneys. After the race, in order to close an estate, the winner was sold to O. A. Hickok for

\$6,000; time, 2:18½, 2:17, 2:20½, 2:18, 2:17, 2:19½, 2:22, 2:33. The trotting purse, \$1,500, Adele Gould, the favorite, won in three straight heats, without being pushed. Summary—Adele Gould first, Harwood second, Waverly third, Nett's Medium fourth, Tom B. fifth; Time, 2:23, 2:21½, 2:26. In the 2:26 trot for a purse of \$1,500, Aldine was the favorite against the field. Summary: Aldine first, King William second, Mamie third, Joe Bulker fourth, Philis fifth, and H. M. Strong sixth; time, 2:20½, 2:20½, 2:19½ and 2:21.

The 28th was the last day of the races. The weather was pleasant, and there were a fine track and a very large attendance. The principal interest was centered in a special race, which for two heats was a remarkably stubborn contest between Clingstone and Edwin Thorn, those two horses being lapped from wire to wire, creating intense excitement. The exertion was too much for Thorn, and Clingstone won the deciding heat with the greatest ease, jogging the last half mile. The average time of the twenty-eight heats trotted at this meeting was a fraction over 2:21½. The average of the eleven pacing heats was less than 2:19. In the 2:20 trot, for a purse of \$2,000, Rosa Wilkes was favorite, and won in straight heats with ease, J. P. Morris second, Fannie Witherspoon third, Wm. H. fourth, Early Rose fifth; time, 2:18½, 2:18½, 2:18½. By the breaking of one line in the last heat, Calmar steered against the inside fence and jumped over, throwing out but not seriously injuring his driver, Caton. In the special named race for a purse of \$3,000, Clingstone sold in the pools \$100 to \$30 for the field. Clingstone won, Edwin Thorn second, J. B. Thomas third. So-so was distanced on the second heat; time, 2:14, 2:16½, 2:23½. Time of the first heat by quarters—First, 34 seconds; half-mile, 1:05; three-quarters, 1:40½. Second heat—First quarter, 32½ seconds; half-mile, 1:05; three-quarters, 1:40½. In the three-minute trot Wilson, the favorite, three to one against the field, won handily in straight heats, Howard Jay second, Golden Rule third, Secret fourth; time, 2:23½, 2:25½, 2:25.

THE BOSTON RACES.

At Mystic Park, on July 25th, two trots were decided, it being the first day of the July meeting. The track was in excellent condition, but the attendance light. The first race was for 2:50 horses, and was won by Zella in three straight heats, with Belle Mahone second, Red Bird third and Edwin fourth; time, 2:33½, 2:33½, 2:33½. Two others started. The second race, for 2:26 horses, took five heats to decide. Camors won the first and third, and Gipsy the other three heats and the race; time, 2:25½, 2:24½, 2:25½, 2:25½, 2:25½. Five started.

On the 26th the meeting was continued with excellent weather and good attendance. The first trot of the day was for 2:32 horses, and was decided in five heats. Ilka won the first and third heats and Dick Dample the second, fourth and fifth; time, 2:32½, 2:34, 2:33½, 2:31½, and 2:33. Achilles was third and Bay Lambert fourth. The second race was for gentlemen's road-horses to road-wagons, and was won by Alsie P. Ned Jackman was second and Jessie third, while Lady Hawes and Jim B. were drawn in the third heat; time, 2:43½, 2:39½, 2:41½.

CANADIAN NOTES.

Toronto, July 24, 1882.

EDITOR BREEDER AND SPORTSMAN: As things among horse-men here are very quiet just at present, I will content myself this week with giving you an outline of some anticipated good sport to come off over our justly celebrated "Woodbine Park Race Course," under the management of a newly-formed club entitled "Toronto Trotting Association," on August 14th and 15th, on which dates it is proposed to give two races each day for 3-minute and 2:26 classes; purses \$750 for each event on first day, and 2:37 and free-for-all stakes on second day, with \$250 added for 2:17 or better.

From the well-known good standing and integrity of the gentlemen composing the Committee of Management, our people are looking forward with every confidence in expecting a thoroughly enjoyable meeting, full particulars of which I shall forward in due course.

CANADIAN HORSES FOR SARATOGA.

W. E. Owens, the well-known Canadian trainer, is taking his stable of horses to Saratoga, comprising Mr. Abiugdon's brown horse Disturbance, by Terror, dam Lucy, and Loug Tom, well known to American turfmen; also Sheppard Bros.' Empress, by Harry Bassett.

SUMMER MEETING OF THE CLARKE COUNTY, W. T., ASSOCIATION AT VANCOUVER.

This meeting commenced on Tuesday, July 25th, and continued three days. Owing probably to the fact that farmers are engaged in their hay harvest the attendance was light, but the sport was enjoyed by those present. From the *North Pacific Rural Spirit*, of Portland, we take the following description of the track, together with the summaries of the races:

"To those who have lived here to see this city grow up from a little village to its present proportion, it is interesting to be comfortably seated on board so fine a steamer as the Lurline (in place of the once glorious steamer Eagle of twenty-five years ago), and swing out into our Willamette, where can now be seen a mile of costly buildings, and almost hundreds of vessels, large and small, busily engaged in the commerce of our city. Twelve miles down the river, as Oregonians know, we leave the clear, still notes of the Willamette, and rush out into the grand Columbia current, which always greets a steamer by giving her a kind of friendly shake off. Six miles up the Columbia we hauled up alongside the dock, and riding up through one of the principal streets we could not be otherwise than favorably impressed. Activity and a wholesome condition of things seemed to meet the eye in all directions. A fifteen minutes' drive in a north-easterly direction brought us to the Fair Grounds, that is situated on an eminence, from which Fort Vancouver, where the oldest civilized settlement in the North Pacific Territory was made, as well as a sweeping view of the old Columbia can be had. The grounds are favorably located, and being situated in one of the richest agricultural counties in the Territory, and being under the control of gentlemen who have no more than a common interest, these grounds at no distant day will be one of the attractions of the Northwest."

Clarke County A. & M. Fair Grounds, July 25, 1882. Trotting, 2:38 class, 3 in 5; purse, \$400; divided, \$225, \$125, \$50.
H. S. Hogueboom vs. br. m. Walla Walla Maid, by Millman Bellfounder..... 1 1 1
Jay Beach names b. m. Maggie Arnold, by Belmont..... 2 2 2
H. Sniley names s. h. Gen. Crook..... 3 d.
Time—2:42½, 2:42, 2:43.

Same Day.—Second race, 1¼ miles; purse \$300, divided \$250, \$50.

Cy Mulkey names b. g. Joe Howell, by imp. Bonnie Scotland, 119 1
J. A. Porter names br. m. Caddie R., by Dayswater, 115..... 2
Mulkey & Marsh name br. h. Billy Combs, by Shannou, 122..... 3

Second Day, July 26th, 1882.—Three-quarter mile handicap; purse \$250, second horse \$50.

W. G. Seoggin names br. h. Jim Merritt, 5, by Langford, 116..... 1
R. E. Bybee names b. f. Ney Ella, 2, by California, Ford, 127..... 2
Time—1:22.

Third Day.—Trotting, for three-year-olds, 3 in 5; purse \$400, divided \$225, \$125, \$50.

L. B. Lindsly names br. f. Jane L., by Hambletonian Mambrino, dam Mollie Welch..... 3 3 1 1 1
John Pender names b. f. May Wintler, by Rockwood, dam by St. Louis..... 1 1 2 2 2
E. J. Jeffery names br. f. Edna J., by Kisher, dam Morgan..... 2 2 3 3 3
Time—3:17, 3:16½, 3:12½, 3:09, 3:07.

Same Day.—Pacing; purse \$100; mile and repeat.

Mr. Misman names Captain Arnold's Dan..... 1 1
Mr. McManus names Captain Arnold's Pete..... 2 2
Time—3:02, 2:45.

Same Day.—Running, mile and repeat; purse \$250, divided \$200, \$50.

Cy Mulkey names b. g. Joe Howell, 9, by imp. Bonnie Scotland, 111..... 1 1
J. A. Porter names s. m. Trade Dolla, 7, by Norfolk, 111..... 2 2
Time—1:51, 1:52.

There was a trot on the second day, in which were engaged Medium, Dexter and Gold Foil. The first heat was given to Medium in 2:32½ (with Gold Foil distanced), as also the second in 2:31½. Dexter took the third heat in 2:33, and Medium the fourth and race, but the judges now announced that the heat as well as all pools and bets were declared off, and placed Mr. L. B. Lindsey behind Dexter. Mr. Smiley thereupon took Medium to the stable, and when time was called, Mr. Lindsey drove Dexter around alone in 2:42. This was the point that marred the pleasantness of the meeting, and the judges would have done well to announce their reasons for the course they pursued.

THE DOUBLE-TEAM RIVALRY.

The absorbing question of the hour is, how fast will a team yet trot, this having been precipitated upon the minds of the cognoscenti by the performance of Edward and Dick Swiveller. The proposition that a pair, well matched, can go faster than either of them single, which was rather startling until lately—we believe Mr. Robert Bonner was the first to give the idea prominence—has already become generally accepted as an axiom. When the test of common sense is applied to it, it seems to be one of those things that goes without saying, however it may shock old-fashioned notions. A single trotter draws driver and sulky, weighing at a minimum 190 pounds, while a pair draws a driver weighing 150 pounds and a wagon weighing 70 pounds, being only 110 pounds for each horse, if they work well up to the collar evenly. This is a handicap of 80 pounds in favor of the team, more than five times as much as was considered would equalize the speed of St. Julien and Trinket. Besides, when going to the pole the horses are constantly neck-and-neck, and striving to out-do each other. If they are steady, evenly matched in speed, and do not make mistakes, why should they not go faster double than single? The difficulty is not in making the speed, but in obtaining and educating the team to do it. The success of Edward and Swiveller leads us to believe that the great team of the future will be a pair, not brought together at random, but that have long been trained in unison; and it is only a question of time when two of much greater individual speed than either of Mr. Work's pair will be so brought together, and, under favorable conditions, on some exceptionally fast track, will eclipse even the 2:10½ of Mand S. We are quite convinced that people who read these lines will live to see the day when 2:16½ by a double team, wonderful as the record is, will be as far eclipsed, taking into fair consideration the greater relative value of seconds as a rate of two minutes to the mile is approximated, as has been the almost forgotten 2:27½ of Jessie Wales and Darkness; and we never yet made a prediction on the bull side of the trotting-speed market that failed to be verified. And in the great rivalry that is certain to ensue among our wealthy road-drivers, the business of breeding and training horses to meet the demand cannot fail to be vastly stimulated.

SHORT RACING IN IDAHO.

BELLEVUE, July 22, 1882.

EDITOR BREEDER AND SPORTSMAN: It has been quite a time since our races have been written up in proper shape, as we have certainly had some this season, which certainly deserved a great deal of space in some journal; but now that I have taken the responsibility of trying to fairly represent our town, as well as to give you and your readers a fair shake, I will try and do what is right. To-day was a day some of our sports looked forward to with great interest, but most of them got left, as the backers of the horses were not present, although no cause was assigned for their absence. However, to-day's race proved very interesting for those who thought they were getting on the right horse, but who found out different after the race. The race was 600 yards and repeat, and three of our best repeat horses were entered, namely, Pierce's "Johnny," Luther's "Ten Cents," and Blackwell's "McGee." Johnny is known to be a repeater, and was the favorite. Ten Cents has many backers, but most of them have weakened on him since his owner strained him in running a half mile and repeat not long ago; and to-day he weakened entirely on the third heat. McGee was second choice in the pools, but came out victorious.

The first heat was the best start had, and Ten Cents came in first, McGee second, and Johnny third.

SECOND HEAT.—The start was not as good as before, and quite a difference was made in the outcome, as Johnny was first, McGee second, and Ten Cents third.

THIRD HEAT.—The start was very bad, and Ten Cents stopped short 50 feet from the start. McGee came in first, and Johnny second.

FOURTH HEAT.—Many were surprised at the race coming to a fourth heat, as most every one thought Johnny, having won the second, would also win the third and money; but McGee surprised them, and came in an easy winner of the race and money.

SUMMARY.
Pierce enters Johnny..... 3 1 2 2
Luther enters Ten Cents..... 1 3 dist.
Blackwell enters McGee..... 2 2 1 1

Our sporting fraternity will probably get up a 50 mile race some time during the next two weeks, and a foot race of 100 yards, with a short horse race thrown in, as such is the outlook at present.

The hunting people of our vicinity are very anxious for our game laws to run out, as the game most desirable for our crack shots are plenty, and deer, bears, grouse, ducks, geese, doves and all small game of this kind are plenty hereabouts. Fishing for the past three weeks has been magnificent, and many parties have recently been formed for a week's fishing with good results.

Yours, till more news,

PHONOGRAPH.

THE LOS ANGELES FAIR.

The District Fair last year at Los Angeles was not very successful, owing to the late date at which it was held and to the small purses, that were insufficient to attract horses so far away from their stables. This season organized efforts, through local subscription, have been made to place the association on a sound financial basis, and thus far they have been so successful that the executive officers now announce that the fair will be held at Los Angeles on Monday, October 16th, and will continue throughout the week. A committee has been appointed to arrange the speed programme, and the Park and buildings will be put in thorough order for the occasion. The Sixth District is composed of the Counties of Los Angeles, San Diego, Santa Barbara, San Bernardino, Ventura and Inyo, and in view of the immense impetus given to trade and travel through the opening of the Southern Pacific Railroad, we predict that the Fall fair at Los Angeles will be a success and a great benefit to the counties therein represented. Mr. F. J. Baretto is President and Mr. R. H. Hewett is Secretary of the Association.

THE JOCKEYS OF THE DAY.

Symptoms abound on every side of us to show that the Jockey Club is losing its hold upon the supporters of that great and favorite pastime which no other sport is likely to dethrone from its pride of place in this country. The fact is, that, as history abundantly teaches us, no body which springs spontaneously into existence and becomes the depository of power can retain that power unless it includes among its members men of fearless independence, of strong character, and of impregnable integrity. Since the death of Admiral Rous, the Jockey Club had boasted no member who took an active part in its affairs, and who also possessed the indispensable attribute of a strong backbone. The consequence is, that while the Jockey Club is withering in influence, its subjects, whether they be the officials of the race-course, the jockeys, or merely what are commonly called "racing men," have slipped their bits and emancipated themselves more and more from control. The recent race meeting at Manchester furnished a case in point.

It was an axiom with Lord George Bentinck and with Admiral Rous that no class connected with the turf is more insubordinate, or more inclined to be insolent unless kept in order by the strong hand, than successful jockeys. Who that is admitted behind the scenes of a race-course can doubt that at this moment half a dozen prominent jockeys are more powerful than the Jockey Club and its stewards? It is customary to speak of the times through which we are now passing as the "Falmouth era of the turf." Would it not be wise to tear the scales from our eyes, and to denominate them what they really are, as "the Archer era?" For this unseemly result the Jockey Club has itself to thank. Many of its most exalted members have set the example of consorting with their favorite jockeys upon terms of intimacy to which Lords Glasgow, Zetland and Eglington, Admiral Rous and General Peel would never have stooped. This pernicious example has naturally been imitated by the friends and backers of the jockeys. Descending, in his "Race-horse in Training," upon the "effects of lavish gifts to children," William Pay remarks: "I am bound to say, that in my opinion much of the misbehavior of our lightweight jockeys has its rise in the extravagant presents made to them." Worse even than the disproportionate remuneration of which jockeys are the recipients, is the close familiarity with which they are treated by their betters. As a tree is known by its fruit, so were the results of this displacement of ranks made apparent at Manchester, when the jockeys insolently refused to give heed to the official starter, and treated a member of the Jockey Club who rode down to the starting post with equal disrespect. Appealed to by the starter, the stewards of Manchester races refused to support his authority, and the jockey triumphed over the humbled official, whose resignation their audacity necessitated. In such a state of affairs, lovers of the turf may well ask themselves whether there is any member of the existing Jockey Club at whom the jockeys of to-day would not scoff, if, like Lord George Bentinck, he ever ventured to take the starter's flag in hand?—*London Field.*

RACING IN ENGLAND.

The meeting at Goodwood during the past week has suffered from the existing political complications. The racing was good, but the American horses were either withdrawn from their engagements or failed yet again to break the spell of ill luck that has attended their running all through the season. On July 25th, the Goodwood Stakes, a handicap, for all ages, was won by Mr. J. Davis's Fortissimo, with Mr. Jardine's Reveller second and Mr. Tidy's Isabeau third. Eleven started, and the post betting was 3 to 1 against Fortissimo, 7 to 1 against Isabeau and 25 to 1 against Reveller. On the following day the two most important races were the Sussex and Levant Stakes. The former was for three-year-olds, with 95 subscribers, £25 each, £10 forfeit, with £500 added. The race was won by a French horse, Count Alfred, belonging to Mr. Lefevre, with Battlefield second, Dutch Oven third, and Mr. Keene's Romeo and Mr. Lorillard's Sachem unplaced, thus tending to prove that Dutch Oven, the best performer out last season, has not recovered her form, and that the American three-year-olds in England this season are of a mediocre character. The Levant Stakes were won by the Duke of Hamilton's Export, with the Nuneham colt second and Ladislas third. From present appearances the outlook for the two American stables is not of a rosy character, but perhaps they will be favorably weighted in the Fall handicaps and thus retrieve the heavy losses incurred this year.

A TURF SCANDAL.—The German turf has been disturbed by a most remarkable scandal. The following are the particulars of the affair, which occurred in the Iron-Hurdens-Rennen at Hoppegarten: The parties to the scandal were M. Tepper-Laski, M. Oelschlager, Prince Hatzfeldt and Mr. J. Beasley. The former gentleman, a partner of M. Oelschlager, started two horses—Siegespalme, ridden by Prince Hatzfeldt, and Prinz Eugen, mounted by Mr. J. Beasley, and declared, according to custom, to win with Siegespalme. Two other horses ran, Basta and Rainfarn. These two were beaten before two-thirds of the distance had been covered,

and then a ding-dong race ensued between the stable companions, to the great astonishment of the public present. Mr. Beasley rode as hard as he could, and beat Prince Hatzfeldt. On the return to the paddock a crowd surrounded Prinz Eugen and his rider, and would probably have used him very roughly had he not been well protected by his friends and a number of Englishmen present. M. Tepper-Laski, Prince Hatzfeldt and Mr. Beasley were called into the stewards' room, and, without going into the charge of foul riding and fraud, the stewards decided to disqualify Siegespalme and Prinz Eugen, awarding the stakes to Rainfarn and submitting the case to the Union Club. The inquiry held by the Union Club, under the presidency of Count Lehndorf, has been brought to a conclusion, and the Berlin and Vienna journals loudly assert that the indulgence with which the incident has been treated is due in a great measure to the high position occupied by M. Tepper-Laski, who assumed the entire responsibility of the affair, alleging that the orders he gave to Mr. Beasley were not sufficiently clear and explicit. The disqualification pronounced by the stewards at Hoppegarten has been maintained. MM. Oelschlager, Tepper-Laski and J. Beasley have each been severely censured and fined £50, the two former as owners for having omitted to give explicit instructions to their jockey in accordance with the winning declaration they had made to the stewards, and the latter for having neglected to take cognizance of the declaration made and for having ridden with incomplete and unintelligible instructions.

It is stated that there is a prospect that at no remote day a racecourse surpassing in beauty and completeness of appointments anything of the kind in this country, will be established on the South Side, in the vicinity of Jackson Park, Chicago. It is proposed to devote the new enterprise exclusively to running meetings, and in the course of an informal talk concerning the matter at the Chicago Club one night last week, a few gentlemen connected with that organization pledged themselves to take \$250,000 worth of stock in the enterprise. The estimated cost of the land and buildings is \$400,000, and the gentlemen interested claim that this amount can be secured in twenty-four hours.

Since Shotover won the two thousand and the Derby, Geheimness the Oaks, and with other prominent fillies to his credit, Hermit, once so neglected, is now looked upon as the most promising sire of the English turf. Mr. Chaplin owns the great Derby winner, as also a dozen choice mares, and he disposes of their produce at an annual sale, and on the 10th of July at Newmarket there were ten colts and fillies, the get of Hermit, which brought a total of \$57,500, making an average of \$5,750 per head, the best average ever attained at a public sale in England. Among them was a yearling filly out of Adelaide, \$18,000, and another filly by Hermit out of sister to Adelaide brought \$10,000.

The pool-rooms of the Parole Club were recently raided by detectives and policemen, under Anthony Comstock, who, armed with warrants, arrested the reputed proprietor, John Hackett, and a number of clerks and others employed in the place. They also carted away to police headquarters all the paraphernalia of the place, including twenty-eight blackboards, twenty-five record books, a vast quantity of tickets, and over seven hundred dollars in cash. The prisoners were taken before Recorder Smyth, who committed nine of them to the toms in default of \$1,500 bail each. No charges were made against the others.

The announcement is made that a sale of over fifty brood mares, the property of Mr. William Blenkiron, will take place at the Middle Park, Eltham, Kent, England, on Saturday, October 7th. The sale includes many of the best breed mares to be found in the English Stud Book. A large majority are either the dams of winners or by winning sires out of dams that were winners, while nearly all are supposed to be in foal to such famous stallions as Scottish Chief, Doncaster, Rosicrucian, Dutch Skater, Macaroni, Coltness and Exminster. There will also be sold about forty foals by the same sires.

The ch. f. Clipsetta, foaled 1880, by Springbok, dam Eclipse, by imp. Eclipse, out of Avis, by imp. Sovereign, the property of the Hon. T. J. Megibben, Cynthiana, Ky., died recently at Cincinnati, O., from lockjaw, brought on by an injury to her hock. Clipsetta was one of the best two-year-old fillies of the year, having won the Ladies Stakes at Louisville, Ky., five furlongs in 1:03½. The Tennessee Stakes same place, three-quarters of a mile, in 1:20½, and the Coquette Stakes, at St. Louis, three-quarters of a mile, in 1:17½.

Cleveland is the home of W. J. Gordon, and on the third day of the meeting there his span of blacks, belonging to his four-in-hand team, were trotted tandem on exhibition, making the mile in 2:42, and repeated in 2:40½. This gentleman denies the statement that he would back Clingstone against any trotter in the world. He says he never wagered a dollar on any race, and never will; that he trots his horses to develop them and furnish honest trials of speed, and that his drivers have instructions to win every race when they can without injuring the horses.

Little Ida, the dam of So-So, with a record of 2:17¼, is dead, after foaling a colt by Alexander, that is one of the brightest bays of the day. Little Ida was bred by Wm. C. Goodloe, of Kentucky, was sired by Alexander's Edwin Forrest, her dam Ida May by Red Jacket, second dam Anna by Kirkhead's St. Lawrence, and third dam by Trustee, and was one of the most valuable stud mares in the country.

Phil. Thompson was given into the charge of Orrin C. Hickok by Mr. Raymond, so that clever driver can easily find out which of Phil. or Sweetheart is the best four-year-old, but from present appearances they both seem to be somewhat off.

One of if not the oldest racing fixtures still in existence is the race at Paisley, Scotland, for the "Silver Balls," dated 1620, given by the Magistrates and Town Council of Paisley, with 100 guineas added from the race funds. It is a handicap for three-year-olds and upwards.

The celebrated Clydesdale stallion Johnnie Cope died lately in Monmouth county, Illinois. He weighed 2,500 pounds and was accounted the finest Clydesdale in America.

Dunbar's Hoof and Healing Ointment.—This specific cure meets with hearty support on the part of owners of horses, and when, as is the case, its healing qualities are vouched for by such experts as James McCord, Samuel Gamble, A. Goldsmith, C. S. Crittenden, Captain B. E. Harris, Budd Doble, O. A. Hickok and many others, it would be well to give the Cure a fair trial.

THE EMBRYO STAKES NOMINATIONS.

- No. 1—J. B. McDonald, Marysville, Cal., names grey filly, foaled May 4th, 1882, by Brigadier, her dam Lexington Belle, by Lexington; grandam Eagles, by imported Glencoe. Named in all of the races 1883-1884-1885.
- No. 2—N. S. Hamplin, Yuba City, Cal., names California Brigadier, foaled April 26th, 1882, bay colt, blaze in face, off fore foot white, and one hind foot white, by Brigadier, his dam Dolly Varden, by Montezuma; grandam Nellie Bly. Named in races of 1884-1885.
- No. 3—Samuel Gamble, Danville, Contra Costa County, Cal., names iron grey filly Ceres (no marks), foaled March 22d, 1882, by Steinway; 1st dam Lady Blanchard, 2d dam by General Taylor. In stake 1885.
- No. 4—Samuel Gamble, Danville, Contra Costa County, Cal., names iron grey horse colt Costa, small star in forehead, foaled April 17th, 1882, by Steinway; 1st dam Carrie Clay, 2d dam Calypso, by Mambrino Chief, 3d dam by Senator, 4th dam by Woodpecker. In stakes 1884-1885.
- No. 5—Samuel Gamble, Danville, Contra Costa County, Cal., names chestnut horse colt Clive, off hind leg white, very small star in forehead, foaled March 7th, 1882, by Steinway; 1st dam Dazzle, by Billy Goldust, a son of Daisy Goldust, 2d dam by Jehu, a son of Sherman's Black Hawk, 3d dam by Red Eye, son of imported Sarpedon. In stake 1885.
- No. 6—Samuel Gamble, Danville, Contra Costa County, Cal., names chestnut horse colt Clermont, small star in forehead, foaled May 5th, 1882, by Steinway; 1st dam Lady Dudley, by Tom Dudley, 2d dam by Bertrand, Jr., 3d dam by Paelet. In stake 1885.
- No. 7—Samuel Gamble, Danville, Contra Costa County, Cal., names dark bay horse colt Constantine, black points, no other marks, foaled March 28th, 1882, by Steinway; 1st dam Kitty, by Speculation, 2d dam Kitty Mills, by Burr's Washington, 3d dam Lady Almack, by Almack. In stakes 1884-1885.
- No. 8—Samuel Gamble, Danville, Contra Costa County, Cal., names bay filly Capella, with two white heels, very small star in forehead, foaled March 29th, 1882, by Steinway; 1st dam Kishencower, by Hamlet, 2d dam Jennie, by Star Davis, 3d dam by Old Pilot (pacer). In stake 1885.
- No. 9—Samuel Gamble, Danville, Contra Costa County, Cal., names bay filly Clito, with two white hind ankles, white streak on nose, foaled May 1st, 1882, by Steinway; 1st dam Maud M., by Stockbridge Chief, Jr., 2d dam California Belmont. In stake 1885.
- No. 10—Samuel Gamble, Danville, Contra Costa County, Cal., names brown horse colt Cleon, with black points, no other marks, foaled March 19th, 1882, by Steinway; 1st dam Nourmahal (sister to A. W. Richmond), by Simpson's Blackbird, 2d dam a white mare, name unknown, by Racer, 3d dam by Spotted Ranger. In stake 1884.
- No. 11—Samuel Gamble, Danville, Contra Costa County, Cal., names bay horse colt Pax, star in forehead, off hind pastern white, foaled May 11th, 1882, by Steinway; 1st dam Priceless (sister to Driver, with record of 2:19), by Volunteer, 2d dam Silvertail, by American Star, 3d dam by Aaron's Gray Messenger. In stake 1885.
- No. 12—Samuel Gamble, Danville, Contra Costa County, Cal., names red roan or iron grey filly Casa, with off hind pastern white, small star in forehead, foaled March 22d, 1882, by Steinway; 1st dam Scatica, by Shiloh, 2d dam imported Lady Edgerton, by Rattan, 3d dam Peg, by Jerod. In stake 1885.
- No. 13—Samuel Gamble, Danville, Contra Costa County, Cal., names bay filly Corolla, high hind ankle and off fore foot white, foaled April 3d, 1882, by Steinway; 1st dam Lady Winkley, by Signal, 2d dam by Belmont. In stakes 1884-1885.
- No. 14—Samuel Gamble, Danville, Contra Costa County, Cal., names brown horse colt Capri, with small star in forehead, foaled March 13th, 1882, by James Lick; 1st dam Lady Budd, by Belmont. In stakes 1883-1884-1885.
- No. 15—Samuel Gamble, Danville, Contra Costa County, Cal., names brown horse colt Clovis, with black points (no other marks), foaled April 27th, 1882, by Sultan; 1st dam Sweetbriar, by Thorndale, 2d dam Ulster Queen, by Rysdyk's Hambletonian, 3d dam by Mambrino Paymaster. In stakes 1884-1885.
- No. 16—Samuel Gamble, Danville, Contra Costa County, Cal., names chestnut horse colt Conde, with star in forehead, foaled March 6th, 1882, by Abbottsford; 1st dam Katie Tricks, by Colonel; 2d dam Jude. In stakes 1883-1884-1885.
- No. 17—Samuel Gamble, Danville, Contra Costa County, Cal., names bay horse colt Crecy, with star in forehead and high inside quarter of hind foot white, foaled April 2d, 1882, by Abbottsford; 1st dam Softly, by Speculation, 2d dam Lady Softly, said to be thoroughbred. In stakes 1883-1884-1885.
- No. 18—Samuel Gamble, Danville, Contra Costa County, Cal., names bay horse colt Colligny, with small star in forehead, two white hind feet, foaled May 3d, 1882, by Echo; 1st dam Tiffany Mare, the mother of Gibraltar. In stakes 1884-1885.
- No. 19—Samuel Gamble, Danville, Contra Costa County, Cal., names chestnut filly Colima (no marks), foaled March 15th, 1882, by Whipple's Hambletonian; 1st dam Ellen, by Jack Hawkins. In stake 1885.
- No. 20—Samuel Gamble, Danville, Contra Costa County, Cal., names chestnut horse colt Crisis, with white face and two white fore feet, foaled April 9th, 1882, by Alexandra; 1st dam Gilda, by imported Mango. In stake 1885.
- No. 21—Ben E. Harris, San Francisco, Cal., names bay filly Arthena, star and white hind feet, foaled April 2d, 1882, by Authurion; 1st dam Belle T, by Alexander, 2d dam by Whipple's Hambletonian. In stakes 1883-1884-1885.
- No. 22—Ben E. Harris, San Francisco, Cal., names sorrel colt, star and left feet white, by Del Sur; dam Fanny, by Cal. Tenbroeck. In stakes 1883-1884-1885.
- No. 23—Ben E. Harris, San Francisco, Cal., names brown and black colt, strip in face, white hind feet, by Brigadier; dam Lena Bowles, by Ethan Allen; Jr. In stakes 1883-1884-1885.
- No. 24—S. J. Tennent, Pinole, Cal., names bay colt Gus T, black points, star in forehead, foaled April 18th, 1882, by Gus; dam Princess. In stakes 1883-1884-1885.
- No. 25—A. B. Tennent, Pinole, Cal., names dark brown colt Onyn, with left hind foot white almost to hock, right hind foot white to ankle, right front foot white to ankle, star on forehead, foaled April 13th, 1882, by Pinole; dam Dolly, by Belmont. In stakes 1883-1884-1885.

ROWING.

THE PACIFIC COAST CHAMPIONSHIP.

The offer of a Challenge Cup by the BREEDER AND SPORTSMAN has awakened the interest in crew rowing, and already several clubs are preparing to compete for the emblem of the Pacific Coast Championship. The Ariel Club has two crews in which it reposes confidence, and has already initiated a desire to give the Pioneer four a brush for a good stake. The Pioneer Club has determined, however, to keep itself in reserve for Thanksgiving Day, and devote all its energies to winning the Challenge Cup, and thus regaining some of the laurels that have lately been falling from it thick and fast. Last week a crew from the Pioneer Club, composed of J. Sullivan, R. C. Lyne, Robert Crowley and L. White were out in their paper shell. This four will probably represent the club in the race for the cup. They did not seem to have improved much on the four shown by them previous to the Fourth of July Regatta, and the comments of the critics on the bridge were not favorable. Nevertheless the fact remains that the crew showed good pace in the City Regatta, and rowed a game race from start to finish. The Golden Gate Club has not yet indicated what crew it will put forward to represent it. The probabilities are that at least four boats will start; and should this expectation be realized, the race for the BREEDER AND SPORTSMAN Cup will be the best rowing contest ever witnessed on San Francisco Bay.

PETERSON AND STEVENSON.—The friends of Henry Peterson, of the Golden Gate Rowing Club, having sounded the praises of that young sculler rather loudly since his achievement on the Fourth of July, Austin Stevenson's backers have announced their readiness to accommodate the Long Bridge man with a match for \$500 whenever he desires to make it. Stevenson's backers talk as if they meant business, and if no meeting takes place, it can be accepted as a fact that Peterson's confidence in his undoubted ability as an oarsman has not reached that stage in which he thinks himself good enough to try for the championship. His backers think he is too young, but Boyd rowed races for large stakes when younger, and Hanlan beat the best men in America and England when no older.

SCULLING IN INK.

The two champion scullers of the world are showing great force in the columns of the respective newspapers friendly to them. Says Mr. Ross: "If Hanlan wants to row me, and really means business, why did he," etc., etc., etc., *ad nauseam*. Says Mr. Hanlan, on reading the slanderous insinuations against his prowess and honesty: "Ross knows as well as I do that my doctors have forbidden me to train, and I am compelled to obey them," etc., etc., etc. Ross seems to have adopted the aggressive style of journalism, and Hanlan the mild and apologetic. Both oarsmen ought to know by this time that the public cares very little about their literary abilities. What is desired is a race, and the sooner they make it, and the quieter the manner in which it is arranged, the better for the reputations of both oarsmen. It would be an excellent idea for the editors of the country to combine and pledge themselves to close the columns of their journals to all professional athletes until they should have actually ratified a match by depositing seventy-five per cent of the stakes with some responsible person. As long as two professional oarsmen can use the columns of a newspaper, the water seems to lose much of its attraction for their backers. This peculiarity is not altogether a foreign one, for on our own waters several exhibitions of the fondness for rowing on paper have lately been given. First we hear of a bitter rivalry between some ambitious young watermen. The question of superiority has to be decided, and must be settled with the greatest possible expedition. A meeting of the backers takes place, and it looks as if a writ of injunction from the Supreme Court could not prevent the principals from putting up their money. In the midst of these enthusiastic preparations for the contest, the chilling fact is developed that there is an insurmountable barrier to a match. One man wants a two mile course, while the other feels that nothing short of forty furlongs would enable him to extend his muscles to their full capacity. A woeful disagreement about the location of the course complicates matters. One oarsman hankers after the neighborhood of Milpitas, and the other yearns for the turbulent tides of Long Bridge, and the natural, inevitable and not disagreeable result is the announcement that the match is "off." The match is not the only thing "off" in such cases. A very superficial surgical examination of the rival athletes would show that an evaporation of courage had as much to do with the disagreement as any regard for the prosperity of Milpitas or the glory of Long Bridge. Whenever two men are really anxious to meet in an athletic contest of any kind, and feel reasonably confident, it is easy to arrange the preliminaries of the match. When the negotiations develop unexpected difficulties about time, place and distance, and are broken off with great unanimity by the rivals, it is safe to say that their hearts have slipped down and that, in the beautiful words of the poet, "One went, and the other darsent." It is to be hoped that one of our local oarsmen may profit by these kinds of words of wisdom, and preserve a reasonable silence about their ambitious intentions until they have made their matches, and bount them by the production of their good gold coin.

THERE WAS NO FOUL.—Of the race in which the American crew first made their appearance in England, at the Marlow Regatta, on July 8th, *The Sportsman* has the following report, from which it will be observed that there was no foul, as had been stated in a cable dispatch:

Special interest was felt in the gathering from the fact of the American Hillsdale crew having entered for the senior fours. Owing to a decision of that august body known as the Amateur Rowing Association, though, none of the crack clubs had the manliness to allow a crew to compete against them, and thus when the time came for the race there were only two fours left to antagonize the visitors, these hailing from Cookham and Marlow. Even these were not permitted to follow the bent of their inclinations, as some irrepresible busy body buttonholed them and set forth the evils that would befall should they engage against the Yankees. This had the desired effect on Cookham, whose members mostly hail from metropolitan clubs also, and thus Hillsdale had but to encounter the Marlow four, whom they naturally beat easily, although their form is scarcely taking, and we doubt whether they would have a chance against a trained crew such as they would have met at Heuley. The Americans seem to have taken their treatment here much to heart; but at the same time with a patience and dignity which form a rather striking contrast to the vulgar caste-prejudices which have been brought to bear against them. In the course of a conversation with our representative, Mr. Teawilliger, their captain remarked that they were of course very sorry and disappointed at the result of their visit, but that the chief concern they felt was at the slight thrown upon the Amateur Rowing Association of America, whose credentials they bear, and whom they of course represent.

First station—Hillsdale R. C., U. S. A.: C. W. Terwilliger (bow), H. P. Mead, L. F. Beckhardt, E. B. Van Valkenburgh (stroke) 1
Second station—Marlow R. C.: B. F. Heath (bow), J. S. Kirkpatrick, C. H. Yates, W. T. Shaw (stroke) 2

Hillsdale went away with the lead from the outset, and, holding their opponents easily all the way, won by rather over a clear length. Their style, however, was short and snatchy, and they scarcely pulled together like men who have been so long together. They were excellently hoisted in their paper shell, which carried them well, and it is just possible that their rough style may be more effective than it appears to the eye.

ENGLAND'S GREAT REGATTA.—On July 6 and 7, the dates of the Henley Regatta on the Thames, London, England, the weather was, to use the language of an English contemporary, "vile enough to spoil the business of boat pulling or the pleasure of looking on; to take all the life and go out, and destroy the value of form in the racing, and make what is, under average surroundings, one of the brightest and most enjoyable of all sporting gatherings, dull, depressing and miserable."

In the first heat of the race for the grand Challenge Cup, eight oars, Exeter College, Oxford, beat Kingston R. C. and London R. C. crews by a length and a half, the same distance between second and third. In the second heat the Thames R. C. had a walk-over. In the final heat Exeter won by five lengths over Thames.

The first heat of the Diamond Challenge Sculls was a walk-over for A. Lien, of the Paris R. C. Sir C. Adam, of Oxford, won the second heat by ten lengths over E. B. Martin, of Evesham; J. Lowndes beat the third heat by a dozen lengths from W. Liddell, of the Twickenham R. C.; W. R. Grove, of London R. C., the fourth heat over J. Foley, of Cork, by half a length. In the second round Lien beat Adam and Lowndes beat Grove, and in the final heat Lowndes was first by two lengths in front of Lien.

HANLAN THE JOURNALIST.—Mr. Hanlan, of Toronto, who is rapidly acquiring a fine reputation as a newspaper writer, says in his latest novel: "My business requires all my attention just now. Last year I attempted to run my business and my rowing affairs together, and I discovered it was impossible to give to both the attention they required. If Wallace Ross is as anxious to get on a race with me as his words would imply, let him be the first to accept my challenge to the five best oarsmen in the world. Perhaps, if he starts the ball rolling, there will be no difficulty in getting four others to follow him. I shall have to await answers to my challenge until September next, and if it is not accepted, I shall be ready to meet Wallace Ross alone. I would like Ross to know, however, that the stakes must not be higher than \$2,000 a side, for I do not wish to ask again contributions to the total amount awaiting the issue of the race. The money which I shall deposit will be my own. Regarding the Winnipeg regatta, I have a letter in my possession, received from Ross, in which he proposed to abandon the idea of a contest at that place."

CENSURING THE SNOBS.—The amateur rowing associations of the East, instead of treating with silent contempt the snobs who barred the Hillsdale crew from English regattas, are showing how much the offence has hurt them. The Schuylkill navy at Philadelphia has adopted the following:

WHEREAS, In consideration of the fact that the Hillsdale crew is the only one ever sent abroad that has received the indorsement of the National Association of Amateur Oarsmen of the United States—

Resolved, That the action of the Amateur Rowing Association of England in debarring them from rowing there in amateur regattas is an insult for which we have no redress, but can only condemn and deplore.

This is a poor sample of condemnation. The better way would be to ignore the contemptible action of the English committees; but when censure is indulged in it should be given in the sledge-hammer style in which the *New York Spirit of the Times* imparts it. It remarks editorially: "Those people who have been unable to decide whether the Henley Highwaymen and English Amateur Rowing Association are altogether knaves or part knaves and part fools will have no further doubt. This disreputable gang, who object to the amateur standing of the Hillsdale crew, accepted at Henley and rowed against the Aliens of Paris, whom the London *Field* proposes, from its own columns, to prove have rowed and won five money races since 1880."

ENCOURAGING OARSMANSHIP.—Several gentlemen of Saratoga, admirers of single sculling, propose to offer a purse of \$1,000 for a single-scutt race, either three miles straight-away or the same distance with a turn, to be rowed on Saratoga Lake within the next month, for which Elliott, Lee, Riley, Courtney and others will be asked to compete. A committee has been formed, and the following announcement was issued to the professional single-scuttlers of the United States and Canada: "Free purse \$1,000, for all professional single scuttlers, of which \$100 to the second; three miles with a turn; to be rowed on Saratoga Lake at four p. m., on August 25th, in good water; entries to close August 10th, to be addressed Charles Reed, Saratoga, N. Y.; three to start or no race; the referee to be appointed by the committee representing the subscribers to the purse, and all conditions as to the race shall be left to him; also, if in the opinion of the referee selected that the race is not fairly rowed and won, the money will be given for charitable purposes at Saratoga."

A MOST INGENIOUS PARADOX.—The *Turf, Field and Farm* has the following remarks on the paradoxical fact that while the Hillsdale crew does not know how to row (in the opinion of the English critics), it can beat anything on the water propelled by four oars: "One of the London papers, soon after the Hillsdales began practice in England, said it was difficult to believe that they were the best of American amateurs, for they could get no pace on their boat. But an American amateur crew, much less thought of, defeated the crack four of the London Rowing Club at Philadelphia, and the Marlow oarsmen found, the other day, that the Michiganders could make their boat go."

AND STILL MORE OF HANLAN.—The telegraph, which seems to devote a large amount of its energy to Hanlan and Ross, announces that, upon the receipt of a dispatch from St. John saying that Wallace Ross would claim the championship if Hanlan refused to row him this year, Hanlan was interviewed by a New York *Herald* correspondent, and said Ross could have the championship for this year if he wanted it, as under no consideration could he (Hanlan) row this year. Wallace Ross is in steady practice at St. John, N. B. A correspondent says he has improved considerably in style and finish, his rowing, even although the water is often quite choppy, being faultless.

YACHTING.

A COMMOTION.

One day this week there was quite a commotion in Old Saucelito Bay, where there was a set-to between three prominent yachts of the fleet. The yacht *Annie* was sent over to Saucelito by her owners in charge of Peter, the "man," and John, the steward of the Pacific Yacht Club-house, John being at the helm. The yacht was under short canvas, as the wind was blowing very strong. On reaching Saucelito Cove the heavy puffs prevalent in that region were coming down force and sharp. In attempting to make her moorings, the *Annie* went raking down across the bowsprit of the schooner-yacht *Nellie*, and the *Nellie*'s jibboom cut the *Annie*'s handsome new mainsail right in two. Another puff of wind freed the *Annie* from the *Nellie*'s jibboom, the topping lift and bolt rope swinging clear of the jibboom. The *Annie* then made a straight wake for the big *Aggie*, which lay at her moorings close by. She struck the *Aggie* on the quarter with her stem, and, strange to say, while doing slight injury to herself, damaged the *Aggie* to the extent of \$400 or \$500. She cut through and down the rail of the *Aggie*, through the heavy water-ways, and broke three of the heavy planks. She also carried away the cockpit rail and badly damaged the companion-way and slide. In fact, she rose right up on the *Aggie*, her forefoot being way out of water. The only wonder was that the *Annie* was not crushed like an egg-shell. As it was, only her stem was injured, so far as is known at present, but a new mainsail has had to be ordered. The *Annie* was insured for \$2,000, and all above \$200 the insurance companies will have to pay. This accident was a somewhat curious one in

its results, since the *Annie* is very old, indeed, and not supposed to be very strong, while the *Aggie* is a new boat, and an unusually strong one. The *Aggie*'s water-ways are almost heavy enough for a ship, yet the great, heavy timber was broken by the *Annie*'s stem. The water-way of the *Aggie* was a single piece, and all her planks were single pieces. It would be a great expense to take these all out, and therefore the broken planks will be pieced, and so will the water-way. Captain Hall is repairing the *Aggie*, and Captain Turner is at work on the *Annie*.

It was too bad for that new mainsail of the *Annie*'s to be spoiled.

The *Chispa* was cruising outside last Sunday. The wind was light out there.

Captains Freeman and Rogers had a party out on the T. H. Allen this week.

Vice Commodore MacDonough, of the Pacific Yacht Club, is out of town for a couple of weeks.

If the *Chispa*, *Nellie*, *Aggie*, *Fleur de Lis*, O'Connor and *Whitewing* go in one race, what a spectacle it will be.

Commodore Harrison, of the S. F. Y. C., has gone to the mountains for a month. The *Frolic* lies in Oakland creek.

This is the month for annual regattas of the Clubs, but none are announced, and it is not probable they will come off.

The American schooner *Actæa*, Mr. David Sears, arrived at Cowles, Isle of Wight, on June 19th, after a voyage of twenty-four days from Boston, Mass.

In Butte slough and creek the Chinese are catching fish by means of nets made of grain sacks. No wonder hook and line only bring out little fellows.

There are now two American topsail schooners afloat; *Wanderer*, 197 tons, E. D. Morgan, Jr., N. Y. Y. C., and *Nokomis*, 116 tons, W. A. W. Stewart, S. C. Y. C.

Frank Thibault, a well-known member of the S. F. Y. C., returned from Europe this week. He has seen the cutters sailing on the English Channel, and says they sail fast but look all under water.

The *Lillie* took the Golden Gate Club out recently, and in coming back from McNear's yard, with an ebb tide and southwest wind, some of the party got a pretty good wetting in the sea way of the upper channel.

The *Viva* was out with a fishing party the other day. She fished off the Powder Works near California City, and as she lay far enough off to be over mud bottom instead of rocks, it is not certain that a very large catch was made.

The *Lolita* has gone up to Montezuma slough with Capt. Eckley, John Lewis, Capt. Moody, Mr. Hines and Capt. Chittenden. With this lot of old salts there will be no danger of getting ashore. But won't the milk and fruit ranches suffer along the route.

The attempt of the Royal Cinque Ports Yacht Club, in England, to introduce steam yacht racing into their regatta, failed, as only Mr. Arabin's *Celia* was entered. This is scarcely to be wondered at, as the race was to be under no regulation for rating whatever beyond the condition that the competitors were not to exceed seventy feet in length.

A movement is on foot for a regatta of big yachts for a \$500 prize. If all the big yachts will compete, it will be a fine race. But it will be hard to get the owners all to agree. One has stipulated that the race be finished within four hours or be considered not a race. We hope to see the race come off. Anything is better than the dullness now pervading yachting circles.

The Seawanhaka rule of measurement upon which time allowance is based is as follows: Add the length over all and length on the water line together, and divide the sum so obtained by two to get the mean length. Length over all will be measured from the after end of the plank-sheer, at the middle of the stern, to a point perpendicular to the forward end of the load water line at the upper line of the plank-sheer, or a point corresponding thereto, if the plank-sheer does not extend so far.

The new steamer *Pilgrim* is to run between New York and Fall River. Her hull is of iron. She is 374 feet long by 88 feet over the guards. She cost \$1,000,000. Her depth is 18 feet 6 inches, and the measurement from the top of her dome to the base line is 60 feet. Afloat she will draw 11 feet of water, and her measurement will probably be registered at about 3,500 tons. She has a double hull, the first ever constructed for a steamer of this class. The engine is nominally 6,500-horse power but can furnish 8,000-horse power if required, while only 3,500 horse power need be ordinarily used.

Mr. James Gordon Bennett and his steam yacht *Namouna* arrived at Constantinople on July 12th. The *Namouna*, with the exception of two or three days when it blew a heavy gale, had a very pleasant passage to the Canaries. The yacht behaved very well and showed fine weatherly qualities. She left New York on the morning of June 5th, making 150 miles that day. The next days' runs were as follows: 270 miles, 267, 270½, 271½, 262½, 238, 241, 259, 269½, 276 and 189 miles more brought the *Namouna* to the Canaries. Here she remained three days, and then paid a flying visit to the Madeiras.

By the Seawanhaka Corinthian Club rules only one man is allowed for every five feet of length on deck and one for every additional fractional part of five feet, not including the owner. Each boat must be manned by amateurs exclusively. Any infringement of this rule will forfeit all claim to the prize. Before the owner of a winning boat shall receive the prize he, or in his absence the club member representing him on the boat, must sign a certificate stating that all the sailing regulations were complied with on such boat during the race. Each boat must be steered by her owner, a member of the Seawanhaka Club, or a member of the club from which she is entered.

The new 500-ton auxiliary steam yacht *Gitana*, just completed for Mr. Henry Jameson, of Dublin, Vice Commodore of the Royal Irish Yacht Club, had a most successful trial trip on the Firth of Forth, Scotland, on June 22d. Heavily rigged as a three-masted fore-and-aft schooner and designed in every other respect as a powerful sailing yacht, her engine power is only auxiliary, yet, on the measured mile at Gdane, says the London *Field*, the *Gitana* attained a mean

speed of ten and a half knots—a most favorable result, taking into consideration that, besides sixty tons of lead ballast, she had eighty tons of coal in her bunkers, and a full equipment of stores for a Mediterranean cruise.

A PRUDENT MEASURE.—The *Toronto Mail* having become quite an authority on rowing and other sports, has lately achieved considerable notoriety as the stakeholder in several important matches. Some surprise was felt therefore when Hanlan, after challenging any five men in the world to row him five races within forty-eight hours of each other, deposited \$1,000 with the Mayor of Toronto. A card from Wallace Ross explains the preference of the Canadian sculler. Ross states that the sporting editor of the *Mail* has skipped out with \$1,000 of his money, which he had put up to bind the match with Hanlan. The average citizen will think that between the honesty and financial integrity of a politician and a journalist there is little to choose; but Hanlan has evidently a different opinion.

YIELDING MASTS.—A yielding mast for yachts, invented by Mr. Incehead, has been attracting much attention at the East. The mast, instead of being, according to immemorial usage, a fixture, has its lower end fixed between two powerful springs under the deck, allowing it to bend to either side. Thus, when a sharp gust of wind catches the sail, the boat is not capsized, but the mast bends and allows the surplus wind to escape over the top of the sail. The amount of pressure required to bend the mast can be regulated by an arrangement of nuts and screws. It is also claimed that by the new invention a great gain in speed is made, as all the luffing and shaking are avoided, and, as the sail does not offer so much resistance to the wind, the boat does not plunge through the waves in a rough sea, but glides over them.

A SOUTH SEA YARN.—"Here's a garfish," continued the skipper, hauling out a slender, silvery, long billed fish from the great pile. "They don't look very dangerous, but about ten years ago I was down the South Pacific on a trading schooner, and saw a man killed by one. The kind they have there have a long upper bill, like a swordfish, and grow four or five feet long. We were lying right inshore, where half a dozen natives were in the water, when all at once they began to make a big powwow and to drag one of their crowd ashore. I thought of sharks, and jumped into the dingy and pulled ashore. I found that a school of big garfish had been chased by some fish, and had jumped out of the water among the men. One of them struck a native, its bill going completely through his chest. The fish was over five feet long, and weighed about eighty pounds. I brought away its bill as a curiosity."—*New York Herald*.

ATHLETICS.

THE SEPTEMBER MEETING.

A Fall meeting in September, with every event open to all athletes, seems to meet with general favor. The Summer vacations being over, active training will now be in order, and no doubt the Oakland ground will be well patronized, and much quiet work be done on other quiet tracks.

The events that have already taken place this season have been a disappointment to most of the competitors, and they seem determined to make a better showing before the rains set in. Many entries for every event are already assured, and a repetition of the enthusiasm of last Thanksgiving Day, with grounds on which an audience can see and appreciate the merits of every contest, will insure the success of all future meetings. The grounds will be put in condition to warrant good performances if the contestants are fit, and the officers will undoubtedly attend to the comfort of the audience, and September is the most favorable time of the year for good weather. A little hearty enthusiasm will surely make the affair a success.

ONE HUNDRED YARDS AGAINST TIME.—This (Saturday) afternoon, on the O. A. C. Grounds in Oakland, about 4 p. m., R. S. Haley will run 100 yards for a record. It is to be hoped that good timers will be present with first class fifth second watches. Pacific Coast timing is under a cloud, and great care should be taken to prevent any question as to the correctness of the timing. As Mr. Brooks is not in condition to run with him, Old Father Time is the only amateur on the coast by whom any approximate gauge of his speed can be obtained. He feels confident of doing even time. We hope he will accomplish the feat. At the same time and place Messrs. Lowden and King will run off the tie for second place in the two-mile handicap, the contestants starting from the same marks as they did in the race on the 22d of July. No admittance will be charged at the gate. We would suggest that Harris should also attempt to do 10 seconds from the 89 yards mark. But perhaps he is out of condition now and would prefer to postpone the event a week or two.

L. E. Myers seems to be very anxious to meet Brooks again at 220 yards. Next time it will be in good taste to say nothing before the race about looking over his shoulder and calling for him to come on. He has yet to break the tape in as good time as was made by Brooks at the Championship Meeting, and he ought to do it without making four false starts. On this side of the Rockies three disqualifies everyone—even a champion.

BICYCLING.

Great preparations are being made in bicycling circles for races to take place at the Fall Athletic meeting, which will probably be held September 9th, Admission Day, as this holiday falls early enough to insure dry weather and a good track. Most of the old riders and several new ones will enter the races, and the programme will be very attractive.

But little touring can be engaged in at this season, as the roads in the interior are much cut up by heavy traffic and extremely deep with dust, as is always the case in the dry season.

On Saturday, the 5th, the dead heat between G. L. King and W. H. Lowden, for second place in the two mile race of the 22d ult., will be run off at 4 p. m., at the grounds of the Olympic Club, Oakland. At the same time Finkler and Spring will run a half mile, both starting from scratch.

THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 1338.

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

JOSEPH CAIRN SIMPSON, - - - EDITOR

SAN FRANCISCO, - SATURDAY, AUGUST 5, 1882

NOTABLE HORSES.

In the six illustrations of the "Notable Horses of California," there has been one picture of a thoroughbred and five of trotters. This must not be accepted as a token that the harness division comprises five-sixths of the equine notabilities in our estimation, or that there is such a preponderance of merit in those which are celebrated for celerity of motion that all other kinds of horses must be ignored. Horses which come prominently before the public are like the stars of the theatrical profession, attracting increasing attention as they become still faster; and there is little doubt that W. H. Vanderbilt, though the possessor of nearly a hundred millions of dollars, controls more miles of railway than any man in the world, builds palaces for himself and family, has not nearly the wide celebrity of his mare Maud S. James R. Keene was comparatively unknown until Foxhall won the Grand Prix; and when Iroquois scored the "double event" of Derby and St. Leger, scarcely a hamlet in the civilized world where his name was not heard. The reduction of the records by the yearlings and two-year-olds bred here turned attention to California, and it is safe to assert that since the days of the gold excitement there has been nothing in California history which was so widely heralded.

Recognizing that a journal must follow the bent of the public, presenting subjects which a large majority of its readers demand, it does not follow that all of our proclivities range on the side of "fast horses." We shall present the claims of every race, and not a single family in the wide range of equine life which will not be brought forward in due time. From the diminutive Sheltie—the delight of children—to the ponderous draft-horse, all shall have due notice, though it is evident that these will have to be treated in classes, and types in place of individuals be the points to picture. We shall make the paper as comprehensive as the "heading," and as our artist has so happily grouped the illustrations of the main features of the BREEDER AND SPORTSMAN in the vignette, so our aim shall be to follow with the pen that which the pencil has depicted.

The Pacific Coast is well supplied, so far as the right procreative animals go, with nearly all kinds of horses, and large interests are pending in breeding others than horses which are reared for road and track purposes. If there is a lack it is in coach horses. The combination of blood which has been found in England well adapted for the production of these animals, is three-quarters thoroughbred and the other portion Clydesdale; but the thoroughbreds used must have the requisite size and proper shape. It is not essential that there should be high racing form, and "points," objectionable when great speed at the gallop is the aim, are not so essential for the coach. So far as our observation has gone, Oregon has taken the lead of California in this class of horses, and also in the better class of draft horses, though in the exhibitions of the California State Agricultural Society there are manifest improvements in these classes in the last few years. Enterprising men in some portions of the State are making strenuous efforts to improve the breed of draft horses, and many very fine animals have been imported.

It will not be many years when there will be a marked superiority in this branch of horse-breeding, and notable specimens more frequently seen than is the case at present. There is a sure remuneration for those who pursue the business intelligently. A haphazard, careless system will fail in this as well as in the production of race horses and fast trotters. Although size is always a marketable quality in a horse which is required to draw heavy loads, there are other requisites to consider. When we find a horse which comes nearly up to what we consider the right model for a draft horse, he shall have a place among the "notables." This will be typical of the family to which he belongs; and in the course of time we hope to present a representation of the various breeds. Clydesdales, Norman Percherons, Shire-horses, the Suffolk Punch, etc., have points of excellence well worthy of consideration, and it may be that in this climate, so favorable for physical development, there will be produced a California draft horse which will be the superior of any of them. We write "may be," although the faith is strong that in the not very far-off future the supposition will be changed into certainty, and has take the place of expectancy.

When the breeding of coach horses receives the same attention here as has been awarded to the production of race horses and fast trotters, there is scarcely the least doubt of the same success resulting. All over the United States the same unaccountable neglect has been shown, and among the many breeders of our personal acquaintance, we only know one whose aim is in that direction. Districts which forty years ago were celebrated for the production of this class of horses are now barren, and the most careful search fails to discover a pair which have any pretensions to rank in the category, or fit to be compared with those of the past. The coach horse, too, shall have a place in the portrait gallery of the BREEDER AND SPORTSMAN, and we know of one which is not far off from the standard. In short, the intention is to illustrate every phase of breeding with the best portraits of the best animals, and whether those which are selected are renowned individually or present the desired type of a family, in due time there will appear the notables of the breeds to which they belong.

THE SPEED BOULEVARD.

The question of the drive for San Francisco, where the truly American proclivities for fast trotting can be gratified, is of so much importance that it is unnecessary to apologize for frequent recurrence to the subject. The benefits following the construction of a road which will permit fast driving are not limited to San Francisco, as there is scarcely a county in the State which will not share in the advantages, and though the direct profits will fall to the breeders of horses adapted for the purpose, other breeds will appreciate in value from the "roadsters" being drawn from places which can be filled with those which do not possess the requisite speed. There is little necessity for argument as to the advantages which will accrue. We have yet to meet a man, with whom we have conversed, that does not acknowledge the good results which are sure to follow the completion of the proposed drive. Some are sceptical about raising the means by subscription, and others claim that the ground is not suitable. As to the first objection, we have full faith that in a very short time after it is known that want of funds is the only obstacle the subscriptions will be ample.

The first step is to lay it before the Park Commissioners, and from the well-known public spirit of these gentlemen there cannot be a doubt of obtaining their sanction. Petitions left in suitable places would receive signatures enough to prove that the public was interested, and that there was a general desire for the construction of the drive. After that surveys should be made, and it is probable that the expense attending this part of the preliminary work would be met by those having property which would be increased in value by the road being located according to their desires.

From these surveys—the more of them the better—estimates could be made of the cost, and the location which was found the most suitable selected. That proper ground can be gotten is beyond question. Those who remember the difficulties which were overcome in building the Bay District Course cannot be sceptical on that point. Hills were cut down, ravines filled. When this was accomplished there was a bed of sand which called for laborious efforts to walk upon, and he who made the circuit of the track when it was at this stage needed rest at the completion of the mile. The upper stratum of clay with which the sand was covered gives a firm foothold and the yielding foundation gave elasticity, and now it is generally conceded that the Bay District Course is the "fastest" in the State.

The proper material for covering is found contiguous to the Park in many places, and the expense of coating to the requisite depth will not be as heavy as many imagine. There is another advantage in having a foundation of sand for a road-bed besides the springiness resulting. This is the capillary attraction of the minute particles bringing the moisture from below nearer the surface, and economizing the water supply. The natural impediments to building the contemplated road in the vicinity of the Park, in place of being so momentous as some are inclined to think, are trifling when compared with what has been overcome in other cities. Excavations and embankments are easily made in sand, and when the "cuts" and "fills" are balanced, as is likely to be the case in the project under consideration, the cost is less than when there is a superabundance of material to be got rid of. Then, again, it is not necessary that there should be a level road, as, in fact, it will be preferable on some accounts if there are undulations, which give variety and bring out keener contests. Down the grade one horse is victorious, when the ascent brings his competitor upon even terms, and the contest is a changing scene in lieu of a one-sided affair.

But the main point at present is to bring the project into tangible shape by getting the question as soon as possible before the Commissioners. After that is done, and with favorable action on their part, the discussion of the various points at issue will more appropriately follow. We would strenuously urge that petitions be gotten up and circulated without delay. In one week names enough can be obtained, and in a shorter time than even the sanguine supporters imagine, we hope to chronicle that the grand drive is an assured fact.

AMATEURS OR PROFESSIONALS.

There appears to be a never-ending jangle in regard to what really constitutes an amateur, and the dividing line which marks the difference between that and a professional, like the line of no declination, constantly changing. It is a bone of contention among the followers of all kinds of sport, and there are a succession of difficulties to overcome whenever there is a chance for a clashing of interests. The committees which have charge of these affairs in England have narrowed it down to a point where all can understand, and the meaning given there is, that wherever there is the remotest chance of being beaten, the parties shall be excluded, as not coming up to the English standard.

We are not sorry that our crews and athletes are snubbed. By offering to participate they practically acknowledge the correctness of the assumption of superiority, and join hands with those who claim that all who are in a position to live without labor are of a race which cannot brook fellowship with those who do. The snob who has not brains enough to learn to make a pair of shoes looks with contempt on a man who is his superior in everything pertaining to real manhood, and the copying snobs of this country adopt the habit as they do the fashion of their trowers. But it is not the intention at present to discuss the intricate question as it is presented in athletic sports.

Not long ago there was a jangle at the races at the Gentleman's Driving Park, New York, over the

meaning of an amateur driver, and it was decided that any one who had ever driven for money, "purse, stake or wager," was a professional. This is an absurd definition. Too absurd for argument, were it not that it was coincided in by so many as to give it more weight than it was entitled to intrinsically. The Trotting Rules give the judges the power to order any professional driver to mount the sulky, and if he fails to respond to the imperial mandate, they have also the authority to punish to the full extent of the code. It is an arbitrary, despotic rule, which never should have been placed on record; but there it is, and as long as it is the law due deference will have to be awarded.

Should the definition alluded to be sustained, any man who has ever driven for money is amenable, liable to be ordered to drive a horse when the solons in the stand take a fancy to show their power. There is an easy solution of the meaning of professional, so far as regards the driving of trotters, and we cannot see why there should be any objections to the same construction in athletics. The definition should be, any person who makes the driving of trotters a business, followed it in whole or part as the means of making money, and this class should alone be amenable to the rule which empowers the judges to compel their services. In order that the degree of skill which is supposed to follow an active pursuit, stimulated by the hope of reward, should not come in competition with inferior ability; add, or who at any former time has engaged in it as a business. This appears to us like a common sense view, and one which would end the bickerings that are now so annoying.

TROTTING ON THE BAY DISTRICT.

To-day the Fall season opens, and the 2:40 and 2:25 classes will be decided on the Bay District Course. In the former will meet a trio of aspirants for track fame, and as even the "touts" are puzzled to select the winner, there is a likelihood of a contest which will prove exciting. Five of the six entries in the 2:25 are well known to be very "close together," and Del Sur, Crown Point, Starr King, Cairo and Ashley, a quintet of so nearly equal capacity that the problem of which is the superior is difficult of solution. Sweetness makes her first appearance on a California track, and the "boys" at the Oakland Trotting Park are very "sweet" on her chances. She is by Volunteer, the sire of St. Julien *et al.*, her dam by Edward Everett, the same inbreeding to Hambletonian as there is in Clingstone, and her grand dam by Harry Clay, the sire of the dam of St. Julien, Electioneer, Hogarth, etc.

SUNNY SLOPE.

The colts from Sunny Slope have arrived at the Bay District Course, and it is safe to say that it is rare to see as fine looking a lot. Mr. Rose ascribes the defeat of Eva to too gentle treatment. She had a peculiar waywardness, or, more properly, obstinacy, which required heroic treatment to overcome, and on several occasions Donathan had to be quite severe in order to make her do what he wanted. There was a very general impression that Donathan was too harsh, but the fact that she trotted in 2:26 as a two-year-old, and was beaten in 2:33 when she ranks as a year older, is good proof that his was the correct handling. No one discovers a mistake sooner than Hickok, and we shall look for her to show her old form in her future races.

THE STALLION RECORD.

Little by little the gap between Smuggler's 2:15½ and the next fastest stallion record is lessened. Piedmont and Black Cloud divided the honors for the second place, and now the telegraph brings the intelligence that Black Cloud took a second off his previous time, and at Buffalo last Thursday trotted a heat in 2:16½. This grand representative of the Mambrinos appears to be capable of taking the first place, and though Smuggler is mainly of thoroughbred blood, Black Cloud can show one grandparent without a stain. In this he resembles Maud S., the difference being that her maternal grandam was thoroughbred, while it is on the paternal side in Black Cloud.

THE EMBRYO STAKE.

We must confess that the Embryo has been a double surprise. In the first place, that the owners of forty-three colts are under the impression that they are breeding colts which are fit to cope with any one who may choose to come in, after all the talk there has been about advantages which were confined to a few. This was a more liberal response than we anticipated, and must acknowledge extreme gratification with the result. The second surprise was the absence of the Palo Alto nominations, and until Thursday supposed that it was due to some blunder of Uncle Sam's post-office officials. A search was instituted, a messenger despatched, when we learned that none had been sent. We are just as much in the dark as any of our readers, though, of course, there are imaginings which may be far from the truth. In such a case, it would be a waste of time to give opinions which are without foundation. That there was no intimation of the purpose is a certainty, and those who subscribed did so with the full expectation of encountering the stars of the great breeding farm on the banks of the San Francisquita. For this we award them a full measure of praise. It is a practical illustration of the value of California as the nursery of trotters, and that even the maller breeders have confidence in rearing animals which have merit. That the wonderful performances of California-bred trotting colts have stimulated breeders to endeavor to rear those which will prove worthy of comparison is beyond question, and the impetus given will gather force as the years come. It turned the attention of purchasers to California, and increased the value of the stock all over the State. The fact that so many colts were named, in the face of a competition which some were craven enough to fear, will add to the value. The list of nominations which is given may not include all, as there has not been time enough to hear from distant points, and even those that are nearer may be delayed in the mails.

THE RACING STAKES.

The long list of nominations in the stakes of the Pacific Coast Blood-Horse Association is a gratifying testimonial of the progress which has been made in the breeding of thoroughbreds in California. It is not given as perfect, as it is always a work of time to get the entries in shape; but knowing the interest that our readers felt in knowing what were "in," publication was resolved upon. There was another trouble, arising from a typographical error, which was overlooked in the proof as printed in this paper, and also in the slips when sent in the letters. The error was in the Fame Stake, where 1883 was printed for 1884. This would not mislead any one conversant with the matter, as it is well known that the colts are entered when yearlings, and in this stake run in their three-year-old form. Mr. Chase, however, has collated the nominations according to the wishes of the subscribers, and whenever there is a doubt in regard to the intention, the parties will be notified to clear it up. The official publication will follow as soon as possible, though there is scarcely a probability of change.

The Stallion Stake did not receive the requisite number of subscribers, though all the others show remarkably well. That there should be such an array of names from the limited number of breeders in California is an augury for the future which does not require a Vates to read correctly. When the measures are perfected which were outlined a week ago, it will not be long afterwards when there will be a largely increased production of thoroughbreds, and a corresponding augmentation in the nominations. There is little necessity for long comments on the breeding of the youngsters engaged. There are many of them as fashionably bred as the most exacting stickler for blue blood could desire, and from what we have seen, the form is in keeping with the genealogy. We heartily congratulate the Association on the success

which is sure to follow, and also the lovers of the "royal sport" upon the bright prospects of the future.

ANOTHER ALMONT ON THE COAST.

From E. Giddings of Lemoore, California, we obtain the information that in a short article which appeared two weeks ago, we omitted Altimont from the list of Almonts on this coast. It was not supposed to be absolutely correct, being written without other reference than memory afforded. Altimont is well worthy to be classed with those which were given, as his first dam is Belle Miller, by Blackwood, second dam by Mambrino Chief, third dam by Hickory (thoroughbred), fourth dam by Camden, and his fifth dam by Cherokee. The Camden is stated to be the horse of that name which was a son of imported Sarpedon, but this horse was castrated, though it may have been that the operation was performed after he had gotten progeny. There were three Camdens, two of them foaled in 1836, the other in 1835. Camden by Shark, from imported Invalid, made some seasons in Kentucky, and it may be that there is an error. At all events, both he and the Camden by Sarpedon were from well-bred mares, the latter being from Cherokeas by Cherokee, and the combination of Almont, Blackwood, Mambrino Chief and thoroughbred in Altimont, should please the most fastidious.

There is no question that Mr. Giddings is also right in thinking that Altimont is the colt we had reference to as the yearling which we saw at the Oakland Park in 1875 or 1876. He went to San Luis Obispo, in place of Santa Barbara, and his dam, Theresa B., by Prophet, Jr.

On the card which Mr. Giddings sent giving the pedigree of Altoona, there is also the pedigree of A. T. Stewart, which we suppose to be the horse which accompanied Altoona from Kentucky. He is by Mambrino Patchen, his dam by Mambrino Chief, so that he is a double Mambrino, and his grandam being by Young's Pilot, Jr., there is a mixture which will please many breeders.

OVERMAN A WINNER.

The telegram brings the intelligence that Overman won at Buffalo last Wednesday, trotting in either 2:20½ or 2:20¾. He has always been a great favorite with us and from the time he was broken never lost confidence in him, or waived in the belief that he would eventually gain high distinction. That his sire Elmo would take a prominent place as the progenitor of fast trotters, whenever his colts were given a chance, has also been our belief from the time we first saw his colts, and this idea has never been abandoned. A horse of such grand size and appearance, so well bred, so purely gaited, so very fast and with unquestionable endurance, must reproduce himself when proper opportunities are awarded him. He has shown colts, many of them, that in our opinion only required the right education to equal if not surpass Overman, but Mr. Seale has had too many other irons in the fire to grant them the chance. The success of about the only colt of Elmo's which has been trained may stimulate to give others an opportunity. We hope so.

THE GREAT FOUR-YEAR-OLD RACE.

We have copied from the New York *Spirit of the Times* an account of the great race in Chicago, and in which two four-year-olds greatly distinguished themselves. The race is admirably described by "Mambrino," and the pedigree of the colts given. The "glorious uncertainty of racing" is forcibly exemplified, and a chapter of accidents, or rather a series of misfortunes, attended the favorites. Such races as the one described will do more to advance the trotting of colts than pages of argument, and when the main features of the trotting meetings are the doings of the youngsters, breeders will find that their interests are proportionately advanced. The lines of blood being given in the account, there is no necessity for recapitulation.

FISH.

Wild Cat Creek, Alameda County, used to be a first-rate fishing place. Now it is too near civilization.

Indian Creek, Mendocino county, is said to be a first-class trout stream. A friend lately had fine sport there.

Mr. H. A. Wilson was at Saucelito last Sunday, and reports excellent fishing in the waters in that vicinity.

Many persons who went to the lakes in the north, have returned disgusted, as trout fishing there is very poor.

A squall at Astoria on the 24th of July capsized fourteen fishing boats and drowned two men of the twenty-eight.

At Independence Lake, in this State, there is said to be good trouting. There are boats there which can be hired.

Capt. Douglas and a party of gentlemen have gone on a fishing expedition to the Farallone Islands, and will probably be gone for two or three days.

Fly-hooks, creel, rubber boots, split bamboo and inclination has many an angler, who has not the only other requisite for fine sport—time.

The Gualala river, Mendocino county, is another of those beautiful fishing streams so far from the city that one can only wish he had time to go there.

Large numbers of deer are being killed in Mendocino county. Many persons, it is said, are slaughtering them for their hides alone. It is to be hoped that this is not true.

The streams are all getting lower, and no longer does the angler have to climb to the headwaters for a chance to fill his creel. As the waters recede the big fish come down stream.

Fraser River is full of salmon, and all the canneries are taxed to their entire capacity. Forty-five thousand salmon were delivered to the six canneries along the river, recently, in one day.

Some parties have had excellent sport along the streams in the Santa Cruz Mountains, where they say trout fishing is very good. Trout are also plentiful in the vicinity of Monterey.

There have been more tomcod, rockcod and smelt caught around the bay this year, than have been caught for many years previous. For two or three days, or while the "small tides" last, the bay fishers expect considerable sport, as the fish usually come in great numbers during these tides.

Passengers on the French steamer Labrador, which arrived recently at New York, state that on several mornings before reaching the Banks of Newfoundland they observed shoals of flying-fish rise out of the water before the vessel's bow—an unusual spectacle in the North Atlantic Ocean.

Mr. Ben Burling, one of the party that met with the accident near Felton, was in town last week. He is recovering slowly. His physician advises him to take a trip to the Sierras, where he will remain enjoying the cool mountain breezes and beautiful scenery until he has fully recovered.

The Alameda Sportmen's Club intend stocking a large lake in the neighborhood of Niles and Washington Corners with choice fish. The lake, of course, will be kept as a reserve for the club, but nevertheless it will be so much gain to the general wealth of the State and will redound greatly to the credit and add to the attractions of the club.

Wm. Goulcher, in the years 1876 and 1877, placed a number of California salmon minnows in the lakes and streams of Minnesota. He has been informed lately that California salmon have been caught in the headwaters of the Mississippi River, that weigh 5½ and 6 pounds. Mr. Goulcher was Fish Commissioner of Minnesota for many years.

Rope Valley, in the Sierra Nevada, is said to be a region good for fishing. The Virginia Enterprise says that the brooks in that section swarm with trout. These are so accommodating that they are almost ready to come ashore to take the hook. This cannot be beaten at any other place, except, perhaps, at Donner Lake, where the trout are said to swim about with the strawberries in their mouths.

W. A. Spence, a fish dealer in California Market, was tried before Judge Rix, on Thursday last, and found guilty on two charges of misdemeanor, one for having had in his possession shad out of season, and the other for exposing the same for sale. The prosecution was instituted by Crittenden Robinson, of the Sportsman's Club of California. The fish, as shown by the evidence, were caught with a net in the Sacramento River, and the accused was stealthily selling them.

During the storm Thursday evening a number of good-sized fish rained down in the road near Ike Hamilton's, and could be seen there yesterday. One active fellow about four inches long survived the night, and was picked up and put into a pan of water, where he showed up as lively as ever. The fish were of the "chub" variety, and varied in size from two to four inches in length. It is the first shower of the kind experienced in this section.—Scott Valley News.

Colonel Charles Ledyard Norton, editor of the American Caneist, after protracted search for an efficient drip stop for paddles, advises the following: "If you have no babies of your own, call at the drug store, pick out two—well, call them rubber nozzles, much sought after in raising the new generation in its earlier stages—slice off the small ends, slip over the paddle and they will fit like cups, an effective preventive to dripping."

Peter Lubiens, a fish dealer on Stockton street, was arrested on Wednesday last on a charge of selling salmon out of season. The open manner in which laws for the protection of fish and game have been violated in this city and State has been disgraceful to not only the officers of the law but to those who have formed themselves into clubs, for the avowed purpose of seeing that all violators were arrested and brought to punishment. The growing scarcity of game, and more especially of fish, is opening the eyes of fish commissioners, sportsmen's clubs, and all lovers of the rod and gun to the necessities of the case, and we are promised prompt arrests and vigorous prosecutions hereafter. We sincerely hope that such will be forthcoming.

THE GUN.

THE MATCH FOR THE GOLD MEDAL.

Last Sunday, two teams, composed of fifteen members in each, from the Cosmopolitan Pigeon Shooting Club and the California Pigeon Shooting Club, competed for the diamond medal and the championship of the State at "Dick" Cunningham's shooting grounds, San Bruno. The terms of the match called for twelve birds for each shooter, members of the opposing team to alternate shots; 21 yards rise, 80 yards boundary; H and T traps, five in number. Charles Nonges was unanimously selected to act as referee. J. Stack judged for the Cosmopolitan club, and J. Burns for the California Club. D. M. Pyle kept time and D. Rice trapped. Frank Maskey captained the Cosmopolitan team and retrieved wounded birds, while Crittenden Robinson performed similar offices for the California Club. The California Club won the toss and Crittenden Robinson went first to the score. He killed an easy incoherer and was followed by Frank Maskey, who was equally successful. Ferguson, the third man in the Cosmopolitan team, scored the first 0, but his bird, a hard flying, right hand quarterer from the right trap, fell dead a few inches out of bounds. Hub. Parker was the first man to miss on the California side. This equalized matters, but Golcher Sr., followed with a miss, and left the score one in favor of the California team. Bogard and Pearson on the one side, and Card on the other, all missing, made the score at the end of the first round even with 12 kills for each. In the next round the Cosmopolitans shot very steadily, scoring 14 kills out of 15. The other team was less fortunate. They made five misses, which put the Californians four ahead. From this time to the end of the match the Californians led right along. Once their lead was reduced to one, but they soon picked up, until the last shot was fired, when they had nine more to their credit than their opponents. In the tenth round the wind commenced to blow in violent gusts from the west. This had the effect of making the round the poorest one shot. The Californians made 9 misses; Crittenden Robinson missing for the first time, and the Cosmopolitans' having five scored against them. In the fifth round Ellison shot at and winged a bird which was going out of bounds, when one of the spectators struck at it with his cane. On a complaint by Burns, the referee under rule 26, gave Ellison a fresh bird, which he missed. In the following round a precisely similar thing occurred to one of the Cosmopolitan team. A new bird was ordered, under the same rule, which the shooter killed. Thus the California Club, which raised a technicality seldom claimed, was really loser one bird by the operation.

Though the averages made in the match were far above the usual work done by teams, Mr. Robert Tallant, of the Cosmopolitan Club, was the only gentleman who made a clean score. This he did in the face of conditions as adverse as fell to the lot of any shooter. Some of his birds were perfect demons, but he shot steadily and killed them all without the assistance of the retriever. Johnson and Kerrigan would have made clean scores but for birds dying out of bounds. The birds missed by Maskey, Robinson and Spencer got clear away though feathers flew from all three of them. Several kills were made at a great distance. Dr. Knowles' kill at 68 yards, with a 16 bore Greener gun, being the longest shot of the day. The Cosmopolitan Club only missed 35 out of 180 birds, or an average of 81 per cent. of kills. Their opponents missed 44, or an average of 75½ per cent. of kills. At the conclusion of the match President J. H. Jellett, of the California Club, presented the diamond medal to the Cosmopolitan Club in a neat speech. During his remarks he said that the rivalry was of a most friendly nature, and he hoped that ere long the two clubs would have another tussle for supremacy. President Rix replied on behalf of the winners. He paid a tribute of respect to the skill and courtesy of the vanquished, and reciprocated the previous speaker's wish for a future match. The medal is now the private property of the Cosmopolitan Club, they having won it three times. The club has given it into the custody of Mr. Robert Tallant, thinking that he alone having made a clean score in the match was the rightful custodian. It is likely that the club will put the medal up for competition among its members. The trophy is one that any man might well be proud to wear. It is a small, round gold medal, about the size of half a dollar, having in the center a two-carat diamond of exquisite water.

Following is the complete score of the match:

THE SCORE.

The following are the scores of the two teams:

COSMOPOLITANS.	
F. Maskey.....	1 1 1 1 0 0 1 1 1 1 1 1 1 1 1 1
J. Kelly.....	1 0 1 1 1 1 1 1 1 1 1 1 1 1 1 1
J. Ferguson.....	0 1 0 1 1 1 0 1 1 1 1 1 1 1 1 1
H. Rover.....	1 1 1 1 1 1 0 0 1 1 1 1 1 1 1 1
G. H. Graham.....	1 1 0 1 1 1 1 1 1 1 1 1 1 1 1 1
W. Golcher.....	1 1 1 1 0 1 0 1 1 1 1 1 1 1 1 1
A. Higgins.....	1 1 0 1 1 1 0 1 1 1 1 1 1 1 1 1
F. Johnson.....	1 1 0 1 1 1 1 1 1 1 1 1 1 1 1 1
F. H. Putzman.....	1 1 0 1 1 1 1 1 1 1 1 1 1 1 1 1
E. Funk.....	0 1 1 1 1 1 1 1 0 0 1 1 1 1 1 1

THE ALAMEDA SPORTSMAN'S CLUB.

The members of this club met at Bird's Point, Alameda, on Saturday last, to contest for the club's gold and silver medals. The day was windy and cold and the pigeons rather a poor lot. Before all the members who were going to shoot had arrived, an outside match was shot of four birds, twenty-one yards, for a purse of \$7 and \$3, for first and second best. A. Lambert killed his four birds, so did

Adams and Spencer, T. Muroney killed two. The first three shot off the ties, Spencer missed his first only and Lambert and Adams divided the money. Then came the contest for the medals, in which thirteen members took part. In this match Messrs. Spencer and Kerrigan were the judges, F. Eastman the referee, and the "veteran bird trapper," Harry Bird, was at his post as trapper. Ten birds were shot at, at twenty-one yards rise. The score stands:

W. Winter.....	1 0 1 0 1 0 0 1 0 1 1 1 1 1 1 1
T. Bennett.....	0 0 0 0 1 1 0 1 0 1 0 1 0 1 0 1
W. Haskell.....	1 0 1 0 1 1 0 1 0 1 1 1 1 1 1 1
— Crelin.....	1 0 1 1 1 0 1 1 0 1 1 1 1 1 1 1
R. Risdon.....	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
C. Tuttle.....	1 1 1 0 0 1 0 1 0 1 0 1 0 1 0 1
C. Pierce.....	1 0 1 0 1 0 1 0 1 0 1 0 1 0 1 0
A. Mayhew.....	1 0 1 1 1 0 0 1 0 1 1 1 1 1 1 1
C. F. Schell.....	1 0 1 1 0 0 0 1 1 1 1 1 1 1 1 1
N. Williams.....	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
F. Norton.....	1 1 0 1 1 1 1 1 1 1 1 1 1 1 1 1
S. Baker.....	0 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
H. Fritsch.....	1 1 0 0 0 1 1 1 0 1 0 1 0 1 0 1
* Withdrawn.....	

The tie between Mr. Risdon and Norton on nine birds was shot off, the distance being extended from 21 yards to 26 yards. There were five birds shot at; Mr. Norton killed four and Mr. Risdon two. Mr. Norton took the gold medal for first-class shooting, and Mr. Crelin the silver medal for the second-class. Risdon hit the only bird he lost, but it died out of bounds. Several quick shots killed some of their birds before they recovered from the throw of the trap. After the club match, several small purses were shot for, which added to the afternoon's enjoyment. The 7 o'clock train took the last of the shooters home, well satisfied with the day's sport.

SPORTING ON DITS FROM THE CAMPS.

Since the first of July, several hunting parties have returned from various parts of the State, with more or less to say of their trips. The Golden Gate Rifle Club had many representatives scattered through the country. The President, L. A. Bauer, together with Messrs. Behlow, Slackpool, Dr. Richter, Henry Hoffman, and Mr. Dresel of Sonoma, spent two weeks in camp at Ward Creek, on the Russian River, and appear delighted with their hunt. They had seen very many does and fawns, but found bucks scarce, yet, thanks to their splendid hounds, they had some exciting runs, and, being more for sport than slaughter, were much pleased with their success. Smith, Jr., of the same club, and party of friends, made a tour from Cloverdale to Mendocino, and by the coast to Fort Ross, thence via Ingram's to Petaluma, and back to the city, making remarkably good time. Mr. J. Stanton, with a few others, visited Lake Tahoe, and report some splendid fishing and deer hunting. Dr. Boyson had quite a time at the Rawles Ranch, Boonville, with Rawles, Murray and some others. The home of the cinnamon, on Indian Creek, was invaded, and a splendid run with the bear hounds was the result. The Doctor, to keep pace with his country friends, engaged a diminutive broncho at the hotel, and being rather heavy weight—228 pounds—the poor animal had its native genius sorely tested to get along. But with mustang pluck he stuck to his task, and after spilling the Doctor seven times finally got relieved, and returned riderless to the hotel. After the bear was dispatched, one of the country hunters came upon the Doctor, seated, or listed, somewhat like the Escambia before she went over, on an open hillside, where he and the mustang dissolved partnership, and asked what the matter was, or why he did not follow up the hunt. The Doctor, leaning his left hand upon the ground, and placing his right gently upon an unmentionable part of his anatomy, forcibly replied, "I be d—d if I go another foot." Since his return to the city he has entertained the members of the G. G. R. C. with reminiscences of his trip, and says he is tired of bear and deer hunting—he'll go after Lions in future.

Jacoby and four others camped about seven miles from Cloverdale. They were most liberally supplied with the necessities of camp life, from the "Post Keller," and they had the good fortune to get one spiked buck, which had been caught by a rancher's dog close to their camp. The rancher generously donated the catch. Mr. Bet packed it in, and a dozen Budweiser was uncorked to celebrate the event. Mr. B. was declared "Champion of Camp Jacoby," and they enjoyed themselves wonderfully well.

Crittenden Robinson, Tom Pearson and some other members of the California Wing-Shooting Club, were guests of one of the interior clubs belonging to the State Sportsman's Association, for a few days, and report most favorably of the entertainment. Bob says Tom's Winchester made short work of a rancher's hog, for which hog practice he had to pay \$1. Tom says it was an unavoidable mistake, as he took it for a bear as it stood by a log, and made a good shot any way.

Messrs. Tuhbs, Shorten, O'Connor, and Bill Nolan, of the "Aesthetic Whisker Club," had a lively time at Skaggs' Springs. They whiled away the hours with dancing, music and hunting. They killed two deer one day, and after carefully dressing them, hung them on a pepper tree for safety. On going to the place next morning with a pack-horse, to their utter astonishment they found skeletons hanging from the ropes, and not a particle of flesh on the bones. After searching about for the cause of this extraordinary state of affairs, they came upon a yellow-jackets' nest, from the size and appearance of which they were satisfied that it contained the flesh of their two deer. They returned to Skaggs', and were so disgusted they would not take even the horns. They say, anybody who doubts the story may go to the place, and there the evidence still hangs.

One of the many mistakes made by city hunters, when they go in search of game with which they are not acquainted, was evidenced by Dr. D. I. Hays, of the California Wing Club, in the neighborhood of San Jose, last week, when he shot a billy-goat of a brownish hue, which he thought was a spiked buck, until the merriment of his companions convinced him of there being something wrong. Even then he could not see where all the hilarity came in.

Golcher, Spencer, Lackey, etc., were located at Highland Springs. Mr. Lackey is a most expert croquet player, and vanquished his adversaries in every game. He and Spencer, with shotguns, etc., sallied forth for a day's sport among the redwoods. Lackey hailed Spencer some way up the hill, calling his attention to a pretty black-and-white animal which he saw about twenty-five yards off. Spencer said it was a very rare specimen of the California Mountain Squirrel, and to shoot it. Bang went the gun, and Mr. L. in a few strides reached his game. Well, the messenger who went to the hotel for a fresh suit of clothes, and the mound under which Lackey's hunting rig lies buried, as well as the decomposing carcass of a skunk, tell the whole story. Spencer said "he'd never give it away."

THE SAN FRANCISCO POLICE TEAM.

Very little interest had been taken in pistol shooting by the members of our Police Department until about two years ago, when they received a challenge from Colonel Beaver, in behalf of the Citizens' Team. The challenge was accepted. At this time there were not a dozen men on the force that could make over 104 or 105 points out of a possible 125. Since then these two teams have met three times in friendly contests for honors, medals, etc. Last Spring Colonel Dickinson, President of the California Rifle Association, offered as a trophy to the best pistol team, a beautiful silver bowl, that cost no less than \$125. This was the first trophy ever shot for by pistol teams on this coast. The only teams contesting for this prize were the Police Team, under Capt. Douglass, and the Citizens' Team, under Col. Beaver. The trophy was won by the Police Team, which made 472 points of a possible 500. Colonel Beaver's Team scored 471 points of a possible 500, losing only by one point. This match came off last June, and was one of the closest contested pistol matches that ever took place on this coast.

Last Saturday closed the shooting for the Police Department's gold and silver medals. The gold medal was won by Lawrence Whitworth for first class shooting, and the silver medal by Mr. Gillispie for second class. The twenty contestants of the first class and their scores are as follows: First class, first division of Company A.—P. D. Linville, 488; D. A. Peckinpah, 485; H. Hook, 485; J. Glanz, 484; P. J. Strokes, 481; H. A. Robertson, 474; O. R. Erskin, 474; I. W. Gillin, 471; H. Monahan, 462; M. J. Conboy, 462; J. Lowery, 458; Dan Leahy, 458; J. D. Bodwell, 456; M. Fitzgerald, 455; C. W. Exline, 445; A. B. Asher, 441; A. Sharp, 436; W. E. Flynn, 433; J. H. Stanley, 429, and C. G. Simons, 427. These and the following are all of a possible 500 points:

First class, second division, Company B.—L. Whitworth, 491; J. C. Lane, 484; J. Clark, 483; G. H. Parry, 474; J. T. McCarthy, 473; N. T. Field, 471; G. L. Gano, 471; J. L. Bailie, 471; C. C. Wells, 470; T. Flanders, 467; P. Holand, 465; E. R. Harper, 464; R. Scott, 465; M. Behan, 460; W. M. Briggs, 460; G. D. Harper, 460; T. J. Duggan, 452; S. H. Rankin, 437, and C. Hasli, 425. The grand total of the second class, first division of Company A, is 8,548 of a possible 10,000 points; and of the second class, second division of Company B, is 8,229 points of a possible 10,000. Though these scores show good shooting, still the private practice of many of the members of these teams far exceed those put on record. D. A. Peckinpah has recently made 37 consecutive bulls-eyes, followed by J. C. Lane, who made 36; P. D. Linville made 25, while Harry Hook made his 25, which is the largest number of consecutive bulls-eyes on record. The Snipers have granted these teams the privilege of shooting on a range at North Beach. The Board of Police Commissioners and the Chief of Police have encouraged pistol practice on the force. The members of the teams have purchased two regulation Creedmore targets, each target weighing 2,084 pounds. The pistols used are Smith & Wesson's large size 45 caliber; the usual distance for shooting is 30 yards. Seeing the improvement in shooting that the teams have made within the last year and a half, it is no wonder that they and their captains are proud of the results. It certainly shows that the Police Teams are second to none on the coast.

A novel shooting match is reported on the tapis, in which an archery club and a pistol team are to shoot a distance of sixty yards for a small purse and honors.

Deer are reported exceedingly plentiful in the neighborhood of the Gualala river, Mendocino county. There being few ranches, the game is therefore little disturbed. For camping parties the country spoken of is one of the finest in the State, and very easy of access.

SPORTING NOTES FROM NORTHERN CALIFORNIA.

SUSANVILLE, Lassen County, Cal.,
July 31, 1882.

EDITOR BREEDER AND SPORTSMAN: Lassen County is almost an unknown world to the city sportsman. Situated as it is ninety miles from the railroad, few come here for pleasure alone; but those who enjoy its fishing and hunting facilities are amply repaid for their pains. A few San Francisco people are now camped at Clear Creek, twenty miles from Susanville, one of the many charming places with which nature has gifted Northern California, where a pure mountain stream, filled with speckled beauties, winds through a country redolent with pine and fir trees, and romantic by its very isolation. There is a hotel, famous for its trout dinners, at this place, and when a party of excursionists go that way word is sent ahead to Rose, the proprietor, and the delicious treat, smoking hot and cooked to perfection, is placed before the hungry traveler. Explorer-General Wagner recently visited Clear Creek and performed mighty exploits with the rod. Indeed, it is said that on one of his excursions he caught sixteen trout and climbed seventeen trees in order to perfect his title to them. But this may be a mere rumor circulated for political effect.

Clear Creek has deer, too, but at this season of the year stockmen herd sheep in that vicinity, driving the deer farther up in the mountains, and when the visitor, weary with a day's sport, is enjoying his smoke at the evening camp fire, the inhabitant comes around and tells wild tales of "them city fellers," who last season pursued the hilarious sheep through the woods and exultingly brought his remains to camp as their first deer.

Probably no county in the State has more streams abounding in trout than this, from the game little brook trout to salmon whose weight often reaches five pounds. Clear Creek, Willow Creek, Pine Creek, Gold Run and Susan River, afford the disciple of Walton all the sport he wishes. Eagle Lake, a large sheet of water at about the center of the county, is fine fishing ground. During the Fall and Winter it is the rendezvous of myriads of ducks and geese, and there are plenty of deer in the surrounding woods.

There are quantities of wild fowl on Honey Lake during the season. This lake is twelve miles wide and twenty miles long. The water is brackish, and is populated by only the peaceful sucker.

The Devil's Corral is a pretty little spot, worthy a choicer name, on the Susan River, where Susanville people go to picnic and fish. Here the worthy citizen takes his wife, children and lunch-basket, and spends a day of quiet enjoyment.

Grouse, sage hens, quail, snipe and curlew, are found in abundance in all parts of the county. Antelope come in

droves on the mountain ranges during the Winter, and black, cinnamon, brown and grizzly bear make the Sierras their home.

The jack rabbit attains a luxuriant size in Lassen. There is not much sport in chasing the tender-eyed creature over sage brush and waste of sand, but the pursuit has a peculiar excitement, and it is remarkable for the intense interest which both the pursuer and his extensively eared victim take in the affair.

Susanville has an excellent race track. It is not likely that any races will be held here this Fall, as District No. 11 Fair—in which district this county is included—will be held at Greenville, Plumas County, in September, and for which a fine speed programme has been arranged.

On account of the distance from the railroad but few theatrical representations are given here, and seldom does a "barn storming" company of merit reach us. Two variety troupes have played at Peyson's Hall this Summer. A company usually gives two performances to good houses, fifty cents admission being charged. A dance is invariably given after the last performance, and forms the attraction of that evening. Each gentleman present puts a dollar in the hat that is passed around, and goes home well satisfied with the world in general and traveling minstrel troupes in particular.

JUNIOR.

THE RIFLE.

THE WIMBLEDON MEETING.

In view of the International Rifle Match, a great deal of interest is felt at the East in the result of the different competitions at the annual Wimbledon meeting. The principal event is the Queen's Prize, which entitles the winner to be the premier marksman of the year. It was won by Sergeant Lawrence, of the First Dumbarton Regiment. The event next in importance is the Elcho Shield, for which there is always an intense rivalry between England, Scotland and Ireland, the beautiful emblem being confided for the year by the winners to the Chief Magistrate of London, Dublin or Edinburgh. This time the English team will deliver the shield to the Lord Mayor of London, and the splendid emblem will form part of the rich plate owned by the city, its reception forming one of the gala days at the Mansion House. The following are the teams and the total scores: England—Sir Henry Halford, Gilder, Humphrey, Godsall, Whitehead, Mellish, Gibbs and Edge. The last five are candidates for places in the military team that is to come to America. Scotland—Thorburn, McKerral, Fraser, Shields, Murray, Boyd, Caldwell and McVittie. The last three are also candidates for places in the team for America. Ireland—J. Rigby, Braithwaite, W. Rigby, Maxwell, Young, Cogan, Barnett and Ganley. The total scores at the 800 yards, fifteen shots each, stood as follows: Ireland, 525; England, 519; Scotland, 510. Some of the individual scores were: Godsall, 66; Whitehead, 67; Mellish, 65; Gibbs, 66; Edge, 63; Boyd, 70; Caldwell, 66; and McVittie, 67. At 900 yards the scores were: England, 508; Scotland, 485; Ireland, 470. Godsall made 68; Whitehead, 68; Mellish, 58; Gibbs, 66; Edge, 61; Boyd, 64; Caldwell, 62; and McVittie, 55. At 1,000 yards the scores were: Ireland, 510; England, 509; Scotland 499. Godsall made 67; Whitehead, 65; Mellish, 66; Gibbs, 62; Edge, 61; Boyd, 63; Caldwell, 62; and McVittie, 65. England won, the grand total standing as follows: England, 1,536; Ireland, 1,505; Scotland, 1,494.

The following marksmen have been selected as members of the British team to compete in the rifle match: Bates, of the First Warwick; Boulter, of the Second Cheshire; Caldwell and Dods, of the First Berwick; Godsall, Goodear and Heap, of the Sixth Lancashire; McVittie and Mellish, of the Second Notts; Oliver, of the third Kent; Parry, of the Second Cheshire, and Major Pearce.

In the Bass match at Wimbledon, shot at 800, 900 and 1,000 yards, under conditions corresponding with those of the second stage of the international match, the following scores were made: Caldwell, 73; Dods, 65; Godsall, 69; Goodear, 65; Heap, 70; McVittie, 73, and Parry, 66; and if we take the following military practice at 200, 500, 600, 800, 900 and 1,000 yards, shot recently at Creedmoor, we find that the match is likely to be well contested:

	200 yards.	500 yards.	600 yards.	800 yards.	900 yards.	1,000 yards.	Total.
Captain S. A. Day.....	94	81	79	175			175
Captain T. Wilson.....	90	79	77	169			169
Sergeant T. J. Dolan.....	83	77	73	160			160
Sergeant J. L. Paulding.....	86	73	73	159			159
A. B. Van Heusen.....	86	65	65	151			151
Private J. S. Smith.....	82	65	65	147			147
Captain J. L. Price.....	80	59	59	139			139
Sergeant J. McNevin.....	62	58	58	120			120

The winners of the seven prizes for the month, with their scores, were Captain Day, 175; Captain Wilson, 169; Sergeant Dolan, 160; Sergeant Paulding, 159; Sergeant Van Heusen, 151; Private Smith, 147, and Private Alder, 144.

PRIZE RIFLE SHOOTING.—The third quarterly prize shooting match of the San Francisco Fusileers, Company C, Second Artillery Regiment, N. G. C., was held yesterday at Shell Mound Park. The company was divided into three classes, each marksman firing ten shots. Following is the score and the names of the winners:

First Class—First prize, Corporal H. J. Mangels, 40; second prize, Sergeant O. Lemke, 39; third prize, Private C. Scheurer, 38; fourth prize, Lieutenant John Brewer, 38; fifth prize, Private J. C. Plagemann, 36.

Second Class—First prize, Private H. Warnkin, 42; second prize, Private C. Geoss, 38; third prize, Corporal Charles Wacker, 37; fourth prize, Sergeant D. Wulbern, 37; fifth prize, Private L. Haake, 37.

In the third class, the first prize was won by Corporal C. F. Repenre, the second by Private J. C. Nobmann, the third by Private H. Schuelken, the fourth by Private H. Schuebner, and the fifth by Captain H. Wobber.

BILLIARDS.

THE SACRAMENTO BILLIARD TOURNAMENT.—The games for this tournament commenced at the Union Hotel on July 20th, and closed on Saturday, July 29th. The purse was \$100, divided into three moneys, \$50, \$30 and \$20, and there were five entries, Lloyd Amsden and Edward Robbins, from their well known proficiency with the cue, being handicapped at 400 points, while Messrs. Johnson, Chapman and Stroup either received 200 points from the above players or in the contests among themselves they played 200 points up. The tournament excited a great deal of interest among local amateurs, and Mr. Bowman, the proprietor of the

rooms, was assiduous in his attentions to make the affair a success. The chief interest was centered in the third game, when Messrs. Amsden and Robbins came together, but the former showing some brilliant play, including a run of 123 points, ran the game out in twenty-three innings, while his adversary had only scored a third of the number. It was the four-ball American game, and the following was the score:

PLAYERS.	Games Won....	Games Lost....	Number of Points Scored.	Best Average in Single Game.	General Average.	Best Run.....	Amount of Prize
Amsden.....	4	0	1600	17 9-23	11 1-5	123	\$50
Robbins.....	3	1	1363	18 2-11	12 1-2	98	30
Johnson.....	2	2	617	5 5-7	5	21	20
Chapman.....	1	3	689	4 1-3	4	35	00
Stroup.....	0	4	413	3 1-3	3	19	00

BASE BALL.

THE RENOS AND NIANTICS.

The match game between the Renos and Niantics at the Recreation grounds last Sunday calls for but little comment, save in a critical view, for the attendance was light and the game throughout was so one-sided that the old time enthusiasm was entirely lacking on this occasion. The Renos are either lacking sadly in practice or the selection of the team has been very unfortunate. In any case a few more exhibitions like that of Sunday and they will not draw a corporal's guard to witness the games in which they are engaged. The errors made were so numerous that the Niantics got tired of taking advantage of them, and playing well together they achieved a hollow victory, with the following score:

NIANTICS.

Time—Three hours and ten minutes.

THE YATES AND THE OLYMPICS.

On the same day these two nines played a well contested match at the grounds of the Olympic Club in Oakland. The batting at the commencement was not equal to the fielding, and the Yates were the first to score a run in the third inning; but from that time out the Olympics were more successful, and at the end they proved to be the victors by a score of 9 to 4.

Two base hits—Sumner 1, Neal 1. Umpire—E. Van Court. Time of game—One hour and fifty minutes.

The Haverly California Theatre Club visited Antioch, last Sunday, and tried conclusions with the Antioch ball tossers, whom they defeated by a score of 22 to 8.

To-morrow a regular League game will be played at Recreation Park between the Niantics and Haverly California Theatre Club, which promises to be of a very interesting character.

THE CONTEST FOR THE CHAMPIONSHIP.

As the League season is now half over, a comparison of the season's work by the League clubs in the championship arena with that of the other seasons is in order, if only to discover what improvement the clubs have made. Looking over the record of seven of the eight clubs which were in the arena in 1880, it will be seen that the first three clubs in the race at the close of the third week in July in 1880 were the Chicago, Cleveland and Providence teams. In 1881, at the corresponding time, the first three were the Chicago, Buffalo and Cleveland, while this year the first three are Chicago, Providence and Detroit. The record of the games won and lost up to the close of the third week in July during 1880, 1881 and 1882 is as follows, the clubs being given each year in the order in which they stood in won games.

	1880.	1881.	1882.
	Won. Lost.	Won. Lost.	Won. Lost.
Chicago.....	40 7	31 16	30 18
Cleveland.....	26 18	22 25	24 25
Providence.....	26 20	18 27	29 20
Boston.....	22 25	19 27	26 23
Worcester.....	21 24	21 24	11 37
Troy.....	19 25	21 24	23 26
Buffalo.....	17 30	27 19	24 24
Detroit.....	— —	— —	28 21

The Detroit Club was not in existence in 1880. In 1881 Detroit stood second to Chicago by 31 victories to 22 defeats up to the last week in July, while this year the Detroit stand there by 28 victories and 21 defeats up to date, July 23. It will be seen how steadily Chicago has declined each season, from 7 defeats in 1880 to 16 in 1881 and to 18 in 1882. Providence was last at this time last year, while Boston was next. In order to show the contrast between the positions of the clubs at the close of the half season, the record of the finish in 1880 and 1881 is appended as follows:

	1880.	1881.	1882.
	Won. Lost.	Won. Lost.	Won. Lost.
Chicago.....	67 17	56 23	56 23
Providence.....	52 32	47 37	47 37
Cleveland.....	47 37	37 45	39 45
Troy.....	41 42	39 45	39 45
Worcester.....	40 43	39 45	39 45
Boston.....	40 44	36 48	36 48
Buffalo.....	25 58	32 50	32 50

Detroit in 1881 was fourth on the list with a credit of 41 victories and a charge of 43 defeats. It remains to be seen what changes the next two months' play will make in the League record. Following is the score up to July 24th:

	Boston.	Buffalo.	Chicago.	Cleveland.	Detroit.	Providence.	Troy.	Worcester.	Won.
Boston.....	—	4	2	4	4	5	2	5	26
Buffalo.....	2	—	6	4	2	3	2	5	24
Chicago.....	4	2	—	7	6	4	4	4	31
Cleveland.....	2	5	1	—	3	3	4	6	24
Detroit.....	2	6	3	6	—	2	4	6	29
Providence.....	5	3	3	3	4	—	7	6	30
Troy.....	5	4	2	2	2	2	—	6	23
Worcester.....	4	1	2	0	0	1	6	—	11
Games Lost.....	24	25	18	26	21	20	26	35	193

THE AUSTRALIAN CRICKETERS.

The Australians played their first game during the present season at Lord's Ground, London, England, on July 6 and 7, when they defeated Middlesex, with eight wickets to spare. The respective totals were: Middlesex, 104 and 91; Australia, 136 and 61, for the loss of two wickets. Murdoch made 51, the highest score of the match. The Australians next met on Lord's Ground a very strong batting team, representing the Marylebone Club. Rain fell during a day and a half of the period set apart for this game, and it consequently ended in a draw. Marylebone had scored 302 and Australia 138 in the first inning, so that the former eleven, so far as the game had progressed, had decidedly the better of the situation. C. T. Studd batted remarkably well for 114, made without a chance, and was well seconded by W. G. Grace, Hornby, and A. P. Lucas, with their respective contributions of 46, 45 and 45. Horan, with 42, was the chief scorer on behalf of the Australians. Since then they have played several games, and their success in defeating some of the strongest English elevens is causing the attendance of thousands of spectators at their matches; and the Australians take two-thirds of the gate receipts at each match. At Sheffield there were 18,877 people present the first day and 13,484 the second, rain then stopping the match. At the match against the Gentlemen of England, at the Oval, 11,028 paid admission the first day, 13,540 the second, and 18,050 the third. From present appearances they will return through this country, and arrangements are being made for them to play in New York and Philadelphia. If our local clubs were in practice, and under a better state of organization, we might have an opportunity of seeing this splendid team in a match; but even as it is, some efforts might be made to afford them an opportunity of showing their skill, by dividing their twelve and choosing ten of our best local players to complete the elevens. There is no doubt that the affair would be a success.

THE STAGE.

Aside from the benefit offered to Thomas Maguire on Thursday last, there has been nothing during the past week to disturb the monotony of theatrical affairs. The veteran manager had an old-fashioned bumper, showing clearly that the public do not forget the many expenditures he has incurred and the pains he has taken for the past thirty years in catering to the artistic requirements of our population. The Hanlons announce a change of programme, the entertainment to consist of a two-act comedietta and a forty minute pantomime. They continue to do a very good business. At the California the Union Square Company replace the Mastodon Minstrels, opening on Monday with "The Banker's Daughter." Among the number of the new arrivals are two or three favorites, chief among them being Miss Eleanor Carey and Frederick de Belville, both of whom have at different intervals made their first appearance in this country at the Baldwin Theatre. By careful and persistent study Miss Carey has achieved the enviable position of being considered one of the best artists on our boards, and San Francisco will doubtless accord to her a hearty welcome, and will indorse the favorable impression she has created wherever the Union Square Company has appeared. The troupe is very evenly balanced, and possesses two novelties in the shape of "Odette" and the drama "The Lights of London." It is sure to meet with an artistic and financial success. The theatre will in future be under the management of Frederick Bert, who will be well remembered as having made several theatrical ventures in this city, showing a liberality and enterprise that merits better recognition than he received. We trust that in his new position he will succeed much better.

At the Tivoli Gardens "Der Freischütz," after a lengthy career, will be replaced by the comic opera "Coquelicot," which will be a pleasing novelty, as the libretto and music are said to be both lively and interesting. At the Winter Garden the new opera "Simona" continues to attract a large attendance. It appears strange to our Eastern visitors that such excellent entertainments given by these houses, can be maintained with such a moderate scale of admission.

THE KENNEL.

FIXTURES.

National American Kennel Club's trial on quails, Grand Junction, Tenn., December 4th. D. Bryson, Memphis, Tenn., Secretary.

Louisiana Field Trials near New Orleans, La., beginning Dec. 11, under the management of the New Orleans Gun Club.

BENCH SHOWS.—Western Pennsylvania Society's English Setter Bench Show Derby, Pittsburgh, Pa., for English setter puppies whelped on or after March 1, 1882. Entries closed December 1, 1882. I. R. Stayton Allegheny City, Pa., Secretary.

FIELD TRIALS.—National American Kennel Club's trials on prairie chickens, Fairmont, Minn., September 4th. Entries to American Field Derby closed July 1st; to All-Age Stake, September 4th. Joseph H. Dew, Columbia, Tenn., Special Secy. for these trials.

Gilroy Rod and Gun Club's trials on quails near Gilroy, Cal., October 28th. Open to dogs owned in California, Oregon, Nevada and Arizona. E. Leavely Secretary, Gilroy, Cal.

Eastern Field Trials Club's trials on quails, near High Point, N. C., November 17th. Entrance to Derby close July 1st; to All-Age and Members' Stake November 1st. Fred. N. Hall, Secretary, P. O. Box 854, New York.

LAVERACK PUPS.

In our advertising columns will be found a notice of Llewellyn and Laverack pups for sale. The gentleman whose property they are forwarded to us the pedigrees and proofs of genuineness of the stock he advertises, with a request that we examine the same. We have examined them and find the dogs all that they are represented to be, and feel sure that no reason except the one he gives—lack of room—could induce him to part with them at the exceedingly low price offered. Daisy F. and Hazel K. are from Lulu Laverack by Macgregor, that is they are of three-fourths pure Laverack blood, the other fourth being what is known as the celebrated Duke Rhoebie cross Roy-Queen Mab, making them Llewellyns according to the strictest definition of the term. In the East, and where there is a demand for such fine stock, they would readily bring \$100 each, providing, of course, that they are free from blemish. We can only indorse their pedigree, which we do freely. As to their appearance, size, etc., all we know is that they are black, white and tan in color, and that Daisy is the larger of the two. The owner pledges himself to take them back and pay all expenses if they are not exactly as represented, and he is a gentleman whose word is beyond all doubt and whose judgment in such matters is second to none. The unwhelped pups for which he offers to book orders are pure Laveracks without a taint of any foreign blood, and we believe from the only pure Laveracks in California. We find on examination that the sale of Prince Laverack, duly recorded in American Kennel Club Stud Book, was made from Jos. J. Snellenberg to J. N. Aldrich for the sum of \$300. Mr. Aldrich was acting for the present owner, who submits all necessary proofs. Prince, when out of condition, took third prize at the Pittsburgh show. Lulu, purchased as a weanling by her present owner for \$100 from J. C. Higgins, has never been exhibited. One of her litter sisters, owned by Mr. Goodsell of New York, has taken several prizes. Snellenberg's Thunder, the sire of Prince Laverack, divided first at the Pennsylvania field trial, 1880. He is by Pride of the Border and Fairy II. Pride of the Border has a standard pedigree, to which no reference need be made. Fairy II is pure Laverack, being by one-half Laverack's Moll III and one-half Laverack's Dash II. Peeress is also pure Laverack, and is sister to Phantom, Puzzle, Petrel, Pearl and Princess, all prize winners in England and America. Such an opportunity to secure pure blood may not occur again for some time, and we commend it to the notice of our many readers.

HUNTING DEER WITH HOUNDS.

The anti-hound deer hunters are waging quite as hard a newspaper war in the East as they did here about two years ago, when they were decidedly worsted in the argument. The latest contribution to the anti-hound literature of the day is from the pen of S. T. Murray, and published in the *American Field*, in reply to a defence of the practice, which was published a few weeks ago. He discourses as follows:

"The practice of killing deer out of season in any way is wrong, and should not be tolerated; 'crusting' deer is wrong, and should not be allowed. In times gone by not a Fall came that I did not go deer hunting, and the remark made in my address before the delegates of the New York State Association was true then as now. The exact language, referring to the Adirondack region in our State, is this: 'The practice of chasing deer with hounds should be strictly prohibited by an effective law. If this is continued, it is but a matter of a short time before that kind of game will be extinct in our State.'

"I have been deer hunting where they were plenty, and one day's run with dogs drove them so that we were obliged to break camp and move across two counties into Canada in order to start a deer. This, or a similar state of things, I have often observed. If my friend, Mr. E. H. Gillman, of Detroit, Mich., will induce all the still hunters to procure hounds and follow his example for a year or two, his camp will necessarily have to be pitched in some other State than Michigan, in order to start a deer.

"My friend cannot excuse, or successfully defend, the practice of running deer with dogs by saying as he does, 'That hundreds of deer are killed by still hunters where one is killed before dogs.' I do not deny this assertion, nor do I entirely subscribe to it. The answer, to my own untutored mind, is this: The still hunter leaves in the locality what he does not kill; the sportsman with hounds frightens away to distant localities those not driven to a runaway or lake and captured."

REMARKABLE PRECOCITY.

We wonder if any of our readers can furnish an instance of precocity that equals the following given by Arnold Burges in the *American Field*: "In your issue of the 15th, W. R. M. mentions the performance of a six months' puppy, and asks if such quality is not unusual at that age. He has certainly a promising youngster, but I see no reason to consider her a wonder. In the old days when we shot over natives, I have had many a six months' dog that worked as well as the old ones, except lacking in experience. The last native I owned was shot to all the 4th of July when but five months old, and did grand work. I have now in my kennel four puppies by Dashing Berwyn, out of Queen Dido, that will gallop as fast as their legs will carry them, hunt persistently and point staunchly to scent, and are but three months old. Their sister of the former litter, owned by Mr. Waterhouse, was mentioned by him in one of your late issues as doing all that W. R. M. claims for Maggie C. at the same age, and last year I shot for three full consecutive days over Mr. Bill's Druid's Girl, when she was seven months old, and never saw any dog do better work at the

opening of her first season. She was essentially 'a crack-er,' and had she lived would, in my opinion, have held her own with any dog in the country. The only reason, in my opinion, that more Llewellyns do not show work at six months is that they are not given a chance to do so, from the absurd idea that early breaking will break their spirit or reduce their speed. With decent treatment they have courage for breaking any time after they are three months old, and precocity of development equal to any dogs I have ever seen."

CALIFORNIA COURSING CLUB.

A meeting of the California Coursing Club was held at their club room August 2d, John Hughes presiding. J. P. Carroll, Treasurer, reported that the club financially was in a flourishing condition, having on hand, after all expenses of the last match, a surplus fund. The next coursing meeting of the club will be held at Merced, on November 15th, 16th and 17th. The members and friends will leave on Tuesday, the 14th of November, at 4 p. m.

November 15th is a long time ahead to look forward to, but we have already seen enough to be able to say that the next meeting of the young and vigorous California Club will eclipse all its previous matches. J. F. Carroll, J. C. Murphy, J. Farrelly, C. Mooney, the gentleman who so honors the *nom de guerre* of "Mercedillo," J. Keating and several other members of the club we have spoken with say that they have an extra fine lot of youngsters to run this Fall, and all the old dogs are reported as doing well. With the new training ground at Newark there is no excuse for a first-class dog being shut out of the first race by breaking out of slips, as happened at the last meeting of this club. We rather think that the club have made the date of the meeting so late that they have taken big chances of wet weather, and of all the mean things that can happen to a man, to be in Merced on a wet day is the meanest.

FIELD TRIALS IN THE SOUTH.—Colonel Hoge, President of the Georgia Sportsmen's Association, proposes to call a meeting of the association soon, and it has been suggested to make arrangements at that meeting for the first annual State field trial this Fall, as Georgia contains a fine lot of dogs to form the nucleus of a successful contest. The State has long needed a first-class, reliable kennel, where the best strains of dogs could be properly bred and trained and Judge Hopkins has established such an institution in Thomasville, one of the most delightful Winter resorts in the South, where he will breed pointers, setters, heagles, hounds and Scotch collies. There are smaller and less important kennels at Bainbridge and Atlanta, but Judge Hopkins has spared no expense to make his kennel first-class in all respects, and will use every effort, through the Georgia Sportsmen's Association, to have its influence felt in the State, in improving sporting and shepherd dogs.

A BAD CUT.—In the last issue, the publishers of the *American Field* presented their readers with a cut of the well-known pug dog George, owned by Mrs. Edwin A. Pue, of Philadelphia. The cut represented an animal with the head and tail of a pug dog, the body of a sheep and the legs of a mastiff, slightly shortened in the second joints. Worse cuts have been published, but not of late years, and it certainly does not look well for the *Field*, which is by far the best kennel paper published in America, to present such poor work to its readers. It is liable to give ignorant persons a wrong impression of what a first-class, handsome pug-dog really is. The expression of the face is excellent, but that is about the only redeeming feature in the picture.

At Aldridge's, St. Martin's Lane, London, June 23d, was sold the following, the property of Mr. G. K. Smith, Colney Hatch first season:

Surprise, by Don't-be-Headstrong—Pearl.....	\$80 00
Strapper, by Wolverhampton.....	72 50
Smiler, by Stamp Duty—Little Wonder.....	75 00
Speedy, by Diaticus—Blooming Balsam.....	60 00
Saplings, bl. w. b, by Ptarmigan—Sacharissa, February.....	75 00
Br w dog, by Hengist—Stinger, July.....	40 00
Blk dog, by Hengist—Stinger, July.....	5 00
Whelp, by Magnolia—Swift, January.....	2 50

Colonel A. Blaine, of St. John, New Brunswick, has just imported from the kennel of Mr. Hicks, Birmingham, England, Spring and Nellie, a pair of bull terriers. They are pure white, and are said to be the best pair of dogs of this variety ever brought to this side of the Atlantic. Spring, the dog, weighs twenty pounds, and is by Old Spring, out of Gipse; Old Spring by Bill, out of Kit; she by Prince. The bitch, Nellie, weighs eighteen pounds, and is by Rebel out of Kit II; Rebel by Eclipse out of Rose, by Turk out of Brute; Kit II out of old Kit.

At the recent show held at Belfast, Ireland, champion setter, red Irish, 1st, Mr. Giltrap's Garryowen. The Irish setters and Irish spaniels were the best of the class ever shown. Irish water spaniels, 1st, E. Doyle's Larry Doolin; bitches, 1st, R. B. Carcy's Molly Brallaghan.

By our London exchanges we note that Mr. Badger had the great misfortune to lose by death his famous greyhound stud dog Great Gable on the 10th June last. He was bitten by a mad dog, and it was found necessary to destroy him just three weeks afterward.

ANSWERS TO CORRESPONDENTS.

J. B., SAN FRANCISCO.—To remove color from gun barrels, use pounce stone or fine emery paper. A piece of pounce stone with a little water is the only article used by the leading gunsmiths here. Use no acid or any kind of detersive substance, simply friction and some kind of clean polishing substance. To re-brown, the barrels must be steeped in slacked lime for some time to remove all the grease before the color is applied.

Rabbits are more likely to be out in the early morning, or about sunset. The ravines in the foothills where there is plenty of cover are favorite resorts, and when far enough away from houses, are usually well stocked.

Sub. S. F.—Shannon ran second to Lady Washington in a two-year-old stake at Sacramento, in 1874, and second to Bradley in 1875. He ran in another race when three years old, and these are all that we can find in the records.

It is difficult to say what the average height of a thoroughbred 18 months old filly is. About 14½ hands would be our idea.

"L."—Mr. F.—says that the time is 2:36 and a fraction. If it is as you imagine, he must be at least 20 years old.

THE HERD.

OUR CATTLE PROSPECTS.

General James S. Brisbin, writing from Fort Keogh, says: While the manufacturing and cereal and vegetable interests of the United States have advanced fairly, the stock interests have comparatively stood still. We are today raising beef for only 40,000,000 of people, whereas we should be raising beef for 80,000,000. The reasons for this are various, chief of which is the fact of the scarcity of land in the East. Farmers have found that in heavily populated districts it does not pay them to raise cattle. The large number of acres required for grazing purposes is incompatible with small farms, and to stall-feed in large numbers is not practicable. So the Eastern farmer devotes his land to cereals and vegetables, and often buys his own beef. The distance of the Plains from the East and the danger from Indians have heretofore deterred Eastern capitalists from seeking investments in stock-raising out West. Happily that difficulty is now removed. The railroads have opened up the West, and the Indians, with the exception of a few in Arizona, have been conquered. The pastoral lands of the West have never been understood nor appreciated by the people of this country or the Government. The day will come when the national treasury will derive more taxes from the grazing country than from the best agricultural regions. These arid plains, so long considered worthless, are the natural meat-producing lands of America, and in a few years fifty million people will draw their beef from them. Where are the great grazing grounds, do you ask? They are in Texas, Colorado, New Mexico, Dakota, Wyoming, Montana, Washington and Idaho.

The whole United States contains 3,603,884 square miles, of which 1,500,000 square miles is set down as grazing lands. The best ranges are on the Rio Grande, Nueces, San Antonio, Guadalupe, Colorado, Brazos, Trinity, Main Red, Washita, Canadian, Cimarron, Arkansas, Smoky Hill, Saline, Solomon Fork, Republican, North and South Platte, Loup Forks, Niobrara, White Earth, Big Cheyenne, Little Missouri, Powder River, Tongue, Rosebud, Big Horn, Wind River, Yellowstone, Milk River, Muscleshell, Marias, Jefferson, Missouri, Madison, Gallatin and Columbia. Of the smaller streams on the eastern slope of the Rocky Mountains, we have the Blue Waters, Cold Water, Hill Creek, Raw Hide, Muddy, Willow, Shawnee, Slate, Sweetwater, Ash, Pumpkin, Laramie, Carter, Cottonwood, Horseshoe, Elkhorn, Deer Creek, Medicine Bow, Rock Creek, Douglas, Lodge Pole, Big Laramie, Little Laramie, Horse Creek, Beaver, Pawnee, Crow, Lone Tree, Big Beaver, Bijou, Kiowa, Bear Creek, Big Thompson and Cache la Poudre. The grazing lands on the Platte, Powder and Tongue, amount to over twelve million acres, and are the best I know of. For at least ten years yet I look for high prices in beef. Eastern capital is so conservative it will be slow to come West and engage in stock-raising, and only Eastern capital can raise beef in sufficient quantities on the plains to reduce the price.

A good many cattle companies have been formed of late years, and so far as I know, all are doing well. We have several here in Montana, and they are able to declare an annual dividend of 25 per cent., besides reserving a handsome surplus for increasing the herds. It is a remarkable fact that there is more English capital at present invested in cattle-growing in the United States than American money. This year the Englishmen are reaping a rich reward for their enterprise, and are selling American beef at 6 cents per pound, live weight, which costs them less than 2 cents to raise. There is really no immediate occasion for alarm about a cattle famine, as cattle are not yet so scarce as to create any great stress in the meat market. But the speculators have got hold of the fact that there are too few cattle in America for the population, and they are using it to fill their pockets. We must have more cattle, more cattle raisers, and more capital with which to raise cattle.

For the next ten years I believe cattle raising will be one of the most lucrative callings in the United States, and those who have the good fortune to be able to engage in it, will rapidly grow rich. The best way is to associate capital and raise cattle in large numbers. It costs no more to take care of three thousand steers than it does one thousand, and the profits are more than three times as large. In starting it is simply a question of money to buy cows and bulls for stock purposes. In 1840 there were 4,837 milch cows in the United States; in 1850 there were 6,385,094; in 1860, 8,728,863; in 1870, 11,000,000, and in 1880, 15,000,000. There cannot now be less than 15,000,000 cows in America, and these, if properly handled, will soon stock the country with sufficient beef to bring the price within the reach of the poorest man and his family. The first step is to stop killing female calves. Every female calf should be saved. The Western stock men have begun this, and already it is almost impossible for butchers to purchase calves for veal. In the west it is not so difficult to raise cattle for beef as in the east. The cattle run out all winter long, and no shelter or food is required for them, except that which nature provides. Every year the stock men start the story east for the benefit of the "tenderfeet," that the stock business is overdone, and the good ranges all taken. This is done to prevent new men from going into the business. The stock men know they have a good thing, and wish to keep it as long as possible. They would like to see beef \$1 per pound, and would ask \$100 for a steer worth \$10 without the slightest compunction of conscience if they thought they could get it. If I had two or three thousand head of cattle I doubt if I would write this letter, but unfortunately, not having any herd of my own, I am only interested in getting beef as cheaply as possible from those who have herds. I hope soon to see more people and more capital engaged in cattle raising, and beef brought to some reasonable price by reason of its abundance, and I have no hesitation in saying that associated capital engaged in beef-raising out west, will pay an annual dividend of 24 per cent. if it is at all properly managed.—Chicago Times.

ORIGIN OF THE AYRSHIRE CATTLE.

The Ayrshire cow, as we have her, is a native of County Ayr, Scotland, where we can trace her history back for about a century. Mr. William Aiton of Hamilton, in a communication made to the *British Farmer's Magazine*, in 1826, says: "The dairy breed of Scotland have been formed chiefly by skilled management within the last fifty years, and they are still improving and extending to other countries. Till after 1770 the cows in Cunningham were small, ill-fed, ill-shaped, and gave but little milk. Some cows of a larger breed and of a brown and white color were about that time brought to Ayrshire from Teeswater and from Holland by some of the patriotic noblemen of Ayrshire; and these be-

ing put on good pasture, yielded more milk than the native breed, and so their calves were much sought after by the farmers." The *Magazine* goes on to say: "We are verbally assured by old breeders who had known the Ayrshires since 1780 that they had received improvement from crosses with Short-Horn bulls for the last half century, and although they may now be considered a good established breed in themselves, they are in reality merely high grade Durhams." Youatt, in his history of British cattle, says, writing in the year 1833: "The origin of the Ayrshire cow is even at the present day a matter of dispute; all that is known about her is that a century ago there was no such breed in Cunningham or Ayrshire in Scotland." Through several pages of speculation as to what crosses have compassed the breed known as "Ayrshires," at the time he wrote, and an elaboration of their remarkable yields of milk and butter in the Ayrshire dairies, he leaves the impression that the present breed has sprung from a succession of crosses by Short-Horn bulls upon the native Scotch cow; that the produce of these crosses were interbred among themselves with care and an eye to improvement both in form and dairy quality, which finally resulted in an animal eminently fitted to the climate and soil of southwestern Scotland, and the best of all they have for dairy purposes. The effort appears first to have been to introduce Short-Horns and substitute them as a dairy cow, which failed, but the cross was successful, and hence the breed. Mr. Youatt proceeds to say: "On a first view, by a judge of the different varieties, the Ayrshire would be called a diminutive Short-Horn, so nearly in figure, color and prominent characteristics do they approach them. They are about the size of our common stock, compact in form, exactly built for a dairy cow, light forward and heavy behind, with an exceedingly home-like, domestic appearance. In color they vary from a brown, running in lighter shades up to red, and into a pale yellow, alternated more or less with white, in distinct patches, rarely mingling into roan. There is scarcely that uniformity of appearance with them that there is in the Short-Horns, yet they appear to hold true to the dairy quality throughout, which, like the gentle voice in woman, is an excellent thing in a cow." A much later article in the *American Agriculturist*, 1868, says: "The Ayrshires have been bred from milk in a country where quantity and quality were both wanted, where the pastures were only moderately rich, and where rapid fattening for the shambles was also a desideratum. The result is a breed of no more than ordinary size, many being decidedly small, but hardy, easy keepers, yielding a large quantity of excellent milk, rich both in butter and cheese. The claim set forth for these cows is, that they will give more and better milk, on the same feed, than cows of any other breed. This, we believe, is not disputed. Ayrshires have been known in this country since 1822, when, we believe, they were first imported. The stock was kept pure, however, only a few generations, as it became blended with the Short-Horns, and the blood now flows in some of our registered Short-Horns. In 1831, other animals were brought over, and ever since that time the breed has grown in favor. The animals are prevailingly of medium size. The cows have great digestive capacity, as indicated by their deep, full bodies. The colors are usually red, spotted with white, the spots being very well defined, often fine and sprinkled over the body in patches."

GREAT SALE OF GUERNSEYS.

A great auction sale of imported Channel Island cattle was held recently in Philadelphia. The catalogue comprised thirty-nine head of Guernsey cows and calves, which were allowed to be among the best ever imported. The competition at times was quite brisk, but the collection as a whole did not realize the amount expected from stock of such quality. There were thirty-two head of cows sold for \$11,370, and seven calves for \$486, the latter being dead cheap at the price. Following are the principal lots with the names of the buyers:

Cottage Maid, of St. Martins, 5 years old; Dr. Borland, New London, Conn.	\$440
Florie Le Cheminault, 3½ years old; John Doyle, Camden, N. J.	360
Delisle, 4½ years old; L. Wister, Philadelphia.	330
Beauty of Carre, 2½ years old; Dr. Borland.	400
Bull calf; Mark Wilcox, Delaware County, Va.	45
Beauty of St. Peter's Port; Franklin Seltzer, Philadelphia.	375
Lily Martin, 2 years old; Dr. Borland.	300
Cow calf; Erastus Gay, Hartford, Conn.	165
Dolly Le Poidevin, 7½ years old; Alan Wood, Jr., Conshohocken.	400
Bull calf; Pierre Lorillard, Johnstown, N. J.	30
Orange, the Vale, 2½ years old; Alan Wood, Jr.	400
Dairy Maid II, 3 years old; Edward Norton, Farmington, Conn.	400
White Nose No. 4, 2 years old; Dr. Borland.	330
Type No. 3, 4½ years old; Alan Wood, Jr.	400
Nora Robin, 2½ years old; James Moore, Philadelphia.	400
Rosie Le Page, 6 years old; Dr. Borland.	380
Rose of Ontario, 3 years old; Silas Betts, Camden, N. J.	350
Cow calf; A. M. Carr, Salem, Ohio.	105
Petite Toononi 2d, 2½ years old; L. Wister, Philadelphia.	310
Spotty, 6 years old; W. Shaw, New Britain, Mass.	725
Daisy Le Page, 4 years old; Mr. Biddle, Philadelphia.	290
Jenny Le Page, 3½ years old; Major Warner, Pomfret, Conn.	320
Rose Brouard, 2½ years old; Dr. Borland.	350
Snowdrop, 4½ years old; George Blight, Philadelphia.	360
Darkey, 6 years old; William B. Bullock, Philadelphia.	350

The two day's sale realized in all \$43,426, a sum that was considered low for such a number of fine stock.

SAN FRANCISCO, August 3, 1882.

EDITOR BREEDER AND SPORTSMAN: It may interest some readers to know that in the Yerba Buena herd of Jerseys and Guernseys is to be found some of the best blood known. "Fairy of Yerba Buena," a heifer, with her second calf, keeps up the reputation of her grandam, "Coomassie," and on the place are two of her heifer calves, sired by "Victor of Yerba Buena." They are handsome and very promising, and when we see that seven head of this blood sold lately in New York at an average of \$3,000 apiece, and "Formost Glory," the grandsire of "Fairy," sold for \$3,250, these animals may be considered valuable. "William of Situose" (grandson of "Jersey Bell of Situose," the cow that made twenty-five pounds of butter in a single week and was valued at \$30,000), which came from Boston last Spring by Wells, Fargo & Co., is doing finely. He is a beauty, and may get a prize in the show this Fall.

Some of the imported Guernsey heifers have come in, and make a showing that may dispute the prizes with the Jerseys at Sacramento in September.

The interest in these valuable animals seems to be growing. Sixty-two head of Jerseys just sold in Philadelphia at an average of \$457 58, and thirty-two head of Guernseys sold at \$355 31 per head, showing that the fools are not all dead, or these animals have value.

Truly yours, JERSEY AND GUERNSEY.

CATTLE BREEDING AND MARKETS.

John T. Raymond says: "Buy mules. There's millions in it!" Well, he is not far from right, provided you can raise enough of them. But we do say, and that with no proviso, that for a safe and profitable business, no better opportunity exists to-day than "cattle raising." What better encouragement do we want than to see our exceptionally slow and calculating cousins from the other side of the Atlantic coming over here and investing in the business? Not one nor two, but many. Single individuals and large corporations, equally as anxious to obtain the right place. Only a week or so ago the large cattle ranch at Merced, owned by the Nevada Bank, was sold to an English company for nine hundred thousand dollars, and last week the sale was completed of the Pablo Montoya Ranch in New Mexico to an English syndicate for one million five hundred thousand dollars. Here we have, in two purchases, the large sum of two million four hundred thousand invested by foreign companies, and had we knowledge of the many minor transactions, we would undoubtedly be surprised by the large amount of capital which they have invested in cattle and ranches on our continent. In a future number we shall have an interesting article on the "Increase and Profits" of a cattle ranch.

The conjectures regarding the Eastern demand on Nevada this Fall have been verified rather early, as two or three days ago twenty-two cars, equal to about four hundred head, were shipped from Iron Point, and we have also information as to a large herd of something over three thousand being delivered for Eastern account. The call for sheep in this State is also very strong, and high prices are being paid in the southern counties for large droves of ewes. We know of one drove of five thousand yearlings being sold in Ventura County, a short time since, at two dollars and a quarter (\$2 25) per head, to Montanamen, and it is said that the Texas buyers cannot be accommodated to the extent of their desires without paying a fancy price. This week we have little or no change to note in our weekly slaughter-house price list.

BEEF—Steers, extra prime, 8½¢; do. prime, 8¢; do. fair, 7¢ 7½¢. Cows, extra prime, 7½¢ 8¢; fair, 6¢ 7¢.

VEAL—Large, 6½¢ 7½¢; small, 8¢ 10¢.

MUTTON—Wethers, 4½¢ 5¢; ewes, 4¢ 4½¢.

PORK—Hogs, live, 7½¢ 8½¢ for hard; do. do. 7¢ 7½¢ for soft; do. dressed, 10½¢ 11¼¢ for hard; do. do. 9½¢ 10¼¢ for soft.

WOOL—San Joaquin and Southern Coast, free, 18¢ 29¢; do. do. burry and defective, 15¢ 18¢; Northern counties range from 20¢ 26¢; Oregon, 22¢ 27¢ for valley, and 20¢ 26¢ for Eastern.

MARKET REPORT.

FLOUR—The general demand is good. Best City Extra \$5.50 5.62½; Superfine, \$4.50 4.75; Interior Extra, \$4.75 5.25; Interior Superfine, \$3.75 4.00 per bbl.

WHEAT—The firmness of the British grain market has but little influence on the local situation. The sales on the Produce Exchange have been, No. 1 Sonora, August, Port Costa, \$1.71½; No. 1 white, September, \$1.72; for No. 1 October \$1.72½ was asked, \$1.73½ was asked; No. 2 August, \$1.66 asked, \$1.68 bid.

BARLEY—In the Produce Exchange the sales of Barley seem to be dragging of late. Spot lots of Feed are bought for \$1.23, but \$1.20 is the purchasing limit. But little attention is paid to Brewing and Chevalier.

OATS—The new crop coming in is being sold from \$1.75 1.85 per cwt.

FEED—Ground Barley sells at \$36 for old, \$31 for new, and \$34 per ton for mixed; Oatmeal Meal, \$32.50 per ton; Middlings sell in lots at mills for \$26.00 27.50 per ton; Shorts, \$16 17 per ton; Cornmeal, \$39 per ton. (FAY)—Wheat, \$14 15; Wild Oat, \$12 18; Alfalfa, \$11 13; Stable, \$10 12 per ton.

STRAW—Quoted at 70¢ 75¢ per bale.

BEANS—Bayos of the new crop are being brought into the market in small lots. We quote old Bayos, \$2.75 3¢; Butter, \$3.75 4¢ for small, and \$4.25 for large; Lima, \$4 4.50; Pea, \$4 4.25; Pink, \$2.60 to \$2.62½; Red, \$2.60 2.62½; small White, \$4 to \$4.24; large White, \$3.25 3.60 per cwt.

ONIONS—55¢ 60¢ for Reds, and 80¢ 81¢ for Silverskins by the cental.

POTATOES—Sweet are steady at 3½¢ per lb; Early Rose, in sacks, 60¢ 80¢; boxes, 80¢ 1.10 per cwt; Garnet Chili, 70¢ 85¢ per cwt.

POULTRY—All kinds of poultry are in good demand, especially young Roosters, which readily sell at \$6 50 8 00 per doz. Live Turkeys, gobblers, 17¢ 19¢; do. Hens, 15¢ 17¢; Roosters, \$5 50 7 00; Hens, \$6 75; Broilers, \$2 50 4 50, according to size; Ducks, \$3 50 5 00 per doz; Geese \$1 25 25 per pair; Goslings, \$1 25 50 per pair.

GAME—Is quoted at: Hare, \$1 75 2¢; Rabbits, \$1 25 25 per doz; Doves, 50¢ 75¢ per doz; Venison, 8¢ 12½¢ per pound.

PROVISIONS—Quite firm. Eastern Hams, 17½ 18½¢ 19¢ lb; California Hams, 15¢ 16¢ for plain, 16½ 17¢ for sugar cured and canvassed; Eastern Breakfast Bacon, 17¢ 18¢; California Smoked Bacon, \$16 16½¢ for heavy and medium and 17¢ 17½¢ for light and extra light; Clear sides, 16¢ 16½¢; Pork, \$21 21 50 for Extra Prime, \$24 25 for Prime Mess, \$25 25 50 1¢; Mess, \$26 for Clear and \$27 28 for Extra Clear; Pigs' Feet, \$16 18 19¢ lb; Mess Beef, \$14 for bbls and \$7 for hf bbls; Extra Mess Beef, \$14½ 15½; Family Beef, \$16 16½¢ 17¢ bbl.

EGGS—California Choice, 30¢ 32¢; Interior, 25¢ 27½¢; Eastern, 25¢ 27½¢ Western, 24¢ 26¢ 1¢ doz.

HONEY—Market is rather dull. Extracted sells at 7¢ 8¢ per lb. Comb 15¢ 17¢ per lb.

BUTTER—The choice lots are being sold at fancy prices and are quoted: Fancy 33¢ 35¢; choice 30¢ 32½¢ fair to good 27½ 29¢; mixed lots from country stores 23¢ 25¢; butters 25¢ 31¢ per lb.

CHEESE—Is in fair demand and is quoted: California, 13¢ 14¢ for choice; 11¢ 12¢ for fair to good; Eastern, 17¢ 18¢; Western, 11¢ 15¢ per lb.

HIDES AND SKINS—Steady and unchanged. Dealers are paying the following cash rates for lots in order: Dry Hides, usual selection, 19¢; culled, one third less, and Mexican Hides 1¢ per lb less; Dry Kip, 19¢; Dry Calf, 20¢; Salted Steers, over 55 lbs, 11¢ per lb; Steers and Cows, medium, 10¢; light do, 9¢; Salted Kip, 15 to 30 lbs, 10¢ to 10½¢; Salted Calf, 11¢ 12¢ per lb; Dry Calf 65¢ to 70¢ each; Sheep Skins, 20¢ 25¢ for Shearlings, 25¢ 50¢ for short, 60¢ 80¢ for medium, and 75¢ 81¢ apiece for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—In demand; quoted at 8¢ 8½¢ for rendered; for refined, 11¢ 11½¢; grease, 6¢ 6½¢ per lb.

WOOL—Moderate trade reported at current rates. We quote: Humboldt and Mendocino, 26¢ 27¢; Sonoma, 25¢ 26¢; Sacramento Valley, 22¢ 25¢; Sisikuiyoo and Modoc, 22¢ 25¢; Calaveras and Foothills, 20¢ 25¢; San Joaquin, free, 18¢ 19¢; San Joaquin, defective, 15¢ 18¢; Southern Coast, burry and seedy, 15¢ 18¢; Eastern Oregon, choice, 23¢ 24¢; Eastern Oregon, fair, 20¢ 23¢; Eastern Oregon, poor, no sale; Valley Oregon, fine, 25¢ 27¢; and Valley Oregon, coarse, 22¢ 24¢ per lb.

FRUIT—The market is well supplied, and the demand is fair. Cantaloupes and Watermelons are very abundant. The quotations are: Apples, 25¢ 50¢ per bskt and 50¢ 81¢ per box; Pears, 25¢ 50¢ per bskt and 50¢ 75¢ per box; Bartlett do, 50¢ 60¢ per bskt and \$1 30 1 75 per box; Nectarines, 46¢ 6¢ per lb; Strawberries, \$10 12; Raspberries, \$8 10 per cwt; Peaches, 35¢ 50¢ per bx and 40¢ 50¢ per bskt for common and 50¢ 65¢ for Crawford; Figs, \$1 25 1 50 per box; Grapes, 50¢ 75¢ for ordinary and \$1 17 75 per box for good to choice; Plums, 25¢ 75¢ per bx; Blackberries, \$4 65 50 per cwt; Apricots, 1½ 2¢ per lb; Watermelons, \$6 10 per hundred; Cantaloupes, \$1 50 2 25 per crate; Lemons, \$9 10 per bx for Sicily and \$2 50 for California; Limes, \$7 50 8 00 per bx for Mexican; Tamarinds, 12¢ 15¢ per lb; Bananas, \$2 50 4 00 per bunch; Pineapples, \$8 08 per dozen.

VEGETABLES—Prices show no marked variation. The market is well supplied. We quote: Marrowfat Squash, 8¢ 10¢ per ton; Artichokes, 25¢ 50¢ per sk; Parsnips, \$1; Beets, 75¢; Carrots, 50¢ 65¢; Turnips, 50¢ 65¢ per cwt; Cauliflower, 60¢ 75¢ per doz; Cabbage, 50¢ 60¢ per cwt; Garlic, 2¢ 3¢ per lb; Cucumbers, 25¢ 40¢ per bx; Green Pease, 1½ 2¢ per lb; Green Peppers, 50¢ 81¢ per sk; Tomatoes, 60¢ 81¢ per bx for Sicily and 25¢ per sk; Celery, 75¢ per doz; Summer Squash, 50¢ 75¢ per bx; String Beans, 2¢ 2½¢ per lb; Green Corn, 10¢ 15¢ per doz; Okra, 8¢ 10¢ per lb; Egg Plant, \$1 25 per box.

MEATS—Following are rates for whole carcasses from slaughterers to dealers:

BEEF—Prime, 7½ 8¢; medium grades, 6¢ to 6½¢; inferior, 5¢ 5½¢ per lb.

VEAL—Large Calves, 6½ 7¢; small one, 8¢ 10¢ per lb.

MUTTON—Wethers are quoted at 4½ 5¢, and Ewes at 4¢ 4½¢ per lb, according to quality.

LAMB—Quotable at 6¢ 7¢ per lb.

PORK—Live Hogs, 7½ 8½¢ for hard, and 6½¢ to 6¢ for soft; dressed do, 11¢ 11½¢ per lb for hard grain hogs.

Golden Gate Fair.

SPEED PROGRAMME FOR 1882

\$10,000

IN

Stakes and Prizes

FIRST DAY—MONDAY, SEPT. 4, 1882.

No. 1.—RUNNING—GOLDEN GATE STAKE.—For all two-year-olds; three-quarter mile dash; \$50 entrance; \$15 forfeit; \$150 added; second colt to save stake; winners 5 pounds extra.

No. 2.—SAME DAY.—RUNNING.—ALAMEDA STAKE.—For three-year-olds; one and one-half mile dash; \$75 entrance; \$25 forfeit; \$175 added; second to save stake.

No. 3.—SAME DAY.—RUNNING.—PARDEE STAKE.—Free for all; one mile and repeat; \$75 entrance; \$25 forfeit; \$200 added; second to save stake.

No. 4.—SAME DAY.—TROTTING.—2:40 Class; purse, \$600; first horse, \$360; second, \$180; third, \$90.

No. 5.—SAME DAY.—SPECIAL TROT AGAINST TIME.—\$150 in plate will be awarded any stallion that beats Santa Claus' time (2:17).

SECOND DAY—TUESDAY, SEPT. 5.

No. 6.—TROTTING.—2:30 Class; purse, \$800; first horse, \$480; second, \$240; third, \$90.

No. 7.—SAME DAY.—PACING.—Purse, \$500; first horse, \$300; second, \$150; third, \$50.

Washington and Johnny Wiegler, to wagon.

THIRD DAY—WEDNESDAY, SEPT. 6.

No. 8.—RUNNING.—Free for all; 2 mile dash; \$100 entrance; \$25 forfeit; \$250 added; second horse to save stake.

No. 9.—SAME DAY.—TROTTING.—Free for all three-year-olds; purse, \$600; first horse, \$360; second, \$180; third, \$90.

No. 10.—SAME DAY.—TROTTING.—2:22 Class; purse, \$800; first horse, \$480; second, \$240; third, \$90.

FOURTH DAY—THURSDAY, SEPT. 7.

No. 11.—TROTTING.—Free for all two-year-olds; one mile and repeat; purse, \$400; first horse, \$240; second, \$120; third, \$40.

No. 12.—SAME DAY.—TROTTING.—For all four-year-olds; purse, \$600; first horse, \$360; second, \$180; third, \$90.

No. 13.—SAME DAY.—TROTTING.—2:25 Class; purse, \$800; first horse, \$480; second, \$240; third, \$90.

No. 14.—SAME DAY.—SPECIAL TROT AGAINST TIME.—A purse of \$50 will be given the yearling making the best time; a full mile to harness; no entrance fee.

FIFTH DAY—FRIDAY, SEPT. 8.

No. 15.—RUNNING.—CONSOLATION PURSE.—\$250 for beaten horses; mile-and-a-quarter dash; second horse to receive \$75; 10 per cent. entrance.

No. 16.—SAME DAY.—LADIES' RIDING TOURNAMENT.—There will be several very choice and elegant prizes to be competed for, contributed by the merchants and citizens of Oakland and San Francisco; the lady winning first prize to have first choice, the second, second choice, and so on until all the prizes are distributed. Ladies wishing to compete for premiums will send their names to the President or Secretary on or before the first day of September, 1882, indorsed by at least two gentlemen of the Society. Conditions will be published in the daily papers.

No. 17.—SAME DAY.—SPECIAL TROT AGAINST TIME.—A purse of \$50 will be given the yearling making the best time; a full mile to harness; no entrance fee.

SIXTH DAY—SATURDAY, SEPT. 9.

No. 18.—COMPETITIVE CADET DRILL.—PRIZE, \$150 Gold Medal. Competition open to all educational institutions in the State.

No. 19.—SAME DAY.—COMPETITIVE MILITARY DRILL.—A prize of the value of \$250 will be offered by the Association to the best drilled Military Company in the State of California. Rules and conditions to be published hereafter. It is the intent of the Directors to have the first competing companies determine what the prize trophy shall be, and to have the same annually competed for, until it shall have been won three times by the same company, when it shall become the absolute property of the winning company.

No. 20.—SAME DAY.—GRAND BICYCLE TOURNAMENT.—For the Association's Gold Medal, no first, Silver Medal to second, and Bronze Medal to third; 1-mile dash; open to all bicyclists.

No. 21.—SAME DAY.—TROTTING.—Free for all; purse, \$800; first horse, \$480; second, \$240; third, \$90.

No. 22.—SAME DAY.—A SET OF HARNESS, of the value of \$125, will be offered for gentlemen's roadsters; best two in three; owners to drive.

By a "gentleman's roadster," is meant any animal owned and driven on the road by any gentleman for his own private pleasure.

CONDITIONS.

Entries to all running stakes, trotting and pacing races, to be made to Secretary Walker, on or before August 1, 1882. Forfeits in running stakes, and the entrance fee of 10 per cent. on the trotting and pacing races, should in all cases accompany the nominations and entries.

All the trotting and pacing races are the best three in five. In all, five to enter, and three to start.

Entrance fee, ten per cent. on purse.

When there are eight or more starters in a trotting race, 150 yards shall be a distance.

National Trotting Association rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

All offers in trotting races are confined to horses on the Pacific Coast May 22, 1882.

In running races, three or more entries required to fill.

Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous. No added money will be paid for a walk-over.

Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood Horse Association to govern running races, except as above specially provided.

All entries to be made in writing, to give sex, color and marks of horse; also, name and residence of owner; and in running races colors to be worn by the rider. And in all, any other particulars that will enable the spectators to distinguish the horses in the race.

Write "Entries to Races" on outside of envelope.

L. WALKER, Secretary.

A. C. DIETZ, President.

\$12,500 In Purses and Stakes.

CALIFORNIA STATE FAIR

SPEED PROGRAMME

FOR 1882.

FIRST DAY—MONDAY, SEPT. 11.

No. 1.—RUNNING.—INTRODUCTION STAKE.—For all ages; three-quarters of a mile dash; \$50 entrance; \$15 forfeit; \$250 added; second to save stake.

No. 2.—RUNNING.—BREEDERS' STAKE.—For foals of 1879; one and a half miles dash; \$50 entrance, p. p.; \$300 added. Closed March 1st with nineteen nominations.

No. 3.—RUNNING.—SELLING RACE.—Purse, \$250. Free for all; one mile and repeat; second horse to receive \$75. Entrance five per cent. to third horse. Horses entered to be sold for \$1,500 to carry entitled weight, one pound off for each \$100 under fixed valuation.

No. 4.—TROTTING.—2:40 class; purse, \$1,000.

SECOND DAY—TUESDAY, SEPT. 12.

No. 5.—TROTTING.—2:25 class; purse, \$1,200.

No. 6.—TROTTING.—Purse, \$600; for three year olds and under.

No. 7.—TROTTING.—Purse, \$500; mile heats for two year olds.

THIRD DAY—WEDNESDAY, SEPT. 13.

No. 8.—RUNNING.—FILLY STAKE FOR TWO YEAR OLD FILLIES.—Five eighths of a mile; \$50 entrance; \$15 forfeit; \$200 added; second to receive \$75; third, \$25.

No. 9.—RUNNING.—CALIFORNIA DERBY STAKE.—For three-year-olds; one and one-half mile dash; \$100 entrance; \$25 forfeit; \$250 added; second horse, \$100; third, \$50.

No. 10.—RUNNING.—JENNIE B. STAKE.—For all aged; dash of one mile; \$50 entrance, \$15 forfeit; \$200 added; second horse, \$75; third, \$25. Stake to be named after winner, if Jennie B.'s time—1:42—is beaten.

No. 11.—RUNNING.—SELLING RACE.—Purse, \$250; one and one-eighth miles; second horse, \$100; entrance, five per cent. to third horse. Horses entered to be sold for \$1,000 to carry entitled weight. Two pounds off for each \$100 under fixed valuation.

No. 12.—TROTTING.—2:30 class; purse, \$1,200.

FOURTH DAY—THURSDAY, SEPT. 14.

No. 13.—TROTTING.—2:22 class; purse, \$1,200.

No. 14.—PACING.—2:25 class; purse, \$500.

No. 15.—TROTTING.—Two miles and repeat; 2:40 horses; purse, \$800.

FIFTH DAY—FRIDAY, SEPT. 15.

No. 16.—RUNNING.—COLT AND FILLY STAKE.—For two year olds; dash of one mile; \$50 entrance, \$15 forfeit; \$200 added; second horse, \$50; third, \$25.

No. 17.—RUNNING.—SELLING RACE.—Purse, \$300; for all aged; dash of one and a quarter miles; \$100 to second horse; entrance, five per cent. to third; horses entered to be sold for \$1,500, carry full weight; for \$1,200, three pounds off; for \$1,000, five pounds off; for \$750, seven pounds off; for \$500, ten pounds off.

No. 18.—RUNNING.—POST STAKE.—Dash of three miles; free for all; \$100 entrance; \$500 added; weight 100 pounds; three-year-olds, 90 pounds; second horse to receive \$150; third, \$100. Starters to be named to the Secretary Wednesday evening, at or before 5 o'clock P. M.

No. 19.—RUNNING.—CONSOLATION PURSE.—\$250 for beaten horses; one mile and repeat; entrance free; second horse to receive \$50.

SIXTH DAY—SATURDAY, SEPT. 16.

No. 20.—TROTTING.—2:19 class; purse, \$1,200.

No. 21.—TROTTING.—Purse, \$800; for double teams of 2:30 horses.

No. 22.—TROTTING.—OCCIDENT STAKE FOR 1882, closed in 1881 with twelve nominations.

No. 23.—SPECIAL TROT AGAINST TIME.—\$250 in plate will be awarded to any stallion that beats Santa Claus' time (2:17).

Entries for the following events for 1884 were ordered to be closed with the above races:

No. 1.—RUNNING.—CALIFORNIA DERBY STAKE, for foals of 1880, to be run at the State Fair of 1883. One and one-half miles dash; \$50 entrance, p. p.; \$300 added; second horse, \$100; third, \$50.

No. 2.—Same stake, for foals of 1881, to be run at State Fair of 1884. Same conditions.

No. 3.—RUNNING.—MATURITY STAKE.—Three-mile dash, for four-year-olds, in 1883; \$100 entrance; \$25 forfeit; \$500 added; second horse, \$150; third horse, \$100. To be run at the State Fair of 1883.

No. 4.—RUNNING.—CALIFORNIA ANNUAL STAKE.—For two-year-olds, foals of 1881. Dash of one mile; \$100 entrance; \$250 forfeit; \$250 added; second horse, \$100; third, \$50. To be run at the Fair of 1883.

REMARKS and CONDITIONS.

All trotting and pacing races are the best three in five, except the two year old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.

Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous, by twelve o'clock M. This rule is obvious, and must be strictly adhered to.

No added money paid for a walk-over.

Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries to be made in writing, giving name, sex, color, and marks of horse; also, name and residence of owner. In running races, full colors to be worn by rider; and drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers. This is necessary to enable spectators to distinguish the horses in the race.

Entries to all the above races to close with the Secretary on Tuesday, August 1, 1882.

Write "Entries to Races" on outside of envelope.

EDWIN F. SMITH, Secretary.

HUGH M. LARUE, President.

SPEED PROGRAMME.

\$13,000 Gold Coin IN PURSES.

The Largest Purses Offered in the State.

STOCKTON,

Sept. 19th to 23d inclusive, 1882.

TUESDAY, SEPT. 19TH.

No. 1.—DISTRICT—RUNNING.—For two-year-olds; purse \$400; mile dash; 5 to enter, 3 to start. Four moneys.

No. 2.—DISTRICT TROT—For yearlings; purse \$300; mile dash; 5 to enter, 3 to start. Four moneys.

No. 3.—PACIFIC COAST TROT—2:36 Class; purse \$1,000, and \$200 added if more than ten entries. Four moneys.

WEDNESDAY, SEPT. 20TH.

No. 4.—PACIFIC COAST NOVELTY RUNNING.—2 1/2 mile dash, purse \$600. The first horse to each half mile to win \$100, and the horse first to two and one-half mile posts to win \$50 each extra; \$200 additional will be added to the purse, pro rata, if more than ten entries.

No. 5.—DISTRICT RUNNING.—For three-year-olds; purse \$800. Closed with six entries.

No. 6.—PACIFIC COAST TROT—2:25 Class; purse \$1,000, and \$200 added if more than ten entries. Four moneys.

No. 7.—DISTRICT—TROT—For named horses; purse \$500; 7 to enter, 4 to start. This race is intended for horses that can trot in three minutes or a little better. Four moneys.

THURSDAY, SEPT. 21ST.

No. 8.—PACIFIC COAST RUNNING.—Mile and repeat; purse \$500, and if 1:43 is beaten, the horse making the low record will receive \$200 additional. Four moneys.

No. 9.—DISTRICT—TROT—For two-year-olds; purse \$800. Closed with ten entries.

Ladies' Equestrianism.

FOUR PRIZES IN GOLD COIN. \$40, \$30, \$20, \$10.

No. 10.—DISTRICT—TROT—2:38 Class; purse \$800; 7 to enter, 4 to start. Four moneys.

FRIDAY, SEPT. 22D.

No. 11.—PACIFIC COAST RUNNING.—Free for all; two miles and repeat; purse \$400, and \$200 added if more than ten entries. Four moneys.

No. 12.—DISTRICT RUNNING.—For three-year-olds and over; purse \$500; best two in three; 7 to enter, 4 to start. Four moneys.

No. 13.—PACIFIC COAST TROT—For horses owned on the Pacific Coast, July 1st, 1882; 2:22 Class; purse \$1,500, and \$500 added if more than ten subscribers. The nominator not required to name his horse, but simply send his cash (\$150) with his own name, August 1, 1882. He has then earned the right to start any horse eligible that he may fully control, provided the horse he starts be named to the Secretary, September 1, 1882. Four moneys.

SATURDAY, SEPT. 23D.

No. 14.—PACIFIC COAST TROT—2:28 Class; purse \$1,000, and \$200 added if more than ten entries. Four moneys.

No. 15.—PACIFIC COAST PACING.—2:25 Class; purse \$400, and \$200 added if more than ten entries. Four moneys.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.

In all these Races (Pacific Coast Novelty Race excepted) FOUR moneys, 50 25, 15 and 10 per cent. of purse. Entrance fee, 10 per cent. of purse, and must accompany the nomination.

District Races to close with the Secretary at 5 o'clock P. M. of July 15, 1882. Pacific Coast Races to close with the Secretary August 1, 1882.

When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.

Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.

All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above, other than old weights to govern.

For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when displacing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.

Horses entered in purses can only be drawn by consent of the Judges.

The Board reserves the right to change the day and hour of any race, if they deem it necessary.

Unless otherwise ordered by the Board, no horse shall be qualified to enter in any District Race that has not been qualified in the District six (6) months prior to the day of the race; and any entry by any person of any horse so disqualified shall be held liable for the entrance fee so contracted without any right to compete, and the same shall be held liable to penalties prescribed by the Rules of the National Trotting Association and expulsion from this Association.

Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as especially provided.

In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.

In all the Coast Races noted above, SIX ENTRIES are required to fill, and three horses to start; but the Board RESERVE THE RIGHT TO CLOSE ANY RACE WITH A LESS NUMBER.

Races to commence each day at 1 o'clock P. M. sharp.

The track is first-class, having been improved. Stables, hay and straw free to competitors.

ENTRIES.

1st. Entries must be made in writing and dated.

2nd. State number of the race in which you wish to enter.

3rd. State COLOR of horse, and marks if necessary.

4th. State whether the horse is a STALLION, MARE or GELDING.

5th. State NAME OF SIRE AND DAM if known; if unknown, state the fact in the entry.

6th. State NAME and P. O. ADDRESS of the owner of the horse entered.

7th. Sign with P. O. address of the party entering the horse.

8th. If the name has been changed, give former name.

9th. Repeat by mail, all entries made by telegraph.

Agricultural District No. 2, California, comprises the Counties of San Joaquin, Calaveras, Tuolumne, Stanislaus, Mariposa, Merced, Fresno, Tulare, and Kern.

L. U. SHIPPEE, President.

J. L. PHELPS, Secretary.

P. O. Box 133, Stockton, Cal.

SECOND

ANNUAL EXHIBITION

OF THE

SAN MATEO AND SANTA

CLARA COUNTY

AGRICULTURAL ASSOCIATION

NO. 5,

TO BE HELD AT

SAN JOSE, CAL.,

FROM

Sept. 25th to 30th, '82, inclusive

SPEED PROGRAMME.

FIRST DAY Monday, Sept. 25th, 1882.

No. 1. TROT—2:40 class. Purse, \$500.

No. 2. SAME DAY—TROT—2:25 class. Purse, \$750.

SECOND DAY—Tuesday, Sept. 26th.

No. 3. RUNNING.—For two year olds; three-quarter mile dash; \$50 entrance; \$15 forfeit; \$150 added. Second horse to receive his entrance and one-third of added money.

No. 4. SAME DAY—RUNNING.—For all ages; mile dash; \$50 entrance; \$15 forfeit; \$125 added. Second horse to receive his entrance and one-third of added money.

No. 5. SAME DAY—RUNNING.—Selling Race.—Purse, \$200; mile and repeat. Second horse \$75. Entrance five per cent. to third horse. Horses entered to be sold for \$1,000 to carry entitled weight. Two pounds off for each \$100 under fixed valuation. Winner can be claimed by any one.

THIRD DAY—Wednesday, Sept. 27th.

No. 6. TROT—2:30 class. Purse, \$400.

No. 7.

BREEDER AND SPORTSMAN

VOL 1—No. 7.
No. 508 MONTGOMERY STREET

SAN FRANCISCO, SATURDAY, AUGUST 12, 1882.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

NOTABLE HORSES OF CALIFORNIA.

WILDFLOWER.

2:21!!!

FOALED 1879, BY ELECTIONEER, HER DAM MAYFLOWER BY ST. CLAIR.

2:21!!!

We are much pleased to be able to present to our readers an accurate representation of the animal which has probably elicited more remarks than any other horse bred in California. From the trotting view point there is no doubt of her being entitled to the precedence, unless Hinda Rose be granted the first place, for, although 2:36½ in yearling form leaves a greater gap between that and the second in the record, 2:21 for two-year-old is so close to the fast of any age, that three and a quarter seconds may be accorded as much weight as when the difference is between 2:36½ and 2:44½. It would be mere guess work, a difference of opinion which can only be determined in the future, which is the most creditable, and speculations regarding the hereafter are not necessary in this connection. The portrait and accompanying description of Electioneer, which was published a few weeks ago, is sufficient in relation to the paternal side of the house, and as her races were also given

there is also no necessity for repetition. On the maternal side, however, nothing has yet been written in the history of the "notables," excepting the casual mention of the "happy nick" in the combination of Electioneer and St. Clair blood. Among the old-time horses of California two, in our opinion, are entitled to the highest distinction, the couple being Belmont, whose genealogy is well known, and St. Clair, the pedigree of which is sealed so completely that conjecture is the only guide. There are physical laws which give a clue to relationship, and men of science can tell from a few of the bones of a skeleton the class to which the animal belonged. There are peculiarities in animal and plant life determining the family to which they are allied, and in all the varieties of horses there are striking features enabling the acute observer to give a shrewd guess regarding their origin. As St. Clair had a highbred appearance, as his descendants exhibit the same quality

through successive generations, the logical presumption is that he was strongly imbued with the blood of the thoroughbred. At all events, no one of any candor can deny what the records show, and that in the first and second removes from the founder of the family there have been distinguished performers. A few illustrations will suffice to prove the tenability of this position. In writing that the name of Wildflower was better known throughout the civilized world than any other California-bred horse is owing to the greater interest which is taken in the sports of the track than was the case ten years ago. At the latter mentioned date there was nothing like the general interest that is now exhibited. Comparatively little attention was given to trotting in the press of the country, outside of the journals that made a special feature of racing and trotting, paragraphs being held sufficient where columns are now awarded. Yet one of the sensations of the day was the

trotting of Occident, and, before he had been awarded a distinctive appellation, the "California Wonder" was the text for many articles. That he was worthy of the renown we firmly believe, and we have also implicit faith that, under more fortunate circumstances, he would have taken a place in the calendar that might still be at the top. As it was, he had the "fastest time" of the day, and this is no small honor. Though, when it was done, 2:16 $\frac{3}{4}$, ranked the best on record, in the opinion of his owner and those who had the same opportunity to know what he could do, it was a long way beneath his rate, and the flight of speed in his brushes was a token that several seconds were lost through the turn of bad luck which persistently pursued him. He has been timed quarters faster than thirty seconds, and such speedy pacers as Billy Mayo and Dan Voorhees could not stay with him for a hundred yards. It is too long a story to rehearse in these outline sketches, and to give our readers his history from colthood will require more space than can be allotted at present. From the time he was broken until purchased, on account of his trotting capacity, there was scarcely a day when he escaped ill-usage, and, in fact, the treatment he received in his early life could better be termed brutality. Compelled to draw loads far beyond the powers of most horses of his size, flogged, starved, etc., until his temper was soured, and yet the hauling of loads of sand for months at a stretch had not stiffened his joints or taken the elasticity from his muscles.

When showing the great rate of speed he had a stride of over twenty feet, and we draw our information from a source which is eminently trustworthy, that at times he would cover twenty-four feet. In his later races, owing to his feet being injured, he fell back to eighteen and nineteen feet, without a corresponding quickening of action.

The name of Occident, however, is familiar to a great majority of those who know anything of trotting affairs, though comparatively few have any knowledge of other St. Clairs, which are well worthy of a place in horse history.

Mayflower, the dam of Wildflower, was one of the notabilities of the St. Clair clan. She is a small mare or rather on the long and low order in her formation, and like nearly all of the St. Clairs we have seen, showing a great deal of quality. Very unfortunately for this little mare she was tutored when there was the slightest knowledge among the professors as to the methods which should be employed to correct errors in the action. The boots of the period were clumsy contrivances, illy adapted for the purpose, worse even than the primitive guards of bandages and sheepskin which the old old-time trainers used. The softer material did not afford the necessary protection from hard blows, but they soon became shaped to the parts and did not interfere with the movements of the joints and play of the tendons, which the more obdurate material impeded, and the abrasions, chafings, etc., were as bad as the wounds. At that time the problem of weight on the feet and its effect on the action was a maze to those who had given it study; to those who had not pondered over the intricacies attending the use it was inscrutable. Men reasoned that if a moderately heavy shoe was found to be advantageous a still heavier would be better. Weight was applied in a loaded quarter-boot or in rolls filled with shot buckled around the pastern. The first was bad enough, the second infinitely worse. In accordance with the general belief of the period Mayflower was shod with shoes weighing two pounds each on her fore feet, and these were supplemented by rolls of shot, each foot carrying two added pounds. Four pounds on each fore foot! and with all this hindrance to speed she obtained a record of 2:30 $\frac{1}{2}$, and showed quarters in 34 seconds. There is not an intelligent trainer who will deny that to keep up a rate which would compass a mile in 2:30 $\frac{1}{2}$, thus encumbered, was a wonderful performance, and that under a system which would have the same effect in controlling the action, and at the same time reduce the weight of shoe and appendages to from 12 to 18 ounces, the animal showing such a rate would trot fully fifteen seconds faster. This is somewhat hypothetical, however, and yet it has a great bearing in arriving at a just conclusion regarding the merits of the animal. Mayflower made the record of 2:30 $\frac{1}{2}$ at Sacramento, May 7th, 1872. It was for a purse of \$1,500, 2:34 class, and there started against her Mattie Howard and Hiram Woodruff. Mayflower won in "straight heats," the time of which was 2:39, 2:35, 2:30 $\frac{1}{2}$. The year previous she trotted several races, but only one in 1873, and we suppose the heavy weights had done the job.

There is another St. Clair mare which is entitled to very nearly the same place as Mayflower; by the record, she takes precedence of her. This was the mate of Mayflower, very much of the same style of an animal, and the only difference in the name is that she is called Mayfly. She is the dam of Bonita, who takes the second place in the record for two-year-olds, and there are those who regard her as the fastest of the two. Mayfly trotted on the same track three days after the race of Mayflower, and emulating her half-sister, she also won in straight heats, beating Hiram Woodruff and Jerome in 2:32, 2:30 $\frac{1}{2}$, 2:30 $\frac{1}{2}$.

When to these illustrations of the value of the St. Clair blood are added the performances of Lady St. Clair, Ben Butler, Pat Hunt, Fred Low, Clay, Captain Smith, etc., the efficacy must be acknowledged, but the history of this noted California family will come more appropriately at a season when there is more leisure.

It is almost supererogatory to add a written description, the pictorial being so perfect, other than to say that she is a very handsome shade of bay. She has grown a great deal since she made her memorable trot, both in height and length. The most striking point, or rather points, is the immense sweep from the whirlbone to the stifle, and from the stifle to the hock. The great length of the tibia throws the hock back, for the femur being also long, the stifle is "well let down," and the angles are such as to give the fullest scope to the play of the limb. Though very finely formed all over, we deem this the important part of her configuration, enabling her to cover the most ground in the stride with the least exertion.

HIRAM HAPPY'S LETTER FROM THE CITY OF MONUMENTS.

BALTIMORE, Md., July 31, 1882.

EDITOR BREEDER AND SPORTSMAN: Judging from what I have heard here and elsewhere the high expectations which lovers of stock and sport entertained respecting the BREEDER AND SPORTSMAN have been fully realized by a perusal of the initial numbers. The style of the paper, the quality and variety of its contents, its general make up, give very good satisfaction. The *Morning Herald*, of this city, which has recently made rapid strides towards a place in the foremost ranks of Baltimore journalism, paid a handsome and well merited tribute to its distant contemporary.

From extended personal observation I can say that there is certainly no State in the Union, there is no section of country which can compare with the Pacific Coast in point of natural advantages for stock raising and as a place for the enjoyment, all the year round, of outdoor sports and pastimes of every kind. Not only to the horseman and breeder, but to the hunter and fisherman, to the seeker of recreation, health and, I may say, wealth, the State of California presents inducements which I know are not possessed by any other State. As these facts are daily becoming more known and recognized in the East, I can see for the BREEDER AND SPORTSMAN a most promising future—substantial success, coupled with an enviable position and a national reputation. And I trust that when it shall again be my pleasure to take advantage of the excellent advice tendered by the late philosopher of the *New York Tribune*, and "Go West," I may learn that my hopes and wishes are being realized by you.

By the residents of other large cities Baltimore is very generally voted *slow* in more respects than one. This applies among other things to our trotting and breeding interests, and is, no doubt, merited with but one or two conspicuous exceptions, so far as breeding is concerned, to which I will refer in this letter. While this city is possessed of decided advantages as a place of residence and business, among which may be mentioned its usual mild winters, clear sunny atmosphere, fine markets and its importance as one of the great railroad and shipping centers, the hot summer, cobble stone paved streets, open sewers and hard, stony, dusty, hilly roads in the suburbs prevent the Monumental City from being set down as a paradise for the enjoyment of fine horses. And while it can boast of what is unquestionably the finest park (Druid Hill) in the country, there are fewer elegant family equipages to be seen there, and one meets fewer gentlemen of fine turnouts and trotters on the road, and more lamentable exhibitions of horsemanship than any other city of its size in America. Whether this scarcity of well equipped turnouts is due to the reasons above given, or to the tastes of the people—to their economical home habits of living—I will not attempt to say, but the fact no doubt remains that as a whole our horsemanship is below the average. Again, the only trotting race course we have is "several miles away from nowhere," and unfortunately for it and for the public, the same has long been regarded by respectable horsemen as decidedly peculiar "for ways that are dark," as was Bret Harte's famous Heathen Chinee. The mystery which still shrouds the identity of the individual who committed an assault upon William Patterson, Esquire, is not greater than that which characterized some of the by-gone struggles on the aforesaid track. While the trotting interests are suffering severely, the running races which take place at the regular Spring and Fall meeting of the Maryland Jockey Club at Pimlico have of late years been quite successful and enjoyed the patronage of our better class.

In this connection simple justice demands a tribute to an organization to which Baltimoreans are at present largely indebted for their enjoyment of outdoor sport. I approach this subject with feelings of the profoundest variety. Cities like Pittsburgh, Cleveland and Buffalo may have their trotting clubs; but what place can boast of a base ball organization like Baltimore? The pride of our people! The glory of our city! The heroes of many well earned defeats! And while the residents of the other cities named are enjoying the dying echoes of the trotters' musical footsteps at eventide (patent applied for), our inhabitants are sipping fishy water on their marble dooresteps and discussing the distant possibility of our base ball club winning a first-class game before the leaves begin to turn. To see those nine artists vainly struggling with some small-sized enemy, and submit to the whitewashing process, would impart grace and flexibility to the intellect of an Oregon hackman. While "our boys" may be very clever young men on general principles; while, with proper "handling," they might even make first-class hands in a corn field, when it comes to playing base ball, I have in my mind a lot of trained horses which I saw in California, and which could—but no, I shall not be guilty of so unjust a reflection upon the stock of your glorious country.

This being the City of Monuments, the propriety of erecting, at the close of the current season, a suitable memorial to commemorate the glory of our base ball club has been agitated by a number of our public-spirited men. The *Herald* is to be custodian of the fund to be raised for this purpose, and the people will doubtless respond nobly. The proposed monument is to have for its base a huge ball, constructed of petrified *whiteash*, upon which is to be placed a miniature freight car filled with imitation goose eggs made of plaster of Paris and bats (brick-bats). This beautiful design and sentiment, emblematic, as it were, of our boys' record, was suggested by a young lady from Boston, who was recently induced to witness a game of ball here, but who desires her name withheld on account of respectable connections.

To return to the equine race. The most extensive horse-breeding farm in this section is Montebello, the magnificent suburban home of Mr. John W. Garrett, President of the

Baltimore and Ohio Railroad. Most charmingly situated on high, rolling ground, commanding a splendid view of the city, the Chesapeake Bay and Fort Carroll, Montebello, with its 2,000 acres of choice meadows, forests, groves, and farming lands, its stock, stables, race track, and general improvements, is no doubt one of the grandest homes in America.

While enjoying a visit to Palo Alto some time ago, through the kindness of the editor of the BREEDER AND SPORTSMAN, I was forcibly reminded of the apparent similarity in the lives and tastes of the proprietor of that grandly appointed and stocked establishment and the owner of Montebello. Each of these gentlemen has long occupied the exalted position of chief executive of one of the great railroads of the world; each enjoys the reputation, at home and abroad, of having contributed more to the growth and prosperity of his own city and State than any other individual; and each is an ardent lover and extensive breeder of the horse. As with ex-Governor Stanford, the horse interests of Mr. Garrett are purely a matter of enjoyment and pride, a labor of love. The Arab steed has ever been an especial favorite with Mr. G., and Montebello can no doubt boast of the finest specimens of Arabian horses in this country. The beauty of outline, graceful carriage and elastic movements of these animals certainly appeal most powerfully to the eye and taste of every visitor. Among the more noted produce of the pure Arabian mare Esnea, a fine light bay, with white face and three white feet, imported from Damascus, Syria, by the late William McDonald, of this city, for a long time owner of Flora Temple, deserves particular mention. Two of her sons, Saladin, a magnificent bay stallion, by Daniel the Prophet; and Damascus, a highly finished, royally crested chestnut, are among the chief attractions at Montebello; as is also her daughter, the bay mare Zoe, by imp. Bonnie Scotland. Admiack, a beautiful, substantial silver grey stallion, 15 $\frac{1}{2}$ bands high, by Burlington, out of the imported Arabian mare Saieda (dead), is frequently used by Mr. Garrett as a pole horse, and although twenty years of age, he carries himself like a four-year-old.

But the glory of Montebello, the most brilliant star among its two hundred and odd horses, is Maryland Volunteer, another worthy son of the world-renowned sire of the king of the turf, St. Julien. This horse was purchased by Mr. Garrett about two years ago, and the splendid lot of yearlings of his get now at the farm would be a credit to any stock horse in the country. The dam of Maryland Volunteer was the phenomenal mare Jennie, by Red Eagle, with a record of 2:22 and private trial of 2:16 to her credit.

The subject of our sketch is in color a very rich brown bay, with black points, full 16 $\frac{1}{2}$ hands high, seven years old. He is a well finished, powerful horse, evenly balanced, and possessing a pure, bold, open gait. These qualities, together with his charming disposition, he seems to transmit to his offspring. The horse's speed was never developed, but he can readily trot a mile in better than 2:40, and he does this of his own will, without urging and without boots or weights. Mr. Garrett has permitted the service of this grand stallion to a limited number of outside stock, greatly to the improvement of the breeding of this section.

Among the brood mares at Montebello, the following attract me as being entitled to special reference, by reason of their choice breeding, fine color, color and form. A number of these were purchased of Col. R. P. Pepper, proprietor of the South Elkhorn farm in Kentucky, and they are certainly worthy representatives of the famous blue grass regions:

Enchire, b. m., 16 $\frac{1}{4}$ hands, foaled 1875, by Ericsson (four-year-old record, fourth heat, 2:30 $\frac{1}{2}$), dam Cachuca, by Almont.

Rachel, b. m., 16 $\frac{1}{4}$ hands, foaled 1874, by Almont; dam by Gray's Mambrino, son of Mambrino Chief.

Winetta, b. m., 16 hands, foaled 1875, by Administrator; dam by Iron Duke, son of Cassius M. Clay.

Mambrina, br. m., foaled 1874, by Iothair, son of Woodford Mambrino (2:19); dam fast pacing mare, by Jeff Davis.

Canton, b. m., foaled 1875, by Alcadne (sire of Enigma, 2:26, Hylas 2:24 $\frac{1}{2}$), son of Mambrino Chief; dam by Lever, son of Lexington.

Flirt, b. m., sired by Abdallah Prince, by Voorhees Abdallah; dam by Black Bashaw.

Beulah, blk. m., foaled 1865, sired by Royal George; dam by Seely's American Star.

Blue Grass, b. m., by Blue Grass, by Rysdyk's Hambletonian; dam by Hunter's Glencoe, Jr., by imp. Glencoe.

With such "blood," backed by the opportunities and means which Mr. Garrett possesses, Montebello will, no doubt, very soon rank among the great breeding establishments of the land.

Meadow View Farm, the charming home of Mr. H. B. Holton, near Powhatan, Maryland, about six miles west of Baltimore, is another place where the horse has not been neglected. Orange Blossom (2:26 $\frac{1}{2}$) the great son of Midletown, and Meadow Chief, by Hamlet, are owned here, and their get are showing up remarkably well. It is greatly regretted by our horsemen that Mr. Holton's business matters preclude his bestowing upon the breeding interests that active attention which his tastes, judgment and ample means would under other circumstances prompt him to give.

The fleet little chestnut stallion, Hannis, by Mambrino Pilot, who a few years ago advanced so rapidly towards the place of a world-beater, is also owned in this city. He has been retired from the turf and is doing stud service.

So much for the horse in "My Maryland." At some future day it will afford me pleasure to give your readers an account of our "canvas-backs, terrapin and oysters," in which three luxuries we are as far ahead of the rest of the world as we are behind in horse and sporting matters.

HIRAM HAPPY.

We have received the first number of the BREEDER AND SPORTSMAN, published at San Francisco, and edited by Mr. J. C. Simpson, and it presents a fine appearance. It is the kind of a paper which has long been needed on the Pacific Coast, and it is to be hoped that it will meet with generous support. Its discussion of breeding topics will rouse interest in that subject and add to the value of the products of breeding farms, and its treatment of the turf will swell the receipts of racing parks. The journal, which is devoted to breeding and sport, and which is conducted with enterprise and ability, frequently puts more money into other people's pockets than its own, but we cannot believe that each will be the result of Mr. Simpson's venture. If the breeder and track managers of the Pacific Coast do not sustain him, they will not deserve to reap the benefits which will grow under the fostering care of a vigorous home organ. Turf, Field and Farm.

THE PADDOCK.

MILLIMAN'S BELLFOUNDER.

We were much pleased to find the following in the *Oregonian* of the 30th ult. There is no mistaking the authorship, and handiwork of our old friend, Tom Merry, was evident before the first paragraph was read. The blood of Bellfounder is quite prominent on the Pacific Coast, and the short history will be interesting to many in California. Four of his get in the 2:30 list, with the limited opportunities he was awarded is a very good showing, and from what we hear the progeny of his son Gus, is likely to add to the reputation of the family.

In the Summer of 1855 Alexander Gamble of Menlo Park, California, who had accumulated considerable money in mining enterprises in Nevada, commissioned his brother, residing in the East, to buy him a trotting stallion, with a record better than 2:40. Gamble had the celebrated gray pacing mare Unknown, which had beaten Fillmore, Honest Anee and a number of others at heats of two and three miles, and into this new horse he was putting the profits of her victories. The horse arrived in California in good season and in excellent health. He was not very large, but highly formed and possessed of quick and spirited action. He was a rich rosewood bay, with black points and a fine mane and tail. He had a rather large head, but it was clean and bony, with a great breadth between the eyes, indicating the highest order of gameness and ability to "go the pace and stay the distance." Milliman's Bellfounder, as this horse will henceforth be known in the history of the trotting turf, was by Bellfounder, out of a daughter of Engineer, grandam by Bishop's Hambletonian, he by imported Messenger out of Pheasant by Shark, son of Medley. His sire, Bellfounder, was by the Morse Horse, he by European out of a daughter of Harris' Hambletonian, grandam Mozza by Peacock, son of Messenger. The horse was strongly inbred to Messenger, the very head and front of American trotting blood. Soon after his arrival in California Bellfounder was matched for \$2,500 a side, half forfeit, to trot against Robert F. Morrow's brown stallion Latham, already having a record of 2:33. The race was to come off in August, at Sacramento, and Bellfounder placed in charge of George N. Ferguson, a reputable and skillful driver, who has since become wealthy and retired from the turf. Whether it was that he got too lame, or that he did not show a satisfactory trial, we have never known; but he was taken back to Mr. Gamble's farm and kept there until the great smash up of the mining stock market in 1867. This bankrupted Mr. Gamble, who caused all his horses to be sold at auction during the Summer. A merchant bought Bellfounder, but the old horse had become irritable and he soon parted with him for \$800 to William Bigham, then of Rock Creek, Oregon, but now residing at or near Spokane Falls. Bigham took Bellfounder out into the wilderness of bunch grass, and there it was that he sired the gelding Mark Twain, which was afterwards sold to Rockwell, the trainer, and drowned on the steamer Pacific, wrecked off Cape Flattery in 1875. Previous to his coming to Oregon he got the stallion Gus., with a record of 2:26 1/2. Dr. C. H. Mack of Walla Walla, subsequently purchased the horse from Mr. Bigham for \$1,000, and while the doctor himself never reaped any great amount of pecuniary gain from the purchase, the county of Walla Walla probably gained at least \$150,000 by his removal thither. The first of his get showed well and sold for good prices. Bellfounder, bred by William Glassford, was sold for \$5,000 to Col. Eyre of San Francisco, and Startle, a younger brother, is now the property of the Robertson brothers of this city. We append the records of the most noted ones:

NAME.	OWNER.	RECORD.
Gus	M. Mooney.	2:26 1/2
Dexter	V. B. DeLashmutt.	2:26 1/2
Belteflower	E. E. Eyre.	2:29
Sweet Home	H. S. Hogoboom.	2:30
Goldfoot	William Glassford.	2:32 1/2
Startle	Robertson Bros.	2:33 1/2
Belle Foster	Jas. W. Foster.	2:34 1/2
Walla Walla Maid	H. S. Hogoboom.	2:35 1/2
Billy Nelson	H. Nelson.	2:35 1/2
Susy Mack	Dr. C. H. Mack.	2:37
Tempest	Chas. H. Russell.	2:39

ANOTHER ALMONT.

We hear of still another Almont on the coast. Alwood is owned by Dr. Mack of Oregon, and the appended description is given by Tom Merry in the *Oregonian*:

Before us stands a mighty looking horse, about sixteen hands and two inches high. In 1878 he became blind through epizooty, and the following year he came to Washington Territory. He resembles the pictures of Alexander's Abdallah (sire of Goldsmith Maid) more than any other of his ancestors, though a larger horse. His neck is a trifle short and his nose Roman, showing the Mambrino Chief characteristics very plainly in this respect. His shoulders are very oblique, raking well into a good back piece, and his chest is fairly enormous. The loins area finely but the hips droop considerably. Yet in this respect he resembles both Almont and Alexander's Abdallah, two of the most famous sires of trotters in the world. Hence it cannot at this late day be regarded as a defect. His legs are splendid, and we doubt if a heavier boned horse ever stood over iron. His pedigree comprises the best trotting blood to be found anywhere. For twenty years there has been a rivalry between New York and Kentucky as to which could breed the best trotters. New York's favorite stock was the get of Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, and he by imported Messenger. The Kentucky sire was Mambrino Chief, by Mambrino Paymaster, and he by Mambrino, son of Messenger. Both these rival strains of blood are to be found in Alwood, together with other less noted strains of scarcely less merit. He is by Almont, his dam by Blackwood (sire of Protine, 2:19), her dam by Alexander's Abdallah. Blackwood was by Alexander's Norman (sire of Lulu, 2:15), and he by the Morse Horse, also to be found in the pedigree of Bellfounder. Thus Alwood combines four of the great trotting lines—Hambletonian, Mambrino Chief, Pilot, Jr. and Blackwood, or rather, the Morse Horse.

The Mentmore yearlings, the property of Lord Roseberry, were sold publicly at auction on Thursday, July 6th, at Newmarket, England, consisting of nine head that brought \$15,326, or an average of \$1,714 per head. The highest priced one was the bay colt by Macaroni, dam Queen Marion, by King Tom, \$5,100.

TURF AND TRACK.

FIXED EVENTS.

Santa Cruz County Fair Association. First annual meeting at Santa Cruz, Aug. 15th, 16th, 17th and 18th.

Sonoma County Park Association, at Santa Rosa, Aug. 22d, 23d, 24th, 25th and 26th.

Sonoma and Marin Agricultural Societies. Annual Fair at Petaluma, Aug. 29th and four following days.

Golden Gate Fair, to be held at Oakland, from September 4th to the 9th inclusive.

Butte District Fair at Chico, from September 5th to September 8th, inclusive.

El Dorado District Fair at Placerville, from September 5th to September 8th, inclusive.

California State Fair. Annual meeting at Sacramento, from Monday, September 11th to the 16th inclusive.

The San Joaquin Valley Association Fair at Stockton, from September 19th to the 23d inclusive.

Oregon State Fair at Salem, from September 18th and during the week.

The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 25th to the 30th inclusive.

Humboldt and Mendocino District Fair at Rhonerville, September 19th to September 23d, inclusive.

Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th, inclusive.

Monterey District Fair at Salinas City, from October 2d to October 6th, inclusive.

Nevada State Fair, at Reno, from Monday, October 2d, to the 7th, inclusive.

Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.

Eastern Oregon Fine Stock Association at Union, from October 9th to the 14th inclusive.

FAIRS AT THE EAST.

Kentucky State Fair at Lexington, August 9th to September 2d inclusive.

Minnesota State Fair at Farmington, August 31st to September 8th inclusive.

Iowa State Fair at Fairfield, September 1st to the 8th inclusive.

Minnesota Agricultural Association, at Minneapolis, September 4th to the 9th inclusive.

Nebraska State Fair, at Omaha, September 11th until the 16th inclusive.

Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.

Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.

Wisconsin State Fair, at Fond du lac, September 11th to the 16th inclusive.

Ontario Provincial Fair, at Toronto, September 18th to the 23d inclusive.

Connecticut State Fair, at Meriden, September 18th to the 22d inclusive.

New Jersey State Fair, at Monroce, September 18th to the 22d inclusive.

West Virginia Central Fair, at Clarksburg, September 19th to the 21st inclusive.

Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.

Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.

Texas State Fair, at Austin, October 17th to the 21st inclusive.

TROTTING ON THE BAY DISTRICT COURSE.

On Saturday last the Fall circuit of 1882 was informally commenced on the Bay District track. Though not one of the regular California Fairs, the horses which came together have engagements throughout the circuit, and hence there was quite an interest taken in the opening battle. The interest, however, was mainly confined to those who have more than a transient fondness for the trotter, and, consequently, the attendance was nothing like what two such contests should have called out. Still there was quite a concourse of people, the balconies of the hotel and Club House having a fair representation of the fair ones of San Francisco; the upper stand contained a goodly number, while around the pooling quarters there was a dense crowd anxious to invest on the horses they fancied. As usual, there was a variety of opinions. In one group it was held that Sweetness could not be beaten, in another there was no end to assertions that Starr King would win in a jog, and still others who had implicit faith in the prowess of Crown Point, Ashley, Cairo and Del Sur. There had been so many stories told of the immense speed which some of them had shown in their exercise that it was not surprising that great deeds were anticipated, and the very sanguine marked figures for their favorites which, if they had been capable of accomplishing, would have ended the race in one heat. Starr King, it was stated, had gone in 2:21 1/2 at one time and in 2:19 at another, and this so easily that it was sure he could reduce it four or five seconds without any trouble. Sweetness was certain to trot as fast as her driver desired, according to the dogmatic promulgations of those who are so good at figuring, for she had done a half mile on the Oakland Trotting Park in 1:08 1/2—"a seventeen gait, you know; and the Volunteers go the route." Cairo was also reported to be doing well, greatly improved by his absence from the track, and entirely different, "steady as an eight-day clock," his patrons claimed, and had entirely given up his old habit of diving and breaking, as he was accustomed to do of yore. Crown Point, Ashley and Del Sur having been trained at a distance from the city, very little was known as to what they had been showing, though some good judges quietly picked up "the field," composed of all the starters excepting Sweetness and Starr King, and these were rewarded with a liberal return for the investment. Nearly all the speculation was confined to the 2:25 race, and at least nine-tenths of the comments were restricted to the horses engaged in it. It was generally conceded that Vanderlynn was so much superior to Freestone and Frank Moscow that there was not much likelihood of a contest; and although the favorite proved to be the victor, one of the games of the long-rubber was lost, and his competitors displayed qualities which are almost certain to ripen into excellence in course of time. Being all new performers, Saturday's race being their first appearance, a short description will be in place. The winner, Vanderlynn, is a very handsome bay, with fine action and a great turn of speed. He is a nice size for a trotter, and appears to have the other qualities as well. He is by George M. Patchen, Jr. (California Patchen), and his dam was by the thoroughbred horse Joseph, brought to this State by A. Mailliard. The success of Patchen as the progenitor of trotters has been such as to award him a high place in the Trotting Stud-Book; and when matched with highly bred mares, his offspring show well in form as well as in speed. Thus there is San Purdy, from a dam by Illinois Medoc; Susie, from a mare by Owen Dale; Starr King, from Mary Wonder, a fast quarter mare. And Billy Hayward and Alexander exhibit so much "quality" that there is a strong probability that their dams had a good share of "blood." Joseph was by Hermes, a son of Mariner and the great Fashion, from Patsey Anthony, by imported Priam, grandam by Virginian.

Freestone is a large fine looking horse, a darker bay than Vanderlynn "Ranger," and taken altogether a fine specimen of the fast-trotting American roadster. He has the thoroughbred on both sides. His sire, Captain Webster, by Belmont (Williamson's), his dam by Owen Dale, a son of the same Belmont. This gives him a double cross of that favorite California blood, and as there is another noted family of Belmonts it is necessary to explain that the Eastern Belmont, the sire of Nutwood, Wedgewood, etc., is a grand-

son of Rysdyk's Hambletonian; and on the other side of the mountain a Belmont is accepted as one of that family, whereas on this coast it is the thoroughbred which is meant. Contrary to the general belief where there is so much thoroughbred blood, Freestone has high action, and still further from what many suppose is a thoroughbred characteristic, he is staidier than an "eight day clock." He never broke during the four heats, and that in situations which would be trying to an old campaigner. He trotted behind, in front and alongside of a horse with a greater development of speed, and though on different occasions he was on the verge of disaster recovered without "leaving his feet." Of course his driver is entitled to great credit for his part being played so well. We have not the least hesitation in predicting that Freestone will surely make a fine trotter.

The third in this triangular contest, Frank Moscow, is also above the usual size, still larger than Freestone, and not as highly finished as the other, though a horse of good style, and a manner of going which indicates an increase of speed in the future. He is an Eastern-bred horse, his sire being of the same name, and doubtless belonging to the family of Moscows, the members of which were mainly bred in Michigan. In both races a majority of the horses were driven "artistically," and one, two or three as far from it as is usually seen. Still it is difficult to tell whether the driver or the horse is the party in fault, and as Pete Brandow surrendered his seat behind one of them after the short experience of one heat, in that instance it may be safely set down the horse was to blame. It is the first time on record when Brandow gave up the reins, and the boys were marking the date on the stable doors. It cannot be (at least we hope not) that the luxuries of the mining camps have so far enervated our friend that he has lost his determination; but a repetition will surely lead us to that way of thinking. One of the horses was driven in a way that is very reprehensible, and though the judges penalized him by giving him the last position, this was a small sentence for the work he performed.

The following is a detailed account of the races:

The first race was for the 2:40 class, in which through his private trials Vanderlynn was made a great favorite in the pools, selling for \$50 against \$25 for the two other entries combined, they being Freestone and Frank Moscow. Vanderlynn showed himself quite worthy of the confidence of his backers, as, with the exception of a bad break in the third heat, he trotted in an even and determined manner. In the first heat Moscow got a slight advantage at the start, and at a moderate gait he led the two others to the half-mile in 1:16 1/4, but Vanderlynn was trotting squarely within himself, and overhauling the leader on the turn, he won handily in 2:32, with Moscow second and Freestone last. In the second heat Vanderlynn outspeeded his two adversaries and was an easy winner in 2:29, the half being made in the same time as in the preceding mile. In the third heat the two out made a bolder bid for victory, and at the second turn they carried Vanderlynn off his feet to such a tune that when he regained his stride his driver saw that his chance for the heat was hopeless, so he left it to the other two, who came down the homestretch side by side, so much so that on the judges' stand it seemed like as if it would be a dead heat; but Freestone passed the wire a neck in front of Moscow, the quarter being made in 37 1/2 s., the half in 1:14 1/4, and the mile in 2:29. There was but little change in the betting, as the result seemed to be a foregone conclusion, and so it proved to be; but Freestone made a gallant fight of it, though Vanderlynn had a trifle the best speed, and won the heat and race in 2:27, the half being made in 1:13 1/2. Vanderlynn will be a very useful horse in his class throughout the circuit, but he will be likely to find himself in still better company than was the case on Saturday. Pat Farrell deserves credit for the manner in which he brought the horse to his first race, and for the careful way in which he guided him to victory.

SUMMARY.

Bay District Track, Aug. 5th, 1882.—2:40 class—Purse \$400; \$200 to first, \$100 to second, and \$50 to third horse.

P. Farrell names D. H. Vanderlynn..... 1 1 3 1

M. Rollins names B. G. Freestone..... 3 2 1 2

A. B. Cooper names S. G. Frank Moscow..... 2 3 2 2

Time—2:32, 2:29, 2:29, 2:27.

Then came the big event of the day, the 2:25 class, on the results of which the pools had been selling in an ever-varying manner since the previous evening at the Ariou, and from the arrival of the first visitors at the track, Sweetness, the newcomer, disputed with Starr King for the supremacy as the favorite, while Cairo, Ashley, Crown Point and Del Sur were sold as the field, the only absentee among the entries being the Echora of Mr. Titus. The odds kept changing with every pool, but the average was between the following extreme quotations: Starr King \$25, Sweetness \$21, the field \$12; and with the mare as first choice at \$40, Starr King would fetch \$30, and the field \$25. An effort was made to get a heat through between the final one of the 2:40 class, but the scoring was so wild that after half a dozen ineffectual attempts the horses were sent to the stable.

There was a great deal of jockeying in order to obtain a favorable start, but at the fifth attempt the gong was tapped to a pretty even start, save that Starr King was more than a length behind his horses. His was the second position, while Cairo was at the pole and Sweetness on the extreme outside. From the start Ashley and Cairo went to the front, with Sweetness close up, and the quarter was reached in 36 1/2 seconds. Down the back stretch Sweetness improved her position, with Starr King on a slight break and Crown Point in the extreme rear. On the further upper turn Sweetness passed Cairo, and when Tim Kennedy saw that the mare was at his heels, he urged Ashley to a break, and the horse ran quite a distance without being brought to his proper gait, and yet, despite this perversion of the rules, Sweetness beat him out by a good neck, he being three lengths ahead of Starr King, and then came Del Sur and Crown Point, but Ashley was properly set back last for running, and his driver was cautioned. The half was made in 1:11 and the mile in 2:25.

There was but very little change in the betting, as Starr King was still strongly backed by his adherents, as was Sweetness by her admirers. The drivers were cautioned not to delay the race by their manoeuvres, as the postponement of such an important event detracted so much from the enjoyment of the race. After three ineffectual attempts the horses were ordered to score by Starr King, and they were tapped off with Starr King two lengths behind them all and on a wabble that immediately became a bad break that took away all his chances for the heat. The quarter was made by Sweetness in 37 seconds, with Crown Point close up and Ashley at his wheel, and in a few strides the latter was again on the lead with the mare, both making a speeding half in 1:11, but this being too hot a pace for Ashley he broke and

surrendered his position to Crown Point, who closed up with Sweetness, and after a fine struggle he beat her out by half a length in 2:24, the mare being three lengths ahead of Cairo, driven by Mr. Hughes; then came Del Sur, Ashley and Starr King last—some timers on the outside made the heat faster.

As might naturally be supposed, there was now a great revulsion in the betting, and as he was known to be a good stayer, Crown Point was made the favorite at \$60 against \$30 for Starr King and \$30 for the field. Pete Brandow took charge of Starr King, and again there was a great deal of tedious scoring, owing to the difficulty of getting that horse up to his position. It was thus that only at the seventh trial were they tapped off, and Crown Point, leaving his feet, lost the pole in the few first strides, and again Ashley and Sweetness were contesting for the lead and reaching the half-mile in 1:13, with Crown Point some six lengths behind and Starr King last of all. The pace was too strong for Ashley, who was whipped into a break and then allowed to run as in the first heat, an action that was very much adverse to the chances of Sweetness. Crown Point made another break on the upper turn, but, on regaining his stride, he trotted very rapidly, and passing Ashley near the three-quarter pole, he gradually overhauled Sweetness, and after a fine contest, won the heat in 2:27 by a length from the mare, she leading Starr King by three that distance, and then came Ashley, Del Sur and Cairo in the order mentioned. Ashley was again placed last for running, and his driver might consider himself lucky that that was the only penalty he incurred for his conduct.

It was now \$100 to \$30 on Crown Point, and at these terms a great deal of money went into the box, the long odds being given by those who had pinned their faith on the favorites at the early stages of the race. Pat Farrell now resumed his place with Cairo, and Chauncey Kane took the reins over Starr King. Again was the start delayed by tedious scoring, and as the weather was turning cold and windy, a great many visitors left for home. More than half an hour was wasted in attempts to get the horses together, but it was only at the tenth time that the bell was tapped to a pretty fair start. Up to the second turn they were still pretty even, but there Crown Point took a decided lead, Starr King being the only one near him by six lengths at the half in 1:12. Some of this advantage was lost by the leader by a break near the three-quarter pole, and apparently had the heat safe, when he made a double break within the draw-bridge, which would have cost him the heat had Starr King possessed his usual speed, but Crown Point being admirably caught by Donathan he won by half a length in 2:27, the second money going to Sweetness and the third to Starr King. This brought to a conclusion the first of the series of contests of the 2:25 class that promise to furnish some of the best races throughout the circuit.

SUMMARY.

Same Day—2:25 class—Purse, \$500; mile heats, three in five, in harness, \$350 to first, \$100 to second, \$50 to third horse.

G. Valensin names s. s. Crown Point.. (W. Doniathan)	5	1	1	1

Time—2:25, 2:24, 2:27, 2:27.

THE CHICAGO FALL TROTTING MEETING.—The programme for the coming horse fair, September 16th to the 23d inclusive, announces premiums aggregating upward of \$15,000. The prizes are fifty-seven in number, including the following: A \$1,000 purse for the 2:45 class, for the 2:25 class, for the 2:21 class; for the 2:25 class pacing, for the 2:29 class, for the 3-minute class, for the 2:33 class, for a free-to-all pacing and for a 2:17 class. Also a \$2,000 purse open to all stallions, and a special four-year-old stake, open to Phil. Thompson, Farce, Bronze, Fred. Crocker, Jay Eye See and Waiting, and any other four-year-old and under; entrance, \$250. If two of those named above start, the Association adds \$1,000. If three or more, \$2,000. A special Consolation purse will be announced for the two last days, about September 1st. The entries close on Monday, August 28th, at 11 p. m.

AN AMATEUR STEEPLECHASE.

One of the main features of the race meeting at Saratoga, was the Grand National Hunt Steeplechase, with amateur riders, and from the following account of the race, as given in the *N. Y. World*, it would appear as if our horses and riders both lacked training in this difficult cross-country riding: "There were five starters, and Rose was a great favorite, many being willing to bet that she would be the only one to go over the course. Probably a steeplechase never was run in this country which created so much fun and amusement. At the start Mr. Holmes took the lead with Lennox, attended by Mr. Strathey on Rose. Mr. Purdy on Trojan was third, but, gradually dropping back, was passed by Mr. Penniston on Echo. Barrister began the fun by refusing at the first jump, Rose and Lennox meanwhile making a pretty race in the run round the last turn, both horses jumping well up to and including the north section of the water. At the first of the rails into the fractional track Lennox tripped and fell, throwing Mr. Holmes, and this was the beginning of one of the most uproarious scenes of fun ever witnessed on a race-track. What with Barrister refusing each jump until he reached the water, which he refused a dozen times, the buck-jumping of Echo, the occasional falls of Mr. Penniston and the slow and deliberate jumping of Trojan, it needed half a dozen pairs of eyes to see all the fun, which was finally supplemented by Mr. Clem Alloway remounting Lennox and in his shirt-sleeves and black silk hat started over the course. Although the horse could not throw him he stopped, bolted and hung at every jump. In the meantime Mr. Strathey was rating along alone at a very fair pace, Rose jumping in fine style. The final outcome of the race was that Rose won by half a mile in 6:02. Echo was second three furlongs in front of Trojan, he "pacing" in five furlongs in front of Lennox. As Barrister could not be got over the water-jump the first time, his career in the race ended there." The following is a summary:

August 1, 1882.—Grand National Hunt Steeplechase Sweepstakes, for qualified half-bred hunters, at \$10 each, with \$750 added, of which \$250 to the owner of the second horse, the third to receive \$100 out of the stakes; to be ridden by members of any regular organized Hunt Club in the United States and Canada; minimum weight, 160 lbs.; 10 subscribers; full course, about two miles and three-quarters.

J. P. Dawes' ch. m. Rose, 6, by Helmbold, dam by Niagara (h-b), 160 lbs..... (Mr. Strathey)	1
Hy. Drysdale's ch. g. Echo, 5, by Judge Curtis, 160 lbs..... (Mr. Penniston)	2
S. Berkley's ro. g. Trojan, aged, 160 lbs..... (Mr. Purdy)	3
R. Craik's ch. g. Lennox, 5, by West Roxbury, dam by Joe Stoner, 160 lbs..... (Mr. Holmes and Mr. Alloway)	0
J. R. Harper's ch. f. Barrister, aged, by Judge Curtis, 160 lbs..... (Mr. Hunter)	

Time—6:02.
Pools—Rose, \$105; Lennox, \$55; field, \$50. Mutuels paid \$11 38.

ON THE ROAD.

There is not a city in the Union that possesses more natural requisites for good and safe driving than San Francisco, and yet that is so poorly provided for in that respect. We have an open road of easy access to the Park, and thence a fine drive to the ocean shore, but it appears that the expenditures needed for the preservation of the Golden Gate Avenue are largely in excess of the supplies, and that the necessary outlay on the Park and buildings does not admit of the disposal of a sum that would keep the roadways in fine order. This is parsimony that will not meet with the approval of our citizens, who all take a natural interest in the Park, rescued as it has been from arid, sandy dunes that border its pleasant, leafy, grassy mounds on either side, and who will witness its decay and ruin with feelings of intense disgust. The Golden Gate Park is an object of pride to both rich and poor. Alike they enjoy the view and fragrance of the lovely parterres of flowers, the green slopes of emerald, the leafy bowers, the fresh, balmy breeze, and in the distance, across the bay, the bold mountains bathed in a light, golden vapor, while far beyond are the dark blue tints of the ocean, speckled with the white wings of the world's commerce, hastening to and from the Golden Gate of the far West. There are two or three coigns of vantage from which one of the most lovely views, combining sea and landscape, can be seen, and on favorable days these are crowded with ladies and children, who, with their bright costumes, give bits of color to the rural scene of dwarfed trees and bosquets that are greatly pleasing to the eye. When they are tired of viewing this wealth of nature, they descend the hillocks, and seated on the grassy plats beneath the welcome shade of bright foliage, they watch with beaming eyes the various equipages that dash by with their merry occupants to and from the ocean shore.

The ladies who drive or ride prefer the morning hour, as then the wind is not so rough as it is likely to be in the afternoon; and from about 11 to 1 in the day may be seen skillful drivers and graceful equestriennes that might be compared successfully with their foreign sisters in Hyde Park or the Bois de Boulogne. In the afternoon, about 3 o'clock, the scene becomes very animated, especially on Saturday and Sunday, when countless teams of all kinds and descriptions come dashing around the curves with the ribbons held by men who are undisguised lovers of the speedy horse, and who are not reluctant now and then to have a friendly brush with a rival team when the lynx-like eyes of the officials are closed and the road is clear for the tussle.

It would be impossible to give a full account of the habits of the road, but at random we note a few as they pass us at a clipping gait to and fro on the roads that are too hard for good driving:

Here comes Andrew Smith with his fine chestnut mare by Irvington, that can show 2:50, followed by William Cunningham, a slashing mare by Fred. Lowe, that although pleasant to drive, is yet somewhat faster. Next is John Hanna, with a big, stylish pair of bays to a neat rockaway, and then William Alvord, with his brown team that almost every day are so well known and admired on the drive. Driving quietly along, as if contented with himself and his surroundings, is Ned Fry; but look well at the points of that big bay mare before you test her speed in a brush, for although she is young and has no record, she can trot, so rumor says, well within the forties. Here is another clipper, one of the nicest on the road, a big brown horse, and Joe Marks is his proud possessor. Next comes the skillful amateur driver of the Pacific Coast, P. A. Finigan, who does not hesitate to enter the lists against the most noted professionals, and we cast an admiring glance at Don Elipher and mate as he dashes by. Another habitue of the drive is J. H. Tobin, with his bay and chestnut favorites, Sam and Dick, and then there is W. M. Starr, with his handsome and even-gaited mares, Black and Flora. Here are a trio that in speed are pretty evenly matched, showing about 2:40; D. E. Root with his chestnut mare by Inauguration; Charles Howe with a fine bay horse, and Mr. Bibbins with a brown slashing mare who can pull a road wagon at about the same gait. William Brown has a fine team in the Captain and the Major, but as they have not been seen on the road for some little time, the horses, like their chief, are probably on a furlough in the country. Lewis Nathan has a nice bay by Chieftain, that is as speedy as he is kind; in fact, he is the lady's horse of the road. Ex-Governor Stanford drives Occident and mate, he having disposed of Abe Edginton, and Charles Crocker has Lulu McCord and a gray colt that are fast and very stylish in appearance. One of the handsomest and best teams on the road are the chestnut and bay mares by Chieftain and St. Elmo, owned by Edward Barron, who is rather proud of the 2:40 they can show on a good road. There are Thomas Bailey and Charles Hendry, with nice and fast road mares; and E. J. Baldwin drives St. James and mate, fine looking horses, to a road buggy, when not speculating on the chances of Gano and Lucky B. at the City by the Lake. A change of description is necessary for the elegant Kentucky-bred saddle horse of C. H. Moore, that, bright white in color, is said to be one of the handsomest horses in the State. And so on for columns could we write down the finest and prettiest and fastest horses of San Francisco, but space forbids; and in conclusion we state that James G. Fair drives a pair of Chieftain bright bays; that Morris Smith has a brown mare and a black horse that he drives to a rockaway; that Mr. Wilkinson has a speedy mare, and that in Carrie F., by Irwin Davis, M. E. Gonzales has a young animal of great promise. Should the new road be laid out adjoining the Park, the number of private teams and driving horses would be quadrupled, so innate is the love of our rich citizens for animals of speed and lineage.

THE SARATOGA RACES.

The latest dispatches from this delightful watering place state that owing to the absence of the principal Eastern stables, the racing there is very dull, and the attendance has fallen off to such an extent that for the interests of the turf the rivalry between Monmouth Park and Saratoga should cease at the conclusion of the present meeting. On August 3d, in the first race, one mile and an eighth, Bootjack was first; John Davis second; time, 1:55½. In the second race, three-fourths of a mile, George Kinney was first; Barnes second; time, 1:15. In the third race, one and a half miles, Frankie K. was first; Apollo second; time, 2:40½. In the steeplechase, full course, gentlemen riders, Post Guard won; Rose second; Charlemagne third; time, 5:20.

On August 4th, in the first race, a mile and furlong, Monogram won; Tom Picket second; time, 1:57½. In the second race, for a mile and 500 yards, John Davis won; Creosote second; time, 2:13½. In the third race for a mile,

Terror won; Navarre second; time, 1:46½. In the fourth race, five furlongs, Baron, Favorat and Tarantalla (filly) ran a dead heat; time, 1:02½.

On August 5th, in the first race, three-quarters of a mile, Little Phil won, Disturbance second; time, 1:15. In the second race, one and three-quarter miles, Glidelia won, Ben d'Or second; time, 3:01. In the third race, one and one-eighth miles, Charley B. won, Jenny V. second; time, 1:55. In the fourth race, steeple chase, one and a half miles, Turfman won, Tom Bush second; time, 3:05½.

On August 7th, in the first race, a three-quarter mile, Disturbance won; Minnie second; time 1:15. In the second race, one and one-quarter miles, Jim Nelson won; Faence second, Long Taw third; time, 2:11½. In the third race, one mile, Baby won; Churchill second. In the fourth, a hurdle race, one mile and five furlongs, Turfman won, Raven second, Bailey third; time, 2:16.

On August 8th, in the first race, three-fourths of a mile, Tocsin won; Bessie second; time, 1:18. In the second race, 1½ miles, Blazes won; Grange second; time, 2:52½. In the third race, ¾-mile heats, Bonnie Lizzie won; Frankie B. second; time, 1:16½, 1:16. In the fourth race, one mile, Jennie won; John Sullivan second; time, 1:44½.

On August 9th, in the first race, one mile, Monogram was first, Stanton second, Crickmore third; time, 1:45½. In the second race, one mile and 500 yards, Warfield won, Force second; time, 2:21½; only two started. In the third race, three-fourths of a mile, Saunterer won, Col. Watton second; time, 1:17. In the fourth race, one and one-eighth miles, Jennie V. won, Farragut second; time, 2:20½.

On August 10th, in the first race, three-quarter-mile, Little Phil won, Springfield second, Square Dance third; time, 1:16. In the second race, two miles, Boatman was first, Apollo second; time, 3:31. In the third race, one and one-eighth miles, Adellen won, Monroe second; time, 1:55½. In the fourth race, 1¼ mile, Bailey won, Annette second; time, 2:19.

THE OLYMPIA FAIR AND RACES.—The Directors of the Washington Industrial Association announce that the annual fair to be held at their grounds, near Olympia, W. T., will commence on the 29th of August and continue through the week. The programme of races is as follows:

Tuesday, August 29th—Running race—Washington Territory stock; half-mile heats, best two in three; purse \$150. First horse \$120, second horse \$30. Same day, trotting race for Oregon and Washington bred three-year-olds; half-mile heats, best two in three; purse \$150. First horse \$120, second horse \$30.

Wednesday, August 30th—Running race—Single dash of a mile; \$100; free for all. First horse \$60, second horse \$30, third horse \$10. Trotting race same day—Three minute class; purse \$100. First horse \$75, second horse \$25.

Thursday, August 31st—Parade of stock—Slow race—Pony purse race.

Friday, Sept. 1st—Grand running race, International—Free for all; mile heats; best two in three; purse \$200. First horse \$125, second horse \$50, third horse \$25. International trot—Free to all; best three in five; purse \$200. First horse \$150, second horse \$50.

All entries for trotting races to close August 15th, at noon, by paying one-half the entrance money, the other half to be paid the day before the race. All entries to running races to close at 12 o'clock m. the day before the race. Ten per cent. entrance to each of the above races. In all cases three to enter and start. Non-thoroughbreds are allowed 10 lbs in all running races when thoroughbreds are running.

THE AMERICANS IN ENGLAND.

Although our American friends carried off so many of the most coveted prizes of the English Turf last year, they, too, seem to have realized the fact of being born to trouble this year, for Foxhall's victory in the Gold Cup at Ascot can hardly be termed a symposium sufficiently satisfying to atone for disappointments experienced, even supposing that the interests of Mr. Keene and Mr. Lorillard were identical. As a matter of fact, however, a thoroughly sportsmanlike rivalry exists between them, and the blue and white spots as carried by Foxhall and Golden Gate, have thus far this season made a greater mark than the black and red hoops of the Iroquois stable. Gerald was a great disappointment, and Sachem, although he battled bravely in the Derby, has not, so far, proved a worthy substitute, judging by the two-year-old form of the pair. Mistake has been sold out of the stable, Iroquois has not been deemed fit enough to do battle, and the two-year-olds are either abiding their opportunity or are not as good as was hoped of them. Still the time may come, for our American cousins are as patient as they are astute, and we may find them "knocking about" to a merry tune as the back end draws nigh. When their day comes nobody will begrudge it them. Meanwhile Mr. Lorillard has marshalled his forces in another way in joining issues with our countrymen. This time, however, in the way of commerce rather than in sport, and though born to trouble this season, he seems determined to make the sparks fly upwards, independent of Gerald's bad temper, Iroquois' enforced retirement and the weakness of the two-year-olds. He, or rather I should say "they," for it is Pierre Lorillard & Co. of New York have joined forces with the famous firm of Cope Brothers and Hignet Brothers, Liverpool, and the Richmond Cavendish Company of the same little seaport town, for the supply of manufactured tobacco, cigars, snuffs, cigarettes, etc., for home trade and exportation, and their works in Columbia Market, Bthnal Green, are a triumph of combined enterprise. So if Mr. Lorillard cannot make sparks fly upwards in one way this year, he means doing it in another, by the aid of that nicotine abounding plant, which a rough and ready poet in the days of Sir Walter Raleigh sang about in anti-Tennysonian strains as follows: "Tabacco is a curious weed; grows green in the morn and is cut down at eve. It shows our decay that our bodies are but clay."—*The Sporting Life*.

Charles Reed's yearling sale took place at the Saratoga race-track on July 31st. Eight lots realized an aggregate of \$2,925, the highest price being paid for Queen of Hearts, by Highlander out of Countess, for which P. J. Flynn of Albany, N. Y., gave \$925. The same gentleman got Jack of Clubs, by Highlander out of Helen, for \$200. Milton Young's Lighthorse Harry, three years, by Enquirer out of Alice Wagner, was also sold to Mr. Flynn for \$525; and his Lost Cause, three years, by King Alfonso out of Nellie Knight, to J. Donohue for \$330; and B. McClelland's Explorer, four years, by Enquirer out of Slipper, to W. L. Cassidy for \$175.

C. T. Harris, for some years connected with *Wallace's Monthly*, and a well known writer on horse topics, under the nom de plume of "Luke Clay," has taken charge of the trotting department of the *New York Sportsman*.

RACING AT MONMOUTH PARK.

The racing season has been very prosperous thus far this season at Long Branch, owing to the liberal purses that are offered by the management with such penalties and allowances that allow some of the second-rate horses to secure a victory now and then. The misfortunes of the California stable still continue as can be seen by the perusal of the proceedings on the 3d inst. This was the day on which there was a hope that at last there would be a turn in the long laze of their ill-luck, but the fates were once more against our representatives.

The first race on the card was a handicap for two-year-olds, a dash of three-quarters of a mile, for \$500, in which there were eight runners, and as neither Gains, Grismen nor Lucky B. were entered, it may be supposed that they are under the weather. It was won by Maid of Athol in 1:20, with Bella second and Felicia third. The next race was a handicap for a purse of \$500, a dash of a mile, that was taken by Barney Lyon, with Victim second and Corsair third; time, 1:50. Then came the important race of the day, of which we give the following description from the *N. Y. World*:

"The third race was the Elizabeth Stakes, for three-year-old fillies that had not won \$1,000 at weight for age when two years old, the distance being a mile and a quarter. The race had winning penalty and maiden allowance clauses, and five started at the following weights: Infanta and Amazon, 113 pounds each; Sunday and Laura Glass, 110 pounds each, and Miss Lumley, 106 pounds. Laura Glass was a strong favorite in both the books and pools. A good start was made, with Sunday in the lead, followed by Amazon, Laura Glass, Infanta and Miss Lumley. As they passed the stand Infanta had taken the lead, being three lengths before Sunday, who was a head in front of Laura Glass, she two lengths from Amazon, with Miss Lumley last. Rounding the turn Sunday had reduced the lead between the leader and himself to a length, and at the quarter was running a length behind Infanta and half a length in front of Laura Glass. Sunday made strong play for the leader running down the backstretch, and at the half mile was leading by half a length, with Infanta second, four lengths in front of Miss Lumley, while Laura Glass, who seemed unable to stand the heavy going, had fallen back last. On the turn to the three-quarters Sunday was leading by three lengths, but Infanta began closing up, reducing the distance to two lengths at the three-quarters and one length at the seven-furlong pole. Infanta was rapidly closing up, and the two were drawing away from the field. Infanta reduced the distance just enough to catch Sunday at the wire, the two making a dead-heat, eight lengths ahead of Miss Lumley, who was ten from Amazon; time, 2:21½. The owners decided to run the race off, which was done just before the steeplechase, Feakes being substituted for Gibbs on Sunday. Sunday got away first, but Feakes pulled her back, and going around Infanta made the turn to the stand so wide that at that point six lengths separated them. From this point all interest in the race ceased. Some of the lost ground was made up, but Sunday was never afterwards able to appear even dangerous, Infanta winning easily by two lengths in a quarter of a second faster time than the dead-heat, 2:21¼."

SUMMARY.

The Elizabeth Stakes, for three-year-old fillies that had not won a stake valued at \$1,000 (handicaps and selling races not counting) when two years old, at \$50 each for starters, with \$1,500 added, of which \$500 to the second; winning penalties and maiden allowances; entrance, \$25 each, to the fund; 28 subscribers; mile and a quarter.

W. Jennings' b. f. Infanta, by King Alfonso, dam Queen Victoria, 113 lb., carried 115 lb. (Costello) 1
E. J. Baldwin's b. f. Sunday, by Monday—Pell, 110 lb. (Gibbs and Feakes) 2
Sneedecker & Co.'s b. f. Miss Lumley, by Leanington or Reform, dam Lady Lumley, 106 lb. (W. Donohue) 3
P. Corillard's b. f. Amazon, 113 lb. (Feakes) 0
D. Colajanni's ch. f. Laura Glass, 110 lb. (Ural) 0
Time—2:21¼.

Pools—Laura Glass, \$35; Amazon, \$19; Infanta, \$16; the field, \$10. Deciding heat: Pools—Infanta, \$110; Sunday, \$100. Betting—2 to 1 on Infanta, and 6 to 5 against Sunday. Mutuals paid \$45 90 and \$7 75.

Of this same race the *N. Y. Tribune* remarks: "In the Elizabeth Stakes the notorious Laura Glass, an instrument of swindling at Brighton recently, was thought almost sure of success, but it is possible that her owner had had an inside view of some one's pocket before the race, for the filly ran as if she had drank too much water. Jennings' Infanta and E. J. Baldwin's California filly Sunday, made a close finish. Every one but the judges thought Sunday's head was in front, but it is the unexpected that always happens with judges' decisions at Monmouth, and it was declared a dead heat. For eccentricity in placing horses Monmouth has made a record this year never equalled anywhere. This extraordinary dead heat was run off and Infanta won."

This was not the only piece of ill-luck, for in the next race, the valuable Freehold Stakes, a mile and a half, the ground was so heavy from rains of the previous day that it is probable that Clara D. was not sent to the post on that account. It was won by Girofle, Eole second, Barrett third, and Monitor and Glenmore unplaced; time, 2:42. The other races deserve no further mention than was already given in the telegraphic dispatches of our last issue. Our horses may go to Sheepshead Bay, Coney Island, but if this wretched bad luck still continues it would be better to bring them back here where their presence will be so much missed.

BUFFALO RACES.—On August 3d, in the stallion race, Jerome Eddy and Black Cloud contested for a special purse to beat Smuggler's time, 2:15¼. Black Cloud took the first and second heats. Jerome Eddy was first in the third heat, but it was declared a dead heat, Jerome having run. The fourth heat was a dead one; time, 2:16¼, 2:18½, 2:20. The time of the third heat was not taken. The first heat was the fastest ever trotted by a stallion, except Smuggler. On the succeeding day they trotted two more heats, resulting in a victory for Black Cloud; time of the five heats, 2:16¼, 2:18½, 2:19, 2:20, 2:18¼. Of this finely contested race the full description comes too late for our present issue. In the 2:20 class Adole Gould won, Fannie Wetherspoon second, Annie W. third. Early Rose—driver, Fred. Douglass—Humboldt and J. B. Morris also trotted; time, 2:20½, 2:19¼, 2:19, 2:19, 2:20½, 2:23¼. A special purse for named horses was won by Clingstone, Edwin Thorne second, Minnie R. third, J. B. Thomas and Kate Sprague distanced; time, 2:14¼, 2:16, 2:17¼. Edwin Thorne showed well in the race, and finished each heat close up. Little Brown Jug was brought out for exhibition at the close of the stallion race, but not being in the best condition, paced for half a mile, making it in 1:04.

GROWTH OF COLTS.

In order to winter a colt well and have him come out a fine, showy, sturdy animal in the Spring, particular attention must be paid to his growth during the first Summer and Autumn. If the mare's milk is at all deficient to keep the colt in good flesh and thriving steadily, it is best to have recourse at once to cow's milk. Skimmed milk answers very well for this purpose, especially if a little flax-seed jelly, oil or cotton-seed meal is mixed with it. A heaped tablespoonful, night and morning, is enough to begin with, when the colt is a month old. This can be gradually increased to a pint per day, by the time it is six months old, or double this if the colt be of the large farm or cart-horse breed. Oats, also, may be given as soon as they can be eaten. Begin with a half-pint, night and morning, and go on increasing, according to the age and size of the animal, to four quarts per day. These, together with the meal above, should be supplemented with a couple of quarts of wheat bran night and morning. The latter is excellent to prevent worms, and helps to keep the bowels in good condition. Colts should not be permitted to stand on a plank, cement, paved, or any hard floor the first year, as these are liable to injuriously affect the feet and legs. Unless the yard where the colts run in the Winter has a sandy, or fine, dry, gravelly soil, it should be well littered, so as to keep their feet dry. Mud, or soft, wet, ground, is apt to make tender hoofs, no matter how well bred the colts may be. One reason why the horses in one district grow up superior to those in another in hoof, bone, muscle and action, is because it has a dry limestone or siliceous soil. When the mare is at work do not let the colt run with her; and if she comes back from her work heated, allow her to get cool before suckling the colt, as her over-heated milk is liable to give the foal diarrhoea.—*National Live Stock Journal*.

WAS IT A CRUEL HOAX?—F. E. Pond, one of the editors of the *Turf, Field and Farm*, who was reported recently to have been drowned in Wisconsin, has returned safely to New York. Speaking of the report of his death, he said: "I do not understand how the story originated. One of the explanations that I have heard, though I cannot vouch for its accuracy, is that a guide named Dubois found a canoe that had been left on the banks of the Flambeau River by a man who had gone back into the woods. The canoe floated out into the stream and overturned in the rapids. I have heard that the man who left the canoe was named Bond, and it is possible that the name in passing from mouth to mouth got converted into Pond. At the time of the occurrence I was at Ashton, on Chequamegon Bay, seventy-five miles from Flambeau. I am still trying to arrive at the origin of the story, and if it was malicious I think the author should meet with some severe punishment. It was a serious matter for me, as my mother was ill at the time and the news might have proved fatal to her. My friends were very generally alarmed."

The American horses in England are not doing well, and a glance at their performances at the recent Goodwood meeting, as compared with former years, is not encouraging. In 1880 the Americans were in nine races and secured three firsts, viz: The Lavant Stakes, won by Froquois; the Racing Stakes, won by Nereid; and the Molecourt Stakes, by Paw Paw. In 1881 they started in nine events, but won none, obtaining four seconds and one third. This year has been worst. Although Romeo, Sachem, Bookmaker, and Golden Gate all started, none got a place.

The duke of Hamilton is having a great run of luck on the turf in England this year, even if he is obliged to sell off all his pictures, library, and articles of vertu. At Ascot he won the valuable Alexandra stakes, beating Foxhall. At Goodwood recently he captured the much coveted Goodwood cup, with a despised outsider, Friday; the Corinthian plate with Thora, and the Lavant stakes with Export, and now he has won the Brighton cup with Fenelon.

From Milwaukee we learn that Dr. Ormond, who has St. Julien under treatment, says he was brought there while a little sick, but without any attempt at secrecy, four weeks ago, for treatment of a slight injury to the sheath of a ligament. The animal has been at work on the track every day but two since then, and to-day is as good as ever. Recently the owner refused an offer of \$40,000 for him.

In consequence of its increasing circulation *The Breeders' Gazette* has enlarged its form, and now gives every week some timely illustrations. Mr. Otto Holstein, who was for a long time connected with the *Turf, Field and Farm*, has taken charge of the horse department, and as that gentleman is well acquainted with the subject, he will prove to be a valuable acquisition to the staff of the paper.

Messrs. Pulsifer & Scott's colt, Gunnar, the winner of the Illinois Derby, has temporarily broken down at Saratoga. Gunnar was to have run at Monmouth Park, August 15th, in the Omnibus Stakes, and he was much fancied for it. It is expected that he may be got ready for the Dixie Stakes to be run at Baltimore. Gunnar overreached himself, and is very lame.

On August 4th, at the Jockey Club track, in the race between Red Boy and Wildmoor for \$10,000, for the best three in five, mile heats, Wildmoor won in three straight heats; time, 1:43½, 1:48, 1:46¼. Red Boy is engaged in some of the races during the circuit, and will meet our own best horses together with those of Oregon.

The best stallion records now are Smuggler 2:15¼, Jerome Eddy 2:16¼, Piedmont 2:17¼, Black Cloud 2:17¼, Santa Claus 2:17¼, and Robert McGregor 2:18, while Black Cloud has the three fastest consecutive stallion heats, 2:19¼, 2:18¼, and 2:17¼.

NEW YORK, Aug. 10.—At the Coney Island races to-day the three-quarters mile was won by Luke Fogle, Garfield second.

ANSWERS TO CORRESPONDENTS.

PEDIGREE OF BELLE MASON.

In answer to several queries, we give the full pedigree and her foals up to 1877: Belle Mason, b. m., bred and owned by F. M. Slaughter, by Belmont; first dam Lucy Johnson, by The Pony (son of Leviathan); second dam Catalpa, by Frank; third dam by John Richards.

Produce: 1871—ch. f. Polly Lee, by Ten Broeck (son of Cosmo).

1872—b. c. Palisade, by Sacramento.

1873—b. c. Jo Hamilton, by Echo.

1874—b. f. Amanda Fortune, by Sacramento.

1876—b. c. Exile, by Echo.

1877—b. c. —, by Echo.

Jo Hamilton is owned by G. Valensin of Arno Farm, Sacramento County, and Exile by J. B. Haggin, Racho Del Paso.

COMPTON, LOS ANGELES COUNTY,

August 4, 1882.

EDITOR BREEDER AND SPORTSMAN: Being a subscriber to your paper, will you kindly answer in your paper, under "Answers to Correspondents," the following question: In your paper of July 29, 1882, under "Echora," you mention Del Sur winning a heat against her at Sacramento in 2:24. Now, how can he start in the 2:25 race, August 5th, at the Bay District Races? Please answer and oblige

Yours, truly,

THOS. S. DAY.

Del Sur is credited in the "Trotting and Pacing Record" of 1881 as the winner of the second heat in the 2:25 class at Sacramento in 2:24. We were under the impression that .24 was his record, and in many instances have credited him with that figure. On making inquiries, we learn that the heat was given to Del Sur through Echora, who came in first, and Ashley second, being set back for running. This being the case, there was "no time" in the heat, and Del Sur stands with his record of 2:25, which he obtained when a four-year-old.

A BULL'S HEAD BREAKFAST.

There are many ingenious methods by which a change from the usual dull routine of life is effected, without having recourse to a long voyage from our city haunts, and among them all the most enjoyable and amusing are the monthly festivities held by the Bull's Head Club. In almost every country we find stag parties organized, at certain intervals, to feast on the produce of the chase or stream. In Southern France the wild boar is yet chased, run down by hounds, and the head is considered a great dainty at the hunt dinners. In Switzerland and the Tyrol the chamois is allowed to be the delicacy of their huge repasts. In Belgium, at St. Hubert in the Ardennes, there is held every year a festival in honor of the Patron Saint of all good huntsmen, and there a young buck from the royal preserves is roasted whole, as unfortunately Rosalind, in the days of "As you like it," hunted down the last lion that haunted the ever-pretty glades of the Ardennes Forest. In England the boar's head was also esteemed a great delicacy, and the Bird of Paradise was arranged with such art and ingenuity that it appeared on the table cooked to a turn and yet clad in its gayest plumage.

From time immemorial great public or private hospitality was shown by roasting sheep and oxen in their entirety, on spits that revolved slowly over live coals. In this country the clam bake at Rhode Island forms the most enjoyable picnic of the season. In South Carolina the chief attraction of the reunion is the wild turkey, wrapped in wet mud and baked until the feathers come off. In Virginia the opossum is treated in the same manner, while in Kentucky and Tennessee the hunters disport themselves at huge barbecues, where all manner of game is offered in hospitable profusion. These meetings, with their traditions, are lost in antiquity, and it was thought that any novelty in this connection was not to be dreamt of. But here in San Francisco has been revived a custom that was very popular among the early settlers in California, and that is a Bull's Head Breakfast. In the vicinity of San Rafael, in one of the loveliest valleys of the State, is situated Laurel Grove, the headquarters of the Bull's Head Club. There are many traditions about this delightful place, of which the trees show conclusive evidence of antiquity, and for many years past the place was known for its exquisite Spanish cooking, as also for the dainty dish from which the club takes its name.

On Sunday, the 6th inst., there was the usual reunion held once a month through the Summer season, and about a hundred gentlemen assembled at the grove in acceptance of the hospitality of the members of the club. By some mischance or misunderstanding the *piece de resistance* was lacking, and no bull's head was to be watched with care, as it was cooking slowly among the bright embers in a small pit fitted up for this express purpose. Generally when the head is sufficiently cooked the pelt falls off and the flesh is found to be of the most juicy and tender flavor, and when accompanied by the hot Spanish sauce for which the cooks there are so celebrated, it is a repast fit for the monks of old, who were celebrated for their good cheer. In the absence of the usual bull's head, there were some huge joints on iron bars above the fire that were zealously basted, and these in conjunction with chicken fricassee cooked in the same Spanish mode, and large bumpers of an excellent vintage, were thoroughly enjoyed by all the gentlemen present. A novel feature in the rules of the club is that the members carve the viands and wait on their guests, and that with an assiduity and courtesy that deserve all praise. After the repast there was the usual round of songs and stories, and the pretty grove, with the sunlight glinting through the heavy foliage, rang again and again with merriment and applause. By the last boat the picnickers returned to the city delighted with their entertainments and profuse in their acknowledgments to their hosts, among whom Colonel W. P. Barnes, the President, Frank Murphy, the Secretary, ex-Senator T. McCarthy and N. Stiner, were prominent in their attention to the wants of their guests. The following were among the gentlemen invited on this occasion, together with the members, who were present, and in the future we predict that the reunions of the Bull's Head Club will be the most popular of any held on the Pacific Coast:

Hon. T. J. Bowers, Gustav Reis, Daniel Taylor, Hon. W. S. Hughes, Col. Daniel Norcross, Jno. W. Shaeffer, Col. A. H. Wands, Dr. Geo. Hubbard, Wm. T. Coleman, Jno. H. Gray, C. Van Dyck Hubbard, B. Hamilton, Wm. Kreling, R. E. Kelly, Col. A. Neumann, John Scott Wilson, John Kreling, Gen. Geo. Stoneman, Chas. A. Sumner, Chas. Sonntag, Harry Dam, Jas. A. Roach, Capt. Smith, Hy. Schmiedell, Charles Gildea, E. P. McCarthy, Capt. Williams, T. G. Cockrill, Wolff Falk, Messrs. Waterman, Eckert, Johnson, Walz, Dorey, Wm. T. Porter, R. Hunt, Councilman More of Los Angeles, Mr. Dixon of Honolulu, Mr. McGrothy of London, Mr. Neilson of the *Examiner*, Henry Neiman, Percy Wilson, Mr. Gobe, Chas. Waters, Mr. Milne, Jno. R. Glasscock, A. Cheseborough, E. C. Marshall, and Mr. Greenberg.

ROWING.

AN AMBITIOUS WHERRY ROWER.

Tom Murphy of the Potrero has caused a flutter among the Long Bridge wherry rowers by his recent movements. For some time Thomas was lost in the seclusion of the neighborhood contiguous to Butchertown, and it was feared that the South Beach had seen the last of his famous racing craft. Last Sunday, however, Bob Goble, who was sweeping the Long Bridge course with his glass observed a strange oarsman flying down against the tide, and presently the figure developed into the once familiar presence of the Potrero sculler. Mr. Murphy was seated in his famous wherry, the Merrimac, but a year's hard work had effected a wonderful change in the proportions of that remarkable specimen of naval architecture. Her jib-boom, on which Thomas was wont to tack a Bermudan windsail, was gone, and her hurricane deck had disappeared. Her bulwarks had been cut down, and such a transformation accomplished in her general appearance that Henry Hussey faints when informed that the abbreviated and dismantled craft was the once proud trophy of his skill. As the Potrero oarsman rushed bow on to the flock of the Pioneer boat-house, it was observed that the Merrimac had lost three feet of her beam, and was as thin as Louis White after six weeks' training. In answer to the excited inquiries, whether the celebrated racer had been run over by a freight train or flattened out by one of the rolling mills steam hammers, Mr. Murphy lifted up his somewhat husky voice towards the wharf.

"If any of you fellows think you can beat her trot out your wherries!" shouted Mr. Murphy, as he mopped his brow with his sleeve, and gasped after his hard pull against stream.

"I don't bar anybody," continued the Potrero oarsman, addressing the fringe of defeated Pioneer scullers that were dangling their legs over the stringer.

The bold challenge caused a flutter, but despite the presence of the *Call's* aquatic reporter, who stood, note-book in hand, ready to record the acceptance of the deft, none of the ex-champions offered himself as a sacrifice. White declined on the plea that Jim Roach had gone East to see Tug Wilson and taken his bottle of tincture of iron with him. Flynn cast a mournful look in the direction of the Ariel boat-house and muttered something about the exhausting labors of the "Fall campaign." Sullivan said he had determined to accept no challenger until a course with only one side to it (an inside) could be found.

"But there is Lyne," exclaimed all the defeated scullers; "He will row you too quick."

"There ain't a man on the bridge can row me too quick," retorted the modest Potreroian, as he dipped his sculls into the tide and flew towards home, the Merrimac leaving a streak of foam behind her that looked like the track of the big Transit.

The hopes of the Pioneer Club now rest on Mr. Lyne, but that sculler has so far resisted all efforts to get him into the race. His objection is that he has so far been unable to find any boat fast enough for him to "warm himself in." It has been explained to him that the great object is not to warm himself but Mr. Murphy; but still he hesitates.

DESERVING OF CREDIT.—The Ariel Rowing Club of San Francisco is not a very large or wealthy organization, but it is always to the front when there is anything to be rowed for. Some of the more pretensions clubs would add to their popularity if not to their laurels by following the example of the Ariels, who take defeat as quietly as they do victory, and never remain on shore because there is a doubt of their winning. The Ariel Club has already announced its intention of competing for the BREEDER AND SPORTSMAN'S Cup, which will be offered on Thanksgiving Day, and the possession of which will give the winners the title of Champions of the Pacific Coast. The Ariels have no boat fit to compete in the match, but will supply the want before the day of the race. There is a possibility of the Alert Rowing Club of Vallejo sending down a champion four to wrest the trophy from the metropolitan oarsmen. In former days Vallejo was famous for its oarsmanship, and can now, doubtless, get together a crew that will keep the best of our champions at full tension over a three-mile course. The two Stevensons would make the nucleus of a heavy crew, and two other good men ought not to be impossible to find in a town so partial to aquatic sport. The appearance of a strange crew on the Bay would greatly increase the interest in the race, and make it by far the most important event of the kind ever decided on this coast. The Golden Gate crew have not decided whether to take part in the competition, but they talk of rowing the winners for \$1,000. These high priced races rarely take place, and the oarsmen who show partiality for them place themselves under a reasonable suspicion of being more anxious to pose as champions in a newspaper column than to pull for the title in a boat. If four crews enter for the BREEDER AND SPORTSMAN'S Cup, any one of the competitors can easily invest \$1,000 or twice the amount at advantageous terms, and if it should win, will, in addition to the bets, have the satisfaction of holding the Championship of the Coast, and a handsome trophy emblematic of the title. The Stockton Boat Club will, at its meeting to-morrow, consider the possibility of being represented in the regatta. The Pioneer Club, at its meeting last Sunday, decided to take part in the competition, and has already a crew in preparation.

MORE KICKS THAN COMPLIMENTS.

It now appears that the American Amateur Association has decided to pay the expenses of the Hillsdale crew in England, and the Hillsdale Club has so informed its representative. The indications now are that the Hillsdale four will remain in England all Summer, if necessary, and continue to submit themselves to metaphorical kicks, in their foolish eagerness to get in a match with some representative crew. It would be far better taste for the Hillsdale crew to have quietly returned home, after the English Amateur Association had given such unmistakable evidence of its narrow-minded prejudice against Americans. It has been argued that the English Amateur Association is not a representative body, and that therefore the Americans are right in refusing to abide by its decision and refrain from thrusting themselves into regattas where they are not wanted. The facts at hand fully disprove this theory. If the Amateur Association be not a representative body, it has influence enough to keep every representative crew out of any regatta for which the Americans enter. On the 26th of July the Hillsdale four entered for the Barnes and Mortlake regatta, and the committee accepted the entry. It was then expected that at last the Americans were about to achieve their ob-

ject, by getting an opportunity to race with a representative English crew. On the 29th of July, however, the following item arrived by cable:

"The Hillsdale crew has withdrawn its entry for the Barnes and Mortlake races on account of the Thames and London Clubs refusing to row. The committee of the regatta has not changed its decision in regard to the acceptance of the Hillsdales' entry, and would have started another crew, but the Hillsdales, under the circumstances, preferred to withdraw."

It is useless to argue in the face of such unpleasant facts that the English Amateur Association is not a representative body. It is unmistakably the exponent of the highest authority which English amateurs respect, and having set its face against the American four, the wisest and most dignified course for that crew to follow is the course across the Atlantic. It is not gentlemanly for any amateur to thrust himself into company where he is not welcomed, and the English association has shown that the room of the Americans is more desired than is their fellowship. Of such boorishness, if not cowardice, there can be but one opinion among all honorable sportsmen, and the Americans would only have strengthened the sentiment by returning home long since.

SUPPOSE THEY LOSE.—The cable brings the intimation that at last the hopes of the Hillsdale crew are to be crowned by admission to the charmed circles of English amateurism. The *Sportsman* reports a meeting of the English Amateur Rowing Association, to consider the replies from America relative to the status of the Hillsdale crew. The Association reported that satisfactory assurances in regard to the Hillsdale's position as amateur oarsmen were received as far back as Tuesday of last week. The answers being satisfactory and the over-sensitive Association being satisfied that the Hillsdales are not in the long category of the disreputables, our champions may soon be expected to show their mettle on English waters. And now comes the oppressive fear that, after all the recriminations and bandying of insulting epithets, the Hillsdale may row behind some inferior boat-load of Britishers. The race is not always to the swift, and stranger things than the defeat of a first-class by an ordinary crew have been written in the records of rowing. Racing on English rivers is very different from racing on American lakes, and it is quite within the range of possibility that the Hillsdale may not win their first important race, badgered and discouraged as they have been. While defeat under ordinary circumstances would not be disgraceful, defeat after all the howling and importunity that have been indulged in, would be little short of a calamity to American amateur oarsmen. Again we have to repeat that the management of the Hillsdales' interests in England has been very bad, and that American amateurs would have been the gainers in reputation had the champion crew packed up their oars and returned home the moment the English Association showed its unmanly determination to insult and discourage competitors from the other side of the Atlantic.

HANLAN ECLIPSED.—In the race between Boyd and Laycock, on the Tees, the first mile is alleged to have been rowed in 4 minutes and 45 seconds, and the full three and a half miles in 17 minutes and 28 seconds. Hanlan never put anything like this to his credit, and the London *Referee* says of the remarkable affair: "Were it not for his last race upon the Thames, we should now think Laycock was a worthy opponent for any one but Hanlan. Eighteen months or so ago it used to be said that if Laycock only possessed a turn of speed during the first mile or so, his wonderful force at the finish would enable him to hold his own with anybody. But theorists have had the ground cut from under their feet by means of the 'challenge cup' competition, which casts considerable doubt upon what was done upon the Tees during the present week. If Boyd was the Boyd we used to know—and there is no reason whatever to doubt the fact—and if both were trying, then Laycock must have been poking fun at the Londoners the week before last. Boyd was admirably well served by the length of the Tees course and the swiftness of the current. It was supposed by those who know best about rowing that he would jump away with the lead, and, served by the natural liveliness of the stream and the no less natural ease of the work, keep there until the goal was reached. As it happened, Laycock was there or thereabouts with him from the first dip of the sculls, was able to play with him before half a mile had been covered, and to go in front whenever he wanted. Here is a show of pace which I have no hesitation in saying Laycock has never made in this country upon any previous occasion."

IS HE A FRAUD?—The English sporting journals intimate pretty broadly that Laycock was mixed up in considerable "crookedness" during his late professional visit to England. Looking at his performances as honest races, they seem wholly inexplicable. On the Thames Laycock was rowed down by Largin, although Pearce and Laycock both appeared to be trying to pocket the English sculler, and beat him in that unfair style. The *Referee*, which is one of the most wide-awake of English sporting journals, comments as follows on the Australian's marvelous performance with Boyd: "On the show given by Laycock for the 'challenge cup' he could have had no possible chance against Boyd. If we are to judge by public displays, Boyd is a very much better man than Largin. Yet Largin rows Laycock to a complete standstill, though Laycock's great form is staying; and immediately afterwards Laycock completely outpaces Boyd in the first mile, though Boyd's best form is sprinting. Perhaps it is because Laycock has become fast that he has lost his previous staying power. Anyhow, a man who can row as he rowed Boyd on Monday last, providing everything was as it appeared to be, is a very different man from the man that even outsiders used to slip at the onset—a still more different man from the man who could not live a couple of miles by the side of Largin."

DISPOSING OF THE DELINQUENTS.—The Pioneer Rowing Club, which has long been most lenient in the matter of collecting monthly dues, has taken a new departure. At the meeting last Sunday half a dozen members were expelled for non-payment of dues and at the next meeting the black list is likely to be again curtailed. Considering how moderate the fees of the rowing clubs are the penalty of expulsion is not too severe for highly pecunious individuals who attempt to use a club property without paying a cent for six months. There is always a lot of such barnacles attached to every rowing club, and as their presumption is generally proportionate to their uselessness, the sooner they are lopped off the better for the organization. Another club on Long Bridge was to have adopted the heroic method of dealing

with delinquents, but the absence of a quorum at the last meeting saved the close-fisted athletes for another week.

STEVENSON AND PETERSON.—Austin Stevenson, the present holder of the Pacific Coast Championship, and Henry Peterson of the Golden Gate Bowling Club, are likely to meet this year on the bay to decide the question of superiority. As far as Stevenson is concerned there is no trouble, his money is ready and it only needs the consent and the coin of the young waterman to bind the race. There is talk of having the race take place over the Long Bridge two mile course on the second Sunday in September.

YACHTING.

ENGLISH AND AMERICAN TYPES.

Under the head of "Shall we Burn our Yachts" the New York *Spirit of the Times* has a very sensible article from which we quote a few paragraphs, premising that we are sorry want of space forbids the whole article being reproduced.

The British cutter Maggie has won two races—one on July 4, at the Boston City regatta, when she defeated the Hesper by 1m. 56s. actual, and some 4m. corrected, time, and again at the regatta of the Eastern Yacht Club, when she was beaten by some seconds by actual time, and won by allowance of time. On the strength of these small margins of victory the cutter advocates have raised a wild shout of triumph, and our yacht-owners are adjured to sell their sloops for clam-boats and build cutters. Let us see if the advice is sound; and in the first place we will admit that in yacht-building speed should be the great desideratum; that cutters are no more to be called racing-machines than are our centreboard yachts; that racing-machines are most to be desired, and that as soon as it can be shown that the cutter is a more speedy racing-machine than the centreboard sloop we are prepared to throw our cap in the air, and hurrah for the cutter with the most noise. We have no pet theories to establish, no national prejudice to overcome, and simply desire the fastest and best yachts for American yachtsmen. Our native production of cutters has not as yet gained a record for speed sufficiently brilliant to warrant its continuance, but a couple of these boats imported from England have won a few races. Do these successes warrant the continued production of these boats? We think not. The Madge came last year, raced with our boats over courses unsuited to them, and when they were by no means in first-class racing form, and beat them. That these victories could not be repeated this year has been practically conceded by those who had the Madge in charge, in that they have refused to put her in commission or allow her to meet again her opponents of last year, although they knew that the owners of these boats had been put to great expense in getting them in condition expressly with a view to race with the Madge, and that this decision on the part of the Madge's agents was a sound one, is proven by the splendid performance of the Wave during the Seawanhaka Corinthian Club cruise, the sailing of the Schemer in the Seawanhaka match, and the performance of the Shadow at the recent regatta of the Eastern Yacht Club.

It may then fairly be assumed that in the opinion of those who had charge of the Madge, either of the boats which she defeated last year could this season have beaten her, and in this opinion we fully coincide. Surely this experience of the Madge will not warrant us in building cutters, a type of craft notoriously unsuited to our waters, uncomfortable and extremely expensive. While prepared to advocate their wholesale production, if it can be shown that they are the fastest boats, we must insist that, unless it can be shown that they are most speedy, the manifest advantages of our beamy centreboard boats in other respects are so great that we ought by no means to change so much for the Madge. Now for the Maggie. She came to this country with the reputation of being "the best fifteen-tonner that ever flew a racing flag in British waters." So fast was she that for a long time no fifteen-tonner would sail against her, and she has had to sail in the twenty class, or sail against some of the recently built ten-tonners, classed such by a jugglery of measurement, but which are really fifteens, and to whom the Maggie had to give so much time that they were able to compete with her.

Now she beats the Hesper, a boat which, according to her designer, was but in cruising rig, a minute and fifty-six seconds in a twenty-mile race. All experienced yachtsmen know that the Vixen, the Fanita, or the Regina could have beaten the Hesper much more than that, and if the record of the Maggie proves anything, it proves that she could have beaten every other fifteen-tonner of Great Britain more than she beat the Hesper. What, then, is proved by this race? Clearly, that the Hesper, a second rate, could have beaten every fifteen-tonner in Great Britain except the Maggie. Surely then the argument against our building cutters on account of their speed is conclusive by as much as the whole number of cutters in Great Britain is to one.

We were not present at this race. We are not advised as to the time allowance, except that it was based on load line length, which, of course, was in favor of the cutter, her overhang, which was not taken into account, being much greater than that of the Hesper, but we are willing to assume that it was a fair and square race in every way, and that the Maggie, the best fifteen-tonner that has ever been in England, beat a second-rate American boat 1m. 56s. All that has been shown by this race, or that of the Eastern Club, is that the Maggie, the best fifteen-tonner that ever was in England, is about as good as our second-rates of her size. Surely this is not very encouraging to the cutter building business, nor is there, we humbly submit, anything to justify the psalm of triumph which has been raised by the Anglophobists, who lose no opportunity of sneering at the honest work of American mechanics, and praising to the skies all that is English.

At a recent meeting of the New York Yacht Club, Mr. Charles Minton, the Secretary, made a statement regarding the financial condition, from which it appeared that, notwithstanding the extraordinary expenses of last year's cruise and for defending the America's Cup, the Club was out of debt and had a large balance in the treasury. Mr. Minton was earnest in recognizing the necessity for a club house on the bay and a common club anchorage, and believed an inexpensive plan could be devised to meet this want. His remarks on this topic evidently met with much favor from the members present, and there is no doubt but that a committee will be appointed at the next meeting to report a plan by which this result may be effected.

The Chispa has been having her trunk, etc., painted.

The Virgin now has her moorings below bridges in Oakland Creek.

The "one gun start" does not seem to be as popular East as some of its advocates hoped it would be.

At the pennant race of the Larchmont Yacht Club, last week, some \$4,000 or \$5,000 was wagered on the result.

The frame of Spreckels' new yacht will be up in a few days at Capt. Turner's yard. The keel is set and timbers being prepared.

The Lillie was out on Saturday night with a party of ladies from Oakland, Capt. Cummings being in charge. They returned Sunday afternoon.

In the New York Yacht Club, steam launches of forty feet water line and over, belonging to members, may, upon application to the Secretary, obtain authority to carry the Club signal, but they shall not be entitled to any other privileges. Such application shall contain style, dimensions and horsepower of engines.

The Bohemian Yacht Club will open its club-house at New Saucelito shortly. The paper hangers and decorators are at work there this week. When the opening arrives all the yachtsmen will be invited, and a general good time is expected. The "owl flag" will float from the flagstaff surmounting the club-house.

A good sign of prosperous Eastern yachting is that yachtsmen who really love the sport have taken to the open sea. This class of yachtsmen will want a "ship" to go in, able to stand the sea and not run for the nearest port upon the approach of bad weather. This accomplished, and yachting becomes a sport worth indulging in. On this coast we have always had boats of this sort.

The schooner Ariel is creating a great deal of talk by her improved sailing since Capt. Turner took her in hand. He has made various improvements, and she has been walking away from some of the flyers since then. Last Sunday she astonished a good many yachtsmen. She now carries a Bermudian mainsail, the loup gaff having been taken down.

Arrangements are being made for a race on Admission Day, September 9th, by the Pacific Yacht Club. They hope to have all the large yachts in the bay compete. There is no reason why a first-class regatta could not be arranged except the apathy of owners of yachts. Those with the fastest yachts are willing to go into regattas, but those with second-rate speed do not care to take the trouble. It is to be hoped the Pacifics will succeed in getting up a good race.

Commodore John Eckley is going from his ranch on Carquinez Straits up to Sacramento in the little Dolphin, but is going as a passenger. His boys, Johnny, Frank and Henry, are the yachtsmen of the party, and invite their father to join them on the cruise. The accommodation of the Dolphin being somewhat limited, the party will camp out at night ashore, but this is readily done when once past the lower part of the river. They will go up by way of the old river, where there is plenty of fruit, and expect to have a jolly time. The Dolphin is 16 feet long only, but is a smart little boat.

The Lolita has gone to Oakland Creek to be cleaned. Capt. Chittenden keeps his tidy little yacht moving so much she does not get a chance to foul much, but still needs an occasional cleaning. The Lolita does as much cruising as all the rest of the fleet together. Her owner thinks no more of a sail up to Antioch than most people do of going to Saucelito. He will start at a moment's notice for Napa, Suisun or Sacramento, and be all ready for it too. The boat's accommodations and rig are for convenience, and the Lolita is a favorite with those who sail in her. During the winter months she is kept in Suisun marshes, in the duck hunting grounds.

A GOOD RULE.—The New York Yacht Club makes the yacht owners give a model of their boats to the club. The rule is as follows: "The model of every yacht entered for a regatta shall be the property of the club and retained in its possession, and no person other than a United States naval constructor shall be permitted to copy it, except he shall have obtained written authority from the owner of the yacht, nor shall it be removed without authority from the secretary of the club, who shall keep in a book provided for that purpose a record of same with full particulars relating to each model and to any changes that may be made. All models to be on a scale of three-eighths of one inch to the foot for all yachts of eighty feet water line and over, and of one-half of one inch to the foot for all yachts under eighty feet water line; but this rule as to scale shall not necessarily apply to any model in the possession of the club at the time of the passage of this by-law."

ATHLETICS.

THE FALL MEETING.

At the meeting of the Board of Management of the O. A. C. last week, it was decided to give an athletic meeting September 23d, most of the events to be open to all. It was deemed inadvisable to set the date for the 9th, as other attractions were too numerous on that day to warrant a good audience or a sufficient number of entries in the events to make the day as interesting as it should be. The officers, however, have demonstrated their ability to carry out the programme of twenty-five events in less than two hours and a half, and as Saturday afternoon is virtually after business hours with the admirers of athletics, it is not necessary for the club to wait until the next holiday (Thanksgiving Day) to give a meeting. The list of events will be posted in the club shortly, and it is hoped that entries will be numerous from all the clubs on the coast. Members of the club are very anxious to meet the University athletes, either in scratch or handicap events, and as almost every event will be open, and necessarily a handicap to ensure a large number of entries, the odium of being faint hearted will fall on the absentees. Judged by the performances of the athletes at the last few meetings, the University leads at weight putting, and in the one mile run, and possibly at hurdle racing; but the O. A. C. can give them long odds in all sprint races, jumping and pole vaulting. The Golden Gate Club is anxious to enter for the tug of war, but it is doubtful if there is backbone enough in the other clubs to compete against them. There is material enough in the O. A. C. from which to select teams of either of the three standard weights ca-

pable of defeating anything on the Coast, but the ambition to do the work and sustain the reputation of the club seems to be lacking among the members of the present day. The Lacrosse Club has been organized but a short time, but their entries promise to be more numerous, in proportion to membership, than any other club on the Coast. Before the meeting takes place, an election will be held in the O. A. C. for a new Board of Management, and the next year's officers will have but little time to prepare themselves for the event, but they will undoubtedly realize the importance of the occasion, and attend to their duties with an enthusiasm that will ensure an entertainment that will sustain the past reputation of the Club.

HALEY'S ATTEMPT TO BEAT THE RECORD.—R. S. Haley failed to do even time last Saturday. The day and track were good, and Bob watched the starter very carefully. The starter also watched Bob carefully, and the numerous attempts to beat the pistol were useless. The entire management of the event was very bad. Of the three watches provided for the occasion, only one was reliable. Haley was allowed three trials, and in each one he went over the mark two or three times, and was not once penalized. He ran the first trial alone, and was credited with doing 10 1/4. In the second and third trials Wm. C. Brown, with a liberal handicap, coached him up to within a few yards of the tape, dropping back each time at the finish to allow Bob to get the time. However his running showed very plainly that he lacked preparation, and he is probably well satisfied that he did not do better than 10 1-5. With proper training, he will be in better form at the September meeting, and may possibly do even time then. *Quien sabe?*

ANOTHER WORLD BEATER.—An athlete in Bodie is reported as having put a weight of 13 1/4 lbs., 45 feet 1 inch easily, and is confident of doing much better with a little training. That is within the possibilities; but when we hear of his putting 21 1/2 lbs. 35 feet 8 inches without much effort, we scout a country performance. As a friend at our elbow remarks, "the woods are full of them." It is like the 9 1/4 sprinters all over the coast. They are invariably beaten in a jog by 11 second men when the watches are held by competent timers.

BICYCLING.

THE EMBLEMS OF SUCCESS.—Considerable discussion has been going on both in England and in the United States during the present season, as to the propriety of giving expensive prizes for bicycle racing and other athletic sports, many holding that the prizes should be of a nominal value, and that the honor of winning should be sufficient for the aspiring athlete. It is, however, contended upon the other side that in order to attract the best talent when a race meeting is held, it is necessary to make the prizes of such a value that it will be worth the effort to win them. The expenses of training, too, are somewhat heavy, and the traditional laurel wreath is not thought by the present generation to be a sufficient compensation for the fatigues they undergo in the preparation or contest.

It may, however, be very pertinently asked, what difference can the value of the prize matter to the amateur, since he is not allowed to sell it? The fact that he has a finer medal to wear or piece of plate for his side-board does not help out his training expenses; and we cannot help thinking that there must be passing through the minds of those who argue from the contestant's standpoint, the possibility of realizing the coin value at some future time. We are very much afraid that, beneath all, there is a more or less pronounced mercenary or professional view, which is only held in check and prevented from actively cropping out by the social ostracism threatened by a strict amateur law. There is at least one sport pursued in this city in which the participants do not attempt to disguise the fact that they contend for money prizes, and hardly one of the numerous challenges which are published weekly but states a sum of money to be put up.

A Mr. and Mrs. Williams rode a double tricycle 102 1/2 miles in a day recently in England. Good proof of the practicability of the vehicle.

From appearances the champion who has this season been reposing on his laurels will soon have to come out of his retirement or give up the position.

The Fall meeting of the Athletic Club and the wheelmen promises to bring out some speedy riders, and is likely to show some seconds less than last year's record.

Lincoln Park has been opened to Chicago wheelmen probationally for thirty days, and there is practically no restriction against them to-day in that city. Last year at this time they had only the streets.

New England bicyclists find that the trip to the White Mountains in New Hampshire is feasible, and that even in that mountainous country there is much good wheeling; and the leisurely trip allows plenty of time to enjoy the scenery.

One of our most successful racing men is also one of the most unfortunate in his practice, having recently met with a severe accident while speeding through the Park in company with a fast horse. A sprained knee and an extensive gravel rash are the result.

On the final day of the Golden Gate Fair at Oakland Park, Saturday, September 9th, the management announce a bicycle race, a dash of a mile, free for all, for a purse of \$50, of which \$35 to the first and \$15 to the second rider. Nominations to be made with the Secretary on the first day of the Fair.

The monthly run for the gold and silver medals of the Salt Lake Bicycle Club took place recently, when the gold medal was won by Wm. Jennings, who rode one mile in 3m. 20s. The silver medal was won by James Woods, in 3m. 36 1/2s. A ten-mile race the same day was won by Jennings in 40 minutes.

Bicycle riding is again coming into vogue for exhibition purposes. Mr. Charles A. Merritt, the proprietor of the Sea Beach Palace Hotel, Coney Island, has made arrangements for a six-day bicycle race, to take place on the hotel grounds, beginning to-day. Mlle. Louise Armaindo and Miss Elsa Von Blumen will ride alternately for six hours each day against William J. Morgan, the champion bicycle rider of Canada.

Miss Lulu Montrose, an equestrienne claiming to hail from Colorado, on the afternoon of July 29, rode twenty miles on

a half-dozen horses, being allowed to change at will, against R. G. Beazely and J. S. Mellou, both riding bicycles alternately, at the Park Garden, Providence, R. I. The soft track was much better for the horses than it was for the machines, and consequently the bicyclists found themselves badly handicapped, Miss Montrose completing her twenty-five miles in the announced time of one hour and thirty-four minutes, which was probably correct. The bicyclists were beaten twenty-six laps.

BASE BALL.

THE HAVERLYS AND THE NIANITICS.

With the exception of a somewhat too boisterous wind the weather was quite favorable at the Recreation Grounds last Sunday, and the match between these two clubs attracted a very good attendance. Owing to the fact that two of the best men in the Haverly team were absent the Niantics indulged in the idea that for once they could get away with their redoubtable antagonists; but the theatre boys started with six runs in the first two innings, and although the Niantics scored four in third inning, the Haverlys finally won by ten to nine. The game was wonderfully well contested, and to the last it appeared doubtful on which banner victory would perch, and the interest was so well maintained by the general good play that there will be a far better attendance when the same clubs again come together on the diamond field.

Umpire—Piercy of the Renos. Scorer—Waller Wallace. Time of game—Three hours.

The Renos and Haverlys will try conclusions next Sunday at the same grounds.

On the same afternoon, at the Oakland grounds, there was a very one-sided match between the Underwriters Club and the Olympics, in which the former had to enter on their books "wrecked, and a total loss," the scores being thirty-seven to five. The Olympics are improving rapidly, their batting especially deserving notice; but they never could have scored so rapidly if the fielding of their adversaries had been of a less demoralized character. There is some excellent material among the members of the Underwriters Club that would be speedily developed with more practice.

THE LEAGUE CHAMPIONSHIP.

With July ends the first three months of the League championship campaign. Three of the eight League Clubs are closer in the pennant race than in any other League campaign since the association was organized. Up to date, July 31, two hundred and thirteen games have been played of the championship series. In 1881 the first three clubs on the list at this date were the Chicago, Buffalo and Detroit, Cleveland being next, Providence fifth, Boston sixth, Worcester seventh and Troy last. The two last clubs are still at the tail end, but Buffalo has lost ground considerably, while Providence has gained in proportion. Up to date Chicago holds the lead by having the best percentage of games, having one defeat less than Providence, while Detroit is two victories behind both Chicago and Providence.

The full record of the championship to July 31 is as follows:

CLUBS.	Chicago	Providence	Detroit	Boston	Cleveland	Buffalo	Troy	Worcester	Wm.
Chicago	2	4	8	4	7	2	4	4	33
Providence	2	4	5	3	3	3	8	8	33
Detroit	4	2	4	2	6	7	4	6	31
Boston	2	5	4	4	4	4	2	5	28
Cleveland	2	3	3	2	5	6	4	6	26
Buffalo	6	3	2	2	5	2	5	2	25
Troy	2	3	2	6	2	4	6	2	25
Worcester	3	1	0	5	0	1	3	1	12
Games Lost	20	21	23	26	27	27	28	41	213

Thus far it will be seen that the Chicago, Providence and Detroit Clubs are the only ones that have won a majority of their series with all of their opponents, Providence leading in this respect, having won eight games out of twelve with the Troy and Worcester Clubs. Chicago has won eight out of twelve with Detroit thus far, and seven out of twelve with Cleveland; and Detroit seven out of twelve with Buffalo.

One of the best games of the contest was played at Cincinnati on the 31st of July between the Cincinnati and St. Louis teams. The Cincinnati scored one run in the first inning, and that run won the game for them, as not another was scored, the score standing 1 to 0 at the close of the ninth inning.

BILLIARDS.

One of the chief attractions of the coming Fair at the Mechanics' Institute will be a billiard tournament for prizes offered by the Brunswick & Balke Co. It will greatly revive the interest in this pretty and healthful game, as the best players on the coast will be represented on this occasion.

THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 1338.

Five dollars a year; three dollars for six months; one dollar and a
half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF
BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, ad-
dressed to the "Breeder and Sportsman Publishing Company, San Fran-
cisco, Cal."

Communications must be accompanied by the writer's name and address,
not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

SAN FRANCISCO, - SATURDAY, AUGUST 12, 1882

THE FAIRS.

The entries in the purses of the California State Agricultural Society, Golden Gate, San Joaquin Valley, San Mateo and Santa Clara Fairs will be found in this paper. The others had not come when the last forms were sent to press, but from the grand showing which is made by those which are given the inference is that all will make a good display. Santa Cruz is the only fair which will take place until after another issue of this paper, and we learn that in the 2:25 class are Starr King, Del Sur, Crown Point, Sweetness and Cairo. It is not safe to predict what the outcome of this race will be, though it is absolutely certain that the race will be a good one. It is to be decided on the opening day of the meeting, and on the next day there is a running race, dash of a mile, and in it are May D., Kitty Cromwell, Sister to Lottery, Mollie H. and Night Hawk. This is also sure to be a lively affair, and on the following day the trotters Rowdy Boy, Slim Jim, Frank and Big Lize will contend in the 2:40 class.

The fourth day is the red-letter one of the series, as two running races are on the card, the first heats of a mile, with Belshaw, Trouble, Kitty Cromwell, Sister to Lottery and Haddington in. As it is a selling race, the weights are likely to equalize the chances, and bring them all in a ruck in every heat. The second race is heats of half a mile, with Quen Sabe, Bay Charlie, Mollie H. and Night Hawk in. In the 2:30 are Poscora Hayward, Blackmore and Sweetness. This is all that we have learned regarding the Santa Cruz purses, though, doubtless, if any of them have not filled others will be substituted.

The other exhibitions will be subsequent to the issue of the next number of the BREEDER AND SPORTSMAN, and in that we will give a description of the most noted of the entries, with a synopsis of their previous performances. That the list fore-shadows a series of brilliant meetings is beyond dispute, and we have not the least hesitation in predicting the finest sport ever witnessed on this coast, and this without a break, as many of the horses in the various classes are so nearly balanced that it is more than probable that there will be fluctuations, and such close contests that the winners at one place will be forced to take rear positions at others. Occasionally a horse comes out which is so far superior to his class that he goes clear through the circuit without suffering defeat. Overman gives promise of being one of that description, and after defeats in the Spring, he trots second in Cleveland and wins at Buffalo and Rochester. It was prophesied that Vanderlynn would never lose a heat in the classes he was eligible for, and yet in his first race he is forced to succumb in a third heat to a horse which was rated many degrees below him. And so the chances are favorable all through the circuit for kaleidoscopic changes. Though the 2:22 class is restricted to three entries, who can say which of them is entitled to the preference? And from the best of all tests, viz., that which each has shown in public, it would be a confident man who would back one and give any odds against the others. Already there has been an intimation of the glorious uncertainty in the 2:25, and before the sun of

Saturday sinks beneath the Pacific, the question may be still more complicated. All through the list the same blindness prevails, and the only place we would hazard a prediction is—is—is, well, Wildflower, in the Occident Cup; and as there is an old saying that "there is many a slip between the cup and the lip," even that might be an un-verified prediction.

By the way, the last payment in the Occident Stakes must be made to-day. The conditions are that the last \$50 must be paid thirty days before the Fair, and as that opens on the 11th of September, the 12th of August is the date to make good the previous payments.

Scan the entry list, and there will be few who will differ with us that there could scarcely be a more auspicious showing.

THE PARK DRIVE.

Coming from the races on the Bay District Course on Saturday evening last, the beauty of portions of it made a vivid impression, probably far greater than the regular visitor feels, although the quiet loveliness could not fail to afford pleasure to any one save perhaps those who had backed Sweetness and Starr King. The sun was half buried in the far-off western horizon when we turned to come to the eastward, and there was a broad path of glory on the smooth surface of the Pacific. A few hours before there was a lively breeze. A fog bank was settling to the north of the Straits, and Mount Tamalpais was crowned with a hood of pearl-colored vapor. With the going down of the sun came calmness, and the eager and nipping air of mid-day had given place to a milder atmosphere. The grass was greener in the softened light, and the bevy of quails were twittering under the evergreens. There was an aroma from the flower-beds which added to the gratification; and if the horse had not been so anxious to reach the quarters where his night feed awaited him, there would have been nothing to mar the harmony of the drive. Five hours in the sheds had whetted his appetite, and as we had delayed starting until the throng had gone, the roads were clear; the policemen had vanished, and the horse seemed to be aware that there was nothing in the way to prevent him going at a forty gait, if even he was incumbered with the avoirdupois of two "middle-weights." Clank, clank, came the steel-shod hoofs on the hard surface, the sound as clear as is heard from the anvil when the shoes are forged, echoing from among the shrubbery a regular cadence, distinct as metal coming in contact with nearly as hard a surface could produce. It is not surprising that there was a shortening of the stride, and that the long, open gait became quickened, the stroke accelerated, for there was a high spirit impelling the rapidity of motion, if even there was a stinging pain in consequence of the concussion.

What a grand place for a saunter among the green knolls, and the bright colors of the flowers, the chirruping of quails, and the background of placid water! This is eminently the proper ground for the stately coach-horse, or the one staid animal with a ton weight of humanity in the family wagon; but for the pride of the whole country wherever the Stars and Stripes are the emblem, the peerless American trotter, it is a snare and a delusion. The red, smooth surface appears favorable; the wheels glide over it without a jar, and not a great deal of strength is necessary to move the load at a fast pace. The penalty is sure to come, however, and the spirited horse of yesterday leaves his stable on the following day with swollen limbs and fevered feet.

While the horse was beating the Anvil Chorus in his homeward flight, we ruminated over the change which would follow the building of the proposed drive. Several gentlemen were discussing the scheme on the balcony of the Club House, and we were pleased to hear that the project met with the heartiest approbation—not a dissenting voice to throw cold water on the project. One who has abundant means to gratify every wish, stated that when the drive was determined upon he would be on hand with as fast a team as any one, provided

they could be bought. There will be the same emulation to excel as there is in the Eastern cities, and ten horses purchased where one is all that the market demands at present. Those who desire to enjoy fast driving are only a small proportion of the numbers which will be benefited, and though breeders, dealers and stablemen will obtain the most direct pecuniary benefit, the advantages will be shared by thousands who are outside these ranks. In fact, it will be of such general benefit that all will feel the good effects. This portion of the question will require an article, or rather a series of them, to properly demonstrate how general the accruing benefits will be.

YACHT RACING.

People often ask the question why we do not have more yacht races here. Why, with a fine bay, steady, strong breezes, a good course and fine yachts, no more races are announced.

There are several reasons for this. In the first place, it is a very expensive thing to get a yacht in order for a race. The expense goes up into the hundreds of dollars and sometimes to the thousands. A fine large yacht, with a reputation for speed, must have new sails for a race, new gear, must be overhauled, have a professional crew, go on the dry dock, and have money spent right and left on her. Expenses of running a yacht are heavy enough at any time, but on such occasions they are largely increased.

Again, the comparative standing of the yachts is pretty well known. If a general regatta of all yachts on the bay were to come off all the yachtsmen know that either the Nellie, Chispa or Aggie would take the first prize. These three yachts would be the first three in at all events. The interest of the spectators would be centered on them.

Now, owners of other yachts do not care to swell the procession to the glory of others. They do not want to go to the expense and trouble of preparing for a race when they know they have no chance to win. Some go in for the sake of the people who get up the regatta, but any reasonable excuse will be taken advantage of to keep out if possible.

A very potent reason, too, among yacht-owners for not entering their craft is the free criticism indulged in. A man may enter his yacht to oblige his club in filling up a regatta, knowing well beforehand she cannot hope to win. When he comes in behind he has the doubtful pleasure of seeing his yacht and himself freely criticized by the would-be critics, and his favorite villified as a mud scow or wood barge, while his skill is ignored, and all manner of fun poked at him by men who can handle a pencil, but do not know starboard from port. One or two seasons give the most enthusiastic as much as he wants of this. On regatta days, therefore, he saves himself the expense, annoyance and trouble, and goes as a looker on instead of a participator.

We know this is not the general understanding of these things, but it is true nevertheless. Again, the owners of speedy yachts do not care to risk the reputation of their boats unless there is good reason for it. Some will not sail unless there is money up. Others will not sail if money is up. Some will not let their yachts sail unless certain men will sail them. Others will not enter if other yachts are sailed by professionals.

And so it goes. There are objections of all kinds brought. And after all the arrangements for a regatta are made one after another backs out, and the committee are forced to see half a dozen yachts start, when more than double the number ought to go. This is true in the East as well as here, and these statements may furnish some of the reasons why yacht racing is on the decline and cruising in the ascendancy.

PURCHASE OF EXILE.

L. H. Titus has sold to J. B. Haggin the six-year-old stallion Exile, by Belmont, his dam Belle Mason, the pedigree of which is given in Answers to Correspondents. He is one of the handsomest trotting stallions in the State, and before the circuit is ended, he may conquer a place among the "Notables."

FOUL DRIVING.

If there is one rule in the Trotting Code which should be rigidly enforced, it is that which relates to foul driving. The term is well applied, as unfair advantages are anything but sportsmanlike, disgusting those who are the chief patrons of the sports of the track. The only escape from the evils which are sure to follow if unchecked, is for the judges to enforce, with inexorable firmness, the penalties for every breach. When the offence is so palpable that there cannot be a doubt of the intention of the guilty party, the extreme punishment must be awarded. The most flagrant cases are those when the perpetrator commits the foul on purpose to assist others, not caring for the slight punishment he receives, so long as he can accomplish the task he has undertaken. He carries out the nefarious compact, being well aware that the crime will be condoned in such a majority of instances that the risk is small; and if he be given the last place or his horse distanced, he chuckles over the success and plumes himself on the smartness he has shown. Were he conscious that he stood an equal chance of being heavily fined, suspended or expelled, there would be more hesitancy in undertaking the job; and an example or two will surely put a stop to the practice.

As all frequenters of the tracks are aware, there are a variety of misdeeds which are termed "fouls." The particular and specific offence which we desire to call attention to now is of the kind that often occurs, and which will require heroic treatment to overcome. One horse trots steadily, and another keeps in close company by indulging in a few breaks which are not very far outside of the rule. But on the back-stretch the trot is forsaken, and, partially screened by being hidden from the judges, he is lashed into a run, though skillfully handled, so as to keep the trotter up to the fastest pace without showing in front. Other runs are given during the heat, and when the lead is obtained, then there is swinging to the right and left in order to retard the one behind. When so close to the score that the judges cannot fail to take cognizance, the trot is resumed, and, between trotting and running, the winner is forced to open a gap on all the others. The winning has entailed, however, exertion which would not have been necessary if the other had trotted, and the one "hard heat" has a more potent effect than two or even three would if a trifle slower. With many horses, the excitement following a horse galloping by their side is far greater than when the contestant trots. Even a steady run is not so trying to them as when there is a change from the trot to the gallop, a succession of leaps, which rests though there be no absolute gain, discouraging the staunchest, and completely demoralizing those which have soft spots in their composition. There may be some excuse for a driver who, in his eagerness to win, exceeds the latitude which the laws allow; but when the object is merely to defeat to aid another; when he is merely a helper, a hired tool to assist in wearing out a dreaded competitor, there must be no temporizing. If fines will not remedy, try suspension. If ostracism for a limited period does not afford a remedy, let the sentence be for life. Should the clods prove useless, try what virtue there is in stones.

THE EMBRYO STAKE.

Owing to a misconception in a few, carelessness on the part of others, and still another class, who had a dread of meeting with colts they had no hopes of beating, the Embryo Stake did not receive the number of nominations which was expected. In order to give these a chance, there is a desire on the part of the subscribers we have seen to permit the entry of others, and there is little doubt that the concurrence of the remainder can be obtained. This concurrence it is necessary to put in writing, and we will be much obliged if the subscribers will send their acquiescence in the following terms: "I hereby agree that nominations can be made in the Embryo Stake up to and including September 15th." By keeping the stake open to September 15th, the opportunity will be given to all those who have colts at the State Fair.

THE PLUNGER'S ACCOUNT.

The imbroglia between Theodore Walton and James E. Kelly, and the charges brought by the latter against the heavy operator in the chances of horses, has raised so much of an excitement in New York that the *Herald* has published long accounts of the case. To a reporter of that paper Mr. Walton submitted his book for the time when it was charged he was engaged in the fraudulent transactions; and taking that as a true exhibit, he has not much success as the corrupter of trainers and jockeys. The nineteen days in July show as follows:

LOSSES.		WINNINGS.	
July 3.....	\$7,642 50	July 1.....	\$7,557 00
July 4.....	1,467 50	July 19.....	884 50
July 6.....	5,634 00	July 22.....	1,548 00
July 12.....	12,680 00	July 26.....	13,900 00
July 15.....	4,318 62		
July 20.....	4,754 50		
Total.....	\$37,022 12	Total.....	\$23,789 50
Net loss.....			\$13,232 62

He was particularly charged with bribing Snedeker, and his losses on the horses in that stable foot \$12,893, and, as Walton truly states: "Now, do you suppose if I wanted to corrupt jockeys I would have lost that \$24,830?"

To prove the animus of Kelly, he submits his account, that standing:

LOSINGS.		WINNINGS.	
July 12.....	\$800	July 15.....	\$1,250
July 20.....	250	July 19.....	1,200
		July 22.....	1,100
		July 26.....	3,250
Total.....	\$850	Total.....	\$6,800
Net winnings.....			\$5,950

Another strong point Mr. Walton makes is the query, why did Kelly bet with him when he knew he had trainers and jockeys corrupted? Including in his charges prominent trainers and jockeys, Mr. Kelly should have seen that these were supported by evidence which would carry conviction. Failing to do this, he stands in a bad position.

BALTIMORE LETTER.

Hiram Happy writes very happily of affairs in the Colony which ranked so highly in the horse world a century and a half ago. At that period it was held to be indispensable for a Maryland gentleman of means to keep a stable of race horses, and some of the best of the old-timeturf celebrities were owned there. Virginia and the "Eastern Shore" then held undisputed sway on the race-course, and the tug of war between the two sections was oftentimes a contest of the most stubborn kind. It is a great pity that the spirit has died out in the descendants of the Cavaliers.

Maryland Volunteer, which our correspondent thinks so highly of, is one of the very best bred trotting stallions. His dam was nearly thoroughbred, and one of the greatest performers of the season. She was the first animal wearing toe-weights we ever saw, and, as is recorded of Mayflower, these and the shoes were so ponderous that it was surprising that she could trot at all—three and a half pounds on each foot; and thus encumbered, she trotted fourteen races in 1871, and obtained a record of 2:22. Mr. Salisbury bought her, and (a great misfortune to him) she died last Winter, when in foal to Gibraltar. She had "missed" for several years, and her colt was nearly due at the time of her death. We shall be much pleased to hear of the Maryland delicacies which never go out of fashion; and there is little danger of the terrapin, canvas-back or oyster following the fate of the high-mettled racer.

TROTTING ON THE BAY DISTRICT COURSE.

There should be two very good races on the Bay District Course to-day, as Crown Point, Starr King, Cairo and Ashley try conclusions again, Sweetness, Poscora Hayward and Blackmore composing the second set. The track was in capital order last Saturday, and will be in the same fine condition to-day. There is every prospect of two good races and a large attendance to see them. The friends of Starr King were greatly put out by his defeat, and do not think it was a true line. The race was the work which all of them needed to give a keen edge on for the second contest, and

there is scarcely a doubt of the race being fully as interesting as the one decided on the 5th instant, notwithstanding the speed which Sweetness showed in the first and second heats in the 2:25. Should the others be all right and capable of repeating what has been shown in their exercise, there is no telling how the 2:30 race will end. The greys will keep coming, and as many realized after the former trial, three heats are essential to winning when "best 3 in 5" are the conditions.

A GRACEFUL REMEMBRANCE.

When General Grant visited San Jose, the Managers of the old Santa Clara Valley Fair Association were anxious to show him something which would be worthy of their guest. Those who were supposed to have the horses which were the most worthy of being paraded before the great commander, were inexorable in their demands that they should be paid a sum beyond what the Association could afford. Arguments were of no avail, but fortunately P. A. Finigan was made acquainted with the situation, and at once he made a proposal which overcame the dilemma. "There is Santa Claus," he replied, "with the fastest record of any colt of his age in the world. You can command his services."

The offer was thankfully accepted, Santa Claus was brought out, and gratified every one who witnessed the display of speed, duplicating the 2:18 which he had made at Sacramento. It still stands at the head of the list, and in commemoration of that, and as a token of the appreciation which was still cherished, the Society had a gold medal struck. On the face is the title: "Santa Clara Valley Agricultural Association;" on the obverse, "To P. A. Finigan, for his public spirit on the occasion of General U. S. Grant's visit, September 28, 1879." It is a graceful return for a kind act.

HORSES FROM OREGON.

There landed a few days ago the horses that A. J. Stemler took to Oregon, and with which he made a very successful campaign. Those taken to the north were Fred Collier, Jim Renwick and Lou Spenser, and accompanying them is Joe Howell, an old veteran of the turf, who has run in more States and Territories in the last seven years than any horse we are acquainted with. Lou Spenser met with an injury which will incapacitate her for some time. The others look remarkably well. The injury to the filly was occasioned by the steamer having to lie to, on account of the fog, before she could safely cross the bar; and the filly getting frightened at a Chinaman carrying his luggage preparatory to landing, jumped over a rail and injured her hock. She had shown very good form in her races in Oregon, and the mishap is very much to be regretted. The other horses will take part in the circuit, and the two sons of Joe Hooker, with the aid of the Bonnie Scotland, are likely to play a prominent part.

OVERMAN WINS AT ROCHESTER.

Overman is doing good work, and performing his part well, indeed, to keep up the reputation of the California horses in the East. He has won at Buffalo and Cleveland, in both cases beating very strong fields. At Buffalo he got a record of 2:20½, and though the track was very heavy at Rochester, owing to rain, the time of the heats was 2:21½, 2:23, 2:23½, 2:27½, 2:27½. The telegraph does not say which of the heats was won by Overman, but inasmuch as he won the last, he "outstayed" his competitors. The fifth heat of the pacing race on the same day was made in 2:27½, and the sixth in 2:31. Overman is likely to set well down in the teens before the season is ended.

THE 2:36 CLASS AT SAN JOSE.

The entries for the 2:36 Class at San Jose will close on Wednesday, the 16th instant. This is before the 2:40 "open" trot at Santa Cruz comes off, though it excludes the winners of heats on the Bay District last Saturday, and renders Vanderlynn and Freestone ineligible. With these redoubtable "green ones" out of the way, there should be a full entry list.

The members of Sergeant Kingsberry's watch have been shooting for the possession of two medals; the first, a fine gold medal for the best shot, cost no less than \$25; the other, for the second best, is a silver medal, and is worth about \$20. Officer Paddock won the gold, and Officer Pugh the silver medal, on a score of 73 points out of a possible 75. Though Paddock, Pugh and Cockrill tied on 73 points, the judges decided, according to Creedmoor rules, that Paddock was entitled to first prize, and Pugh to the second. The score of the watch in this shooting stands: D. J. Paddock 73, J. Pugh 73, R. D. Cockrill 73, P. Fox 71, J. Ianktree 71, S. M. Thompson 69, J. J. Hayes 69, J. R. O'Connor 68, C. Reynolds 68, J. Casey 66, J. Burk 66, J. E. Poole 66, J. Wallace 65, H. H. Gardner 65, T. P. Kingsberry 61, M. Whelan 61, T. D. Barnstead 58, J. H. Cahill 57, J. O'Donnell 55, J. H. Brigerts 43. According to the old custom, the winner of either of the medals could retain the prize as long as he continued to be the best or second best shot, but now, when one person has won a medal for the third time, it becomes his own property. If Captain Short's pistol team continue to improve in their shooting as much in the future as they have in the last year, it will not be long ere they will rank as second best to none.

THE KENNEL.

FIXTURES.

National American Kennel Club's trial on quails, Grand Junction, Tenn., December 4th. D. Bryson, Memphis, Tenn., Secretary.

Louisiana Field Trials near New Orleans, La., beginning Dec. 11 under the management of the New Orleans Gun Club.

BENCH SHOWS.—Western Pennsylvania Society's English Setter Bench Show Derby, Pittsburgh, Pa., for English setter puppies whelped on or after March 1, 1882. Entries closed December 1, 1882. I. R. Stayton, Allegheny City, Pa., Secretary.

FIELD TRIALS.—National American Kennel Club's trials on prairie chickens, Fairmont, Minn., September 4th. Entries to American Field Derby closed July 1st; to All-Age Stake, September 4th. Joseph H. Dew, Columbia, Tenn., Special Secre ary for these trials.

Gilroy Rod and Gun Club's trials on quails, near Gilroy, Cal., October 28th. Open to dogs owned in California, Oregon, Nevada and Arizona. E. Leavesley, Secretary, Gilroy, Cal.

Eastern Field Trials Club's trials on quails, near High Point, N. C., November 17th. Entrance to Derby close July 1st; to All-Age and Members' Stake November 1st. Fred. N. Hall, Secretary, P. O. Box 834, New York.

FIELD TRIALS AT GILROY.

A valued correspondent, himself a thorough sportsman, sends the following communication. The idea that this State cannot handle more than one field trial is different from our own views expressed elsewhere, but we admit freely that our correspondent's opinion is as valuable, if not more so, than our own. The subject is open for discussion.

"Parties are advocating the holding of the field trials this year in some more central or northern portion of the State, and one suggests that if Gilroy will not consent to that movement, to get up an independent field trial. This is always the way, as soon as anything is started and made a success of, every one wants to rush into it. One field trial is enough for California at present, when all the sportsmen of the State can congregate to see each other's dogs work, and which shows best style and nose. The actual winning will not be much, as the prizes are more honorary than valuable, and the entrance is low enough (\$5.00) to permit all who own a dog to enter. Sportsmen living north talk of the expense of sending their dogs to Gilroy. If they attend themselves, which, of course, they will, the dogs will cost nothing.

"Is not this feeling against Gilroy as much actuated by jealousy as anything else? A true sportsman should be the embodiment of everything that is noble and generous, and be above these petty jealousies about their dogs, which is so common among them. The fact is, California sportsmen do not know enough yet about dogs nor their performances, and have a great deal to learn both from field trials and bench shows. We know many so-called sportsmen who really do not know a pointer from a setter, but call everything a hunting-dog. Talk to them about Laveracks and Llewellyns and Gordons, and you might as well talk Chinese, and yet if they do not get a prize at a bench show they set the judge down as an ass, while they know it all.

"The Gilroy Rod and Gun Club have taken field trials in hand, and have done the work well. A great many first-class dogs from Oregon and elsewhere have been sent there for training, chiefly on account of the trials being held there, and to expect them to move them up to Folsom, or Colusa, or Marysville, appears to us absurd, and we cannot suppose that Gilroy will entertain the idea for a moment. There are many dogs from San Francisco that will run in the trials—and Gilroy is as good for them as any place north. Go on, brother sportsmen: put your shoulders to the wheel; eschew all jealousy, and send your dogs, good or bad, and let us see them. We don't want to hear what your dogs can do—we prefer seeing them for ourselves."

WAIT FOR THE SEASON.

Accounts have come to hand recently of private coursing matches held in various parts of this State. It is not the province of this paper to dictate to gentlemen how and when they shall practice their favorite sports, but perhaps a few suggestions will not be taken amiss. There can be no difference of opinion among gentlemen who understand the sport of coursing as to the evil effects of running dogs during the extreme hot weather that prevails in the interior of the State at this time of the year. It is positive cruelty to allow a dog to chase a hare when the thermometer stands 100 degrees in the shade. The cruelty is intensified when the dogs are taken from the cold climate of San Francisco. Experience has demonstrated that in case a dog is not in the most perfect health, a run in hot weather is almost certain death. Last year a party of gentlemen from this city took several greyhounds to Donohue's Landing in the month of August, and had several courses. One dog died, and three others were so seriously injured that they have been no good ever since. Two years ago, on November 1st, it was so warm at Merced that two dogs engaged in the Pacific Coast Coursing Club's match died shortly after they had finished their runs. Berry's Swindler and Fowler's Spirit of the Times died at Merced in that way, and the ill effects of the heat were so apparent that shortly after noon the club adjourned the meeting and waited for cooler weather. Apart from the danger to the dogs, other serious objections can be urged against coursing at this season of the year. The young hares are not big enough to make a decent run, and as the chances of starting a young hare are about twice as great as starting an old one, it may safely be said that every other run will prove a failure. Then, too, some consideration is always shown by the true sportsman to female game when with their young. About the middle of May most of the leverets are born, and but few of them leave their mothers until late in September. At such times the doe ceases to seek safety from her natural enemies by flight as she does during that part of the year when her young are able to shift for themselves. By a beautiful provision of nature the doe at this season abandons her usual "form" or seat on the bare plains, and seeks a secluded place in some thickly wooded opening or brush covered patch, where her chief foes, the squirrel hawks, cannot approach. On a fine sunny day she will venture out a short distance, only to rush back to cover the instant danger is sighted. She does not seek the vast expanse of the open plain, whereon to distance her pursuer, but, knowing that her young one cannot run, she hides away. In Nevada and in the Territories the Indians run down and capture alive in nets vast numbers of jack rabbits at this season of the year, while in the Fall and every Spring the offer of \$5 a head will not procure a live jack from Fresno to Round Valley. It is to be hoped that sportsmen will be more merciful than are the Indians, and will give the hares a rest until the cold weather comes. At the present time there is no need for any protection for hares. The damage that they do to the crops makes them a pest to the farmers, when they are

found in large numbers, and it would be very bad policy for local sportsmen to ask that they be included in the game laws, which are already a little irksome to the grangers, though absolutely necessary for the protection of what game there is left in the State. One predatory pot hunter, with his little shotgun, will kill more hares in an hour than would suffice for game for the largest coursing meeting in the State, but for all that if the coursing men do not protect the hares around San Francisco, where they are very scarce, they will find that in a few years they will have to dispose of their greyhounds for lack of game.

SACRAMENTO GREYHOUNDS.

A Sacramento correspondent sends the following notes of coursing matters at the Capital City:

Around Sacramento are owned many well bred greyhounds, several of which have won fame at the large coursing matches. First in point of honor comes Bradley, owned by Michael Hanrahan. Bradley has defeated all the local dogs, and also all the dogs that have been brought against him from other parts of the State. The list of those he has vanquished includes Blue Jacket and Dakota, though I believe that in one of the last named matches the judgment was very unsatisfactory to the coursing gentlemen from San Francisco. P. Kelly of Sacramento owns several fine dogs, including Raven, a three times winner. Joe Powers of Brighton has a kennel full, and so has his neighbor Mr. Hull, whose string includes Snow Bah. M. Howard still owns the well known slut Amy Howard, who won third prize last Fall in an open stake. Mr. Shaw's slut Whitney has a fine litter of pups, by Kelly's Black Jack of the Cartwright strain. M. Keenan, R. Mohan and J. Fagan are also among our coursing men, and last, but by no means least, comes A. J. Woods, the owner of the celebrated slut Kitty Woods, who ran second at the open meeting held by the Pacific Coast Coursing Club, in the Spring of 1880, and also took second at Sacramento. The Sacramento coursers have a considerable distance to go to find good running ground, but there are many gentlemen in your city who can testify that Whitcomb's ranch, about 15 miles from here, will afford as good sport as any ground in the State.

MORE FIELD TRIALS.

Several gentlemen have recently written to various papers giving it as their opinion that the Gilroy Club ought in fairness to hold their next trials at Folsom or Sacramento. These suggestions, though perhaps if adopted they would tend to popularize these trials, are not very logical. It is about the same as asking that the Bay District Association should hold its races on the Chico track. It is a fact that dogs brought from a distance may suffer a little from the journey, but it should be, and doubtless is, a matter of honor with the Gilroy Club that no dog be allowed to hunt over the ground selected for the trials before the trials take place. The necessity of preserving enough game for the trials is of itself sufficient reason for the enforcement of this rule. Doubtless a declaration from the Gilroy Club that they allow no hunting over the ground—which, by the way, is private property—in advance of the trials, will entirely dispose of all talk about fairness. The objection to distance cannot be met, but sportsmen must remember that the Sacramento or any other Club has the same chance to inaugurate these trials as did the Gilroy Club, and for their own convenience can arrange trials to take place as near home as they please. There cannot too many clubs take hold of this matter, and this paper will do all in its power to foster not only the trials of the Gilroy Club, but of any club that has enterprise enough to arrange others.

BURGESS ON LEAVESLEY.

At a recent meeting of the State Sportsman's Association of California, Mr. E. Leavesley, of Gilroy, read a paper on sporting dogs, which was published a short time since in the columns of the *American Field*. In the course of his remarks, Mr. Leavesley indicated a reference for the Laverack setters over the Llewellyn strain. This aroused the anger of Mr. Arnold Burgess who is the great American promoter of the Llewellyn strain, and who has a large sale kennel full of this stock. Mr. Burgess is a contributor to the *American Field*, and in the last issue of that paper makes a savage attack upon Mr. Leavesley which certainly passes the limit of those restrictions of courtesy and good breeding usually observed among gentlemen in argument. Mr. Burgess' criticisms of Mr. Leavesley's letter are all based on the assumption that Mr. Burgess and his friends are all right and that certain English authorities, as for instance "The Setter," are all wrong. Mr. Leavesley certainly should not be abused for accepting as an authority on such matters a work published in England, and there almost universally believed, and which was positively stated to be accurate by Mr. Laverack himself. If Mr. Burgess' assertions are as incorrect as his use of the English language, then they are more utterly worthless than he would have the public believe are the views of Mr. Leavesley. We have not space to print all his errors; one instance will suffice. He says:

It is evident that Mr. Leavesley has been inoculated with the Laverack-phobia, and like other advocates of those dogs tries to make out a case for them by quoting all that can be said in their favor, and carefully concealing all facts that militate against them. Fancy the gentleman, like other Laverackphobists, would denounce in forcible terms the man who dared ask what is the use of keeping the so-called Laverack blood pure; but then, of course, principles differ to suit different cases.

The contest shows that Mr. Burgess intended to convey the idea that Mr. Leavesley had been inoculated with a love of the Laverack. His use therefore of the coined words "Laverackphobia" which means a hate of the Laverack, and the word "Laverackphobists," which means haters of the Laverack, is an unparadonable inaccuracy in a critic. Some of Mr. Burgess' criticisms are probably correct enough, but they are so obscured by his novel use of the English language that they are difficult to understand. In our opinion, Mr. Burgess' criticisms of Mr. Leavesley's paper detracts only from the former's reputation as a writer, and adds nothing to the world's store of information.

DOG STEALING IS LARCENY.

In the case of the State of Ohio vs. Michael Moran, Judge Tilden recently decided that dogs were personal property under the law in the State of Ohio. The conclusion of his decision is as follows: "There are some decisions to be found in this country where the common law rule is adhered to that there can be no larceny in the feloniously taking and carrying away a dog, but I venture to affirm that no decision can be found in any State with a statute similar to our own that declares that the stealing of a dog is not larceny. I therefore decide that a dog is property—a thing of value, and that the stealing of a dog in Ohio is larceny. The motion in arrest is therefore overruled."

A CANINE CHAMPION.

At the recent dog show in Paris, France, the *Prix d'honneur*, which was competed for by setters of all breeds, was won by the Llewellyn setter dog, Kars, owned by Mr. Ivan P. Pranishnikoff, an artist, and formerly connected with *Harper's Weekly*. Kars was bred by Mr. L. H. Smith, and is by his Paris out of Pearl, formerly owned by Mr. Smith, but now the property of Mr. A. S. Bishop of Pittsburgh, Pa. Kars is a blue belton, and was whelped July 6, 1877, and is a litter brother to Mr. A. H. Moore's Lass O'Gowrie, and to Dr. S. Fleet Speir's Wanda.

GORDAN STANDARDS.—Samuel J. Dixon, in the *American Field*, gives the following scale of points as in his opinion the fairest and most comprehensive by which Gordon Setters can be judged:

Skull.....	15
Nose and lip.....	8
Eyes.....	5
Ears.....	5
Neck.....	4
Shoulders and chest.....	15
Back, quarter and stifles.....	15
Legs, elbows and hocks.....	8
Feet.....	9
Stem and flag.....	4
Coat and feather.....	4
Color.....	8
Total.....	100

Mr. Edmond Orgill has sold the following lemon and white pointers to Mr. M. O. Lonsdale, of Portland, Oregon, viz.: Rocket, by imp. Claude, ex imp. Champion Romp; Rhyl, by Rome, ex Champion Kelly and Rosalie, by Champion Rush, ex imp. Dart. Mr. M. O. Lonsdale is said to have the finest kennel of sporting dogs on the Pacific slope. If the above selection is a fair specimen of Mr. Lonsdale's judgment, he certainly is a gentleman possessed of rare stock.—*Turf, Field and Farm*.

GREYHOUND PUPS.—The imported greyhound bitch Prairie Girl, belonging to D. L. Levy, 39 Third street, on July 31st, gave birth to eight pups. The pups are by Baron Walkden, imported by Mr. Levy at the same time as the bitch. All the litter take strictly after the Baron, not one resembling the mother. In such cases as this it generally happens that when the pups all take the form of one parent, they all take the spirit and energy of the other.

THE HERD.

Fred. Brunner, the noted cattle man, recently brought 200 head of fine beef cattle, from his cattle range in Calaveras county for Gerlach & Fiske of the El Dorado and Avenue markets, Stockton. Mr. Brunner has been long noted for raising fine, fat cattle, and which always command the highest price in the market.

The *Grass Valley Tidings* is informed by a gentleman from the rural districts near that locality, that there is a scarcity of beef cattle in Nevada and adjoining counties, and that there will scarcely be enough to supply the demand this Fall and Winter. Every day men on horseback visit the different farmers in this part of the country, and buy up everything that is purchasable, and that can be converted into meat. This has not occurred before for years.

Very many people desire to raise hornless cattle. It is asserted that this can be easily done, no matter what breed the cattle may be. A correspondent of the *Country Gentleman* tells the manner of it: "When the calf is old enough for the horn to start, a very small protuberance is felt upon the bones of the head. Take a knife and cut a small cross over this little horn, and lift out the incipient horn, press the edges of the wound together and put an adhesive strap over it, and there is no more trouble, and you have hornless cattle."

ENGLISH SHORTHORN BREEDERS.—During the late show of the Royal Agricultural Society at Reading the Shorthorn Society held a meeting, at which Earl Bective presided. The report of the Council stated the Society now consists of 495 life members, and 623 annual members, making a total of 1,118. The life compositions paid during the year, amounting to £168, have been invested; and the Society's reserve fund now amounts to £2,269 1s. three per cent. consols. The report stated that the 28th volume of the Herdbook will be ready for issue about October next. The report concluded by observing that, alike with all other branches of agricultural pursuits Shorthorn breeding has suffered from the depression experienced of late throughout the country; the Council, however, trusted that by the individual efforts of every breeder, the important characteristics of the Shorthorn breed will not only be maintained, but that it will become still more widely known and appreciated throughout that and other countries.

LARGE PRICES FOR JERSEY CATTLE.—The St. Heliers herd of Jersey cattle, owned by Mr. W. H. T. Hughes of Long Island, N. Y., was sold in New York, on the 21st July, and the prices fetched considered good, the total sum realized from thirty-three head being \$8,385, or an average of \$254.13. The highest price paid for any one of the lot was \$625 for Lady La Grise, an imported cow, three years old, by Pilot, out of Fragrance, bred by Nicholas Noel, St. Saviours, Island of Jersey, bought by James Mouaghan for Congressman A. S. Hewitt. Lady Rose, three years old, and a bull calf, by the Duke of St. Heliers, went for \$610 to Mr. F. C. Havemeyer. Mr. Watson paid \$525 for Lady Gypsy, three years old. Mr. A. B. Colgrove, of Middletown, Conn., paid \$600 for William the Conqueror, by Pilot, out of Lady La Grise. Pilot is by Gray Coat, whose sire was Khedive, a son of the famous Coomassie. Pilot's dam, Rosa, was a daughter of Khedive, so that this young bull gets a close double cross of the blood of Coomassie through his sire, and as Lady La Grise is by Pilot he gets three crosses of Coomassie. Khedive got Princess II., who at the sale in May last brought \$4,800, the highest price ever paid for a Jersey.

DAIRY SHORT-HORNS.

Not long since Mr. W. Ashburner read a paper before the British Dairy Farmers' Association on the above topic, from which the subjoined extracts are taken:

"I have a Short-horn descended from Mr. Collin's dairy, that gave sixteen quarts of milk per day after calving her first calf in September, 1879; twenty-two quarts per day after her second calf, in August, 1880; and a similar quantity after her third calf in July, 1881. The three calves are all remarkably healthy, and I had one hundred guineas offered for her second calf before a year old. I ask you,

gentlemen, is this a bad sort of Short-horn dairy cow? I have also a daughter of a wellbred Short-horn that won the first prize for the dairy three years in succession against cattle of any breed, and took the silver cup at the same time for the best cow and her offspring. Is it not enough that animals descended from recorded ancestors of upwards of half a century are so noted for the dairy as well as breeding good cattle?"

The speaker proceeded to criticize the system of high feeding practiced in the youth of Short-horns which he said is ruinous to the development of the milking propensities, because it gives the animals such a tendency to fatten. His plan is not to feed to excess so as to injure the animal as a breeder or milker, nor on the other hand to aim at being too economical in feeding to injure the growth of an animal when young. The happy medium is the one needed to make a good Short-horn dairy cow, but even to get at this requires a little experience. Our aim should be an animal well formed, of good quality, of sufficient size, and in a fair healthy condition; one that will do good to any farmer by breeding similar animals, and concludes by saying that this can be attained by rearing stock in a natural way, and by selecting male animals of good descent, from good parents, from a dam with a good udder and the sire from a dam with a good udder; at the same time not forgetting the constitution of the animal, by looking entirely to the dairy properties.

POULTRY.

THE POULTRY EXHIBIT AT THE STATE FAIR.

It is to be hoped that all those who make a specialty of breeding poultry of the best class, as well as others who, as amateurs, take a pride in raising rare and valuable species of European extraction, will take the trouble to make the Poultry exhibition at the State Fair more of a success, both in quality and quantity, than has been the case in previous years. The fact vouched for by Mr. Thomas Waite of Brighton in his letters to the *Journal*, that there is more profit in a well conducted poultry yard than in raising pigs, is open to discussion and this result may be based on the superior experience of the manager of the Brighton poultry yard as well as on his energy and enterprise in selecting, at any price, the very best breeds. In France the raising of poultry is carried to perfection and thousands of peasants gain a good livelihood for themselves and families from this source only. In England, the barnyard is the pride of the farmer, for within its boundaries he sees the care and forethought of his wife and daughters, who, as in the dairy, take a pride in their occupation, for it is generally from these two sources that they get their pin money for all their clothes and extras. We should like to see this example followed in this country, and for that purpose we suggest a full exhibition of all varieties at the State Fair, and that the managers have a small pamphlet written to be distributed gratuitously describing the various breeds and the qualities for which they are celebrated.

By such simple means we may get our ladies on the farm more interested in the subject than is the case as now; with the facilities afforded by the canning establishments, we may start an immense trade that will enable us to get rid of our surplus stock at very remunerative prices. Canned terrapins and frogs are esteemed as great delicacies, and we have just the climate to carry out the French plan of raising and fattening poultry on the most extensive scale. The managers of the State Fair guarantee that the birds shall be carefully provided for, and they offer the following premiums, so let us hope that the exhibition will be the best ever held in the State: Best pair Brahmas, \$5; best pair Cochins, \$5; best pair Games, \$5; best pair Hamburgs, \$5; best pair Leghorns, \$5; best pair Black Spanish, \$5; best pair Dorkings, \$5; best pair Dominiques, \$5; best pair Plymouth Rocks, \$5; best pair Polish, \$5; best pair French Fowls, Hudson, Crevecoeur, or La Fleche, \$5; best pair Seabright Bantams, \$5; best pair Game Bantams, \$5; best pair White Bantams, \$5; best pair Black Bantams, \$5; best pair turkeys, \$10; best pair ducks, Rouen, Aylesbury, Pekin, or Cayuga, \$5; best pair geese, Toulouse, Bremen, or China, \$5. All fowls will be judged according to the American standard of excellence.

GOOD BREEDS FOR GENERAL USE.

Fowls that combine the properties of both flesh and egg production are difficult to find and yet are frequently inquired for. It is nearly useless to try to unite the two qualities of flesh and eggs in one bird—it cannot be done in perfection. Fowls that attain the largest growth are slow in maturing, and before maturity is reached, it is unreasonable to expect any eggs. The large fowls require the whole season for development, and when cold weather sets in, it is difficult to force them up to egg production. Feed accomplishes wonders, but nature will take its course. For this end, however, the Houdan fowl may answer a good purpose where the breed is understood. They will make much flesh, and that which is prized by epicures, and are what might be termed good layers, unless when compared with the laying of the Brown Leghorns. The Houdans are non-sitters.

The Dorking is an excellent fowl, and unites size and quality of flesh with a pretty good yield of eggs for the season. They are sitters. Where size is not required, there is no bird that equals the Brown Leghorn for any purpose. At all seasons of the year they give a bountiful supply of rich, medium sized eggs, and the flesh, being sweet and fine grained, is greatly prized for early broilers. Size is demanded by the majority of poultry seekers, and it is only to be attained at the expense of quality and egg production. The Asiatic fowl has for many years been the meat producer for the multitude. Epicures choose the Game and other choice-bred birds, but most poultry consumers take the feather-legged bird.

For a roast there is no fowl equal to the Dorking. It grows to a compact shape, of good quality of flesh, with small offal, and is sweet and juicy. The Asiatic fowl is oily and strong, more like aquatic fowls: Next the Dorking may be reckoned the Crevecoeur fowl. In size it is a little below the Dorking, but the quality of the flesh is choice and fine. They are of a fair size, hens weighing from four to five pounds, and cocks from six to eight pounds. They have black plumage throughout, and are very handsome, ornamental fowls when nicely bred. They are good layers of large, fine, white eggs, and do not sit. They are rather tender.

One great drawback to good success with poultry results from not understanding the breed kept. The Houdans are what is termed hardy fowls, but require careful treatment. They should not be herded with other fowls. Their in-

crease crests obstruct the vision, except one way, and this renders them helpless against attacks of other fowls which they might in fair and open combat easily repel. They cannot withstand wet or dampness, but are not so sensitive to cold, providing it be dry, as some other varieties. The Dorkings are very tender, and so are the Crevecoeurs. The Dorkings must have a warm place in winter. They are even more sensitive than the large combed varieties, but will compete with them in egg production if well fed during the winter. There is no fowl more hardy, after fully grown, than the Leghorns. They will withstand great cold without injury, but no breed will endure gross neglect. Leghorn chicks are delicate when young, but soon get out of the way. They are rapid growers and mature early.—C. B. in Country Gentleman.

ANCIENT AND MODERN ARMS.

BY DR. E. H. PARDEE.

[Continued From No. 4.]

Without the invention of gunpowder there would necessarily be no firearms, and were we unable to generate steam we would have no steam engines, for as a matter of fact, the ponderous guns made by Krupp or the engine made by Fulton would never have been constructed for either ornament or use. But the application of fire has made them both servants to the ingenuity of man; the one as the modus operandi for the exchange and carrying trade of the products of the earth, and the other as the great engine of war, by which man may slaughter and kill his fellow man by the hundreds of thousands, and that, too, in accordance with the most approved and scientific principles of civilized warfare. Without the steam engine, the commerce of the world would be conducted by the slow process of the sail, as it was one hundred years ago. Without the chemical compound of gunpowder, the belligerent nations of the earth would settle their little difficulties with the same implements of war that were used four hundred years ago. But as soon as the propellant force of gunpowder was established, the inventive mind of man began to devise means to make it subservient to the will of man, and to what extent it will be carried nothing but the revelation of time can tell.

Who can say what one hundred years will bring forth? Even fifty years from now, it may be, there are those now living that will see the gas of gunpowder bottled up and utilized as the motive power to take the place of the steam engine.

The history of gunpowder is contradictory. Some historians give it to the Chinese, or an explosive powder similar to gunpowder, which they use in the manufacture of fireworks. There can be no doubt of its existence in India during the life of Alexander, who showed a little cowardice when marching his army between the Hyphasis and the Ganges, a land occupied by the Oxydracians—a people possessed of superhuman means of defense. "For," it is said, "they come not out to fight those who attack them, but those holy men, beloved by the gods, overthrow their enemies with tempest and thunderbolts shot from their walls." And when the Egyptian warriors, Hercules and Bacchus, invaded India, they attacked those people with an army flushed with victory, "but were repulsed with storms of thunderbolts and lightning hurled from above." This I regard as the first evidence on record of the existence of an explosive material, and I am fully convinced that from this circumstance the cant phrase of "home-made thunder" took its origin. How applicable it is to the American demagogical politician, "cheap political thunder," a great big noise emanating from some ward politician, replete with the personal pronoun *I* and filled with high-sounding phrases of what he has done for the poor people. Enough of these fellows live in Oakland to keep the dear people most thoroughly enlightened upon all issues of the day by their "cheap political thunders" on the street corners. And I know of two or three men, if a record or tally had been kept of the number of big pronoun *I*'s that they have vomited from their brazen political throats, they would fill a volume 6 x 6 feet with ten thousand pages. And the little *u*'s, well—"what's the use talkin'—"

Roger Bacon, one of the greatest philosophers and alchemists of his day, who was born in 1214, is credited with having made the discovery of gunpowder; but there is so long a stretch of time between the historical account of a combustible material used by the Oxydracians in the days of Alexander, when he led the Macedonian army to victory, was some 330 years B. C.; while the birth of Roger Bacon was 1214 years after Christ. From these statements a deduction can be drawn that there was an explosive material that was used in the form and purpose of "hobgoblin," but not as an agent of war, and as no particular use was made of it in the arts and sciences, it became obsolete and forgotten, and until Roger Bacon made the discovery of gunpowder, we can find no authentic record of its existence. However, a German monk, by the name of Schwartz, claims the discovery, but not till the year 1320, nearly a century after the discovery made by Bacon. In the "Antiquated Arts," by Scott, inference is given, that beyond all doubt the Arabs possessed a knowledge of gunpowder, and through the Saracens its component parts were introduced into Europe about the middle of the 13th century, and it is also an admitted fact that it was not used as a projectile force but for fireworks only.

In the epistles of Roger Bacon, in his "Secret Arts," I quote the following, which ought, to a great extent, settle the important event beyond all cavil: "For sounds like thunder and flashes like lightning may be made in the air, and they may be rendered even more horrible than those of Nature herself. A small quantity of matter, properly manufactured, and not larger than the human thumb, may be made to make a horrible noise; and this may be done in many ways, by which a city or an army may be destroyed, as was the case when Gideon and his men broke their pitchers, and exhibited their lamps, fire issuing out of them with great force and noise, destroying an infinite number of the army of Midianites." And in a subsequent chapter of the same work occurs the following, which is almost positive proof that to Roger Bacon, the monk, belongs the honor of making known the ingredients of the combustible compound. He says: "Mix together saltpetre with *lura mone cap urba* and sulphur, and you make thunder and lightning, if you know the method of mixing them."

It will be at once seen that all the ingredients of gunpowder are spoken of here save that of charcoal; which, in my opinion, is covered up under the almost unintelligible inscription of "*lura mone cap urba*," and it may be that *Anagram* was converted into *Carbonum pulvere*, which would make the whole thing, as far as old Roger is concerned, "*suh rosa*."

And as it is known that Roger Bacon was an "Arabic Scholar," the supposition is but fair that he got the explosive combination, both quantitative and qualitative, from some Arabian writer, with whom I don't profess to be on intimate terms, but claim him as a distant relative, through the most singular coincidence the world has ever chronicled, the incubation, the birth and propagation of my greatest grandfather Adam.

I have little doubt when old Roger Bacon gave to the world the invention of this simple and wonderful compound, that he never once thought of the greatness and grandeur that future ages would impart to it. Little did he think that he was putting into the hands of the civilized world an agent by far the most powerful that skill has ever devised or accident presented. Possessing, as it does, a power more terrible in every succeeding age, and subserving all the progressive resources of the arts and sciences invented by the genius of the human intellect for the extermination of mankind, which, as I write, appalls me with a feeling of incredulity hard to describe, at the future prospects of my kind, with a spontaneous sensibility to reconcile the developing strides that this engine of war may take in the sure approaching future, with the mysterious dispensation, with the benevolent order of Providence.

[To be continued.]

[SAN FRANCISCO (CAL.) CALL.]

BELOW ZERO---THE JEANNETTE---WHY PAST EFFORTS TO FIND HER FAILED.

LIFE-SAVING STATION No. 7, 12th DISTRICT, OCEAN BEACH, POINT LOBOS, CAL.

A reporter has just had an interesting interview with Henry Bohn, keeper of the above station, the details of which are of such profound interest as to warrant their full publication for the readers of the *Call*:

Mr. Bohn was a member of the crew of the *Corwin*, which left San Francisco, May 22, 1880, in search of the *Jeannette*, returning October 15, 1881, after an unsuccessful search for the lost steamer. The *Corwin* crew numbered forty-two, all of whom returned sound and well from the Arctic expedition. They could gather no information from natives along the coast in regard to the missing *Jeannette*.

"But," added the plucky explorer, "I am sure we would have found her had we not been frozen out at Wrangell Island." And then he went on to give further details. He said: "It is true we all got back safely, but a number of us suffered intensely on account of the extreme weather. I had a fearful cold on my lungs, and should not have been here to-day telling the tale, but for a wise provision before our departure from this city. I feel as if I desired everybody to know what did some of us so much good during this terrible voyage. We had taken a good supply of St. Jacob's Oil on board, and to this I owe my life. Two others of our crew, named Rolfsen and Wilson, were in a dreadful condition from neuralgia and rheumatism, and this wonderful remedy saved them. There isn't a scintilla of doubt about it. See here," he added warmly, pointing to a box close at hand, "see here, we have a supply right here at the station. It is a grand thing to use after exposure. It is the enemy of all disease. It is the king of pain. It is the destroyer of sickness. It is the glad harbinger of health. It is the silent physician that never fails to cure his patient. It is the evangel of blessing. But I am getting eloquent over it, and ought to do so, for it saved my life. Of course men in my vocation must meet all weathers. We cannot stand on the order of our going, storm or no storm. During the sixteen months that I have been here we have saved thirteen lives. The last day of October, 1880, the entire crew of a brigantine were saved by this station. The Great Gorman Remedy did good work time and again, I assure you. It was like a messenger of mercy. It is a great thing to have—the right remedy at the right time. For the lack of it many valuable lives are lost. There's no denying this fact."

Mr. Bohn, who related this, is a very intelligent German—a native of Hamburg—courteous and obliging in the extreme, a genuine man, as any one can see from a brief interchange with him. He strikes one as being the right man in the right place—a candid, honest, outspoken man, who states things as they are, and who "would not flatter Neptune for his trident, or Jove for his power to thunder."

Golden Gate Fair. COMPETITIVE MILITARY DRILL!

A COMPETITIVE MILITARY DRILL

WILL TAKE PLACE AT

OAKLAND PARK, on SATURDAY SEPT. 9,

LAST DAY OF THE FAIR WEEK.

To be given under the auspices of the GOLDEN GATE FAIR ASSOCIATION, DISTRICT No. 1, in which INFANTRY, CAVALRY and CADET Companies will take part.

Open to all Organized and Unorganized Companies, either Independent or members of the National Guard.

Cavalry to drill Mounted.

Companies to appear in Parade Uniform.

General appearance of Men, Arms, Uniforms and Accoutrements to be considered.

Companies to drill NOT LESS than 16 file front in double ranks; say

Corporals and Privates—32

Guides and File-closers—4

Commissioned Officers—2

Minimum Strength 38 (not including musicians.)

PRIZES:—CADETS.—\$150 Gold Medal. INFANTRY. First Prize.—\$100.

Second Prize.—\$50. Third Prize.—\$40. CAVALRY.—\$100.

Companies intending to compete will please send name of company to the Secretary on or before August 17th.

J. H. GILMORE, Superintendent.

MARKET REPORT.

FLOUR—Prices vary but little from last week. Best City Extra, \$5.50@5.62; Superfine, \$4.50@4.75; Interior Extra, \$4.75@5.25; Interior Superfine, \$3.75@4.25 bbl.

WHEAT—We are unable to obtain data of spot transactions, and have therefore to be governed somewhat by asking rates. We know that \$1.71@1.72 are the figures to which holders tenaciously cling for good to choice parcels, while prime milling lots are hard to find at anything below \$1.75 c. It is true that the tone of the market is less steady than at the beginning of the week, being influenced probably by the inactive condition of things at Liverpool. Business on call at the Produce Exchange is not characterized by any vim. Operations are confined to a few prominent members, most of whom seem to be more willing buyers than sellers.

BARLEY—Deliveries of Feed for this month seem to have the call at present. The buying limit for No. 1 Feed, August, is \$1.24. No. 2 quality came in for a fair share of attention, though no positive results occurred. For No. 1 Brewing in September, \$1.40 was bid against \$1.45 c. asked. Chevalier finds no inquiry.

OATS—The market exhibits but little strength. Offerings are becoming more liberal, while buyers do not appear to be numerous. Spot parcels change hands in a retail way at a range of \$1.65 to \$1.80 c. c.

FEED—Ground Barley calls at \$36 (\$31 for new and \$34 per ton mixed). Middlings, \$28 per ton for lots at mill; Oilcake Meal the oil works sell to the trade at \$32.50 per ton, less usual discount; Shorts, sellers are \$16@17 per ton; Cornmeal, \$39 c. c.

HAY—No change in prices this week. We quote: Alfalfa, \$11@13; Wheat, \$14@15; Wild Oats, \$12@13; Stable, \$10@12 c. c.

STRAW—70@75c per bale.

BEANS—We quote: Bayos, \$2.50@2.75; Butters, \$3.50@3.75 for small and \$4 for large; Lima, \$3.75 to \$4; Pea, \$4@4.25; Pink, \$2.40@2.45; Red, \$2.40@2.45; Small White, \$4@4.25; Large White, \$3.25@3.60 c. c.

ONIONS—Prices keep uniform, quotable at 75@85c for Silverskins; for Red, 35@45c c. c.

POTATOES—Wharf rates are as follows: Early Rose, in sacks, 50@50c; boxes, 75c@1; Garnet Chile, 75@90c c. c.; Sweet, 1 1/2@2c c. c.

POULTRY—The market has a steady tone. Live Turkeys, Gobblers, 17@20c; do Hens, 16@18c; Roosters, \$5@6 for old and \$6@8 for young; Hens, \$6@7.50; Brouilers, \$2.50@4.50, according to size; Ducks, \$4@6 per dozen; Geese, \$1@1.25 per pair; Goslings, \$1.50@2 c. c. pair.

GAME—We quote as follows: Hare, \$1.75@2; Rabbits, \$1@1.25 per dozen; Doves, 50@75c per dozen; Venison, 8@12c c. c.

PROVISIONS—Quite firm. We quote: Eastern Hams, 17 1/2@18 1/2; California Hams, 15 1/2@16c for plain, 16 1/2@17c for sugar-cured canvased; Eastern Breakfast Bacon, 17@18c; California Smoked Bacon, 16@16c for heavy and medium, and 17@17c for light and extra light; Clear Sides, 16 1/2@16 1/2; Pork, \$21@22.50 for Extra Prime, \$24@25 for Prime Mess, \$25@25.50 for Mess, \$26 for Clear and \$27@28 for Extra Clear; Pigs' Feet, \$16@18 bbl; Mess Beef, \$14 for bbls and \$7 for half bbls; Extra Mess Beef, \$14.50@15; Family Beef, \$16@16.50 bbl; California Smoked Beef, 14 1/2@15c per lb.

EGGS—No marked change in values. The supply of poor quality is large. We quote as follows: California, choice, 29@31c; Interior, 25@27c; Western, 22@27c dozen.

HONEY—The market is quiet and has been so for some time past. Extracted, 7@8c; Comb, 14@17c per lb.

BUTTER—Prices but little changed this week. We quote lots as follows: Fancy, 33@35c; choice, 30@32c; fair to good, 27@29c; inferior lots from country stores, 23@25c; firkin, 29@31c for good to choice new, and 25@27c for ordinary; pickled roll 30c to 32c; Western, 18@22c c. c.

CHEESE—We quote: California, 13@14c for choice; 11@12c for fair to good; do factory, in boxes, 16@17c; Eastern, 16@18c; Western, 11@15c c. c.

HIDES AND SKINS—Market fairly active. Dealers are paying the following cash rates for lots in order: Dry Hides, usual selection, 19@19 1/2; culls one-third loss, and Mexican Hides 1c lb less; Dry Kip, 19@19 1/2; Dry Calf, 20c; Salted Steers, over 55 lbs, 11c lb; Steers and Cows, medium, 10c; light do, 9c; Salted Kip, 15 to 30 lbs, 10@10 1/2; Salted Calf, 11@12c; Dairy Calf, 65c to 70c each; Sheep Skins, 20@25c for Shearlings, 23c to 50c for short, 60@80c for medium, and 75c@1 apiece for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—Quotable at 6@6 1/2c for grease; 8@8 1/2c lb for rendered and 10 1/2@11c for refined, both in shipping order.

WOOL—No improvement in the situation. Stocks large, without buyers. We quote: Humboldt and Mendocino, 1 lb, 26@27c; Sonoma, 25@26c; Sacramento Valley, 22@25c; Siskiyou and Modoc, 22@25c; Calaveras and Foothills, 20@25c; San Joaquin, free, 18@19c; San Joaquin, defective, 15@18c; Southern Coast, burry and seedy, 15@18c; Eastern Oregon, choice, 23@24c; Eastern Oregon, fair, 20@23c; Eastern Oregon, poor, no sale; Valley Oregon, fine, 25@27c; Valley Oregon, coarse, 22@24c.

FRUIT—Market abundantly supplied. Dumping is still necessary to clean up stock of more than one variety. We quote prices as follows: Apples, 25@50c bskt, and 50@51 c. c. box; Pears, 25@40c bskt, and 40c to 60c c. c. box; Bartlett do, 40@50c bskt, and \$1@1.25 c. c. box; Nectarines, 75c@1 c. c. box; Strawberries, \$10 to \$12; Raspberries, \$8@11 c. c. chest; Peaches, 40@50c b. box and 35@40c bskt for common and 60@70c for Crawford; Figs, 75c@1.25 c. c. box; Grapes, 50@75c for common, 75c@1 for Black Hamburg, 75c@1.25 for Rose of Peru, and \$1@1.50 for Muscat; Plums, 45@50c c. c. box; Blackberries, \$4@5 c. c. chest; Apricots, 1 1/2@2c c. c.; Watermelons, \$3@7 hundred; Cantaloupes, 75c@1.25 c. c. crate; Lemons, \$9@10 c. c. box for Sicily, and \$2@2.50 for California; Limes, \$7.50@8 c. c. box for Mexican; Bananas, \$2.50@4 c. c. bunch; Pineapples, \$6@8 c. c. dozen.

VEGETABLES—Prices easy. We quote jobbing lots as follows: Marrowfat Squash, \$7@10 c. c. ton; Artichokes, 25@50c c. c. sack; Parsnips, \$1; Beets, 75c; Carrots, 50c to 65c; Turnips, 75c@1 c. c. c. c.; Cauliflower, \$1 c. c. dozen; Cabbage, 75c@1 c. c. c. c.; Garlic, 1@1 1/2 c. c. lb; Cucumbers, 25@40c c. c. box; Gre n Peas, 2@3c c. c. lb; Green Peppers, 50@75c c. c. box; Tomatoes, 25@40c c. c. box; Spinach, 25c c. c. sack; Celery, 75c dozen; Summer Squash, 40@50c c. c. box; String Beans, 1 1/2@2c c. c. lb; Green Corn, 4@15c dozen; Okra, 60@8c c. c. lb; Egg Plant, 75c@1 c. c. box.

In addition to other premiums, H. T. Dorrance will offer a set of choice track harness, valued at \$55, for the horse owned in the District that makes the fastest trotting record at the Stockton Fair. He also offers a \$25-jockey saddle to the horse which makes the fastest running mile record owned in the District at the Fair.

Irving Ayres, owner of Mambrino Wilkes, offers a special premium at our Fair, a silver tea-set and waiter, for the best two-year-old colt sired by the above horse. Also, for the second best colt, a silver water pitcher. The colts to be shown at the Stockton Fair.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.

In all these Races (Pacific Coast Novelty Race excepted) four moneys, 50, 25, 15 and 10 per cent. of purse.

When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.

Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.

All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above; otherwise, old weights to govern.

For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.

Horses entered in purses can only be drawn by consent of the Judges.

The Board reserves the right to change the day and hour of any race, if they deem it necessary.

Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as specially provided.

In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.

Races to commence each day at 1 o'clock P. M. sharp. The track is first-class, having been improved. Stables, hay and straw free to competitors.

L. U. SHIPPEE, President.

J. L. PHELPS, Secretary.

CONDITIONS.

1. Entries to all races, except Nos. 1 and 5, to close with the Secretary at 12 o'clock m. on Monday, the first day of August, 1882.
2. Entrance fee to the above races will be 10 per cent. of the purse, and must accompany the nomination.
3. In all races five to enter and three to start. Any horse distanced or not starting will forfeit his entrance fee. No money will be paid for a walk-over.
4. Rules of the Pacific Blood Horse Association to govern running races, and of the National Trotting Association to govern trotting.
5. No horse entered in a purse can be withdrawn except by consent of the Judges.
6. All trotting and pacing races, except No. 1, will be mile heats, 3 best in 5.

J. P. CLARK, President.

CHARLES HOFFER, Secretary.

SPEED PROGRAMME

OF THE

Mount Shasta Agricultural Association,

TO BE HELD IN

YREKA, SISKIYOU CO.,

Of the seven illustrations published four horses bred in California and three were reared off side of the mountains. Two of these have won through the performances of their other Eastern-reared shares with the natives which arises from individual capacity for speed. As has already been stated, the faculty of excellence in progeny is a higher order of individual characteristics however brilliant, though the qualities desired is a favorable augmentation in the progeny. When the breeding is kind, the formation in accordance with the standard, indeed, that the animal possessing all the united with a "good record," fails in the stud. Instances to the contrary, and the trite maxim "proven is the rule to be correct" is received though it would be more logical to say—in hor

2d. In all District Races the second horse to save entrance.
3d. Entries to be placed in the entry box, kept for that purpose at the Pavilion, prior to 9 o'clock p. m. on the day prior to race.
4th. Entries must give name, pedigree, and description of horse entered as far as known.
5th. In all District Races two or more entries make a field.
6th. All trotting races must be in harness.
7th. National Trotting Association Rules to govern trotting races.
8th. Pacific Coast Blood-Horse Association Rules to govern running races.
9th. Free for all, in races I and 9, means just what it says, and all entries to these races must be made with the Secretary on or before September 1st.
L. SWAIN, President.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year-old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nominations. Purses divided at the rate of sixty per cent to first horse, thirty per cent to second and ten per cent to third.
National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.
Those who have nominations in stakes must name to the Secretary, in writing, the horse they will start on Tuesday, on the Monday previous; and on Thursday the Tuesday previous, and on Friday, the Wednesday previous, by twelve o'clock m. This rule is obvious, and must be strictly adhered to.
No added money paid for a walk-over.
Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.

A. KING, President

T. S. MONTGOMERY, Secretary.

NOTABLE HORSES OF CALIFORNIA.

PIEDMONT.

Of the seven illustrations published four have been of horses bred in California and three were reared on the far-off side of the mountains. Two of these have acquired renown through the performances of their offspring, the other Eastern-reared shares with the natives the celebrity which arises from individual capacity for speed and endurance. As has already been stated, the faculty of producing excellence in progeny is a higher order of merit than individual characteristics however brilliant, though the possession of the qualities desired is a favorable augury for perpetuation in the progeny. When the breeding is of the right kind, the formation in accordance with the standard, it is rare, indeed, that the animal possessing all these qualities, united with a "good record," fails in the stud. There are instances to the contrary, and the trite maxim that "exceptions prove the rule to be correct" is received as a truism, though it would be more logical to say—in horse breeding

at least—that the exceptions are owing to some hidden cause which in all probability man can never fathom.

In taking Piedmont for the eighth pictorial representation of the "notable horses of California," few will dispute his claim to the position. He is a great horse from every point of view. In the first place his breeding is of the most fashionable kind; in the second, his form is about as nearly perfect as can be found in a trotting bred stallion, and his performances are in keeping with his breeding and form. Piedmont was bred by H. A. Ferguson of Lexington, Kentucky; foaled 1871. He is by Almont, his dam Mag Ferguson by Mambrino Chief, grandam by Grey Eagle, with a strong probability that she was a mare of very high breeding. His sire Almont is by Alexander's Abdallah, dam by Mambrino Chief, grandam by Pilot, Jr and the next dam claimed to be thoroughbred. Alexander's Abdallah was by Rysdyk's Hambletonian, his dam Katy Darling. Thus it

will be seen that the sire of Piedmont combined three great trotting strains, and his dam brought in a reinforcement in another line of Mambrino Chief, and with the very desirable addition of more thoroughbred blood. That this had a potent effect will be shown by the following description:

We have oftentimes been asked the question: "What sort of a looking horse is Piedmont?" To many it would be sufficient answer to reply: A grand, big horse, chestnut in color and handsome all over. There are others more exacting, however, and the trotting cognoscenti, especially, require a full description of a horse which has shown the capacity he exhibited in his races of last season, and not contented with the admirable portrayal of our artist, demand a recital of the "points." He is a deceiving horse as to his size, and, at the first glance, the observer is prone to think that when his light is given at sixteen hands the stature is over-rated, though the standard shows that he is a trifle over

the mark, and the justness of proportion takes away from the actual measurement when the eye is the criterion. In color he is a chestnut of the finest shade. Rather lighter than bronze, a trifle deeper than gold. Lustrous, not the metallic sheen which is seen in the plumage of birds—livelier in hue and softer in the shading. With the exception of some small white spots on the right quarter, the rich chestnut is only broken by where the girths have left a few streaks, and those on the hip look like tiny splashes of froth flung from the bit in the excitement of fast motion. The mane and tail are nearly of the same shade, and the hair is as fine as in those which trace their descent through generations of aristocratic blood. On the whole, he is a picture admirable from any point of view, standing erect on every limb, and with an air of conscious superiority. The most fastidious aesthetic could scarcely find fault with the justness and harmony of proportion he exhibits when thus posed by himself. When examined in detail the over-critical horseman will be troubled to find a single faulty point, or rather to pick a flaw which he can sustain with arbiters who are competent judges of form. "From the ground up" he is well balanced. The feet are naturally of good shape, though the errors of the shoeing forge occasioned a quarter crack and an elevation of the horn above it on the left fore foot. This rather mars the appearance by interfering with the true circle of the coronet on that one foot. The hoofs are dark, saving a narrow strip on the right, and they have the proper angle. The pasterns are of good length, and have just the right slope to obviate concussions and give elasticity to the stride without indicating weakness. The cannon bones, metacarpals and metatarsals, are short, and the tendons are prominent without blemishes of any description, giving a width and flatness to the limbs which insure strength. The knees and hocks are broad, without the least tendency to coarseness, and yet afford room for the ligamentary attachments. The arms and gaskins are muscular and long from the elbow and stifle to knee and hock. The upper arm, humerus, is long, set at the proper angle with the scapula, and well clothed with muscles. There is a corresponding length in the femur, from the stifle to the point of articulation at the haunch, and the covering of muscles fills this portion of the frame to an immense size. The shoulder-blade is long, rising nearly to the top of the withers, wide, falling well back into the sway, and with plenty of muscle. The slope of the innominate is sufficient to throw the stifles well down without giving any approach to the "pacing quarter," and the muscular development, of course, must correspond with the power shown in the upper thigh and gaskin. The "middle piece," as it is termed, that portion lying between shoulders and hips, is extraordinarily good. There is plenty of room for heart and lungs, and the back ribs are long and have the proper curve. There is plenty of evidence that the vertebral column is large, and toward the loin the muscles on either side of it rise above the bone. The neck is of good length, strong and tapering to the setting off of the head. The crest is moderately arched, and the throat distinct. The head is rather below the medium size, with great width between the jaws, the eyes as good as can be imagined, the ears somewhat short and pointed. Standing so as to have a side view he exhibits a good length of body, on legs which are well proportioned to his size. The "speed angles," as some call the degrees of obliquity between the haunch-bone and stifle, and the angle formed by the hock, are such as will suit a majority of horse fanciers, though this is part of the conformation which gives rise to divergent opinions. One favors a straight quarter, after the Arabian model; another likes the ultra slope of some pacers. Between these extremes is the most satisfactory for a fast trotter, and a medium such as Piedmont presents the best. A straight or crooked hind leg elicits the same amount of argument, and the formation of the hock the subject of frequent disputes. In these respects there is a mean, the hock being wide enough to insure a proper degree of strength, without the excessive width like that of the ox, and the bend is just right to give freedom of motion. The outlines from this side view are nearly faultless, and the filling up would be difficult to excel. From a position behind him, the most striking part of his configuration is the immense width of the stifles and fullness of muscle. The quarters are deep and powerful. The inside of the gaskin is moderately heavy, the hamstrings large. In front, the intelligent countenance is the attractive feature from that point of view. There is plenty of breadth between the eyes, the forehead broad and prominent. The muzzle is cleanly cut, the edges of the nostrils thin, and the superficial facial veins showing through the thinness of the skin. The fore legs "come to the ground" exactly right, converging sufficiently to assure his action being straight, without the knees being so closely together as to be in danger of injury from the passing foot. The "fork" is capital, the elbow far enough from the chest, and the brisket is prominent. It is rare, indeed, to see a trotting-bred stallion with so much quality, and he comes very near to the type of the thoroughbred throughout his whole conformation. He has size, style and finish, and would rank high as a progenitor for carriage horses, if he did not possess speed, and with weight enough to give value for general use. In the right condition to go into training he weighed 1,140 pounds, and, as there is no grossness, that weight means the capacity to perform any task.

Another very essential feature in a stallion is the action.

Those who have seen him move extol that of Piedmont as being very nearly perfect; but what the particular features are we cannot say. There has been a great change in opinion regarding the proper action for a fast trotter in the last twenty years, and at the present time a majority of the best judges prefer that which insures sufficient length of stride with the least muscular exertion. "No waste of force" is the maxim, every motion in the right direction, progression rather than show, and this we understand is the kind which Piedmont possesses. The races he won last season show that he has the gift of endurance as well as speed, and we are creditably informed that there is every reason to anticipate a lowering of his record whenever he appears again on the track, the conditions being favorable. He has shown such a flight of speed in his work that a person who saw him move informed us that the idea was firmly fixed in his mind that he can beat any horse in the world, irrespective of sex. Previous to last season his fastest record was 2:21½, made in a second heat at Chicago in 1880, and that year he trotted nine races, winning eight of them. In 1881 he trotted seven races and won five, the most noted of them being the \$5,000 purse, free for all stallions, at Chicago, July 19th. The starters were Piedmont, Santa Claus, Robert McGregor, Hannis, Wedgewood and Mouroe Chief—the grandest field of trotting stallions which ever appeared in a race. Robert McGregor won the first heat in 2:18, Santa Claus and Piedmont close up; Santa Claus won the second in 2:17½, the head of Piedmont almost at his throat; Robert McGregor won the third in 2:18½, Piedmont again close at the finish, and then he won the fourth in 2:17½, the fifth in 2:19½, and the sixth in 2:21. This was enough to render him famous, but all of the races he started in were notable performances.

A LADY'S VISIT TO MAUD S.

By far the sweetest, prettiest, daintiest thing here is Maud S. The other morning I went down to Vanderbilt's private stables, just back of Congress Hall, to see this beautiful creature, that can clip it faster than an express train on a down grade. The head groom, after surveying me, concluded that I was a harmless atom, and invited me in. "I want to see Maud S.," said I. "Do you show her to strangers?" "Oh, yes," he answered, good-naturedly, "lots of 'em come in here, and they all want to see her." He led the way to her stall, which is about ten feet square and as dainty as a lady's boudoir, and there, with a light horse-cover to keep the flies off her, was the great mare. She seemed delighted to have company, and, like all other well bred creatures, was good-natured and affable and devoid of airs. Her coat was softer than satin, and she has the most earnest and intelligent eye ever seen in an animal's head. She sniffed around complacently, and rubbed her slender nose against me as if we had been old acquaintances. In three minutes we had established intimate relations. The groom took off her cover and turned her around, to show her off to my inexperienced eyes, when, her hind legs coming a little too close to me, I made a bolt for the door of the stall. "Come back," said he, laughing, "she never did an ill-natured thing in her life. She would no more think of kicking or biting you than you would think of striking her. She is so kind and well disposed you'd think she was human;" and I suspect that the groom did have a half belief that she was human. He was evidently delighted to have an appreciative listener, and was ready enough to talk about the Queen of the Turf. Mr. Vanderbilt is not driving her at all now. She is in training for the Fall races, and every morning at 10 o'clock her trainer takes her out for a spin down the road. Mr. Vanderbilt is not half so proud of her as the stable-men are; and she is indeed a creature so gentle, so lovable, and so altogether the ideal horse, that anything could love her. After awhile I tore myself away from her, to take a look at the other horses. First was Lysander, a pretentious beast, who eyed me superciliously, and treated all my advances with lofty indifference. This animal resembles the ideal New York editor, being a cold and haughty creature, with an icy smile and an inscrutable brow, and evidently has no time to waste on triflers—no triflers need apply. Then I was shown another horse, Lysander's mate, whose name I really forget, but with Mr. Vanderbilt's permission I will call him Abdullah. Well, Abdullah offended me as much by his flippancy as Lysander by his hauteur. As soon as he beheld me, without the formality of an introduction, he wanted to play pitch and toss with me, to which I objected and left him to his reflections. The two horses for Mrs. Vanderbilt's victoria were also shown. One of them, having a plebeian fondness for straw in his stall, and a disposition to paw and dash it around, was in disgrace, with his meddlesome nose fastened to an iron ring, where he had to remain for an hour or two until he was thought to be sufficiently punished. I could not leave without another look at the "Bride of the Wind," and she asked me to come again, as plainly and as intelligently as if she had the gift of speech.—*Saratoga Cor. N. Y. World.*

After the poor exhibition made by Phil Thompson in his attempt to beat his own record, it is doubtful if his owner will hold to the challenge he issued for a match with any four-year-old. But should he still hold to his opinion, Budd Doble, who has charge of Jay Eye See, is ready at any moment to accept the challenge with that horse. If they were both in good order it would be a good race.

Buffalo Girl, the pacer, has a record of 2:14, but she is very unsteady. She is a daughter of Pocahontas Boy, a son of Tom Rolf. She began last season without a record and paced in eleven races of which she took one, winning heats in two others, and finishing the season with a record of 2:21¼. A member of the same family of pacers is the noted Sleepy Tom, 2:12¼, who was sired by Tom Rolf.

Both J. B. Thomas and Black Cloud, two conspicuous performers in the stallion class at Chicago, have permanent afflictions, the former having the stringhalt and the latter being stone blind. Each, however, can trot a mile in 2:18 or better.

Goldsmith Maid, the old Queen of the Turf, is now 25 years old. She has two toals, a colt and filly, by General Washington, son of General Knox and Lady Thorne, the eldest being two years old. She missed this year, and has been bred to Jay Gould.

TURF AND TRACK.

FIXED EVENTS.

Sonoma County Park Association, at Santa Rosa, Aug. 22d, 23d, 24th, 25th and 26th.
Sonoma and Marin Agricultural Societies. Annual Fair at Petaluma, Aug. 28th and four following days.
Golden Gate Fair, to be held at Oakland, from September 4th to the 9th inclusive.
Butte District Fair at Chico, from September 5th to September 8th inclusive.
El Dorado District Fair at Placerville, from September 5th to September 8th inclusive.
California State Fair. Annual meeting at Sacramento, from Monday, September 11th to the 16th inclusive.
The San Joaquin Valley Association Fair at Stockton, from September 10th to the 23d inclusive.
Oregon State Fair at Salem, from September 18th and during the week.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 25th to the 30th inclusive.
Humboldt and Mendocino District Fair at Rhonerville, September 19th to September 22d inclusive.
Molok, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th inclusive.
Nevada State Fair, at Reno, from Monday, October 2d, to the 7th inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.
Eastern Oregon Fine Stock Association at Union, from October 9th to the 14th inclusive.

FAIRS AT THE EAST.

Kentucky State Fair at Lexington, August 9th to September 2d inclusive.
Minnesota State Fair at Farmington, August 31st to September 5th inclusive.
Iowa State Fair at Fairfield, September 1st to the 5th inclusive.
Minnesota Agricultural Association, at Minneapolis, September 4th to the 9th inclusive.
Nebraska State Fair, at Omaha, September 11th until the 16th inclusive.
Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.
Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 18th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 18th to the 22d inclusive.
New Jersey State Fair, at Monroe, September 18th to the 23d inclusive.
West Virginia Central Fair, at Clarksburg, September 19th to the 21st inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

TROTTING ON THE BAY DISTRICT COURSE.

The second day of the meeting which was given by the Bay District Association came off last Saturday. The 2:22 race on the original programme did not fill, and the 2:25 on the preceding Saturday was such a close contest that the managers concluded that a repetition of it, or so much of it rather as would embrace Crown Point, the previous winner, Starr King, Ashley and Cairo, would be a satisfactory offering to the sport-loving public. That and the 2:30 was certainly a very liberal bill, and should have attracted a large concourse of spectators. The San Franciscans, however, appear to have lost interest in sports of the track, and there was a meager showing when a comparison is made with Eastern towns of not half the size. In some of the small cities of the East, with a population of not over forty thousand, such races as took place on the Bay District last Saturday would bring out several thousand people. Still, there were about as many as on the opening day, and a gratifying feature was the number of ladies on the balconies of the hotel and Club House. The track was in capital condition—a trifle too hard, perhaps, for every-day work, but assuredly fast. The afternoon was not as fine as was desirable, there being too much breeze for real comfort; and after the first heat was trotted, the fog clouds obscured the sun.

A full description of the race is given in the detailed account which follows. They were eminently satisfactory, excepting the unfortunate decision in the last heat of the 2:30. Starr King proved that the reputation he had acquired in his private trials was not altogether illusory, and there is plenty of evidence to warrant the belief that he will be a "hot horse" in still faster classes.

The decision which awarded Sweetness the fourth heat in the second race was as has been stated a truly unfortunate finale. The account given of the heat which was taken from Poscora Hayward does not give all the evidence in regard to whether he lost or gained by the breaks. That the mare and Blackmore lost ground when he was trotting and gained when he broke was palpable. But fully as strong proof was furnished by the third and fourth heats. The third Poscora won in 2:25. In this he made two breaks, with a long distance between them. The fourth heat in 2:29½ showed one of two things—that he was tiring, or that he lost ground equivalent to four and a half seconds in time. Admitting that he could not make a fourth heat as fast as a third, there is a discrepancy which can scarcely be reconciled on that hypothesis alone. According each argument full weight, the logical conclusion is that the main falling off in the time was ascribable to the four breaks, beside the last near the score. Three of them occurred in a space of about three hundred yards, almost as bad as the "double-break," which all drivers know to be such a drawback. There was then corroborative proof of the facts shown in the heat, and which should have been taken into the calculation. That the driver of Poscora endeavored to the best of his ability to bring him back at once to the trot was palpable. When the horse broke in scoring he would invariably fall back, and in the breaks under discussion not one of them covered much ground. Neither was it a "revolution," a changing of feet in order to get the right one foremost, nor could it be said to be a "tangling," "falling to pieces" affair, when the animal appears to have lost use of its legs, and is on the point of tumbling down or turning a somersault. The perusal of the following description, however, will be more satisfactory than further discussion:

The first race was a purse of \$400 for the 2:25 class, in which were entered the same horses as on the previous Sat-

Friday in a similar race, save that Sweetness was reserved for the second event and Del Sur was an absentee. On the previous evening there had been a good deal of betting on the event, with Crown Point the first choice, but many who had judged that the previous race would key Starr King up to a better encounter, stood so steadfastly to his chances that there was not much difference between them. On the race track, just previous to the first heat, Crown Point sold for \$45, Starr King \$30, and Ashley and Cairo combined \$20. In drawing for positions Ashley had the pole, with Cairo next and the favorite on the outside. The horses were called up very promptly, but there was too much ineffectual scoring and it was only at the eighth attempt that the horses were tapped off to a fair start, with Ashley having slightly the best of it. Ashley took advantage of his position, and made the place hot for the outsiders, reaching the quarter-pole a length ahead of Starr King, and then speeding down the backstretch with a light skip he reached the half in 1:10½, with Starr King on his wheel, while the other two left the leaders to worry it out between them. On the further turn Ashley seemed to slightly increase his advantage, but when once in the homestretch the chestnut monarch came with a fine burst of speed that soon carried Ashley off his feet, and although he was quickly caught Starr King won handily by two lengths in 2:22, Crown Point being a poor third. Those who in the pools had belittled the chances of the big chestnut, were now eager to hedge and as they were not particular to a shade, they invested freely at \$75 for Starr King against \$40 for Crown Point and \$15 for the field. There was some neat scoring for a favorable position, and it was only at the sixth trial that they could get the word to a fair start. At the first turn Ashley was at his old tricks, and galloped some fifty yards before he could be brought to his gait, and yet he was but two lengths behind Starr King at the quarter-pole, the time being 36¼ seconds; and then the leader opened out the gap to four lengths at the half-mile, in 1:10½, and as Ashley could not stand the pace and was again in the air, and Crown Point made no decided demonstration for the lead, Starr King held his position and won easily in 2:23½, with Ashley second, Cairo third, and Crown Point last; but on account of the breaks, Ashley was relegated to the outside position. It appeared now to be almost a certainty that Starr King would win the race in straight heats, and \$100 to \$25 was freely wagered in his favor. Probably there had not been enough scoring to suit Starr King, as Cairo, evidently meaning business, kept to his wheel so persistently as to carry Starr King off his feet at the second turn, and he ran for such a long spell that he was ten lengths in the rear at the mid backstretch, and seemingly out of the heat. In the meantime Cairo had kept increasing his advantage, and led Ashley by three lengths at the half-mile in 1:12½, with Crown Point almost abreast, but the latter had the most speed, and passing Ashley, he made for Cairo, and on entering the stretch carried him off his feet, and after a pretty struggle won by a head and shoulders in 2:27, with Cairo two lengths ahead of Starr King, but the latter was placed last for running.

Starr King was still a favorite, and sold for \$50 against \$25 for Crown Point and \$5 on the other two. With a level start on the third trial, Starr King was in difficulties shortly after the gong had sounded, and he was far, and, from appearances, hopelessly in the rear, when Cairo passed the quarter-pole, with Ashley and Crown Point close in attendance. On the backstretch Cairo made a bad break, and seemingly left the matter to be decided between Ashley, when Starr King was seen rapidly decreasing the gap, and amid great applause the big chestnut got even with Crown Point, and as he left his feet, Starr King won the heat and race easily by two lengths, with Ashley a poor third. Starr King showed that he had greatly improved since his last appearance, and perhaps a change in the shoes of Crown Point for a heavier description militated somewhat against his chances. It was a good race and very well contested.

The 2:30 race was called after two of the heats in the 2:25 had been decided, but owing to the delay in scoring, the horses were sent to the barn until the third heat of that was decided. This was regarded so sure a thing for Sweetness that she was an immense favorite; and the injury to Albert W., which necessitated his withdrawal, was thought to take away the only chance of defeating her. Poscora Hayward was not supposed to be in proper condition, and that it would require a race or two before he could show his capacity; and Blackmore was not credited with the speed he exhibited in the latter part of the race. Sweetness sold for \$100 in the pools to \$25 on both the others, and after the first heat there were none to venture at even these odds; and when the second was scored to her credit, it appeared that it was "a tan-yard to a shoe-string" that she would prove the victor.

For the first heat a very good start was effected at the third score; Blackmore had the pole, Poscora second, Sweetness on the outside. Poscora went off rapidly, and though he made a break soon after the word was given, he led at the quarter in 36¼; Sweetness second, Blackmore several lengths in the rear. Going down the backstretch Poscora again broke, and the mare passed him and opened quite a gap at the half mile in 1:02½. From that point home she had it all her own way, for, though the two grey-closed the gap somewhat on the home-stretch, they could never reach her, and she won in 2:26; Poscora second.

The second heat, another good start was given them, on the fifth score, the mare going away with the lead, reaching the quarter in 37½ seconds. Poscora drew up a little closer on the back-stretch, and his nose was on her wheel as the half mile was made in 1:13, but he broke on the further turn, fell back, and the mare came in a "handy winner" in 2:26, Poscora about as far behind her as Blackmore was in the rear of him, a little more than open length marking the difference between each of them.

The third heat was one of those startling episodes which add so much to the pleasure and excitement of turf and track sports. There was scarcely a man who had any knowledge of trotting affairs who did not think the race was over, unless the driver of Poscora Hayward cherished the hope. The owner certainly considered it the most forlorn kind of an expectation, as he knew that his horse was not in the proper condition, and though he showed a fair degree of speed at times, he could not hold without breaking. There were numerous false starts. Thirteen times they came up for the word without avail. Blackmore, on the outside, would break into a mad run despite the efforts of his driver to restrain him. Then Poscora would follow, though his tantrums were more after the dancing order, while Sweetness, acting as though the trot were her fastest gait, came steadily and fast every time, and, when all were trotting, generally in the lead. For this the judges fined Gold-

smith \$10, and at the fourteenth effort the gong sounded, Sweetness having rather the best of the start. It was evident that Goldsmith was determined to "go for a record." The mare has a bad leg which may incapacitate her at any time, and she is the dam of a fine colt by Santa Claus, which will be greatly increased in value by his mother's record being very fast. She has speed enough to trot in the teens, and with sire and dam below 2:20, the youngster would fall heir to an estate well worthy of a severe trial to obtain. Laudable as the intention was, there is scarcely a doubt that it was the cause of the loss of the heat, and, worse than that, led to a bitter end, as the sequel will show. Sweetness was first at the quarter in 37 seconds, and after leaving that point and when the curve merged into the straight, she was showing a grand flight of speed. Thirty-four seconds was the time for the second quarter, and the half-mile in 1:11, left the others far in the rear. Poscora had broken about midway of the first turn, though after that he trotted steadily and without a mistake until a short distance beyond the three-quarter pole. Some of the space between him and the leader had been closed, and when he recovered he came again with great resolution, while the fast work had told on the mare. He was surely gaining very rapidly when the seven-furlong pole was passed, and at the long distance he was almost level with her. There was excitement among the spectators, and the ringing cheers appeared to animate him, while the mare, who had gamely struggled until the brain could not endure further strain, and the muscles were without elasticity, could not respond to the punishment—fagged, dispirited, beaten—as the successful horse passed under the wire in 2:25, Blackmore a fair third.

The tiring of the mare was so evident that there was a rush for the pool-stand to "get out." The first pool sold it was \$70 on Poscora to \$20 on the other two; the next it was \$60 to \$27, and after there was time to consider that her driver would not again make the mistake he had in this heat, and the desire to hedge by those who stood to win on the horse from the start the odds were reduced to \$60 on Poscora to \$40 on the others. There was a large amount of money went into the poll-box between the close of the third heat and the start for the fourth. Had the scoring been prolonged the pools and bar would have shown a better dividend. But as it was, the signal was given the first time the horses came up, and a capital start it was. Blackmore broke at the further end of the stables, Poscora trotted fast, and when within one hundred yards of the quarter-pole had obtained a good lead of Sweetness. He broke and she closed some of the intervening distance. About the same number of yards beyond the quarter-pole he broke again, and she ranged alongside. A hundred yards further there was another break, and she passed him, and there was open daylight between them. He regained some of the lost ground, though she still led at the half-mile. His nose was on her wheel as he steadily gained, when half way round the upper turn he broke again. She drew away, Blackmore gained on him. The fractional timers had left the reporters' stand, and the time at quarter, half and three-quarters was lacking. Soon after getting into the homestretch the whip of Goldsmith could be heard, and the wish through the air and the thud as it struck was evidence that Sweetness was again succumbing. At the ¾ mark they were abreast. At the two-mile distance Poscora was three lengths in the lead and his driver apparently more intent to keep him from breaking than desirous of increasing the gap. He was on the outward side of the track nearly as far away as he could get to escape the irritating sound of the lash, but just before coming to the score Poscora broke, lost at least a length, recovered and came in two lengths in the lead; the time 2:29½.

There were complaints entered by Green, the driver of Poscora, that Goldsmith had placed the butt of his whip in the spokes of the wheel so as to cause Poscora to break when they were going down the backstretch. This was corroborated by McConnell, the driver of Blackmore, and Green was confident that the silky spokes would show the abrasure. Goldsmith denied the charge, and countered by claiming that Poscora had run. There was some consultation between the judges, the bell was rung, Sweetness declared the winner of the heat and race and Poscora given second place. The announcement was received with the applause of those who had unexpectedly won, the groans and hisses of others. Elsewhere there is a review. In this place the heat is reported as nearly correct as the writer is capable of giving it without prejudice or favor to either party. The reporters' stand on the Bay District Course is not favorable for an uninterrupted view as it were on the outside of the course, but this disadvantage is also shared by the judges. When the horses first come on to the homestretch it is troublesome to tell their positions or to notice a skip, and the going around the tunnel which incloses the stairs which lead to the upper story is a serious obstruction. It is one of the hardest jobs, however, to get people out of the old-time ruts when horses or race-tracks are the questions at issue, and it will, probably, be another generation which will see the judges' stand universally on the right side of the course. The following are the

SUMMARIES.

Bay District Course.—Saturday, August 12, 1882.—Purse, \$400; mile heats, 3 in 5, in harness; \$250 to first, \$100 to second, \$50 to third horse.

TWO FINE RACES AT CLEVELAND.

The meeting at Cleveland showed some excellent trotting, and many of the horses lowered their record. The attendance was large, and in some of the races that were closely contested, the enthusiasm was very great. Of the contests, that for the 2:20 and the special purse were the most exciting, and we take the following interesting account of them from the N. Y. *Spirit of the Times*:

All the horses entered in the 2:20 class started, except Tariff, and, judging from their achievements, a close and memorable race was anticipated, but Rosa Wilkes showed so much superiority that the struggle resolved itself into a question of who would win second and following premiums. Rosa won the first and second heats without being pressed, and the betting dragged, there being difficulty in finding

pool-buyers for the field at \$15 to \$50. Suddenly the short-enders took new courage, and the field rates firmly advanced at \$20 to \$50, and the backers of Rosa Wilkes put up their money with confidence, saying: "If it is a job, she has so much speed and steadiness they will not get through with it." In the evening an explanation leaked out that two heavy pool-buyers lost \$3,000, and were courageously putting up on what they considered a "sure thing," as an arrangement was entered into for Rosa Wilkes to, as Turner puts it, "step on her ear," but it seems they did not make their words or money strong enough, for, to their dismay, Rosa and her driver came along as steadily in front the third heat as in the others, to the admiration of all supporters of honest trotting. If all tamperers with owners and drivers were served in this manner, the jobbers would seek other fields of scheming to turn a dishonest penny.

But, coming to a particular account of the races. The judges of the day were: Messrs. Edwards, McClosky and David Bonner. Timers, H. D. McKinney and J. W. Shaw. The first event disposed of was the 2:20 race, and the speed the various starters showed in warming up indicated that fast time would be made.

First Heat.—The favorite drew the pole, Forest Patchen second position and Wm. H. third, with Witherspoon on the outside. They scored several times, and when the word was given both Forest Patchen and J. P. Morris were off their feet. Rosa showed she had the foot of the party from the start, and Wm. H. and Fanny Witherspoon drew out from the others as they rounded the first turn, closing with the leader at the quarter in 35s, and Early Rose was a good fourth. On went Rosa Wilkes as if confident of the heat, and a length separated her from Witherspoon at the half in 1:10¼, with Wm. H. at the latter's wheel. He fell back on the third quarter, but Witherspoon brushed for the lead, and Rosa shook her easily in the stretch, winning in hand by two lengths from Witherspoon, Wm. H. a good third, and Morris, who trotted the stretch very fast, was lapped on him; time, 2:18½. The others came along one by one, as per summary.

Second Heat.—Rosa Wilkes was now an established favorite at \$100 to \$40. They were sent off fairly on second trial, with Rosa in the van and Driver doing his best to get to the front. He was a good second at the quarter in 35s., and Wm. H. was making it hot for him, Morris going strong in fourth position, the others strung out. Rosa maintained the lead and reached the half in 1:10, and Morris got within a length of her, with Driver still leading Wm. H. Fanny Witherspoon began to show some of her noted speed on the last turn, and passed both Wm. H. and Driver, but could not reach Morris, who came along steadily and won second position as easily as Rosa did first. He was a length behind at the wire in 2:18¾.

Third Heat.—A good send-off was secured after a few attempts, and Rosa led as usual to the quarter in 35s. Morris broke on the first turn and dropped in behind the leader. Wm. H. went into second place, and Driver managed to work up to his wheel, but at the quarter Early Rose had passed Driver and trotted neck and neck with Wm. H., two lengths behind Rosa, at the half in 1:09¾. Driver, Witherspoon, Early Rose and Wm. H. were bunched as they reached the three-quarter pole, and they had an exciting race down the stretch for position. Morris outfooted them all but Rosa, and finished a length behind her, with Early Rose close to him and Fanny Witherspoon on her wheel, the others as per summary; time, 2:18¼. One of Calmar's reins parted, and he jumped over the fence. Caton righted him and jogged in behind the flag.

Time—2:18½, 2:18½, 2:18½.			

Between the heats of the above race the bell summoned the starters for the Grand Special, and all answered, but Alley. The movements of Clingstone and Thorne were closely scanned, for it was felt that the issue lay between them. They were received with applause, and the excitement, especially about the pool-stands, was intense, old speculators, who rarely compare notes with by-standers, asking, "What do you think of it? Will Clingstone be able to stand the pressure that Thorne will bring to bear on him?" The answer was that money talked to the tune of \$100 to \$40 at first, and finally \$100 to \$30, on Clingstone against the field.

Posting myself in the ladies' stand, which affords a capital view of the homestretch, I watched and waited to see how the first round would be fought.

First Heat.—A novice could see that Turner had determined to use all his peculiar arts to strip the laurels from his great adversary. He scored behind him merely as a boxing-master would feint, and when he meant business would turn in front, wheeling suddenly toward Clingstone, who was in second position, with So-So at the pole and J. B. Thomas outside. After several plays of this kind Thorne got a little the best of the send-off, but Clingstone, with remarkable coolness and steadiness, took him by the throat-latch as they rushed by So-So, who broke shortly after the word was given. It was a sight to see the battle of these giants as they went locked to the quarter, in 34s.; faster and faster they went to the half, in 1:07, neither of them wavering or faltering, although from the advantage of the pole Clingstone was slightly in the lead at this point. On reaching the three-quarter pole, in 1:40½, by a supreme effort, Thorne showed a head in front, and the cry arose, "He's got him," but as they rounded into the stretch Clingstone had placed the length of his body in advance of Thorne. Turner now made his rush, and Saunders had his whip ready for an emergency, and, as Thorne closed with him just beyond the distance, he tapped Clingstone lightly. He responded like a trump, and his stroke was as true and steady as at the start. Turner took both reins in one hand at the distance, and struck Thorne sharply with the whip, lifting him and shaking him at the same time, he made a feeble effort, but on being struck again and again dropped his tail and gave up the chase within a few strides of the wire, Clingstone beating him half a length, in 2:14, amid the cheers of the multitude gathered from all parts of the State. Thorne, too, received great praise, as it is believed that none but St. Julien or Mand S. could trot such a mile as he did in second position all the way round, and they would have to be to an edge to do it.

Second Heat.—The friends of Thorne said "We think more of his chances of winning now than we did before the start." So, instead of bidding they continued betting \$0 against \$100 very freely; when the horses appeared for the word neither exhibited any signs of distress. Clingstone is a cool customer, and a person who did not know him might think that Thorne was the fresher of the two, but the latter is a very resolute scorer, and there was more generalship displayed in scoring for this heat than any other of the meeting. Turner's horse came up faster, which gave him hopes that Clingstone was getting tired of it, but it was simply a cool calculating horse and his driver biding their time. Finally, after eleven false attempts, President Edwards said, "go," with the rival horses exactly even, but Thorne was under the most headway and dashed off a neck in the lead as they made the first turn, midway of it he showed a trifle more in advance, and he was so anxious to get the pole that he struck Clingstone's snaky, but that did not "rattle" the latter; he seemed to say, "I'll trot my legs off before you get this pole." At the quarter in 32 $\frac{3}{4}$ s., Thorne showed his nose in front. From this point to the half the pace was terrific, Clingstone was evidently all out and moving like a piece of machinery, while Thorne, whose gait is more laborious, by indomitable pluck would gather his strength and make a rush, showing, for a stride or two, a nose ahead, and in the next few strides lose this advantage, but quickly recover it again. Men, women and children gave vent to their excited feelings by suppressed applause, while this hand-to-hand encounter was going on. They were at the half in 1:05, and it was evident that one or the other must soon succumb, as the pace was a killing one. Shortly afterwards Thorne could not stand the strain longer; he fell back hopelessly beaten; Nature was exhausted. "The spirit was willing, but the flesh was weak." Thorne is like the race horse Monitor, he will go as fast as he can without whip or spur, and never gives up unless he is over-matched. Clingstone swept on, fighting time as resolutely as he did his late competitor, reaching the three-quarter pole in 1:39 $\frac{1}{2}$, but as Thorne was far to leeward Saunders took back his horse, and Turner seeing this shook up Thorne again, but it was a forlorn hope, for Clingstone won as he pleased by several lengths in 2:16 $\frac{1}{2}$, and Thorne was so badly off for speed that he had all he could do to beat J. B. Thomas; time, 2:16 $\frac{1}{2}$. So-So distanced.

Third Heat.—Everybody, including Turner, considered the race was virtually over, for he nodded for the word on first score, when two lengths behind, and made no effort for the heat, as he allowed Thomas to finish second. Clingstone, I dare say, could have shut out both of them, but he went an easy mile to the quarter in 35 $\frac{1}{2}$ seconds, the half in 1:10, three-quarters in 1:46 $\frac{1}{2}$, and mile 2:23 $\frac{1}{2}$. So ended one of the most remarkable races of the period, a race which entitles Clingstone to take rank with the best trotters of the age.

Same Day.—Purse, \$3,000; special class.		
W. J. Gordon's b. g. Clingstone, by Rysdyk.....	1	1
E. Thorne's ch. g. Edwin Thorne.....	2	2
M. Hodge's b. s. J. B. Thomas.....	4	3
N. W. Kittson's b. m. So-So.....	3	dis.
Time—2:14, 2:16 $\frac{1}{2}$, 2:23 $\frac{1}{2}$.		

Of Clingstone we give elsewhere an extended description. Rosa Wilkes began the season of 1880 at Augusta, Georgia, in the three-minute class, and won three out of the five races in which she was engaged. Last season she began with a record of 2:41 $\frac{1}{2}$, and she trotted in eleven races, of which she won five, taking heats in two others, and reducing her record to 2:25 $\frac{1}{2}$ at Lexington, Kentucky, on October 5th. Rosa Wilkes is a bay mare, nearly 15 $\frac{1}{2}$ hands, very blood-like in appearance. She has a neat head, a little-dished faced, very full eye, denoting courage and resolution, blood-like ear, good length of neck, good at throat-latch, rather long in her coupling, with short rump, but has fully developed quarters and stiles, legs and feet seem excellent, but she jogs as though sore forward, yet always goes strong and sound in her speeding, like Maud S., Darby, Mazo-Manie, Idol, and many others. She has wonderful speed, with a pure, level gait, with considerable knee action. In her breeding, she comes of the blending of the blood of the great trotting families Hambletonian and Mambrino Chief, and of the best representatives of both families; dam by Mambrino-Patchen, he full of thorough blood. When we find such lines of breeding, we invariably find what we all admire—gameness.

Following are the principal winners at Pittsburg and Cleveland, together with their best time made at the two meetings:

Winner.	Sire.	Class.	Amount won.	Best Time.
Adele Gould.....	Jay Gould.....	2:23	\$750	2:21
Aldine.....	Almont.....	2:26	750	2:19
Ray Billy (pacer).....	Shawhan's Ton Hal.	Free for all.	2:25	2:18
Clingstone.....	Rysdyk.....	Special.	1,500	2:14
Fuller (pacer).....	Clear Grit.....	2:25	250	2:17 $\frac{1}{2}$
Gordon's team, four-in-hand.....		Special.	500	2:40
Jerome Eddy.....	Louis Napoleon.....	2:23	1,000	2:18
Joe Bowers, Jr. (pacer).....	Joe Bowers.....	2:25	750	2:18

Rosa Wilkes.....	George Wilkes.....	2:29	1,000	2:18
Wilson.....	George Wilkes.....	2:23	750	2:22
Wilson.....	George Wilkes.....	3:00	750	2:22

An announcement has been made by telegraph that Col. William Edwards, of Cleveland, has accepted the challenge of John W. Shaw to trot Trunket against Clingstone for \$25,000 a side, the race to be trotted at Hartford. It is doubtful if this report is correct, as Mr. Gordon, the owner of Clingstone, recently stated that he would allow Clingstone to appear soon in regular races; but if it be true, the match would create intense interest, as Clingstone has never yet lost a race, and both horses have a record of 2:14.

SARATOGA RACES.

Towards the middle of August the season at Saratoga is at its height, and the latest reports state that the attendance was very large at that place, and that the races were of a much more interesting character. Especially was this the case in the race for the Grand Prize of Saratoga, which was a magnificent struggle from the start to the finish, and we take the following interesting account from the New York World:

The racing began with a dash of three-quarters of a mile, for horses of all ages, with an allowance of 7 pounds for

those that had been beaten and had not won a race here since the racing began, on the 10th of July, and with maiden allowances of from 10 to 22 pounds. The starters were Little Phil, at 118 pounds; Baby, 113 pounds; Disturbance, 111 pounds; Stand-Off and Mammonist, 108 pounds each; Gus Matthews, 101 pounds; Wanculla, 99 pounds; and Martinique, 94 pounds. So even were the lot supposed to be in merit that the field was made the favorite, with Gus Matthews, Little Phil and Mammonist selected out. The start was delayed fully forty-five minutes, principally by the temper of Gus Matthews, which was made even worse by the wilful disobedience of Frank McLaughlin and Heard, on Wanculla and Stand-Off, both repeatedly breaking away. When they did get the flag Gus Matthews was in front, with Mammonist and Little Phil close up. The next were Martinique, Disturbance, Wanculla and Baby, with Stand-Off behind. Matthews held the lead down the fractional track, attended by Little Phil and Wanculla. They passed the half together and continued so until well around the turn, when Disturbance closed up and at the three-quarters was on nearly equal terms with the leaders. Gus Matthews remained in front until within a few lengths of the seven furlong pole, when James McLaughlin cut Little Phil loose and, coming right away, won an easy race by a length and a half. In the race in from the pool-stands Disturbance beat Gus Matthews and captured the place money. Gus Matthews was third, followed by Martinique and Mammonist, with Baby, Stand-Off and Wanculla bringing up the rear; time, 1:15.

The second race was that now known as the Grand Prize of Saratoga, a handicap for all ages, at a mile and three-quarters, which was first run in 1879, when it was known as the Grand Union Hotel Purse, but since the proprietors of that establishment withdrew their contribution to a special event named after the hotel, the name has been changed to the Grand Prize of Saratoga. Although its history is brief, it is among the most popular races with owners and the public, the several contests having been among the best of the season. In its first year Danicheff, then a four-year-old, with 113 pounds, ran the distance in 3:07 and beat a field of seven. The next year, 1880, Luke Blackburn won after one of the grandest races ever run by that (then) great three-year-old. He was handicapped at 116 pounds, and gave "lumps" of weight to all the others, One Dime (4) running second with 110 pounds, Glenmore (5) third with 118 pounds, followed by Clemmie F. (5) at 103 pounds, General Phillips (6) at 105 pounds, Chimney Sweep (4) at 103 pounds. Blackburn won by two lengths in 3:07. Last year Checkmate, at 124 pounds, ran the distance in 3:01 $\frac{1}{2}$, beating by a scant half length Bushwhacker, to whom he was giving no less than 28 pounds, while to each of the others he was giving more or less weight. From this it will be seen that the stake has not only brought out first class horses, but has been won by the best horse in the race. Judged by the weight imposed by the handicapper, there was no exception to the rule in the character of the starters to-day. The weights were only announced a few days ago, and, as expected, Read's Thora, Churchill's Bend Or and Williams' Checkmate were on equal terms at the head of the list, each at 122 pounds. All three would have started had Checkmate not been sent to Monmouth Park. The starters, however, were an excellent lot, viz: Thora, Bend Or, Glidelia, Bushwhacker, Compensation, Ella Warfield and General Monroe. As to what the handicapper thought of them the following table shows:

Name and Age.	Weight for Age.	Handicap Weight.	Difference.	Excess against Thora.
Thora, 4.....	113	122	9 on
Bend Or, 4.....	118	122	4 on	5 lb.
Glidelia, 5.....	115	116	1 on	8 lb.
Compensation, 4.....	115	108	7 off	16 lb.
Bushwhacker, aged.....	118	101	17 off	20 lb.
Ella Warfield, 5.....	115	96	19 off	23 lb.
General Monroe, 4.....	118	96	22 off	31 lb.
* General Monroe carried 3 pounds overweight, which reduced the excess against Thora to 28 pounds.				

Although Bend Or beat Thora last Saturday for the Summer Handicap, and the latter still had so much the worst of the weights, Thora was the favorite in the pools, with Bend Or and Glidelia filling the second places. The latter was ridden by Costello, whom Mr. G. L. Lorillard had allowed to come from Monmouth Park for the express purpose of riding for Captain Conner. No time was lost in any preliminary gallops, none of the colors being shown in front of the stand, the horses going direct from the paddock to the post. There was but little delay at the post, and when the flag was dropped Glidelia and Ella Warfield were in front, with Bend Or and Thora close up, followed by General Monroe, Compensation and Bushwhacker. Before they had run fifty yards Thora took the lead, and being joined by Bend Or, Glidelia and Ella Warfield, the four ran into the main track lapped. When well into the track Thora drew away, and being joined by Ella Warfield on the turn, the two raced together to the three-quarters, followed a scant length behind by Glidelia and Bend Or. In the run up the stretch Costello moved Glidelia up, and lapping Thora on the outside, the pace became very fast as they ran past the judges, the three-quarters having been run in 1:19 $\frac{1}{2}$. Close up was Ella Warfield, a trifle in front of Bend Or, with Compensation in front of General Monroe and Bushwhacker, they being literally suffocated in the dust raised by the leaders. In the run round the turn Costello kept Glidelia at Thora's saddle-skirts, and gradually forcing the pace Glidelia took the lead opposite the Belmont stable, and at the half was half a length in front of Thora, the half-mile from the judges' stand having been run in 51 seconds. Close up to the two naves was Compensation, running on the inside, lapped by Bend Or, with Ella Warfield and General Monroe close in behind them, and with Monroe holding the outside position. When well round the turn Thora dropped back, seeing which the shouting began; but so intense was the interest of the crowd in the struggle between Glidelia, Compensation and Bend Or that General Monroe was at Glidelia's saddle skirts and Thora fairly lost in the dust before the threatening aspect of Monroe's position was realized. Glidelia and Monroe turned into the stretch nearly together, with Bend Or following close up, lapped by Compensation. The instant they were straight the struggle became a terrific one. Inch by inch General Monroe gained, and as the two were running wide of the rails, not a few hoped to see Walker bring Bend Or through, but as they reached the seven-furlong post it was evident that he was unequal to the occasion, and the whole attention was turned to the leaders. On they came, both Costello and Quantrell riding in fine style and using both whip and spur. Forty yards from the end the contest looked as if the result would certainly be a "dead heat," but with one grand rally Costello again got Glidelia to fully extend

herself, and as she did so her head showed a few inches in front, and as she was again able to repeat the exertion, she landed the stake, by a short head, with General Monroe second, a length in front of Bend Or. Six lengths away was Compensation, followed by Bushwhacker, Ella Warfield and Thora; time, 3:01, which beats the record by just one-quarter of a second, Checkmate's 3:01 $\frac{1}{4}$ for the same race last year being the best previous performance. Owing to the dust the timers were unable to take the time at the end of the mile, but they timed the other quarters as follows:

First quarter.....	0:26	Half mile.....	0:54 $\frac{1}{2}$
Second quarter.....	0:23 $\frac{1}{2}$	Three-quarters.....	1:19 $\frac{1}{2}$
Third quarter.....	0:24	Mile and a quarter.....	2:10 $\frac{1}{2}$
Fourth and fifth quarters.....	0:51	Mile and a half.....	2:35 $\frac{1}{2}$
Sixth quarter.....	0:25	Mile and three-quarters.....	3:01
Seventh quarter.....	0:26		

On the return to the scales a complaint of foul riding was made against Quantrell, the rider of General Monroe, by Walker, the rider of Bend Or, who alleged that he was run into by Monroe in coming round the last turn. After some delay the judges admitted the complaint, and disqualified General Monroe for any part of the race, giving Bend Or second place and Compensation the third place.

SUMMARY.

August 5, 1882.—The Grand Prize of Saratoga, a handicap sweepstakes, for all ages, at \$50 each, half forfeit, only \$10 if declared out by July 1, with \$1,200 added, the owner of the second to receive \$250 and of the third \$100 out of the stakes; closed with 54 subscribers, of which 23 declared out; mile and three-quarters.

W. M. Conner's ch. m. Glidelia, 5, by Bonnie Scotland, dam Waltz, 116 lbs.....	(Costello) 1
Churchill & Johnson's b. e. Bend Or, 4, by Buckden, dam Kate Walker, 122 lbs.....	(Walker) 2
O. Bowie's b. g. Compensation, 4, by Catesby, dam Australia, 108 lbs.....	(J. McLaughlin) 3
G. B. Bryson's b. g. Bushwhacker, aged, 101 lbs.....	(Stewart) 4
Davis & Hall's b. m. Ella Warfield, 96 lbs.....	(F. McLaughlin) 5
C. Read's b. t. Thora, 4, 122 lbs.....	(Brophy) 6
E. J. McElmeel's b. e. General Monroe, 4, 96 lbs, carried 99 lbs.....	(Quantrell) dq.
Time—3:01.	

Pools.—Thora, \$225; Glidelia, \$140; Bend Or, \$135; Ella Warfield, \$40; Bushwhacker, \$35; field, \$35. Mutuels paid \$20 50. General Monroe finished second, but was disqualified for a foul.

On Friday August 11th, in the first race, five furlongs, Fairview won, Verd second, Tennyson third; time, 1:04. In the second race, one mile and 50 yards, Warfield won, Granger second, Alvinde third; time, 2:14. In the third race, three-quarters of a mile, Bootjack won, Col. Watson second; time, 1:15 $\frac{1}{2}$. In the fourth race, one mile, Valparaiso won, Duke of Mont Albans and Amazon ran a dead heat for second place; time, 1:43.

On the 12th, in the first race, three-quarters of a mile, George Kenny won, Barnes second, Tocsin third; time 1:15. In the second race, mile and a half, Bend Or won, General Monroe second; time, 2:36 $\frac{1}{2}$. The third race, one mile, was a dead heat between Col. Watson and Julesburg, Northland next; time, 1:44 $\frac{1}{2}$. In the fourth race, three-quarters of a mile, Amazon won, Martinique second, time, 1:15 $\frac{1}{2}$.

On the 14th inst., the first race, one mile, Fellowplay won, Bruno second, Stanton third; time, 1:41 $\frac{1}{2}$. In the second race, 1 $\frac{1}{2}$ miles, Jennie V. won, Patinitza second; time 2:09. In the third race, three-quarters of a mile, Bounce won, Bride second; time 1:15. In the fourth race, one mile and a furlong, Farragut won, Baby second; time 1:56.

On the 15th, in the three-quarter-mile race, Bootjack won, Waponeketa second, Copias third; time, 1:18. In the second race, a mile and a quarter, Francis won, Square Dance second; time, 2:14. In the third race, one mile and five furlongs, Lord Warfield was first, General Monroe second; time, 2:14 $\frac{1}{2}$. In the fourth race, a steeplechase, two and a half miles, Post Guard won; Annet second; time, 5:26.

On the 16th, in the first race, five furlongs, Punster was first and Northana second; time, 1:03 $\frac{1}{2}$. In the second race, 1 $\frac{1}{2}$ miles, Granger won, Farragut second; time, 2:38 $\frac{1}{2}$. In the third race, a mile, Jennie V. won, Stanton second; time, 1:42. In the fourth race, three quarters of a mile, Molosine won, Blenheim second; time, 1:15.

THE UTICA RACES.

The meeting at Utica is the third of the great western trotting circuit, and of the races on the opening days. We have but the curt dispatches:

On Tuesday the 15th, in the purse for \$1,500 for the 2:38 class Wilson won; Eva second, Topsy third, time, 2:21—2:22—2:23 $\frac{1}{2}$ —2:23 $\frac{1}{2}$. In the purse of \$2,000 for the 2:23 class Unalaha won, R. P. second, Lucree, Mattie, Gloster, George M. and Cora Belmont also trotted; time—2:23—2:22 $\frac{1}{2}$ —2:23 $\frac{1}{2}$ —2:22 $\frac{1}{2}$ —2:24.

On the second day in the 2:38 class race, Wilson won, Eva second, Topsy third, Maytheme fourth; time, 2:21 $\frac{1}{2}$ —2:23 $\frac{1}{2}$ —2:23 $\frac{1}{2}$. The 2:23 class race Unalaha won, R. P. second, Suerel third, Mattie fourth; time, 2:23—2:21 $\frac{1}{2}$ —2:22 $\frac{1}{2}$ —2:22 $\frac{1}{2}$ —2:24.

On Wednesday the 16th in the 2:20 class, Hollow Dock won; St. Cloud second, Rigollette third; time, 2:21 $\frac{1}{2}$ —2:20 $\frac{1}{2}$ —2:21 $\frac{1}{2}$. The free-for-all pacers, barring Little Brown Jug, was unfinished. Flora Belle took two heats, Buffalo Girl two, Lucy two and Gem one; time, 2:14 $\frac{1}{2}$ —2:15 $\frac{1}{2}$ —2:19 $\frac{1}{2}$ —2:18—2:18 $\frac{1}{2}$ —2:18 $\frac{1}{2}$.

THE ROCHESTER RACES.

In consequence of the rain the first day's programme was postponed until Wednesday, the 9th inst., when Wilson, Rockton, May Thorne, Eva, Golden Rule, Topsy and Neville started for the \$1,500 purse in the 2:38 class. Wilson took the first, second and fourth heats and Rockton the third; time, 2:24 $\frac{1}{2}$, 2:24, 2:25 $\frac{1}{2}$ and 2:24 $\frac{1}{2}$. The second race was a purse of \$2,000 for the 2:23 class, in which Unalaha, R. P., Mattie, Lady Rolfe, Jewett, George M., Flora F. and Lucree started. R. P. won the first and second heats so handily, each in 2:24, that the betting crowd considered him almost a certain winner. Unalaha, however, captured the third heat after a sharp fight with Jewett, and, starting with the lead in the fourth and fifth heats, she out-footed all competitors, and was never headed, winning the trot with ease; time, 2:24 $\frac{1}{2}$, 2:24 $\frac{1}{2}$, 2:25 $\frac{1}{2}$; R. P. took second money, Mattie third, and Lady Rolfe fourth.

Following are telegraphic dispatches in connection with the races on the succeeding days:

On the 10th the rain seriously interfered with the races. In class 2:25, paeing, Joe Bowers won, Lumber Jack second. Fuller won the first heat and was distanced in the fifth; time, 2:18, 2:20, 2:20, 2:26 $\frac{1}{2}$, 2:27 $\frac{1}{2}$, 2:31. In the 2:29 class Overman won, Abe Downing second. Yellow Dock, Rigollette, Little Billy, Kate Taylor, London, Rolla and Big Ike also trotted; time, 2:21 $\frac{1}{2}$, 2:23, 2:23 $\frac{1}{2}$, 2:27 $\frac{1}{2}$, 2:27 $\frac{1}{2}$. The free for all pacing race was next on the programme, but it was postponed until the following day.

On the 11th the track was excellent and the attendance was large. Little Brown Jug, in his attempt to lower his record, made a mile in 2:18. The free-for-all pacing race was hotly contested and there was great excitement over the result. Following is the summary: Lucy 4, 4, 1, 1, 1; Flora Belle, 1, 1, 2, 2; Mattie Hunter, 2, 2, 4, 3, 3; Gem, 3, 3, 3, 4, 4; time, 2:16, 2:18½, 2:17½, 2:17½, 2:19. Following is the summary of the 2:23 class: Barbara Patchen, 2, 1, 2, 1, 1; Gladiolus, 1, 5, 1, 2, 3; Barrett, 3, 3, 3, 4, 2; Allegheny Boy, 4, 2, 4, 3, 4; Hattie Pearce, 6, 6, 5, 5, drawn; Kittie Wood, 5, 4, 6, drawn; Captain Lewis, Secret and May Thorne were drawn; time, 2:24½, 2:23, 2:24½, 2:24½, 2:26½. Two heats were trotted in the 2:26 class, and then that event was also postponed.

On the 12th the final day of the meeting there was again a very large assemblage. Aldine won the last heat and the race, in the postponed 2:26 class; Minnie second, King Wilkes third, Cornelia fourth; time, 2:23½, 2:21, 2:21½. For the special purse of \$3,000 the result was as follows: Clingstone, 2, 1, 1, 1; Edwin Thorne, 1, 2, 2, 2; Pickard, 3, 3, 3, 4; Minnie R, 6, 4, 4, 3; Kate Sprague, 4, 6, 5, 5; J. B. Thomas, 5, 5, 6, 6; time, 2:19, 2:18, 2:20, 2:21½. In the three-minute class Wilson won; Golden Rule second, Eva third, Topsy fourth; time, 2:25, 2:22½, 2:21½. In the 2:20 class Von Arnim won; Early Rose second, Driver third, Fred Douglass fourth; time, 2:20½, 2:21½, 2:19½.

MONMOUTH PARK RACES.

The races continue at the pleasant watering place by the seaside, and attract a large and fashionable attendance. On Saturday, August 12th, in the first race, three-quarters of a mile, Pizzaro won, Magnet second; time 1:18½. In the second race, one and three-quarters miles, Forester won, Dnplex second; time 3:13½. In the third race, one mile, Strathspey won, Laura Glass second; time 1:45½. In the fourth race, one and five-eighths miles, Monitor won, Girofle second, Checkmate third; time 2:45½. In an extra race, five-eighths mile, Felicit won, Yorkshire second; time 1:04½. In the steeple chase, short course, Frank Short won, Harry Gow second, Guy third; time 3:20. John T, the favorite, fell at the water jump and broke his leg.

On the 15th, among the valuable stakes run was the Omnibus, in which there were some hundred and sixty subscribers, among them Judge Mels and Judge McKinstry. In the first race, a mile, Miss Lumley was first, Gussie M. second; time 1:48. In the Criterion stakes, three-quarters of a mile, Fairfield won, Nimrod second, Inconstant third; time 1:17½. The Omnibus stakes a mile and a half, Harry Gilmore first, Wyoming second, Tom Plunkett third; time 2:44½. In the mile and a quarter Mary Anderson won, Parole second, Hospador third; 2:14½. In the mile and an eighth Yorkshire won easily, beating Rochester; time, 2:02½. In the steeplechase, whole course, Ed. Bouham won; Bernardine second. The other horses got off the course. No time was taken.

In the Breeders' stakes, somewhat similar to the Omnibus, only it is for two instead of three year olds, Mr. P. Lorillard ran first and second with Battledoor and Inconstant, both being by Glenlyon.

THE SANTA CRUZ RACES.

The season is now at its height in this pretty watering place by the sea, and with the additional attraction of the races, the beach and drives have presented a most animated appearance during the past week. The Executive Officers to whom was entrusted the arranging of the speed programme made a happy selection for the different classes, but, as might naturally be imagined, they met with many difficulties on this their first essay for an annual meeting, and the nominations were not so numerous as they will undoubtedly be when the Association can profit by the experience gained in former meetings. In one respect Santa Cruz has a great advantage over all the county and district fairs, as it possesses the most charming site for a race track within easy distance, by a smooth and well-kept road, from the centre of the town. Situated on a slight plateau, the view of the bay is very pretty, while the track is also well shaded from the boisterous winds that now and then sweep from the ocean. There are evident signs that the inhabitants are bent upon making Santa Cruz the queen of the watering places on the Pacific Coast. New buildings are being erected, the roads in every direction are in splendid order, and there is a project to continue the pretty drive on the sands, some five miles by the ocean side, which will be an unequalled attraction.

Tuesday, the 15th, was the opening day of the races, the first event reducing itself to a match between Nell Briody and Joe Deans, in which the mare was a great favorite at \$20 to \$10. The track was not in as good order as might have been expected, being somewhat heavy and cuppy, as horsemen style it. The attendance was good, and judging from the spirited pool-selling, a great deal of interest was taken in the proceedings. Joe Deans won the first heat, and then the betting was reversed in his favor, but the mare proved herself the better horse, and won the three successive heats and race in very handsome style.

The second race was a renewal of the old time battle between Crown Point, Starr King and Del Sur, in the 2:25 class, the two former having each scored a victory recently at the Bay District track. The betting was \$25 for Starr King, \$15 for Crown Point, and \$5 for Del Sur. In the first heat Starr King indulged in some of his running, and Del Sur made it hot for Crown Point, who, however, managed to score the heat to his favor. Still there was but little change in the betting, save that Starr King and Crown Point sold almost as equal favorites. To the latter, however, was accorded the second heat, and although Starr King took the third, Crown Point was the steadiest of the two, and won the fourth heat and race in a handy manner.

SUMMARIES.

Bay View Driving Park, Santa Cruz, August 15, 1882.—Purse, \$175, for district horses; best 3 in 5, to harness.

E. J. Swift names b. m. Nell Briody..... 2 1 1 1
Mr. Ford names g. g. Joe Dean..... 1 2 2 2
Time—2:45½, 2:43½, 2:45, 2:44½.

Same day.—Purse of \$500 for the 2:25 class; best 3 in 5, to harness.

C. Valensin names Crown Point..... 1 1 2 1
G. W. Welby names Starr King..... 3 3 1 2
L. J. Rose names Del Sur..... 2 2 3 3
Time—2:26, 2:29½, 2:27½, 2:31.

On the Wednesday, the programme was devoted chiefly to running races, and the attendance showed an increase on that of the preceding day. The first was a purse of \$100, a dash of three-quarters of a mile, which was won easily by Put. Robson's May B. in 1:23½, she being a great favorite

in the pools, with B. S. Clark's Viola R. being her sole contestant. The second event was a mile dash, \$50 each, \$10 forfeit with \$100 added, in which were entered W. L. Appleby's May D., P. J. Sauter's Night-Hawk and W. Boots' Mollie H. The former was the favorite, the two others selling in the field, and she won after a pretty struggle, with Night-Hawk second, in 1:44½, which was a fast run considering the state of the track and the stiff breeze that was blowing at the time. The proceedings closed with a well contested race for a purse of \$80, on which the pool-selling was very brisk. Following is the

SUMMARY.

Santa Cruz, August 16th.—Purse \$80, with \$10 entrance; best three in five, to harness.

W. E. Peck names Leland Stanford..... 2 1 1 3 1
J. M. Ferguson names Sequel John..... 3 3 3 1 2
D. W. Evans names Pajaro Chief..... 1 2 2 2 dis
Time—3:05, 3:04, 3:03, 3:02, 3:03½.

On Thursday the attendance was again good. The first was a trotting race, best three in five, for horses of the 2:40 class, between Slim Jim and Frank, which was won by Frank in three straight heats; time, 2:40, 2:37½, 2:39. The second race was for double teams, E. J. Swift's Frank and Nell Briody being matched against Dr. Chas. Ford's Joe Dean and Boy Dan. The first heat was won by Dean and Dan, and the last three by Frank and Nell; time, 2:57½, 2:53½, 2:56½, 2:54½.

A great influx of visitors was expected on the Friday and Saturday, the concluding days of the meeting, and it was the general opinion at Santa Cruz that it would prove to be a relative success for a first attempt by the Association.

GRAND CIRCUIT WINNERS OF HEATS AND RACES.

HORSES OF BUTTE COUNTY.

CHICO, BUTTE CO., August 16th, 1882.

EDITOR BREEDER AND SPORTSMAN: I send you to-day per Wells, Fargo & Co's. Express \$20.00 for four subscriptions to your truly sporting paper, a journal of which this Coast has stood in need for a long time.

Our District Fair commences on the 5th of September, and lasts during the week, and the prospects are good for a big turnout. There was a good attendance last year and closely contested races, and as our President will stand no pulling, every one feels that the best horse will win. I have not had time to visit the ranch of D. M. Reavis, the home of old Blackbird, but hope to in the near future, and will let you know how his colts are getting along. I hear some of them were moving fast while McIntyre was handling them. I was out to the ranch of J. T. McIntosh the other day, and saw some very fine stallions, mares and colts. The first name in my notes is that of the brown stallion, Singleton, four-year-old by Willie Schepper by Rydsky's Hameltonian, 1st dam Nellie by Son of Vermont. Black Hawk, 2d dam by Busiris. Singleton's dam is Lightfoot, the dam of Pride. Singleton is a rich brown tinged with tan, white hind feet; stands full 15½ hands high; a head and eye that show nerve and intelligence; a fine rangy neck well set into a pair of sloping shoulders; long, powerful arms; wide, flat legs; splendid feet; a middling long back, strongly coupled, deep through the heart; deep ribbed barrels, but not inclined to be slab-sided, and, I think, as well shaped and powerful hind quarters as I ever saw on a horse. The next is La Harpe; three years old; bright bay, hind legs white, nearly to hocks, large star; fully 16 hands, and weighs 1100, and looked to me as I saw him move in his paddock as if some day he might make a trotter. His sire is Fame, by Alexander's Belmont. The sire of Nutwood, La Harpe's dam Prairie Bird by Flax Tail, by Blue Bull. Mr. McIntosh has some fine brood mares. Kate Signal, by Old Signal, her dam by Illinois Medoc. She has a colt by her side by Singleton, and I tell you he is a beauty. Bessie, brown mare, by Reavis' Blackbird; record 2:34½. Trotted five miles out as a three-year old in 14:21½. Stinted to Singleton, as are all his mares. Susie Brown, by Blackbird, dam by son of Vermont Black Hawk, record 2:42, three-year-old; dark bay mare. Rena, by Gen. Reno, trotted trial when three years old, 2:35; was bred on account of a bad leg; her dam, Kate Signal. Ch. mare Elaine, by Blackbird, dam Hattie Bay by Billy Choatham, by Cracker, he by Boston; Hattie's dam Mary Butte, by Belmont, by American Boy; surely there is enough blue blood in her. Gray mare, Lady Emma, by Easton's David Hill, dam Dolly McNeil, by Hongland's Messenger. This mare was bred by Yank Sessions and sold to Mr. Ralston. At the track Jas. Hasty has a three-year-old Prompter; also a two-year-old by the same horse; two yearlings by Buccaneer; two sucklings by Singleton. Mr. Chas. Sherman has a two-year-old by Plumias, and a yearling filly by Brigadier.

Mr. McIntosh is working Singleton, a two-year-old filly. Exact, by Prompter, a yearling by Prompter, dam Susie Brown; this filly is matched against Mr. Sherman's Brigadier for \$200 a side, to come off Nov. 11th, and the way the Prompter moved when I saw her, there will be music in the air. The race is half a mile and repeat. There are a few good road horses up here. Lawyer Lusk drives a nice pair of Blackbirds that can beat fifty any day. Dr. Mason drives a very nice and useful pair of grays. Gen. Bidwell drives a pair of large browns, by Rattler, a fine carriage team. N. D. Rose takes the evening air behind a little bay to the time of three minutes. Mr. Burnham of the White House drives the old trotter Dutchman. And now, Mr. Editor, if you can find time to pay our little city a flying visit, you will meet with good friends and

true; and if on your departure you find anything to grumble at as to hospitality, you can make your visits as I write letters—
OCCASIONALLY.

THE PLUNGER REMAINS.

The Monmouth Park Association, after a careful investigation, has dismissed the charges made by J. E. Kelly, the bookmaker, against F. T. Walton, the decision being as follows:

"In the matter of the charges by J. E. Kelly against F. T. Walton that he had bribed the jockeys of Marathon and Inconstant to pull those horses in the race specified, the Executive Committee of the Monmouth Park Association find that the charges are not supported by proof or probability. But in the course of the investigation it was admitted by Mr. Walton that he frequently gives large sums of money to trainers and jockeys. That these gifts are made out of pure liberality is not credible. If not intended to corrupt, their tendency is corrupting. One object unquestionably is to obtain information which belongs exclusively to owners.

"In the hope of arresting the evils growing out of similar practices without having recourse to more stringent measures, the following clause is inserted in and made the fourth paragraph of the seventeenth Rule of Racing, the violation of which is punishable by ruling off the course:

"If any person give or offer to any trainer, jockey or employee, or if any trainer, jockey or employee accept or offer to accept any gratuity, whether in the form of money, share in a bet or other benefit, without the previous specific and written consent of the owner whose horse gives occasion to the gratuity, and to whom the trainer, jockey or employee is engaged; or "

The rule then continues in its various sections to provide against corruption and bribery among employees and officials of a race track.

Mr. Kelly said in reference to the decision that the action of the committee would be felt in racing before another year was passed, as it placed a premium upon dishonest practices. He claimed to have done his share to protect the interests of the turf, and said he could afford to abide the result if others could.

Mr. Walton was found among the bookmakers, with whom he was anxious to wager large sums that Frank Short would win the steeplechase. He had nothing to say except that the decision was a complete vindication of his character as a sporting man. He said that he would sue Mr. Kelly for defamation of character.

"Krik," the able correspondent of the New York World, from which paper we make the above excerpt, makes the following remarks, which are very pertinent to the matter:

"The Walton-Kelly decision at Monmouth Park caused some talk among the racing men here, and several had to pay bets they had lost that 'Peety' would be ruled off. The decision is generally held to be right, and only those criticize it who want Walton ruled off all courses, without regard to the evidence, on the principle that he is dangerous to the interest of the turf. The amendment to the rules, prohibiting presents to jockeys and others connected with the stables without the written consent of owners, gives satisfaction. There is certainly more legislation required in regard to jockeys and stable boys. Of late there has been much disobedience among the younger jockeys, and starts have been seriously delayed thereby. They have no punishment to fear. If they are fined, the men they are riding for will have to pay the fines; if they are suspended, it simply means to many of them that they will get just as much to eat as ever, and that they will have to do just as much work around the stables to which they are attached. The only difference is they cannot ride in a race for a certain number of days. Of course, to riders like Hughes, Fisher, Walker and others of that class, suspension is something of a punishment, but to the smaller boys like Heard, Stone, Harrison and Frank McLaughlin, it is none. If the owners by whom they are immediately engaged happen to want a light boy, there are plenty that can be borrowed for the occasion.

"Some racing men, who see the need of a change, think that jockeys should be licensed, as in England; but who shall issue the license? Another suggestion is that in the case of long meetings like those at Saratoga, Monmouth Park and Brighton, owners or trainers should be required to report to the secretary the names of their riders, with a statement of their weight and ability to ride, which statement should be submitted to the stewards, who should issue permits to ride, the permits to be revoked either for bad conduct or on proof that the boys have not the strength or ability to manage a horse. If done at one place this should be sustained elsewhere. In fact, there is no better field for true missionary work than the stables at large race tracks, if for nothing else than to teach the boys that 'cleanliness is next to godliness.' Of course this does not apply to all stables. There are a number where the boys are watched with some care, but in others they are simply left to herd together with less care bestowed on them than would be if they were so many dogs."

A PROPOSED GRAND MEETING AT NEW YORK.—There is a talk of the Gentlemen's Driving Association arranging a two days' meeting at their park, to come off at the latter part of September. It is claimed that a purse of \$5,000, free for all, would secure all the first-class celebrities, and a \$2,000 purse for the 2:21 class would be an attractive item on the programme. A race under the saddle and a pacing race might complete the fixtures for the two days of rare sport. Mr. Frank Work would undoubtedly be on hand with his grand team and give an exhibition mile, and Mr. William H. Vanderbilt would allow the dainty Queen of the Turf, Maud S, to appear; and perhaps Mr. Robert Bonner might be induced to send from the Westchester hills some of his choice stock. There is no doubt but that such a list of attractions would attract the largest assemblage ever seen on the Fleetwood track.

The horse Raven, by Monday from Camilla Urso, that was owned by C. M. Chase and showed such excellent ability here as a hurdle racer, is now owned in Canada. On the 8th inst., at Saratoga, he started in a handicap hurdle race, in which he was almost even favorite with Turfman, but as he was deliberately pulled, the judges immediately ruled McBride, his rider, off the course, as also Phair, the rider of Bailey, another Canadian horse, for the same offence.

The owners of Monroe Chief announce their readiness to match him for \$2,500 a side on any mile track west of Cleveland with Von Arnim, who beat him on the Chicago track this year. There has been much talk about such a race between the fast and even-matched stallions.

DEATH OF CAMBUSCAN.—The Vienna and Pesth papers chronicle with regret the death of Cambuscan, the sire of Kinseem and Kamballo, who, next to Buccaneer, was the most successful stallion at the Kistber stud. For a year past Cambuscan had been blind. Owing to the fear of the disease becoming hereditary, he had not been used for stud purposes since the affection assumed a permanent form, and accordingly he has been killed. Cambuscan, by Newminster out of The Arrow, was foaled in 1861, at Hampton Court. In 1863 he ran twice, viz., in the July Stakes and the Croome Stakes, both which races he won. He ran in the Derby of 1864, and in a field of thirty horses he finished fifth. During his racing career he ran nineteen times, winning on nine occasions, including two walks over. As a five-year-old he ran twice, and after being beaten at Newmarket at the first October Meeting he was withdrawn from the turf, and put to the stud at 25 guineas each mare. In 1872 he was bought for £4,000 by the late Mr. Cavaliero for exportation to Austria. The first of his stock that went to the post was Kinseem in 1874. Since that time a number of his produce have run annually in Germany and Austria, the total winnings up to the end of last month being £57,000. The stakes in those countries are, it is needless to say, comparatively small judged by the English standard. This sum therefore represents a great success for his immediate descendants on the Austrian and German turf.—*London Sportsman*.

Pearl Jennings, Wildmoor and Belle of the West have been sent to Saratoga from Salt Lake City, where Pearl won a match of \$5,000 from Red Boy. She is a three-year-old and won the Missouri Oaks at St. Louis, and ran in the Illinois Oaks with the Duchess of Norfolk, that race being taken by Katie Creel. At one time she was coming to Sacramento in company with Red Boy and Euchre, who have already arrived there, but the superior inducements offered at Saratoga changed her destination.

James A., by Leamington from Maiden, and a full brother to Parole, died last Tuesday in Pennsylvania. He was a fairly good race horse, but despite his fine breeding he had but few chances given to him at the stud. His owner recently refused \$4,000 for him.

THE PADDOCK.

NAME CLAIMED.

STOCKTON, Aug. 16, 1882.

I claim the name Voucher for brown colt, by Nephew, dam Fanny, by Vernon Patchen, foaled the 29th of March, 1881.

G. W. TRAHERN.

ANSWERS TO CORRESPONDENTS.

I. C. C., S. F.—All we can learn of the pedigree of Alice Garrett at present is that she is by Reubeu, a son of Vermont Black Hawk. The fastest record we find in the Trotting Calendar is 2:34. Perhaps the information can be obtained from some of our Stockton readers, and we will be obliged if some one will acquaint us with the breeding of this mare, and if she has trotted faster than 2:34.

EDITOR BREEDER AND SPORTSMAN.—DEAR SIR: Please inform us, 1st, if the State law now exists prohibiting the killing of doe or spotted fawn? 2nd, if so, and I should kill a spotted fawn, and it prove to be a buck, am I guilty of an offence? 3rd, when does the season expire under the present laws, if any? Respectfully,

W. J. McCLANE.

ANSWER.—As nearly as we can learn the State law has expired, though at the request of the California State Sportsman's Association, county laws protect does and spotted fawns. As a male colt is called a foal, a buck, as long as the coat is spotted, will rank as a fawn.

ROWING.

A REFEREE COMPLIMENTED.

MR. CHARLES G. YALE.—Sir: Recognizing the difficult and unthankful task you undertook in consenting to act as referee in the Rowing Regatta held on the 4th of July last, and knowing the active interest you feel in the success of the art of rowing in our midst, we, as the representatives of rowing clubs in San Francisco, feel that it is our duty to make some public acknowledgment of our appreciation of your efforts to further our interests.

In the last regatta, we regard your decision as just and equitable to each and all contestants, and have seen with regret all efforts which have been made to question their fairness. It is a well-known fact that every one cannot be satisfied, especially where personal interest is concerned; but we wish to state publicly that we disapprove of the ungentlemanly and unprofessional manner used by some of the disappointed oarsmen in expressing their disagreement with official decisions.

We have noted with considerable attention the discussion over the result of the four-oared shell race, and while we are inclined to sympathize with the debared crew, which certainly rowed a game race under adverse circumstances, still we cannot see how you could have decided otherwise by any recognized code of rules for amateur rowing.

We sign ourselves, yours sincerely: Haml. H. Dobbin, President Golden Gate Rowing Club; James W. Frim, Secretary Golden Gate Rowing Club; Chas. E. Lipp, President Ariel Rowing Club; B. Smith, Secretary Ariel Rowing Club; F. M. Deucher, President Dolphin Club; W. H. Byner, Secretary Dolphin Club; Val. Kehrlein, Jr., Secretary Triton S. and B. Club; Ed. Booremans, President Triton Club.

THE CHALLENGE CUP.—The Golden Gate Club has announced that it will not allow the Pioneers to carry off the BREEDER AND SPORTSMAN cup on Thanksgiving day without giving them a race. The Ariel Club is equally determined to win the title of champions of the Pacific coast, and if the old club obtain the trophy, it will be fully entitled to it. Both the Ariels and Golden Gate Clubs are capable of putting forward very strong crews. The Ariels will row in the paper boat imported by the St. George Club. The Pioneers feel confident of beating the Ariels in any boat, as they have once before defeated them in the St. George's shell. The boat at that time, however, was rigged according to the peculiar ideas of some amateurs, and was wholly unsuited to the Ariel crew.

THE AMATEUR CHAMPIONS.—The refusal of Mumford to meet Holmes in the recent regatta at Detroit has raised doubts of the amount of sand ballast carried by the former sculler, who has had pretensions to the title of Amateur Champion of America. R. G. Mosgrove, of New Orleans, who is a sculler of note, writes to the *Turf, Field and Farm*: "I had a presentiment that Mumford would not willingly cross oars with Holmes, for he never had a better opportunity than he had at Creve Coeur Lake, St. Louis, on the 23d of June. I stated to Holmes a week before the race that I was satisfied in my own mind that Mumford would withdraw the day of the race, and, as it was, my prognostications proved true. Mumford has had more luck in building up a reputation than any sculler I know. In 1879, at Saratoga, he won the championship on a foul; and at Philadelphia, in 1880, he only had two contestants who had no reputation; and Holmes having withdrawn, this gave him an easy victory. Mumford knows very well that Holmes is a fast sculler, consequently he does not wish to risk the cheap reputation he has won. I have rowed several times against Holmes, and have also rowed double with him, and I am satisfied that he is the fastest amateur single sculler in America. I do not wish to run down Mumford, but his withdrawing from the races in St. Louis last month, and his refusing to row at Detroit next month, is simply a clear back down on his part."

THE HILLSDALES AGAIN.—H. W. Garfield, Treasurer of the National Association of A. O., is now receiving donations for the "new Hillsdales fund." It will be remembered that when the American crew left for England, the total amount subscribed by the amateur boat clubs and individuals was \$1,613, of which sum \$413 was paid out for boats, oars, etc., \$400 for passage money, and the \$800 remaining given in charge of Captain Terwilliger to defray the European expenses of the crew. The long sojourn of the crew in England has, it is claimed, absorbed the latter part of this item, and a movement has been started for a new fund "to enable the Hillsdales to remain long enough abroad to force the English to acknowledge the sufficiency of their credentials and the eligibility of the crew under the strictest amateur definition." The Anacostan Boat Club, of Washington, has headed the new fund by subscribing \$25. The movement does not please the *Turf, Field and Farm*, and that journal remarks: "Now why should the boat clubs of America or individuals be called upon to contribute to such a fund? At this late day nothing is to be gained by the Hillsdales being recognized by Englishmen as amateurs. They, as an amateur crew in the strictest sense of the American definition, went abroad, and were repeatedly refused admission to all the prominent boating events in which they desired to compete. At this time when all those events are over, what good will it do the Hillsdales to be recognized as amateurs by the English snobs? Instead of contributing to a new fund, let Americans who have the good of amateur boating at heart sign a petition for the Hillsdales to return home, leaving the English amateur oarsmen branded by their own press as cowards."

A SCALY SCULLER.—For some time the exploits of John Lorgan, the English sculler, have been an enigma to the English sporting journals. They have been unable to classify the astute oarsman, as at times he showed form which led them to consider him the best man in England, and again exhibited poor ability that made them doubt his fitness for second class. Lately the feelings of the puzzled critics have been crystallizing into a well-grounded suspicion that Mr. Lorgan is a remarkably tricky individual, who will bear much watching. This suspicion has been strengthened by his latest performance, of which *Bell's Life* of July 22d says: "When Lorgan rowed and defeated Pearce, the Australian, a short time since, it will be remembered that there was some delay in handing over the stake money on the part of the gentleman to whom it was intrusted, because he was instructed by some one not to do so. So long a time elapsed that the matter found its way into print, and the stakeholder, not being exactly pleased with that sort of thing, forwarded the money to a contemporary, deducting £5 for his trouble. Lorgan, who alone had the power to receive the cash, being the winner, it appears very soon applied for and received the check. As soon as this could be converted into gold, Lorgan took ship for Australia with Laycock and Pearce, and they are all now on the high seas. Lorgan's backer, who offered him £30 for winning the race, which was refused, now has cause to complain, as he is left entirely minus, and Buncar, who trained Lorgan, but who was away at Hereford, also lives in hopes."

A CANDID CRITIC.—A writer in *Land and Water*, commenting on the unfair treatment of the Hillsdale crew in England, makes some interesting allusions to the privileges granted so-called amateur crews that have rowed for money. He says: "The Americans have certainly a fair case against us, and I am surprised none of the University crews have the courage and pluck to ignore the recommendation of the association, and offer to accept a challenge from the Hillsdales. I don't fancy any question of disqualification would lie against any college crew who chose to waive the question of class, and engage in a friendly match with the hardy-used strangers. I do not, like other writers, attempt to make out that the association is not representative. The members of the committee are sufficiently well known and capable to be thoroughly trusted with the conduct of all aquatic matters; but in this case I think a vote of want of confidence would be fairly carried, and they might alter their bill or resign. We are content to acknowledge the custom of the country, and allow Frenchmen, Germans and Irishmen who have rowed for money in their own regattas to compete as amateurs in England. Why strain to its utmost extent the amateur law in dealing with an American representative amateur crew? Their visit is under very different auspices from that of the 'Shoos,' and they certainly have a right to more courteous and fair treatment."

THE HILLSDALE CREW.—The cable is kept busy recording the movements of the Hillsdales in England. On Saturday the *London Sportsman* announced that owing to a satisfactory answer from the Yale Boat Club, the Thames Rowing Club has accepted the challenge of the Hillsdale crew. Their passage home has already been booked, but it will be canceled if necessary. The match, if it comes off, will take place about a month hence. Watts, who is President of the Amateur Oarsmen's Association of America, has arrived from Liverpool. He says the real objection to the Hillsdales personally was stated to him by Chatters, the President of the English Amateur Rowing Association. He said that the two last crews from America, Cornell and the Shoacemettes, proved ungentlemanly, and it was determined to guard against giving another crew an opportunity to dis-

play their vulgarity. This prevented their acceptance of the Hillsdales' challenge.

ASHAMED OF THEIR COUNTRYMEN.—The *London Athletic Review* thus comments on the so-called English rowing association which barred the Hillsdales: "The action is in opposition to the wishes and feelings of the best of English amateur oarsmen. It is an insult to the amateur oarsmen, that men who are recognized by the National Association as amateurs, and who are sent here as the accredited representatives of that association, should be presumed to be professionals without any direct evidence. We should advise that a public meeting of oarsmen be held in some central position in London within the next few days, and a vigorous protest be made against the action taken at the late meeting at Heuley. Adjectives fail when one begins to discuss this disgraceful action, which, no matter how it terminates, will always prove a black and ineffaceable mark on English amateur records. If ever one would be justified in using a great big D, it would be in this connection."

SHE COULD ROW.—According to the *St. John Sun*, considerable comment was recently excited at Indiantown by a couple of women getting into a boat, one of them seizing the oars and pulling out from the wharf. A bystander's curiosity prompted him to ask her how far she had to go. She replied ten or twelve miles, and that she had pulled down that distance in the morning. She seemed to think nothing of the long pull in the hot sun that was before her, and when some one in a spirit of aquatic banter asked her if she was not a relation of Hanlan's, she said no, but expressed a desire to meet "Pompey" on any occasion and row him for any money. When the joke was got through with, she started off, pulling a stroke very few of the loiterers on the wharf could have equaled. She was said to be a Miss Clark, of Kings County, New Brunswick.

THE HALIFAX REGATTA.—A regatta is to be held at Halifax, N. S., on Wednesday and Thursday, September 6th and 7th, when prizes amounting to about \$3,000 will be given. The programme decided on is as follows: Single-scutt race for championship of Halifax Harbor; single and double-scutt and four-oared shell races, open to all; double-scutt wherries, fishing-flats, fishing-whalers, ship's jolly-boats, man-of-war gigs, cutters and pinnaces, canoes, fishing sail-boats, and a consolation race for oarsmen not winning a prize in single-scutts. A yacht-race will probably be arranged also. The amount to be given for each race has not yet been decided on, but for the single and double-scutts it will probably be about \$500 to the first and \$200 to the second. It has been proposed to invite Hanlan to be the guest of the city during the regatta.

WILL NOT ROW.—The prospects of a match between Watkins and Griffin are not now very bright. The Long Bridge oarsmen seem to think that Watkins has had the best of the discussion, if that be any credit for a professional sculler. While a victory of jaw-bone is not to be despised, a triumph of muscle is always more commendable in aquatics. It would have been more satisfactory to have seen the rival scullers expend their breath in a contest on the water than on unprofitable discussion on the bridge. Griffin professed great willingness to row, but the offer of Watkins to give him the choice of positions strikes the Long Bridge men as the best guarantee of willingness, and their confidence in Samuel has been strengthened.

BOATING IN STOCKTON.—Ralph P. Lane, of the Amity Boat Club, of Stockton, writes in reply to an inquiry about the prospects of boating in Stockton, that the boys are in no great hurry to commence operations before Spring. The club has resolved to build a floating boat-house, 60x30 feet, and two stories in height. The second floor will be used as a club room, and will contain baths and other comforts for the oarsmen. The San Francisco oarsmen find the Winter the pleasantest season of the year for practice, as, with the exception perhaps of a few weeks the climate is most favorable for out-door exercise, and the water in condition for the finest boats.

The *New York Sportsman* says: "Charles Courtney has gone out of rowing, and is now aspiring to the championship honors of being poisoned. Wednesday's episode is the best on record."

According to present indications the single scull race on the 25th of August, at Saratoga Lake, will be a great success. The first prize of \$1,000 will go to the winner, and the remaining \$100 to the second in the race. The course will be three miles and a turn. Wallace Ross, Elliott, Hosmer and other noted scullers will compete.

ROSS AND HANLAN.—Wallace Ross is particularly anxious, it seems, to get a race with Ed. Hanlan this year, and with that object in view has placed a deposit of \$500 with the *Daily Telegraph*, St. John, N. B., and issued the subjoined challenge:

ST. JOHN, August 4th, 1882.
I hereby challenge Edward Hanlan to row me a five-mile race, two and a half miles and return, for one thousand dollars a side and the championship of the world, the race to be rowed within six weeks from the date of signing articles, and this challenge to remain open for three weeks from the 5th of August. If not accepted in that time I will claim the championship of the world, and be prepared to defend it against all comers.

WALLACE ROSS.

Ed. Hanlan proposes giving one thousand dollars for a sculler's race, open to all, barring Wallace Ross, to take place on Toronto Bay, Ont., about the first week in September.

YACHTING.

YACHT CRUISING.

Yacht cruising seems to be growing in favor in the East while racing seems to be confined among a few. That is, a few fast boats have all the racing to themselves, while those who have yachts of medium speed content themselves with cruising and sailing, leaving out the exciting elements of the race. As we stated in our editorial of last week there are several reasons for this. The expense of maintaining a racing yacht is very great, and few care to keep in racing trim yachts which are not as speedy as some others in the same fleet. The fast ones are kept up for racing and the others cruise.

Cruising is really the sport of yachting, which is better liked as it is longer practiced. When a fine fleet starts off on a cruise with a lot of yachtsmen and guests, everybody is in for a good time. The good time for one does not mean defeat and chagrin for another, as is the case in a race. There are no hard feelings engendered in any way. The

"scrub races" which take place when going from port to port afford amusement for all and give the racing gentlemen a chance to enjoy the contests, while the absence of prizes and the general freedom from rules, etc., make the racing pleasant for all.

Within the past month the large clubs in the East, the New York, Seawanhaka and Atlantic, have had extended cruises, and judging from the published reports all hands seem to have pretty thoroughly enjoyed themselves. The only thing to mar the pleasure has been that the yachts have drifted from place to place without any wind. It seems as if this drifting business was rather the rule than the exception. Here we never have any trouble on this score, although the writer remembers several occasions when too much wind prevented the return of a portion of the fleet.

People who own yachts and cruise about for short trips get more out of their boats than any other class. They invite a few friends and go for a day or two to some favored spot, where they fish or lounge, enjoying the sail to or from the place, and in fact the whole trip. Others can see no enjoyment in this, but must have the excitement of the race or there is no fun in it for them.

When two or more yachts cruise in company a great deal of pleasure is experienced. Mutual interchange of visits, the pleasant evening in company, good natured rivalry to be at anchor or under way first, all combine to make such trips remembered. Of course, in cruises in squadron there is more or less formality, and there is a certain submission to orders expected, which is irksome to many. Yet fleet cruising does more to create an *esprit du corps* than anything else. Though our grounds here are comparatively limited, there are many pleasant places to go. Of these we shall speak more anon.

AN INTERNATIONAL REGATTA.

The managers of the International Regatta Association of Nice, France, whose races have come to be considered among the principal European events, have issued its programme for the matches of 1883, which are to take place on March 27, 28 and 29 next. The President d'Honneur of the association is the Prince of Wales, President of the Yacht Racing Association, who heads a committee composed of French officials of prominence. In addition to the honorary committee, there is also a working one, members of the principal French yacht clubs. The programme embraces races for sailing and steam yachts, miniature sailing and steam yachts, and races for amateur oarsmen. Besides these, there are events for the boats of the men-of-war of the French Navy; also for yacht boats and steam launches. The prizes are large and numerous. The main features of the programme are:

Prix de Nice, for yachts of 30 tons and over—6,000f and gold medal to first; 2,000f and a gold medal to second; 1,000f and a medal to third, and 500f and a medal to fourth.

Prix du Yacht Club de France, for yachts of 15 tons and under 30 tons—5,000f, divided into four prizes, with a medal accompanying each.

Prix de la Baie des Anges, for yachts of 5 tons and under 15 tons—2,900f, divided into four prizes, with medals.

Prix des Alpes Maritimes, for yachts of 2 tons and under 5 tons—1,900f, divided into four prizes, with medals.

Prix de Monte Carlo, for steam yachts of 30 tons, register tonnage, course 30 miles. Prizes the same as offered for the Prix de Nice.

The rowing races for amateurs have prizes. Four oars, with a coxswain, cash, or an *objet d'art* of the same value, as follows: 5,000f to first, 2,000f to second, 1,000f to third, 500f to fourth, and 250f to fifth. For pair oars, with coxswains, the prizes total 2,850f; and for single scullers, 1,100f.

Entries close on March 15, with M. Androit Saétone, Secretary of the Regatta, and an entry fee of one per cent. on the amount of the first prize.

Yachting matters are rather dull in San Francisco Bay just at present.

As far as racing is concerned, yachting matters here are dull.

In the East very little yacht racing has been done this year.

Mr. Bennett's steam yacht *Namoura* fell a knot short of the promised speed.

Chief Justice Waite went yachting, on the schooner *Ruth*, with the New York Yacht Club.

The new schooner *Montauk* "got away with" Mr. Cook's *Tidal Wave* during the recent N. Y. C. cruise.

The Americus Yacht Club, in the East, tried to have a race the other day, but did not succeed, for lack of wind.

Before the cruise of the N. Y. Y. C. the yachts were taken out of water, cleansed and prepared for the "scrub races," sure to occur.

Ex-Governor Lippitt, who is Commodore of the Narragansett Yacht Club, invited the N. Y. Y. C. squadron to a grand dinner at his place on Narragansett Bay during the recent cruise of the club.

The steam yacht interest is a growing one, and such prominent gentlemen as Messrs. Lorillard, Bennett, Osgood and others have initiated proceedings toward forming a steam yacht club which shall advance the interest of the American steam yacht owners.

It is said that James Gordon Bennett has ordered a 1,100-ton steam yacht from English builders. It is also said he has ordered one from a Philadelphia firm. The *Namoura* does not suit him. Mr. Bennett is bound to have the finest yacht afloat, and, as he spends his money royally, will have what he wants, no doubt.

THE LOLITA YACHT CLUB.—Last Sunday this Club had their last excursion of the season. At 9:30 A. M. the yacht cast off from the sea wall with about forty ladies and gentlemen. Near mid-channel the Club's new flag was hoisted with three hearty cheers. A landing was made on the Marin shore at noon, and a substantial lunch spread for the hungry excursionists, after which sail was again set and the *Lolita's* prow was turned toward the Golden Gate. The party sailed several miles outside the heads and returned to Sausalito at sundown. Here they had supper, after which all tripped the light fantastic for two or three hours, and at 11:30 P. M. they were safely landed at the sea wall, well pleased with their excursion. Everyone contributed something to

the pleasure of the party, and music, songs and amusing stories were the order of the day. The *Lolita* Yacht Club was organized June 7th, 1880, and in these two years many good times have been had on the waters by the members. The Club rooms are on the corner of Powell and Jackson and are nicely furnished with billiard table, piano, pictures, etc. There is some talk of their holding a reception before long.

ATHLETICS.

THE OLYMPIC ATHLETIC CLUB.

The following is a list of the events selected by the Committee for the meeting to be held on September 23d, on the Grounds of the Club at Oakland:

Putting 16-pound weight, scratch, open.
Throwing baseball, scratch, open.
Running high jump, scratch, open.
Running wide jump, scratch, open.
Pole leaping, scratch, open.
Tug of war, teams of 600 pounds, open.
220 yards hurdle race, 10 hurdles, 3 feet 6 inches, scratch, open.
100 yards officers' race, scratch.
100 yards juvenile race, handicap, open.
220 yards juvenile race, handicap, open.
440 yards juvenile race, handicap, open.
1 mile scratch, open.
100 yards, scratch, open—R. S. Haley barred.
880 yards bicycle race, handicap, open.
1 mile bicycle race, handicap, open.
2 mile bicycle race, handicap, open.
1-5 mile bicycle race, without hands, open.
Gold and Silver medals for first and second in each event, except the officers' race.

The Committee reserves the right to reject any entry. Competitors not members of the O. A. C. will be charged an entrance fee of 50 cents in each event. The Grounds will be open at 12 M., and the games will, called at 1 P. M., sharp.

Gold medals will be awarded for beating the Club or Pacific Coast records, from scratch, in several of the events which will be named by the Committee at a later date.

C. S. JOHNSTONE'S 300-YARD RUN.

We published, July 1, a full report of this athlete's remarkable 300-yard race at Aston Lower Grounds, Birmingham, England. The path is 500 yards in circuit, and 250 yards of the 300 yards course is down hill. It now appears that the measurement of the path is open to suspicion. We have received from Mr. N. L. Jackson, editor of the *Midland Athlete*, a letter in which this and other matters of interest are treated as follows:

Thanks for your kindness in sending me the alterations for records, etc., and also the report of that grand performance of Myers at 600 yards. Truly he is a wonder. I should think that he and George could beat the world at all distances, Brooks included. I have little news of interest. H. R. Ball, who won our championship quarter, is a vastly improved man, and I shall expect him to beat 50s on his day. He easily defeated C. S. Johnstone (who was credited with such fast time for the 300 at Aston) in a level 300 last Saturday, and when running the championship quarter he covered the first 300 in 32s, which equals our best. I shall not accept Johnstone's 300, for, although I was present, I stupidly missed timing, and only Oliver had the watch on. He is a very reliable timer, but the distance was not verified afterward. On the 3d inst. I saw Johnstone run a quarter on the same ground in time equal to 49.1-5 or 2-55. I felt sure it couldn't be right, and on measuring the course it was found to be about 10 or 12 yards short. Therefore, "taking one consideration with another," I do not think it safe to accept his record, although I believe on his day he is quite equal to it.

Under these circumstances it seems wise to reject Johnstone's performance.—N. Y. Clipper.

THE OLYMPIC CLUB.—At a meeting held on Wednesday last, Messrs. Mark Trombini, George Berton, C. H. Slater, George McCord and William D. O'Kane were elected as a nominating committee. On Monday, September 4th, polls will be open for the election of officers from 2 to 9 P. M., and on Monday, the inauguration of officers will take place and the annual reports will be heard.

A HAND-BALL MATCH.—At the Racquet Court, No. 733 Howard street, on Sunday next, will be played a game of hand-ball between two sides for a purse of \$100. The Court is very well adapted for the game, and there are a great many amateurs who are quite proficient in these athletic amusements.

BICYCLING.

THE LOWDEN AND KING MATCH.—On Saturday, August 5th, W. H. Lowden and G. L. King met at the grounds of the Olympic Athletic Club, in Oakland, for the purpose of deciding the ownership of the second medal in the two-mile race, they having made a dead heat on the occasion of the races on July 22d. Shortly before 4 o'clock the men appeared and were placed as in the former race, Lowden at 310 yards and King at 180. At the pistol fire both got off well, and King commenced to cut down the distance which separated him from the leader, gaining so rapidly that he had overtaken him by the time the first mile was completed; after which he contented himself with following within a few yards until the last half of the last lap, when he put on steam, and, passing to the front, crossed the line ten or fifteen yards in advance, in 6 min. 39 sec., which was three seconds better than the time made in the first race. Both men used heavy roadsters, Lowden a 52-inch and King a 51-inch Harvard.

During the month of September it is the intention to hold a grand meeting, when most of the prominent riders of the coast will be represented in the different events.

Bicyclers have had much trouble in the Eastern States on account of the extortion of baggage masters whenever it has been necessary for them to take trains for any point. The following order, issued by J. Van Smith, general baggage agent of the Baltimore and Ohio Railroad, is a sensible one, and it is hoped will be generally followed by other lines, as it will cause an increased patronage by those who would like to make as long a trip as possible and having but limited time, would return by rail: "In future bicycles will be carried free in baggage cars between any stations on this line, when accompanied by owner or rider, upon presentation by him of his passage ticket. Care must be taken in handling them to prevent damage or breakage."

The English Bicycle Union hold a series of championship meetings each year, the distances run being one, five, twenty-five and fifty miles. Two of these events usually take place in London, and the others upon some provincial track. The one and twenty-five mile races took place July 8th, at the Astor grounds, Birmingham, and were won by F. Moore of the Warstone B. C., in 2 m. 47 2-5 sec., for the mile, and 1 h. 25 m., 8 1-5 sec. for the twenty-five miles. The five miles was run at the Crystal Palace track, London, July 22d, and was won by J. S. Whetton, Cambridge University, in 15 m. 12 4-5 sec.

A twenty-mile race is announced to come off shortly upon a trotting track in Brockton, Mass., between an unnamed bicyclist and some trotting horses. No bicyclist has yet accomplished twenty miles in as good time as that of the best trotting horses, even upon the best track which could be had. It is hardly possible, therefore, that the bicycle would stand any chance against any fair twenty-miler upon the rough soft surface of a trotting track. The only fair way would be to make a separate bicycle track inside the trotting track with a good, hard, smooth surface.

Amateur riders of bicycles and tricycles are becoming restive under the burden of the duty charged upon imported machines, which being thirty-three per cent, brings the price to high figures. The only American manufacturers own patents which enable them to add ten dollars to the cost of each imported machine, and they put the price of their own machines up to the same high figures, which should certainly give them a good profit.

BASE BALL.

The weather was rather chilly at the Recreation Grounds last Sunday, and in consequence many of our pleasure-seekers went across the bay in quest of milder climes. The attendance was therefore only fair at the match game between the Haverly California Theatre team and Renos. The contest was a very one-sided affair, for in the third innings the Theatre Company had scored nine points to the one of their opponents, and they had such an advantage at the finish that they did not even play their ninth inning. Despite this fact, there was some good play shown on both sides, and McElroy, who took the pitcher's position, vice Riordan, relegated to third base, showed a capacity that with practice and confidence will add greatly to the strength of the Reno team. Theu Cregan, as catcher, was unusually sure and alert, and the two played well into one another's hands. The Renos' fielding was much closer, but their batting needs improvement, compared with that of their adversaries, Levy especially gaining rounds of applause for his effective hits. On the side of the Theatre nine, Carroll acted as pitcher and Lawton as catcher. The former also fielded with skill and precision, as did also McDonald and Riordan in their respective positions. Following is the score:

RENOS.						
T.B.	R.	I.B.	P.O.	A.	E.	
Swanton, c. f.	5	0	2	0	1	1
Riordan, 3d b.	4	0	0	2	1	0
Lake, r. f.	4	1	0	0	1	1
Cadogan, l. f.	4	2	2	0	0	6
Start, 2d b.	4	2	0	0	2	2
Hamilton, s. s.	4	1	0	0	1	1
McElroy, p.	4	0	1	0	10	7
Cregan, c.	4	0	0	14	3	0
Sheridan, 1st b.	4	0	1	8	0	1
Totals	37	6	7	24	19	8
HAVERLYS.						
T.B.	R.	I.B.	P.O.	A.	E.	
Meegan, 3d b.	5	0	0	2	3	2
J. Carroll, p.	5	1	0	1	10	1
McDonald, 2d b.	4	1	0	3	2	0
Lawton, c.	4	3	2	11	1	0
Levy, c. f.	4	2	4	0	0	1
McCord, s. s.	4	2	1	1	1	0
Moran, l. f.	4	0	1	0	0	0
Pope, r. f.	4	1	1	2	0	1
Pratt, 1st b.	4	0	0	7	0	0
Totals	38	10	9	27	17	5
Innings	1	2	3	4	5	6
Haverlys	0	3	6	0	0	1
Renos	0	1	0	2	0	0

* The Haverlys played only eight innings.

Earned runs—Renos 1. Home runs—Pope. Three-base hits—Start. Base on errors—Renos 3. Haverlys 4. Left on bases—Renos 2, Haverlys 4. Struck out—Renos 3, Haverlys 6. Base on balls—Haverlys 3. Wild pitch—Carroll 1. Umpire—M. Finn. Nautics. Time—One hour and forty-five minutes. Scorers—Hennessy and Wallace.

A ONE-SIDED GAME.—A match game of base ball was played Sunday between nines from Held Bros. & Co. and F. Toplitz & Co., resulting in the defeat of the latter in two innings by a score of 28 to 1. The game was played at Recreation Park. Following is the score:

Held Bros. & Co.	Runs.	Outs.	F. Toplitz & Co.	Runs.	Outs.
L. T. Smith, 2d b.	4	0	M. Stone, c.	1	0
M. O'Donnell, 1st b.	2	2	J. Greenberg, r. f.	0	1
P. Zemansky, 3d b.	4	0	I. L. Betzel, 3d b.	0	1
A. D. Simson, r. f.	4	0	B. Rosenberg, 2d b.	0	0
T. Holm, p.	4	0	T. Flaherty, p.	0	1
C. Zemansky, c.	2	1	S. Asheim, c. f.	0	1
J. R. Curtis, c. f.	3	0	C. Sharp, l. f.	0	1
M. Heilbrun, l. f.	2	1	D. Livingston, 1st b.	0	0
B. Adler, s. s.	3	0	G. Warschauer, s. s.	0	1
Totals	23	4	Totals	1	6

Only one man was out in the second inning; Toplitz men giving up the game before Held Bros. had completed their inning. The batting of the Held nine was very heavy, four home runs being made in the first inning. Their fielding, also, was very good. One of the features of the game was the curve pitching of T. Holm, which greatly baffled the Toplitz nine.

At the Olympic Grounds, on Sunday last, the weather was much more agreeable, and there was a very good attendance to witness the match between the Olympic nine and the Nationals. The former played an open, rollicking game at the bat, which, with poor fielding on the part of their adversaries, placed the Olympics in the sixth innings at 17 to 1, but the Nationals then added 9 more to their score, the Olympics winning by 13 points.

On next Sunday the match at the Recreation Grounds will be between the Renos and the Nautics, and the Haverly California team will play at Concord against the Stars of that place.

On the 27th of this month there will be a very interesting match between the Haverly nine and the Athletics of 1878 and 1879. It will be a pleasure to see some of these popular players back on the diamond field, and, as the match is for the benefit of L. N. David, formerly the captain of the Athletics, with fair weather there is sure to be a large and appreciative assemblage.

JOSEPH CAIRN SIMPSON, - - - EDITOR

SAN FRANCISCO, - SATURDAY, AUGUST 19, 1882

"HORSES BREAKING."

Very properly the code of the National Trotting Association inflicts severe penalties when horses infringe the rule which comes under the above heading. If the driver when his horse breaks fails to pull him back at once, he is debarred from winning the heat; and if the judges deem the case a flagrant one, they can distance the horse, fine the driver to the amount of \$100, or suspend him for a year. If, in spite of his best endeavors, he fails to bring his horse to the trot or pace, twice the distance gained is deducted at the "outcome." In case of any horse (in a trotting race) repeatedly breaking, or running, or pacing, he is to be placed last in the heat. This is a synopsis of the rule bearing on the subject, and though there may be instances where it is difficult to determine how much a horse has gained in a series of breaks, this is the only troublesome thing to determine, provided the judges have field glasses to aid them, when the horses are at a distance from the judges' stand, in noting what the drivers are doing.

When a horse loses by breaks, a penalty cannot be inflicted unless there is a repetition beyond what can be reasonably expected. This clause was incorporated to cover the case of several horses which were on the track when it was adopted. These were in the habit of making a "revolution" whenever a competitor was likely to get in front of them, the revolution consisting in one or two racing bounds, changing their gait while in the air, and trotting faster than ever for a few yards, when up they would go again. We saw a wager won at Fleetwood Park, the offer being a bet of \$100 that one of the horses in the race would make fifteen breaks from the time the word was given until the heat was ended. An umpire was provided with a field-glass, and he reported twenty-three distinct changes from the trot to the run. The same horse was in a race at Buffalo, New York, when he indulged in the same freaks, and his owner, Commodore Vanderbilt, was so indignant that the deciding heat was taken away from him, though he was only a neck in front, that in the height of his dudgeon he left the grounds—ordered the special train which brought him to return at once; and the irate Commodore was not mollified, though the train sped at "a mile a minute gait" on the homeward journey. We are always reluctant to reprehend judges for any mistake they may make. To "judge" a trotting race is at the best a disagreeable task, and when that is likely to be followed by virulent verbal abuse and newspaper criticisms, it requires a bold man to run the risk. But there are instances when the press must perform a duty, and though it is an irksome task, it cannot be shirked without injury following.

As will be learned by a perusal of the account of the 2:30 race which took place on the Bay District Course last Saturday, there was a great deal of dissatisfaction over the award of the fourth heat to Sweetness. That it was a wrong decision we firmly believe, though we cannot for an instant entertain the opinion that it was done through ulterior influences. It was far more probably a mistake from not giving attention enough to whether the rule was violated or not by Poscora Hayward, and from the tendency to lean towards the "honest trotter"

which never "leaves its feet" during the pendency of the race. There is a praiseworthy sympathy for the horse which struggles and tries its utmost to win, trotting and still trotting under all circumstances; but laudable as this feeling is, it must not be allowed to do injustice. Had the rule been followed as closely as the code directs, there should have been noted the breaks which the horses made.

The judges can direct the Clerk of the Course to prepare diagrams representing the track. When a horse breaks make a note of it, by using the initial of the name and an l. or g. to denote whether there was loss or gain. This is the general practice among reporters, excepting that no note is made of losses or gains. A reporter may overlook some occurrence when he is jotting down his notes; the judges can dictate without taking their eyes off the horses, and thus have as nearly a perfect transcript of what has been done as can be taken. With this before them there is little chance for disagreement, still less for making an erroneous decision. Depending entirely on memory, for even so short a period as the time of a heat, there is a likelihood of mistakes being made. Two breaks are magnified into several; a decided loss has been transformed into a gain of several lengths. It is not surprising that men who think they have been greatly wronged give vent to their feelings, and use terms which are to be regretted by every one who has the continued welfare of the sport at heart. No good can arise from this course. If it can be proved that the judges have done wrong knowingly, that they have been interested in any way so that there is the least chance for pecuniary benefit to them, the laws afford the remedy; not so potent, perhaps, as to make good the losses, but a fearful punishment to any one who has a spark of honest, manly feeling. And in this connection we crave permission to offer advice to the Associations regarding the selection of judges. If possible do not appoint men who make a practice of betting on the races. Not that there is any danger of a large number of these doing wrong, for in all our experience we have found the right ones of this class the very best judges from every point of view. But people are prone to accuse them of having pecuniary interest at stake, and though they are aware of the falsity of the accusation, adhere to it to carry a point. Whenever practicable the President should occupy the position of first judge, always providing that he is qualified. The Directors should supply the others, and it is long odds that there will be more satisfactory rulings than when the judges are selected on the ground.

THE RACES AT SANTA CRUZ.

At the time of going to press there is little to offer in regard to the races at Santa Cruz, and the full account will be delayed until the next issue of the paper. Our Special Commissioner reports that the track was slow on the day which Starr King met with an ignominious defeat. There must have been some cause outside of a moderately heavy track, as we cannot conceive the Santa Cruz course being so bad as to bring a horse from 2:22 on Saturday to worse than 2:30 on the following Tuesday. The journey may have affected him prejudicially, or the former race taken away his speed. Whatever was the trouble, it is to be regretted, as people are prone to ascribe wrong-doing in such cases, and that when parties are clearly innocent. We sincerely hope that the whole circuit will be made without cause for reproach on the part of the drivers. There are numbers who always cry robbery when they lose money, but unless these chronic denouncers have something to base their charges upon which is apparent, not much credit will be given to their noisy declamation. Those who did not witness the race at Santa Cruz are certainly incompetent critics, as the mere fact of disparity in the time there and that which was made on the Bay District Course is not a convincing argument.

We are of the opinion that the time of holding the Fair was not opportune. Owners of horses are averse to taking risks before the main fairs are

held, especially when it involves a direct return. After the San Jose Fair, with entries closing when the State Exhibition has come to an end, would ensure a more liberal support from the horsemen, and with good fields, resulting from a new classification, there would be a corresponding attendance. It is very important to the breeding interests of California that new points be established, and there are natural advantages at Santa Cruz which ought to ensure the popularity of the sport at that place. But natural advantages will not win without the aid of good and liberal management. The experience gained, however, is something towards success in the future, and we have strong faith that Santa Cruz will yet take a prominent place in the California Circuit.

THE PROPOSED DRIVE.

San Francisco is destined to become a great Summer resort for the people of the East. Metropolitan pleasures are joined to a climate which will be duly appreciated by those who live where July, August, and part of September are almost unendurable from the extreme heat. Eventually the Summer will be the "fashionable season," as it is now in London. The theatres will do the most profitable business of the year; every place of amusement will have plenty of visitors; and not a trade, profession or handicraft but which will reap some of the benefits. There is no one project which will be so potential in attracting the class of people who have money enough to indulge in a Summer vacation as the proposed drive. Those who have been in the habit of pursuing the truly American recreation of fast driving, can then follow their favorite custom, and where these throng others are sure to follow. Before many years the road-drivers of New York and other Eastern cities will look to California for the choicest animals. A few may ship their teams, as they do now to Saratoga and Long Branch; many will be on the lookout for something to suit their fancy, and which will also have the charm of novelty when they get back home, as another inducement to purchase. When that time comes, and it surely will, the breeding farms of the State will be taxed to supply the demand. There are scores of men here who have the means who will not be outdone by the transient visitors, and the result will be that this city will become celebrated above all others of the like population for the superior quality of the road horses. In the great centre of America, where millions of dollars are invested in fast animals for road-driving, there is a limited season when these can be used with pleasure.

In the New York Herald of the 10th instant appeared the following sentences: "The city was filled with weary men yesterday. Women were worried, children were dying, and animals wilted in the heat. Here and there a ripple of excitement was caused by a popular breeze, but it lasted a moment only." Contrast that with a week ago Wednesday in San Francisco. In the early morning there was just the right degree of warmth, the sun shining brightly, and from that time until midday there was only a gentle breeze. There could not be a lovelier time for a morning drive, a time when horses would feel that it was a pleasure to go faster than they ever did before. There were no heat-worried men, heat-worried women, heat-dying children; neither were there animals wilting in a close, murky atmosphere, made intolerable by an overly fervent sun. From noon until evening-tide a light overcoat was required by those who are peculiarly sensitive to thermal changes, but as the sun drew towards the Pacific even these could dispense with its use. Mornings and evenings, during the greater part of the Summer, are all that could be desired for a drive. Those who like the excitement attendant on rapid motion could select either portion of the day with ample opportunity to gratify the desire, unaccompanied by any drawback.

Business men are prone to think that a morning's indulgence interferes with the business of the day, and from a hygienic point of view it is well for them to think so. There is no such a

panacea to banish cankering cares as driving fast trotters furnishes; still better when there are crowds of people bent on the same errand. It is utterly impossible for a man who is engaged in the laudable endeavor to beat some one in a brush on the road to think of anything else. He must give his horse or horses every attention he is capable of bestowing, and if the match is a close one, there is a fervency of feeling, an intensity of purpose, which only those who have gone through the experience can realize or understand. It is the grandest medicine in the world for an overtaken brain. It is worth all the medical nostrums compounded from the days of Galen to the present time. No matter how despondent a man is, no odds how deep a hold "the blues" has upon him, the load is lifted from the heart, the grapevine lock of despair is broken, he returns to dinner with an appetite which needs no sauces nor stimulants to relish his food, sleeps the sleep of contentment, and rises in the morning as gay as a two-year-old.

But the pleasure-seekers are not restricted to certain hours. Morning or evening are alike to them, and we know of numbers of men in the East who, in such a climate as this, and with a road to drive upon such as is projected, would utilize both periods of the day; that is, when visiting San Francisco on a Summer tour, in the same situation as when the periodical trips are made to places which have not a tithe of the attractions. It always puts us in a bad humor when we cogitate over the anomalous feature of Californians so lightly appreciating advantages which no other people in the world possess. To reduce the querying to the topic under consideration: the apathy which prevails in regard to providing a suitable place for gentlemen who have a fondness for fast driving, and when it can be done with so little comparative outlay, and at the same time promote the interests of the whole people, is a state of affairs which we cannot comprehend. We have faith, however, that it will not be long before the stigma is removed, and in place of San Francisco being noted for the worst roads of any city on the continent, it will be celebrated as the antitheton of its former self in this respect. This the climate guarantees, for in no other country can there be the same happy combination, viz., the best horses in the world and the best opportunity to use them, apart from a proper drive.

EFFICIENT OFFICERS.

Only those who have been brought intimately in connection with fairs and race-meetings are aware how much depends on the Secretary for the smooth running of these exhibitions. There may be a high grade of executive ability in the President; he may be supported by a directory every way competent; and if the Secretary is not up to the requirements of his office, there are annoyances and serious drawbacks. There is a great knack in carrying out the minutiae, the happy talent of looking after the small things, the keeping of trifles from assuming large proportions, in managing all the details so that there is harmony all through. The correspondence is a big feature. A hundred or more silly questions will be sent through the postoffice, and inquiries which argue a want of common sense in the investigator. A curt answer may develop an antagonism which will be detrimental, a failure to reply a slight which cannot be overcome. So far as we are acquainted, the Secretaries of the different fairs in California are capable and courteous. Those we are the most intimately acquainted with are emphatically the right men in the right place. We always admired the manner in which Major Beck managed the affairs of the State Agricultural Society, and he has a worthy successor in the present incumbent. Affable, courteous, of ready conception, methodical, untiring and industrious, he is eminently fitted for the duties of his position; and we do not hesitate to give him a place in the very foremost rank, no matter where or in what country the comparison is made. The Golden Gate is equally fortunate, and the Bay District Association can be given the same compliment without there being the least

chance for an accusation of undeserved flattery. It may be thought invidious to make selections from the corps, all of the members being entitled to consideration. We speak, of course, of those with whom we are the most intimate, without a doubt that a more intimate acquaintance would furnish equally as bright examples.

And now we have a request to make, that may appear as though the former remarks were on the "soft sawder" order, a touch of blarney to carry our point. But the answer will benefit the various associations more than it will the BREEDER AND SPORTSMAN, as the compliance will give them the opportunity to disseminate intelligence that will be to their future advantage. The request is that the respective Secretaries will send us official summaries of the racing and trotting as soon as it can be done conveniently after the close of the fairs. There never has been a complete record of the racing and trotting on the Pacific Coast; in fact, it has been impossible to present anything further than a report of a few of the most prominent. It does not matter how perfect a representation is made by correspondents of papers, there must be official sanction to give due weight; and we sincerely hope to be enabled to give a full synopsis of all that has taken place. We will furnish the Secretaries, in return, with enough copies of the paper to supply those who are interested, or proof-slips, should they desire to mail them. There may be penalties which require immediate notice to render effective, and this will be the easiest method of giving the proper publicity.

OUR PORTRAITS.

We are pleased to receive many testimonials indorsing the finish and accuracy of the pictures of the notable horses which have been published. As the bias may govern that causes every mother to think her own baby the handsomest, or the breeder to estimate his colts as superior to all others, the corroboration of disinterested individuals is extremely gratifying. A. B. Allen, of the firm of R. H. Allen & Co., Water street, New York, writes of the BREEDER AND SPORTSMAN: "The work is nicely gotten up, and the horse portraits the finest and most truthful I have ever seen—really handsome." Mr. Allen has an intimate acquaintance with all the agricultural and turf journals for the past fifty years; has been a contributor to many of them, American and English; and therefore is well qualified to judge. Those who are familiar with the originals of the portraits unanimously concur in pronouncing them truthful representations. The aim has been to give the horses, as nearly as can be, with fidelity, and not, as is usually the case, marred by the conceptions of the artist as to what they should be. Mr. Wytenbach is certain to take high rank as a delineator of animals. In due course there will be other illustrations—portraits of carriage, "all-work," and draft horses, the various breeds of cattle, sheep, dogs, etc. These will be as faithful as the ones which precede them.

EDITORIAL NOTES.

SANTA ROSA takes up the measure after Santa Cruz, and Tuesday next will be the opening day. A correct list of the entries will be found elsewhere, and there is a very fair list of names. The initial race is for district two-year-olds, with four in it, and the second race is for the 2:35 class.

On Wednesday there are a special race and a contest between the pacers, Washington and Johnny Weigle. On Thursday six of the district three-year-olds, and the same day the 2:25 brings together Starr King, Ecbora, Del Sur, Cairo, Director and Crown Point. This will be the first appearance of Director in California in a public race, and those who saw him in the East will be anxious to learn what the California climate has done. He has a record of 2:27½, made last year when he was four years old. He and Ecbora will bring a new element into the 2:25, and add greatly to the interest of the race. On Friday there is the 2:40, with a fine lot to contend, and on Saturday the 2:30 is of great promise for sport, inasmuch as Poscora Hayward, Blanche, Nellie R., Inca, Albert W., and Blackmore are the entries. The closing race of the meeting is the 2:21 class, the entries to which close to-day. With the fine track at Santa Rosa, the contiguity to this city, and other favorable considerations, the meeting should attract a large attendance.

PETALUMA is the next on the list, and the entries are also published in this number. Now that Petaluma has a mile track, which we understand is as good as it is possible for a newly built one to be, there should be nothing in the way of the most successful exhibition ever held there. Unfortunately, few of those who were interested were aware of the improvements which have been made, and the dread of the old track undoubtedly deterred many from putting in an appearance.

SANTA CLAUS, the telegraph says, won the special stallion race at Rochester, last Wednesday. It was a great victory for him, as he defeated Black Cloud and Jerome Eddy; the latter the horse which trotted in 2:16¼, at Buffalo, and Black Cloud has been doing so wonderfully well that many thought he could reduce the time of Smuggler when the proper occasion came. Black Cloud won the first heat and was second in the others; the time, 2:21¼, 2:25, 2:19, 2:20¼. As Santa Claus was third in the first heat, it is probable that he did not try to win the first game of the rubber. He is evidently coming around again, and before the season is ended, he may show very prominently in the stallion record.

AND NOW the pinkeye has fastened its unwelcome grip on a large number of horses which are expected to take part in the coming fairs. Fortunately it is in so mild a form, that in all probability very few of those attacked will be incapacitated from fulfilling their engagements. It does not seem to interfere with their appetites, and only those which are the worst off appear to lack their ordinary spirits. The cough is severe, though it seems to arise from an irritation in the throat rather than from the lungs being affected. Occasionally there is a trifle of swelling in the limbs, but, were it not for the cough, in a great many instances there would be nothing to indicate that anything was the matter.

TROTTER CATALOGUES.—During the week we have received catalogues of the trotting stock of B. J. Treacy, Ashland Park, near Lexington, Kentucky; of the Woodburn trotting stud of A. J. Alexander, Spring Station, Kentucky; and of W. R. Nims, Lexington, Michigan. Not the least part of the trotting literature of the period is the information embodied in these catalogues. Woodburn and Ashland Park are among the noted breeding farms of the continent, and the stock of Mr. Nims are certainly of the right stamp so far as breeding goes. In the future we will have a good deal to say about the stock on the breeding farms of the East as well as California.

THE ACCIDENT to Albert W. suggests the propriety of following the English custom of using protecting boots on the knees of valuable horses whenever they are led, ridden or driven on the road. Horses which are given nearly all their exercise on the track are very liable to trip on an unequal surface, and when the road is hard a fall entails "broken knees." We have the pair which came across the ocean with Bonnie Scotland, and not a few have been puzzled to know what they were intended for. Though the injury to this fine son of Electioneer is slight, it is serious enough to throw him out of training at a critical period.

OVERMAN made a great display of speed in his race at Buffalo, coming from the half-mile pole in 1:07. This is a good omen for the future, and if nothing befalls him he is sure to take a place among the top-savvyers of the tracks. There are few finer looking horses, and still more rare are those who have the same happy combination of size, form and speed.

THE YEARLING RACE, for a purse of \$300, which is to be trotted on Tuesday, at the State Fair, closes to-day. As the first gets 60 per cent., the second 30 per cent., and the third 10 per cent. of the purse, the entries should be numerous. The distance is a dash of a mile, and this is certainly easier for colts of the age than heats of half a mile.

BY THE WAY, Mr. Finigan has a yearling by Santa Claus, and from a mare by Blondin, a son of imported Sovereign, which is over fifteen hands high and of admirable form. The Santa Claus from Sweetness is a very highly finished colt, and better than good looks, he shows a gait which is a token of future excellence.

BILLIARD TOURNAMENT.

One of the chief attractions at the Mechanics' Fair is the billiard tournament at the three-ball games for purses of \$100, \$75, \$50, and \$35, offered by the J. F. Brunswick and Balke Manufacturing Co. The entries comprise Charles Saylor, champion of the Pacific Coast, Ben. F. Saylor, L. A. Gates, W. F. Lowry, William Terrill, W. Roach and J. B. F. McCleary. This necessitates the playing of twenty-two games, the first of which came off last Wednesday, and was between Benjamin Saylor and W. Roach. The former won by a score of 300 points to 232, and his best run was 42, while his average showed 55.9 points.

The second game, played on Thursday evening, was between W. F. Lowry and L. A. Gates, and was won by the former with a score of 300 to 223 points of his adversary. The winner's highest runs were 14, 28, 44, 21, and his average was 85.37, while the best runs of Gates were 40, 15, 18, 35, and his average was 67.36. A noticeable part of the entertainment was the exhibition of the fancy shots made by J. B. F. McCleary. The tournament will be continued every evening, and is well worthy of attention.

THE GUN.

CLAY BIRD MATCH.—The last clay pigeon match of the Alameda County Sportsman's Club came off on Saturday afternoon at Littlefield Range, near Oakland. Owing to the swiftness and uncertainty of flight of the pottery birds, it was very difficult for even the best shots to make good scores. This shooting was for the Club's gold and silver medals at clay pigeons. There are also medals for shooting live pigeons, but these will be competed for on the last Saturday of this month. Twenty-five entries were made, distance fifteen yards, at ten birds, with the following results:

Tuttle.....	1	1	1	1	0	1	1	1	0	—8
Nagle.....	0	1	0	1	0	1	0	1	0	—5
Mortimer.....	1	0	1	0	1	1	0	1	0	—5
Havens.....	0	1	0	0	1	0	1	1	1	—6
*Crellin.....	0	1	0	1	1	1	1	1	0	—7
*Pierce.....	1	1	1	0	0	1	1	1	0	—7
*Veitch.....	1	0	1	0	1	0	0	0	1	—4
Bell.....	0	1	0	0	0	1	1	1	0	—5
Vaughn.....	1	1	1	0	0	0	0	0	0	—4
*Frisch.....	1	1	0	0	0	0	0	1	0	—3
Coffin.....	1	0	0	1	0	0	0	0	1	—4
Taylor.....	0	0	1	1	0	0	0	0	1	—3
Rector.....	0	1	1	0	0	0	0	0	1	—3
Batchelder.....	0	1	0	1	1	0	0	0	1	—5
Scholl.....	0	1	1	1	1	1	1	0	0	—7
Jacobus.....	0	1	1	1	0	0	1	0	0	—4
Haskell.....	0	0	1	1	1	1	0	0	0	—5
Spaulding.....	1	1	1	0	1	0	1	1	0	—7

Rhocr.....	1	1	0	1	0	0	0	1	1	—5
Frazer.....	0	0	0	0	1	0	1	1	1	—5
Eastman.....	1	0	1	1	0	1	1	0	0	—6
Strickland.....	0	1	1	1	1	1	1	1	1	—9
*McKillican.....	0	1	1	0	0	1	1	0	1	—4
Williams.....	1	1	1	1	1	0	1	0	1	—8

* Second class.

Mr. Strickland won the gold medal for the day, but as Mr. C. Tuttle has made the best scores of the season, it will at the next meeting become his property permanently. Crellin and Pierce shot off the tie at five birds, twenty yards. Crellin having won three times, the silver medal of the second class, it becomes his property. After this, six or eight matches for small purses were shot. Many members who made poor scores with clay pigeons will have a chance at the live bird match to make a far better record than that of last Saturday.

THE PRIZES FOR THE COSMOPOLITAN CLUB.—The "Champion" Cosmopolitan Shooting Club will hold their last shooting match of the season at San Bruno, on Sunday, Aug. 20, 1882. The committee having the shoot in hand are using every endeavor to make this the crowning shoot of the year. Admirers and members of the Club have donated the following prizes for the day: Ben Brown, 1/2 doz. ladies' silk under shirts; J. J. O'Brien, 1/2 doz. pair kid gloves; J. Brownell, Jr., 1 doz. handkerchiefs; F. Putzman, Jr., 1 case wine; Dr. Rover, 1 pair stuffed canvas back ducks; P. Funcke, 1 pair best calf skin boots; J. Ferguson, 1 case wine; J. H. Orr, 1 scarf; Geo. Muller, 1 box crackers; W. Fulton, 2 1/2-kegs choke bow powder; Hazard Powder Co., 2 1/2-kegs powder; C. H. Graham, 1 pair hunting boots; Stack & Lacombe, 1 hat; M. Lachman & Co., 1 velvet rug; Clabrough & Golcher, 1 Victoria leather gun case; Liddle & Kading, 1 hunting suit; F. Johnson, pair leather leggings; P. Murphy, pair hunting shoes; J. Pollack, box cigars; P. Mayer, barrel flour; L. Reynolds, \$5.00 coin; A. H. Higgins, leather cartridge case; J. H. Mentz, handsome meerschaum pipe; R. Cunningham, "something handsome;" Gen. Nelson, \$20 piece.

PRAIRIE CHICKENS FOR SOUTHERN CALIFORNIA.—D. H. Hites, of Gibson, Neb., has written the following letter to the Santa Barbara Rod and Gun Club: "I wish to make a few suggestions to you in regard to game birds, for consideration. I suppose you have no prairie chickens or grouse in your valleys. It is one of the best of game birds, and will do well anywhere that quail will. Ten years ago we had no quail here. We imported a half dozen; now the country is covered with quail. If your members wish it, I will send you this winter one dozen prairie chickens. That is, I will give the birds and you pay the transportation charges. Another bird you need is the wild turkey. He is the king of game birds. We have none here, but in Western Missouri they are abundant, and could be bought for a trifle. You may be able to get these much nearer home, and could thus save expense, but let me advise you by all means to get them. My interest is this: I expect to come to Santa Barbara shortly to make a home; I can shoot a little, and if the birds were plentiful, I might be able to buy some, even if I could not kill any. You may have these birds to the manner born, in which case I ask your pardon for this intrusion, but as I have never seen any mention of them, I have come to the conclusion that you do not have them." The prairie bird affords good sport and is delicious eating, so we shall be pleased to see Mr. Hites' generous offer accepted, as it might lead to the bird becoming thoroughly acclimated on this coast. As to the wild turkey, it will be a more difficult matter, as they require a combination of forest where insect life abounds. Their favorite home is in the Carolinas.

On Sunday, Sept. 3d, next, there will be a wing shooting tournament at San Bruno. This match is open to all California, and will be under the government of the State Rules, except that shooting in squads will be adopted. The conditions are twenty-five birds each, at twenty-one yards rise, and the entrance fee is \$25. The prizes are 40, 30, 20 and 10 per cent. of the entrance money, in the order of the score.

An excellent chance for our sportsmen who are in pursuit of fiercer game than the deer, is presented around Canada Ramundo, in San Mateo county. It is reported that there are two or three California lions prowling about the hills there, committing sad depredations among the sheep and cattle of the neighborhood. An organized hunt would be in order.

Mr. John K. Orr is always taking a keen interest in the future of the State as regards the introduction of foreign game birds, and by the Oceanic he recently received three copper-colored cock pheasants to replace those that died some time since. He intends to turn them loose on his place, near San Rafael with the seven hens he has already in his possession.

Mr. D. M. Pyle, one of the Directors of the California State Sportsman Club, returned the other day from Santa Clara county, with his game bag filled with doves. These birds are quite plentiful at Menlo Park and vicinity.

Another case of game-law breaking has come to the notice of the California State Sportsman's Association. A person in Marin County was found with a spotted fawn in his possession. Five persons in all are implicated in this affair, and arrangements are being made to prosecute them to the full extent of the law.

On next Sunday, 20th, the Cosmopolitan Club meet at San Bruno, for their last pigeon shoot of the season. On Sunday, 27th, the California Club will also finish their season's shooting at San Bruno.

Near Healdsburg, two gentlemen, C. W. Randell and Mr. O'Keef, in one day's shooting bagged 207 doves, Mr. Randell killing 140 and Mr. O'Keef 67.

A man at Tracy, San Joaquin County, has recently been convicted on a charge of killing fawn out of season.

Good curlew and plover shooting is to be had on the marshes near San Pablo.

THE RIFLE.

THE N. G. C. RIFLE TEAM.—The monthly competition of the N. G. C. rifle team for class medals came off at Shell Mound range on the 6th inst. The team is divided into three classes; those of the first class shooting two and five hundred yards. The medal of the first class was won by Lieut. J. E. Klein, who made 90 out of a possible 100 points. Corporal Hampton made 40 out of a possible 50 and won the second class. The third medal was taken by Serg't. Elder in 40 out of 50 points. The second and third class shoot at two hundred yards only. Messrs. Merry, Hinchman and Campbell received the leather medals. The officers of the team are: President, Major A. T. Kloss; Secretary, Sergeant E. N. Snook; Treasurer, Lieutenant H. T. Sime; Shooting Master, Lieut. J. E. Klein. This team was organized fifteen years ago, and claims some of the best rifle shots on the Pacific Coast.

DEER HUNTING FOR PLEASURE VS. DEER HUNTING FOR MEAT.

EDITOR BREEDER AND SPORTSMAN: In reading the letter of a deer hunt in the BREEDER AND SPORTSMAN of July 29th, signed H. H., I could help not but blush to think that where there is so much pleasure in deer hunting, if done in a proper and sportsmanlike way, how a hunter could enjoy or take pleasure in the mere slaughter of deer for their meat, and that the sportsman with hounds was to be censured. Instead of reading a descriptive deer hunt, an exciting chase with hounds and gun, it culminated in the crimson-stained slaughter-pen, where the warm, red blood flows from the deep gash inflicted by the sharpened knife, and the brains were oozing from beneath the bludgeon which was steadily aimed by a strong muscular arm that falters not in taking life.

If such is to be the style of hunting, and to be pictured and praised, why not form societies and clubs that will take a solemn oath that no deadly poison shall remain unadministered as long as there is a deer hound in the land? Then foster and well pay a set of instructors that will educate the young sportsmen to crawl upon their bellies in pursuit of game, regardless of rocks or thorns, and so practiced and drilled that their bellies are tough and calloused, which the fangs of a rattlesnake or the sting of a tarantula could not penetrate. They should be forced to hold their breath for fear of alarming the game, and till their eyes should protrude and become dead to the enjoyment of any scenery in their scope of vision, no matter how grand. Make their arms bare and muscular, that they could sling a bludgeon and bury it deep in the brain of their victim. Instruct them to load their guns to the muzzles; callous their shoulders, that they may resist the recoil; inflict a severe penalty should they ever draw a bead upon their game outside of forty paces, and then for them to take deliberate aim at their heads, await their near approach, and when close to the muzzle, shut their eyes and blaze away. Should the deer's skull bone be entirely removed at the first fire, and the bludgeon not come in play, drop their guns, if still in their possession, and plunge their hands in the cavity made, draw from it the quivering brain, and besmear their faces as a token of the mastery art and their extreme enjoyment. Always have ready between their teeth the blade of a blood-stained and well-sharpened knife, that they could sever the main artery in the neck of the deer, and as the warm blood flows, feast themselves upon it till their thirst is quenched. Also, instruct the young sportsmen that after being sumptuously entertained, if so fortunate, by the host and hostess, and attired in their hunting suit, their entire nature must undergo a change, and from the smiling face that is full of thankfulness and pleasure, and their manly form that stands erect, they must become changed to a sneaking appearance; their heads must drop and project forward; their eyes protrude; brows droop; back become humped; knees bending, and then, fixing their countenance in as mean an expression as possible, press forward, skulk and crouch in the shadow of every clump or object in sight, and should they near a water-hole, or by chance a salt lick, then make themselves as small as possible, and drag themselves upon their bellies till a clump or hole is reached. Then conceal themselves and quietly await the approach of their victim, although swarming with ants and tortured with mosquitoes, there patiently await the approach of the deer. Such is the pleasure of a descriptive still hunt.

Now draw the comparison with the sportsman well equipped and mounted on the back of a proud stepping horse, with a fine pack of well trained deer hounds leading the way, their bright eyes and glossy backs shining in the sunlight, their musical voices filling the air and making the mountains echo and ring, and as they move forward, impatiently nearing the hunting ground, the horn is sounded, away gallop the hounds, eager for the chase. The huntsman's blood grows warm, his pulse quickens, his countenance glows with excitement, his muscles move with restless delight, his lungs expand and new life appears. Draw the comparison, and imagine the angler after the finny thoroughbred, equipped with a delicate rod, silken line, dainty colored flies and a neat straw basket hanging from his shoulders, when he quietly follows the winding brook that is overhung with the branches of various trees and vines, the sunlight seldom

reaching the rippling waters that sparkle and fall from rock to rock. Casting his line in the ripples, and when the tempting bait has scarcely reached the water before there is fastened a fish that darts like a flash, only to be landed on the bank by the feet of the angler. Such is pleasure! Now, the fish hunter, with his pockets filled with giant powder cartridges, his sneaking form and guilty step hidden with an old potato sack, plods along the stream and at every hole he whirls in his cartridge and awaits the result, to see every living fish there dead. He gathers up the fish and drops them in his sack, chuckling over his spoils. Or, for instance, the quail hunter, that has for weeks waited the young brood with food in some secluded spot, and as soon as the law will shield him he skulks quietly alone through the brush at the break of day, secreting himself near at hand awaits the return of the birds to feed, and when they are gathered together feeding he blazes away with some old rusty gun that roars like distant thunder; then sneaking up he gathers together the dead and mangled birds—from twelve to twenty—and crowds them in some old sack, while reckoning their cash value in market. Two or three more similar explosions and he returns home delighted with his day's sport. The true sportsman with a fine brace of well-trained setters, the latest model of a fine breech-loading gun, and all the appliances that can add to his pleasure. He proudly watches his dogs as they beat over the meadow, and when the scent of the game is taken, which is quickly discovered by the sportsman, who is watching every move, and as they are working and drawing upon the birds more cautiously every step till a full point is made, each dog is staunch and firm as a model of brass. The sportsman watches every move and pictures their attitude with delight. The bird is flushed, and when at a proper distance is shot on the wing; the dogs drop at the report, and await the word "fetch." When brought in the dead bird is closely examined and admired, his feathers smoothed and then laid with care in his game bag. One bird thus taken has contributed more pleasure and sport than one hundred ground-sluced at a single shot.

WHETSTONE.

DEER HUNTING IN MARIN COUNTY.

EDITOR BREEDER AND SPORTSMAN: Last Friday noon I received an invitation from a friend in Oakland to participate in a deer hunt with himself and two other gentlemen of San Francisco. Our destination was over and through the lofty hills and deep cañons of Marin County, where the redwood and the pine extend their topmost branches toward the heavens, and the hunter with his gun and dog retire to quench their thirst for game. Saturday morning I shouldered old Winchester once more, and proceeded to San Francisco, where I met my three companions, Messrs. D. R., W. R. and M. C., at 1:35 p. m. on the little steamer San Rafael. Three hours later I reached my destination, it being the residence of an old Scotch mountaineer, who has witnessed sixty-six Summers of mountain life. His residence is about five miles southwesterly from San Geronimo. My three companions, having to come from Point San Quentin in a two-wheeled conveyance, did not arrive until about 10 p. m., after which a brief nap was taken by all hands. At 5 a. m. Sunday the cupboard was ransacked and the intruders decamped for the happy hunting grounds, about one mile distant, accompanied by Old Scotty and six fine hounds. At 7 o'clock we succeeded in starting a young buck at which I got two shots in quick succession, at about four hundred yards distance, but without success. A moment later they were answered by two more from the rifle of W. R., who was within seventy-five yards of his victim, both bullets having penetrated the body of the unfortunate buck and laid him lifeless upon the ground. After a few moments' rest, we concluded to search in another ravine near by. We had hardly reached our stations when a huge old buck came bounding up the hill toward me. I took deliberate aim through my peep-sight, and missed him. The old buck, becoming excited from dogs on all sides of him, threw his optics in my direction and came bounding like wildfire toward me. When at a distance of about one hundred yards, I raised my rifle to take a peep-sight, but my eyes grew so immense and the sight appeared so small, not a deer could be seen. I then took the open sight, and planted a ball in the bosom of my would-be assailant, which laid him low with the death look upon his eye. I then proceeded to the opposite side of the hill, where I spied a large four-pronged buck walking leisurely down the ravine. I immediately fired upon him, causing him to come across on to the side hill on which I was stationed. One of our dogs, hearing the report of my gun, came directly over the hill from where we had strung up our second deer, and meeting the buck directly face to face, caused him to rebound into the valley, at which time I fired, wounding him in the loins severely. He then decreased his speed very rapidly, and after climbing the hill to a reasonable distance he entered a small land-slide, whereupon he stood and fought for dear life with the dogs. I advanced toward him, and while doing so I saw my old backer, W. R., close by, who fired, breaking one of his fore legs. But our antagonist proved game to the last, having been pierced by four bullets. On retiring homeward our dogs trailed a young buck about fifteen months old, which was brought to bay by my friend W. R. At 9:05 a. m. we had our four bucks strapped upon our horses, the whole hunt occupying a little less than four hours' time. Had we attempted, we could have shot two doe with but little work. At 2:30 p. m. we proceeded homeward with a glad and gallant tread, leaving Old Scotty to dream once more of a deer hunt. My next will likely be a black bear hunt in the locality of Mt. Tamalpais. Yours, respectfully,

Oakland, Aug. 14th.

PEEP-SIGHT.

THE BREEDER AND SPORTSMAN is the name of a new weekly paper, conducted by Jos. Cairn Simpson, and published at San Francisco, Cal., at five dollars per annum. The first copy is at hand. For beauty of typography, extent and variety of matter, and general make-up, it is unequalled by its contemporaries. Mr. Simpson is author of a popular book, called *Horse Portraiture*, and for more than a quarter of a century has been a popular writer on horse and sporting matters. He is admirably qualified to conduct such an enterprise, and the breeders of the Pacific Coast are to be congratulated upon having so able and gifted a champion of their interests.—*St. Louis Rural World*.

FISH.

Tomcod are caught in great numbers all around the bay.

Ben Brown and Chas. Carter were fishing at Lagnitas Lake and caught many trout ten to fourteen inches in length.

Bay fishing ought to be good this coming Sunday, as this is one of the three days of the first quarter of the moon when the tides are small.

Lon Zugler was up to Bodega Corners and caught 216 trout that measured from eight to twelve inches. The stream is alive with fish.

W. H. Lawrence, of the Spring Valley Water Co., says that the black bass in Crystal Springs Lake weigh two and three pounds and take either fly or spoon.

Strange to say, the *Tuscarora Times-Review* finds fault with the Tuscarora people who go fishing because they won't lie. They come home without any fish, sadly say so, and quietly take a back seat.

People who go to Donner Lake fishing should confine themselves to the lake, and not try to "work" any private fish-ponds on the outside. Somebody got chased with a shotgun for that kind of a mistake the other day.

To a good many, half the fun of a fishing excursion is in the anticipation. They talk of it, plan for it, and arrange all the details with the utmost nicety. Then comes the expedition. The other half of the fun is talking it over after it has happened. The excursion itself is of secondary consideration.

Mr. A. Badlam has just returned from Lake Tahoe and reports fine trout fishing in the lake; these trout weigh from one half to three pounds each. He thinks that his success was owing to a peculiar spoon that he used, as several who were with him did not have as good luck. Brook trout along the Truckee river are quite plentiful.

For years it has been a mooted question whether the shad takes the fly intentionally or not, the theory of some observers being that, as the fish congregate in crowds at their favorite resorts, they accidentally breathe the fly into their mouths, and are hooked. They are seldom angled for in Eastern streams, even when the run is strong in numbers.

Anglers predict that in a very few years the trout will all disappear from the valley streams of Montana, owing to the immense numbers carried out into irrigating ditches and into the fields. Screens at the heads of ditches would prevent this.

An enterprising looking countryman with a creel full of fine brook trout, was standing in the doorway of the railroad station at Nameless Springs. A passenger accosted him, and after admiring the fish remarked: "Going to take them home for supper, I suppose?" "Not if I can help it," said the rustic with a grin. "There be a party of city bloods as went fishing from here this mornin'. They're 'spected back soon, and I'm sorter lyin' round waitin' to save their feelin's."

It does not always pay for people in the country to try and claim a whole region. It does not pay either for them to threaten decent people who are quietly hunting or fishing. Here is an example cited from the *Tuolumne Independent*: "About ten days ago a crowd of young men from Sonora went to R. J. Kennedy's cattle range, situated about sixty-one miles east of Sonora, for fishing. Kennedy has a fence around a cañon and claims ten miles square from that line on unsurveyed Government land. He objected to the boys going through the fence for fishing. Sonora boys don't scare very badly at mountain bear. He followed them on horseback seven miles where they were pulling out the speckled beauties in a lively manner. He pulled his six-shooter and said that if they did any more fishing they must do it over his dead body, etc., and otherwise threatened their lives. The eight boys were well armed—especially with fish, when they returned to Sonora. Deputy Sheriff McQuade brought Kennedy to Sonora Thursday evening to answer charges before Justice Miller on Friday. He pleaded guilty of misdemeanor and paid a fine of \$75. It will be remembered that Kennedy dammed the river last year at his premises, causing much trouble."

A CURIOUS FISH STORY.—Some time since one of the Eastern papers published a lot of "fish stories," where each man attempted to tell the longest yarn. Here is one we take from the *Gridley Herald* (Butte County), of last week, which ought to have gone with the other batch. "Fred McCarty, an attache of the *Herald*, met with a singular adventure while fishing in Thresher's Slough, Sunday. He had caught a small catfish, weighing probably a quarter of a pound, and was swinging it into shore when a huge pelican swooped down, gobbled the fish, hook and all, and started to fly away. The sea-grass line proved too strong for the bird and, after a hard struggle, Fred succeeded in pulling the varmint of the air to terra firma, where he speedily dispatched it with a club and got his fish. The bird measured three feet six inches from tip to tip of its wings and weighed about nine pounds and a half. That is one way of hunting birds, but Fred says he'd rather use a gun, as he received several severe raps by the bird's wings before the battle terminated in his favor. Having witnessed the scene, we can vouch for the truth of this item."

A SALMON WEIR.—The following is a description of a salmon trap built by Indians near the mouth of the Spokane river: The Indians have built a solid net work of willow twigs from one bank to the other. Poles were first placed at a distance of some four feet apart, upright in the water. Through these the willow twigs were woven until across a distance of 80 yards there is not a hole large enough to admit the passage of a good sized salmon. This weir is built in such a way that it forms a V, the point down stream. At either bank small wicket doors are hinged in the weir. The salmon comes up the stream and follows one or the other of the sides of the V up to the door, pushing with his nose all the time against the willows. The door opens as he pushes against it and passes through into a small pen, and the force of the current closes the door again ready for the next comer. It is then an interesting sight to see the small boys get into that pen with their spears and take out the salmon. Sometimes as much as 1,000 pounds are taken daily, during a good run, and fish may be seen in the pens at any minute. The fish are cut into slices about 8 inches long and hung over poles to be smoked and dried. The smoking process is only used to keep the meat free from insects while the drying process is going on.

A GENEROUS OWNER.—The *Oroville Mercury* states that Joel Flinn, at his place, situated upon a tributary of Berry Creek, has four fine fish ponds, three of them averaging about a half acre each in superficial area, and the other being about one acre in extent with a depth of water ranging from zero to six feet. Two years ago Mr. Flinn conceived the idea of stocking these ponds with carp, and sent to Sonoma County for his plant, and received twenty-two fish therefrom—German carp, that all arrived at their destination without mishap, and in good condition. Consigning them to his ponds, Mr. Flinn has let them take their chances in breeding, and so well has his plant thriven that the four ponds are fairly alive with fish of various sizes—thousands of them being twelve inches long, while the old ones are more than two feet in length, weighing six or eight pounds apiece, and can be seen lazily disporting themselves in the water as great salmon were once in the clear waters of the California streams. This abundance has induced Mr. Flinn to give the public a chance to angle for carp without cost. This Fall he proposes to drain his ponds, so he can place all of the larger sized fish that are suitable for table use into one of the ponds, excluding therefrom the small fry, and next season let any one who chooses cast their lines and keep to themselves their catch free.

ON RAISING TROUT.

There is no doubt that many make fatal mistakes in stocking streams and turning the fry loose in the swift current. The fish being young are at once swept down the stream and generally settle at the bottom in the eddies and still pores where they are at once gobbled up by other fish of the brook. Mr. P. A. M. Van Wyck suggested this plan to Mr. Seth Green, the superintendent of the N. Y. State Fish Hatchery, as a method of preventing this loss. He says: In stocking brooks with trout fry I always place the young trout in small rills or feeders that empty in the main brook. These rills or feeders always proceed from a fountain-head or spring, and the water in them is always cold and no shiners or small fish are found in them, as the water is too cold for them to live. There the trout fry will stay nearly a year; at the same time they get their natural food from the water, and it is not necessary to feed them, and when they run into the main stream they are large and strong enough to take care of themselves. Last Spring I procured from the New York State Hatchery, at Caledonia, 5,000 California mountain trout fry, and as I had heard so much of this aquatic stranger and had been a long time trying to get a stock I concluded to take extra pains with them. I found a suitable stream in the mountains of Dutchess County. On going well up to the head of the stream I found three small springs. Each spring had an outlet, and all three outlets discharged in one basin which connected with the main stream. I dammed up the basin where the water entered the main stream by pinning down a couple of slabs and filling in with mud on both sides of the slabs. This backed the water and made quite a nice little pond. In it I put my fry and employed a man living on the grounds to look after them during the Summer. They have done splendidly, never being fed since I planted them.

THE KENNEL.

GILROY FIELD TRIALS.

Following are the stakes which will be run at the Gilroy Field Trials, commencing on October 23d:

All-Aged-Stakes.—Entrance fee, \$5. First prize, silver cup; second, gold medal; third, silver medal.

Puppy Stakes.—For dogs whelped on or since January 1, 1881. Three prizes, same as in All-Aged-Stakes.

Brace Stakes.—Each brace of dogs entered to be the property of one owner. Three prizes, same as in All-Aged-Stakes.

In addition to the above prizes, others are expected to be added—donations from leading sportsmen.

Entries to close at 8 o'clock on the evening before the trials.

All entries must be accompanied by the entrance fee; also a full description of the dogs entered, with name of sire and dam (if known), age, color and markings.

Applications for entry to be made to the Corresponding Secretary of the Gilroy Rod and Gun Club, who will furnish on application a copy of the rules governing the trials.

For the convenience of our readers we append the rules under which the trials will be run:

DOGS RUNNING.

1. The dogs shall be run in braces, and the order of their running shall be decided by the Executive Committee by lot, and announced the night previous.

2. Dogs may be handled by the owner or his deputy, but when once put down, they must be handled by the same person throughout.

3. Every dog must be brought up in his proper turn, without delay. If absent more than a quarter of an hour, except it be from some unavoidable accident, he shall be disqualified from running and ruled out.

4. Any owner entering two or more dogs, or any trainer having two or more dogs entrusted to his handling, may run them in braces of his own selection.

HANDLERS OF DOGS.

1. Handlers of dogs may speak, whistle, work by hand and use their ordinary method of training, except shooting game, which shall be left to the judges. A handler may be called to order by the judges for making any unnecessary noise, and if he persists in doing so, they may order his dog to be taken up and ruled out of the Stake.

2. Dogs must be hunted together, and their handlers must walk within a reasonable distance of each other. After a caution, the judges may have power to disqualify the dog whose owner persists in neglecting this rule.

GENERAL RULES.

1. The length of a trial shall be determined by the judges. When they are satisfied, the trial should end.

2. An undecided trial is when the judges cannot agree upon the merits of any dogs, which shall be decided by another trial, and shall stand first in order for the next day.

3. No subscriber or member of the club shall openly impugn the decisions of the judges, nor make any remarks about the dogs within their hearing during the trials.

4. An objection to a dog may be made to the Executive Committee at any time before the conclusion of the trials, upon the objector lodging \$5 in their hands, which shall be forfeited if the objection prove frivolous. Should an objec-

tion be made which cannot be proved at the time, the dog may be allowed to run under protest, the Executive Committee retaining his winnings until the objection has been withdrawn or decided. If the dog be disqualified, the prize, if any, to which he would have been entitled, shall be given to the next dog below him in points.

5. Should any dog be considered by the Executive Committee unfit to run, by reason of being in heat, or other cause, such dog shall be disqualified.

N. B. In the foregoing rules the term dog is understood to mean both sexes.

6. No dog is to be considered a puppy that was whelped before the first of January of the year preceding that of his competing.

7. All entries of dogs shall contain the names of sire and dam (if known), with age, color and markings, and in the puppy stakes, with date of whelping.

8. Any subscriber taking an entry in a Stake, and not prefixing the word "names" to a dog that is not his own property, shall forfeit that dog's chances of the Stake. He shall likewise deliver in writing to the Executive Committee the name of the bona fide owner of the dog named by him; and this communication is to be produced should any dispute arise in the matter.

LEVY ACQUITTED.

Last Wednesday afternoon, D. L. Levy was tried for cruelty to animals before Judge Rosenbaum and a jury in Police Court No. 2. The prosecution grew out of the coursing tournament, so-called, given at the Half Mile Race Track, on July 2d, and was carried on by Officer Hooper, representing the Society for the Prevention of Cruelty to Animals. Considerable evidence was taken, all of which tended to show that the affair was marked by most unsportsmanlike practices and a good deal of unnecessary cruelty, but it was not proven that Levy was responsible for what took place, and the jury returned a verdict of not guilty without a moment's consideration. Had Officer Hooper, who was at the track, arrested the parties that ill-treated the hares right on the spot, he could doubtless have obtained a conviction. Levy showed that he simply gave the prizes and provided the hares, and that the details were left entirely to the gentlemen whose dogs participated. As they all claim to be coursing men they have not the excuse of ignorance which Levy, who never attended a coursing match, might have made. The effect of the prosecution will be to prevent such fiascos in future, and in this respect it has done as much service to sport as though conviction had resulted.

BREEDING NOTIONS.

The following article is by Arnold Burgess, in the *American Field*:

With all the care which in other respects is now given to breeding, it seems very strange to me that so little importance is attached to the adaptation of the dogs bred for each other. By adaptation I mean that comparative proportion of both physical and mental or instinctive qualities which renders one individual a fitting mate for another.

All of our present breeds of animals have been brought up from the original stock by breeding from selected specimens. In a state of nature this is provided for by the law of physical strength, which insures the survival of the fittest, and thus prevents the depreciation which would otherwise follow that inbreeding which is so often quoted as authority for a similar course with domesticated animals. In the curs which run the streets and receive no attention because of no value, the same law of force prevails; but with dogs of more worth, breeding is regulated by the care and theories of the master, and consequently here is just where the necessity for adaptation should be recognized, since without it the law of the fittest is not enforced, and naturally there can be no improvement of the species even if there is no actual depreciation.

The best of our strains of sporting dogs are interbred, and with such, adaptation is specially needed to prevent depreciation as the result of consanguineous unions. The more closely inbred animals are, the more deeply family characteristics are impressed upon them to a certain point, and for this reason inbreeding to a certain extent is necessary, to develop and form a breed possessed of individual attributes which will entitle it to a distinct name. There is a point, however, beyond which inbreeding cannot be carried without loss of even family characteristics. Properly controlled by appropriate unions it produces the best results, but ill controlled or ignorantly followed it is ruinous.

A majority of the men who own single bitches which they breed occasionally, seem to care nothing for adaptation, but select stock dogs simply by their reputations. A light bitch should be sent to a dog of substance, with dash and strength to carry it off; and any particular defect must be corrected by seeking a mate that is specially strong in the opposite. With a well formed and approximately perfect bitch, great care should be taken to mate her with a dog fully her equal, that the good qualities of each may be intensified in the progeny.

The principle which applies to correction of form holds equally good in respect to the higher qualities, the less being supplied from the superabundance of the greater.

In making inquiries respecting a dog, three things should be regarded: First, his own form; next, that of his parents; and last, that displayed by a majority of his progeny. The first is a description of the dog himself; the second shows his hereditary tendencies, which will be intensified by association with a bitch of the same characteristics as his parents, or the one he most resembles; the last shows his abilities as a stud dog, and whether he has the power to transmit his own attributes or not.

As dogs are supposed to be kept for work the field qualities of a stud dog should be rigidly investigated where they have not been publicly shown. What greater blunder can be perpetrated than to send a fine field bitch to a dog that is not a fielder, simply because he is well bred and handsome? The prepotency of good blood will, it is true, produce a large number of good working dogs from even such unions, but it is also true that some of the progeny will display the lack of field quality of their sire, as surely as they would inherit any other deficiency from him. To breed to a dog that is not a fielder is to perpetuate a race of dogs that are not fielders, and for this reason this quality should be a *sine qua non* with all who seek the services of stock dogs.

By such inquiries as I have indicated the adaptation of proposed unions can be determined and the law of nature obeyed. We cannot violate any law without incurring a penalty that will certainly be exacted. It may not be recognized at first, but it will ultimately manifest itself and prove the folly of the act which called it into existence. Nature compensates or punishes all who obey or disobey her laws, and

as the *summum bonum* is an approximation to perfection, this can be most quickly and certainly reached by observance of those principles upon which depend the influences which control the development of races.

FIELD TRIAL ENTRIES.

The first of the great American Field Trials is the American Field Trial Derby, open to all setters and pointers born on or after March 1, 1881, to be run on pinated grouse or prairie chickens, commencing September 4, 1882, at Fairmont, Minnesota. Purse \$450; of which \$200 to first, \$125 to second, \$75 to third, \$50 to fourth; \$5 forfeit, \$10 additional for starters. Closed July 1st with forty-four entries, as follows:

SETTERS.

Mr. R. B. Morgan's Prairie Wonder, by Prairie Joe—Prairie Queen.
Sportsman's Kennel's Prairie Molly, by Prairie Joe—Prairie Queen.
Mr. D. C. Sanborn's Gus Bondhu, by Dashing Bondhu—Novel.
Mr. D. C. Sanborn's Gaze (late Blaze), by Count Noble—Spark.
Mr. D. C. Sanborn's Countess Magnet, by Count Noble—Spark.
Mr. D. McKinney Lloyd's Count Dad, by Count Noble—Nellie.
Mr. J. A. Titcomb's Old Walt, by Lincoln—Daisy Dean.
Mr. Jos. H. Dew's American Dan, by Lincoln—Daisy Dean.
Messrs. B. F. Wilson and J. J. Snellenburg's Josephine, by Don—Cora.
Mr. Otto Donner's Dashing Belle, by Decatur Dash—Bessie.
Mr. J. Otto Donner's Mate, by Paris—Fair Belle.
Mr. J. J. Snellenburg's Queen Laverack, by Tolly—Meg Merriles.
Mr. H. Widdicombe's Prince, by Count Noble—Nellie.
Mr. H. Widdicombe's Countess Nellie, by Count Noble—Nellie.
Mr. W. C. Berringer's Monte Cristo, by Thunder—Bess.
Mr. J. Pinner O'Neill's Aemc, by Zip—Juno.
Messrs. Willard Bros.' Renuis, by Zip—Juno.
Mr. W. B. Gates' Carrie J., by Count Noble—Peep o' Day.
Mr. W. B. Mallory's Pink B., by Gladstone—Countess Key.
Dr. C. H. Tidd's Minnie, by Fred—Allena May.
Mr. H. A. Clock's Del, by Fred—Allena May.
Mr. A. M. Weinhardt's Davy Crockett, by Sam II—Fan.
Mr. E. E. Hardy's Elsa, by Drake—Countess May.
Mr. W. J. G. Dean's Zarina, by Druid—Magnolia.
Mr. W. J. G. Dean's Zuda, by Druid—Magnolia.
Mr. A. M. Decker's Scot, by Bob—Flash.
Mr. George C. Marsh's Gilderoy, by Druid—Princess Draco.
Mr. S. H. Turrill's Doctor, by Pembroke—Royal Gift.
Mr. S. H. Turrill's Frank, by Blue Dash—Fipp.
Mr. John D. Ludd's Countess Mollie, by Count Noble—Spark.
Mr. Howard Hartley's Daisy Queen, by Rock—Flame.
Mr. J. Hayward, Jr.'s Count Campbell, by Joe Jr.—Belle of Nashville.
Mr. Ariel Low, Jr.'s Winfield.
Mr. S. W. W. Straights' Dashing Rip, by Cline—Naney.
Mr. A. S. Bishop's Flirt, by Thunder—Minerva.
Mr. Will Davidson's Bob Carl, by Bill—Moldum.
Dr. S. Fleet Speir's St. Elmo IV, by St. Elmo—Clio.
Mr. B. L. Hurd's Katy Did, by Guy Maunering—Whirlwind.
Mr. J. R. Henrick's Dashing Dick, by King Dash—Skip.
Mr. Luther Adam's Countess May II, by Drake—Countess May.

POINTERS.

Mr. J. J. French's Prairie Rose, by Rival, Jr.—Queen Hamlet.
Mr. James Stinson's Cavalier, by Little Ruffian—Flight.
Mr. James Stinson's Doon, by Sefton—St. Clissor.
Mr. George E. Poyneer's Buster, by Bang—Jean.

GORDON MEASUREMENTS.—Below are the measurements of a Gordon setter in good working condition. They may be accepted as the representative of a first-class dog, more likely to shine in the field, however, than on the bench:

Height.....	24 inches
Length of head.....	10 inches
Girth of chest.....	28 inches
Round cranium.....	16 inches
Round forearm one inch below elbow.....	7 1/2 inches
Length of tail.....	16 inches
From nose to end of stern.....	41 inches
From eye to end of nose.....	43 inches
Weight.....	63 pounds

DEATH OF DR. ATEN'S GLEN.—Dr. Aten's Glen died at Centerport, Long Island, on Thursday, July 20th, from poison administered by some miscreant whose life would be considered by many of much less value than that of his victim. Glen's age, at the time of his death, was eight years, and he had been a faithful companion both at home and in the field. He was thoroughly broken, and few canines could add more to a man's pleasure than he, coupled with Ned, also gone to the happier hunting grounds. He was winner of first in the Brace Stakes, at the inaugural trial of the Eastern Field Trials Club, at Robin's Island in 1879; and in 1880 divided with Sensation the third and fourth prizes in the All Aged Stakes of the same club. Though not a bench show dog, he was always considered by the different judges before whom he was shown as worthy of a V. H. C., and his stall was always surrounded by many admirers. He was also the winner of two silver medals given by the Westminster Kennel Club in 1880 and 1881, for the best black and tan with a field trial record. His disposition was of the best, and his loss will be greatly deplored by his many friends, as well as his owner, who has my heartfelt sympathy. "Peace to his ashes." F. N. H.—*American Field.*

THE HERD.

SHEEP AND IMPROVED FARMING.

Sheep have played a most important part in the improvement of the soil in all civilized countries. At an early period sheep were kept mostly for their wool in all countries; but as population increased, and greater demand was made upon the soil to furnish food, mutton became the principal object of sheep farming and wool the incident. During this transition state skillful breeders made a long, careful and practical study in improving the carcass and its early maturity. Instead of keeping sheep to their full age as breeders and producers of wool, the most persevering effort was made to mature them for a profitable market at the earliest date. This was done by judicious selections in breeding and the most generous feeding. The sheep, like other animals, was found plastic in the hands of a skillful breeder and feeder. It was soon found that the improved Southdown and Cotswold could be fitted for the most profitable market at from six to fifteen months old, except those required for breeders, and these were most profitably turned at four to five years old, instead of at seven to ten years.

This transition to the strictly mutton breeds was first accomplished in England, in the perfection of the Leicester, Cotswold and Southdown. France is succeeding in transforming the Merino into a profitable mutton breed, by the most generous system of feeding. This transformation was produced at the breeding establishment of Rambouillet. At this establishment, the small-bodied, short-fibered, thin-fleshed, slow-maturing Merino has become of larger size, carries a slightly coarser and longer fiber, a heavier carcass, and a heavier fleece, more readily takes on flesh, and matures much earlier. Our American Merinos, in the hands of skillful breeders and feeders, are undergoing the same transformation. But still these sheep are not as well adapted to the production of mutton as the English mutton breeds; and, in this country, a cross between the Cotswold and the Merino has given satisfaction to some skillful breeders who have made it.

The consumption of mutton is increasing in this country, especially in our large cities, and it has become profitable to supply this demand. It is profitable, first, because the price is remunerative; and secondly, because it is promotive of good husbandry—the improvement of the soil.

The various cereal crops are depleting, rapidly exhausting to the soil; but a crop of mutton or wool takes but an imperceptible fraction, and, under the best management, adds to its fertility.

The mineral matter taken from the soil by a five-pound fleece of wool is only 1.6 ounces in a year, and 5 ounces of nitrogen. In order that the reader may see what part of the food is stored up in the body of the sheep, and what is passed in the solid and liquid excrement, we will quote from the German tables of experiments: It was found that when sheep consumed 100 lbs. of nitrogen in their food (being barley meal), 16.7 lbs. was voided in the solid excrement, 79 lbs. in the liquid excrement, and 4.3 lbs. was stored up as increase of the body. Thus 95.7 per cent. of the nitrogen of the food was voided in the excrement, leaving as a loss to the soil (stored up in the body) only 4.3 per cent. Of the mineral or ash constituents of the food, it was found that sheep voided in the excrement 96.2 per cent., and used in the body only 3.8 per cent. When sheep were fed upon good clover and meadow hay, the solid excrement contained, of ash 3.5 per cent., of nitrogen 0.7 per cent.; whilst the urine contained, of ash 5.6 per cent., of nitrogen 1.4 per cent.

The clover crop is believed to accumulate nitrogen in the soil, by absorbing it from the air, and, as we see, it is nearly all recovered in the excrement of the sheep. If, then, clover and other grasses are fed off upon the land by sheep, the fertility is even increased. This explains the Spanish proverb, that "the foot of the sheep is golden." We wish, also, to call the reader's attention to the important fact found in these experiments, that the urine is much more valuable than the solid excrement. This also holds in the excrement of other stock. What a tremendous loss, then, occurs when the liquid is allowed to wash off into the nearest stream! How very important that farmers should prevent this loss.

Large cities are now growing up all over the country, and mutton production is to be one of the most profitable of farm industries in the near future. Let farmers study and understand the whole question.—*National Live Stock Journal.*

IMPROVING DAIRY BREEDS.

Mr. I. K. Felch, who acquired celebrity as a poultry breeder, seems to be blossoming out in dairy cattle. In a communication to the *American Cultivator*, he advocates the crossing of dairy cattle. He says it is far safer to use a sire from remarkable ancestry with ordinary cows, than to breed cows of excellence with ordinary bulls. The former practice produces the best and most prolific progeny, in the ratio of sixty to forty.

There is no doubt about this proposition, but it is not new with Mr. Felch, neither is the statement which follows, of the transmission of quality by sire, and quantity by dam, altogether new; but these qualities are not constant. He states what he considers a remarkable circumstance, in which the progeny of a Jersey bull and an Ayrshire cow made 356 pounds of butter in twenty-seven weeks, besides furnishing milk for household use in a family of seven, who were not stinted in quantity consumed nor confined to skim milk.

The gist of the article is that a Jersey and Ayrshire cross will produce the best possible butter cow of the country. It is not at all likely. There are differences between the two breeds that will not blend kindly. The Ayrshire is superior in the yield of milk—not so much so, however, as the Holsteins. The Jersey excels in the quality of her milk. The first cross may be valuable, but it by no means follows that the succeeding progeny would follow to the line. In fact they would not. They would "strike back" through heredity to one or the other of the parents, and in the hands of the ordinary breeder would rapidly deteriorate. In the hands of the most successful and scientific breeders, it would take long years of breeding to produce animals that would uniformly and constantly combine the peculiar excellence of each, and then only relatively. In fact, practically, it cannot be done, if we judge by the results obtained by eminent breeders in the direction of beef. Neither has it yet been done in the dairy breeds. In other words, it is not in animal nature, no more than in human nature, to combine all known excellence in individuals as a rule. As the results of the most careful and long continued breeding, the highest excellence is only attained at rare intervals, and then not covering the greatest excellence in quality and quantity of beef, or the greatest quantity and best quality of milk.

Our advice to Western dairymen is to stick to breeds of known capability rather than to seek after something better by crossing pure breeds. In crossing upon common stock, use bulls of the breed known to inherit the qualities you seek. Here you cannot err. You must inevitably breed up. Not uniformly, of course, yet you will seldom get an animal inferior to the dam. In crossing pure breeds with a view to improvement, the result will not be so favorable. Therefore, improve the common stock of the country by using pure males on selected females, but don't waste time in improving pure breeds by crossing onto another pure breed.

POULTRY.

FOWLS FOR BREEDING PURPOSES.

Where uniformity of size, general health and vigor, as well as color and beauty, are desired, great care must be exercised with the breeding stock. It matters little whether the chicks to be reared are for renewing the stock or for market. If a pure breed is desired in full perfection, the stock fowls must not only be well bred, but strong, vigorous, full of health, and of uniform size and markings. Nothing great or fine may be expected from low origin. Highly bred fowls may deteriorate from lack of keeping. I have seen that fact fully illustrated. That chicks hatched from well fed, highly bred birds require better keeping and care, I am compelled to believe, from experience, while at the same time I am fully able to testify to the fact that they are far more profitable and pay the keeper better.

In procuring fowls for stock purposes, either by means of eggs or the birds themselves, sufficient attention should be given as to whether the origin is good, in the first place, and in the second, if they have been well kept. Good feeding brings out the fine points in full perfection, and this is what is desired. If the blood is not there, then the points can not be brought out. There is no loss in full feeding of any kind of poultry. Any one observant of their habits knows

that fowls are regular and persistent feeders. The more feed the more profit, either in eggs or flesh. Egg farmers, those who keep poultry for the eggs, have no mean calling; but it is a mistaken idea that it is done without labor. For this reason, it is better to begin with good standard stock. The advantages and satisfaction are always greater. It is folly to obtain good stock and afterwards treat it with neglect, and then, because it did not come up to expectations, berate the breed.

If eggs are obtained from first-class, highly-fed and cared-for stock, reason teaches us that the chicks, in order to arrive at the perfection of their parents, must have similar care. The eggs have been produced under certain circumstances, and the chicks must have similar treatment. This is why breeders ask and get full prices under all circumstances. It is just; it keeps the stock out of the hands of all except those prepared to give the best care, thus securing the good reputation of the breed. Finely bred chicks, while hardy, are like hothouse plants, and will not bear neglect. Uniformity is not always obtainable in the broods that are reared. There are exceptions to every rule. For stocking up purposes the finest should always be selected, and only those bred from. Thus the vigor and thrift of the flocks is kept up, as well as the markings of the breed. Breed is an excellent thing, and care and feed are also good. All united bring about grand results. Where only a few fowls are kept for breeders, and the whole attention is given to those few, the chicks are much finer. Fowls that are producing hatching eggs, however, should not be forced, as in that case the eggs are produced too rapidly, and are not sufficiently fertilized. Breeds differ greatly as to the number of hens allowed to a cock. It also makes a difference whether the fowls are at large or in confinement. Fowls should have a long run when laying the hatching eggs.—*Country Gentleman.*

A new paper from the Pacific Coast makes its appearance here, the *SAN FRANCISCO BREEDER AND SPORTSMAN*, the first number of which was issued July 1st. It is well got up and printed, and although taking general notice of sporting matters, is devoted largely to breeding and trotting interests. The Toronto correspondent of the *BREEDER* is Mr. James Lang, who is well qualified to attend to its interests.—*Toronto Mail.*

[SAN FRANCISCO CORRESPONDENCE OF NEW YORK SPIRIT OF THE TIMES.]

NOTHING LIKE IT IN THE WORLD.

This city is a strange one, in many respects, to the visitor; it presents one constant series of surprises, and gives abundant cause for admiration and wonder. The climate, soil and scenery all unite to impress upon one the vast reserve force that nature has here laid up. The ground yields more and richer grain and fruits than anywhere else; her mines pour forth their golden streams as from an exhaustless source; the forests grow such trees that the heads thereof rest upon pillows of clouds; and her vineyards and hillsides grow the fruit for half a continent. Such is the nature and yield of our products of the earth, and the people of this coast. They are a people *sui generis*; enterprising, active, pushing—leaving nothing unturned that will conduce to prosperity—they reach forward to success, and grasp it, too. Even the very horses that plow the fertile fields or draw the handsome turbot seem to feel the influence of the climate, and show, by step and action, their keeping and attention.

However, even with all these superior influences and advantages, stock will sometimes go below the level of high health, and require the services of something more than just the advantages of place and surroundings, merely. This something is known and fully appreciated in this community, as the following will show:

Your correspondent desired to take a ride a few days ago, and called at the St. George's Stables, Bush Street, near Kearney, this city. Mr. J. W. Murphy, the good-natured and accommodating proprietor, extended a genial salutation, and wanted to know what he should do in the way of a turnout. We could have the best, if we wanted it, and "the best" of the St. George's always means the best that the city affords. As the harnessing was going on, your writer, observing a box of St. Jacob's Oil, said, by way of gathering Mr. Murphy's opinion:

"I'm bent on pursuing this St. Jacob's Oil to the utmost limit."

"St. Jacob's Oil?" interrogated Mr. Murphy; "why, my old fellow, I am just the man to post you on that subject. I can tell you more about that witch medicine in ten minutes than any man in town. Why, we just swear by that wonderful sort of mixture in this establishment; don't we, Tim?" and he turned toward one of the hostlers at work on a fine-looking piece of horseflesh in the rear of where we stood.

Tim nodded assent and pursued his work, while Mr. Murphy went on to say: "You see that box standing there on my office desk? Well, I wouldn't be without it for its weight in gold. It has cured many a valuable animal in these stables. Our stock gets pretty rough usage sometimes. I hate any man that will abuse a horse," he threw in parenthetically; "he ought to be tied to a post, and get fifty lashes. But I was going to say that, let a horse come in with a cut, sore, or swelled limbs, St. Jacob's Oil will straighten him out in no time. For sprains, galls, swellings of the joints, and, I might say, any other sort of ailment, that medicine is just wonderful. It works like magic. I have had all sorts of preparations in my time, but I never saw anything that could begin to accomplish what St. Jacob's Oil will do. I would not give it for them all put together. In fact, I don't believe there's anything that will compare with it. There's nothing like it in the world."

Such is the opinion and sentiment of one of the most experienced judges of horseflesh, its needs and requirements, on the Pacific coast; an opinion (so we are informed) that obtains among the most skillful and critical horsemen of the country.

G. H. STRONG,
BICYCLES AND TRICYCLES,
252 MARKET STREET.

Repairs to order.

Elevator, 12 Front street.

S. S. SAMPLE.

J. T. Gilmer enters b s Red Boy, by War Dance; dam Nielson.

No. 9—DISTRICT—RUNNING—For three-year-olds and over; purse \$500; best two in three; 7 to enter, 4 to start. Four moneys.

Jack Douglass enters ch s s Jack Douglass, by Wildidle; dam, Lady Clare, by Norfolk.

W. L. Asher enters br g Reel Terry, by California; dam, Laura Barnett.

Colonel C. Dorsey enters br c Bird Catcher, by Specter; dam, Pet, by Young Melbourne.

William M. Murray enters s h Samuel Stevenson, by Thad Stevens; dam by Rifenman.

G. W. Trahern enters s m Kate Carson, by Joe Daniels; dam by Norfolk.

John Miller enters br m Picnie, by Joe Daniels; dam by Norfolk.

J. A. Shepherd enters g m Minnie Belle, by Joe Daniels; dam by Norfolk.

Seth Peyton enters b g George Bender, by —; dam, Sugar Plum, by Lodi.

J. M. Randall enters g s Joe Daniels Jr., by Joe Daniels; dam, Julia, by Neua Sahib.

A. Miller enters b m Lady Partizan, by Partizan; dam, sister of Tommy Chandler.

M. E. Piggott enters br c Idler, by Wildidle; dam, Kate Gift, by Lodi.

No. 10—PACIFIC COAST TROT—For horses owned on the Pacific Coast, July 1st, 1882; 2:22 Class; purse \$1,500, and \$500 added if more than ten subscribers. The nominator not required to name his horse, but simply send his cash (\$150) with his own name, August 1, 1882. He has then earned the right to start any horse eligible that he may fully control, provided the horse he starts be named to the Secretary, September 1, 1882. Four moneys.

Nominators—Charles W. Welby, G. Valensin, John A. Goldsmith, L. H. Titus, J. B. McDonald.

SATURDAY, SEPT. 23D.

No. 11—PACIFIC COAST TROT—2:28 Class; purse \$1,000, and \$200 added if more than ten entries. Four moneys.

D. McCarty enters b g Hancock.

H. R. Covey enters Leland Stanford's br g Captain Smith, by Locomotive; dam, Maid of Clay, by Henry Clay.

G. Bernard enters g g Allen Roy.

Elijah Downer enters Eugene Mara's ch g Thmp Winston (formerly Kent), by Primus; dam, Lady Don.

A. Waldstein enters b s Albert W., by Electioneer; dam by John Nelson.

John A. Goldsmith enters bl s Director, by Dictator; dam by Mambrino Chief.

John A. Goldsmith enters b m Sweetness, by Volunteer; dam by Edward Everett.

S. Sperry enters J. and W. S. Fitch's ch m Nellie R., by General McClellan, Jr.; dam, Susie Rose.

W. D. Hammond enters g s Poscora Hayward, by Billy Hayward; dam, Lady Poscora.

No. 12—PACIFIC COAST PACING—2:25 Class; purse \$400, and \$200 added if more than ten entries. Four moneys.

T. J. Young enters s g Colonel Dickey.

G. Valensin enters b m Ouida.

L. E. Yates enters b m Corlette, by Winthrop; dam, Corby, by Lady's Kentucky Hunter.

E. S. Denison enters s m Lady Hays, by Hiram Tracy; dam, Nelson mare.

A. L. Hinds enters W. M. Hammond's s s Oakland Boy, by Winthrop; dam, a Blackbird mare.

In addition to other premiums, H. T. Dorrance will offer a set of choice track harness, valued at \$65, for the horse owned in the District that makes the fastest trotting record at the Stockton Fair. He also offers a \$25-jockey saddle to the horse that makes the fastest running mile record owned in the District at the Fair.

Irving Ayres, owner of Mambrino Wilkes, offers a special premium at our Fair, a silver tea-set and waiter, for the best two-year-old colt sired by the above horse. Also, for the second best colt, a silver water piteber. The colts to be shown at the Stockton Fair.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.

In all these Races (Pacific Coast Novelty Race excepted) four moneys, 50 25, 15 and 10 per cent. of purse.

When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.

Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.

All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above; otherwise, old weights to govern.

For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.

Horses entered in purses can only be drawn by consent of the Judges.

The Board reserves the right to change the day and hour of any race, if they deem it necessary.

Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as especially provided.

In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.

Races to commence each day at 1 o'clock p. m. sharp.

The track is first-class, having been improved. Stables hay and straw free to competitors.

L. U. SHIPPEE, President.

J. L. PHELPS, Secretary.

If, a horse

reaches all the quarter poles and home first, that horse wins the whole purse.

REMARKS AND CONDITIONS.

These races are open to any horse owned in the Ninth District (composed of the counties of Del Norte, Humboldt and Mendocino) by a bona fide resident of the district, on the 1st day of July, 1882.

In all races three or more to enter, and two or more to start. Any horse distancing the field receives the entire purse.

Entrance fee, 10 per cent on purse, to accompany the entrance.

All entries in these races must be made with the Secretary by seven o'clock on the evening previous to the race, except in the case of the horses named and entered in the name of the owner, who must be a member of the association, and the entrance fee paid in full.

The trotting races will be conducted under the rules of the National Trotting Association, and the running races under the rules of the Pacific Blood-Horse Association.

All horses entered for a race will be under the control of the Judges from the moment they are brought on the track.

If from any cause there shall not be a sufficient amount of money received from all sources, including appropriation from the State, to pay all purses and premiums in full, after paying the expenses of the fair or exhibition, the same will be paid pro rata.

Neither the association, the Directors nor officers in any event to be liable for any purse or premium beyond such pro rata amount.

OFFICERS OF THE BOARD.

G. C. BARBER, Ferndale.....President

S. H. CRABTREE, Robnerville.....Secretary

MORRIS LEVINGER, Robnerville.....Treasurer

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the 10. mile trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday the Monday previous; and on Friday the Wednesday previous, by twelve o'clock, M. This rule is obvious, and must be strictly adhered to.

No added money paid for a walk over.

Horses entered in purses can only be drawn by consent of Judges.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

EDWIN F. SMITH, Secretary. HUGH M. LARUE, President.

Golden Gate Fair.
